Here is the forecast for the United Kingdom for daytime tomorrow :  
Wales, as well as southern and eastern England, the odd shower is likely but, for many, it will be a dry day with bright or sunny intervals developing. Eastern Scotland will also have some sunshine at first but most parts will be cloudy with rain across northwestern regions, extending south and east through the day. Mild for most but with brisk northwesterly winds in exposed northern and western regions.

Outlook for Thursday and Friday:

Little change on Thursday, cloud and rain in the north and west while the southeast is mainly dry, some bright spells. Friday, wet and windy weather extending southeast through the day.
