

Forecast For The United Kingdom
Issued by Met Office Exeter
at 1945 on Thursday 04 Oct 2012

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:
A cloudy day in southern parts of the UK. The morning should be largely dry, with just a little light rain. Through the afternoon, persistent, sometimes heavy, rain will spread eastwards across the south. Scattered showers are expected across the north through the day, with some sunny spells.

Outlook for Saturday and Sunday:

Rain may be slow to clear the south coast on Saturday. Otherwise, most places will see some sunshine after a chilly start with some early mist or fog. A cold and clear start on Sunday in the north and east, however rain and strong winds will spread westwards through the day.
