

FPUK86 EGRR 301745  
Forecast for the UK.  
Issued by the Met Office  
at 1945 on Monday 30 October 2006

\*\* Valid for Broadcast at 2159 \*\*

Here is the forecast for the United Kingdom for daytime tomorrow :  
A cloudy, windy morning is expected across northern parts with some outbreaks of rain, but this should clear southeast to leave a dry afternoon with sunny spells. A largely fine start for southern parts, but it will become cloudy with occasional light rain, clearing later. Cooler than of late.

Outlook for Wednesday and Thursday:  
Largely dry and sunny with light winds on Wednesday after a chilly start. However, eastern parts will see more cloud and some scattered, blustery showers in a cold northerly breeze. Another chilly start on Thursday, but generally fine, dry and sunny. Southeast and southwest England may see some light showers though.
