

FPUK86 EGRR 071745
Forecast for the UK.
Issued by the Met Office
at 1945 on Tuesday 7 June 2005

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
For England and Wales, there's another dry, sunny day in store.
Southeastern parts of both Scotland and Northern Ireland will also be
bright. However, for most it will be rather cloudy with a little
showery rain affecting northwestern regions, the odd light shower
also possible elsewhere. In mainly light winds, it will feel warm in
sunnier inland areas but cooler near coasts and under cloud.

Outlook for Thursday and Friday:

Warm sunny spells for many southern and western parts on Thursday
while the north is cloudier with patchy drizzle. Friday, cloudier for
many southern parts while the north brightens up but, again, most
parts dry.
