

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Monday 05 Dec 2016

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Wet and windy weather will spread across Northern Ireland and western Scotland on Tuesday, although many parts of eastern Scotland should remain dry. Elsewhere, it will be a dry but cloudy day for most of us. There will be a chilly feel, particularly where patchy mist and fog persists, but turning a little milder in the southwest.

Outlook for Wednesday and Thursday:
Milder but still rather cloudy for all parts on Wednesday. There will be some wet and windy weather across the northwest of the UK, but mainly dry elsewhere. A drier spell of weather for most on Thursday, with some bright or sunny spells.
