

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Sunday 02 Oct 2016

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
After any mist and fog has cleared, it will be a fine and dry day with patchy cloud and sunny spells. However, in Northern Ireland and western Scotland there will be thicker cloud and perhaps some rain at times. It will also be rather windy in the west.

Outlook for Tuesday and Wednesday:

Looking ahead to Tuesday, it will stay fine and dry for most of us. It will be rather breezy through the day, but it's going to feel warm in any autumnal sunshine. Wednesday will be similar with patchy cloud and a few sunny intervals through the day, but rather windy for most.
