

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Thursday 11 Sep 2014

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Any early mist and fog patches will clear quickly during the morning to leave another dry and largely fine day with some sunny spells. The best of the sunshine will be across northern and western parts of the UK but it will be fairly cloudy across central areas. It will be breezy along the South Coast too.

Outlook for Saturday and Sunday:

It will remain fine with sunny spells this weekend, especially in the west, as high pressure stays close to the UK. However, it will be cloudier across eastern parts, and occasional drizzle is possible across northeastern and some southern areas on Sunday.
