

FPUK86 EGRR 041745
Forecast for the UK.
Issued by the Met Office
at 1945 on Thursday 4 May 2006

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Any cloud and outbreaks of rain still affecting eastern Scotland and
northeast England will clear in the morning, the whole of the UK then
having a dry and warm day with plenty of sunshine after early mist
and low cloud clears. However some low cloud may linger into the
afternoon near southern coasts.

Outlook for Saturday and Sunday:
Some dry, warm and bright spells especially over northern Scotland,
but overall a rather unsettled weekend is expected with outbreaks of
rain spreading northwards, some very heavy and thundery. There'll be
mist and low cloud at times on North Sea coasts.
