

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Monday 08 Sep 2008

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Cloud and outbreaks of occasionally heavy rain over Northern Ireland, western Scotland, northwest England, Wales and southwest England, will extend northwards and eastwards during the day. Rain will be heavy at times, especially across central areas, but southeastern areas are expected to remain mainly dry and bright, where it will feel warm. Southwest England and Wales will brighten up later.

Outlook for Wednesday and Thursday:

It will be wet and windy over Northern Ireland during the morning, then outbreaks of heavy rain spreading to western Scotland, Wales and southwest England later in the day. Remaining drier and brighter in more southern and eastern areas throughout.
