Here is the forecast for the United Kingdom for daytime tomorrow:  
It'll be another day of sunshine and showers for many of us today, although these showers will be lighter than we've seen recently. It will also be cloudier and wind along the east coast with rain coming in off the North Sea. Overnight that rain will edge southwards. Elsewhere the showers will fade away to leave a mostly dry night.

Outlook for Friday and Saturday:  
Over the next couple of days we will hold onto the cool northerly breeze but there will be a lot of dry, often rather cloudy, weather around and just some showery rain working south later on Friday and Saturday morning.
