Here is the forecast for the United Kingdom for daytime tomorrow :
Eastern areas of both Scotland and England will have a cloudy day with mist and low cloud especially near the coast with some drizzle likely also. Western then some central areas will have sunny spells develop for a time as low cloud clears although as temperatures rise, scattered heavy showers will develop. Onshore winds may bring patchy mist and low cloud to some southern and western coasts. Warm again in sunnier western and central areas, but noticeably colder over cloudy eastern counties especially on windward coasts.

Outlook for Sunday and Monday:
Mostly cloudy with an increasing risk of rain. Continuing cold near east coasts.
