

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Friday 04 May 2007

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
For most areas low cloud will break more readily and most areas will have plenty of warm sunshine. However, onshore breezes will keep cloud near some North Sea coasts of southeastern England and mist may lap onto some southwestern coasts later. In the northwest, it will become cloudier with rain into parts of Northern Ireland and western Scotland by evening.

Outlook for Sunday and Monday:  
Becoming cloudier, cooler and windy at times. Rain or showers for most areas, heavy at times in the northwest, but lighter and more sporadic in the south with many southeastern areas dry for much of the time with bright spells.
