**DAILY WEATHER REPORTS**

---

1ST JULY TO 30TH SEPTEMBER, 1922.

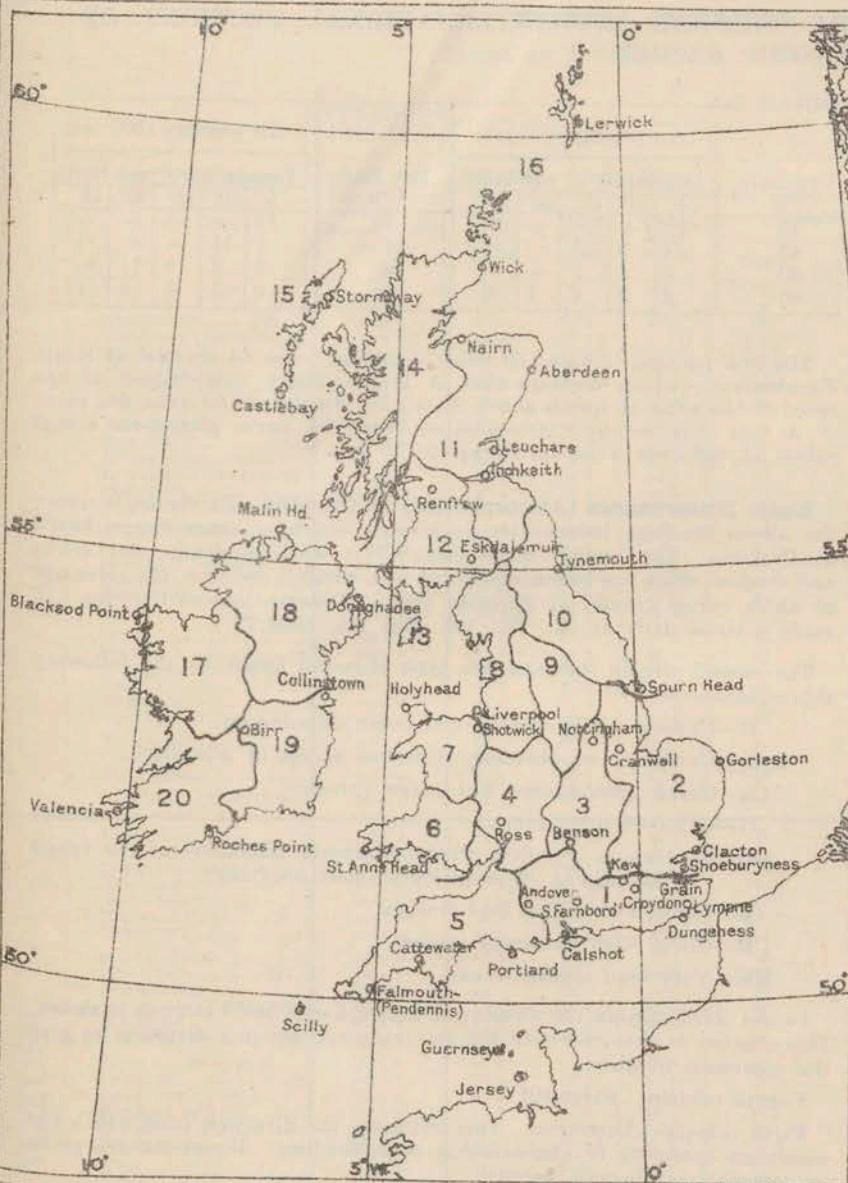

## METEOROLOGICAL STATIONS.

Scale $1:2 \times 10^7$					30°
Nautical Miles	1	2	3	4	300
Statute Miles	2	3	3	4	300

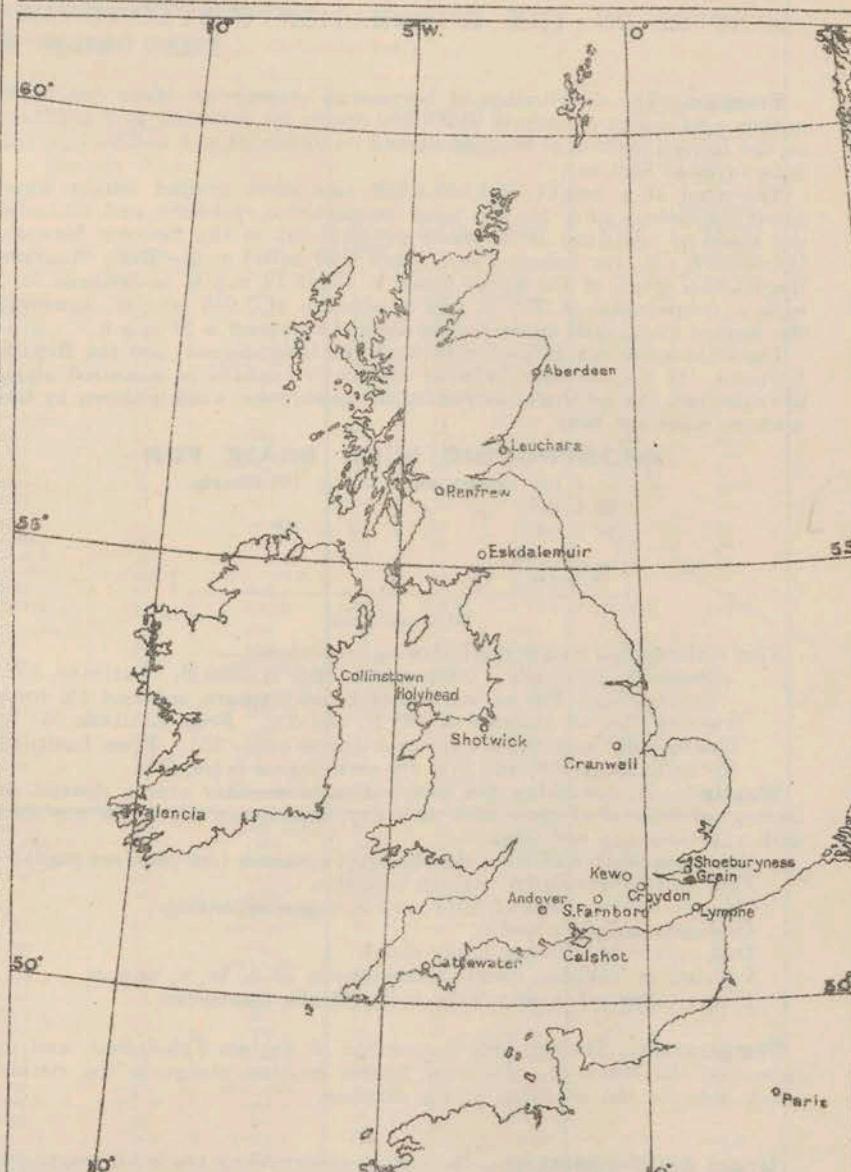

## FORECAST DISTRICTS AND BRITISH STATIONS.

756

#### STATIONS USED FOR UPPER AIR SUPPLEMENT

## THE BEAUFORT SCALE OF WIND FORCE

Beaufort Number	Admiral Beaufort's General Description of Wind.	Specification for use on Land, based on observations made at Land Stations.	Limits of Mean Velocities Statute Miles per Hour.
0	Calm ..	Calm ; smoke rises vertically	Less than 1
1	Light air ..	Direction of wind shown by smoke drift	1-3
2	Slight breeze ..	Wind felt on face ; leaves rustle	4-7
3	Gentle breeze ..	Leaves and small twigs in constant motion ; wind extends light flag	8-12
4	Moderate wind ..	Raises dust and loose paper ; small branches are moved	13-18
5	Fresh wind ..	Small trees in leaf begin to sway ; crested wavelets on inland waters	19-24
6	Strong wind ..	Large branches in motion ; whistling heard in telegraph wires	25-31
7	High wind ..	Whole trees in motion ; inconvenience felt when walking against wind	32-38
8	Gale ..	Breaks twigs off trees ; generally impedes progress	39-46
9	Strong gale ..	Slight structural damage occurs (chimney pots and slates removed)	47-54
10	Whole gale ..	Seldom experienced inland ; trees uprooted	55-63
11	.. .	Very rarely experienced ; accompanied by widespread damage	64-75
12	Hurricane ..		Above 75

## **BEAUFORT NOTATION**

b blue sky (not more than a quarter covered).  
 bc sky partly cloudy (one half covered).  
 c generally cloudy (three quarters covered).  
 o overcast sky. d drizzle.  
 f fog. h hail.  
 KQ line squall. l lightning.  
 m mist. p passing showers.

Capital letters indicate intensity, suffix  $\circ$  indicates slight, and repetition of letters continuity, thus:-  
R=heavy rain. rr=continuous moderate rain.  $r_r$ =continuous slight rain.

### **BEAUFORT NOTATION.**

q	squalls.	r	rain.
rs	sleet, <i>i.e.</i> , rain and snow.		
s	snow.	t	thunder.
v	unusual visibility.		
w	dew.	x	hear frost.
y	dry air; humidity less than 60 per cent.		
z	dust haze; the turbid atmosphere of dry weather.		

## WEATHER SYMBOLS.

Clear sky	○	Sky + clouded	○
Sky + clouded	○	Sky + clouded	○
Overcast sky	●	Rain falling	●
Snow	*	Sleet	*
Fog	≡	Hail	▲
Thunder	?	Mist	≡
Lightning	↖	Thunderstorm	↖

# AIR MINISTRY.

## METEOROLOGICAL OFFICE, LONDON.

NOTES ON THE INFORMATION CONTAINED IN THE BRITISH AND INTERNATIONAL SECTIONS OF THE DAILY WEATHER REPORT.

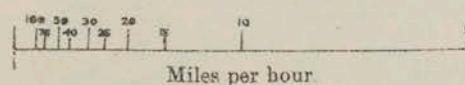

**Pressure.**—The distribution of barometric pressure at Mean Sea Level is shown by means of isobars which are drawn for intervals of 2 millibars on the British Section of the Report and for intervals of 4 millibars on the International Section.

The wind at a height of 1,500–2,000 feet above ground usually blows along the isobars and, for the same temperature, pressure and latitude, the speed of the wind is inversely proportional to the distance between the isobars, e.g., for isobars 1 inch apart (160 miles) in the Daily Weather Report the speed of the upper wind is about 12 m.p.h. in latitude 55°, with a temperature of 50° F. and a pressure of 1,015 mb; if, however, the isobars are  $\frac{1}{2}$  inch apart the corresponding speed is 24 m.p.h.

The scale below can be used with both the International and the British Sections. If the distance between consecutive isobars is measured along the rule from the left-hand extremity the geostrophic wind is shown by the scale in miles per hour.

### GEOSTROPHIC WIND SCALE FOR

4 mb isobars on  $1 : 2 \times 10^7$  Charts.  
or 2 mb " "  $1 : 10^7$   
or 1 mb " "  $1 : 5 \times 10^6$  "

This scale applies under the following conditions:—

Pressure, 1,015 mb. Temperature, 283° A=50° F. Latitude, 55°.

Corrections.—For an increase of 10 mb pressure, subtract 1% from velocity; for an increase of 10° F. add 2%. From Latitude 55° to Latitude 65° subtract 1% for each degree above 55°. From Latitude 55° to Latitude 45° add 1½% for each degree below 55°.

**Weather.**—In describing the distribution of weather over a district or during an interval of time such as a day, descriptive adjectives are used with the following meanings:—

Fine—mainly b and bc of the Beaufort notation (see previous page).

Fair or fair generally—mainly bc and c.

Cloudy—combinations of bc, c and o, e predominating.

Overcast—mainly c and o.

Dull—overcast with low heavy cloud.

Varying or variable cloud—combinations of b, bc, c, and o.

Precipitation when occurring is specifically mentioned.

**Temperature.**—Temperature is specified in degrees Fahrenheit, and is shown on the charts by means of figures written alongside the circles which indicate the positions of the stations.

**Upper Air Temperature.**—The actual observations are made normally, one at 1,000 feet above the level of the aerodrome, and the remainder at pressures of 950, 900, 850, 800, etc., millibars. Heights are then computed and, apart from instrumental error, are correct heights: they do not require modification for differences of temperature from normal as these are allowed for in the computation. The values are shown graphically and in tabular form in the Upper Air Supplement. On the diagram, temperatures are given in degrees Fahrenheit and Absolute. The lines marked "Anti-cyclonic," "Cyclonic," "Summer," and "Winter," indicate the normal fall of temperature with pressure under the conditions indicated. The oblique line marked "Adiabatic" shows the lapse rate of temperature for dry air ascending or descending under adiabatic conditions, i.e., without communication of heat from external sources. The lapse rate under these circumstances is very approximately 5·5° F. per 1,000 feet, or 10a per kilometre. A lapse rate greater than this value indicates instability of the atmosphere.

The new tables for computing relative humidity from readings of dry and wet bulb thermometers exposed on aeroplanes, are based on the formula\*  $e'' = e' - A(t-t')$   $\frac{B}{1000}$  where  $A=0.37$ , which differs from the old formula used previously to the 19th September, 1921, only in having a constant 0.37 instead of 0.278. Considerable difference exists between the values for relative humidity given by the two formulae when the humidity is low: when it is high the differences are slight. The following tables indicate the actual value of these differences, the new formula invariably giving smaller humidities:—

Dry Bulb. °F.	Air pressure 400 mb.					Dry Bulb. °F.	Air pressure 600 mb.					
	Depression of wet bulb.						Depression of wet bulb.					
	5°	10°	15°	20°	25°		5°	10°	15°	20°	25°	
20	6	10	—	—	—	20	7	15	—	—	—	
40	2	4	6	9	—	40	3	6	10	—	—	
60	1	2	3	4	5	60	2	3	4	7	7	
80	0	1	1	2	2	80	0	2	2	3	4	

\*  $e''$  = actual pressure of water vapour in the air expressed in the same unit as B  
e' = saturation pressure of water vapour at wet bulb temperature.

t = dry bulb temperature in degrees F.

t' = wet bulb temperature in degrees F.

B = barometric pressure.

Dry Bulb. °F.	Air pressure 800 mb.					Dry Bulb. °F.	Air pressure 1000 mb.				
	5°	10°	15°	20°	25°		5°	10°	15°	20°	25°
20	10	—	—	—	—	20	12	—	—	—	—
40	4	9	13	—	—	40	6	11	—	—	—
60	2	4	7	—	—	60	3	6	8	11	—
80	2	2	4	4	5	80	2	3	4	6	6

The new formula is based on experiments in the wind channel at South Farnborough, which indicate that A is practically independent of the speed of the wind at speeds above 20 m.p.h. In the old formula, the value of A was obtained by extra-polation from the curve giving its actual values at different wind speeds up to 12 m.p.h.

**Radio Disturbances (Atmospherics) at Croydon.**—In the table under the above heading, information is given concerning atmospherics heard at Croydon. The term "atmospherics" is used to denote the clicks and crashes which are commonly heard in a wireless receiver, the intensity of which varies greatly at different times. Observations at Croydon are made 4 times daily at 1h., 7h., 13h. and 18h. G.M.T.

The second column indicates the type of sound heard, by the following abbreviations:—

C—Uniform clicks and normal quiet distribution.

C<sub>1</sub>C<sub>2</sub>—Clicks of two obviously different orders of intensity.

Cg—Clicks predominant but a few grinders.

G—Grinders predominant.

GG—Continuous grinders whose minimum direction can be found by estimation of intensity without counting.

Ck—Clicks with a few loud crashes.

CK—Clicks with numerous crashes.

KK—Very loud atmospherics.

In the third column the number of atmospherics per 4 seconds is shown. This number is obtained with the receiving coil set in a direction to give the maximum number.

Fourth column. Strength.

Fifth column. Direction. This indicates the direction from which the maximum intensity of atmospherics is proceeding. Directions are given in degrees (see diagram below).

It is to be noted that there is an ambiguity of 180° in the determination of direction.

**Wind.**—All wind directions specified in the reports are "true," as distinguished from "magnetic." The arrows indicating wind direction are drawn to fly with the wind. Wind velocities are shown on the charts of the British Section and Upper Air Supplement in m.p.h. by the numbers placed within the small circles. In the International Section velocities are not shown. In both Sections the number of feathers on the arrows denotes wind force by Beaufort number.

**Upper Winds.**—The direction and velocity of the wind are given in the charts of the Upper Air Supplement for heights of 1,000 feet, 3,000 feet, and 6,000 feet. The data are also given in tabular form for various heights. The reports are usually based on Pilot Balloon ascents.

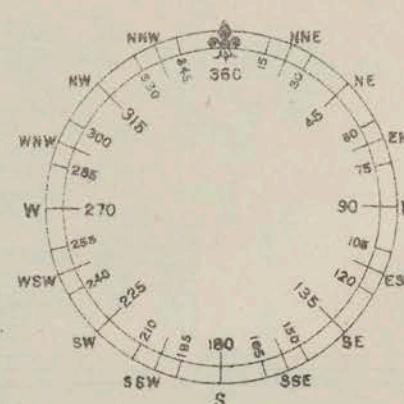

In the tabular statement direction is specified in degrees from true north measured through East 90°, South 180°, West 270° to North 360°. (See diagram below.)

### Note.—Ships' Reports.

#### VISIBILITY SCALE.

From 1st March the code in use for ships' reports has been as follows:—

- 0 Dense fog, objects not visible at 50 yards.
- 1 Thick fog, objects not visible at 1 cable.
- 2 Fog, objects not visible at 2 cables.
- 3 Moderate fog, objects not visible at  $\frac{1}{2}$  mile (nautical).
- 4 Thin fog or mist, objects not visible at 1 mile (nautical).
- 5 Visibility poor, objects not visible at 2 miles (nautical).
- 6 Visibility moderate, objects not visible at 5 miles (nautical).
- 7 Visibility good, objects not visible at 10 miles (nautical).
- 8 Visibility very good, objects not visible at 30 miles (nautical).
- 9 Visibility exceptional, objects visible more than 30 miles (nautical).

**SUPPLEMENT TO THE DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE, LONDON.**

**SUMMARY OF METEOROLOGICAL OBSERVATIONS AT SELECTED STATIONS ISSUED ON THE 1ST DAY OF EACH MONTH.**

Notes on the Weather of SEPTEMBER, 1922.

The first month of autumn was not marked by any definite change from the dull, damp, cool weather which had characterised the preceding summer. As in August rainfall was in some localities below the normal but in others the excess was much more considerable. In London and some Midland areas there was a small deficit but in eastern and northern England the total was in some cases 50% to 100% above the average. Amongst the heaviest falls in a day was 42 mm. at Holyhead on the 12th when a depression off the Hebrides moved southeast causing gales in S. Wales and local thunderstorms in southern England on the following day.

Under the influence of anticyclonic conditions which spread to the British Isles about the 5th - 7th temperature rose slightly above the normal and touched  $70^{\circ}$  at Calshot, Collinstown Rhyl and Southport. Another brief spell of warm weather was experienced in the South between the 20th and 22nd and it was upon the 21st that the highest readings for the month were recorded in southeast England. It may, however, be of interest to note that the same day was the coldest further north, e.g. at Tynemouth and Eskdalemuir. Northerly winds in the rear of a depression over Norway and the Icelandic region had brought a supply of polar air which might soon have affected the southern counties had not a shallow trough of low pressure developed near the Irish Sea thus diverting the cold air westwards.

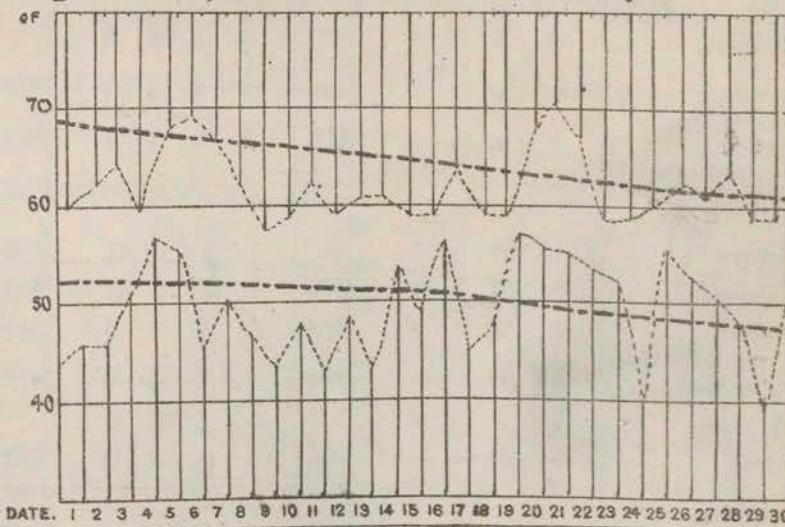

An unusually deep depression over the Atlantic caused violent gales on the 25th when a westerly hurricane was reported by wireless from the Aquitania about 700 miles west of the Scilly Isles.

## TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

		Land Reports.
0. Dense fog.	Objects not visible at	55 yards.
1. Rather thick fog	"	220 "
2. Very bad	"	550 "
3. Bad		1,100 "
4. Very poor	"	1½ miles.
5. Poor	"	2½ "
6. Moderate	"	6¼ "
7. Good	"	12½ "
8. Very good	"	31¼ "
9. Excellent	"	beyond 31¼ "

For making reports of visibility a set of "objects" is chosen at each station at certain specified distances. The degree of visibility is judged by noting the most distant of these objects which can be seen at the time of observation.

### Daily Range of Temperature at KEW Observatory.

**SURFACE VISIBILITY.** [No. of observations within fixed limits of telegraphic code.]

**MINIMUM SURFACE HUMIDITY.**

NO. OF DAYS WITH MINIMA BETWEEN FIXED LIMITS.

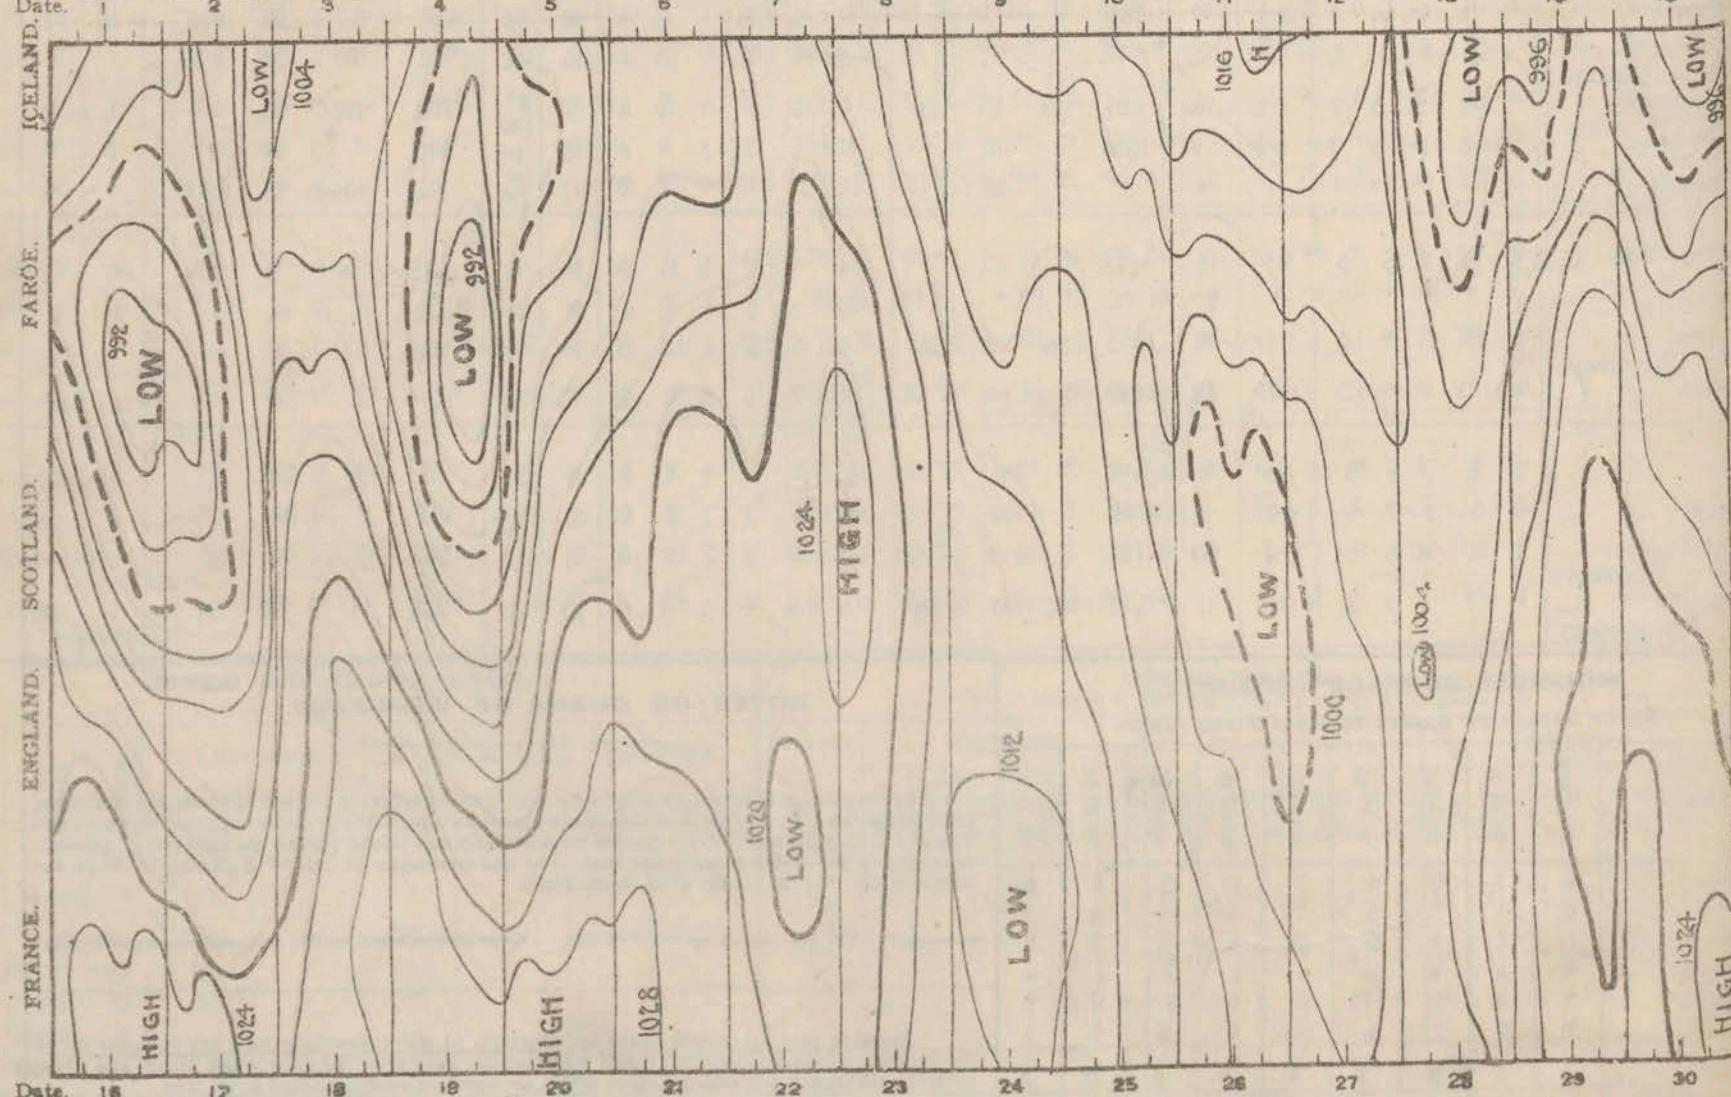

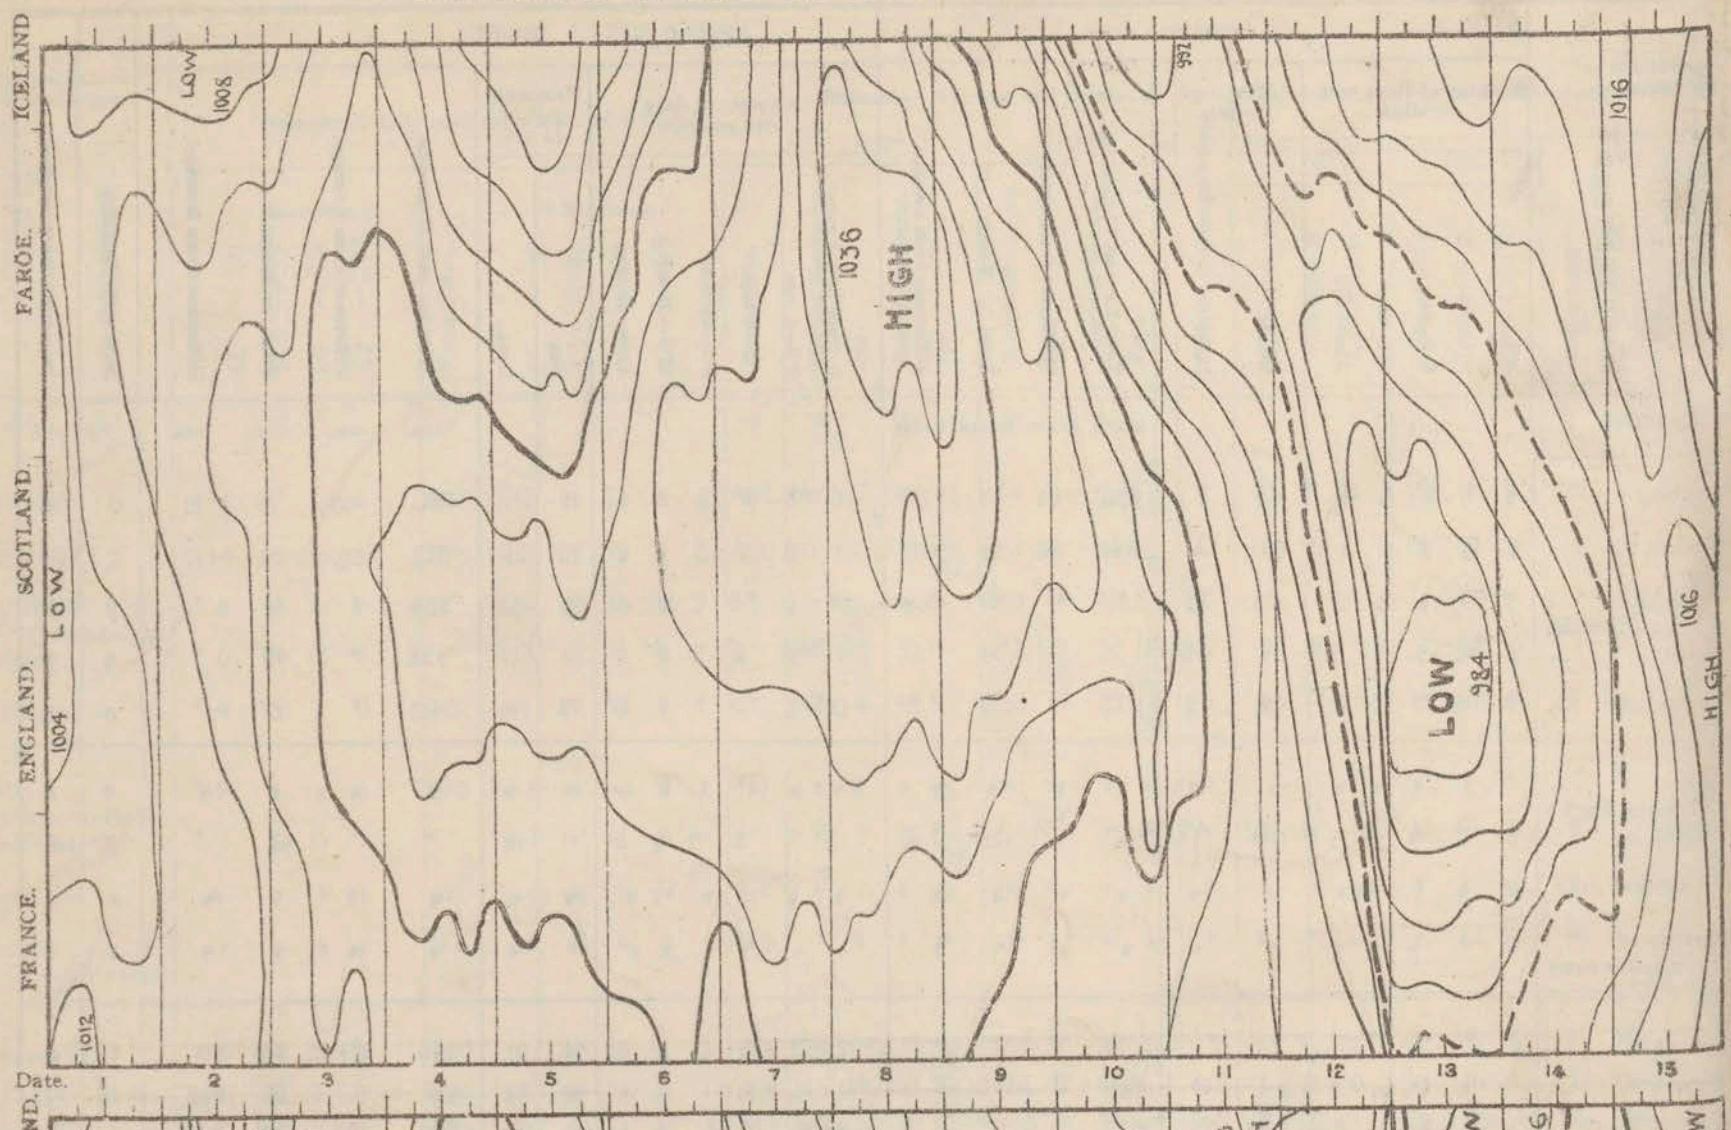

## NOTES ON CHART OF ISOPLETHS (p. 4)

The diagram is obtained by drawing a line from Akureyri in Iceland to the South of France, near Marseilles. The points at which the isobars drawn for 4 mb pressure intervals intersect this line at 1h., 7h., 13h. and 18h. are plotted consecutively and joined to shew the variation of pressure from day to day at any point in the line. The line terminates at Lat. 66° N., Long. 18° W. in the north, at Lat. 44° N., Long. 4° E. in the south.

\* Based in part on reports made by telegraph in which the daily falls are rounded off to the nearest whole millimetre. Small discrepancies may arise between these totals and those given in the Monthly Weather Report which are based on readings taken to 0.1 mm.

PRESSURE: ICELAND TO GULF OF LIONS. SEPTEMBER 1922.

ISOPLETHS\* BASED ON SIX-HOURLY OBSERVATIONS.

\* For explanation see page 3.

## Observations from Cross Channel Steamers

GENERAL INFERENCES						
A weak Anticyclonic ridge over the British Isles is giving way before a depression approaching Ireland. Rain is probable in Western and Northern districts. In the S. and S.E., mainly cloudy weather with mist and drizzle locally will prevail.

Forecasts for the 24 hours commencing 15h. G.M.T. Monday, 4th September, 1922.

Further Outfalls

NONE ISSUED

1. S.E. England	Wind light and indefinite; mainly fair, mist or fog at night; moderate temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Light to moderate southeasterly to southerly breezes; mainly fair, some mist or fog; moderate temperature.
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	Wind light and indefinite; cloudy to fair; mist locally; moderate temperature.
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

AS 5 - 8.

4th September

ISALIABARK

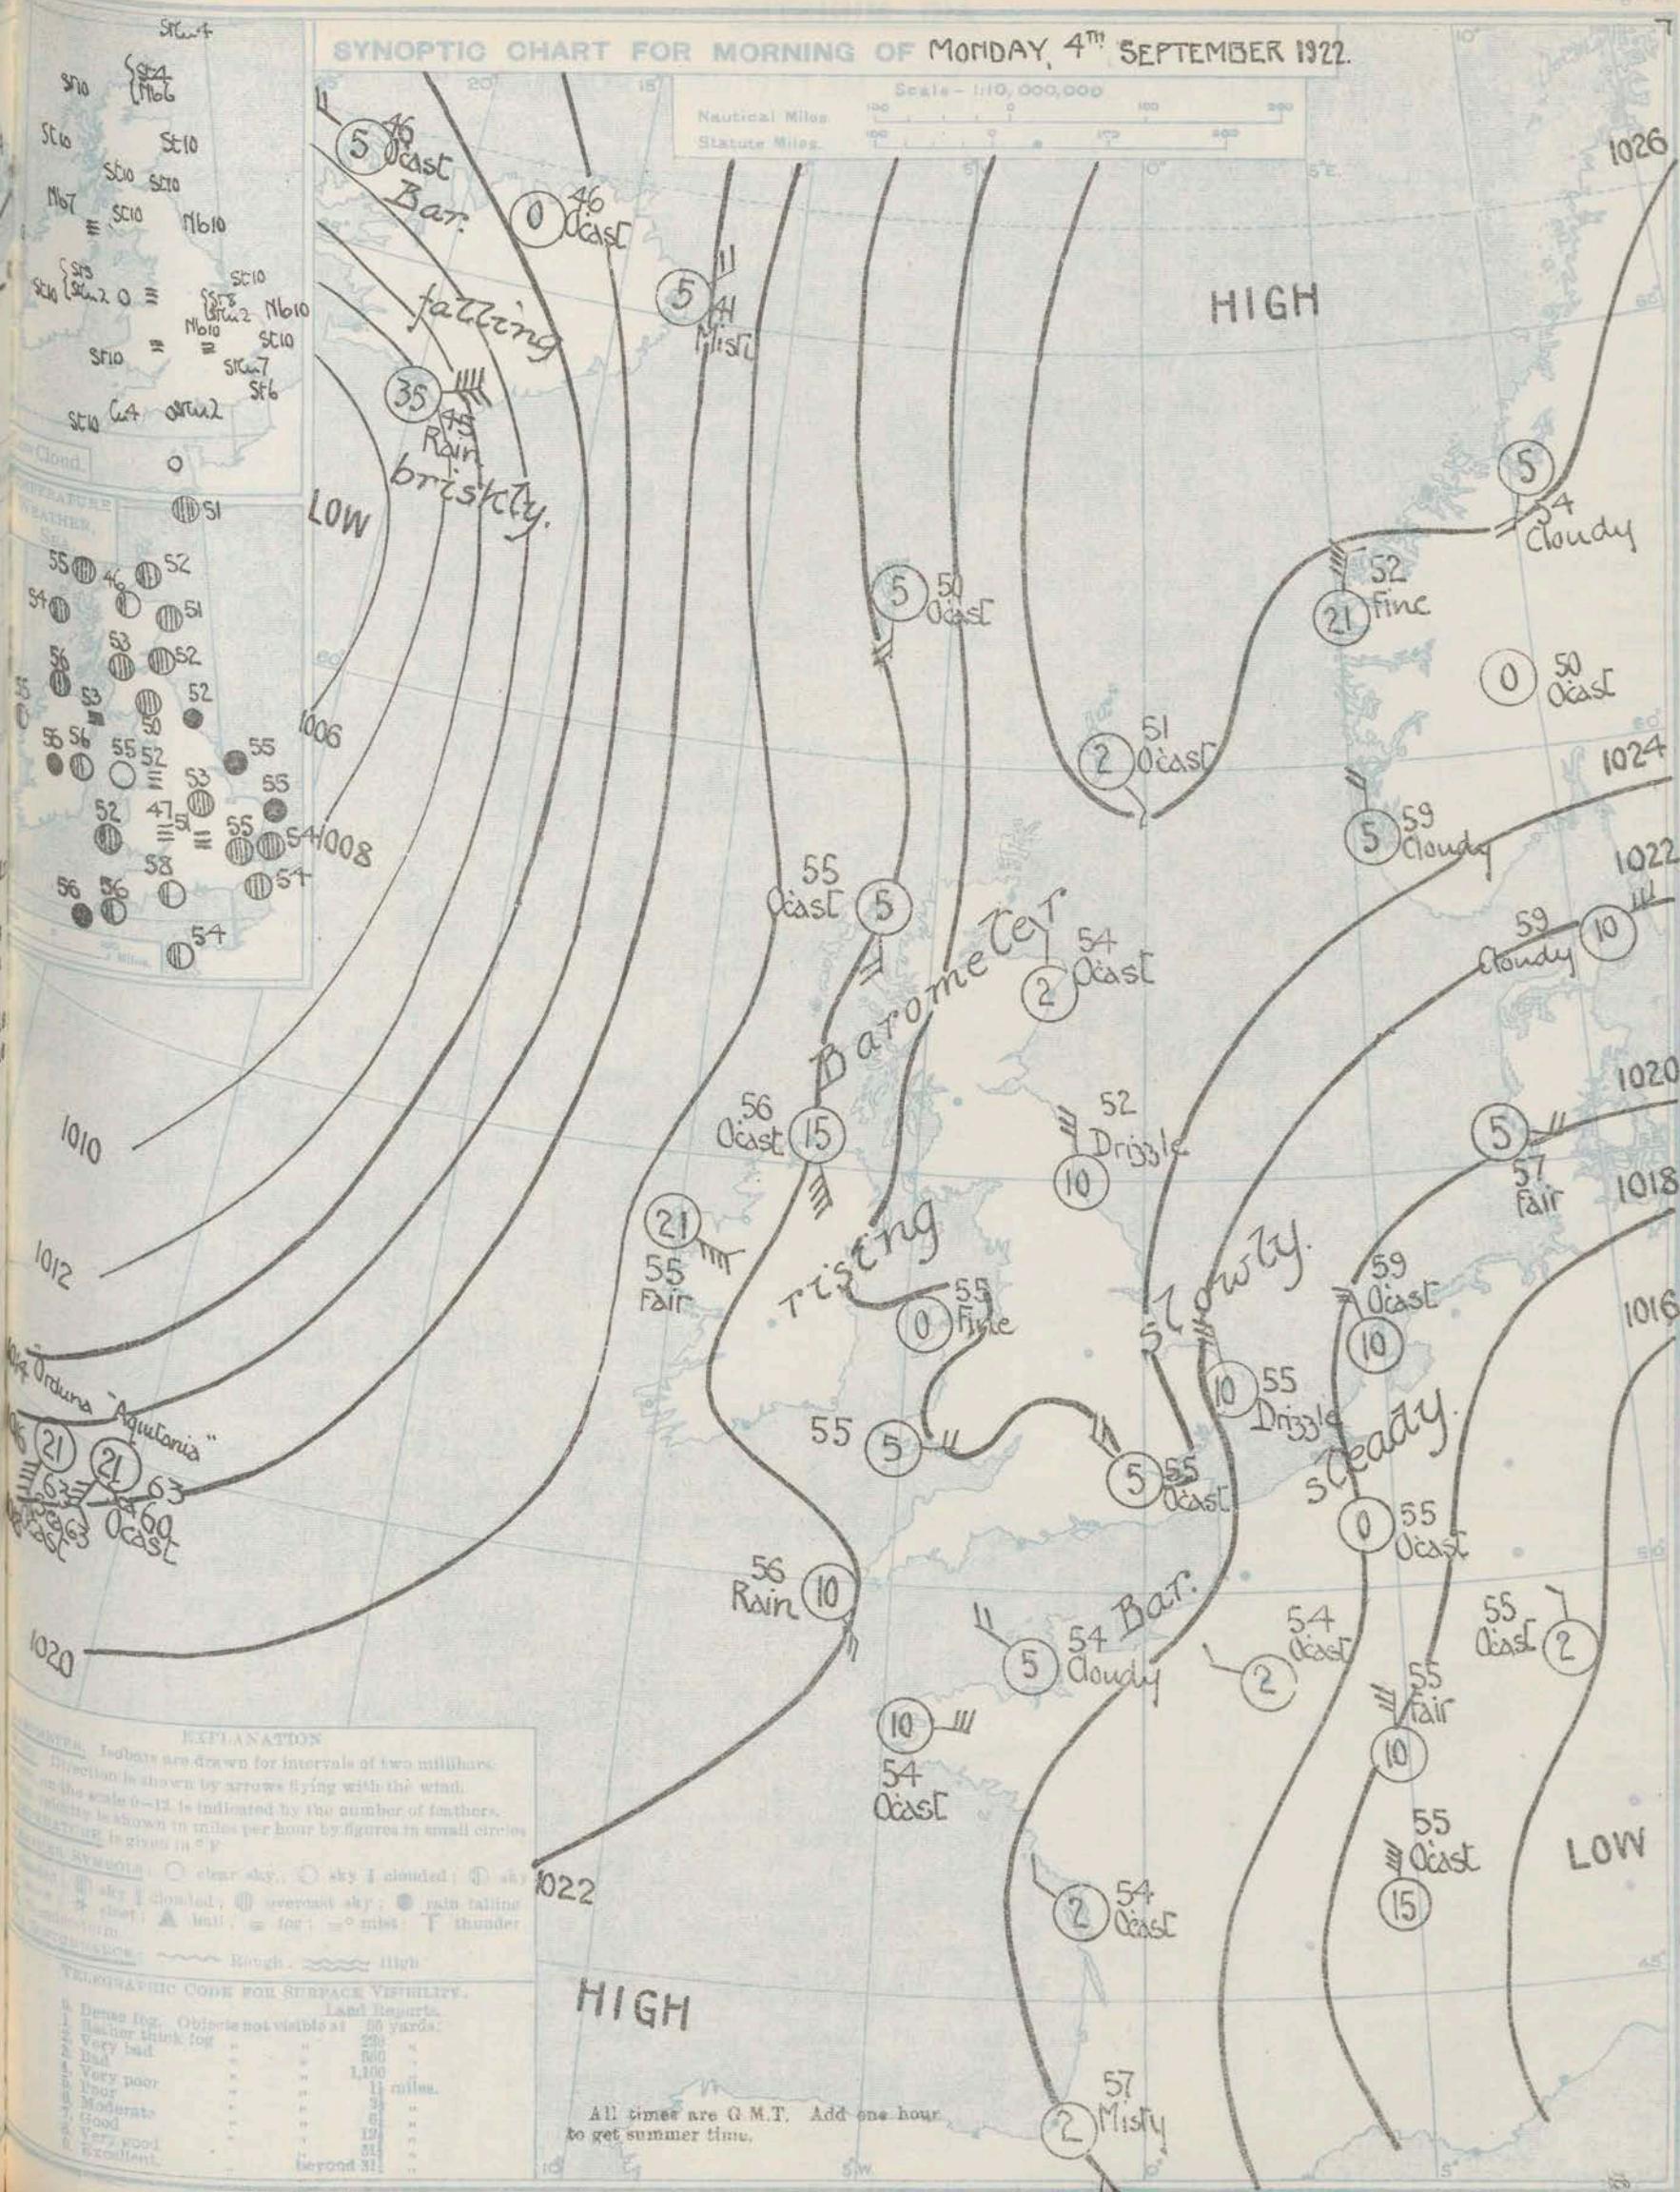

POSITION NUMBER

Position	Date and Time	Steamship	Wind.		Temp.
			Dir.	Force.	
3 4 <sup>th</sup> 0200	Brighton	NNW	2	0	59 60
2 4 <sup>th</sup> 1000	Cambridgeshire	SSE	3	?	54 55

GENERAL INFLUENCE.

The anticyclone will cause mainly fair weather and light winds generally for the next 24 hours with mist or fog at night, but a depression SW. of Iceland will cause freshening southerly winds and some rain before long on the western coasts of Ireland and Scotland.

#### GENERAL INFERENCE

An extensive anticyclone will maintain fair quiet weather generally with rather high day temperatures in the South. The conditions will probably persist for several days except possibly in the west of Scotland and north of Ireland.

Guernsey J.L.J. A.M.R.C.	Forecasts for the 24 hours commencing 15 h G.M.T.	Wednesday, 6th September, 1922
1. S.E. England	Light indefinite breezes; fine; visibility moderate to good during the day, but some mist at night; rather high temperatures inland during the day.	
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales		
7. North Wales		
8. N.W. England	Light indefinite breezes; mainly fine, but rather cloudy at times; visibility good apart from morning mist; rather warm.	
9. N. Midlands		
10. N.E. England		
11. E. Scotland		
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland	Light breezes, mainly from W and NW; fair; visibility moderate or good; moderate temperature.	
15. Hebrides		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

As 1 - 6.

## GENERAL INFERENCE.

The large anticyclone will maintain quiet weather over the British Isles with rather high day temperatures in the South of England. Little or no rain is likely for several days and considerable sunny periods may be expected especially in the West of England and in Ireland.

Little or no rain for several days. Considerable sunny periods, especially in the west of England and in Ireland.

Forecasts for the 24 hours commencing 15h. G.M.T. Friday, 8th, September, 1922.

Further Outlook.

1. S.E. England Moderate to fresh Northerly winds; mainly cloudy, but some bright periods, drizzle locally on the coast; visibility good; rather cold.

Mainly fair and dry for the next few days except on the east coast where cloudy weather is likely with occasional showers.

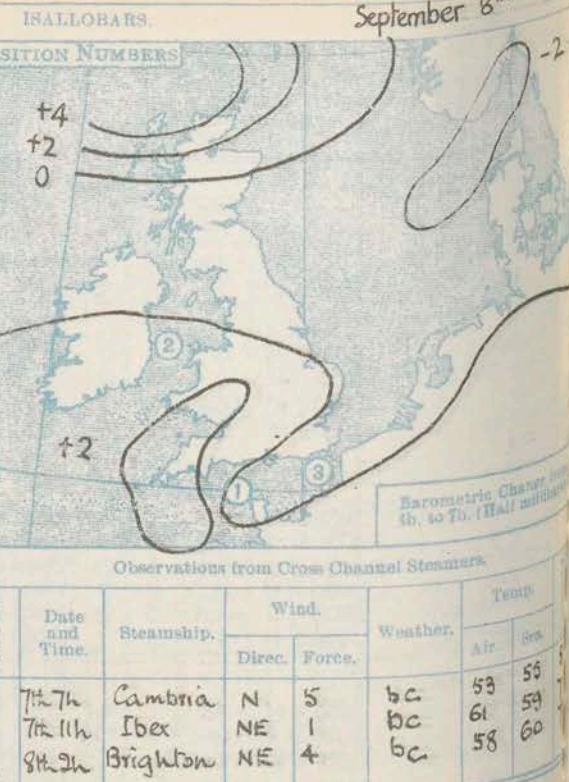

2. E. England  
3. E. Midlands  
4. W. Midlands  
5. S.W. England  
6. South Wales  
7. North Wales  
8. N.W. England  
9. N. Midlands

As 1 - 3.

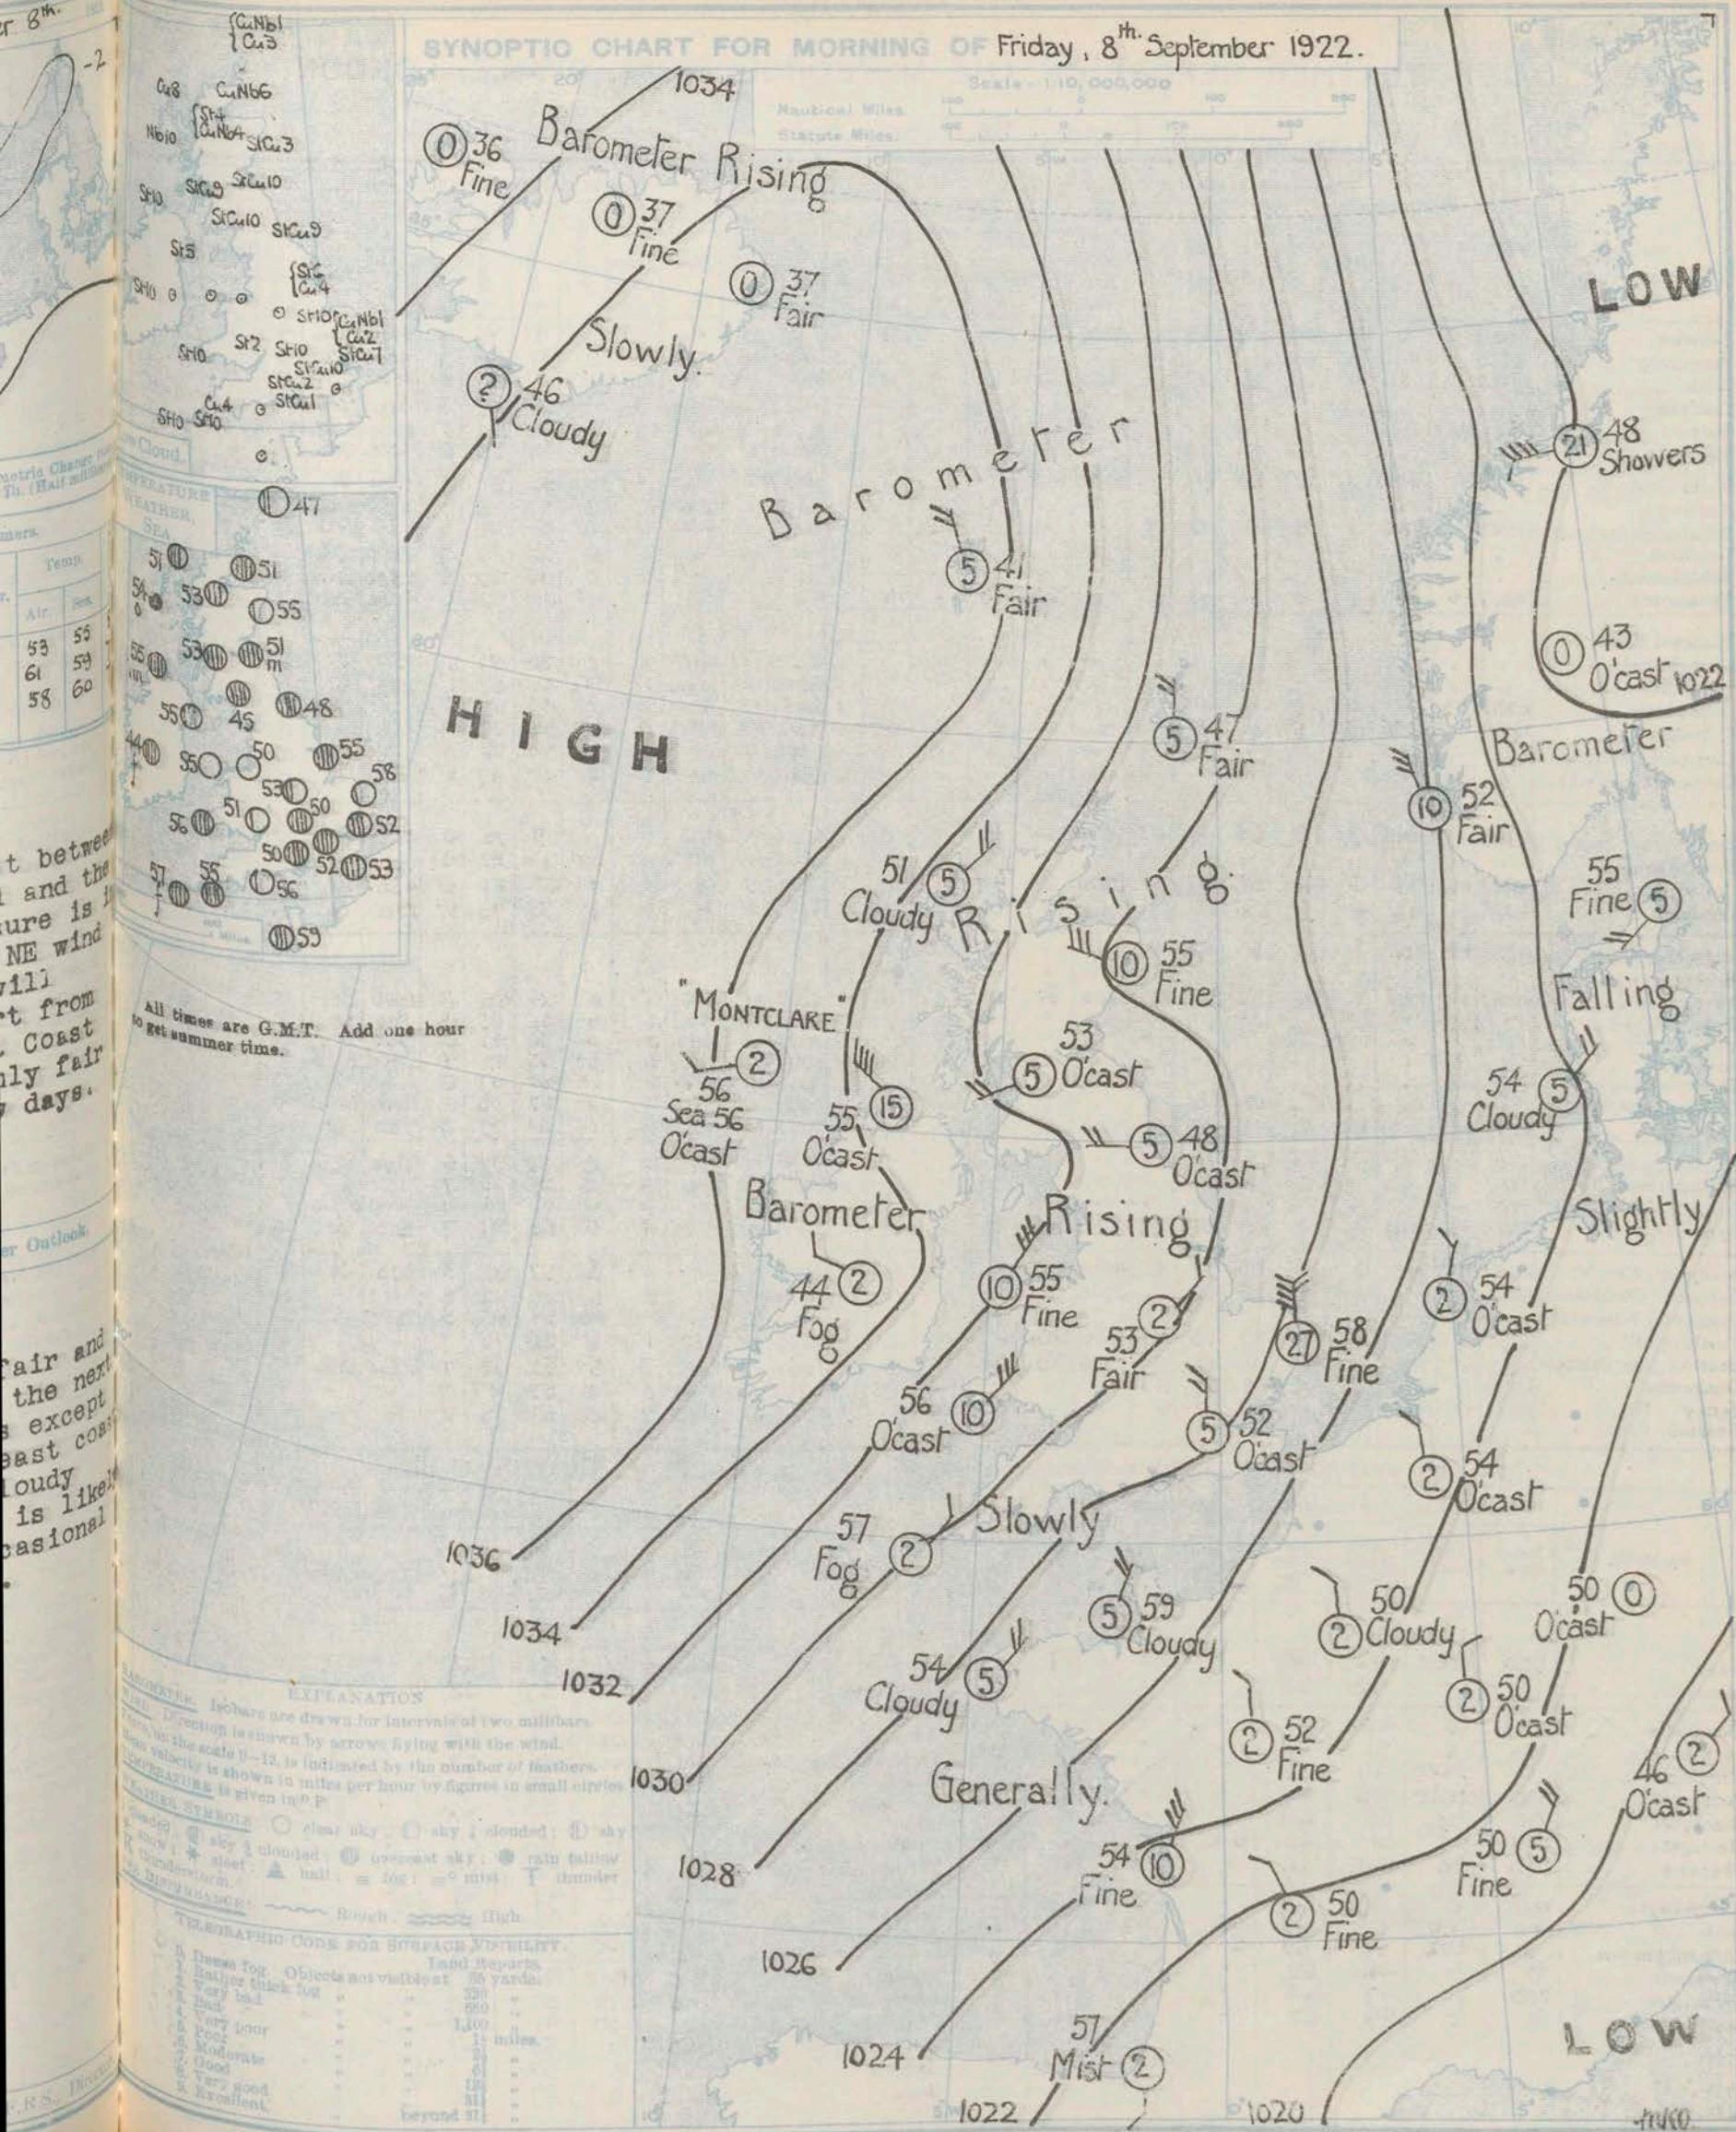

10. N.E. England  
11. E. Scotland  
12. S.W. Scotland  
13. Isle of Man  
14. N. & N.W. Scotland  
15. Hebrides  
16. Orkneys and Shetlands

17. N.W. Ireland Light or moderate NW to N winds, veering to NE; some cloud but considerable bright periods; visibility good apart from morning mist; moderate temperature.

18. N.E. Ireland  
19. S.E. Ireland  
20. S.W. Ireland

## ISALLOBARS.

## POSITION NUMBERS

9th September

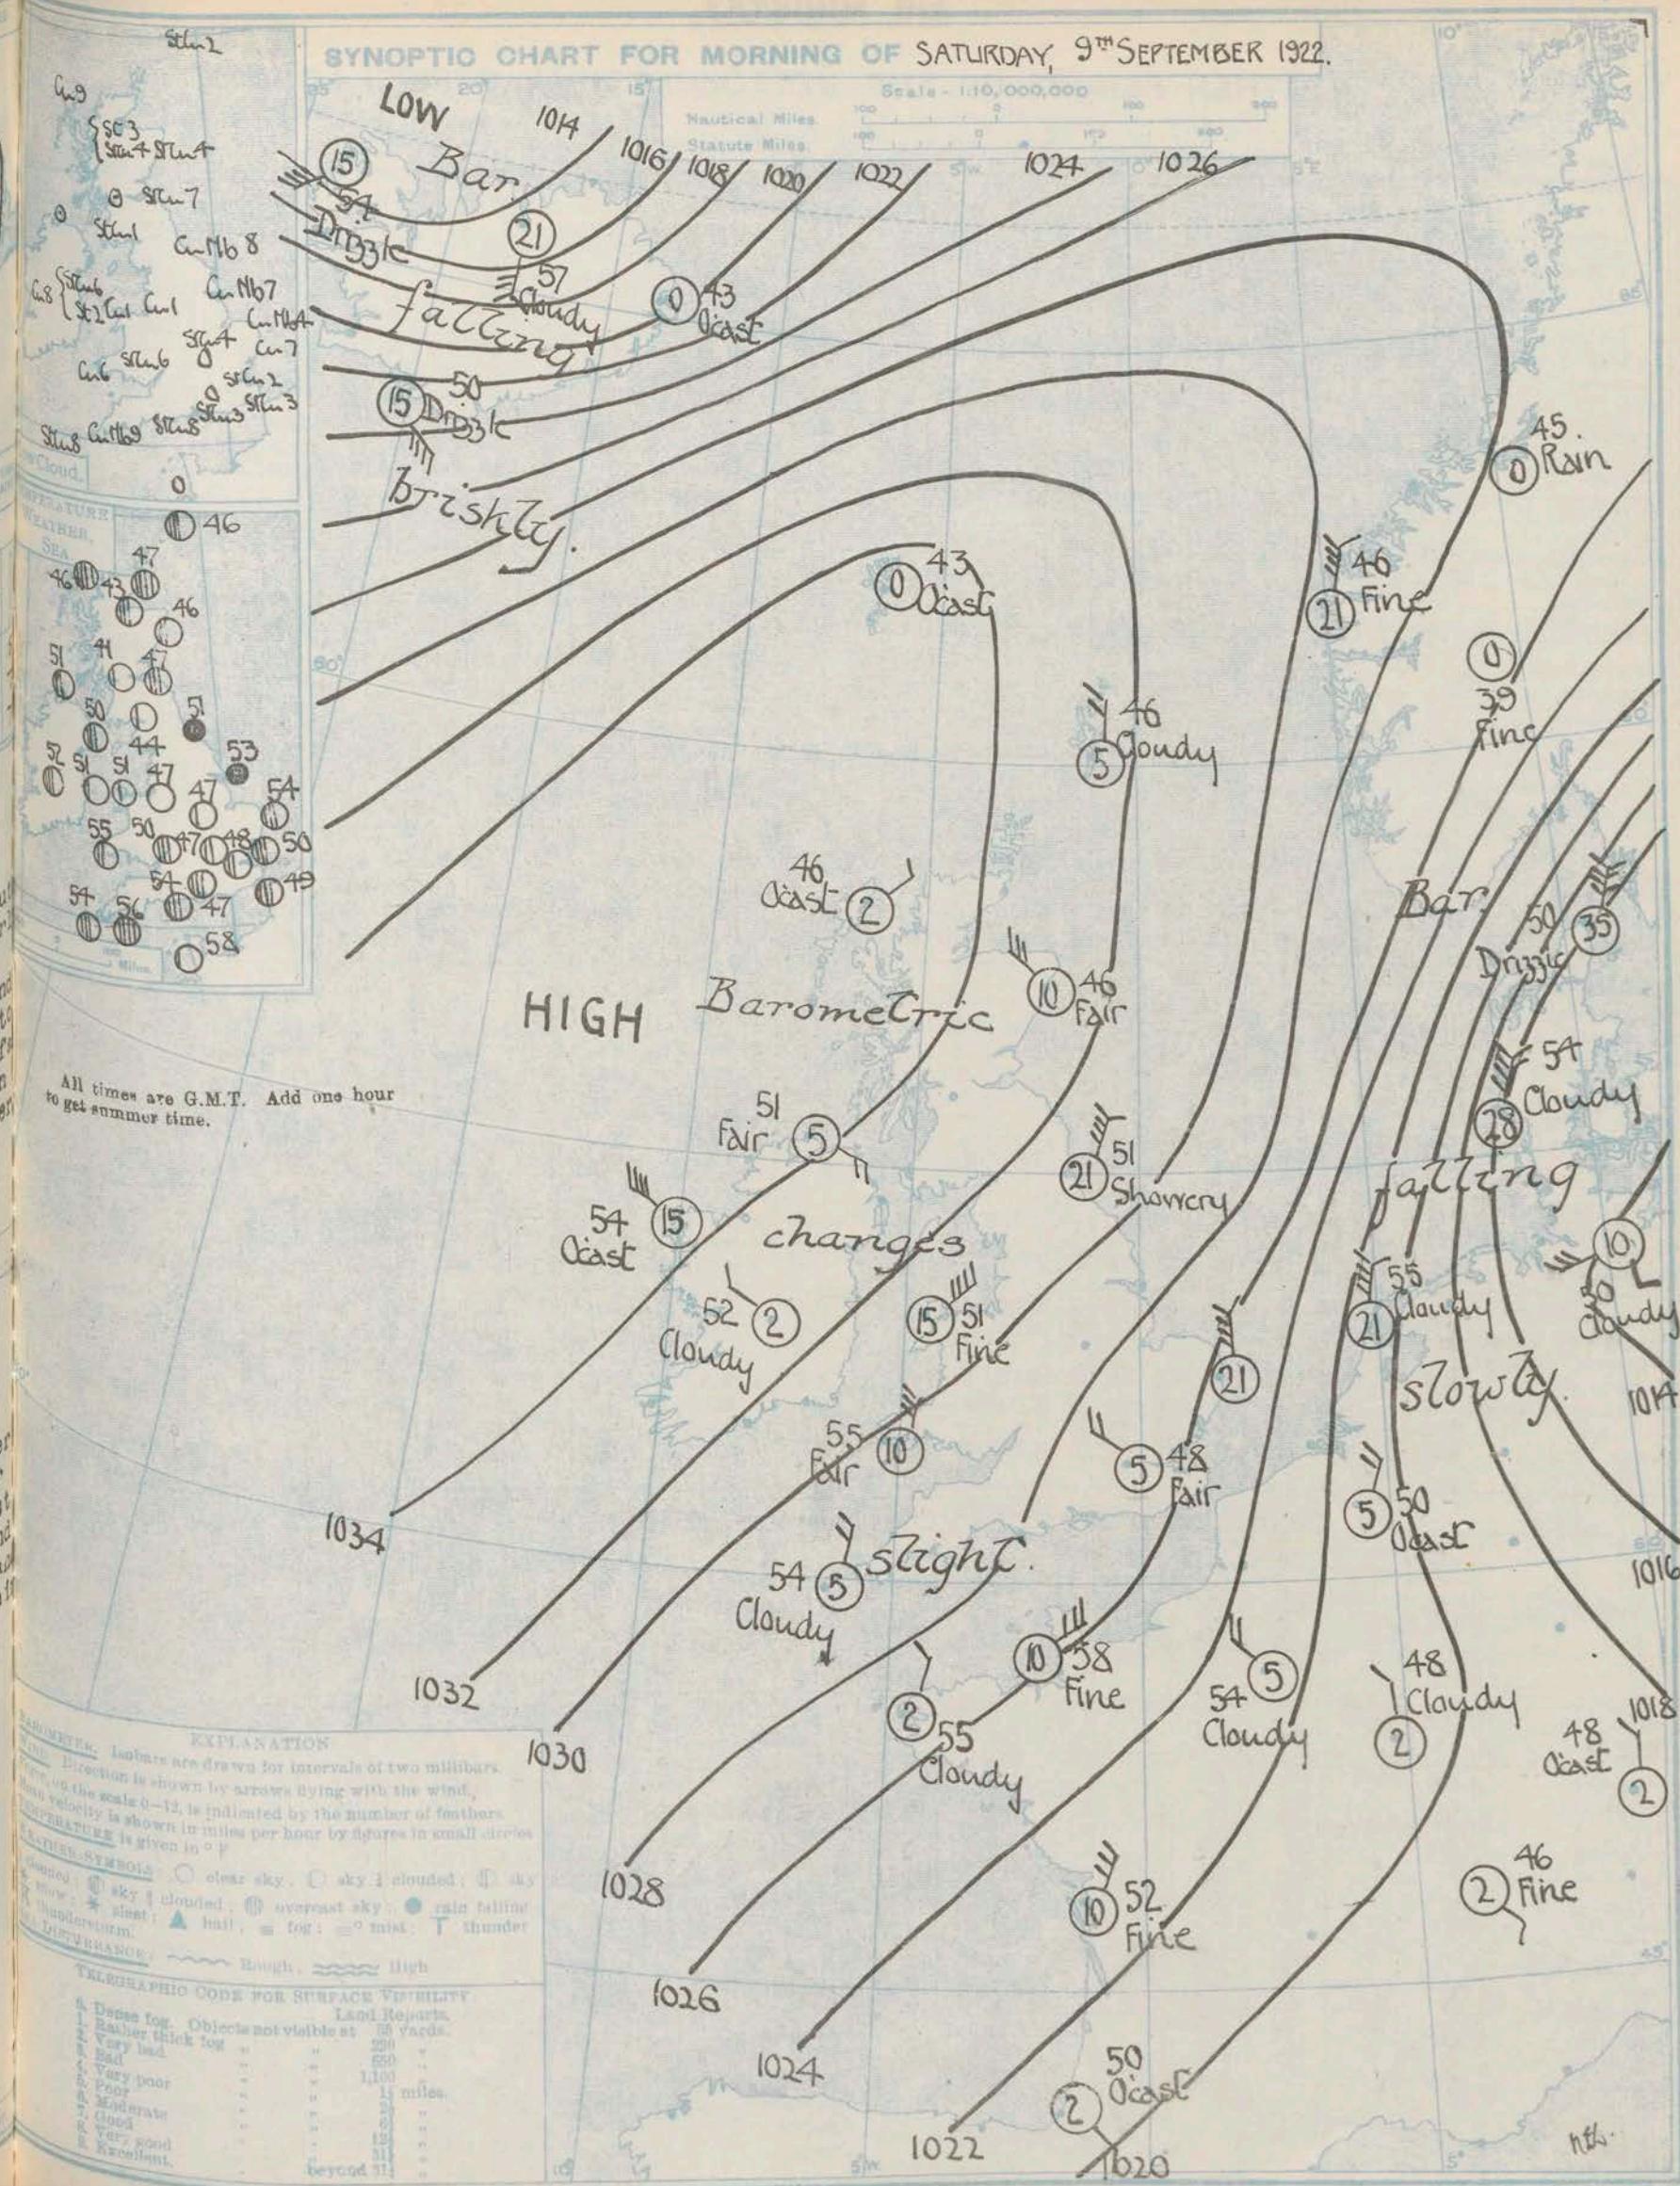

## GENERAL INFERENCES.

The anticyclone off the Hebrides will probably move South. For the next day or two Northern winds are probable over the Southern half of the Kingdom and NW winds in the north backing to W. The weather will be mainly fair but cloudy and cold at first on the East Coast with local showers.

Further Outlook.

1. S.E. England
  2. E. England
  3. E. Midlands
  4. W. Midlands
  5. S.W. England
  6. South Wales
  7. North Wales
  8. N.W. England
  9. N. Midlands
  10. N.E. England
  11. E. Scotland
  12. S.W. Scotland
  13. Isle of Man
  14. N & N.W. Scotland
  15. Hebrides
  16. Orkneys and Shetlands
  17. N.W. Ireland
  18. N.E. Ireland
  19. S.E. Ireland
  20. S.W. Ireland
- Moderate to fresh Northerly winds; mainly fair but cloudy at times, with some showers on the East Coast; visibility good; rather cold.
- Moderate Northerly winds; fair; visibility good; moderate temperature.
- Moderate Northerly wind, backing to NW; fair; visibility good; moderate temperature.
- Same As 1 - 3.
- Light or moderate Northerly winds. backing to NW; fair, visibility good; moderate temperature.
- Light to moderate Northerly wind, backing to NW or W; Fair to cloudy; visibility good; moderate temperature.
- Same as 4 - 6.

E.N.

## GENERAL INFERENCES.

The anticyclone continues to move slowly Southward and the depression over Iceland shows a tendency to move Southeastward. Rain is probable in the North with Westerly winds but weather will be fair to the South for the next 24 hours probably longer.

Districts.	Forecasts for the 24 hours commencing 15h. G.M.T. Monday 11th September, 1922.	Further Outlook
1. S.E. England	Light variable winds; fair generally, cloudy at times; visibility good after morning mist; temperature rising but risk of ground frost at night.	<p>Probably fair beyond the 24 hours in the extreme South; unsettled elsewhere.</p> <p>1022</p>
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales	Wind SW to W light or moderate; cloudy, probably some rain later; visibility moderate; moderate temperature.	
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England		
11. E. Scotland		
12. S.W. Scotland	Wind Westerly moderate or fresh; dull occasional rain; visibility moderate; moderate temperature.	
13. Isle of Man		
14. N. & N.W. Scotland	Fresh or strong Westerly winds; dull, some rain; visibility mainly good; moderate temperature.	
15. Hebrides		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland	As for 11 - 13.	
19. S.E. Ireland	As for 6 - 10.	
20. S.W. Ireland

Forecasts for the 24 hours commencing 15h. G.M.T. Tuesday, 12<sup>th</sup> September, 1922.

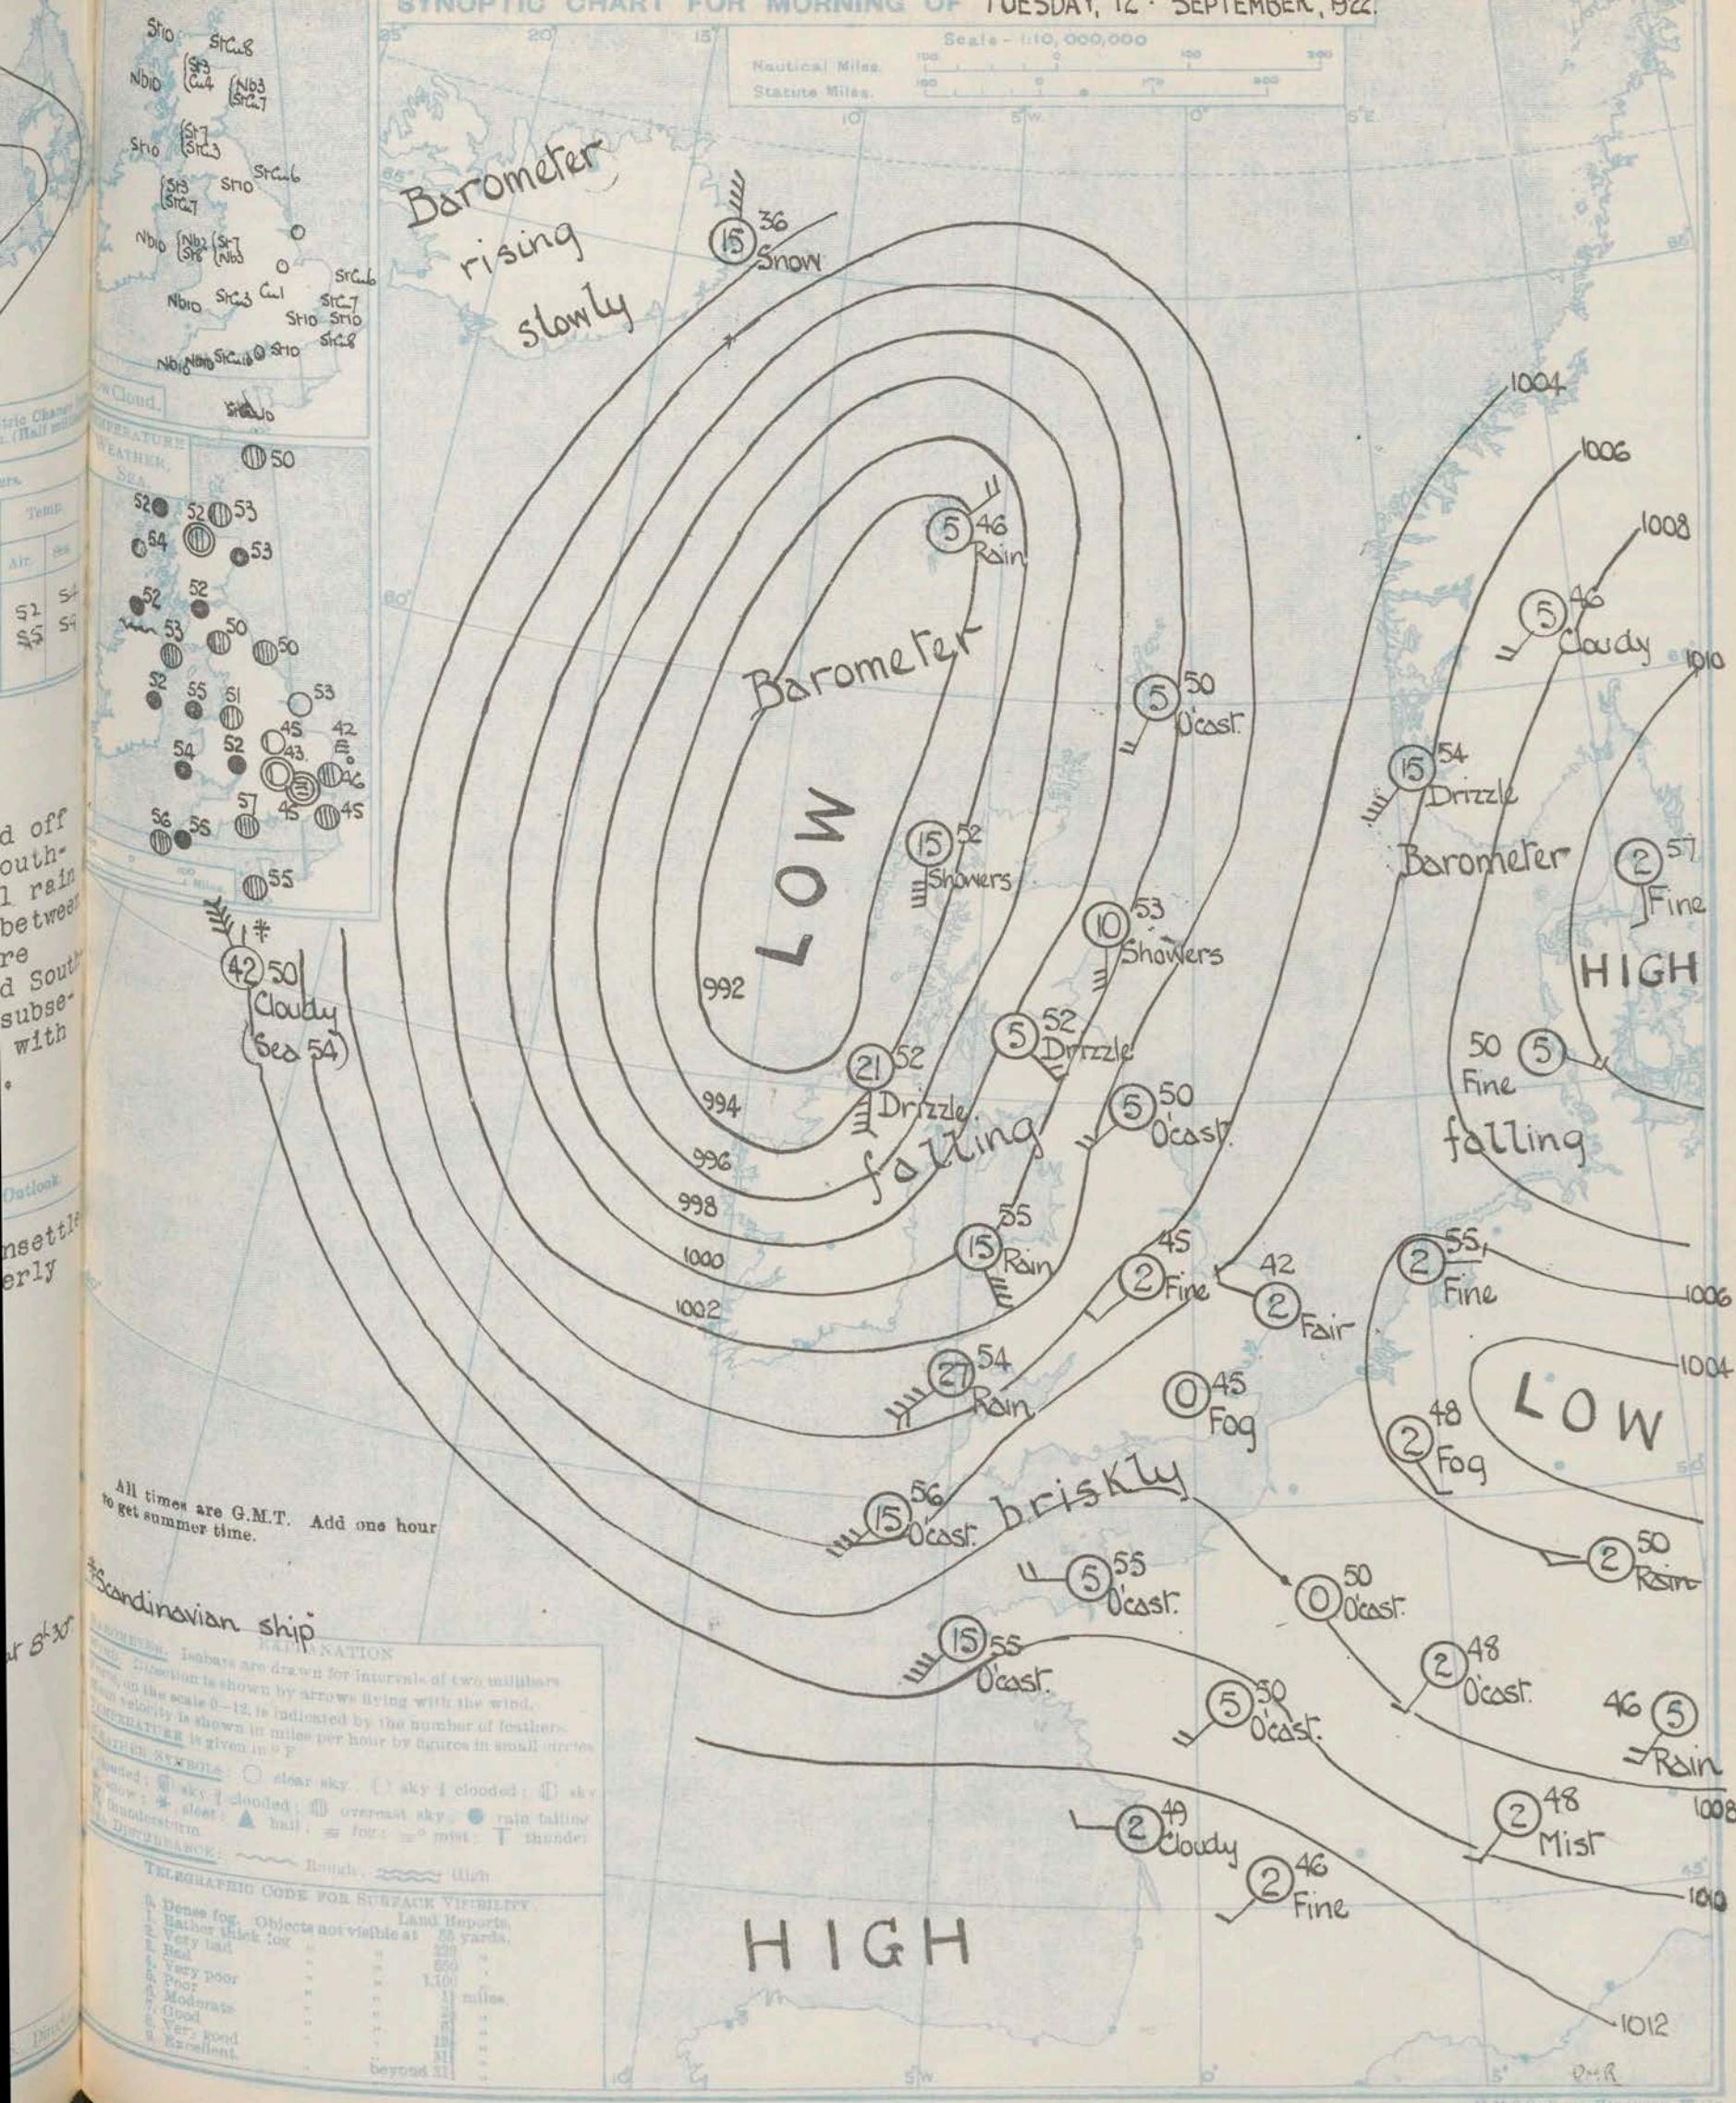

Further Outlook

1. S.E. England Wind becoming fresh or strong from SW veering towards NW; rainy, brighter intervals on Wednesday; visibility mainly good; rather cold. Cold and unsettled with Northerly winds.
2. E. England
3. E. Midlands
4. W. Midlands
5. S.W. England Wind SW veering to NW, strong to a gale; rainy at first, brighter intervals on Wednesday; visibility good; colder.
6. South Wales
7. North Wales Wind S veering towards NW or N, moderate to strong; rainy, brighter intervals later; visibility moderate to good; colder.
8. N.W. England
9. N. Midlands
10. N.E. England
11. E. Scotland As for 14 - 16.
12. S.W. Scotland As for 7 - 10.
13. Isle of Man Wind Southerly changing later to Northerly moderate to strong; rainy, brighter intervals later; visibility mainly good; cold.
14. N. & N.W. Scotland Wind S veering NW or N fresh or strong, reaching gale force in places; rainy, brighter intervals later; visibility moderate to good; cold.
15. Hebrides
16. Orkneys and Shetlands
17. N.W. Ireland
18. N.E. Ireland
19. S.E. Ireland
20. S.W. Ireland

South Coast hoisted at 8:30

A deep depression centred off the Hebrides will move South-eastwards causing general rain with strong wind mainly between South and West. Gales are probable on the South and Southwest coasts. Winds will subsequently become northerly with a return to cold weather.

SYNOPTIC CHART FOR MORNING OF TUESDAY, 12<sup>TH</sup> SEPTEMBER, 1922.

## ISALLOBARS

## POSITION NUMBERS

## Observations from Cross Channel Steamers

Position.	Date and Time.	Steamship.	Wind.		Temp.
			Dir.	Force.	
3	12.0100	Brighton	NNE	2	56 60
2	12.1010	Cambria	SSW	2	54 59
1	12.1200	Reindeer	WSW	2	55 59
3	13.0200	Arundel	WSW	6	58 59

## GENERAL INFERENCES.

The depression which was off the Hebrides yesterday morning is now centred over Cheshire and moving slowly Southwest. Rain is probable in all parts of England and Scotland.

## Further Outlook

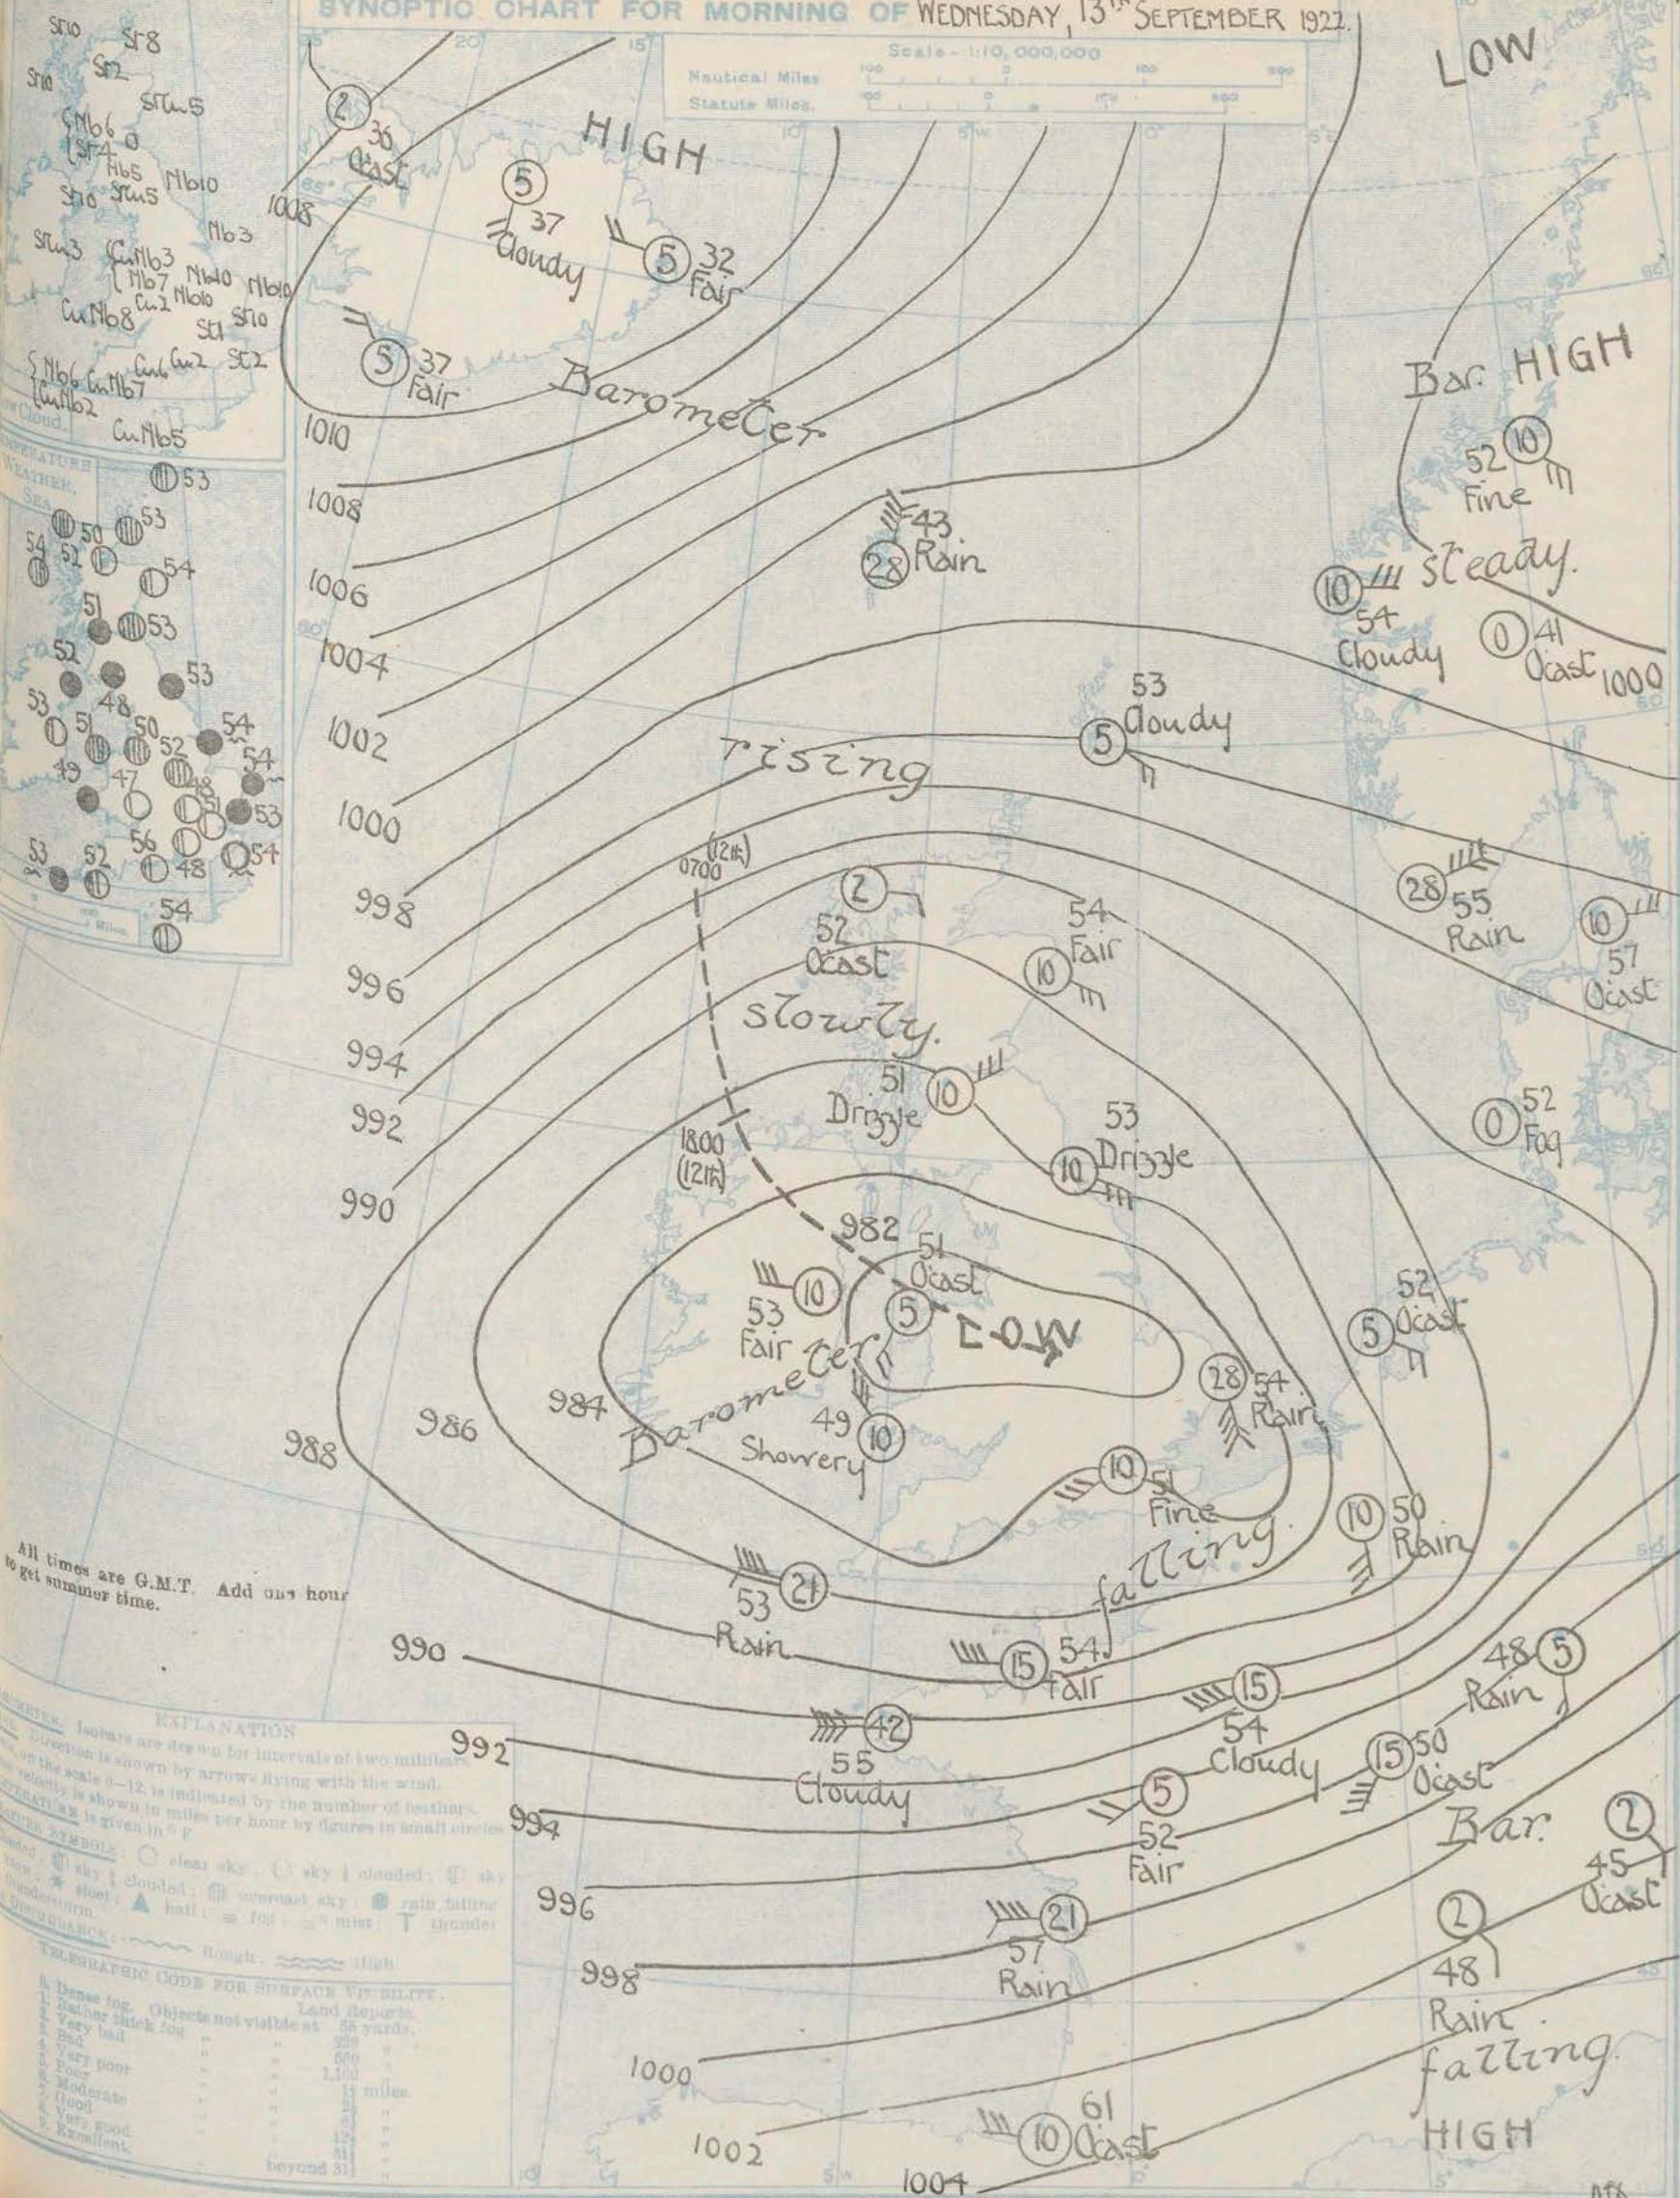

Cold and unsettled

All times a  
to get summer

Districts.	Forecasts for the 24 hours commencing 15h. G.M.T. Wednesday 13th September 1922.
1. S.E. England	Wind SW veering NW moderate to strong; some rain or showers, then fairer; visibility good; rather cold.
2. E. England	Wind SE backing towards N fresh or strong; rainy at first improving later; visibility good; rather cold.
3. E. Midlands	Wind W veering towards N fresh or strong; moderating; cloudy some rain or showers; visibility good; rather cold.
4. W. Midlands	Wind W veering towards N fresh or strong; moderating; cloudy some rain or showers; visibility good; rather cold.
5. S.W. England	Wind mainly Northerly moderate; cloudy, some rain or showers; visibility moderate; rather cold.
6. N. Wales	Wind mainly Northerly moderate; cloudy, some rain or showers; visibility moderate; rather cold.
7. N.W. England	Wind Easterly moderate; cloudy some rain or showers; visibility moderate; rather cold.
8. N. Midlands	Wind Easterly moderate; cloudy some rain or showers; visibility moderate; rather cold.
9. N. England	Wind Easterly moderate; cloudy some rain or showers; visibility moderate; rather cold.
10. N.E. England	Wind Easterly moderate; cloudy some rain or showers; visibility moderate; rather cold.
11. E. Scotland	Wind Easterly moderate; cloudy some rain or showers; visibility moderate; rather cold.
12. S.W. Scotland	Wind between E and NE moderate, fresh at times; cloudy some showers; visibility good; rather cold.
13. Isle of Man	Wind between E and NE moderate, fresh at times; cloudy some showers; visibility good; rather cold.
14. N. & N.W. Scotland	Wind between E and NE moderate, fresh at times; cloudy some showers; visibility good; rather cold.
15. Hebrides	Wind between E and NE moderate, fresh at times; cloudy some showers; visibility good; rather cold.
16. Orkneys and Shetlands	Wind northerly moderate; cloudy some showers, brighter intervals; visibility mainly good; rather cold.
17. N.W. Ireland	Wind northerly moderate; cloudy some showers, brighter intervals; visibility mainly good; rather cold.
18. N.E. Ireland	Wind northerly moderate; cloudy some showers, brighter intervals; visibility mainly good; rather cold.
19. S.E. Ireland	Wind northerly moderate; cloudy some showers, brighter intervals; visibility mainly good; rather cold.
20. S.W. Ireland	Wind northerly moderate; cloudy some showers, brighter intervals; visibility mainly good; rather cold.

ISALLOBARS

POSITION NUMBERS

September 14th.

## GENERAL INFERENCES.

Yesterday's depression is now over the North Sea and the Northerly wind current in its rear covers the British Isles. Cold weather is probable with occasional showers or rain followed by an improvement spreading from the west.

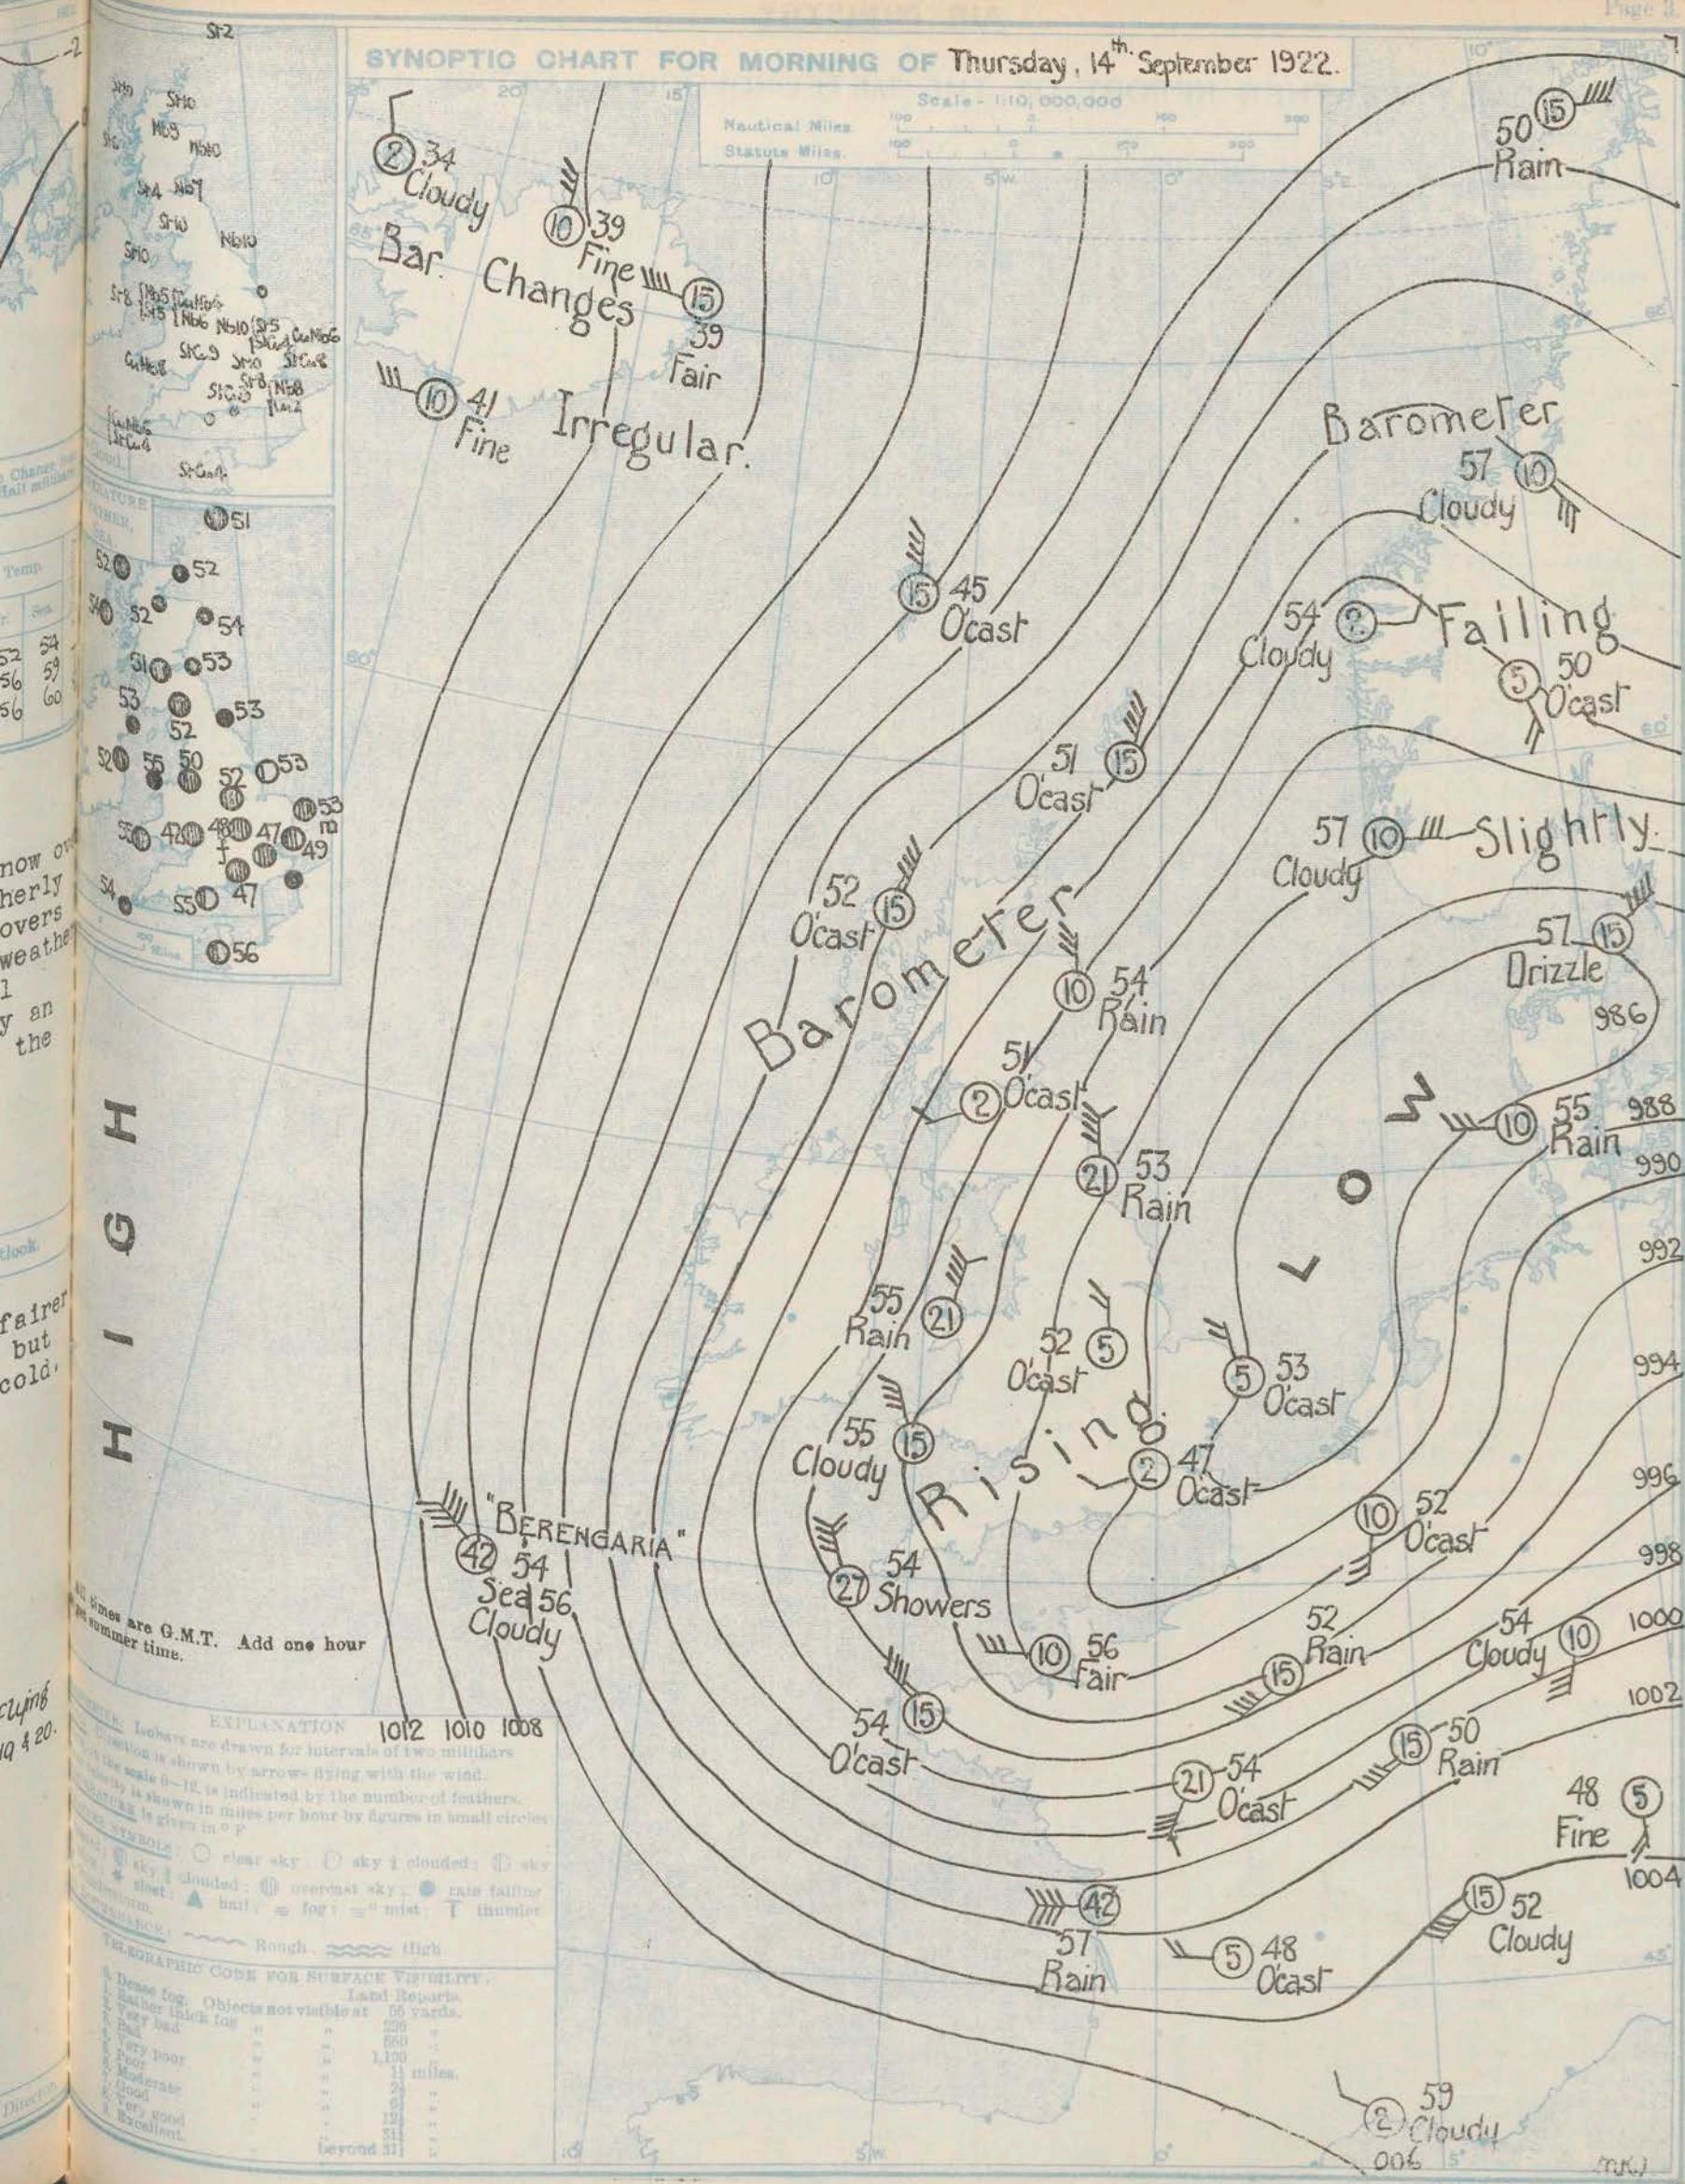

Further Outlook.

Becoming fairer temporarily but continuing cold.

▼ South Cone flying districts 5, 6, 19 & 20.

Forecasts for the 24 hours commencing 15 h. G.M.T. Thursday, 14th September, 1922.

Districts	Forecasts for the 24 hours commencing 15 h. G.M.T. Thursday, 14th September, 1922.
1. S.E. England	Wind NW to N moderate; cloudy occasional showers or slight rain; day visibility moderate, some mist or fog at night; cold, risk of ground frost inland at night.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	Moderate or fresh Northerly wind, stronger at times; cloudy, occasional showers or slight rain, improving later; day visibility moderate, some mist or fog at night; cold, risk of ground frost inland at night.
9. N. Midlands	
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland

## GENERAL INFERENCES.

Pressure continues to rise over the British Isles as the result of a wedge of high pressure spreading from the West. A new depression will soon cause southerly winds and rain in the west, but winds will be mainly northerly to-day with varying skies. Further showers are probable, particularly along the East Coast.

Sept.

Forecasts for the 24-hours commencing 15 h. G.M.T. Monday, 18th September, 1922.

Further Outlook.

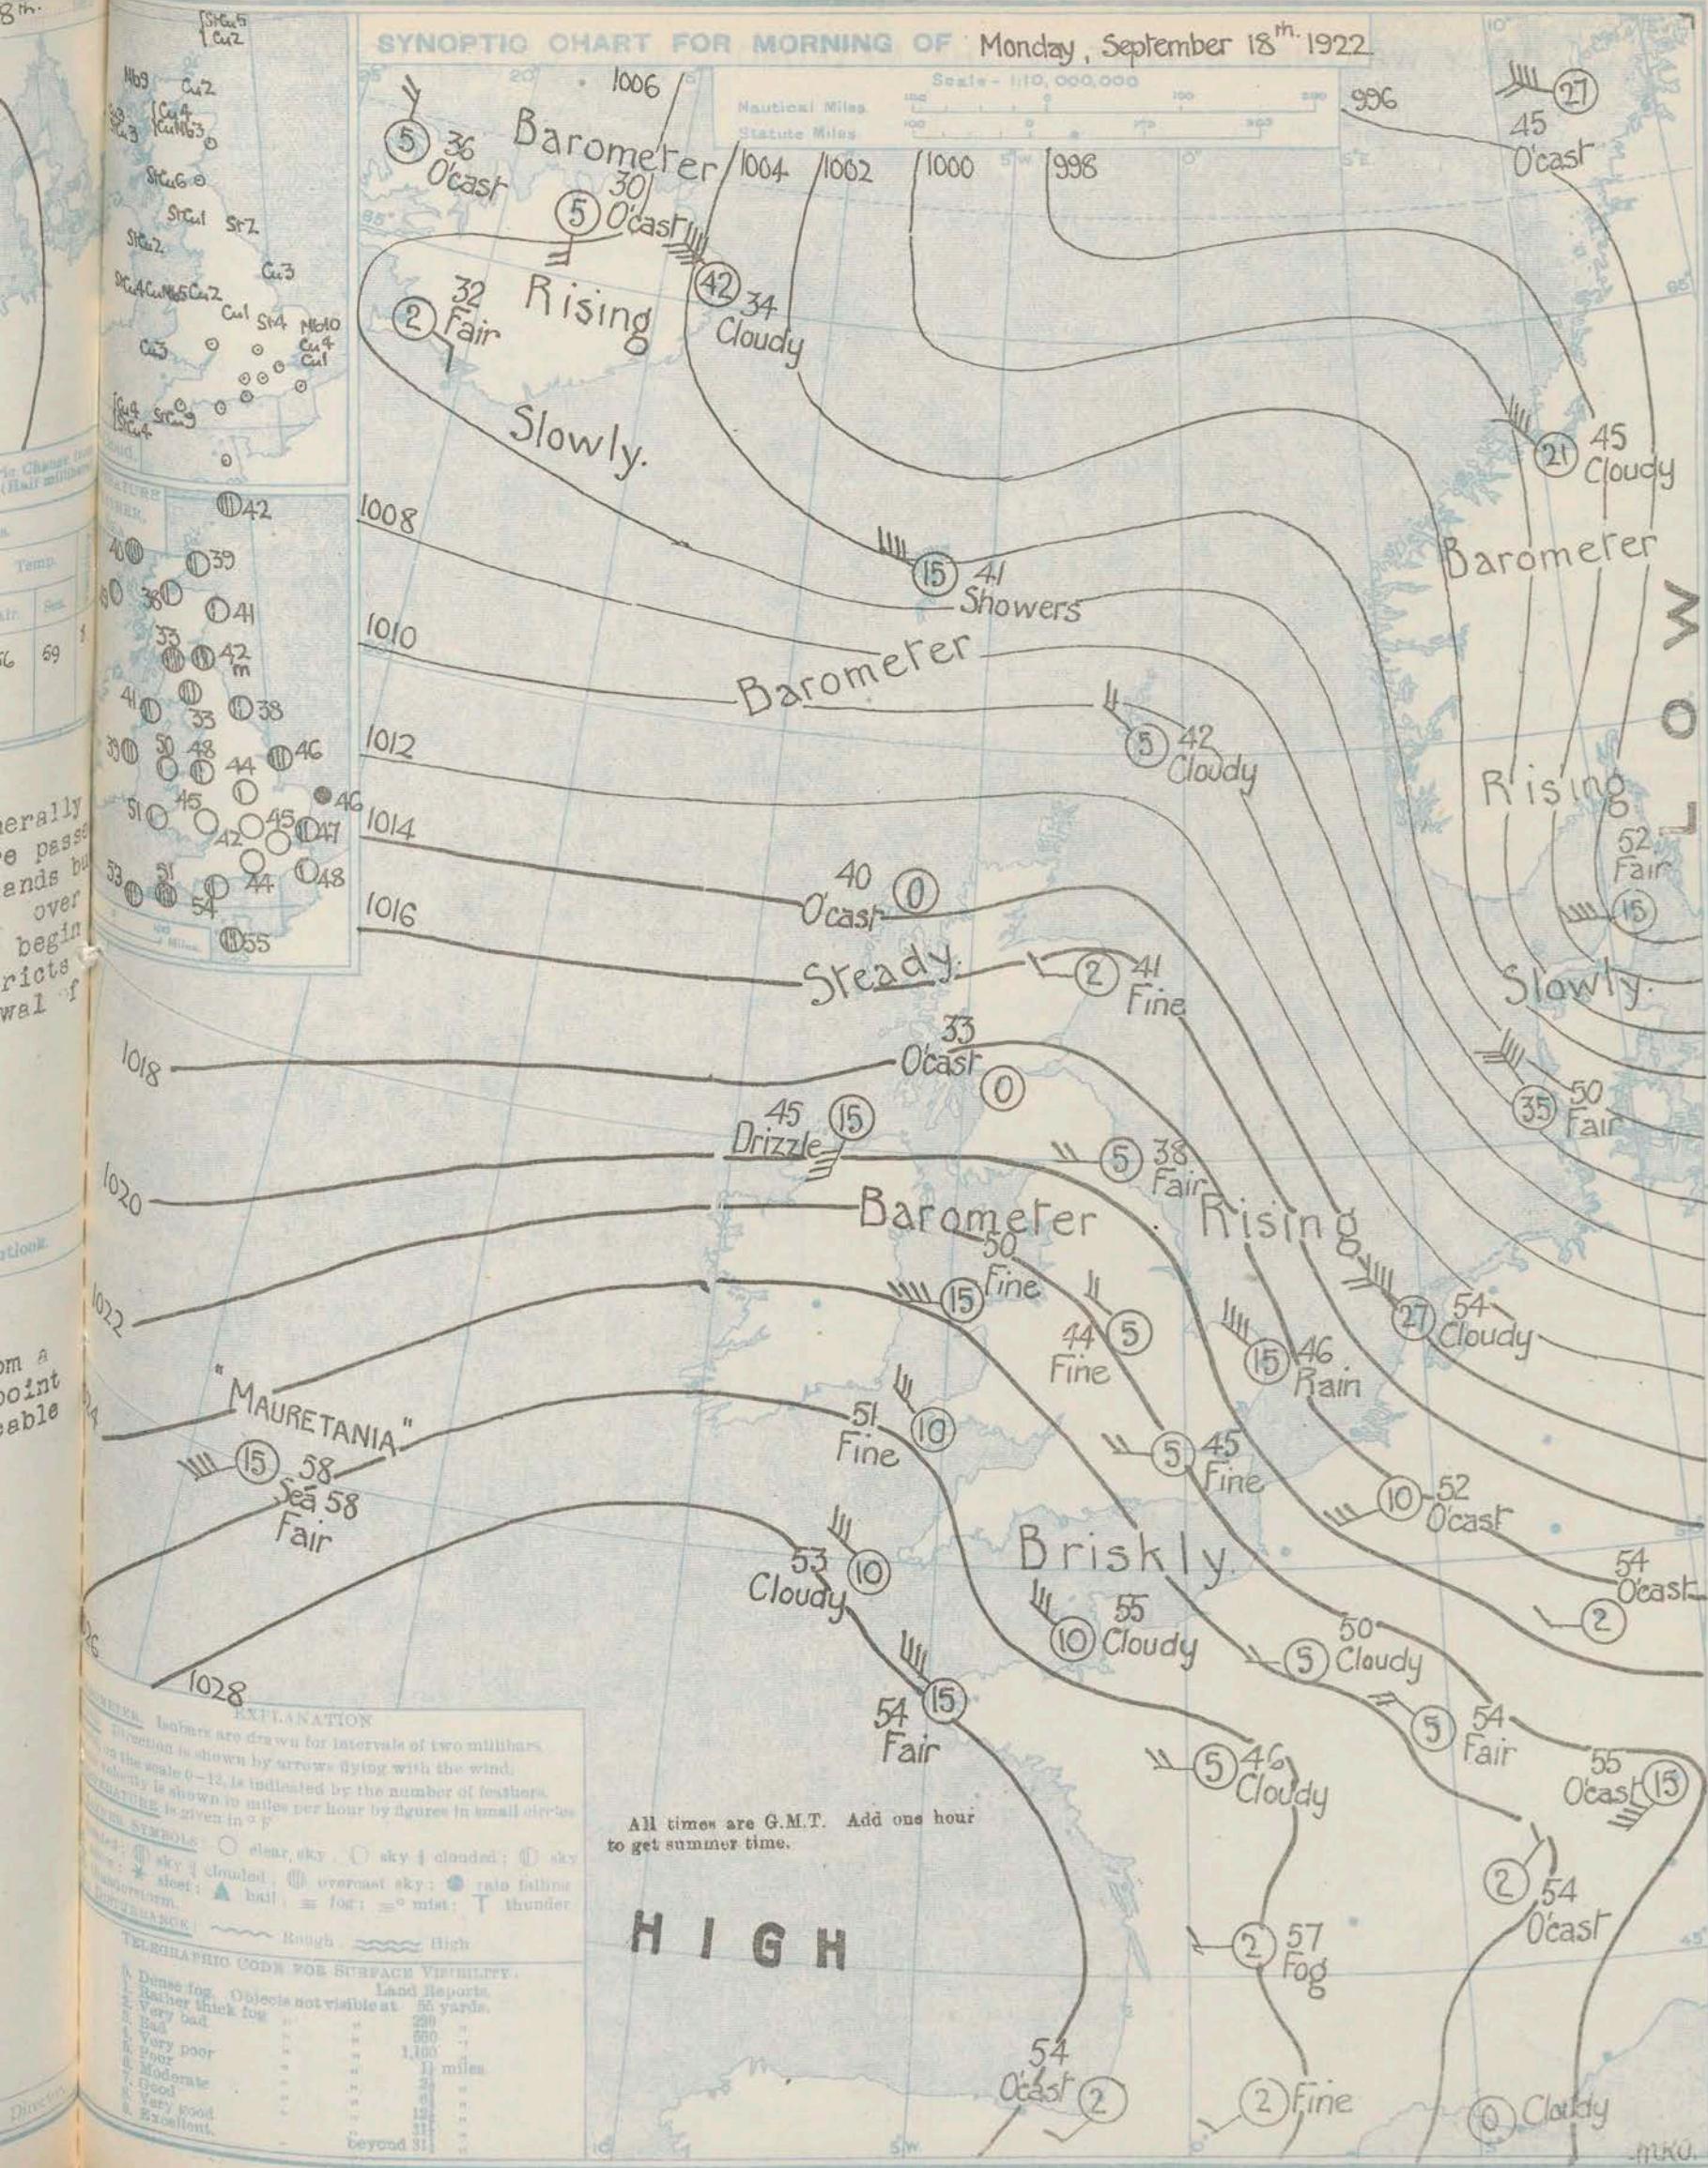

1. S.E. England	Moderate NW to W winds backing; fine at first, perhaps drizzle later tomorrow; visibility good; slight risk of ground frost tonight; temperature rising tomorrow.
2. E. England	
3. E. Midlands	
4. W. Midlands	Light NW to W winds backing and freshening; fine at first, probably some drizzle and coastal fog later; temperature rising.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	Light or moderate NW to W winds backing and freshening; fair at first, rain or drizzle later; visibility good, deteriorating; temperature rising.
9. N. Midlands	
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

## GENERAL INFERENCES.

Fine weather is likely generally as a ridge of high pressure passes Eastwards across these Islands but a new depression indicated over the Atlantic will probably begin to affect our Western districts late today bringing a renewal of unsettled conditions.

Winds from a westerly point and changeable weather.

ISALLOARS

19<sup>th</sup>. September

## GENERAL INFERENCES.

The depression approaching our Northwest Coasts from the Atlantic is developing rapidly and southwesterly winds, strong to gale force, are likely in all districts with much cloud and rain, followed by westerly winds with fairer intervals but coastal mist or fog in places in the West.

## Districts.

Forecasts for the 24 hours commencing 15 h. G.M.T. Tuesday, 19th September 1922.

Further Outlook.

1. S. E. England
  2. E. England
  3. E. Midlands
  4. W. Midlands
  5. S. W. England
  6. South Wales
  7. North Wales
  8. N. W. England
  9. N. Midlands
  10. N. E. England
  11. S. Scotland
  12. S. W. Scotland
  13. Isle of Man
  14. N. & N.W. Scotland
  15. Hebrides
  16. Orkneys and Shetlands
  17. N. W. Ireland
  18. N. E. Ireland
  19. S. E. Ireland
  20. S. W. Ireland
- Wind southwesterly strong to a gale, veering west later; dull, some rain, fairer intervals later; visibility mainly moderate; moderate temperature.
- As 1 to 4.
- Wind southwesterly strong to a gale, veering west later; dull, some rain, fairer intervals later; some coastal mist or fog; moderate temperature.
- Wind southwesterly, strong to a gale at times, veering west or northwest later; much cloud, rain at times, fairer intervals later; mist in places; moderate temperature then colder.
- Wind westerly strong to a gale; much cloud, rain at times, fairer intervals later; coastal mist or fog in places; moderate temperature.

Westerly winds and changeable weather.

Tuesday, September 19 1922.

Forecasts for the 24 hours commencing 15h G.M.T. Wednesday 20th September, 1922.

Further Outlook

Indications are at present indefinite but point to more settled conditions than of late.

## Districts.

Wind westerly to northwesterly, moderate, fresh locally; considerable bright periods but risk of showers, perhaps local thunder; visibility mainly good; temperature falling, risk of ground frost in places at night.

## 8. N.W. England

## 9. N. Midlands

## 10. N.E. England

## 11. E. Scotland

## 12. S. W. Scotland

## 13. Isle of Man

## 14. N. &amp; N.W. Scotland

## 15. Hebrides

## 16. Orkneys and Shetlands

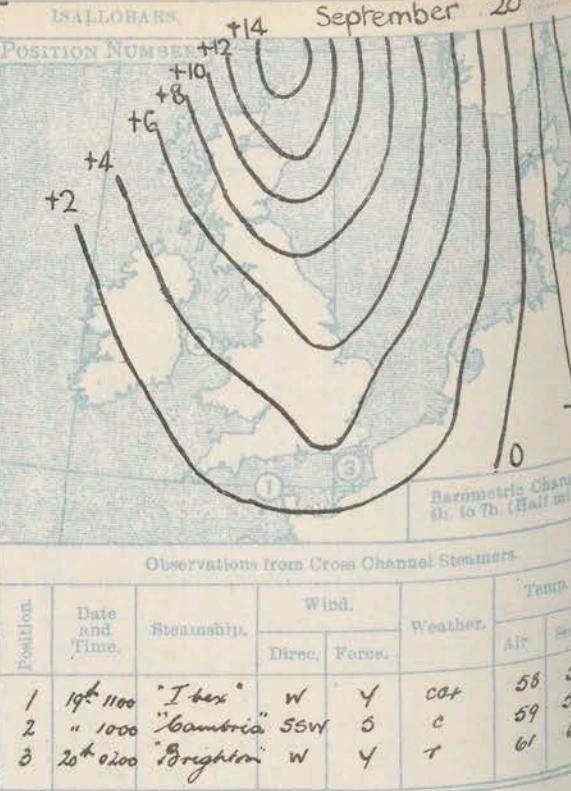

## 17. N. W. Ireland

## 18. N. E. Ireland

## 19. S. E. Ireland

## 20. S. W. Ireland

Wind westerly to northwesterly, moderate, fresh locally; bright periods, local showers; visibility good; cold, ground frost probable at night.

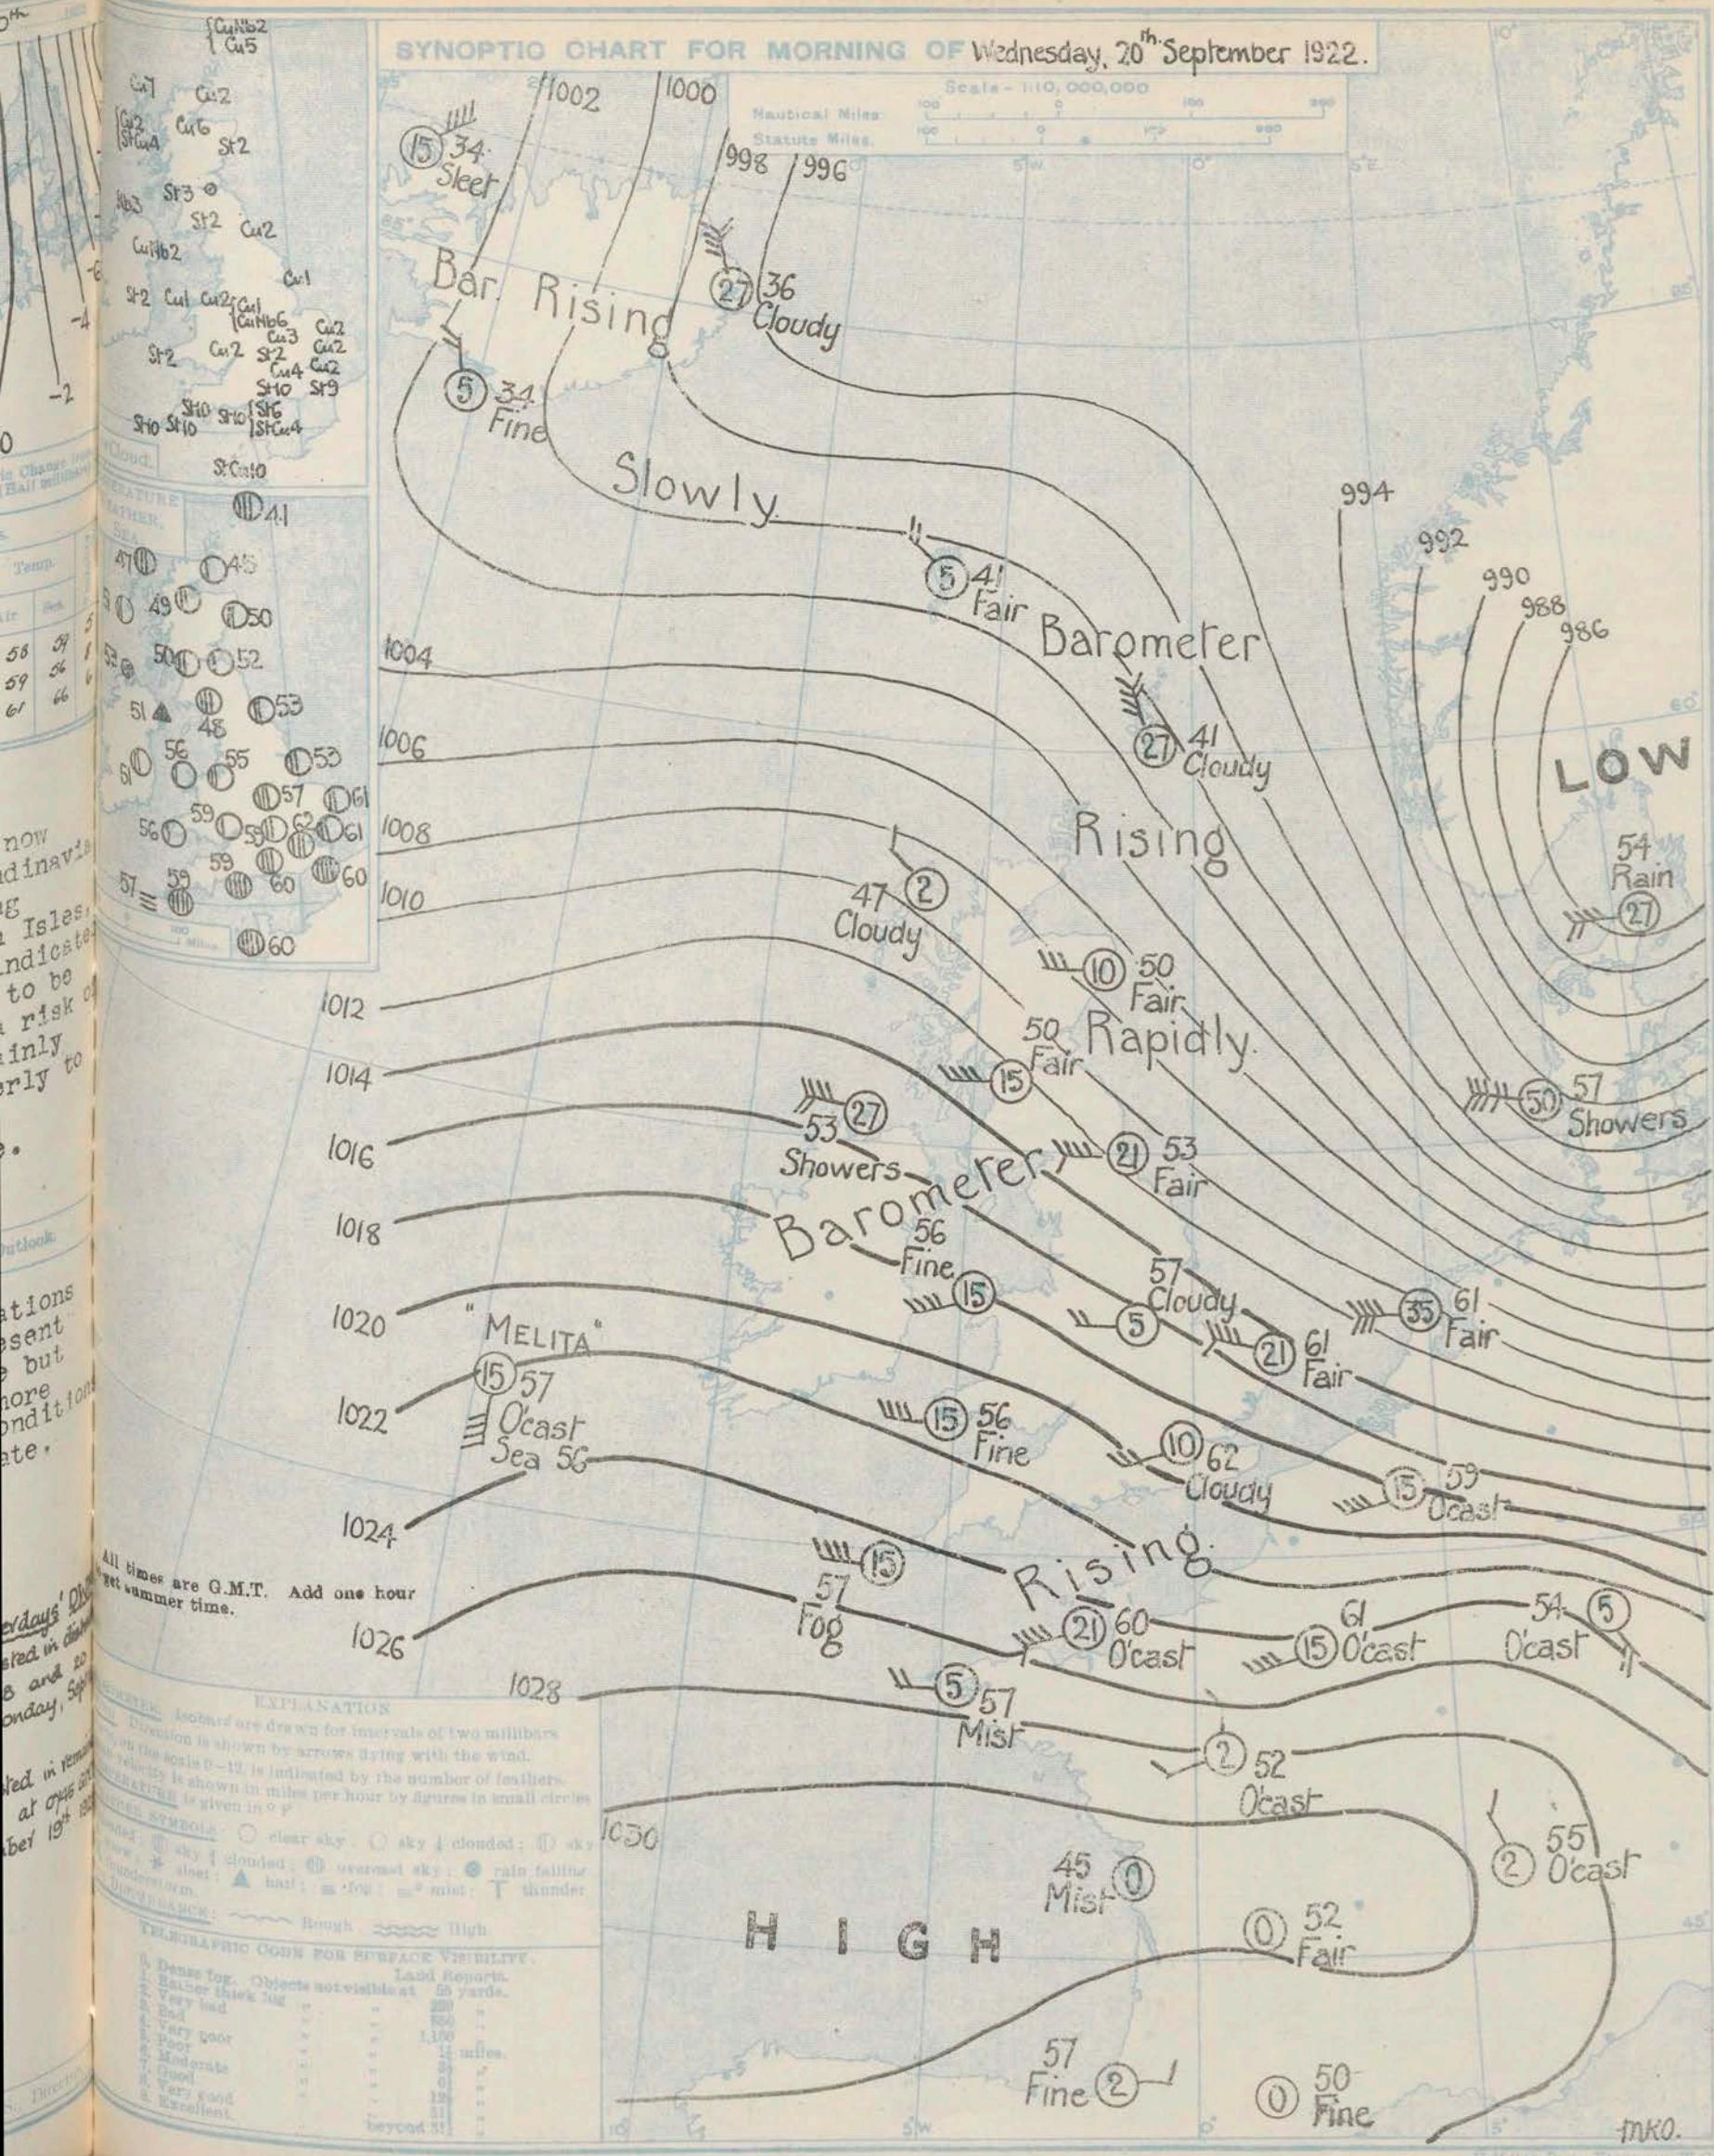

Yesterday's depression is now centred over Southern Scandinavia and the barometer is rising generally over the British Isles, while a secondary trough indicates over the Atlantic appears to be filling up. Apart from a risk of showers weather will be mainly fair with moderating westerly to northwesterly winds and a somewhat lower temperature.

Correction to yesterday's Dyer South cone hoisted in due course 12, 14, 15, 17, 18 and 20 at 1945 G.M.T. Monday, Sept 20, 1922.

South cone hoisted in due course 12, 14, 15, 17, 18 and 20 at 1945 G.M.T. Monday, Sept 20, 1922.

South cone hoisted in due course 12, 14, 15, 17, 18 and 20 at 1945 G.M.T. Monday, Sept 20, 1922.

Tuesday, September 21, 1922.

## Districts.

Forecasts for the 24 hours commencing 15 h. G.M.T. Thursday, 21st September, 1922.

Further Outlook.

1. S.E. England  
2. E. England  
3. E. Midlands  
4. W. Midlands  
5. S.W. England  
6. South Wales  
7. North Wales  
8. N.W. England  
9. N. Midlands  
10. N.E. England  
11. E. Scotland  
12. S.W. Scotland  
13. Isle of Man  
14. N. & N.W. Scotland  
15. Hebrides  
16. Orkneys and Shetlands  
17. N.W. Ireland  
18. N.E. Ireland  
19. S.E. Ireland  
20. S.W. Ireland
- Moderate Southwesterly wind, probably between Northeast and Northwest later; cloudy to overcast, some rain probable tonight or tomorrow; visibility poor to moderate inland, coastal fog; temperature moderate today, falling later.
- Wind indefinite, then between Northeast and Northwest, light or moderate; dull, rainy; visibility poor; colder.
- Wind mainly between N.E. and N.W., light or moderate; dull, some rain, improving later; visibility moderate to good; cold.
- Wind Northwest to North, moderate; variable cloud, some showers; visibility good; cold.
- As 11 to 13.
- As 7 to 10.

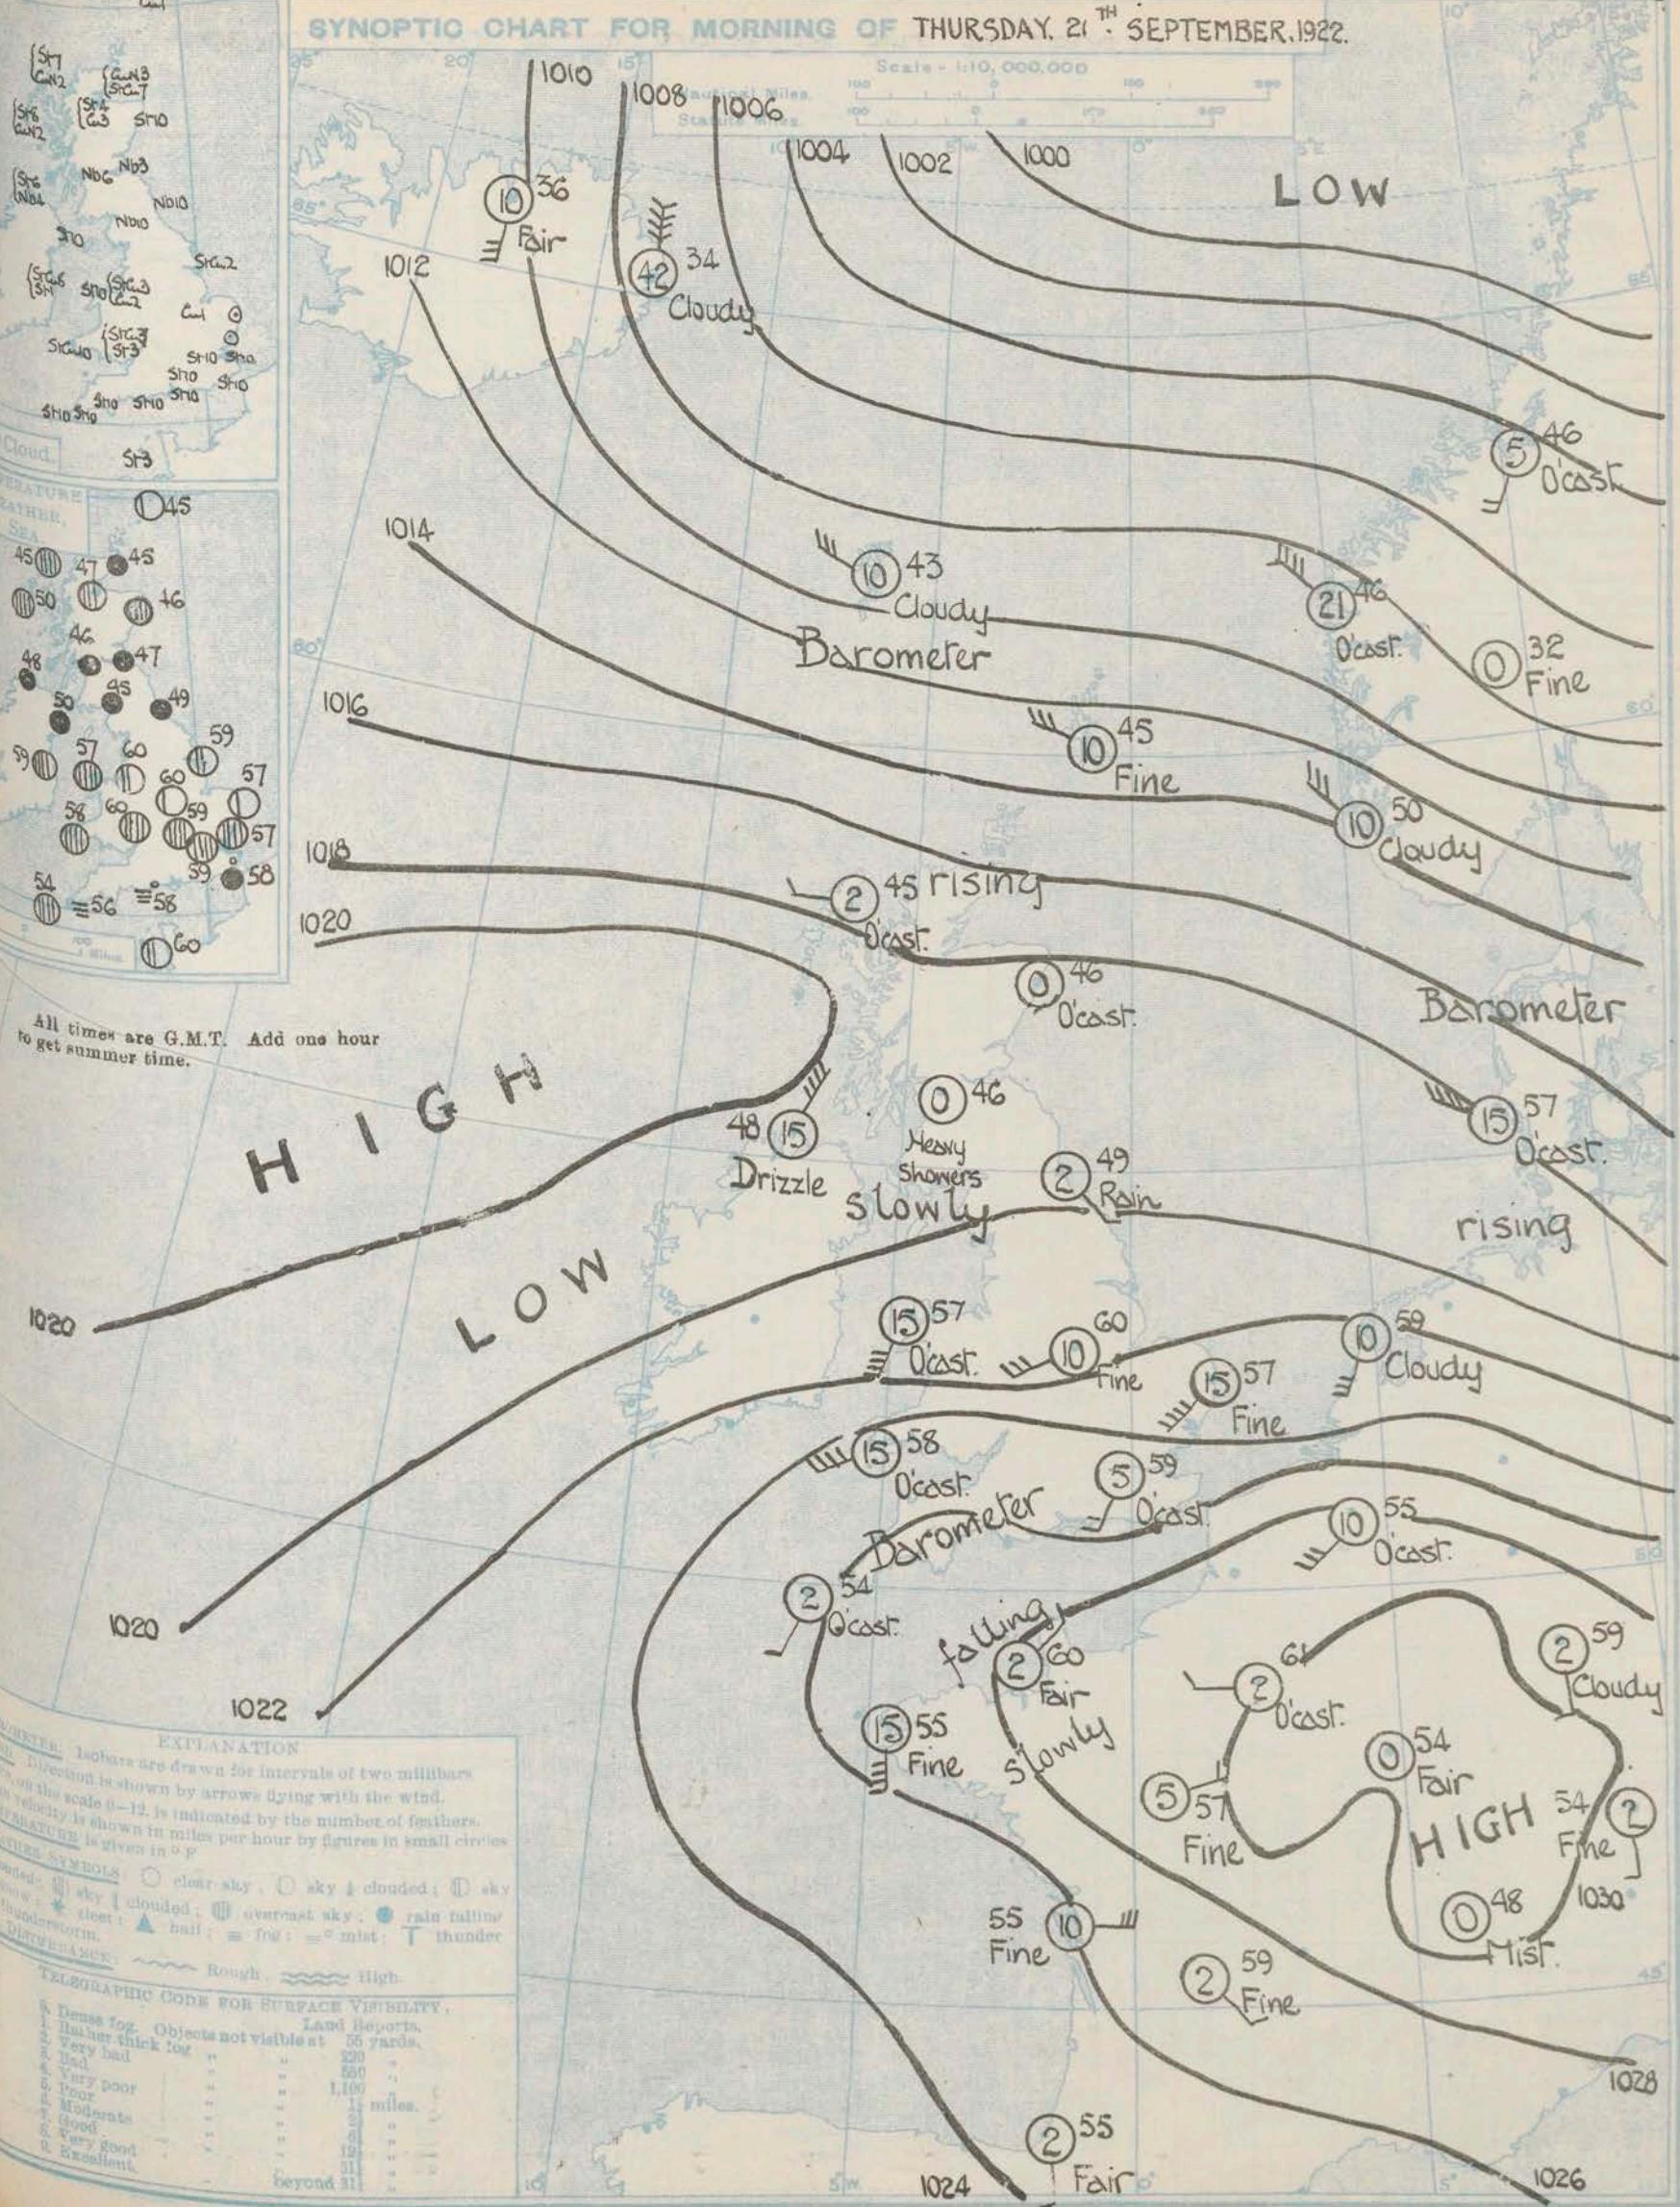

None Issued.

## GENERAL INFERENCES.

The cold air of polar origin now lying over Scotland and Northern Ireland will probably extend southwards very gradually replacing the present humid Southwesterly current, causing a reduction of temperature, accompanied at first by some rain. In the North variable skies are probable, with local showers.

Forecasts for the 24 hours commencing 15 h. G.M.T. Saturday, 23rd September 1922.

Further Outlook

## GENERAL INFERENCES.

An anticyclone covering the British Isles will cause mainly fair quiet weather in most districts with a moderate day temperature but a depression approaching from the Atlantic will cause a freshening of the wind from S or SW in the extreme western and northwestern districts with rain later.

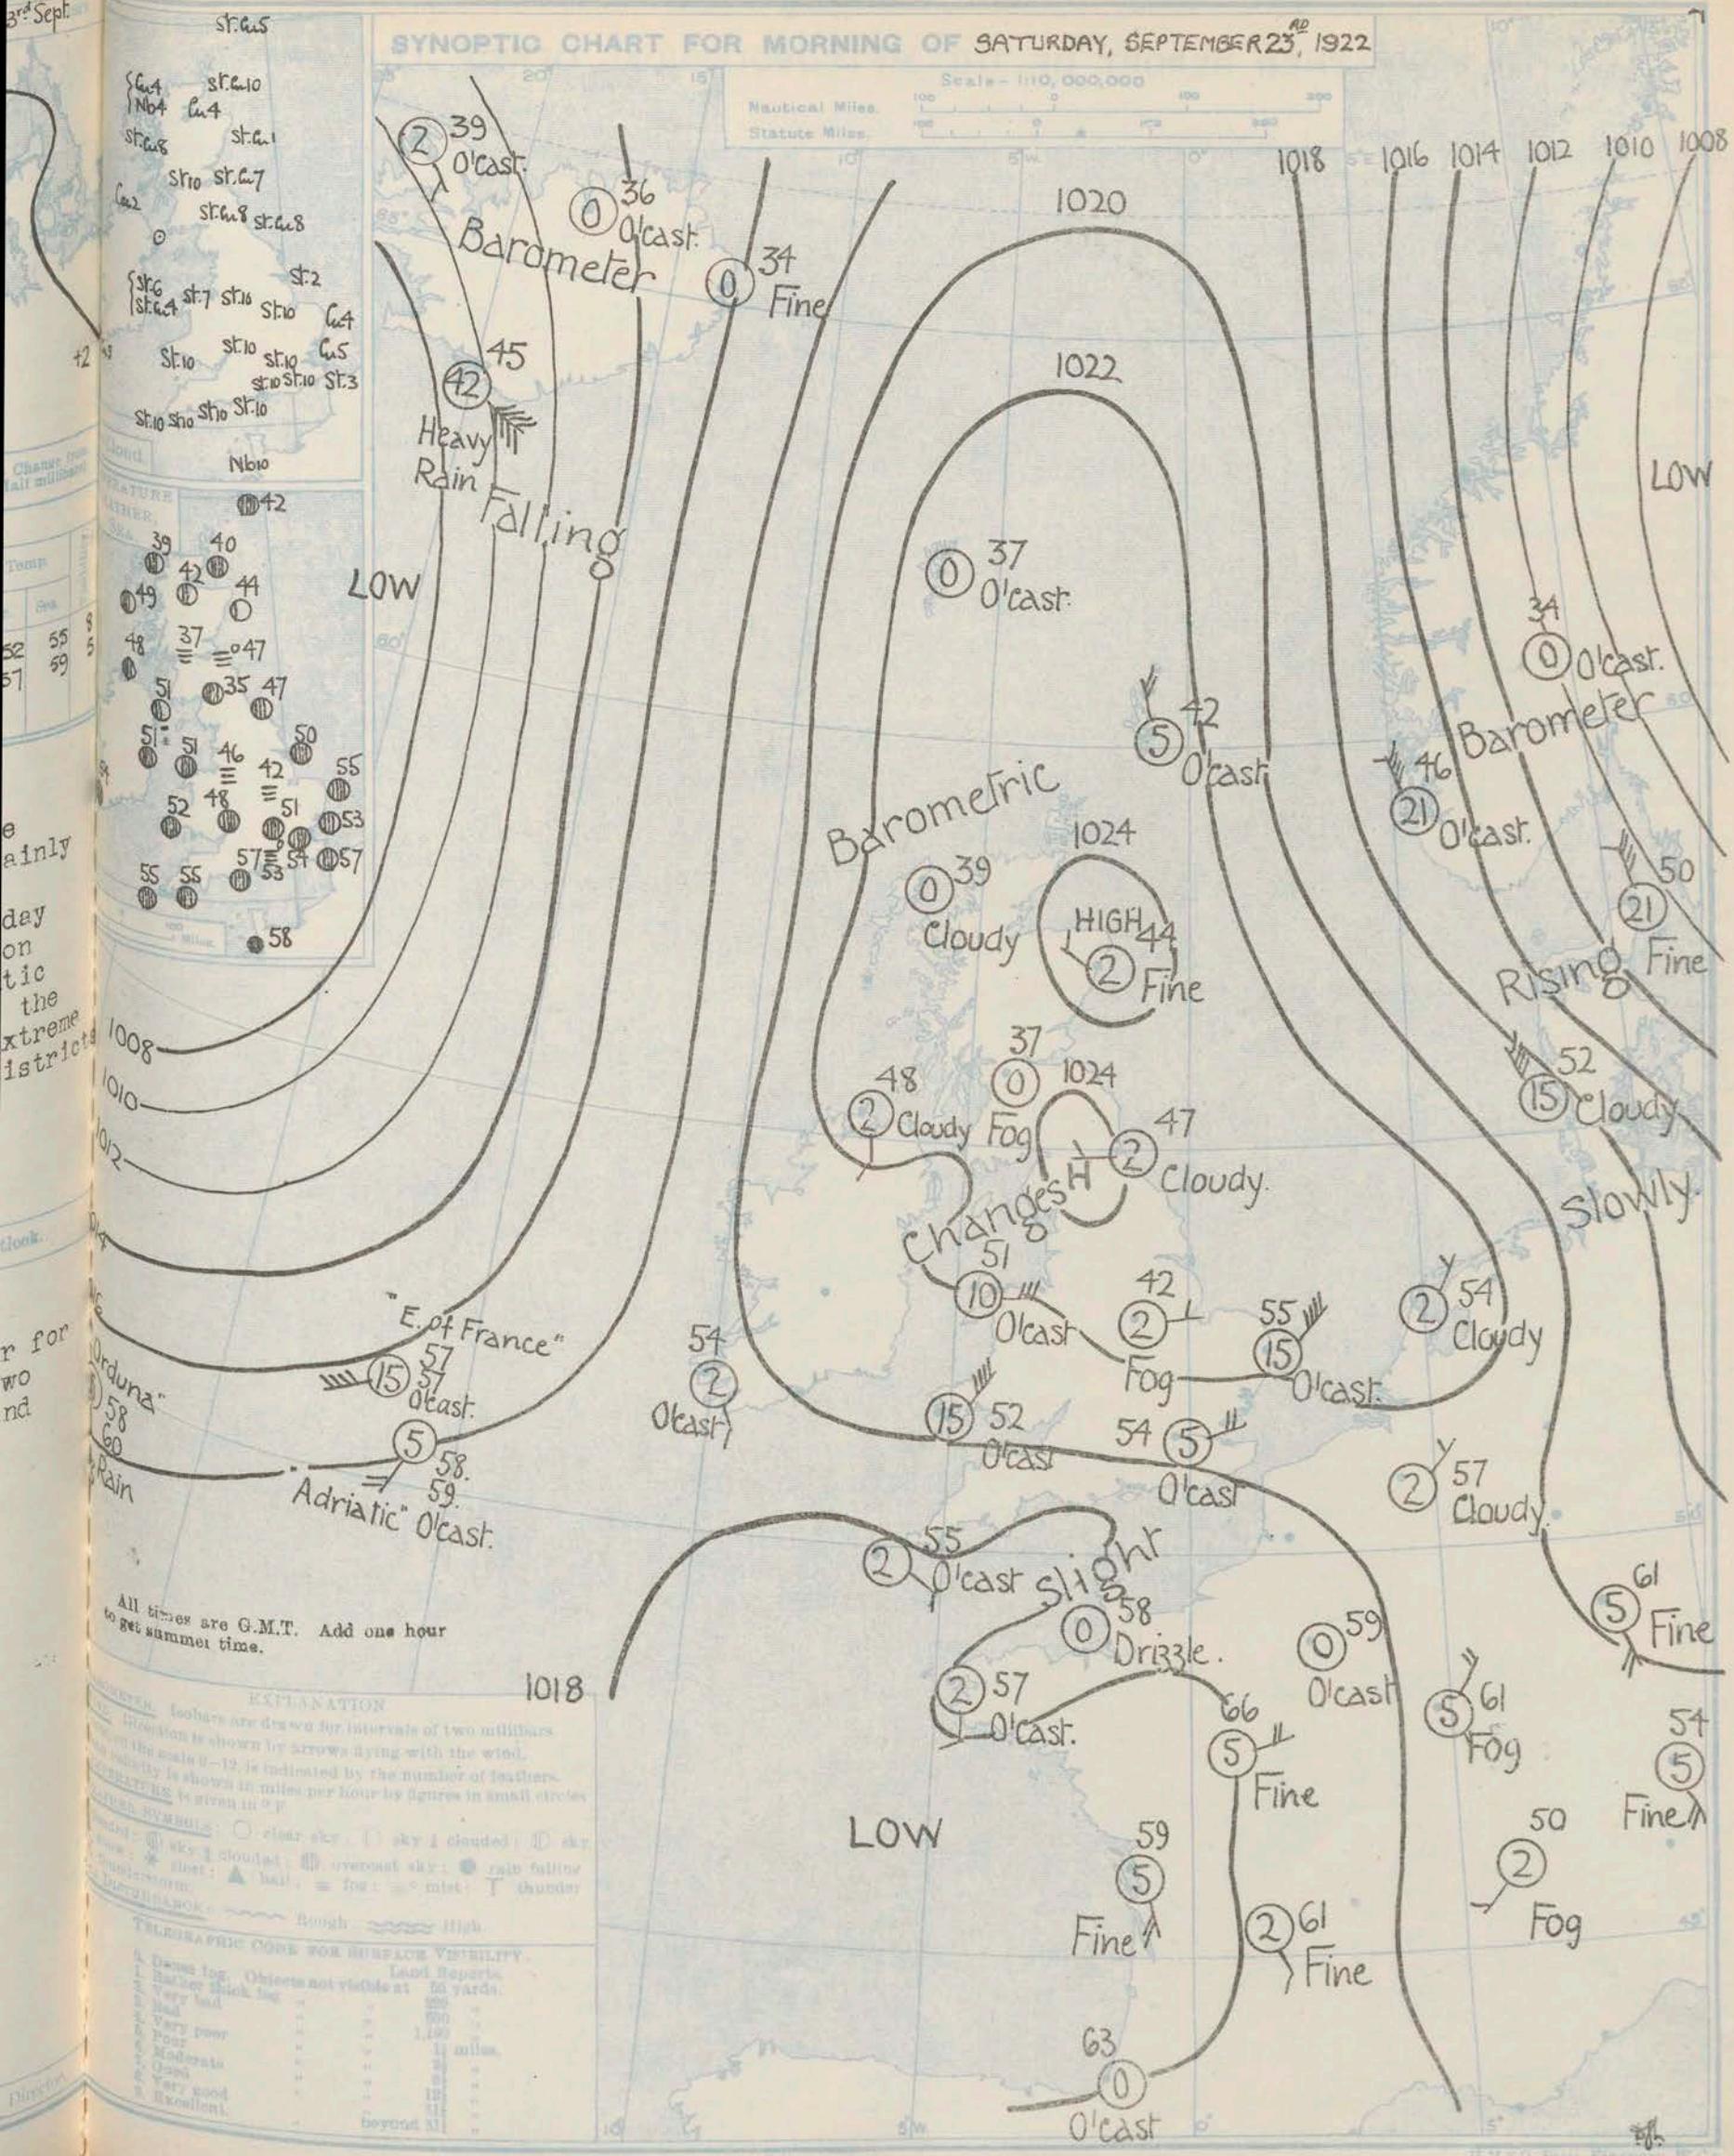

- 1. S.E. England
- 2. E. England
- 3. E. Midlands
- 4. W. Midlands
- 5. S.W. England

A fairly developed ridge of high pressure off the west of Ireland likely to disperse and be replaced by a depression which is advancing from further west. Winds will be light and indefinite for a time generally with cool, cloudy and unsettled weather.

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Sunday, 24th September, 1922.	Further Outlook.
1. S.E. England	Moderate or fresh E to NE winds, becoming light and indefinite; cloudy, some rain or drizzle; visibility moderate; cool.	
2. E. England		
3. E. Midlands	Wind light and indefinite; cloudy, some rain or drizzle; visibility moderate during the day, mist locally at night; cool.	Winnipeg
4. W. Midlands		
5. S.W. England		
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England	Moderate to fresh southerly wind becoming light and indefinite later; cloudy, some rain or drizzle; visibility moderate; cool.	
11. E. Scotland		
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland	Moderate westerly wind, backing later; cloudy, some rain; visibility moderate or good; cool.	
15. Hebrides		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland

## ISALLOHARS.

## POSITION NUMBERS

## GENERAL INFERENCES.

The deep depression to the west of Ireland will cause freshening southerly winds probably veering and increasing to gale force before long on our SW coasts. The weather will be dull to rainy in the southwest similar conditions spreading to all districts in the next 24 hours.

Districts. Forecasts for the 24 hours commencing 15h. G.M.T. Monday, 25th September, 1922.

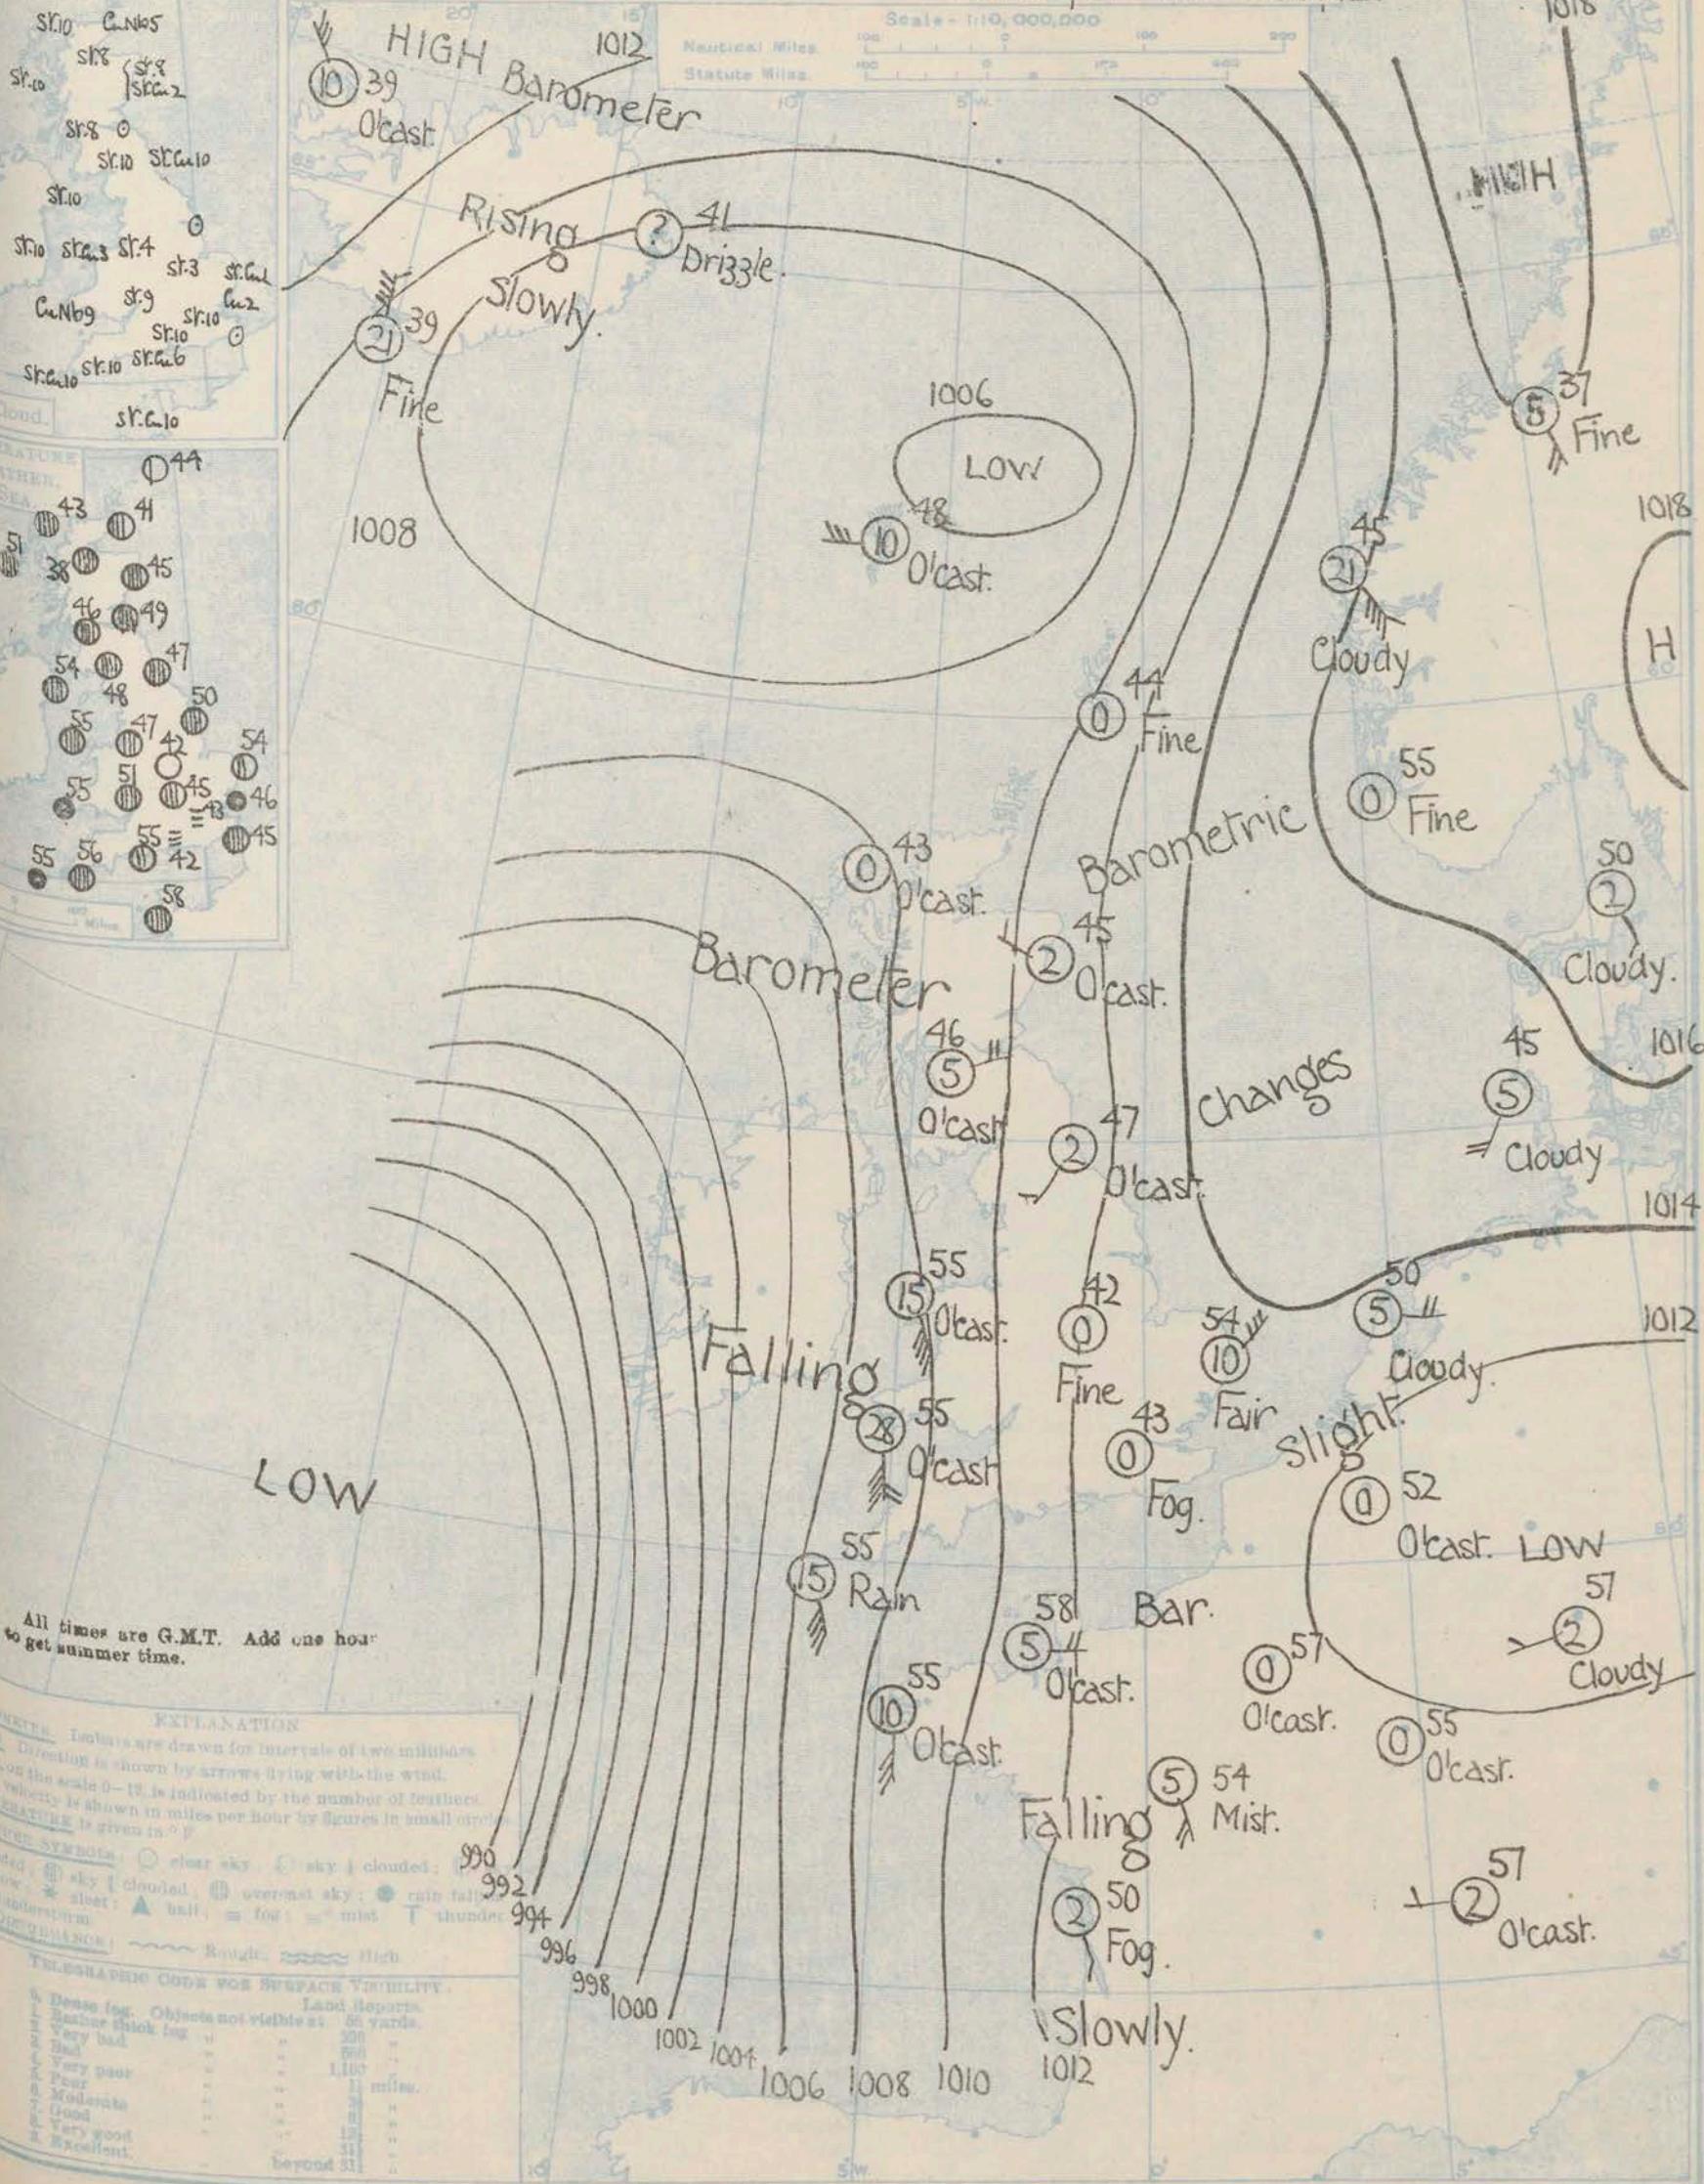

Further Outlook.

1. S.E. England	Freshening southerly wind; becoming dull, then rainy; visibility moderate; rather warmer.	Unsettled generally for the next day or two.
2. E. England		
3. E. Midlands		
4. W. Midlands	Fresh to strong southerly wind, veering to SW later; much cloud, some rain; visibility poor at times; moderate temperature	
5. N.W. England	Squally southerly wind, veering to SW or W later, strong to a gale at times; much cloud, some rain; visibility mainly good; moderate temperature.	
6. N. Midlands	Fresh to strong southerly wind; dull, then rainy; visibility poor at times; rather warmer.	
7. N.E. England	Freshening SE wind; dull, rain later; visibility poor to moderate; moderate temperature.	
8. E. Scotland		
9. S.W. Scotland		
10. Isle of Man		
11. N. & N.W. Scotland		
12. Hebrides		
13. Orkneys and Shetlands		
14. N.W. Ireland		
15. N.E. Ireland		
16. S.E. Ireland		
17. S.W. Ireland		

AS 5 - 8.

▼ South Cone hoisted at 0915M this morning.

The deep depression centred near western Ireland will move slowly east causing strong winds or gales generally from S or SE veering to southwest in the west of England and to NW in Ireland. Rainy to showery weather is probable with occasional bright intervals in England and Ireland.

Districts.	Forecasts for the 24 hours commencing 15 h. G.M.T. Tuesday 26th September, 1922,	Further Outlook
1. S.E. England	Strong S or SE wind; mainly dull some rain, occasional bright intervals; visibility poor at times; moderate temperature.	
2. E. England		
3. S. Midlands		
4. W. Midlands		
5. S. W. England	Strong to high S. to S.W. winds, a gale at times in exposed places; mainly dull, showery, occasional bright intervals; visibility poor at times ; moderate temperature.	Stormy and unsettled weather generally.
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.R. England		
11. S. Scotland	Strong SE or E wind; dull to rainy; visibility poor at times; moderate temperature.	
12. S.W. Scotland		
13. Isle of Man	As 1 - 4.	
14. N.W. Ireland		
15. Hebrides	Strong Easterly winds; dull to rainy, visibility mainly poor; moderate temperature.	
16. Orkneys and Shetlands		
17. N.W. Ireland	Wind becoming W to NW, strong to a gale; showery, bright intervals; visibility mainly good; becoming somewhat colder.	
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

▼ South Cone hoisted at 0915, 25<sup>th</sup> except for District 12, hoisted at 1915, 25<sup>th</sup>.

ISAAC BARS.

28<sup>th</sup> Sept.

Position.	Date and Time.	Steamship.	Wind.		Weather.	Temp.	
			Dircc.	Force.		Air	Sea
2	27° 56' W 2000	Anglia	ENE	6	ab	57	58
3	28° 3' W 2000	Brighton	S	2	b-jo	58	59

GENERAL INFERENCE.

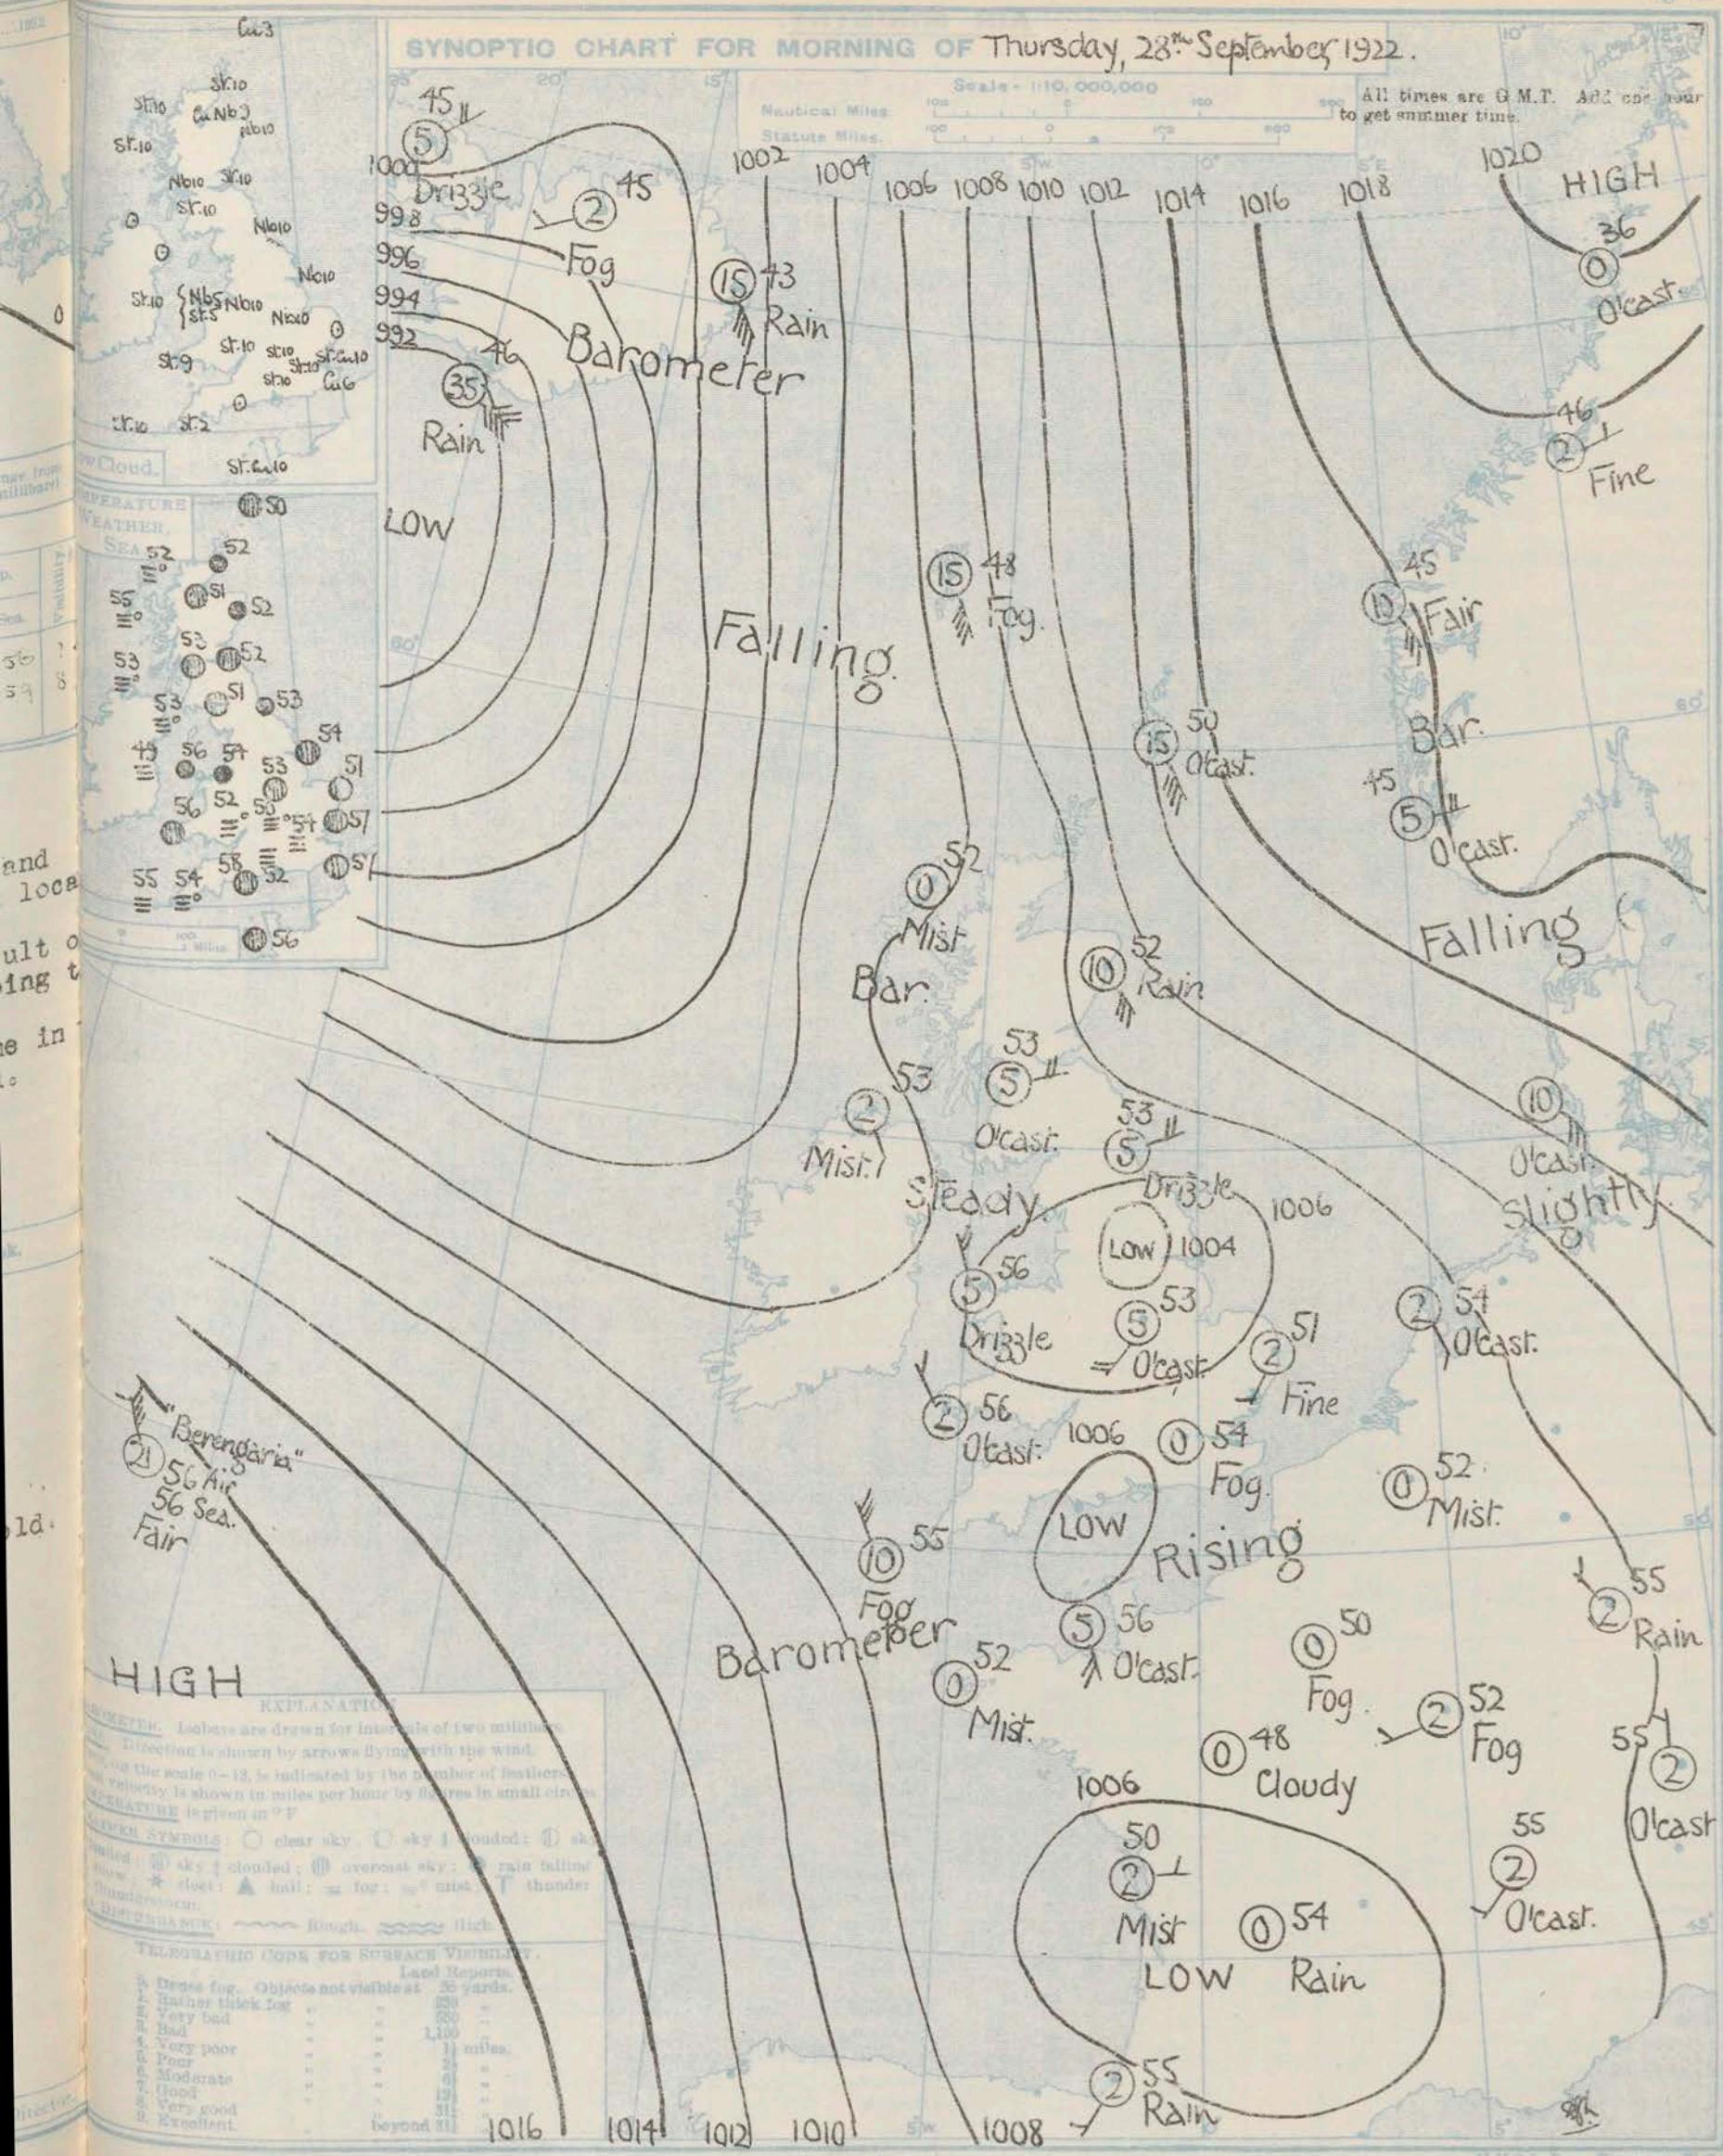

After light variable winds and generally cloudy weather, with local rain or drizzle, the wind will become southwesterly as a result of a depression which is developing to the south of Iceland, and the weather will be fair for a time in the South and East of England.

Forecasts for the 24 hours commencing 15h G.M.T Thursday, 28th September, 1922.

### Further Outlook.

- |                           |   |
|---------------------------|---|
| 1. S.E. England           | Wind light and indefinite; cloudy at first, with local drizzle, fairer later; visibility moderate during the day, mist or fog at night; no important change of temperature. |
| 2. E. England             |   |
| 3. E. Midlands            |   |
| 4. W. Midlands            |   |
| 5. S.W. England           | Light NW wind backing to W; mainly fair; visibility moderate to good during the day, slight mist at night; moderate temperature.  |
| 6. South Wales            |   |
| 7. North Wales            | Wind light and indefinite, becoming SW later; cloudy, local drizzle; visibility poor at first, improving somewhat; moderate temperature.                                    |
| 8. N.W. England           |   |
| 9. N. Midlands            |   |
| 10. N.E. England          | Light or moderate Easterly wind, veering to S. or SW later; cloudy, local drizzle; visibility poor to moderate; no important change of temperature.                         |
| 11. E. Scotland           |   |
| 12. S.W. Scotland         |   |
| 13. Isle of Man           |   |
| 14. N. & N.W. Scotland    | Moderate SE. to S. wind, much cloud, local rain or drizzle; visibility poor to moderate; no important change of temperature.  |
| 15. Hebrides              |   |
| 16. Orkneys and Shetlands |   |
| 17. N.W. Ireland          | As 7 - 9.   |
| 18. N.E. Ireland          |   |
| 19. S.E. Ireland          |   |
| 20. S.W. Ireland          | Moderate W to SW winds; cloudy, some rain later; visibility moderate; no important change of temperature.   |

As 7 - 9.

SUMMARIES FOR THE PAST 24 HOURS

29 SEPTEMBER 1943

A wedge of high pressure will probably move slowly across the British Isles maintaining North-westerly winds and generally fair weather, which will probably last for a day or two over eastern England and be replaced by SW to S winds and unsettled conditions in the west during the week-end.

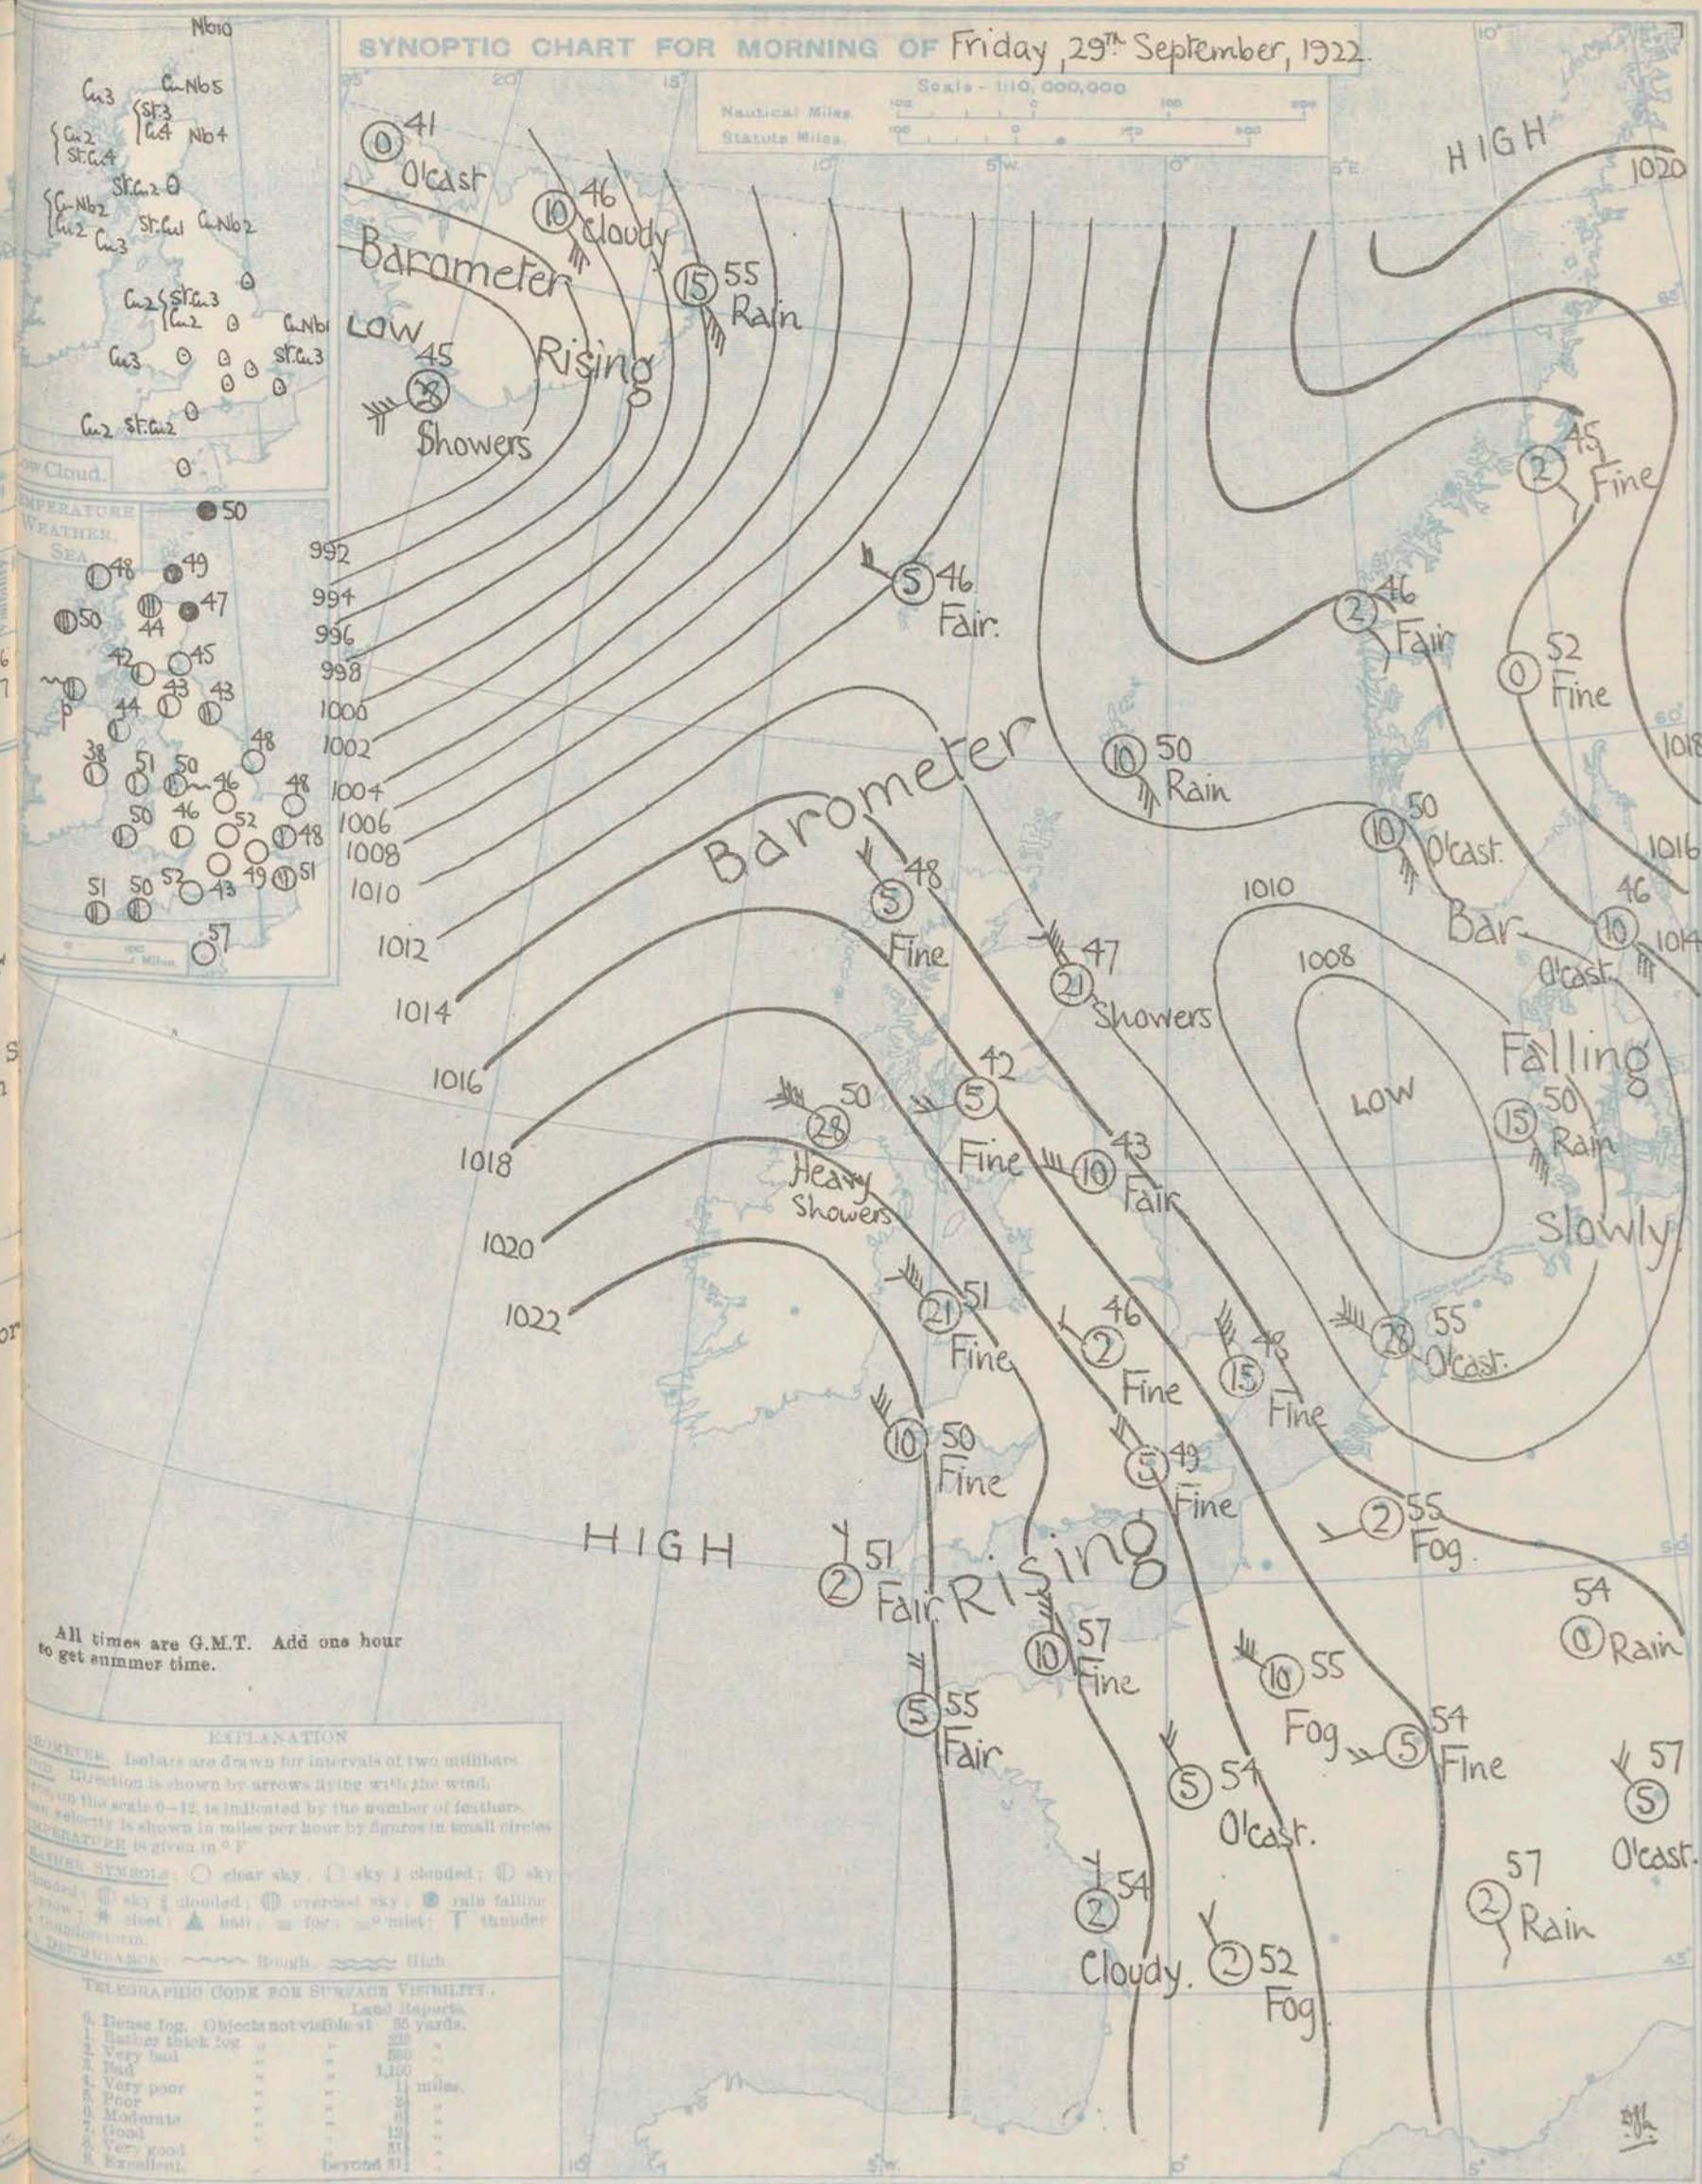

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Friday, 29th September, 1922.
1. S.E. England	Moderate or fresh Northwesterly winds; fair; visibility good; moderate day temperature, risk of ground frost at night.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	Moderate NW wind, backing to W or SW later; mainly fair but cloudy at times; visibility good; moderate temperature,
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	Wind light and indefinite; cloudy with some rain at first, becoming fair; moderate temperature.
17. N.W. Ireland	
18. N.E. Ireland	Light to moderate Westerly winds, backing to SW; fair at first, cloudier and less settled later; visibility mainly good during the day, mist locally at night; moderate day temperature; risk of ground frost inland at night.
19. S.E. Ireland	
20. S.W. Ireland	

### Further Outlook.

Fair for a day or  
two over Eastern  
England.

Unsettled in the  
West and North.

All time  
to get sun

ISALLOHARS.

## GENERAL INFERENCES.

The ridge of high pressure over England will give way before a large and deep depression advancing from the Atlantic. Winds will become Southerly, veering to SW or W later on our SW coasts, probably reaching gale force locally in Scotland Ireland and western England, and the weather will become unsettled generally although rain is not likely to extend to eastern England before Sunday.

## Districts.

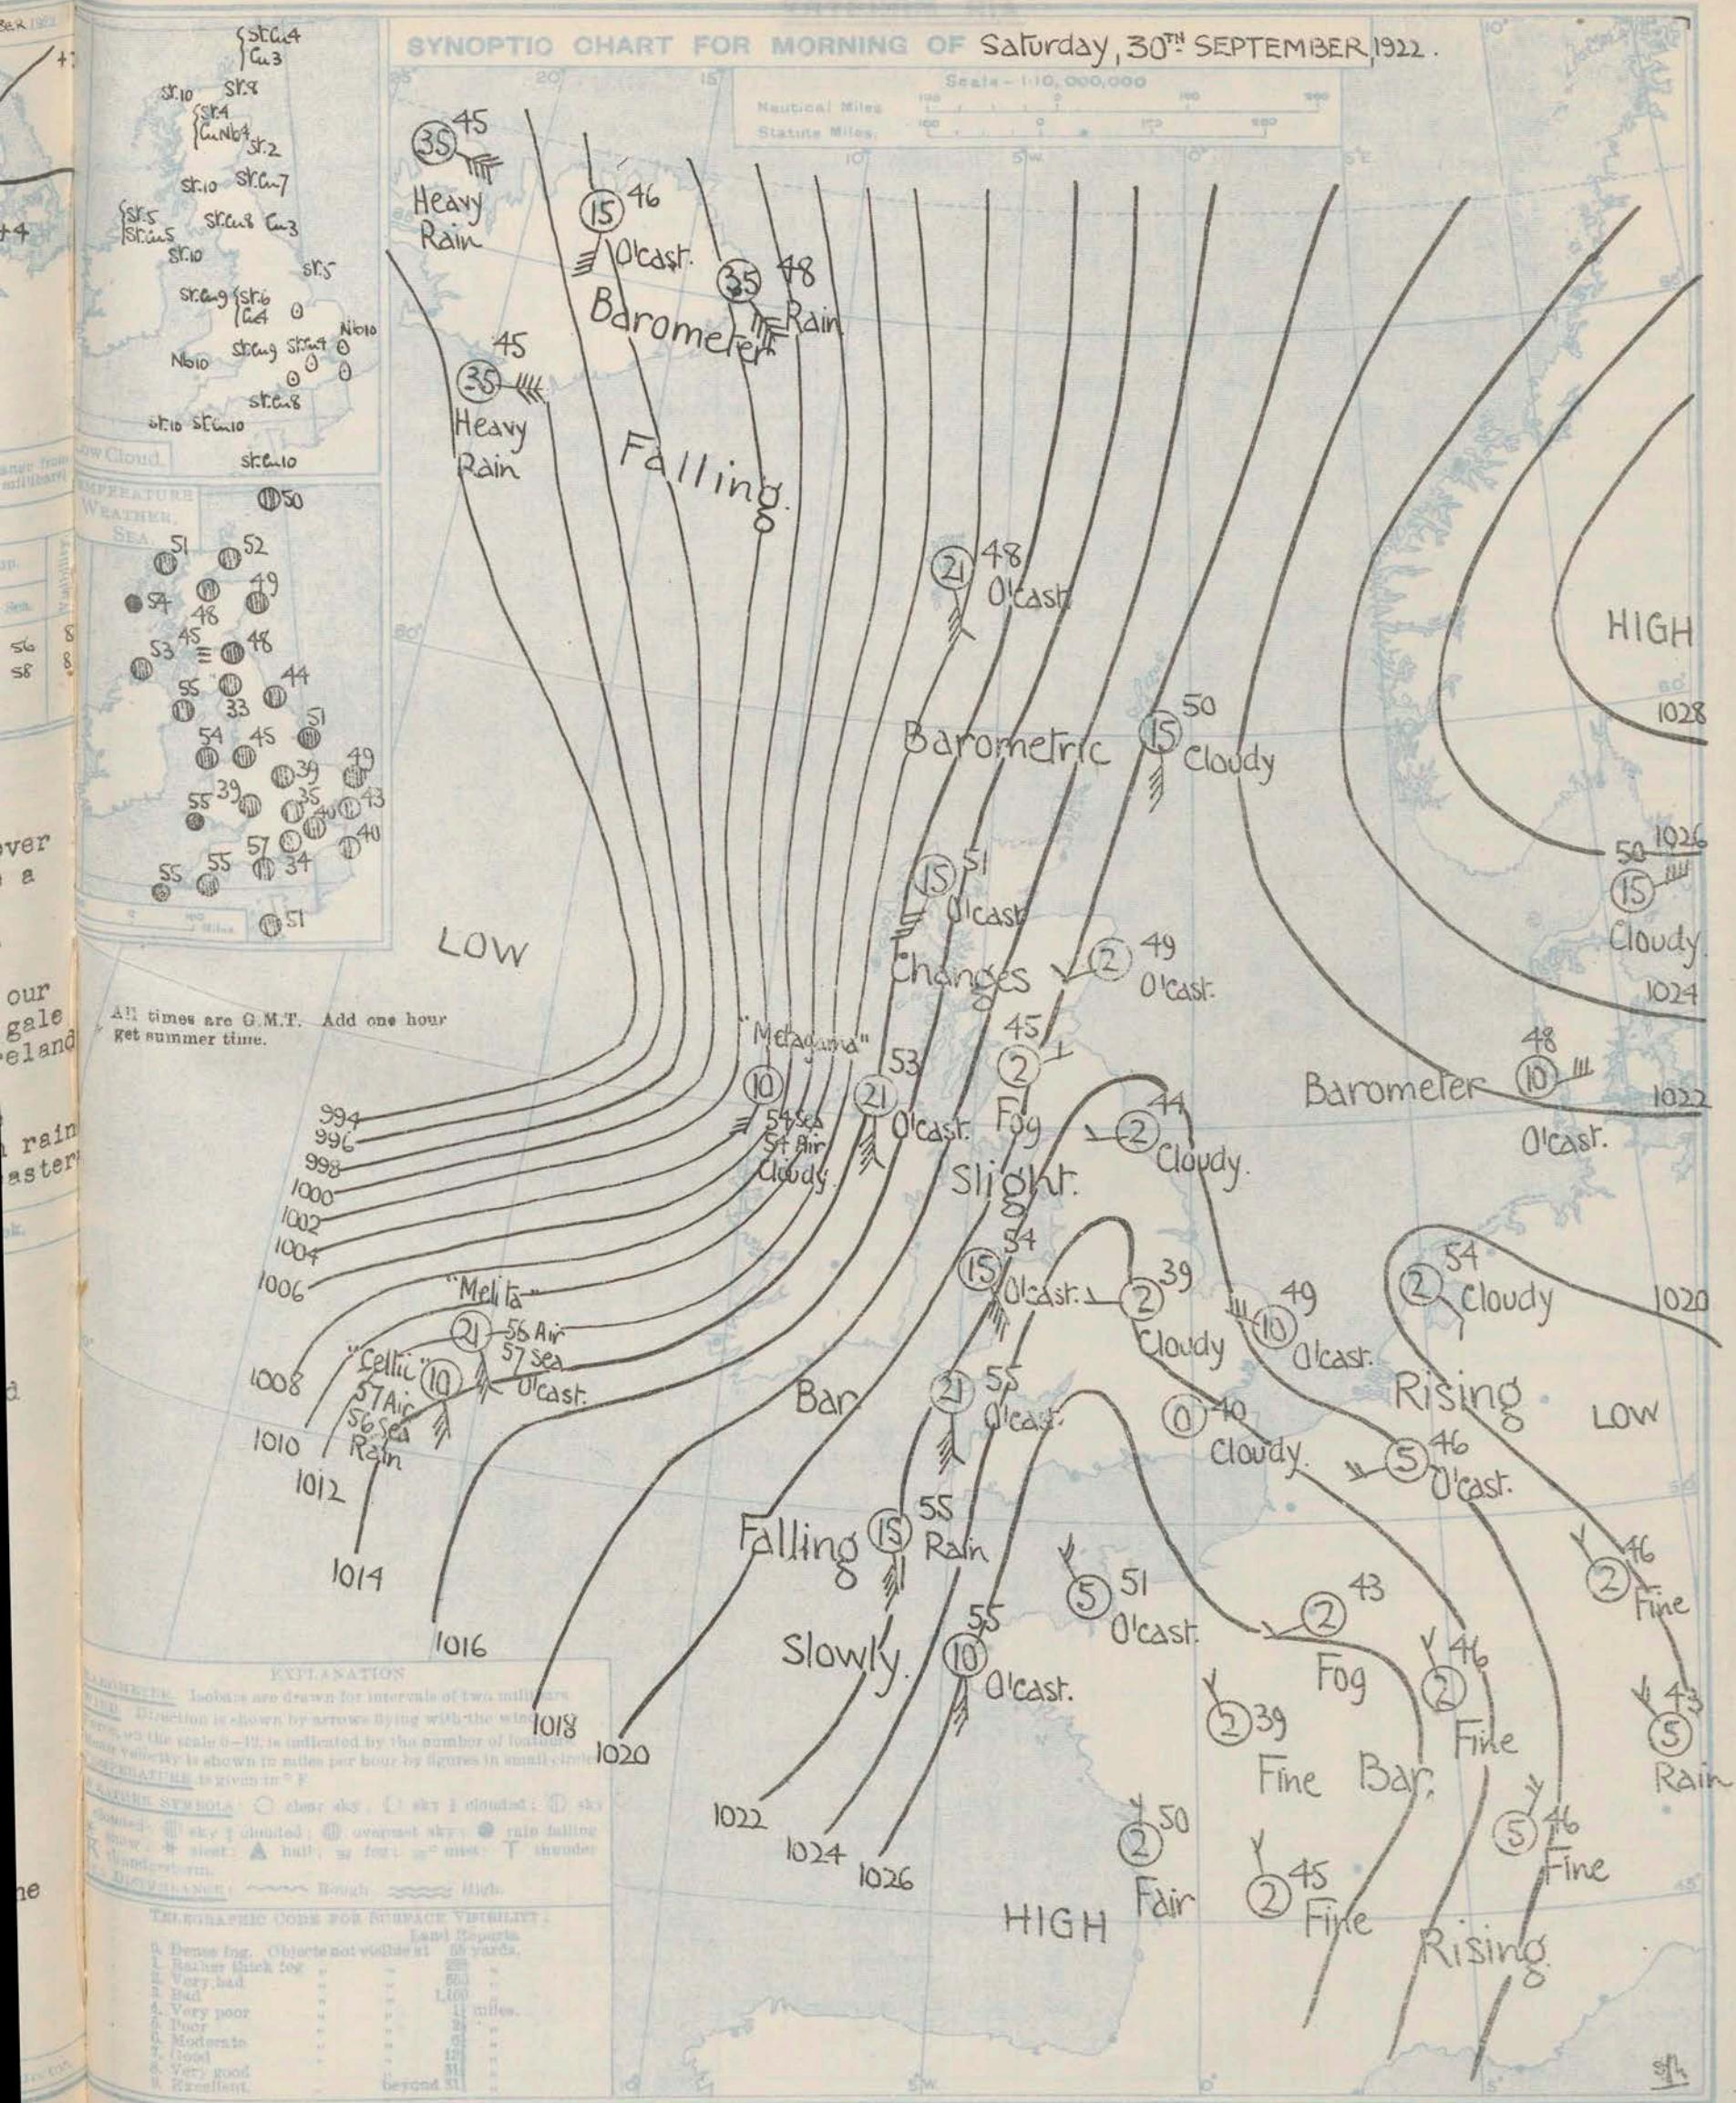

Forecasts for the 24 hours commencing 15h. G.M.T. Saturday, 30th, September, 1922.

Further Outlook.

1. S.E. England	Moderate to fresh Southerly to Southwesterly winds; cloudy, some rain or drizzle later; visibility moderate; temperature rising.	Unsettled generally.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Freshening Southerly to Southwesterly winds, probably reaching gale force later; much cloud, some rain; visibility poor at times; mild.	
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands	Freshening Southerly to Southwesterly winds; much cloud, some rain; visibility poor at times; temperature rising.	
10. N.E. England		
11. E. Scotland		
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland		
15. Hebrides		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

As 5 - 8.

South Cone hoisted at  
4h 10  
9h 45  
to-day.
