

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Sunday 02 Jun 2013

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:

Dry and fine for much of the UK with warm sunny spells and occasional cloud developing through the day. Best of the sunshine around eastern coasts. Rather more cloud though across Northern Ireland and western Scotland with some light rain possible at first, then maybe the odd late afternoon sharp shower as cloud breaks.

Outlook for Tuesday and Wednesday:

More dry and fine weather on both days, with almost unbroken sunshine across England and Wales on Tuesday. Some isolated sharp showers could develop though during the afternoon over Scotland and Northern Ireland, with this risk extending further south on Wednesday into Wales and Northern England.
