

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Sunday 01 Nov 2015

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
Mist and fog will again be slow to clear tomorrow, particularly in the southeast. Cloud will lift and clear more quickly across western parts, leading to some warm sunshine. Northern parts of Scotland will have a better day in terms of visibility, however some light rain is likely in the west.

Outlook for Tuesday and Wednesday:

Tuesday will start rather cloudy and foggy again. Apart from a brief spell of showery rain across southern parts, it will stay dry with some brightness; the best of this across northern Scotland. Wednesday will be largely cloudy with some outbreaks of rain, and fog will be less extensive.
