

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Thursday 07 Jul 2016

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Rather cloudy start for many parts with areas of rain pushing eastwards.  
However, drier and brighter conditions will spread down from the northwest  
through the morning to leave a fine afternoon for most with sunny spells and  
isolated showers. However, it will likely remain cloudier in the far south of  
England.

Outlook for Saturday and Sunday:

Saturday will be an unsettled, humid and, for many, windy day with bands of rain  
or heavy showers pushing northeastwards across the UK. The best of the drier,  
brighter weather will be across southeast England where it will become very  
warm. Less humid on Sunday with sunshine and showers.
