mainly affecting high ground.**

**What to expect**

- Some roads and railways likely to be affected with longer journey times by road, bus and train services

## Further details

A spell of sleet and snow is expected on Wednesday morning, mostly on high ground.

2-5 cm snow may accumulate above 200 metres, whilst 5-10 cm is possible above 400 metres in a few places. This may lead to tricky driving conditions and some disruption on higher routes. Any snow at lower levels looks less likely to settle on roads.

Sleet and snow will mostly die out by late morning with a thaw then likely.

 Medium likelihood of low impacts
