

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Tuesday 12 Feb 2008

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Mist and fog will slowly clear from most parts to leave another fine day with plenty of sunshine. The far east however may stay cooler and hold on to the misty conditions as thicker cloud spreads in here during the afternoon. Mild elsewhere though with light winds again.

Outlook for Thursday and Friday:

A much cloudier and cooler spell of weather can be expected in all parts with much lower temperatures and more cloud than recent days. It should however stay largely dry though with just the odd patchy of light drizzle here and there.
