

FPUK86 EGRR 041745  
Forecast for the UK.  
Issued by the Met Office  
at 1945 on Saturday 4 February 2006

\*\* Valid for Broadcast at 2159 \*\*

Here is the forecast for the United Kingdom for daytime tomorrow :  
Most parts of the UK will have another dry day. There will be rather a lot of cloud around at times but some bright or sunny spells are expected, eastern districts of both Scotland and England being most favoured. The far north of Scotland will see some light rain or drizzle, the rain turning heavier across the Northern Isles for a time. Light winds for many, so feeling pleasant enough in the sunnier spots, but fresh to strong winds affecting northern Scotland.

Outlook for Monday and Tuesday:

Dry for most on Monday but some rain across Scotland, this moving south across many places during Tuesday.
