DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Wednesday, 20 July 2022 at 05:37 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: The air quality is improving however, widespread areas of Moderate air pollution may persist across parts of England and Wales. Low air pollution levels are expected for the far northwest of Britain and much of Northern Ireland.

Tomorrow: Air pollution levels will become largely Low on Thursday, thanks to a cleaner air originating from the Atlantic. However, residual pockets of Moderate air pollution may persist in the southeast of England.

Outlook: Air pollution levels will be mostly Low during this period. However, areas of Moderate pollution may creep up in places as the weather becomes largely sunny and warm over the weekend, particularly in southeast England.
