

FPUK86 EGRR 031745
Forecast for the UK.
Issued by the Met Office
at 1945 on Monday 3 November 2003

** Valid for Broadcast at 2159 **

Here is the forecast for the United Kingdom for daytime tomorrow :
Much of England, Wales and southern Scotland will be dry. A fair amount of cloud is expected but bright or sunny spells should occur, the best of these in eastern districts. Breezy with some very gusty winds, especially to the lee of hills. However, out of the wind it should feel warm. Scotland and Northern Ireland will have more cloud and some outbreaks of rain, these mostly across northern and western areas where strong to gale force winds are also expected.

Outlook for Wednesday and Thursday:
Many places dry on Wednesday, if rather windy. Patchy rain in some western parts on Thursday, dying out later.
