| ⚠️ | Yellow warning **Rain** | Between **21:00 Sun 29 Apr 2018** and **23:59 Mon 30 Apr 2018** |

## There is a risk of heavy rain across Eastern and Southeastern England on Sunday night and Monday along with some strong winds.

## What to expect

- There is a small chance that homes and businesses could be flooded, causing damage to some buildings
- Spray and flooding could lead to difficult driving conditions and some road closures
- Where flooding occurs, there is a slight chance of delays or cancellations to train and bus services

## Further details

A period of heavy rain will affect first Southeastern England and then parts of East Anglia on Sunday evening, lasting through much of Monday. Although there is much uncertainty in these rainfall totals and how far West the heaviest rain will occur, accumulations of 25-40 mm are possible, and 50-70 mm in places during this period. The heavy rain will be accompanied by strong to gale force Northerly winds, and it will be cold enough to produce some snow on high ground such as the North and South Downs, although this is unlikely to settle.

Likelihood

Impact

✓ Very low likelihood of medium impacts
