

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Thursday 06 Sep 2012

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Central and southern England, and much of Wales, generally dry, sunny and warm tomorrow. Bright spells also developing for northern Scotland through the afternoon. In between, so for the rest of Scotland and much of northern England, largely cloudy with patchy, mainly light rain at times.

Outlook for Saturday and Sunday:

Warm sunshine in the south on Saturday, but cloudy with a few spots of rain in the north. Mainly sunny and very warm on Sunday, locally hot in the southeast, but cloud and showery rain pushing across northern and western areas later, and perhaps the odd shower breaking out elsewhere later in the day.
