Daily Weather Summaries for August 2022

If you have any questions or feedback about this product or wish to obtain further data please contact the Met Office.

This document contains daily weather summaries for each day of August 2022. The Met Office National Meteorological Library and Archive holds a continuous record of daily weather summaries or daily weather reports from 1860, and these daily weather summaries form a continuation of that series.

The purpose of each summary is to provide an overview of the weather conditions across the UK on that day, with the historical emphasis mainly based on observations from surface network of weather stations, although the format has varied over the decades. While the emphasis remains on observations from the surface network, the current daily weather summaries supplement these by including satellite and rain-radar imagery to provide a more complete overview. The current format of the daily weather summaries is as follows:

1. Text summary of the main characteristics of the weather during the day, written by an operational meteorologist in the Met Office operations centre.
2. Table of daily extremes for the UK for key climate variables including temperature, rainfall, sunshine and gust speeds.
3. Overview of the synoptic situation at 00 and 12 UTC comprising: analysis charts showing the surface pressure pattern and associated weather fronts; North Atlantic and European infra-red satellite images showing cloud-cover; combined infra-red and rain-radar images of the UK; maps of wind speed and direction at 00 and 12 UTC; observations of pressure, wind speed and direction, cloud cover, air and dewpoint temperature at selected UK and European stations in data tables.
4. UK maps of key climate variables from observing stations including maximum, minimum and grass minimum temperature, rainfall, sunshine, gust speed and snow.
5. Further guidance notes

If you spot any data errors or omissions in this product please contact the Met Office.

This issue of the daily weather summary provides data for the following UK and European locations (Reykjavic (5) also included):

Daily Weather Summary for Monday 01 August 2022

This day's summary created 08/08/2022 03:04

Summary of the UK Weather for Monday 01 August 2022

It was a dry start to August for most, with just a few sparse showers in Northern Ireland and the Western Isles. The cloud was thickest over Wales and central England, with the best of any clearer skies over Scotland and southeast England. Winds were light and variable throughout. Dry conditions continued for most through the day. Cloud cover over the central parts substantially reduced through the morning to give bright periods for many in the early afternoon. A vast band of cloud and rain approached Northern Ireland around midday and continued to progress northeastwards, reaching western parts of Scotland and northwest Wales by the early evening. This brought rain to many northern, western, and some central areas by the end of the day. The southeast remained largely dry.

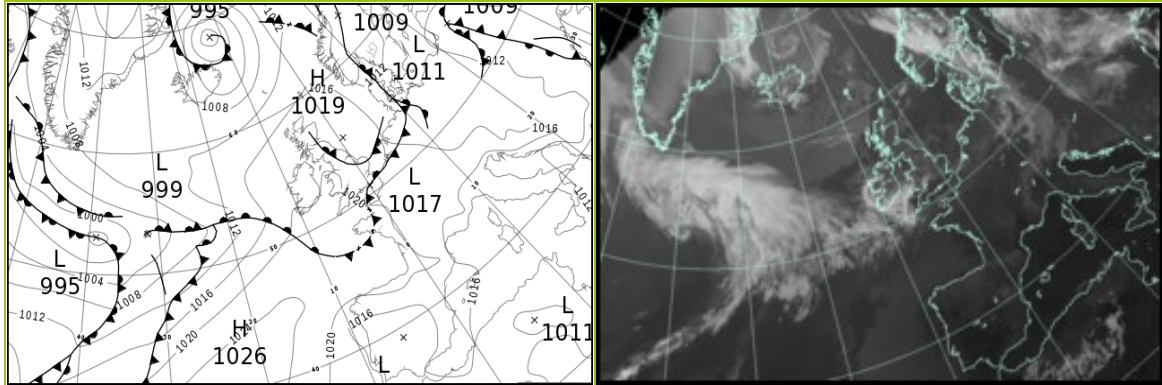

Daily Extremes

<i>Highest Maximum</i>	28.2°C Charlwood (Surrey, 67mAMSL)
<i>Lowest Maximum</i>	14.8°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	18.1°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Minimum</i>	1.4°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL) also Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	-2.3°C Tyndrum No 3 (Perthshire (in Central Region), 168mAMSL)
<i>Most Rainfall</i>	116.2mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	10.8hr Kirkwall (Orkney, 26mAMSL)
<i>Highest Gust</i>	38Kt 44mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	50Kt 58mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

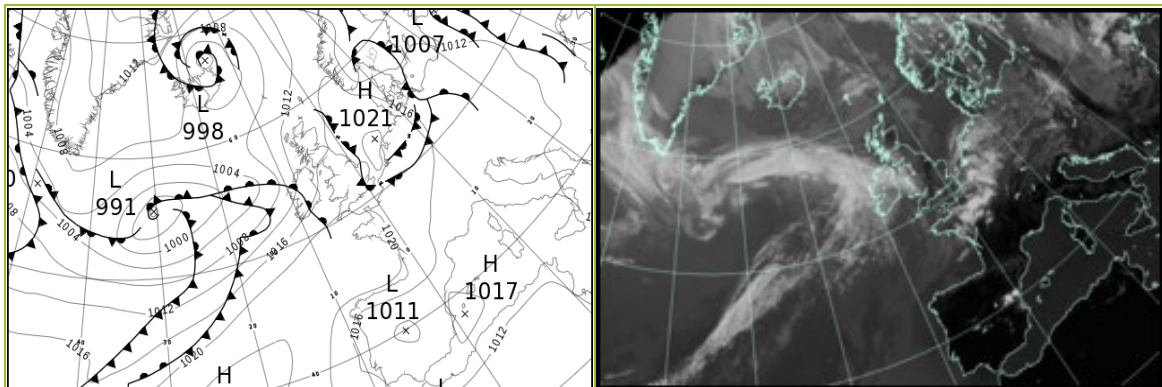

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 01 August 2022

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

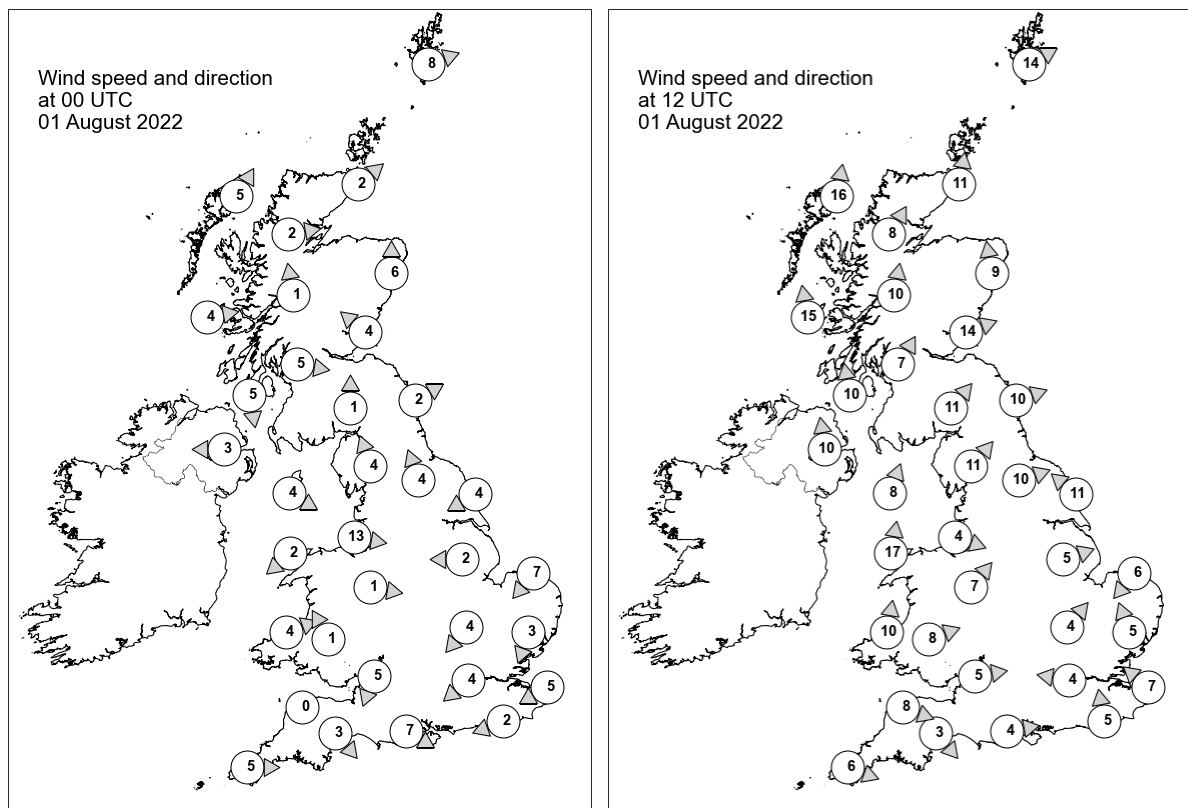

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

Daily Weather Summary for Monday 01 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 02 August 2022

This day's summary created 09/08/2022 03:03

Summary of the UK Weather for Tuesday 02 August 2022

A band of rain running most of the length of the UK moved eastwards through the night, however it quickly faded in England. A cold front then moved into southwest Scotland bringing heavy and thundery rain for a time. North Wales also experienced heavy rain before dawn, and this also spread into northern England at times. Winds were moderate westerlies or south westerlies throughout. A large band of thundery rain moved across central and northern parts of England and north Wales through the morning, bringing lightning to parts of Cumbria. As it moved eastwards the rain died out, becoming scattered showers for most by midday. Western parts of Scotland and the south coast of Wales also experienced showers. By the afternoon, much of the precipitation had died out, leaving most areas dry with variable amounts of cloud. Eastern coasts and parts of southern England saw the most sunshine, but these areas were also particularly humid. It was breezy in the northwest, but elsewhere winds were light.

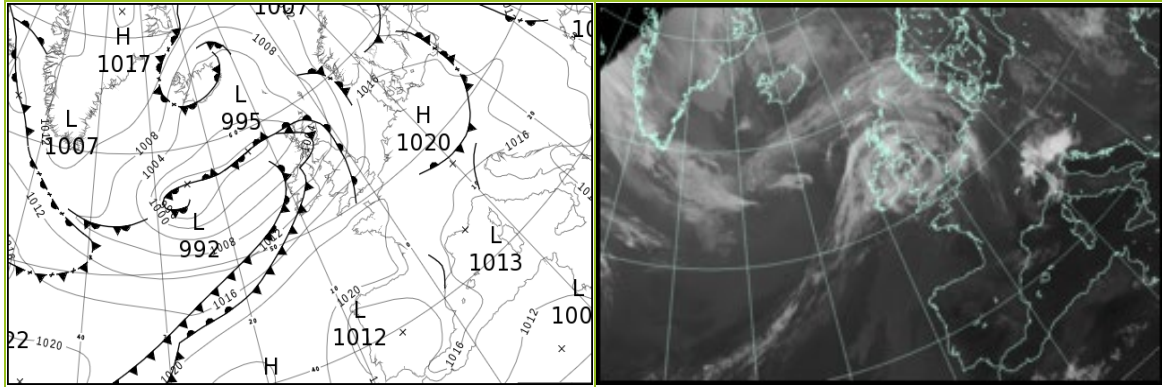

Daily Extremes

<i>Highest Maximum</i>	29.5°C Monks Wood (Cambridgeshire, 41mAMSL)
<i>Lowest Maximum</i>	16.1°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	19.1°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	9.0°C Baltasound No 2 (Shetland, 15mAMSL)
<i>Lowest Grass Minimum</i>	6.9°C Lerwick (Shetland, 82mAMSL)
<i>Most Rainfall</i>	33.8mm Treherbert, Tyn-y-waun (Mid Glamorgan, 259mAMSL)
<i>Most Sunshine</i>	9.8hr Durris (Kincardineshire, 107mAMSL)
<i>Highest Gust</i>	43Kt 49mph Capel Curig No 3 (Gwynedd, 216mAMSL) also Aberdaron (Gwynedd, 86mAMSL)
<i>Highest Gust (mountain)</i>	74Kt 85mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

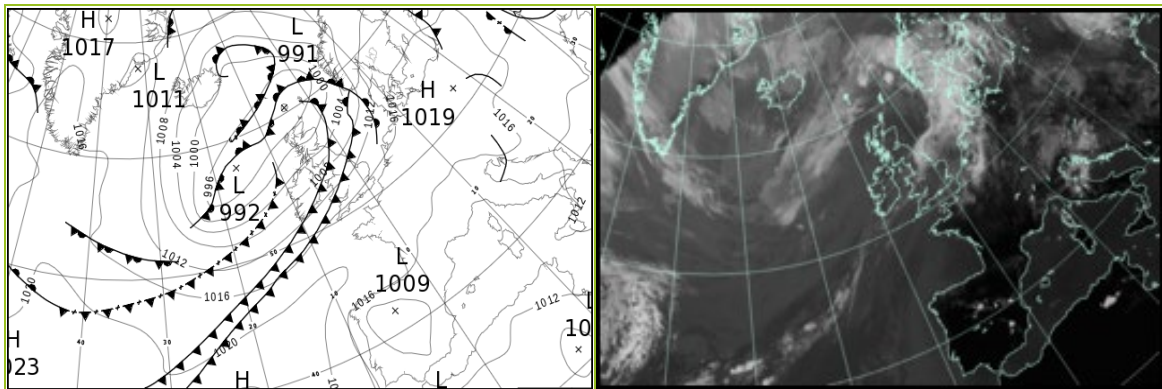

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 02 August 2022

Daily Weather Summary for Tuesday 02 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 03 August 2022

This day's summary created 10/08/2022 03:03

Summary of the UK Weather for Wednesday 03 August 2022

A low pressure system was situated to the north of the UK through the early hours. Most of Scotland saw a wet start, with locally heavy showers affecting the northern half of the country. Showers were also seen in Northern Ireland, northern and southwest England, and Wales, while the southeast remained dry. Weak fronts across central England and Wales pushed southeastwards through the day, breaking up as they did so. Underneath these fronts, there was rain and stratus/stratocumulus cloud for the south and southeast, and it felt rather humid. The showers in the north continued for Scotland, Northern Ireland, and parts of northern England, though there were also some reasonable spells of sunshine through the afternoon. Overnight, showers over eastern Scotland merged into longer spells of rain that were heavy in places.

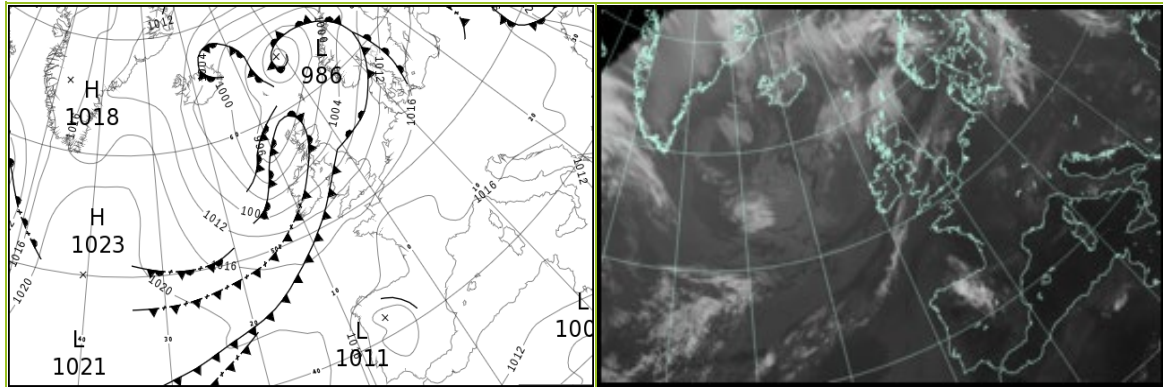

Daily Extremes

<i>Highest Maximum</i>	29.9°C Faversham (Kent, 46mAMSL)
<i>Lowest Maximum</i>	14.6°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	19.5°C Cromer (Norfolk, 37mAMSL) also Leconfield (Humberside, 7mAMSL)
<i>Lowest Minimum</i>	11.4°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL) also Kinbrace, Hatchery (Sutherland, 103mAMSL)
<i>Lowest Grass Minimum</i>	8.2°C Lentrán (Inverness-shire, 146mAMSL) also Dunrobin Castle Gardens (Sutherland, 6mAMSL)
<i>Most Rainfall</i>	23.6mm Fettercairn, Glensaugh No 2 (Kincardineshire, 171mAMSL)
<i>Most Sunshine</i>	12.8hr Whitby (North Yorkshire, 41mAMSL)
<i>Highest Gust</i>	42Kt 48mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	70Kt 81mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

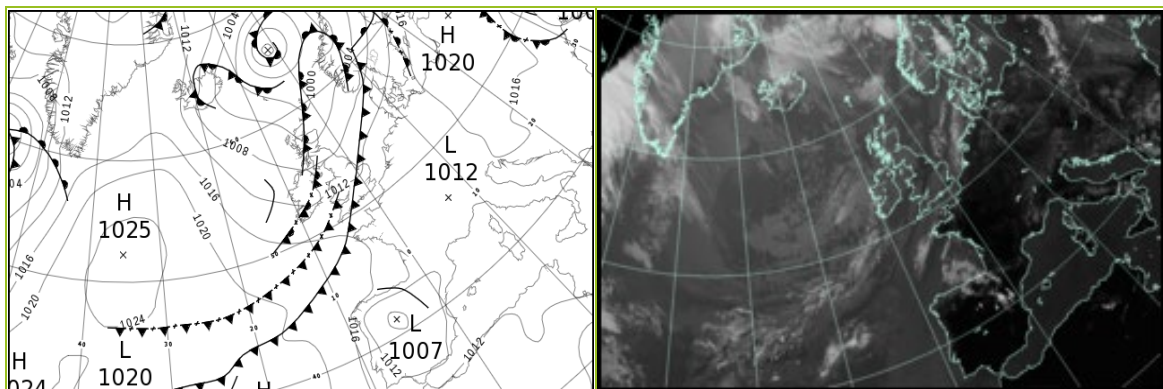

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 04 August 2022

This day's summary created 11/08/2022 03:03

Summary of the UK Weather for Thursday 04 August 2022

A deep trough brought heavy rain to Northern Ireland, which slowly then made its way over much of Scotland through the course of the night. A couple of occlusions also brought some more scattered showers to northern England early in the night; this fragmented a few hours after midnight. Ahead of this second occlusion skies were clear in a band from the East Midlands down to the southwest, therefore the southeast remained mostly clear with some patchy cloud throughout the night. The trough feature continued to edge southeastwards through the morning, bringing further showers to northern parts of the country. Showers continued in one or two northern spots through the afternoon, but elsewhere it was a drier day with lengthy sunny spells. The fine and dry weather continued across England and Wales into the evening; medium cloud thinned away, and a fair breeze meant that it felt rather cool. Showers also cleared across northern areas, however a new zone of showers moved into Northern Ireland and western Scotland overnight.

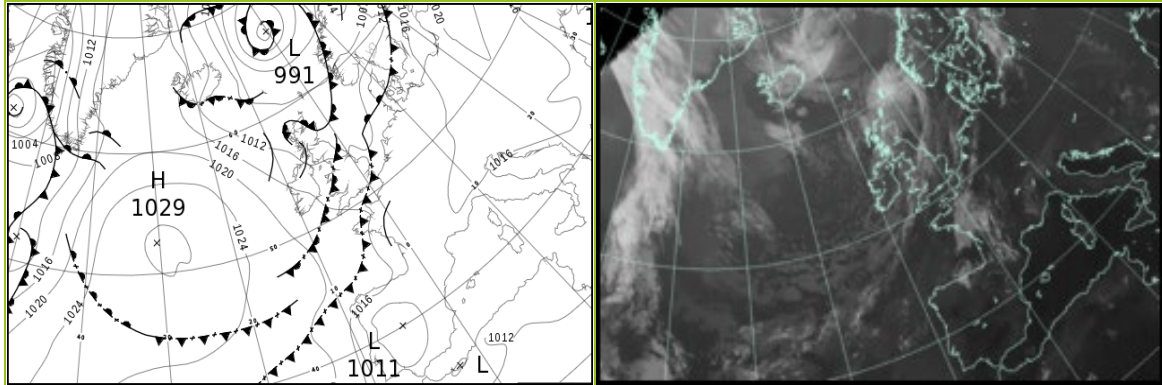

Daily Extremes

<i>Highest Maximum</i>	27.1°C Frittenden (Kent, 38mAMSL)
<i>Lowest Maximum</i>	13.7°C Strathy East (Sutherland, 68mAMSL)
<i>Highest Minimum</i>	18.0°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	6.2°C Lough Navar Forest (Fermanagh, 126mAMSL)
<i>Lowest Grass Minimum</i>	4.0°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	19.9mm Achfary (Sutherland, 46mAMSL)
<i>Most Sunshine</i>	12.0hr Willington (Derbyshire, 54mAMSL)
<i>Highest Gust</i>	31Kt 36mph St Bees Head No 2 (Cumbria, 125mAMSL)
<i>Highest Gust (mountain)</i>	38Kt 44mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

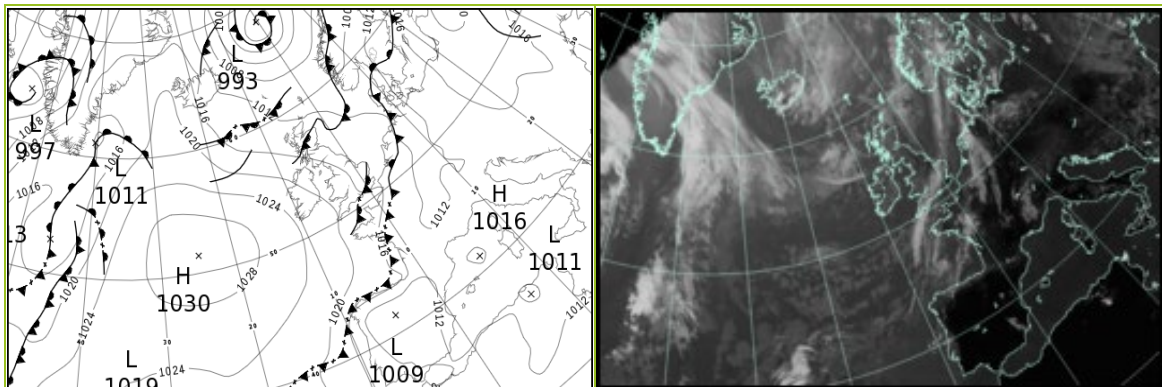

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 04 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 05 August 2022

This day's summary created 12/08/2022 03:03

Summary of the UK Weather for Friday 05 August 2022

A series of troughs progressed southeastwards across the UK through the early hours of the morning. A band of cloud brought patchy rain to the southeast tip of England, while scattered showers affected western Scotland, Northern Ireland and the northwest coast of England. A large area of high cloud covered central parts of the country; elsewhere it was fresher, with variable amounts of cloud and clear spells. Showery weather continued across the northwestern and central regions through the morning, with the showers becoming more scattered over time. The amount of cloud over the UK peaked around lunchtime and gradually declined through the afternoon. Scattered precipitation began to spread eastwards around midday, to eventually reach the northeastern parts by late afternoon. Meanwhile, the south saw fine and dry weather with plenty of sunny spells throughout the day. Any remaining showers died out in the evening to leave a dry, largely clear and cool night for most.

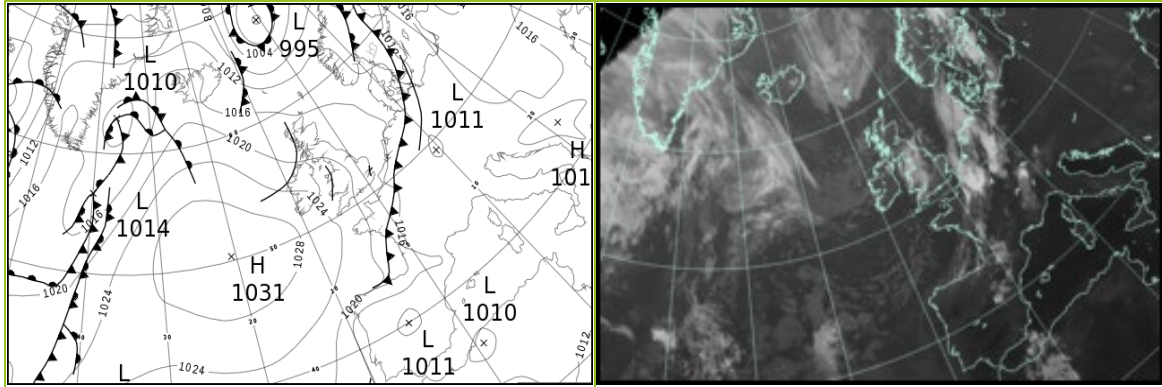

Daily Extremes

<i>Highest Maximum</i>	24.6°C Wiggonholt (West Sussex, 28mAMSL)
<i>Lowest Maximum</i>	13.8°C Strathy East (Sutherland, 68mAMSL)
<i>Highest Minimum</i>	15.1°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	2.5°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Lowest Grass Minimum</i>	-1.4°C Balmoral (Aberdeenshire, 283mAMSL)
<i>Most Rainfall</i>	10.8mm Bainbridge (North Yorkshire, 210mAMSL)
<i>Most Sunshine</i>	13.8hr Slapton (Devon, 32mAMSL) also Preston, Cove House (Dorset, 44mAMSL) also Oxford (Oxfordshire, 63mAMSL)
<i>Highest Gust</i>	30Kt 35mph Berry Head (Devon, 58mAMSL)
<i>Highest Gust (mountain)</i>	39Kt 45mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

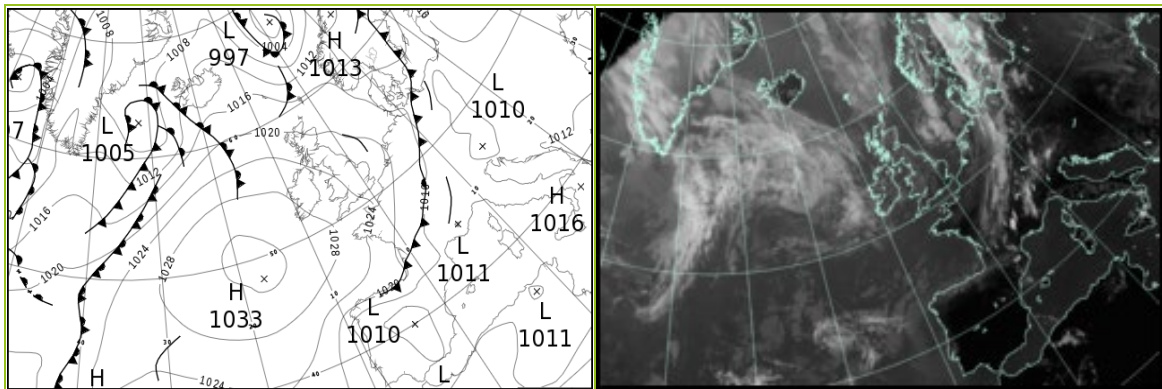

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 06 August 2022

This day's summary created 13/08/2022 03:03

Summary of the UK Weather for Saturday 06 August 2022

It was a dry night with plenty of clear skies for the southern half of the UK, as high pressure built in from the southwest. It was cloudier to start in Northern Ireland and Scotland, with light rain lingering in the far north. An area of showers pushed into western Scotland in the early morning, bringing some breezier conditions along the coast. Elsewhere winds were light and variable in direction. Some mist and fog were reported in Wales and western England. An occluded front arrived at the western coast of Scotland later in the morning, bringing heavier bursts of rain to the far north and northwest. As the front progressed eastwards, rain and showers cleared most of Scotland by midday. However, some rain lingered in the far north of Scotland through the afternoon and into the evening. Patches of drizzle were also seen on some windward coasts and upslopes in the north. Elsewhere, it was a fine and dry day with long, sunny periods, especially across the southern and central parts. Northern England saw more in the way of cloud throughout the day.

Daily Extremes

<i>Highest Maximum</i>	25.6°C Wiggonholt (West Sussex, 28mAMSL)
<i>Lowest Maximum</i>	13.4°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	14.3°C Blackpool, Squires Gate (Lancashire, 10mAMSL)
<i>Lowest Minimum</i>	2.6°C Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	-2.0°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	41.1mm Achfary (Sutherland, 46mAMSL)
<i>Most Sunshine</i>	14.3hr Hurn (Dorset, 10mAMSL)
<i>Highest Gust</i>	34Kt 39mph Salsburgh (Lanarkshire, 277mAMSL)
<i>Highest Gust (mountain)</i>	66Kt 76mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

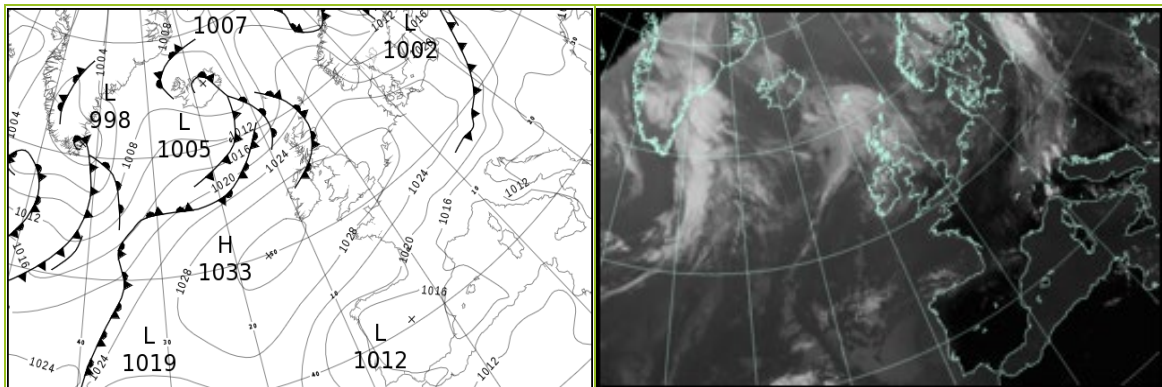

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 06 August 2022

Daily Weather Summary for Saturday 06 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 07 August 2022

This day's summary created 14/08/2022 03:03

Summary of the UK Weather for Sunday 07 August 2022

An occluded front pushing into the northwest of the UK brought cloud and rainfall to western Scotland in the early hours and to northwestern Northern Ireland near dawn. Elsewhere it was another dry night under high pressure, with largely clear conditions for the south. Winds near the front were moderate southwesterlies but away from the front were light with no clear direction. Mist and shallow fog were reported in various spots, including Oxfordshire, Ceredigion, and Wigtownshire. High pressure remained dominant across the south today. Meanwhile, a frontal system pushed its way across Scotland during the day, bringing cloud and the odd scattered shower to the Islands. While this low cloud swept over Scotland, Northern Ireland and the north of England, the rest of the country experienced a bright and sunny day under the high pressure, albeit with some high cloud turning the sunshine hazy in the Midlands at times. By the evening, any precipitation had died out, leaving a calm night for all. The low cloud did continue to push south, reaching the Midlands by the end of the day.

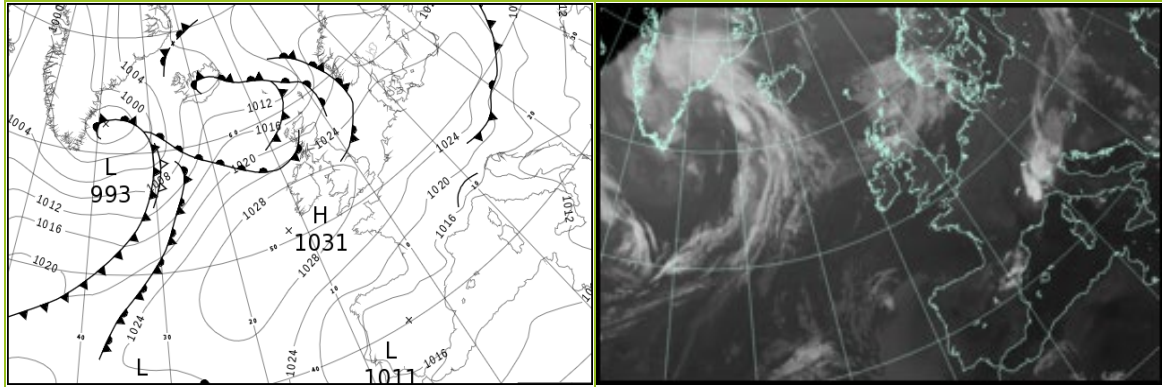

Daily Extremes

<i>Highest Maximum</i>	28.1°C Frittenden (Kent, 38mAMSL)
<i>Lowest Maximum</i>	13.9°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	16.1°C Crosby (Merseyside, 9mAMSL)
<i>Lowest Minimum</i>	3.9°C Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	1.0°C South Newington (Oxfordshire, 105mAMSL) also Swyddffynnon (Dyfed, 178mAMSL)
<i>Most Rainfall</i>	7.8mm Harris: Quidnish (Western Isles, 13mAMSL)
<i>Most Sunshine</i>	14.5hr Oxford (Oxfordshire, 63mAMSL)
<i>Highest Gust</i>	31Kt 36mph Brizlee Wood (Northumberland, 250mAMSL) also Fair Isle (Shetland, 57mAMSL)
<i>Highest Gust (mountain)</i>	70Kt 81mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

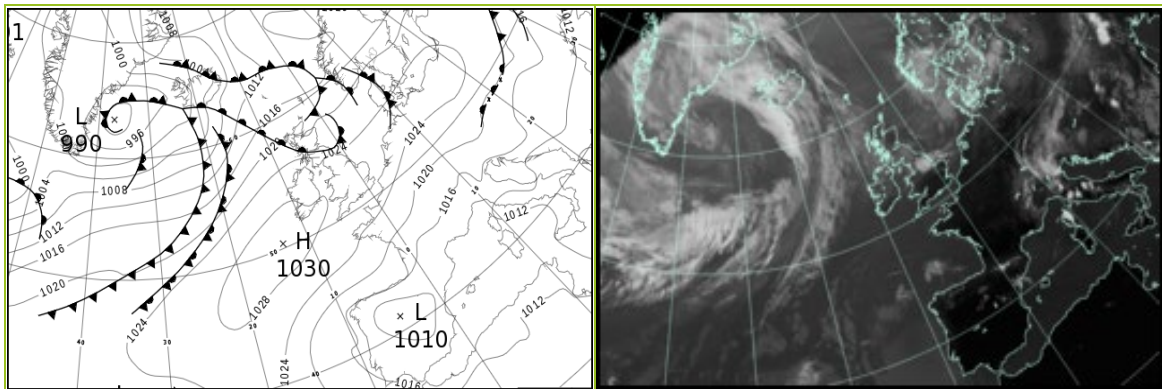

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 07 August 2022

Daily Weather Summary for Sunday 07 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 08 August 2022

This day's summary created 15/08/2022 03:04

Summary of the UK Weather for Monday 08 August 2022

It was a fine and dry start as the UK entered a new week under the influence of high pressure. Outer Hebrides were the only part to see some light showers during the small hours. Low cloud sitting over the northwest spread southwards during the early morning, reaching some central parts by dawn, while the south saw entirely clear skies. Some mist and fog patches formed over high ground in northern England and northern Wales. The early morning saw mist and fog around many coastal areas, clearing by mid-morning. A cold front passing eastwards over the north of Scotland continued bringing light showers across the region throughout the morning. It remained fine and dry for the rest of the UK, and with little cloud cover it was a sunny day for most. Showers over Scotland eased into the afternoon, becoming lighter and more broken through the evening. Meanwhile, dry and sunny conditions prevailed across the rest of the UK into the evening.

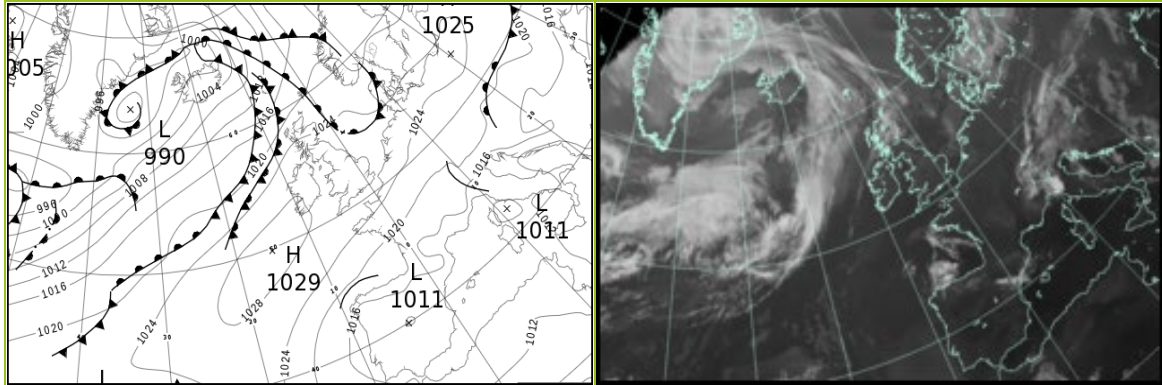

Daily Extremes

<i>Highest Maximum</i>	30.0°C Charlwood (Surrey, 67mAMSL)
<i>Lowest Maximum</i>	14.1°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.2°C Isle Of Portland (Dorset, 52mAMSL)
<i>Lowest Minimum</i>	3.8°C Swyddffynnon (Dyfed, 178mAMSL)
<i>Lowest Grass Minimum</i>	0.1°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	5.6mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	14.3hr Weybourne (Norfolk, 21mAMSL)
<i>Highest Gust</i>	32Kt 37mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	45Kt 52mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

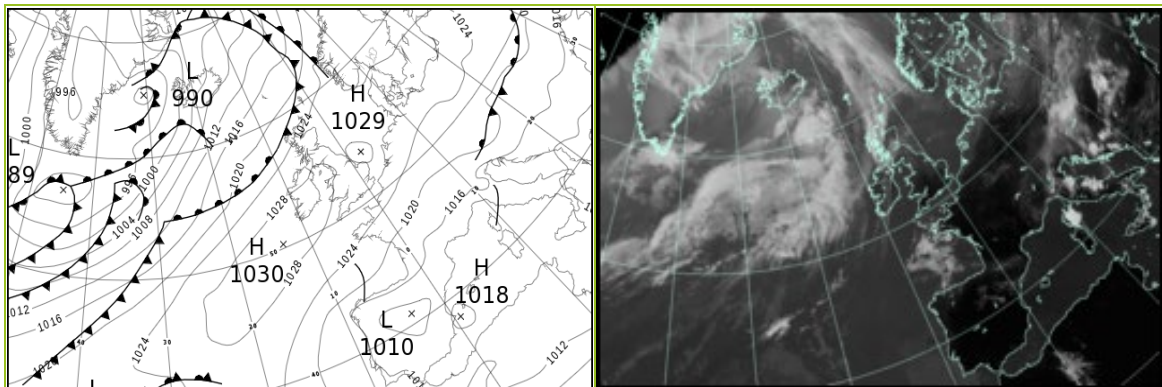

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 09 August 2022

This day's summary created 16/08/2022 03:04

Summary of the UK Weather for Tuesday 09 August 2022

Under the persistent influence of high pressure, it was another fine and dry day across the UK. The only precipitation was in the form of a band of showers over northern Scotland shortly after midnight which continued to push southeastwards in the early hours. Early fog and mist were reported in parts of the West Midlands, Cheshire, and East Anglia. This cleared by mid-morning, leaving clear skies across the UK, with the exception of some precipitation over Scotland which dissipated by midday. With little to no cloud cover, the south remained sunny and dry throughout the day seeing continual unbroken sunshine. A band of cloud formed over northern England during the day and then made its way southwards in the late afternoon. Above average temperatures were seen across the UK during the day, mostly in the south, making way for a warmer evening than of late. An amber warning for extreme heat was issued for Thursday to Sunday, as temperatures build, and a hot spell is expected to develop across parts of England and Wales.

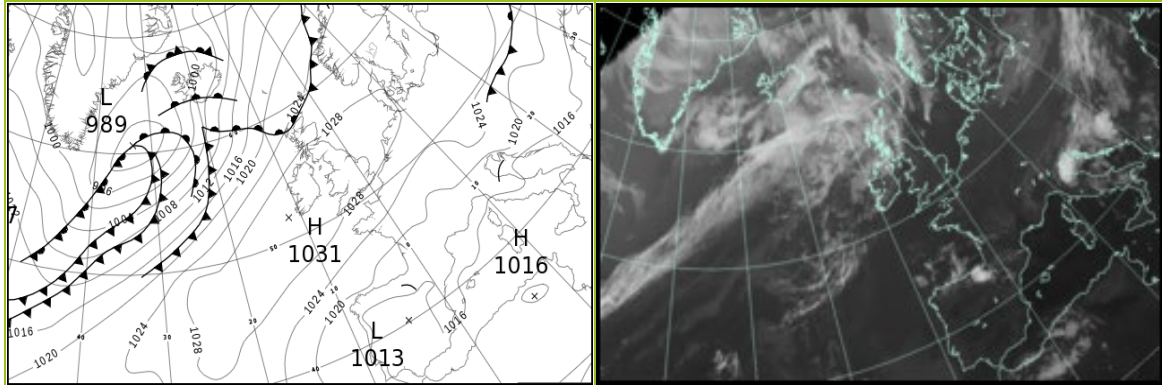

Daily Extremes

<i>Highest Maximum</i>	30.9°C Marnhull (Dorset, 60mAMSL)
<i>Lowest Maximum</i>	16.3°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.0°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	4.6°C Shap (Cumbria, 263mAMSL) also Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Lowest Grass Minimum</i>	0.1°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	3.8mm Lerwick (Shetland, 82mAMSL)
<i>Most Sunshine</i>	14.2hr Morecambe No 2 (Lancashire, 7mAMSL) also Shawbury (Shropshire, 72mAMSL)
<i>Highest Gust</i>	41Kt 47mph Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	56Kt 64mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

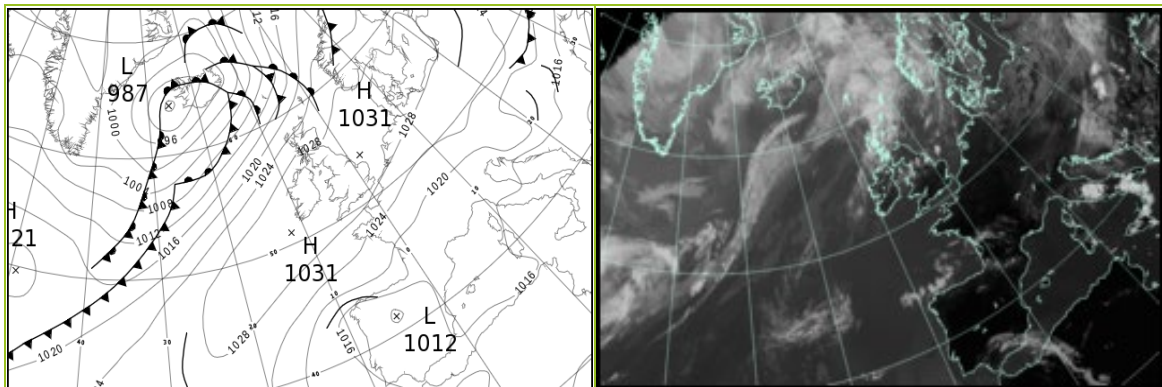

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 09 August 2022

Daily Weather Summary for Tuesday 09 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 10 August 2022

This day's summary created 17/08/2022 03:03

Summary of the UK Weather for Wednesday 10 August 2022

High pressure remained dominant across the south of the UK overnight, bringing long clear periods to much of the country. There was no precipitation throughout the night, and main areas of cloud were over northern and eastern Scotland and northern England. Some spherics were recorded over the south of Wales around dawn. Early morning fog was reported on the northwest of Scotland and East Anglia. It remained dry for most of the country throughout the day, with only occasional showers over the Scottish Highlands before midday and into mid-afternoon. Otherwise, it was clear with plenty of sunshine. Winds were more southeasterly in central and southern England, allowing these regions to tap into some continental heat. Consequently, heatwave thresholds were met in many parts of England and Wales. There was a continuation of cloudy conditions into the evening for the northwest, with some drizzle and light rain. Dry and fine conditions prevailed for the south, with an amber extreme heat warning coming into effect at midnight for parts of England and western Wales.

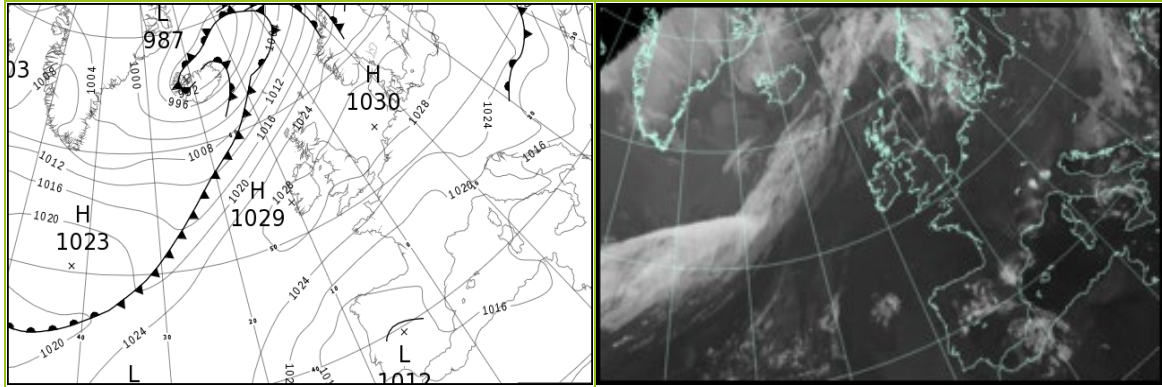

Daily Extremes

<i>Highest Maximum</i>	31.8°C Usk No 2 (Monmouthshire, 25mAMSL) also Wiggonholt (West Sussex, 28mAMSL)
<i>Lowest Maximum</i>	16.8°C South Uist Range (Western Isles, 4mAMSL)
<i>Highest Minimum</i>	17.7°C Manston No 2 (Kent, 54mAMSL)
<i>Lowest Minimum</i>	3.9°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	1.7°C Katesbridge (Down, 91mAMSL)
<i>Most Rainfall</i>	12.8mm Baltasound No 2 (Shetland, 15mAMSL)
<i>Most Sunshine</i>	14.6hr Dunbar (East Lothian, 23mAMSL) also Morecambe No 2 (Lancashire, 7mAMSL)
<i>Highest Gust</i>	47Kt 54mph Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Gust (mountain)</i>	55Kt 63mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

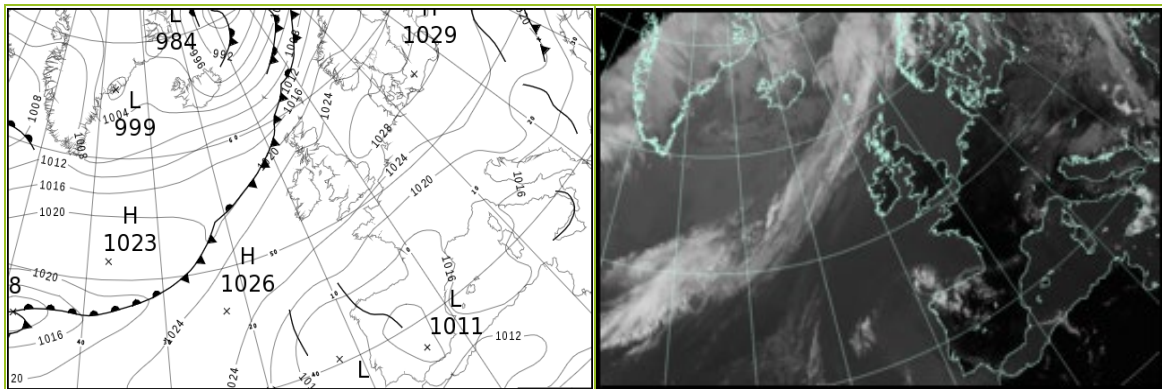

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 11 August 2022

This day's summary created 18/08/2022 03:03

Summary of the UK Weather for Thursday 11 August 2022

After a mild night for many, the day started with fine and settled weather under the sustained influence of high pressure. It was a dry night and start to the day across the UK, with just some light showers across Orkney in the small hours. Early mist and fog were heavily reported along east and southeast coasts, along with reports in Glasgow and Northern Ireland. The high pressure system continued influence the weather over the UK throughout the day, bringing fine, dry and hot weather to much of the country. An amber warning for extreme heat was in effect today for most of England and parts of Wales. The skies were clear of clouds over the whole of England, Wales and Northern Ireland, and most of Scotland. A cold front brushed against the northwest of Scotland, bringing a band of cloud to this edge of the country, and a band of rain to the northwestern Isles, Orkney and Shetland. This clear weather continued throughout the evening and led to another warm night. Winds were light, except in the northwest of Scotland which experienced stronger breezes.

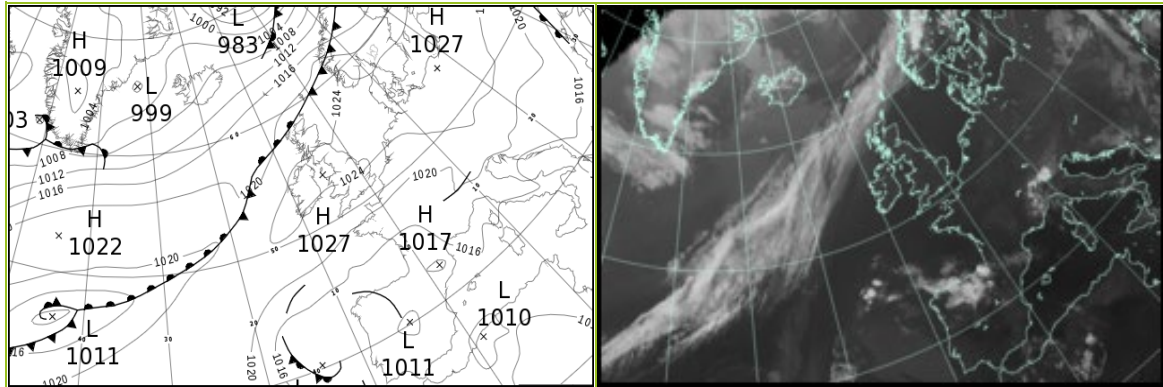

Daily Extremes

<i>Highest Maximum</i>	34.5°C Marnhull (Dorset, 60mAMSL)
<i>Lowest Maximum</i>	13.3°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	19.4°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	3.7°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	-0.1°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	8.6mm Harris: Quidnish (Western Isles, 13mAMSL)
<i>Most Sunshine</i>	14.6hr Boulmer (Northumberland, 23mAMSL) also Brampton No 3 (Cumbria, 117mAMSL)
<i>Highest Gust</i>	27Kt 31mph South Uist Range (Western Isles, 4mAMSL) also Lerwick (Shetland, 82mAMSL)
<i>Highest Gust (mountain)</i>	50Kt 58mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

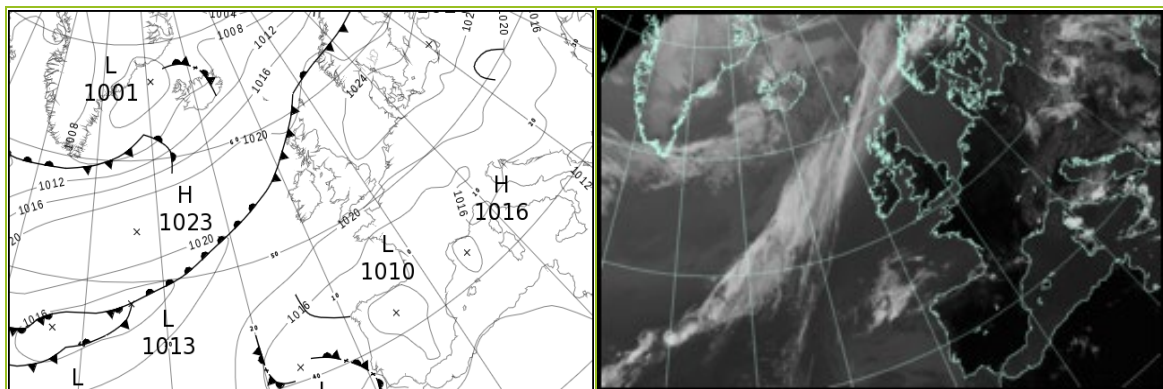

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 11 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 12 August 2022

This day's summary created 19/08/2022 03:03

Summary of the UK Weather for Friday 12 August 2022

Under high pressure and with the amber extreme heat warning in force, it was a dry night and start to the day. Skies were clear and temperatures somewhat subsided but remained in double figures for most. A cold front brushing against the far north of Scotland brought patchy light drizzle through the early hours. Mist, fog, and haze were all seen widely at coastal regions across the UK, in particular, Scotland, and the south and east of England. Any remaining drizzle cleared the far north of Scotland later in the morning. Dry conditions prevailed for the entire UK through the day. Most of the country saw clear skies and intense sunshine, with the only cloud lingering in the far north. Some low cloud covered parts of eastern Scottish coast in the evening and into the night. Many parts of England and Wales continued to meet their heatwave criteria today. It was also locally hot in Northern Ireland and Scotland.

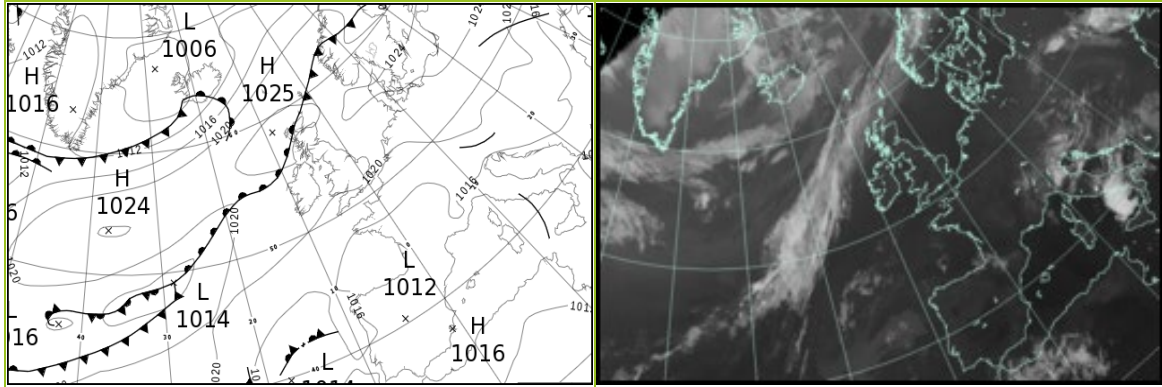

Daily Extremes

<i>Highest Maximum</i>	34.8°C Marnhull (Dorset, 60mAMSL)
<i>Lowest Maximum</i>	13.5°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	20.6°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	5.6°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	3.1°C Banagher, Caugh Hill (Londonderry, 214mAMSL) also Strathallan Airfield (Perthshire (in Tayside Region), 35mAMSL) also Braemar No 2 (Aberdeenshire, 327mAMSL)
<i>Most Rainfall</i>	1.8mm Lerwick (Shetland, 82mAMSL)
<i>Most Sunshine</i>	14.2hr Morecambe No 2 (Lancashire, 7mAMSL) also Dundrennan (Kirkcudbrightshire, 113mAMSL) also Brampton No 3 (Cumbria, 117mAMSL)
<i>Highest Gust</i>	26Kt 30mph Holbeach No 2 (Lincolnshire, 3mAMSL)
<i>Highest Gust (mountain)</i>	23Kt 26mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

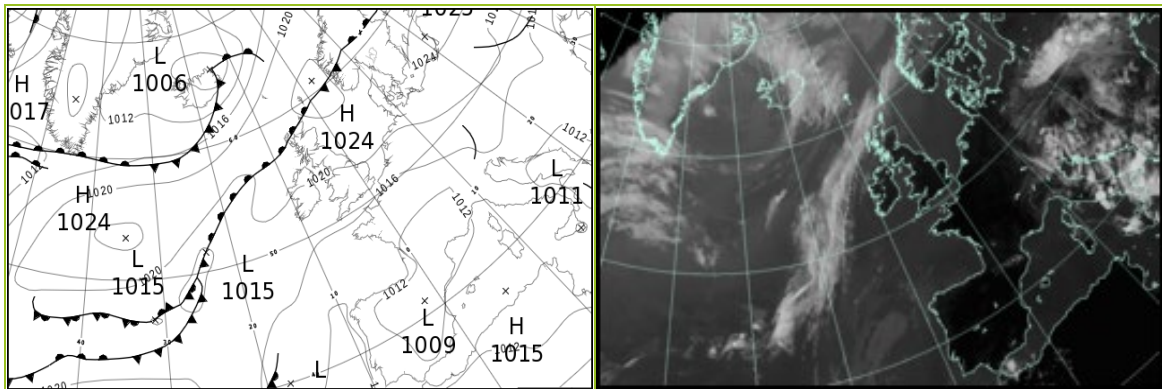

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 13 August 2022

This day's summary created 20/08/2022 03:03

Summary of the UK Weather for Saturday 13 August 2022

Like previous nights this week, high pressure continued dominating across the UK. Skies remained generally clear, although there were a few more patches of high cloud than recently. A warm front moved along the north coast of Scotland, bringing a band of low cloud to this area. It was a very warm night across the south of England and Wales, staying tropical in the odd place. Mist and fog were reported along Scottish coasts and rural parts of England. It was another day with no substantial precipitation observed across the UK. Most of the country saw plenty of sunshine, while low cloud penetrated coasts of Scotland and northeast England in the early afternoon. It remained hot or very hot throughout the day for much of England and Wales, and for parts of Northern Ireland and Scotland. Into the evening, some cloud arrived over the northwestern parts, bringing odd showers. The northeast saw some more of low cloud towards the end of the day. Elsewhere, the evening was clear and exceptionally warm again.

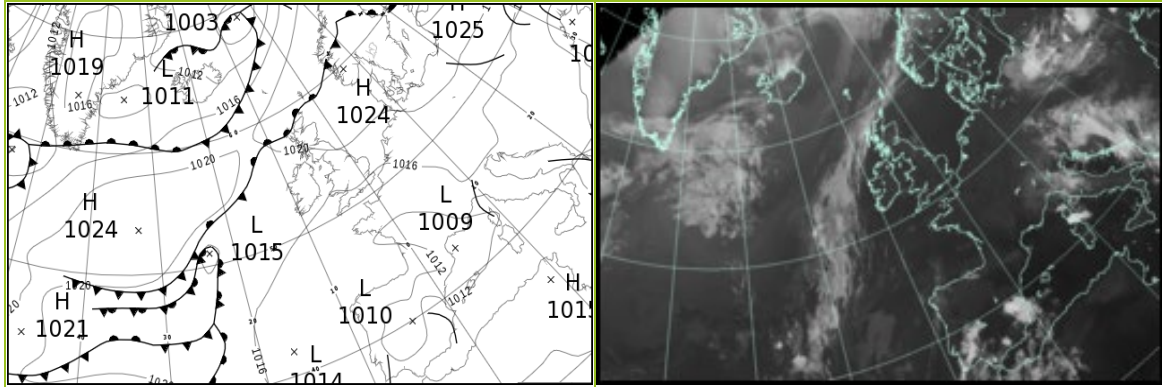

Daily Extremes

<i>Highest Maximum</i>	34.9°C Charlwood (Surrey, 67mAMSL)
<i>Lowest Maximum</i>	14.0°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	20.8°C Mumbles Head (West Glamorgan, 44mAMSL)
<i>Lowest Minimum</i>	5.2°C Braemar No 2 (Aberdeenshire, 327mAMSL)
<i>Lowest Grass Minimum</i>	1.5°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	2.2mm Baltasound No 2 (Shetland, 15mAMSL)
<i>Most Sunshine</i>	14.0hr Morecambe No 2 (Lancashire, 7mAMSL) also Leeming (North Yorkshire, 33mAMSL)
<i>Highest Gust</i>	26Kt 30mph Holbeach No 2 (Lincolnshire, 3mAMSL)
<i>Highest Gust (mountain)</i>	21Kt 24mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

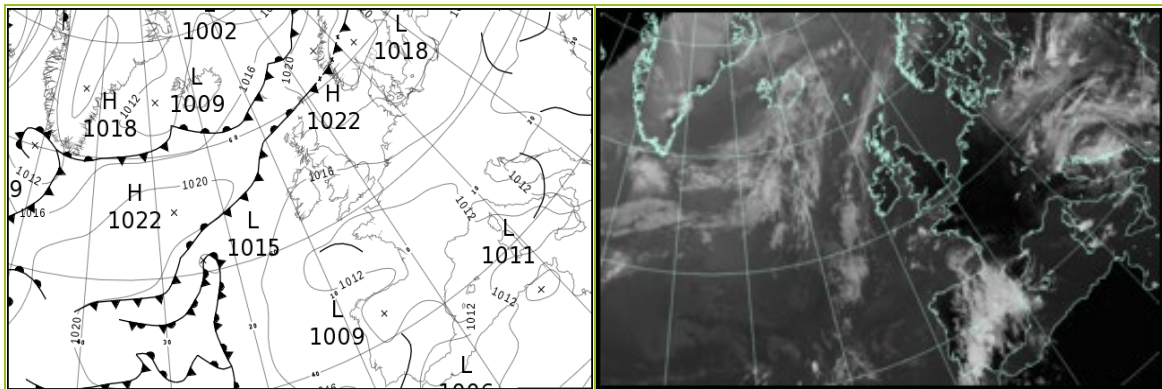

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 13 August 2022

Daily Weather Summary for Saturday 13 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 14 August 2022

This day's summary created 21/08/2022 03:03

Summary of the UK Weather for Sunday 14 August 2022

As the dominant high pressure system started to move away, patchy cloud with clear spells covered much of the country overnight. A weak warm front brushed the northwest Scottish coast and Northern Ireland, bringing a band of cloud and the odd shower to these areas. Some spherics occurred over the southwest and over Northern Ireland in the middle of the night. A pair of troughs moved northwards towards the south coast around dawn. There was a clear north-south split throughout the day, with mainly dry and very hot weather for England and most of Wales, and a cooler day with widespread heavy thunderstorms for Scotland and Northern Ireland. The thunderstorms over Northern Ireland were widespread until around midday when they cleared to the northeast. It was around this time that they started to impact western Scotland, before becoming widespread into the afternoon. The only showers in England were in the southwest around 10 AM, but were short-lived. There was some high-level cloud for England and Wales in the afternoon, yet it was mainly clear skies there. Some heavy showers returned to Northern Ireland in the evening.

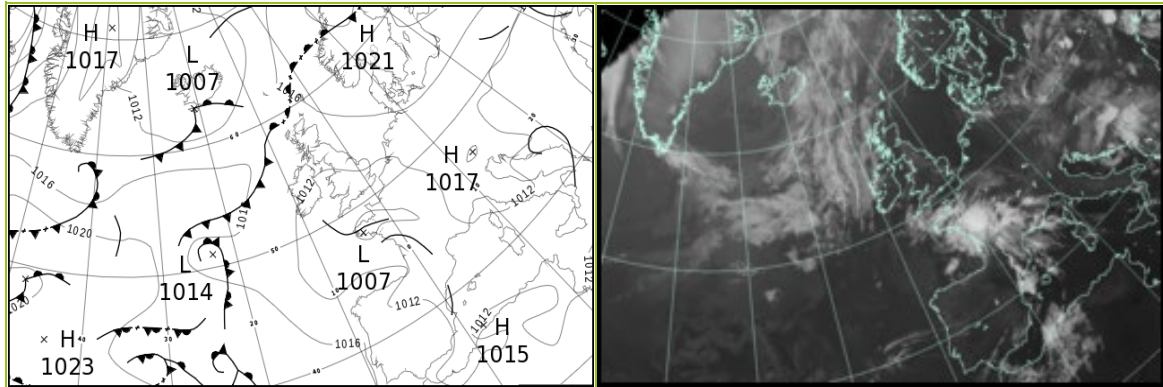

Daily Extremes

<i>Highest Maximum</i>	34.2°C Cambridge, Botanic Garden (Cambridgeshire, 13mAMSL)
<i>Lowest Maximum</i>	14.6°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	21.6°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	5.6°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	1.8°C Durris (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	33.8mm Strathy East (Sutherland, 68mAMSL)
<i>Most Sunshine</i>	13.2hr Leconfield (Humberside, 7mAMSL)
<i>Highest Gust</i>	37Kt 43mph Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Highest Gust (mountain)</i>	38Kt 44mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

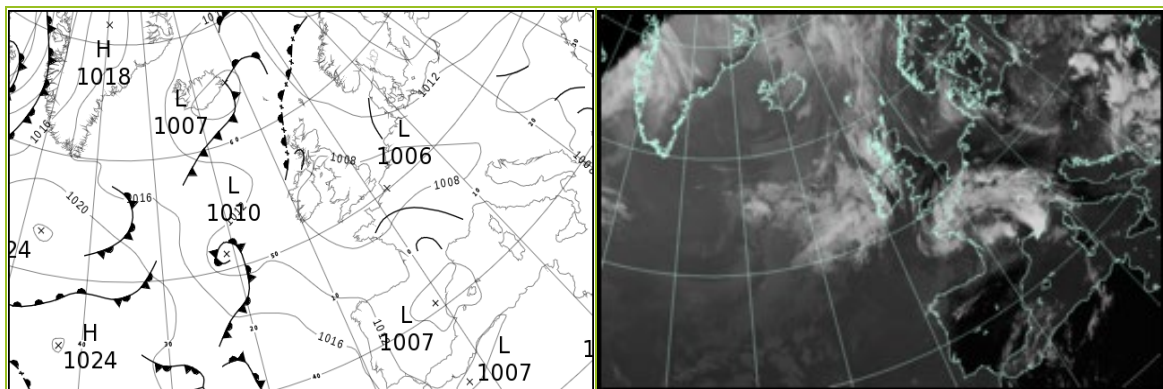

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 14 August 2022

Daily Weather Summary for Sunday 14 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 15 August 2022

This day's summary created 22/08/2022 03:03

Summary of the UK Weather for Monday 15 August 2022

A shift to an unsettled regime marked the start of the week for the UK due to a low pressure system centred over England and Wales. A trough moved southeastwards through Scotland in the small hours, bringing some heavy and thundery showers for central and eastern Scottish parts. The north of England and Northern Ireland also saw some thundery showers in the early morning. A vast band of showers pushed into Wales and Cornwall from the west around dawn. Lightning strikes were reported in multiple parts of the country, including Lancashire, Northumberland, Angus, and Fife. The day started with rain for most western areas, and thunderstorms in southwest and eastern Scotland. A large portion of England was dry initially, but the rain soon spread in from the west. By midday the thunderstorms in Scotland had cleared, leaving a band of frontal rain running from Hampshire to northeast Scotland. Shortly after this, a cluster of thunderstorms developed over Cornwall and Devon, with some extremely heavy rain in places at times. These persisted until around 6 PM, when they eased and moved northeast towards Bristol. Meanwhile, thunderstorms had broken out over Wales and many places in central and eastern England. The frontal rain over Scotland became widespread and heavy. Thunderstorms generally eased into the evening, but many areas remained wet.

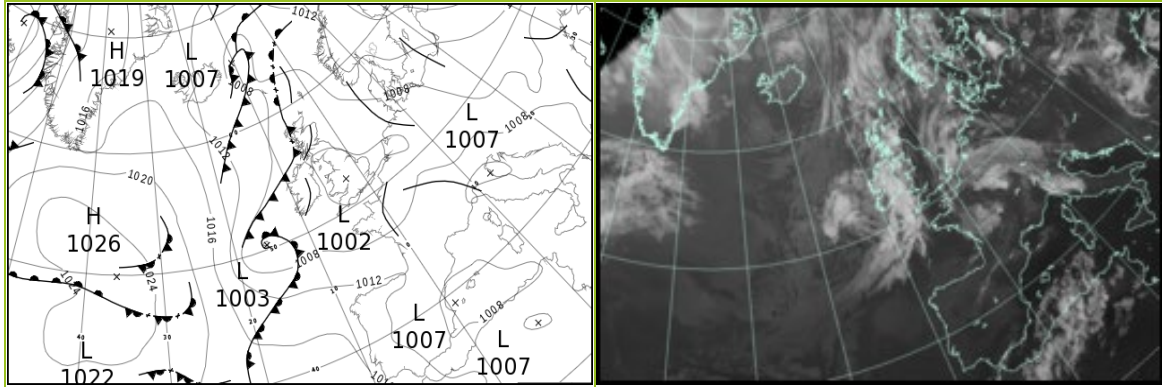

Daily Extremes

<i>Highest Maximum</i>	32.1°C Coningsby (Lincolnshire, 6mAMSL) also Cambridge, Botanic Garden (Cambridgeshire, 13mAMSL)
<i>Lowest Maximum</i>	13.9°C Ballypatrick Forest (Antrim, 156mAMSL) also Altnahinch Filters (Antrim, 213mAMSL)
<i>Highest Minimum</i>	19.2°C Morecambe No 2 (Lancashire, 7mAMSL)
<i>Lowest Minimum</i>	10.3°C Lyth No 2 (Caithness, 24mAMSL)
<i>Lowest Grass Minimum</i>	7.6°C South Newington (Oxfordshire, 105mAMSL)
<i>Most Rainfall</i>	54.6mm Strathallan Airfield (Perthshire (in Tayside Region), 35mAMSL)
<i>Most Sunshine</i>	7.4hr Leconfield (Humberside, 7mAMSL) also Heathrow (Greater London, 25mAMSL)
<i>Highest Gust</i>	30Kt 35mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	28Kt 32mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

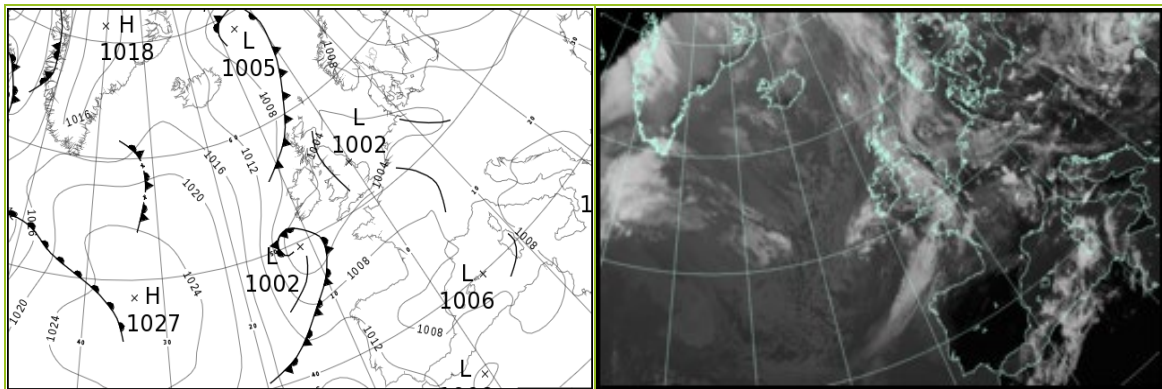

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 15 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 16 August 2022

This day's summary created 23/08/2022 03:03

Summary of the UK Weather for Tuesday 16 August 2022

A cold front preceded by a band of rain moved into the far northwest around midnight and continued to push southeastwards. As a result, large portion of Scotland experienced rain in the early hours. Parts of Cornwall and Devon also saw a wet start, as a band of locally heavy showers approached the southwest around dawn. Some of these showers were thundery and accompanied by lightning. Elsewhere, it was a mostly dry early morning with variable amounts of cloud. Under the influence of a lower pressure system, it was a wet and generally overcast day for most. A cold front slowly passed over the northeast, along with an occlusion situated in the southwest, both accompanied by a series of troughs. This brought prolonged heavy rain across both northeast Scotland and southwest England. Showers across Scotland eased into the afternoon, meanwhile the north of England saw bands of cloud bringing scattered showers throughout the day. Precipitation developed into the afternoon, resulting in supercells forming over southern and eastern areas. Early evening saw heavy, thundery showers with some lightning across Lincolnshire and the Humber. Norfolk also saw almost 27.5mm of precipitation in just 15 minutes.

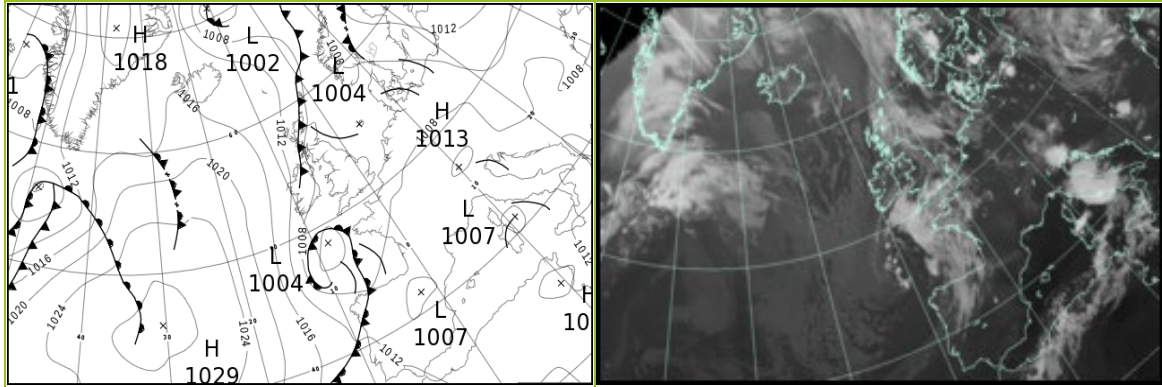

Daily Extremes

<i>Highest Maximum</i>	26.8°C Santon Downham (Suffolk, 6mAMSL) also Charsfield (Suffolk, 49mAMSL)
<i>Lowest Maximum</i>	10.7°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	18.3°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Minimum</i>	8.5°C Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	5.3°C Castlederg (Tyrone, 49mAMSL)
<i>Most Rainfall</i>	146.2mm Holbeach No 2 (Lincolnshire, 3mAMSL)
<i>Most Sunshine</i>	8.7hr Magilligan No 2 (Londonderry, 6mAMSL)
<i>Highest Gust</i>	36Kt 41mph Aberdaron (Gwynedd, 86mAMSL)
<i>Highest Gust (mountain)</i>	39Kt 45mph Cairnwell (Aberdeenshire, 928mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 16 August 2022

Daily Weather Summary for Tuesday 16 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 17 August 2022

This day's summary created 24/08/2022 03:03

Summary of the UK Weather for Wednesday 17 August 2022

The day began with a band of rain stretching from Lincolnshire and Humberside down to Cornwall, encompassing central England and east Wales. Elsewhere, it was largely dry. Precipitation mostly cleared from the southwest by dawn, and the band of rain became more broken resulting in more sporadic rain across Wales and central England. The south saw widespread early mist, fog, and haze around dawn. The odd patch of light rain broke out over Northern Ireland. After a misty and muggy start, the south continued to experience a humid and convective airmass for the rest of the day, and an amber thunderstorm warning was issued for the parts of London and the southeast. The band of rain continued travelling southeastwards throughout the morning, becoming weaker and more broken over time. Northern regions saw the best of any sunshine, with fresher air and light winds throughout the day. Ongoing convection persisted from the southeast and cumulonimbus clouds formed into the mid-afternoon, bringing thunderstorms and heavy rain across London. The thunderstorms halted by early evening, but persistent heavy rain continued into the night. It was a clear evening elsewhere with sunny spells, except for patchy rain across Northern Ireland and the Hebrides.

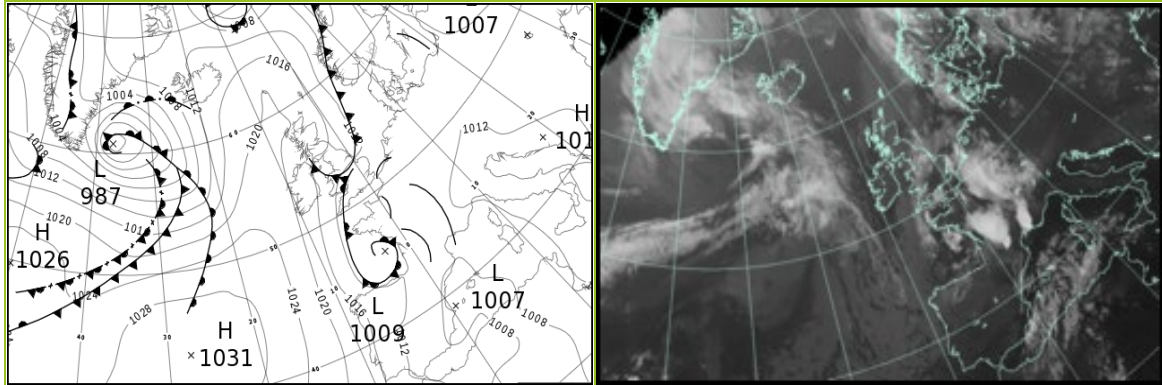

Daily Extremes

<i>Highest Maximum</i>	26.4°C Kew Gardens (Greater London, 6mAMSL)
<i>Lowest Maximum</i>	13.6°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.9°C Cambridge, Niab (Cambridgeshire, 26mAMSL)
<i>Lowest Minimum</i>	0.3°C Tulloch Bridge (Inverness-shire, 249mAMSL)
<i>Lowest Grass Minimum</i>	-3.6°C Kinlochewe (Ross & Cromarty, 25mAMSL)
<i>Most Rainfall</i>	64.2mm High Beach (Essex, 110mAMSL)
<i>Most Sunshine</i>	11.1hr Boulmer (Northumberland, 23mAMSL)
<i>Highest Gust</i>	36Kt 41mph Warcop Range (Cumbria, 227mAMSL)
<i>Highest Gust (mountain)</i>	38Kt 44mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

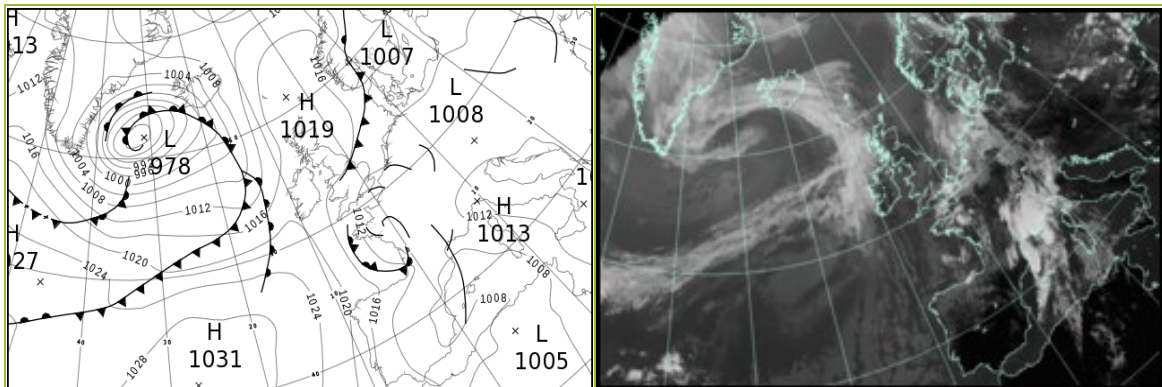

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 18 August 2022

This day's summary created 25/08/2022 03:03

Summary of the UK Weather for Thursday 18 August 2022

A few showers lingered from yesterday afternoon in the southeast, but these soon dissipated. Elsewhere the UK was mainly dry, with just the odd patch of light rain. By dawn there was an organised band of rain running north to south through central Scotland. Winds were generally light, but moderate on western Scottish coasts. Patchy cloud and scattered showers were the main themes across the country for the rest of the day. Areas which saw the most precipitation included the northeast of Scotland in the morning, and the northwest of England and north Wales during the afternoon. Much of the rest of the country also saw the odd shower at times, with central parts of southern England being the only area remaining completely dry. By mid-afternoon, a heavier band of rain had built up over Northern Ireland and became thundery by the time it reached the Scottish Isles. This band of rain swiftly moved across the UK through the evening, and mostly dissipated by night. Winds were strong in the northwest, but lighter elsewhere.

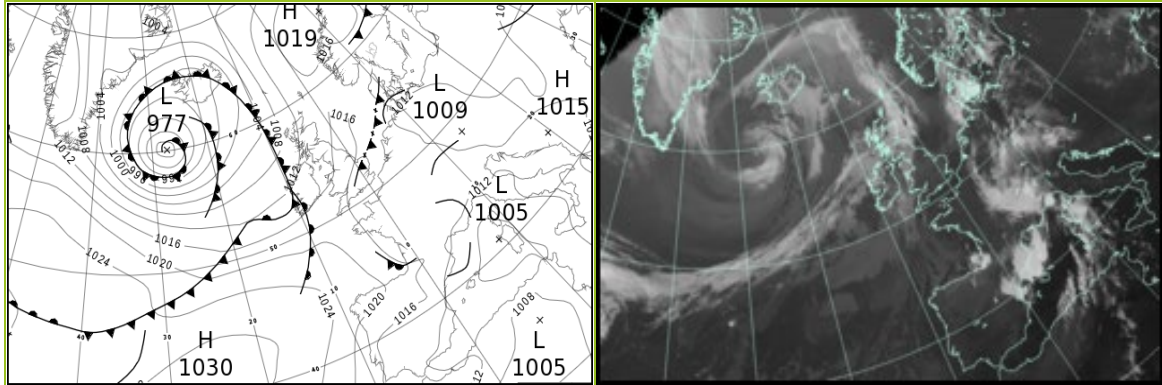

Daily Extremes

<i>Highest Maximum</i>	27.8°C Heathrow (Greater London, 25mAMSL)
<i>Lowest Maximum</i>	14.4°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	18.1°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	6.9°C Cassley (Sutherland, 99mAMSL) also Pateley Bridge, Ravens Nest (North Yorkshire, 259mAMSL)
<i>Lowest Grass Minimum</i>	2.0°C Copley (Durham, 253mAMSL)
<i>Most Rainfall</i>	27.8mm Honister Pass (Cumbria, 358mAMSL)
<i>Most Sunshine</i>	10.7hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	34Kt 39mph South Uist Range (Western Isles, 4mAMSL) also Brizlee Wood (Northumberland, 250mAMSL) also Wight: Needles Old Battery (Isle Of Wight, 80mAMSL) also Stornoway Airport (Western Isles, 15mAMSL) also Prestwick, Gannet (Ayrshire, 27mAMSL)
<i>Highest Gust (mountain)</i>	59Kt 68mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

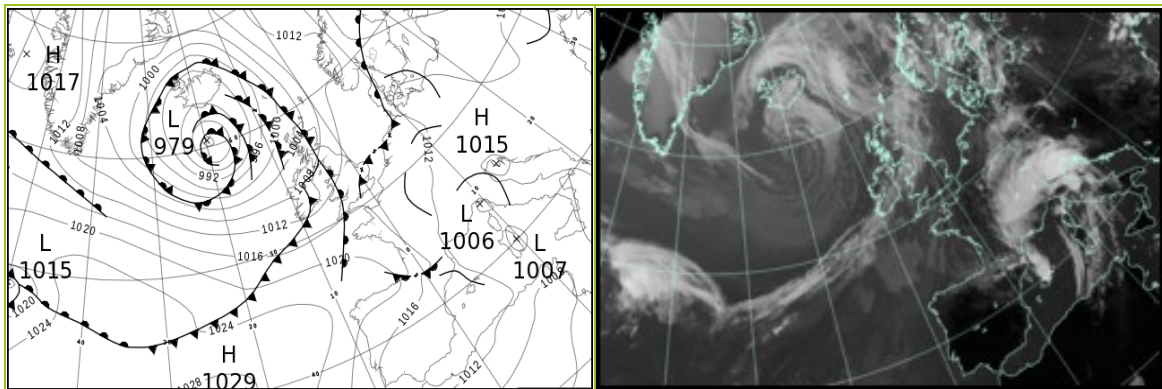

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 18 August 2022

Daily Weather Summary for Thursday 18 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 19 August 2022

This day's summary created 26/08/2022 03:03

Summary of the UK Weather for Friday 19 August 2022

With low pressure to the northwest, it was a drizzly and overcast start for many. An occluded front brought patchy rain across west Scotland and Northern Ireland, heavy in parts. A band of scattered showers stretched from Newcastle down to Cornwall, encompassing south Wales and central and southern England. Through the morning a cold front caused light rain to clear the country to the southeast. The low pressure system continued to pass over the north of the country, bringing heavy showers, thundery at times to western and central Scotland and Northern Ireland throughout the day. Other than that, the rest of the country remained dry, with patchy low cloud and sunny spells dominating. A band of clear skies also moved eastwards over southern areas, reaching the East of England by the evening. The showers in the north also cleared through the evening, leaving a dry end to the day for most.

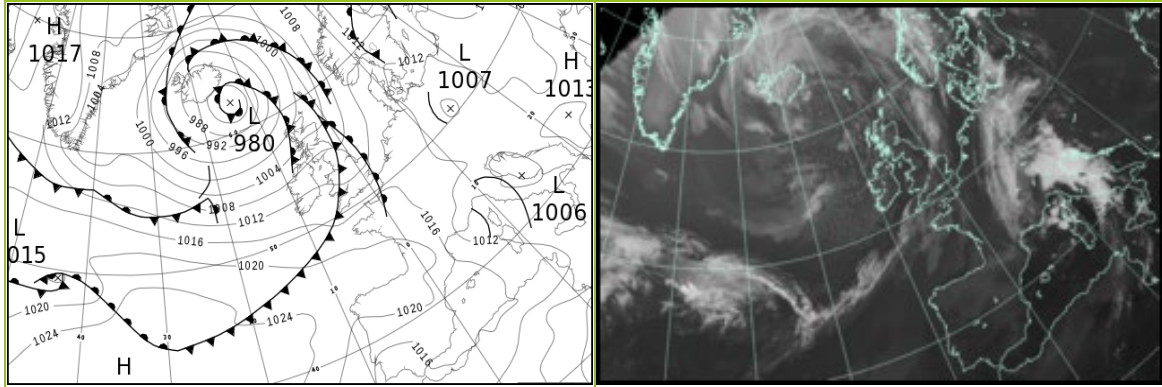

Daily Extremes

<i>Highest Maximum</i>	26.5°C Cavendish (Suffolk, 55mAMSL) also Lingwood, Strumpshaw Hill (Norfolk, 33mAMSL)
<i>Lowest Maximum</i>	14.1°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Highest Minimum</i>	19.0°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	5.7°C Kielder Castle (Northumberland, 201mAMSL) also Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	0.3°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	25.0mm Achnagart (Ross & Cromarty, 15mAMSL)
<i>Most Sunshine</i>	13.5hr Willington (Derbyshire, 54mAMSL)
<i>Highest Gust</i>	36Kt 41mph Magilligan No 2 (Londonderry, 6mAMSL) also Brizlee Wood (Northumberland, 250mAMSL)
<i>Highest Gust (mountain)</i>	57Kt 66mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

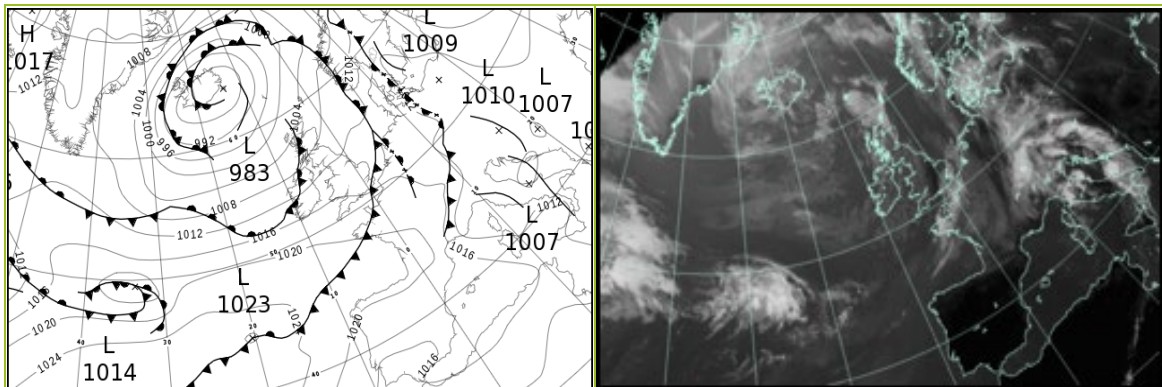

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Friday 19 August 2022

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

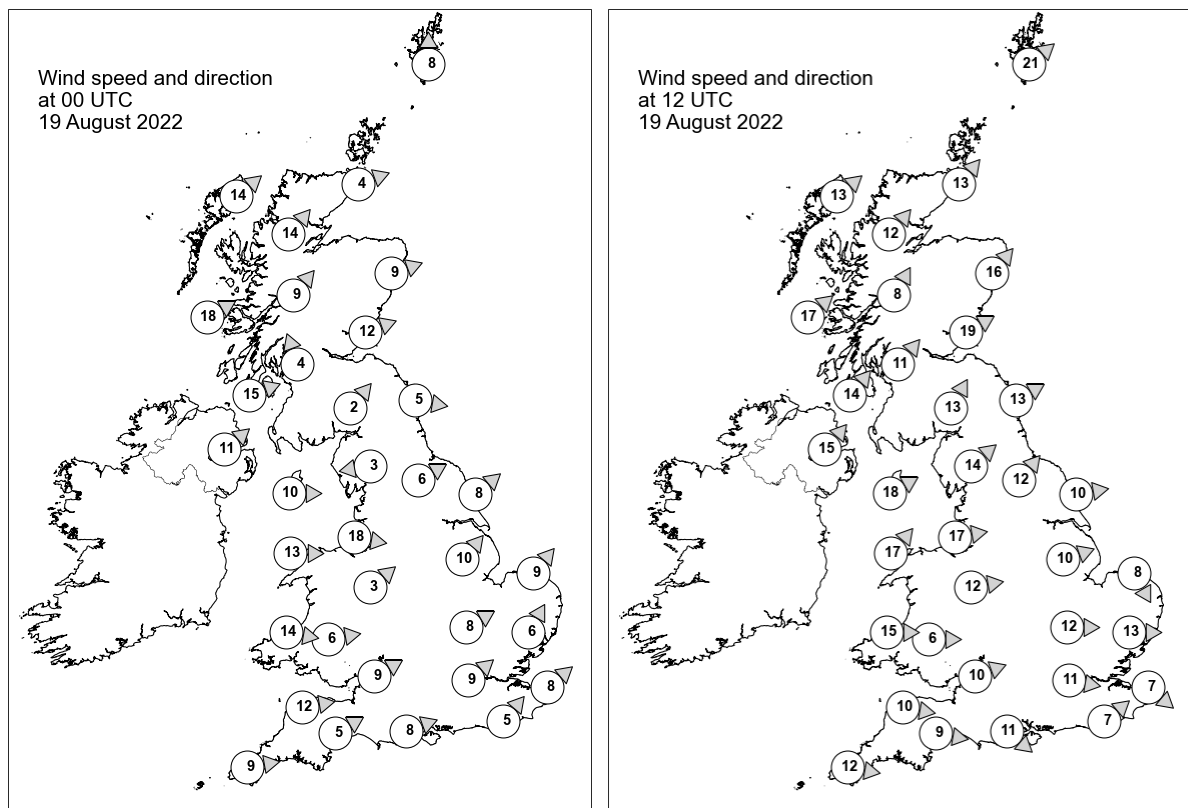

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

This day's summary created 27/08/2022 03:03

Summary of the UK Weather for Saturday 20 August 2022

Under the continued influence of low pressure, the day's weather was defined by active frontal systems. A locally heavy rain band travelled southeastwards and brought early showers across west and northwest Scotland, becoming heavier as dawn approached. Additionally, an occluded front stretching from Northumberland down to Cornwall brought light and well scattered showers to northern England and Wales. The band of rain continued to slowly move southwards as the day progressed, bringing precipitation to southern Scotland and Northern Ireland before midday, and to northern England in the afternoon. The rest of England and Wales saw a mostly dry day with just a few drizzly showers over Wales and Cornwall. A band of locally heavy showers pushed into the far northwest in the late afternoon and persisted into the evening. Meanwhile, the band of rain continued to sink south, weakening, and bringing rain to North Midlands and central Wales towards the end of the day.

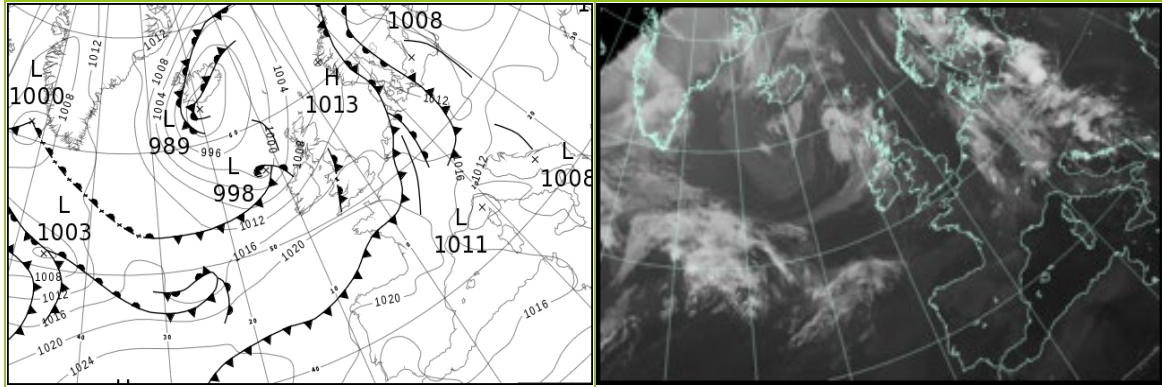

Daily Extremes

<i>Highest Maximum</i>	26.5°C Oxford (Oxfordshire, 63mAMSL)
<i>Lowest Maximum</i>	14.6°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL) also Blencathra (Cumbria, 250mAMSL)
<i>Highest Minimum</i>	16.4°C Isle Of Portland (Dorset, 52mAMSL) also Blackpool, Squires Gate (Lancashire, 10mAMSL) also Porthmadog (Gwynedd, 7mAMSL)
<i>Lowest Minimum</i>	3.9°C Aboyne No 2 (Aberdeenshire, 140mAMSL)
<i>Lowest Grass Minimum</i>	-0.2°C Drummond Castle (Perthshire (in Tayside Region), 113mAMSL)
<i>Most Rainfall</i>	52.4mm Ennerdale, Bleach Green W Wks (Cumbria, 117mAMSL)
<i>Most Sunshine</i>	11.3hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	49Kt 56mph South Uist Range (Western Isles, 4mAMSL)
<i>Highest Gust (mountain)</i>	66Kt 76mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

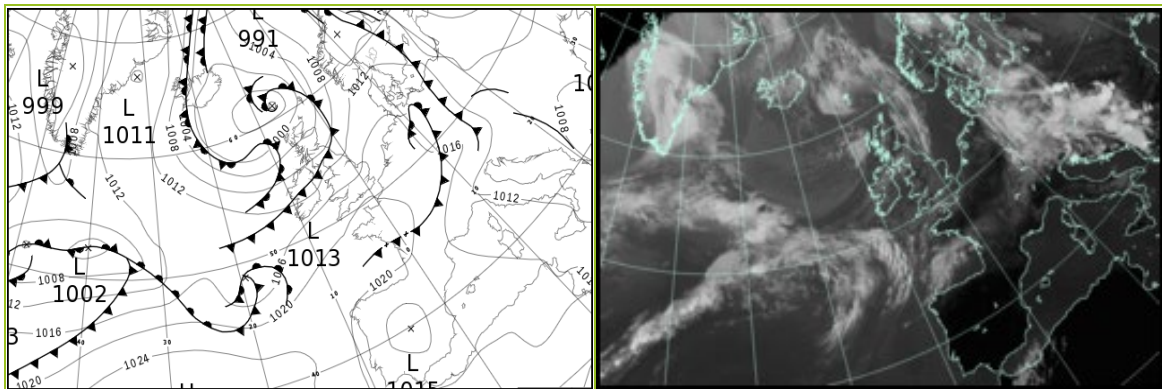

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 20 August 2022

Daily Weather Summary for Saturday 20 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 21 August 2022

This day's summary created 28/08/2022 03:03

Summary of the UK Weather for Sunday 21 August 2022

A cold front stretched across the country overnight, bringing a band of rain to the northwest of England and north Wales. This slowly moved southeastwards, dissipating as it did. Further heavy but scattered showers hit the northwest of Scotland throughout the night, and a patch of rain spread over the southwest towards dawn. Elsewhere it was generally dry, with patchy cloud and clear spells for most. The cold front continued to sink southwards as the day progressed, weakening simultaneously. An area of light and patchy rain moved into Cornwall, Devon, and southern Wales in the morning and continued to affect these parts until midday. Western and northern Scotland saw some scattered showers which moved in from the west and continued until late afternoon. The east and southeast stayed mainly dry with some warm sunny spells throughout the day. Clear spells developed over Scotland in the evening, especially in the north, leading to a rather chilly end of the day there.

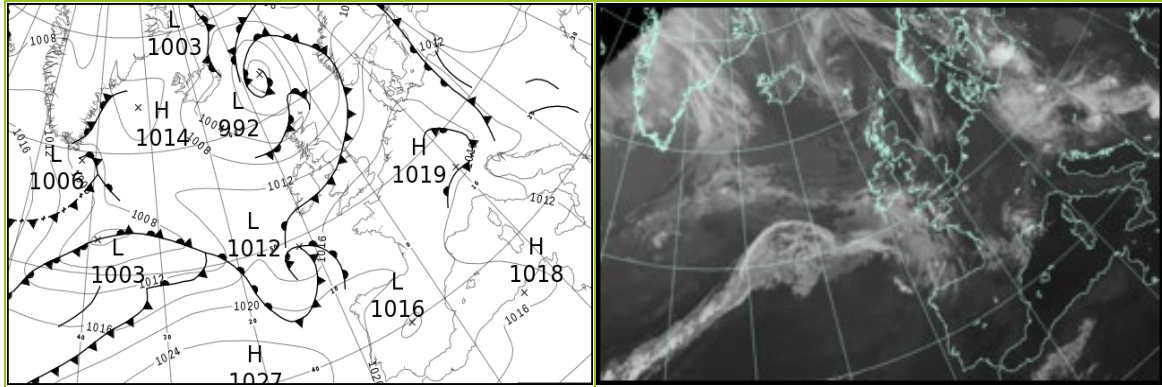

Daily Extremes

<i>Highest Maximum</i>	25.6°C Cavendish (Suffolk, 55mAMSL)
<i>Lowest Maximum</i>	14.0°C Strathy East (Sutherland, 68mAMSL)
<i>Highest Minimum</i>	17.1°C Wight: St Catherines Point (Isle Of Wight, 20mAMSL)
<i>Lowest Minimum</i>	4.6°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	-0.5°C Durrus (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	13.4mm Lanreath (Cornwall, 115mAMSL)
<i>Most Sunshine</i>	12.2hr Whitby (North Yorkshire, 41mAMSL)
<i>Highest Gust</i>	31Kt 36mph Islay: Port Ellen (Argyll (in Strathclyde Region), 17mAMSL)
<i>Highest Gust (mountain)</i>	57Kt 66mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

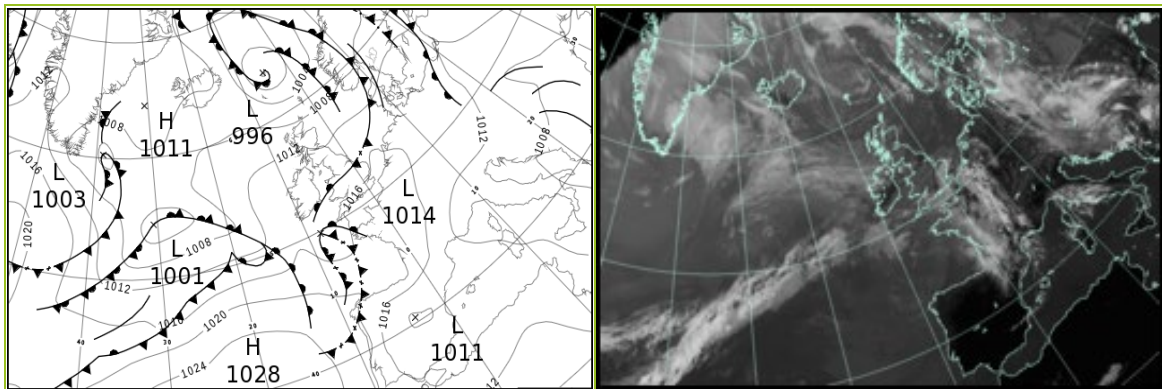

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 21 August 2022

Daily Weather Summary for Sunday 21 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 22 August 2022

This day's summary created 29/08/2022 03:03

Summary of the UK Weather for Monday 22 August 2022

Several fronts made slow eastward progression across the country over the course of the night. These brought heavy showers, thundery at times, across Northern Ireland, the west coast of the UK and northern England. Elsewhere it was dry with patchy cloud, which cleared in the east of England towards dawn. Locally heavy showers reached the southwest at dawn. These fronts continued to move eastwards throughout the morning, bringing heavy rain to Northern Ireland, Scotland, and northern England, as well as moderate rain to the southwest. Most of the rain eased as it moved eastwards, with just the northwest of England experiencing heavy rain by midday. By mid-afternoon there was just some light and patchy rain for northeast England and central Scotland, with showers for Northern Ireland. The heavy cloud cover persisted for all but the southeast. Into the evening, some isolated heavier showers broke out in the north of England. Winds were light to moderate but variable throughout.

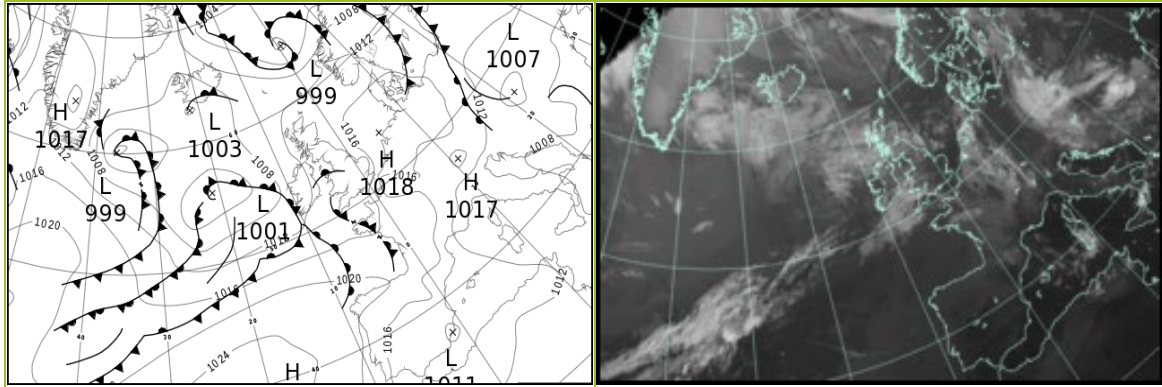

Daily Extremes

<i>Highest Maximum</i>	28.0°C Felsham (Suffolk, 92mAMSL)
<i>Lowest Maximum</i>	14.8°C Kinross (Kinross-shire, 116mAMSL) also Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.1°C Mumbles Head (West Glamorgan, 44mAMSL)
<i>Lowest Minimum</i>	2.4°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	-1.4°C Durrus (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	19.4mm Bolton, Sweetloves W Wks (Lancashire, 175mAMSL)
<i>Most Sunshine</i>	7.3hr Hastings (East Sussex, 45mAMSL)
<i>Highest Gust</i>	32Kt 37mph Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Gust (mountain)</i>	40Kt 46mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

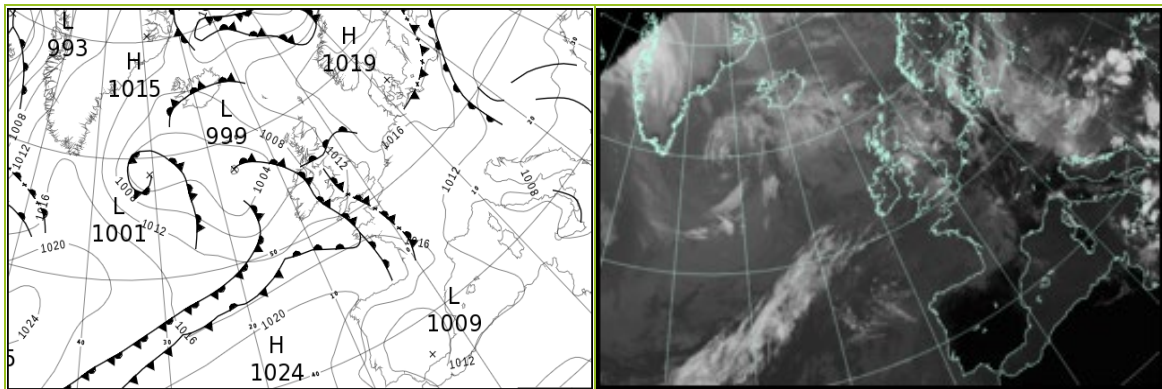

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 23 August 2022

This day's summary created 30/08/2022 03:03

Summary of the UK Weather for Tuesday 23 August 2022

An occluded front progressed through the eastern parts during the small hours. This frontal feature brought showers to the northeastern coast of England, although these cleared to the east by dawn. Showers were also seen across parts of Scotland and Northern Ireland in the early morning. Outbreaks of drizzle occurred in southwest Wales and in parts of Cornwall and Devon. It was a cloudy start for the north and west, while it remained mostly clear in the southeast. It was a showery morning for Scotland and Northern Ireland, but mainly dry elsewhere. The southeast was mainly clear, but a large band of cloud associated with the weather front lay across much of England and Wales. The showers in the north persisted into the afternoon, whilst a frontal wave approached from the southwest, bringing rain to southwest Wales late afternoon. The rain became widespread and locally heavy into the evening. Elsewhere remained mainly dry apart from the odd light shower.

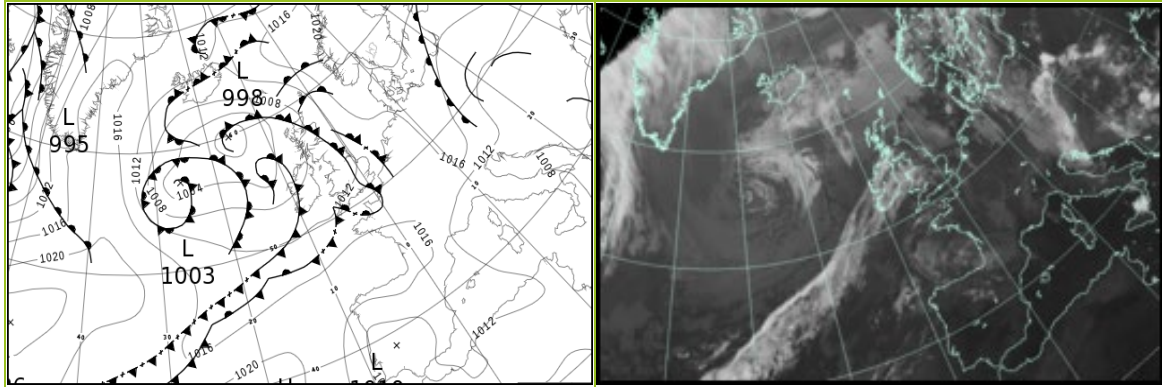

Daily Extremes

<i>Highest Maximum</i>	28.6°C Santon Downham (Suffolk, 6mAMSL) also Cavendish (Suffolk, 55mAMSL)
<i>Lowest Maximum</i>	14.3°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	18.4°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	9.2°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	6.7°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Most Rainfall</i>	20.4mm Tavernspite (Carmarthenshire, 153mAMSL)
<i>Most Sunshine</i>	7.8hr Whitby (North Yorkshire, 41mAMSL)

Daily Weather Summary for Tuesday 23 August 2022

Daily Weather Summary for Tuesday 23 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 24 August 2022

This day's summary created 31/08/2022 14:58

Summary of the UK Weather for Wednesday 24 August 2022

A vast band of rain, heavy in places, moved into western and northern parts shortly after midnight. This feature continued to slowly edge eastwards as the morning progressed. The heaviest of the precipitation affected central Scotland and parts of Wales. Ahead of the rain, central and southeastern parts saw a dry start with low cloud present in places. By dawn, the rain band had spread across much of the north of England, and continued to bring showers to central Scotland, Wales, and parts of Cornwall. This quickly passed into the mid- to late-morning, leaving more scattered showers across east Scotland, western England, and south Wales. The afternoon saw mostly fine and dry conditions prevailing for most, particularly across northern regions and into Scotland, although scattered showers continued across the northwest. Into the afternoon, a frontal band approached the southwest travelling northeastwards across southern and central England, bringing warm and muggy conditions. Rain and showers continued across these areas into the evening. A thick band of heavy and thundery rain approached the south through the night, triggering a yellow warning for thunderstorms in the southeast from midnight.

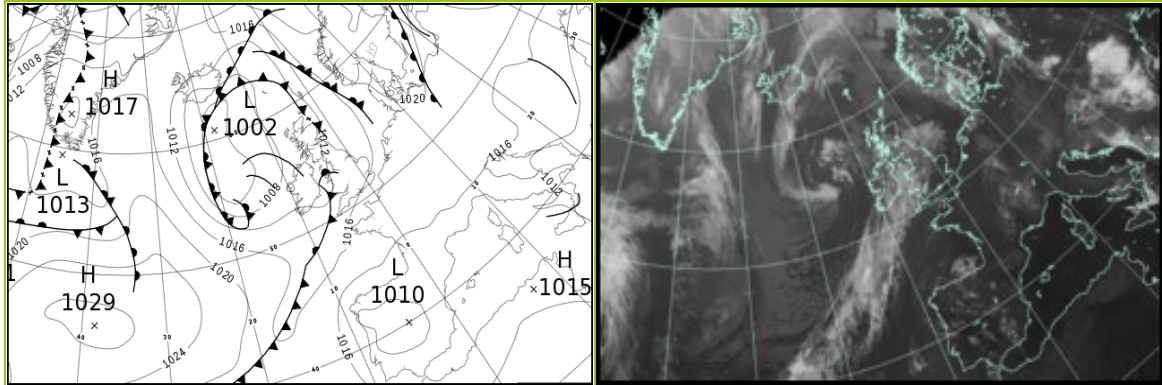

Daily Extremes

<i>Highest Maximum</i>	29.6°C Cambridge, Botanic Garden (Cambridgeshire, 13mAMSL)
<i>Lowest Maximum</i>	14.3°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	20.1°C London, St James's Park (Greater London, 5mAMSL)
<i>Lowest Minimum</i>	8.2°C Stornoway Airport (Western Isles, 15mAMSL)
<i>Lowest Grass Minimum</i>	4.6°C Stornoway Airport (Western Isles, 15mAMSL)
<i>Most Rainfall</i>	71.8mm Brooms Barn (Suffolk, 75mAMSL)
<i>Most Sunshine</i>	9.9hr Shoeburyness, Landwick (Essex, 2mAMSL)
<i>Highest Gust</i>	40Kt 46mph Capel Curig No 3 (Gwynedd, 216mAMSL)
<i>Highest Gust (mountain)</i>	53Kt 61mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

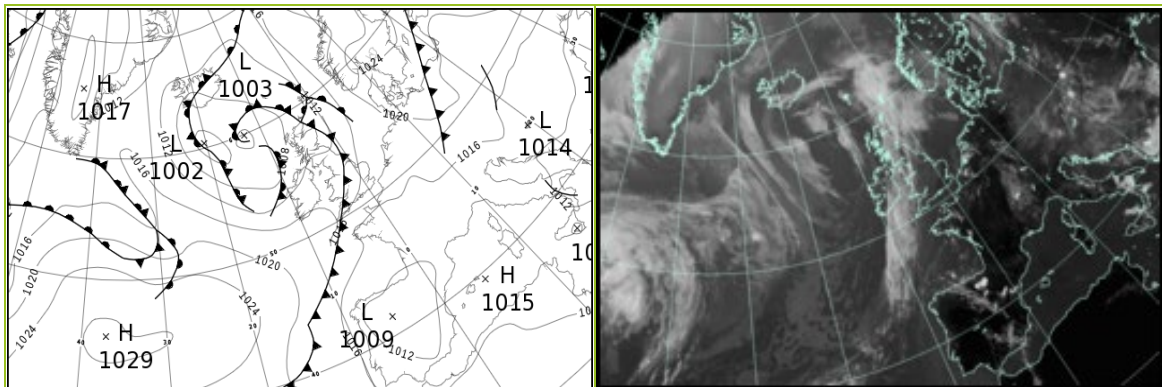

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 24 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Thursday 25 August 2022

This day's summary created 01/09/2022 11:06

Summary of the UK Weather for Thursday 25 August 2022

The band of frontal rain persisted through the early hours, running from Cornwall to Northumberland. This gradually moved northeast and eased, almost completely dissipating by dawn. Thunderstorms developed in a line from Hampshire to Norfolk, with several cells becoming locally heavy, with up to 60mm of rain being reported. Spherics were widespread, and hail was also reported. Away from this it was mainly dry, with just the odd shower for eastern Scotland. After a tropical night, the southeast saw heavy and thundery rain throughout the morning, with many places in this region seeing monthly rainfall totals in just a few hours. Northern Ireland and central and western Scotland saw light scattered showers through the morning, becoming more organised into the afternoon. The main activity associated with the thundery plume in the southeast pushed into the North Sea through the afternoon, resulting in easing of precipitation by early evening. The northwest continued to see showers into the evening and cooler temperatures. The southwest generally saw a fine and sunny day. Temperatures were cooler in the north and generally warm in the south, but cooler than of late into the evening.

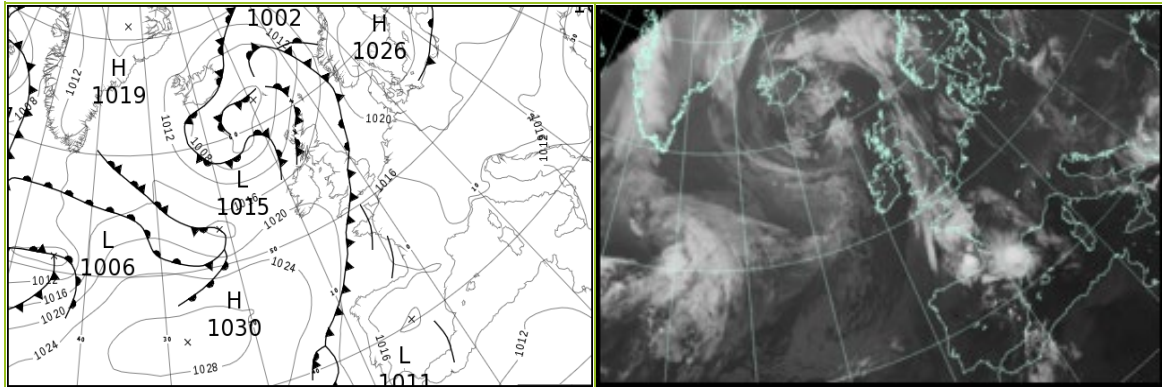

Daily Extremes

<i>Highest Maximum</i>	24.8°C Preston, Cove House (Dorset, 44mAMSL)
<i>Lowest Maximum</i>	15.8°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	19.4°C Hastings (East Sussex, 45mAMSL)
<i>Lowest Minimum</i>	4.3°C Katesbridge (Down, 91mAMSL)
<i>Lowest Grass Minimum</i>	0.1°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	21.0mm Crowle S Wks (Worcestershire, 35mAMSL)
<i>Most Sunshine</i>	12.0hr Bude (Cornwall, 15mAMSL)
<i>Highest Gust</i>	32Kt 37mph Stornoway Airport (Western Isles, 15mAMSL)
<i>Highest Gust (mountain)</i>	53Kt 61mph Aonach Mor (Inverness-shire, 1130mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

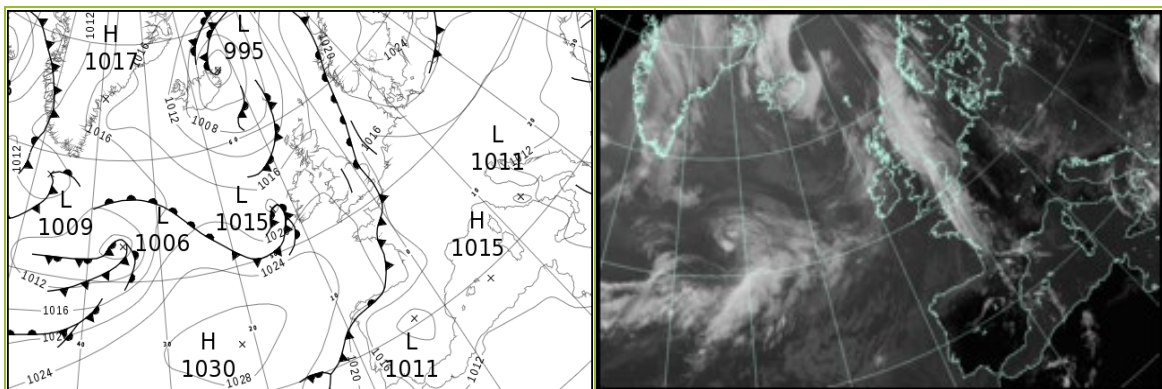

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Thursday 25 August 2022

Daily Weather Summary for Thursday 25 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Friday 26 August 2022

This day's summary created 02/09/2022 03:03

Summary of the UK Weather for Friday 26 August 2022

The day started with mainly dry conditions, however showers persisted in Northern Ireland for much of the morning. At around 3am, rain began to move into western areas of mainland Britain, with some locally heavy showers in southwest Scotland. In east and southeast England fog was reported widely, with visibilities as low as 100m at Gatwick airport. Mist and fog patches lifted through the morning, leaving clear skies for the south and east of England and north of Scotland. Meanwhile, an occluded front in the west gradually pushed eastwards into the UK, bringing showery rain here. Showers were heavier across parts of southern Scotland in the afternoon but turned lighter and became more scattered as the evening progressed. Central and eastern parts of England remained dry throughout. Winds were light and variable in direction ahead of the front but westerly to northwesterly behind.

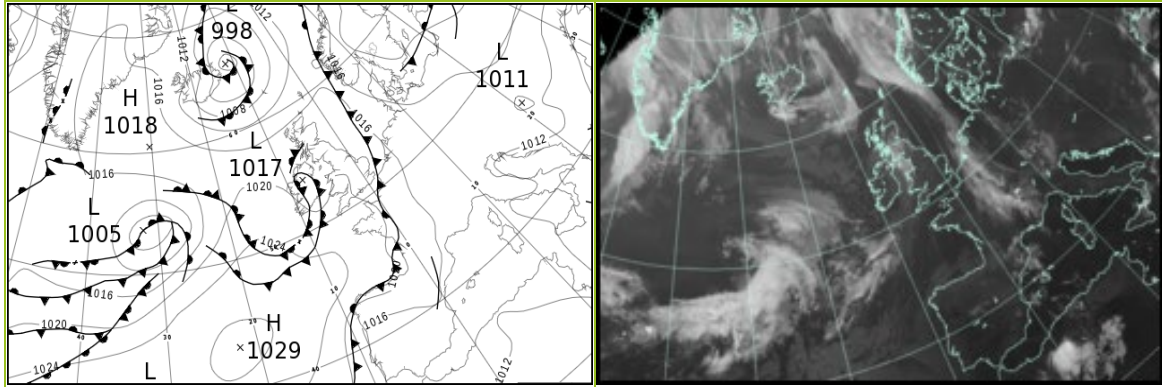

Daily Extremes

<i>Highest Maximum</i>	25.8°C Charlwood (Surrey, 67mAMSL)
<i>Lowest Maximum</i>	15.0°C Ballypatrick Forest (Antrim, 156mAMSL)
<i>Highest Minimum</i>	16.2°C Manston (Kent, 49mAMSL)
<i>Lowest Minimum</i>	2.3°C Loch Glascarnoch (Ross & Cromarty, 269mAMSL)
<i>Lowest Grass Minimum</i>	-1.2°C Durris (Kincardineshire, 107mAMSL)
<i>Most Rainfall</i>	9.8mm Edinburgh, Gogarbank (Midlothian (in Lothian Region), 57mAMSL)
<i>Most Sunshine</i>	11.1hr Whitby (North Yorkshire, 41mAMSL)
<i>Highest Gust</i>	27Kt 31mph Berry Head (Devon, 58mAMSL)
<i>Highest Gust (mountain)</i>	26Kt 30mph Aonach Mor (Inverness-shire, 1130mAMSL) also Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

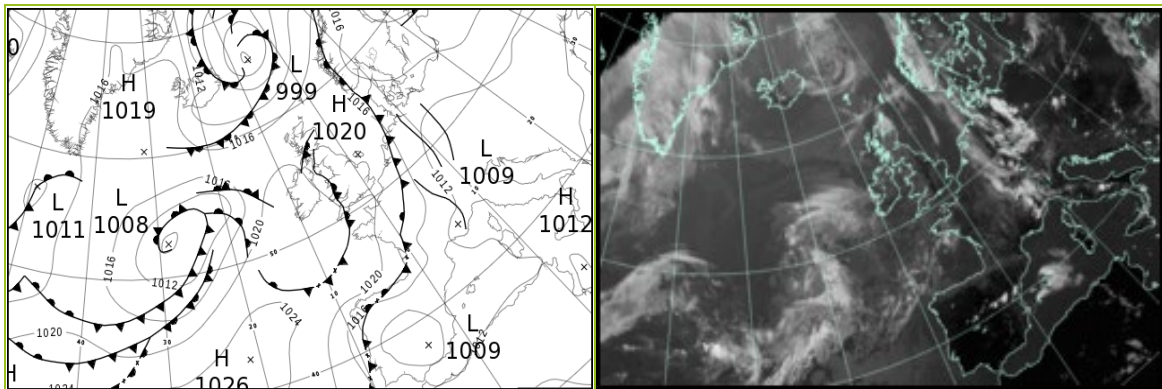

mAMSL refers to station elevation in metres above mean sea level

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Saturday 27 August 2022

This day's summary created 03/09/2022 03:03

Summary of the UK Weather for Saturday 27 August 2022

It was a benign start for most across the UK. Weak bands of light scattered showers edged eastwards through the morning over parts of northeast England and eastern Scotland, and over Northern Ireland. Early coastal mist was reported in Fife and in East Yorkshire, meanwhile fog was seen across central and southern parts, and west Scotland. Another scattering of showers developed around midday in Norfolk, Shropshire, and the Inner Hebrides, but elsewhere it was largely dry with some warm and sunny intervals. Later in the afternoon, patchy rain made its way into the far northwest of the UK, with some heavier bursts affecting Northern Ireland. Away from the northwest, it was a dry evening with clear spells. Winds were generally light and northeasterly.

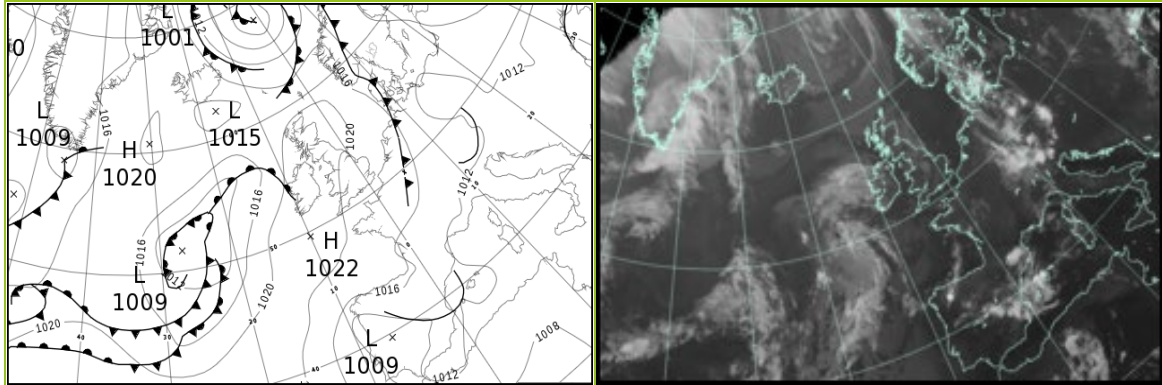

Daily Extremes

<i>Highest Maximum</i>	26.4°C Coton-in-the-elms (Derbyshire, 85mAMSL)
<i>Lowest Maximum</i>	14.3°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	16.3°C Prestatyn (Clwyd, 4mAMSL)
<i>Lowest Minimum</i>	2.6°C Achnagart (Ross & Cromarty, 15mAMSL)
<i>Lowest Grass Minimum</i>	-0.2°C Tyndrum No 3 (Perthshire (in Central Region), 168mAMSL)
<i>Most Rainfall</i>	9.8mm Harris: Quidnish (Western Isles, 13mAMSL)
<i>Most Sunshine</i>	12.2hr Leconfield (Humberside, 7mAMSL)
<i>Highest Gust</i>	24Kt 28mph Lerwick (Shetland, 82mAMSL) also Baltasound No 2 (Shetland, 15mAMSL)
<i>Highest Gust (mountain)</i>	18Kt 21mph Cairngorm Summit (Inverness-shire, 1237mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

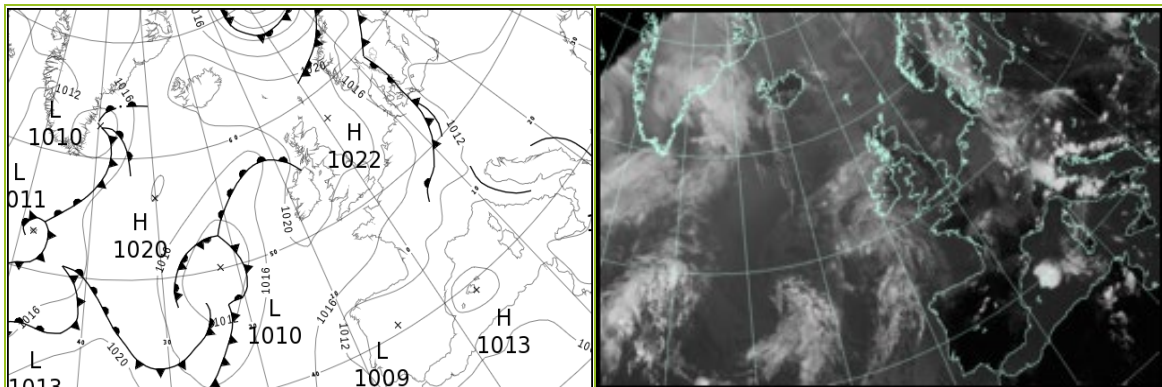

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Saturday 27 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Sunday 28 August 2022

This day's summary created 04/09/2022 03:03

Summary of the UK Weather for Sunday 28 August 2022

Under a higher pressure regime, the UK saw a fine and mostly dry start to the day. Northern Ireland and western Scotland experienced a little patchy rain through the early hours. Otherwise, it was a dry but cloudy morning, with reports of mist and fog along eastern coasts. Patchy rain in parts of Western Scotland and Northern Ireland eased through the morning, clearing almost completely by midday. Further precipitation developed over northern and southwest Scotland in the afternoon, while some heavier showers were seen locally across Northern Ireland. Some scattered showers affected Northern England later in the afternoon and continued into the evening. Elsewhere, it was a mostly dry day with bright or sunny spells for many, albeit a fair amount of high cloud in the south.

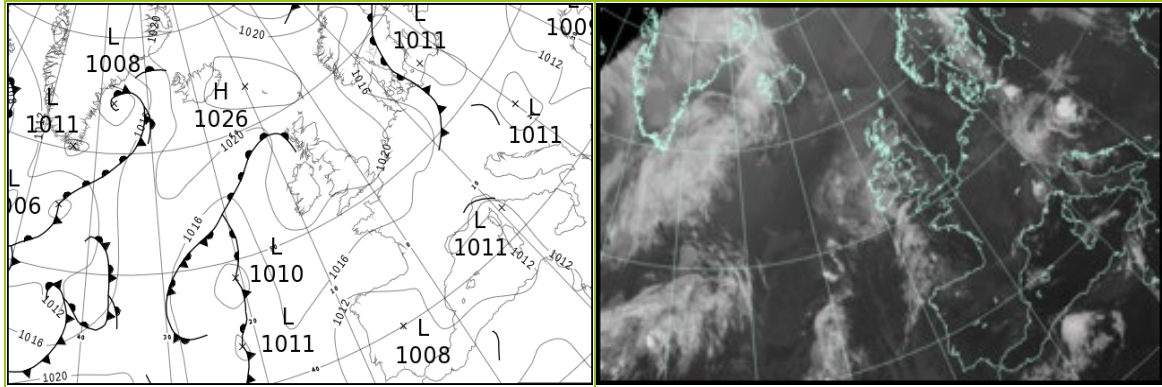

Daily Extremes

<i>Highest Maximum</i>	26.1°C Oxford (Oxfordshire, 63mAMSL)
<i>Lowest Maximum</i>	13.3°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	17.1°C Mumbles Head (West Glamorgan, 44mAMSL)
<i>Lowest Minimum</i>	6.4°C Lyth No 2 (Caithness, 24mAMSL) also Kielder Castle (Northumberland, 201mAMSL) also Shap (Cumbria, 263mAMSL)
<i>Lowest Grass Minimum</i>	2.5°C Copley (Durham, 253mAMSL)
<i>Most Rainfall</i>	6.2mm Thomastown (Fermanagh, 72mAMSL)
<i>Most Sunshine</i>	9.7hr Shoeburyness, Landwick (Essex, 2mAMSL)
<i>Highest Gust</i>	27Kt 31mph Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Highest Gust (mountain)</i>	17Kt 20mph Cairnwell (Aberdeenshire, 928mAMSL) also Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

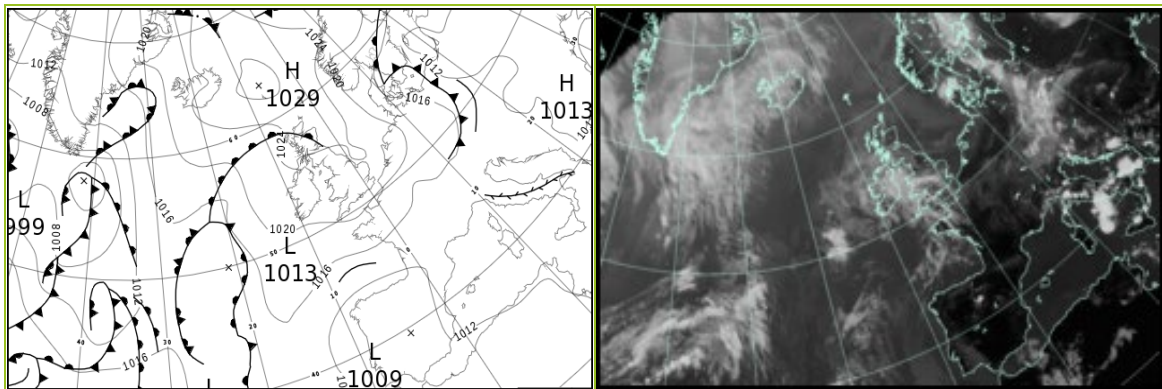

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Sunday 28 August 2022

Daily Weather Summary for Sunday 28 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Monday 29 August 2022

This day's summary created 05/09/2022 03:03

Summary of the UK Weather for Monday 29 August 2022

It was a cloudy start away from the far south of the UK, with some patchy rain affecting eastern Northern Ireland and northern England in the early hours. Mist was reported in multiple locations, mainly in the northeast of England and north of Scotland, and there were further showers in Valley, Anglesey towards dawn. High pressure centred to the north of the UK allowed a light northeasterly breeze to pick up through the course of the morning across the south of the UK. Any showers cleared most parts through the morning, while still lingering to eastern England until midday. Locally heavy showers developed in parts of western and central Scotland in the afternoon. These showers eased into the evening and were replaced with some patchy rain, mainly over the upslopes. Most parts saw dry and rather cloudy conditions overall, with the best of any sunshine in the southwest. Winds were generally light to moderate, with a keen breeze continuing to develop in the far south and southwest through the course of the day.

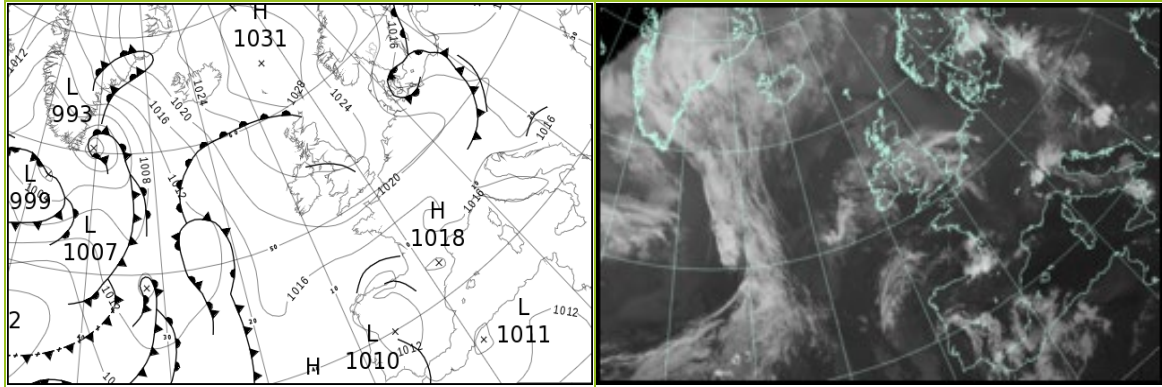

Daily Extremes

<i>Highest Maximum</i>	26.9°C Treknow (Cornwall, 100mAMSL)
<i>Lowest Maximum</i>	12.6°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	17.0°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL) also Slapton (Devon, 32mAMSL)
<i>Lowest Minimum</i>	6.4°C Sennybridge No 2 (Powys (south), 307mAMSL)
<i>Lowest Grass Minimum</i>	1.8°C Fair Isle (Shetland, 57mAMSL)
<i>Most Rainfall</i>	13.4mm Tulloch Bridge (Inverness-shire, 249mAMSL)
<i>Most Sunshine</i>	12.9hr Tiree (Argyll (in Strathclyde Region), 9mAMSL)
<i>Highest Gust</i>	28Kt 32mph Culdrose (Cornwall, 76mAMSL) also Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Highest Gust (mountain)</i>	28Kt 32mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

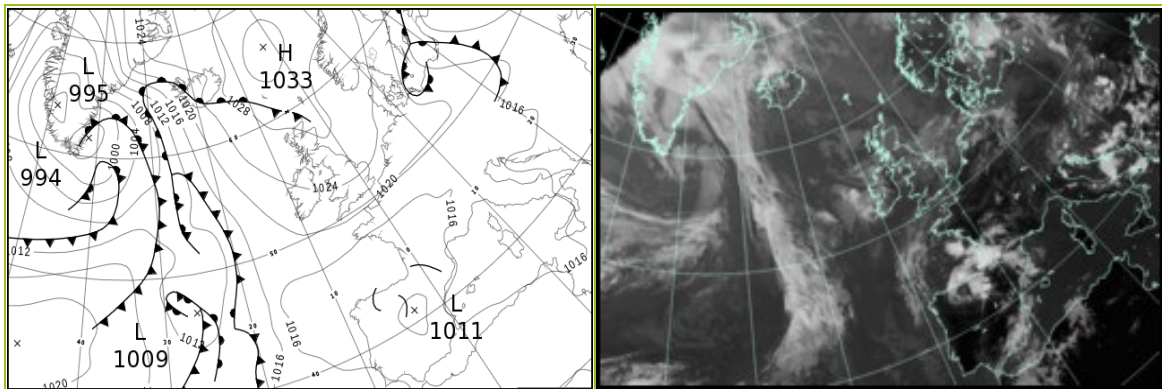

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Monday 29 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Tuesday 30 August 2022

This day's summary created 06/09/2022 03:03

Summary of the UK Weather for Tuesday 30 August 2022

High pressure centred to the northeast of the UK, and a ridge extending across the country, dominated the overnight weather. It was mostly dry except for some light rain and drizzle in the Inner Hebrides, as well as in parts of central and northeast Scotland. It was largely clear for Wales and the south of England but cloudy for Northern Ireland and northern Great Britain, with mist and fog becoming widespread in Scotland through the early morning. The high pressure system stayed in place for the rest of the day, bringing generally fine and dry weather to much of the country. It was cloudier in the north, east and southeast, where there was also the odd shower in the morning. Elsewhere experienced patchy cloud with sunny spells throughout the day. Winds were light except in the south, where it was breezy near the coast. The dry weather continued into the evening and the warm weather slowly cooled.

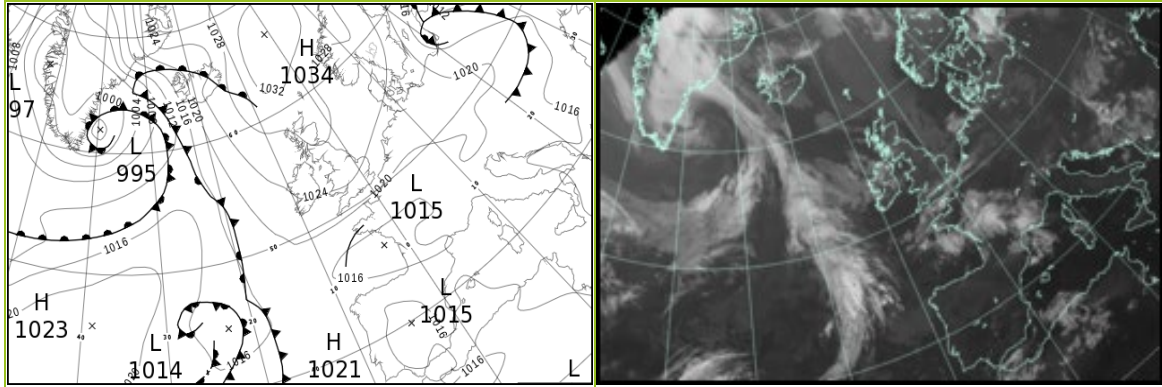

Daily Extremes

<i>Highest Maximum</i>	25.7°C Treknow (Cornwall, 100mAMSL)
<i>Lowest Maximum</i>	12.5°C Lerwick (Shetland, 82mAMSL)
<i>Highest Minimum</i>	16.9°C Scilly: St Marys Airport (Isles Of Scilly, 31mAMSL)
<i>Lowest Minimum</i>	5.7°C Orkney: Loch Of Hundland (Orkney, 28mAMSL)
<i>Lowest Grass Minimum</i>	1.0°C Whitechurch (Dyfed, 129mAMSL)
<i>Most Rainfall</i>	10.8mm Hartlepool P Sta (Cleveland, 5mAMSL)
<i>Most Sunshine</i>	12.9hr Tiree (Argyll (in Strathclyde Region), 9mAMSL)
<i>Highest Gust</i>	28Kt 32mph Langdon Bay (Kent, 117mAMSL)
<i>Highest Gust (mountain)</i>	31Kt 36mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

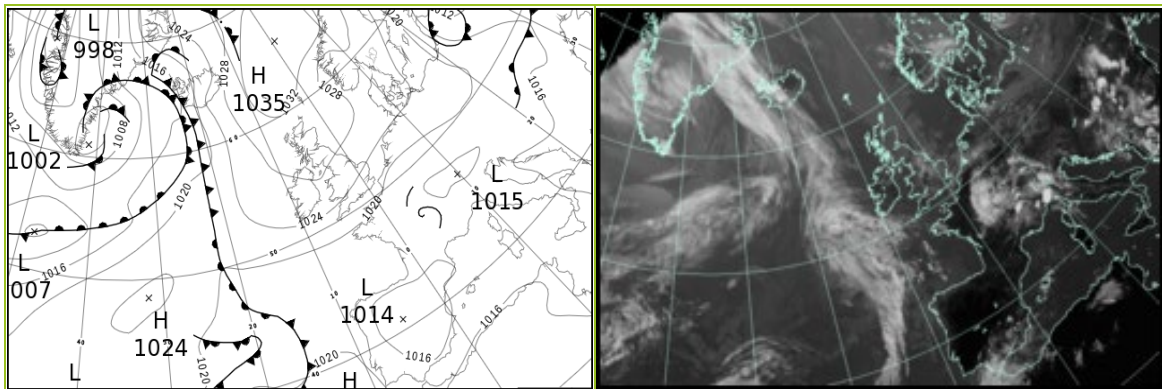

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Tuesday 30 August 2022

Daily Weather Summary for Tuesday 30 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Daily Weather Summary for Wednesday 31 August 2022

This day's summary created 07/09/2022 03:03

Summary of the UK Weather for Wednesday 31 August 2022

It was another benign start for the UK under the influence of high pressure. Most parts remained dry and cloudy through the latter part of the night, with low cloud covering most of the country. Some scattered showers were seen across the northeast of England in the early hours. Mist and fog formed in parts of eastern England and persisted until dawn. High pressure stayed in charge of the UK weather over the course of the day. There was low cloud in the northeast of Scotland, north of England and Wales in the morning, but this cleared by midday. Otherwise, most areas experienced a fine, dry day with patchy cloud and sunny spells. By the afternoon, the north of Scotland and southeast of England saw clear skies. It was warmer than previous days, especially in any sunshine. The dry weather continued into the evening, when most of the country experienced long clear spells.

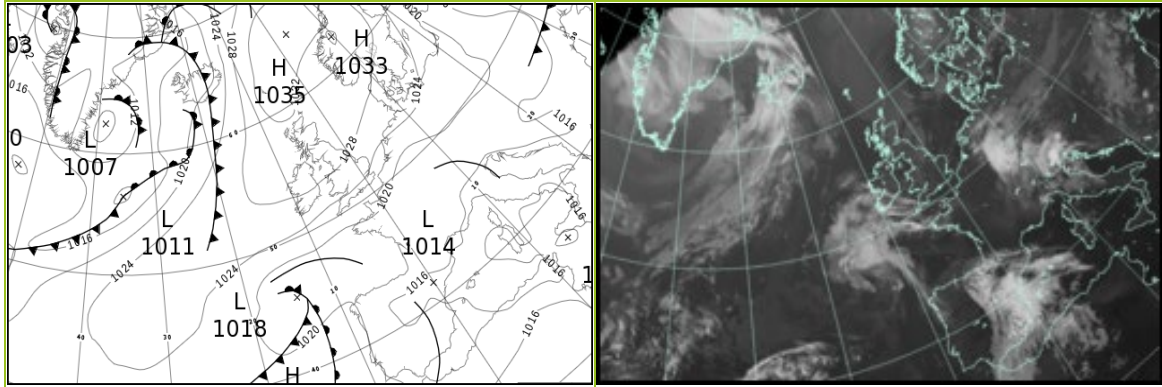

Daily Extremes

<i>Highest Maximum</i>	26.1°C Shoreham Airport (West Sussex, 2mAMSL)
<i>Lowest Maximum</i>	12.4°C Fair Isle (Shetland, 57mAMSL)
<i>Highest Minimum</i>	17.5°C Manston No 2 (Kent, 54mAMSL)
<i>Lowest Minimum</i>	1.0°C Altnaharra No 2 (Sutherland, 81mAMSL)
<i>Lowest Grass Minimum</i>	-3.6°C Dalwhinnie No 2 (Inverness-shire, 351mAMSL)
<i>Most Rainfall</i>	8.8mm Denge Beach (Kent, 4mAMSL)
<i>Most Sunshine</i>	13.0hr Stornoway Airport (Western Isles, 15mAMSL)
<i>Highest Gust</i>	31Kt 36mph Langdon Bay (Kent, 117mAMSL)
<i>Highest Gust (mountain)</i>	26Kt 30mph Great Dun Fell No 2 (Cumbria, 847mAMSL)
<i>Greatest Snow Depth at 0900 UTC</i>	No non-zero values.

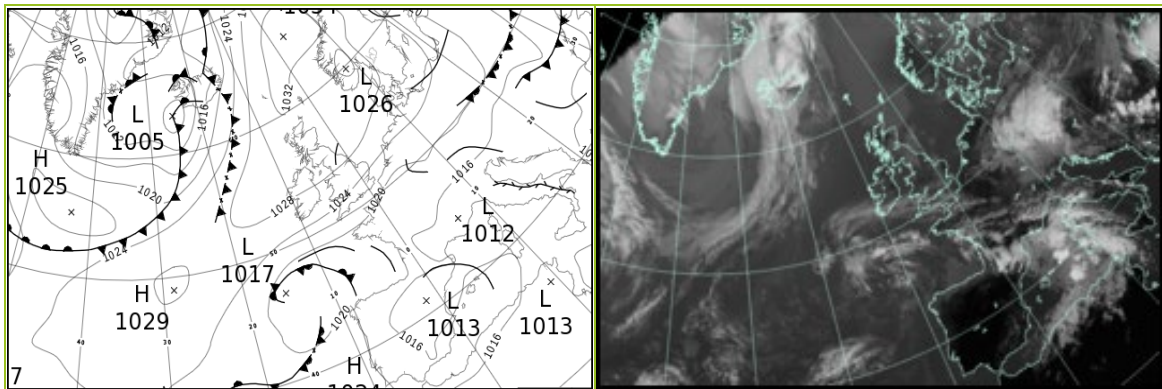

mAMSL refers to station elevation in metres above mean sea level

Daily Weather Summary for Wednesday 31 August 2022

North Atlantic and Europe analysis charts and satellite images at 0000 UTC

North Atlantic and Europe analysis charts and satellite images at 1200 UTC

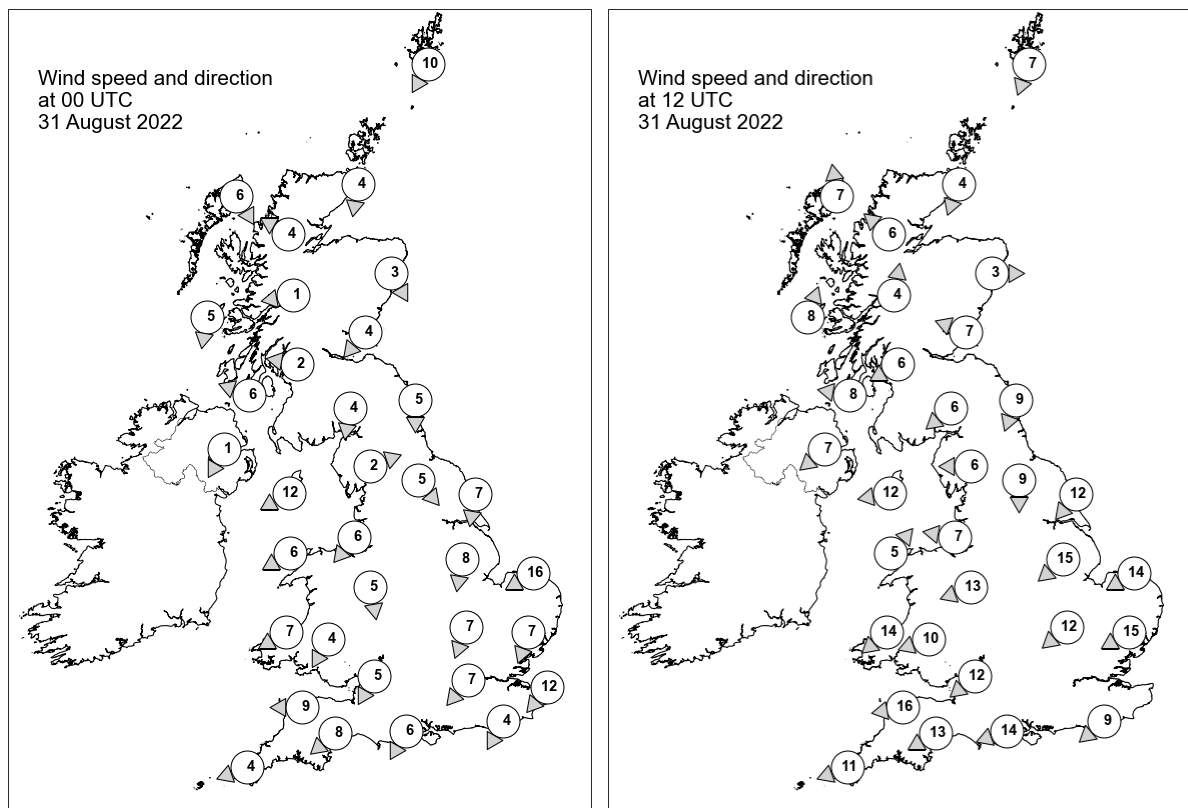

All satellite imagery copyright Met Office and EUMETSAT (European Organisation for the Exploitation of Meteorological Satellites). These show infra-red images from the geostationary MSG satellite. The rainfall rates are derived from both rain-radar and satellite data.

Daily Weather Summary for Wednesday 31 August 2022

Daily Weather Summary for Wednesday 31 August 2022

None of the selected stations observed a day of sleet or snow falling or non-zero snow depth at 0900 UTC.

Guidance Notes

UTC = Universal Coordinated Time. For the UK UTC is the same as GMT (Greenwich Mean Time).

National boundaries shown on the European station map are for illustrative purposes only.

Daily extremes

- Daily extremes have been manually confirmed by Met Office Observations Quality Management as valid observations from the live database at the time of checking. However, more extreme values may still be possible if they occur after the time of production.
- Mountain stations above 500 masl are excluded from lowest temperatures, highest gust speeds and greatest snow depths at 0900 UTC. This is because they are not considered representative of low level areas.
- Counties quoted against each station are based on historical county boundaries pre-1974 and may not reflect current administrative boundaries.

Analysis charts and satellite imagery

- The satellite imagery is infra-red imagery from the geostationary MSG satellite.
- The rainfall image is derived from satellite data from MSG and rain-radar data. This represents a snapshot of instantaneous rain-rates at 0000 UTC and 1200 UTC and so does not necessarily reflect daily accumulations in the rainfall station map.
- Any analysis charts or satellite images which are unavailable will be displayed as white space.

Station maps

- The UK maps show station data for the same set of stations presented UK data table. These stations are selected to provide good spatial coverage across the UK; they represent only a fraction of the overall UK observing network.
- Wind speed maps show wind speed in Kt and direction both averaged over the hour up to the time of observation. 1 Kt = 1.151 mph.

Hourly station data

- The data tables provide spot hourly observations from synoptic messages at 0000 and 1200 UTC. Missing data are denoted by '-'.

- Pressures are mean sea level pressure in hPa.
- For UK stations, Gibraltar and Jersey, the wind speeds and directions are both averaged over the hour up to the time of observation. However, for European stations wind speeds and directions are both averaged over a 10-minute period up to the time of observation.
- Wind speeds are in Kt. Wind directions are stored in the database every 10 degrees and have been converted to the nearest point of the compass. These give the direction the wind is blowing from, not to.
- Cloud amounts are in Oktas from 0 (clear) to 8 (overcast). 9 indicates sky obscured (eg by fog).
- Air temperature and dew point temperature are in Celsius.

Temperature maps

- Daily maximum, minimum and grass minimum temperatures are in Celsius.
- The period for the daily maximum temperature on day D is defined from 0900 UTC day D to 0900 UTC day D+1.
- The period for the daily minimum and grass minimum temperatures on day D is defined as 0900 UTC day D-1 to 0900 UTC day D.
- On any given day D the minimum will typically occur in the early hours of the morning and the maximum in early afternoon.

Rainfall, sunshine and max gust speed maps

- Daily rainfall is in mm from 0900 UTC day D to 0900 UTC day D+1.
- Daily sunshine is in hours from Kipp and Zonen CSD1 automatic sunshine records. Bright sunshine is defined as exceeding 120 W/m².
- Max gust speeds are the daily max gust in Kt from 0000-0000 UTC

Snow maps

- The day of snow falling map displays data from present weather sensors, showing stations which have recorded sleet or snow falling at any point in the day (0000-0000 UTC).
- The snow lying map shows level snow depth as recorded by the automatic snow depth sensors at 0900 UTC. These snow depth sensors do not record snow depth if this is less than 1cm.
- Snow depth sensors are normally operational from October to April, in the event of snow falling outside this period data availability may be limited.
- Snow maps will only be displayed if one or more of the selected stations on that date have recorded either snow falling or non-zero snow depths. If snow maps are not

displayed it is still possible that other stations in the network have recorded a day of sleet or snow falling or non-zero snow depth.
