

FPUK86 EGRR 311745  
Forecast for the UK.  
Issued by the Met Office  
at 1945 on Saturday 31 January 2004

\*\* Valid for Broadcast at 2159 \*\*

Here is the forecast for the United Kingdom for daytime tomorrow :  
Northern Scotland, a cold and frosty start but with rain spreading  
northeast, preceded by sleet or snow.  
Northern Ireland and the rest of Scotland: further bands of rain  
spreading northeast but some drier and brighter spells as well.  
England and Wales:- bright or sunny spells at first but with rain  
spreading from the southwest from late morning onwards, although with  
southeastern areas staying mainly dry until evening.

Windy at times, especially in the west with a risk of gales. Cold in  
the north at first otherwise most places mild.

Outlook for Monday and Tuesday:  
Cloudy, mild and windy with rain at times, some heavy.
