

FPUK86 EGRR 011745  
Forecast for the UK.  
Issued by the Met Office  
at 1945 on Thursday 1 June 2006

\*\* Valid for Broadcast at 2159 \*\*

Here is the forecast for the United Kingdom for daytime tomorrow :  
A fine day for Northern Ireland, Wales, eastern Scotland and much of  
England with lots of sunshine. There will, however, be rather more  
cloud across East Anglia and southeast England, this gradually  
breaking up during the day. Western and northern Scotland will also  
see plenty of cloud, along with a little rain or drizzle across the  
far north. Feeling warm or very warm in the sunshine, but  
temperatures nearer normal in the cloudier areas and along some  
coasts.

Outlook for Saturday and Sunday:

Many places fine, sunny and warm on Saturday but some rain across  
northern Scotland. Perhaps a few scattered showers on Sunday.
