DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Wednesday, 12 January 2022 at 05:30 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Mostly Low air pollution levels are expected. However, locally Moderate levels are likely in urban areas of southern UK where winds are lighter. In particular, higher levels of pollution may exist close to busy roads due to the light winds allowing the build-up of locally emitted pollution.

Tomorrow: A continuation of largely Low levels of air pollution, with pockets of Moderate in southern UK with lighter winds here.

Outlook: Generally Low levels of air pollution. Risk of Moderate levels in southern UK will slowly decline over the weekend, as winds increase slightly, allowing pollutants to disperse.
