

FPUK85 EGRR 120400  
Forecast for the UK.  
Issued by the Met Office  
at 0400 on Wednesday 12 July 2006

\*\* Valid for Broadcasts Between 0600 and 1200 \*\*

Headline:

Band of patchy rain edging southwards. Otherwise dry, sunny periods.

Today:

Cloud and patchy rain across Scotland and Northern Ireland edging southwards, the rain mostly dying out. Sunny ahead of the rain across England and Wales, Scotland and Northern Ireland turning sunnier from the north.

Tonight:

Cloudy for central areas, perhaps a few spots of rain. Otherwise dry with clear spells.

Outlook for Thursday:

Mostly dry and warm with some sunshine. Cloudier in the south.
