

Forecast For The United Kingdom  
Issued by Met Office Exeter  
at 1945 on Wednesday 03 Jan 2018

++ Valid for broadcast at 2159

Here is the forecast for the United Kingdom for daytime tomorrow:  
Wet and windy weather will affect the southwest early in the morning, moving northwards through the day to affect Scotland during the evening time. Once the rain has moved through there will be brighter spells for many, with just the odd shower possible. However, heavier rain will return again overnight.

Outlook for Friday and Saturday:  
Friday will be rather cloudy with a few showers, and these may turn to snow on some of the hills in the north. On Saturday it will be feeling much colder with wintry showers in some areas, and brisk winds.
