The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE

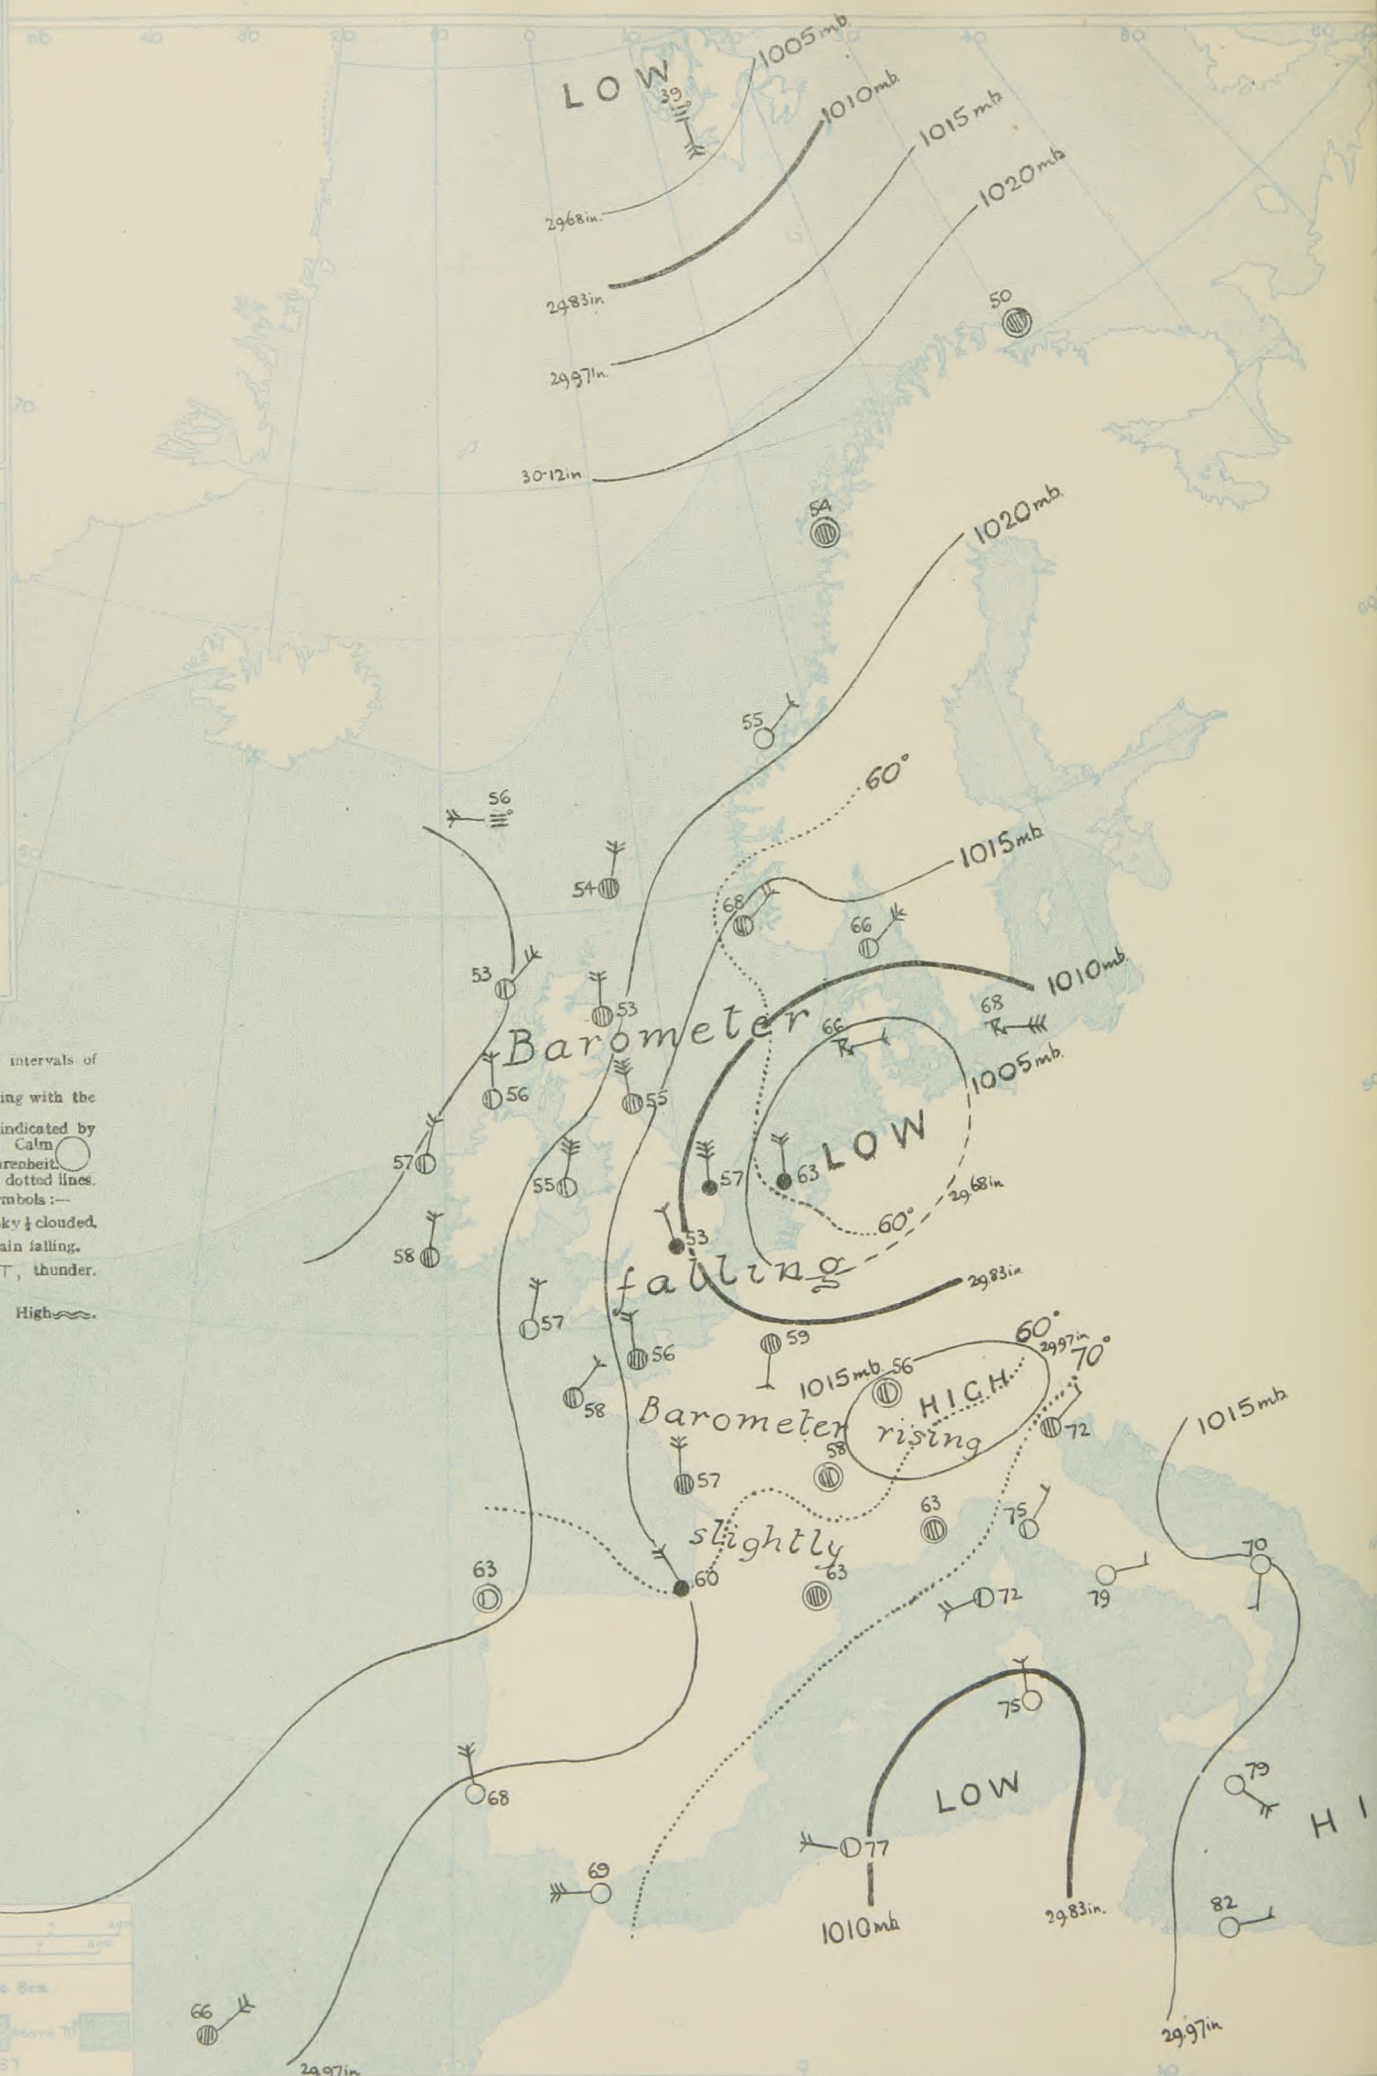

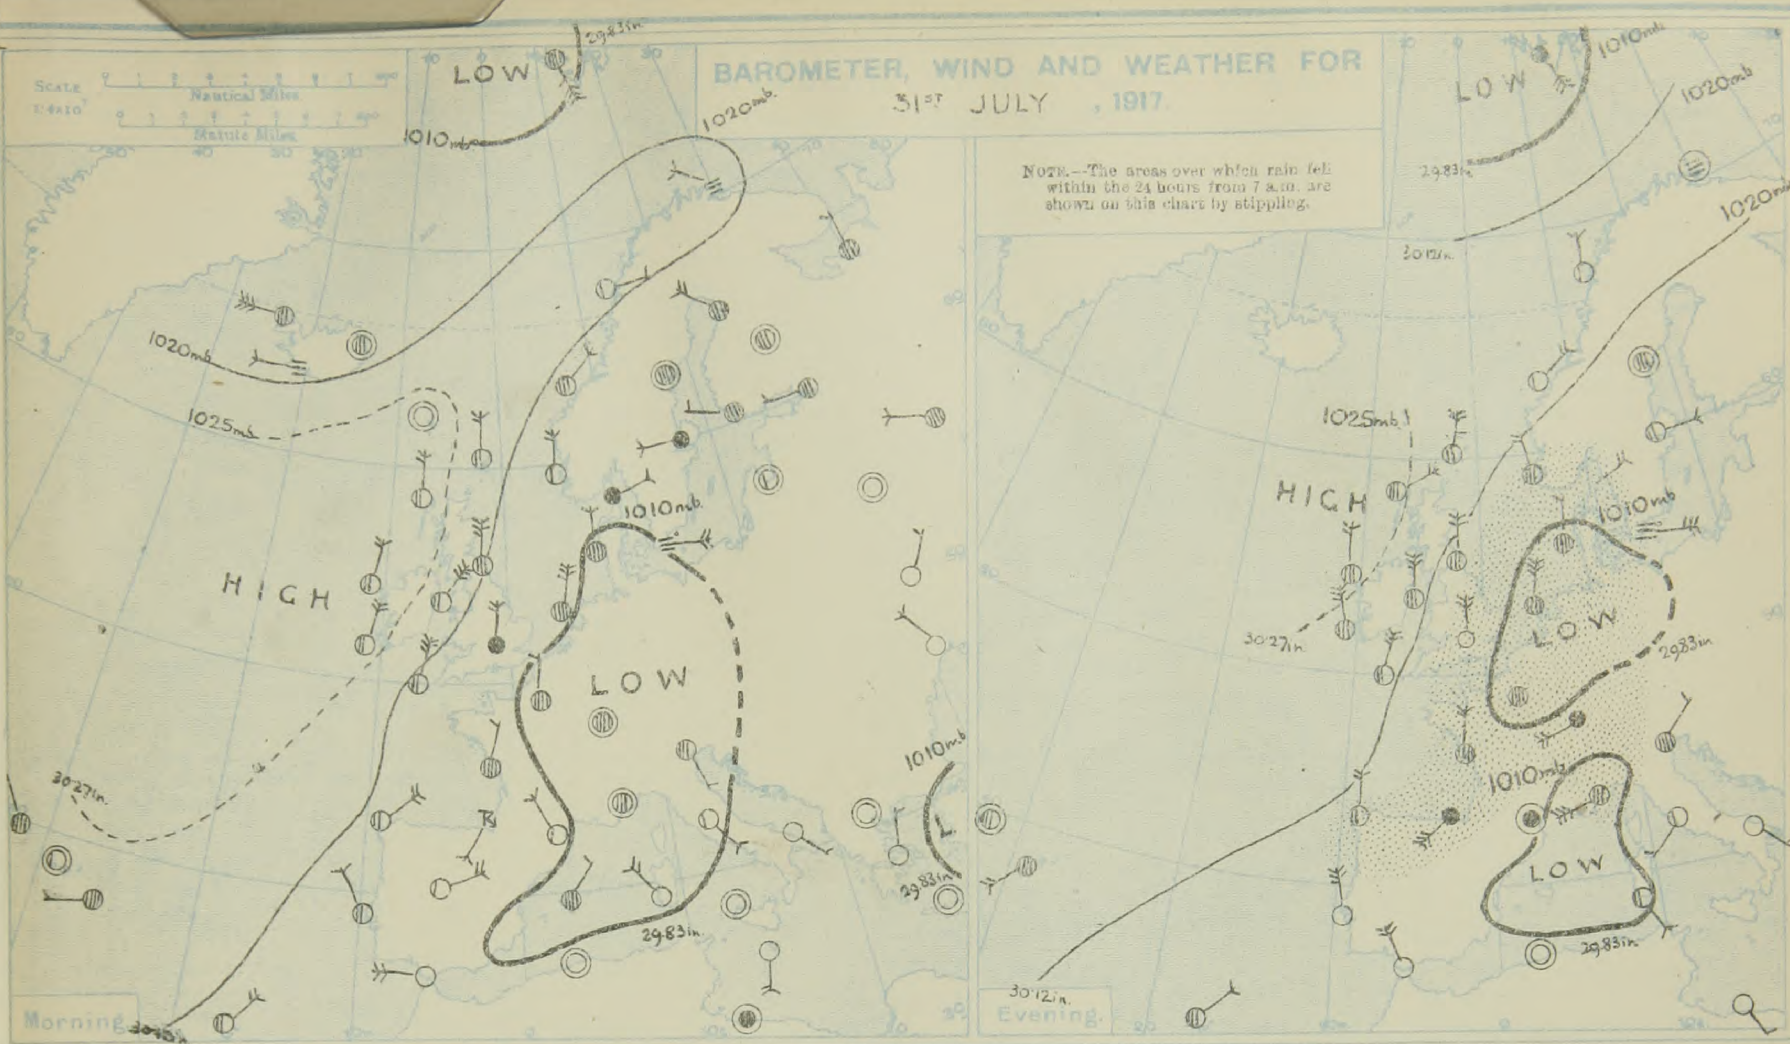

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.
WIND.—Direction is shown by arrows flying with the wind.
 Force, on the scale 0-12, is indicated by the number of feathers. Calm
TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.
WEATHER.—Shown by the following symbols:—
 clear sky. sky 1/4 clouded. sky 1/2 clouded. overcast sky. rain falling.
 snow. hail. fog. mist. thunder.
SEA DISTURBANCE.—Rough High

The Present Situation

The depression on the Continent has increased in intensity since yesterday and its centre now lies over or near Oldenburg. The highest pressure is still on the Atlantic off our west and north-western coasts.

The General Outlook

The barometrical changes are at present slight, but they show that the depression is still increasing in depth, but afford no indication of its direction of movement. With the prevailing pressure distribution, however, it will probably travel eastward of north-eastward, its influence over the North Sea and England ceasing very gradually.

DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE, 1917. No. 1st August.

YESTERDAY'S WEATHER: THE 24 HOURS COMMENCING 7 h. ON WEDNESDAY, 1ST AUGUST 1917.

Temperature rose to 70° and above in Scotland, but remained below 60° in Southern England. Rain continued over the East and South-East of England and in Holland and North-Eastern France. In the South-East of Kent the measurement exceeded 40 mm, at Clacton was 36mm. at Benson 33 mm. Much bright sunshine was recorded in the West and North of the Kingdom, none in the East and South-East.

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; i. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O.

THE MORNING OF THURSDAY, 2ND. AUGUST, 1917.

TEMPERATURE, WEATHER AND SEA DISTURBANCE

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm

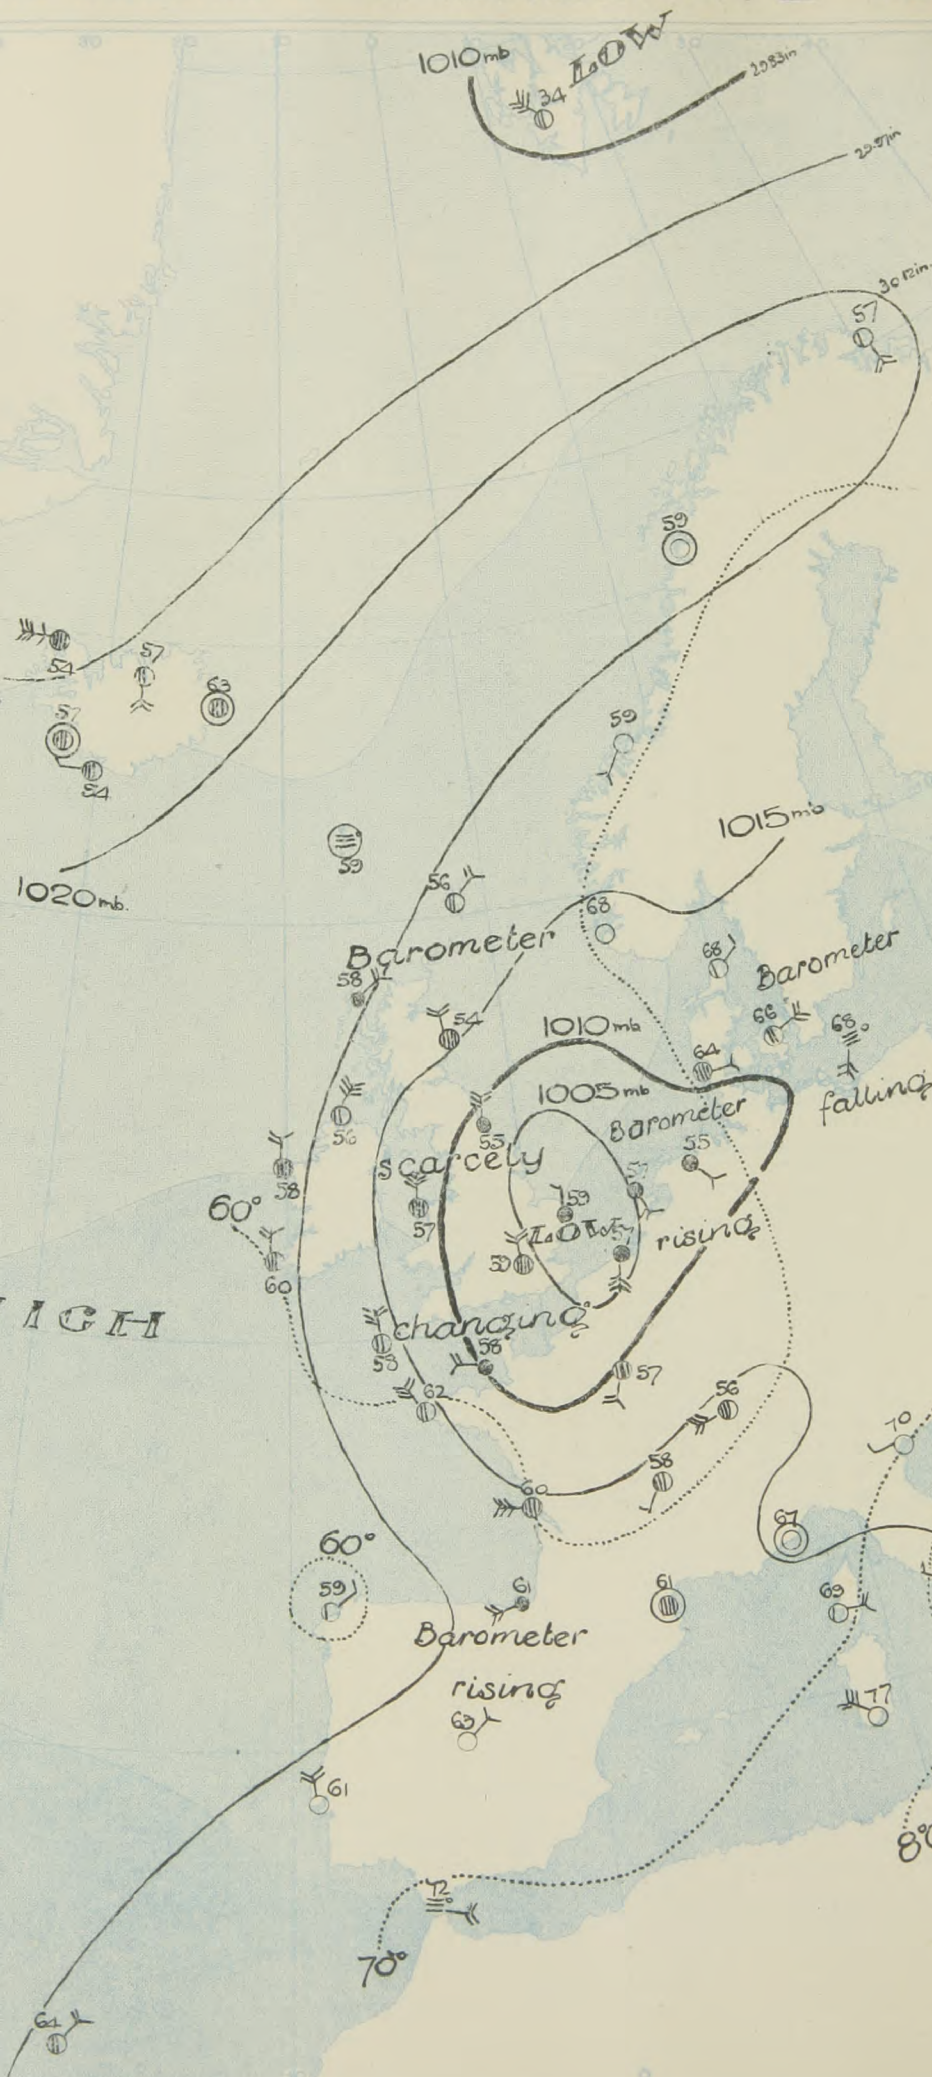

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

clear sky. sky 1/4 clouded. sky 1/2 clouded. overcast sky. rain falling. snow. hail. fog. thunderstorm.

SEA DISTURBANCE.—Rough High

HIGH

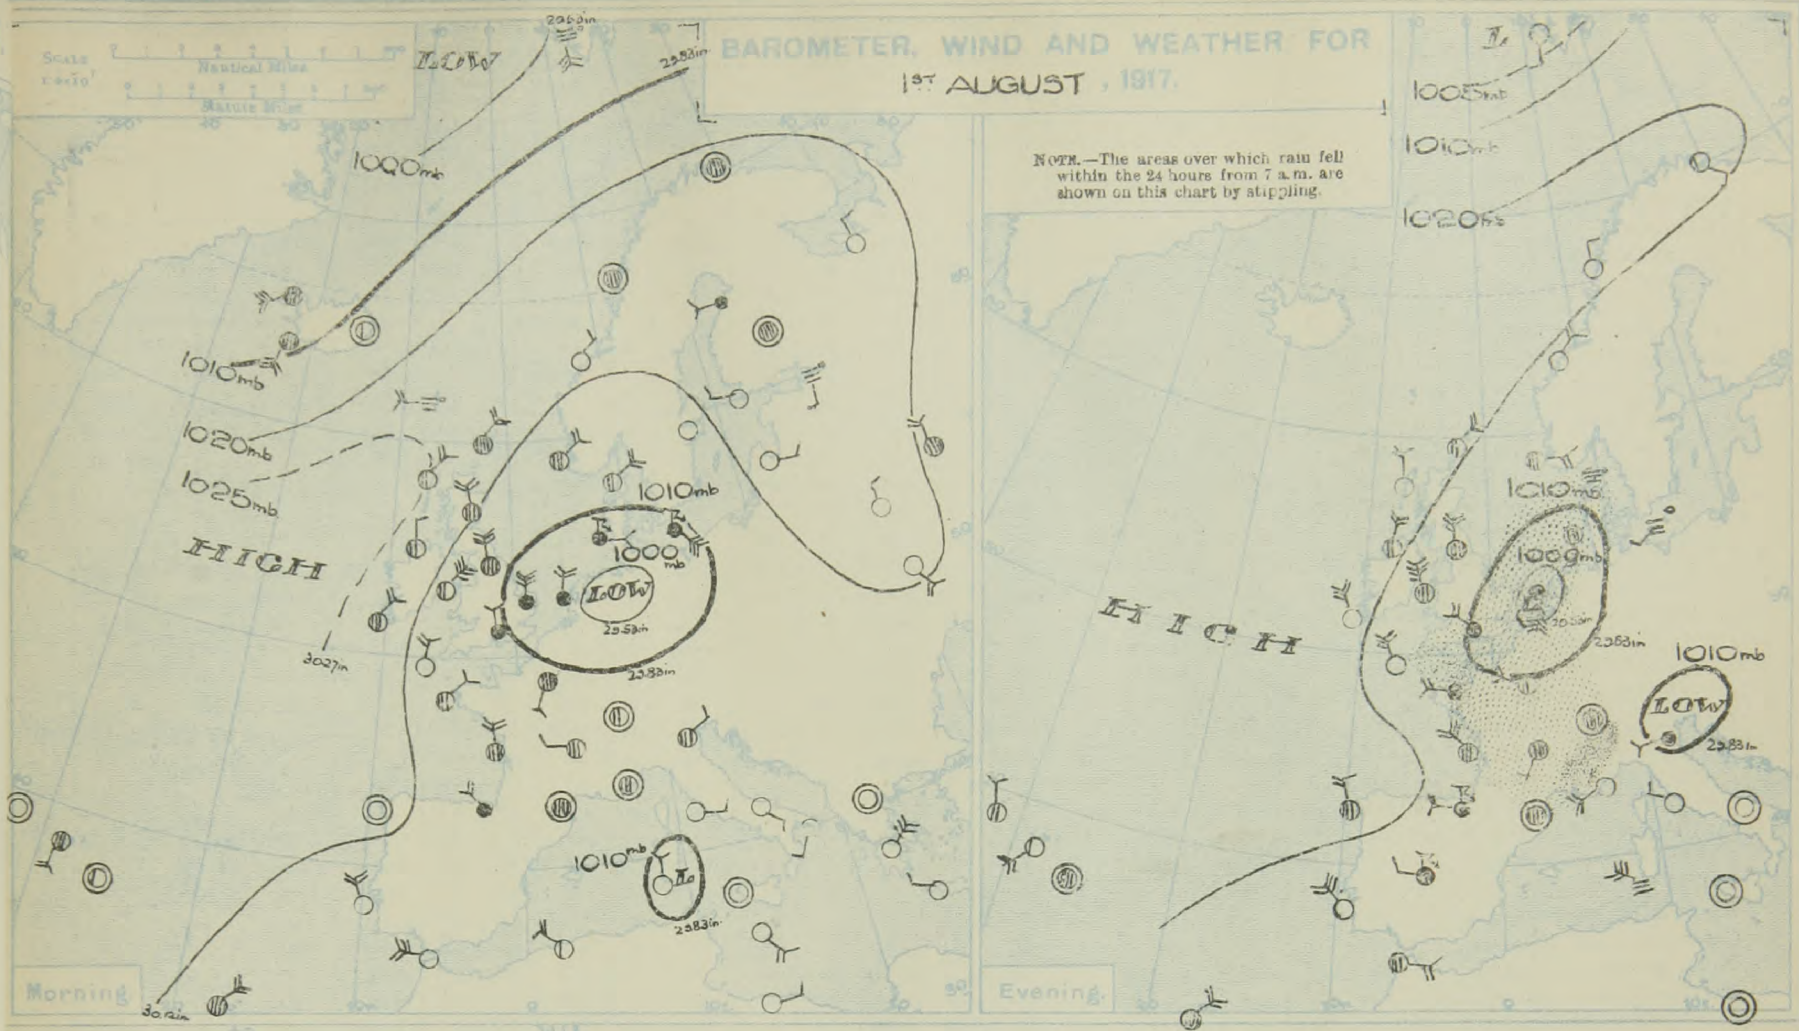

SCALE 1:50,000
Nautical Miles
Statute Miles

Normal Temperature of the Sea.

Below 50° 50°-60° 60°-70° Above 70°

Scale of Tints for AUGUST

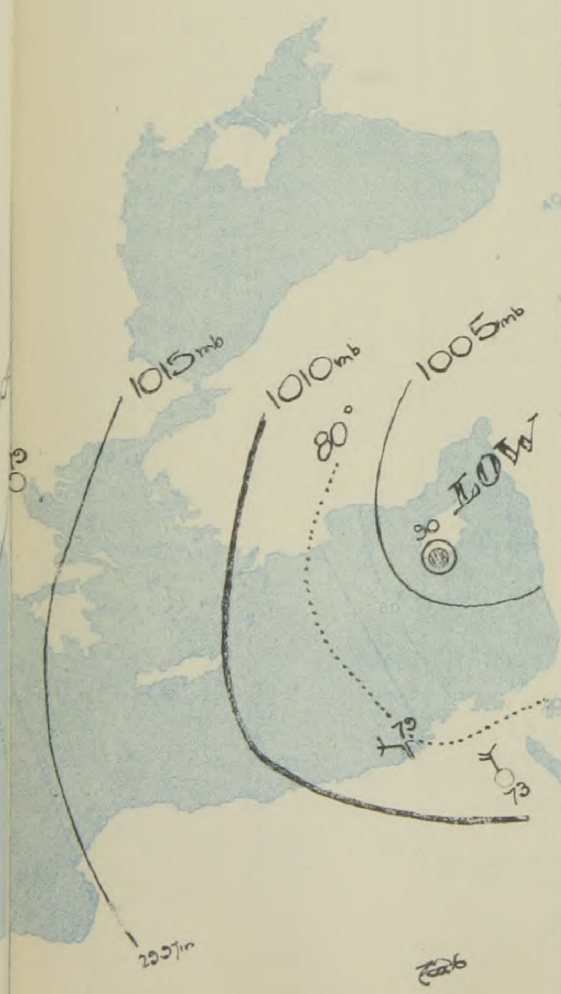

The Present Situation

The depression that lay over Oldenburg yesterday moved westward during the day and is now centred off the coast of Norfolk near Yarmouth. The changes in pressure over the British Isles and their immediate neighbourhood are very slight and irregular, but a decided fall is in progress over the western portion of the Baltic.

The General Outlook

The very slight and irregular changes in pressure over this country seem to indicate that the depression will begin to disperse rather than to travel away. The fall of the barometer beyond the Eastern shores of the North Sea is probably indicative of the development of a depression which will prolong the regime of the Northerly wind in this country and prevent the establishment of summer-like conditions.

DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE, 1917. No. 214

YESTERDAY'S WEATHER: THE 24 HOURS COMMENCING 7 h. ON THURSDAY, 2ND AUGUST, 1917.

Rain was again general in the east and south-east of this country, Holland, and North-East France; at Helder the measurement was 41 mm. Bright sunshine was abundant at some western and north-western stations, but generally the weather was cloudy or dull. Temperature was considerably higher in the west than in the east.

NOTE.—The information relating to weather is indicated by the following letters—b. blue sky; bc. sky half clouded; c. sky three parts clouded; d. drizzling rain; e. wet air, without rain falling; f. fog; g. gloom; h. hail; l. lightning; m. mist; o. overcast sky; p. passing showers; q. squalls; r. rain; s. snow; t. thunder; u. ugly, threatening sky; v. visibility, unusual transparency; w. dew; x. hoar frost; z. dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O.

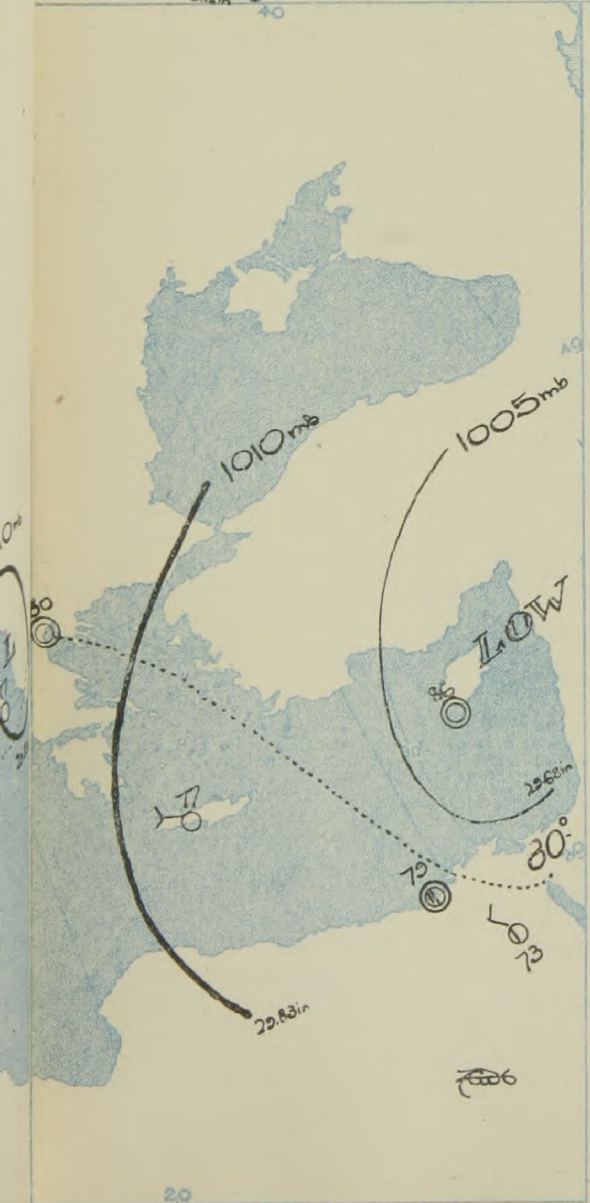

The Present Situation

The depression of yesterday moved slowly southward and became less deep during the day, while another disturbance moved westward from Denmark. This is now centred between East Anglia and Holland and is causing a prolongation of the rainy weather over the eastern and south-eastern districts generally. The high pressure on the Atlantic appears to have undergone little modification.

The General Outlook

The changes in pressure afford little indication as to the future behaviour or movements of the depression, but it seems probable that it will continue to affect the winds and weather for some time, although it may become less deep.

YESTERDAY'S WEATHER: THE 24 HOURS COMMENCING 7 h. ON FRIDAY, 3RD AUGUST.

Rain was again experienced over all the Eastern and South-Eastern parts of England and the nearer parts of the Continent, the largest measurement reported being 41 mm at Cape Gris Nez. Temperature touched 70° at some Irish and Scottish stations, but remained below 65° in most parts of England, and below 60° locally in the South-East. Except at some stations in the South-West, North-West and extreme North, there was little bright sunshine, none at most South-Eastern stations.

NOTE.—The information relating to weather is indicated by the following letters:—b, blue sky; bc, sky half clouded; c, sky three parts clouded; d, drizzling rain; e, wet air, without rain falling; f, fog; g, gloom; h, hail; l, lightning; m, mist; o, overcast sky; p, passing showers; q, squalls; r, rain; s, snow; t, thunder; u, ugly, threatening sky; v, visibility, unusual transparency; w, dew; x, hoar frost; z, dust-haze, or smoke.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at M.O.

THE MORNING OF SATURDAY, 4TH AUGUST, 1917.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0–12, is indicated by the number of feathers.

TEMPERATURE.—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

○ clear sky. ○ sky & clouded. ○ sky & clouded.

○ sky & clouded. ○ overcast sky. ● rain falling.

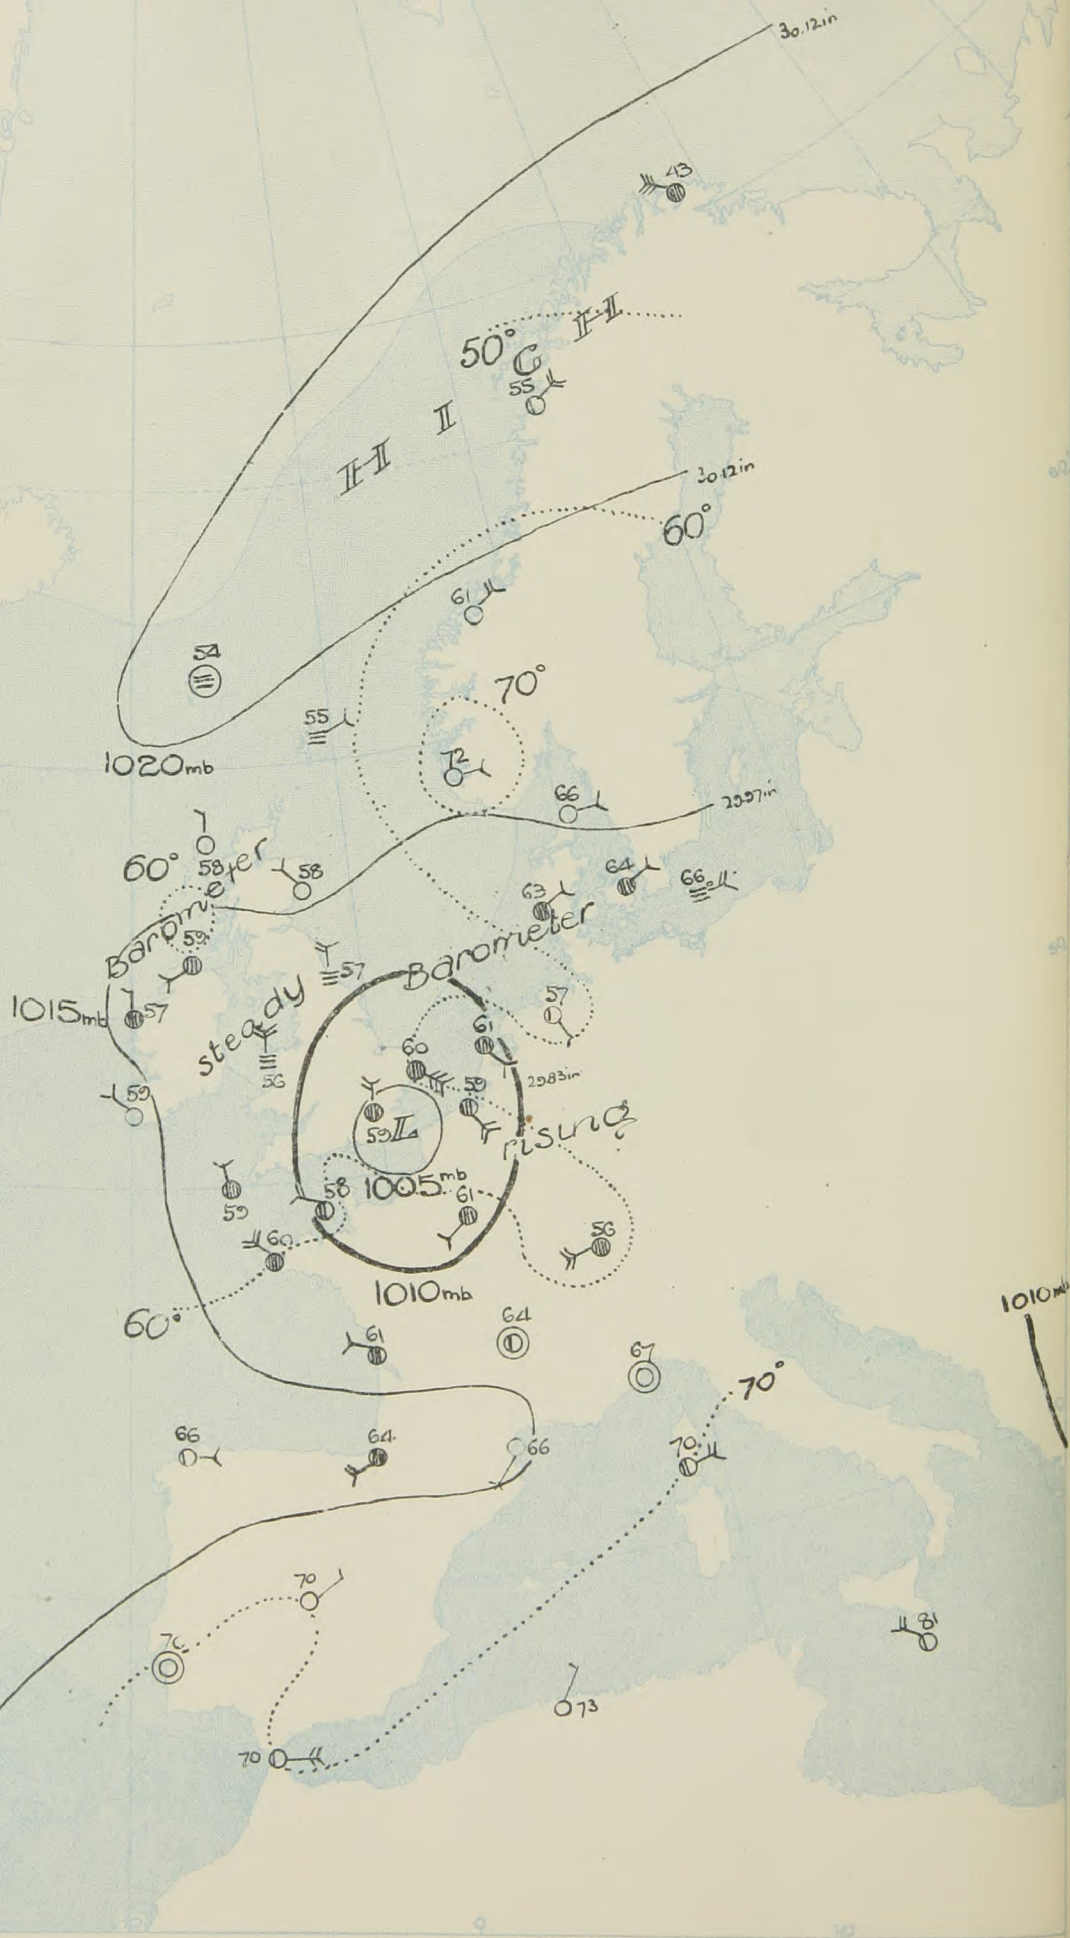

✕ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

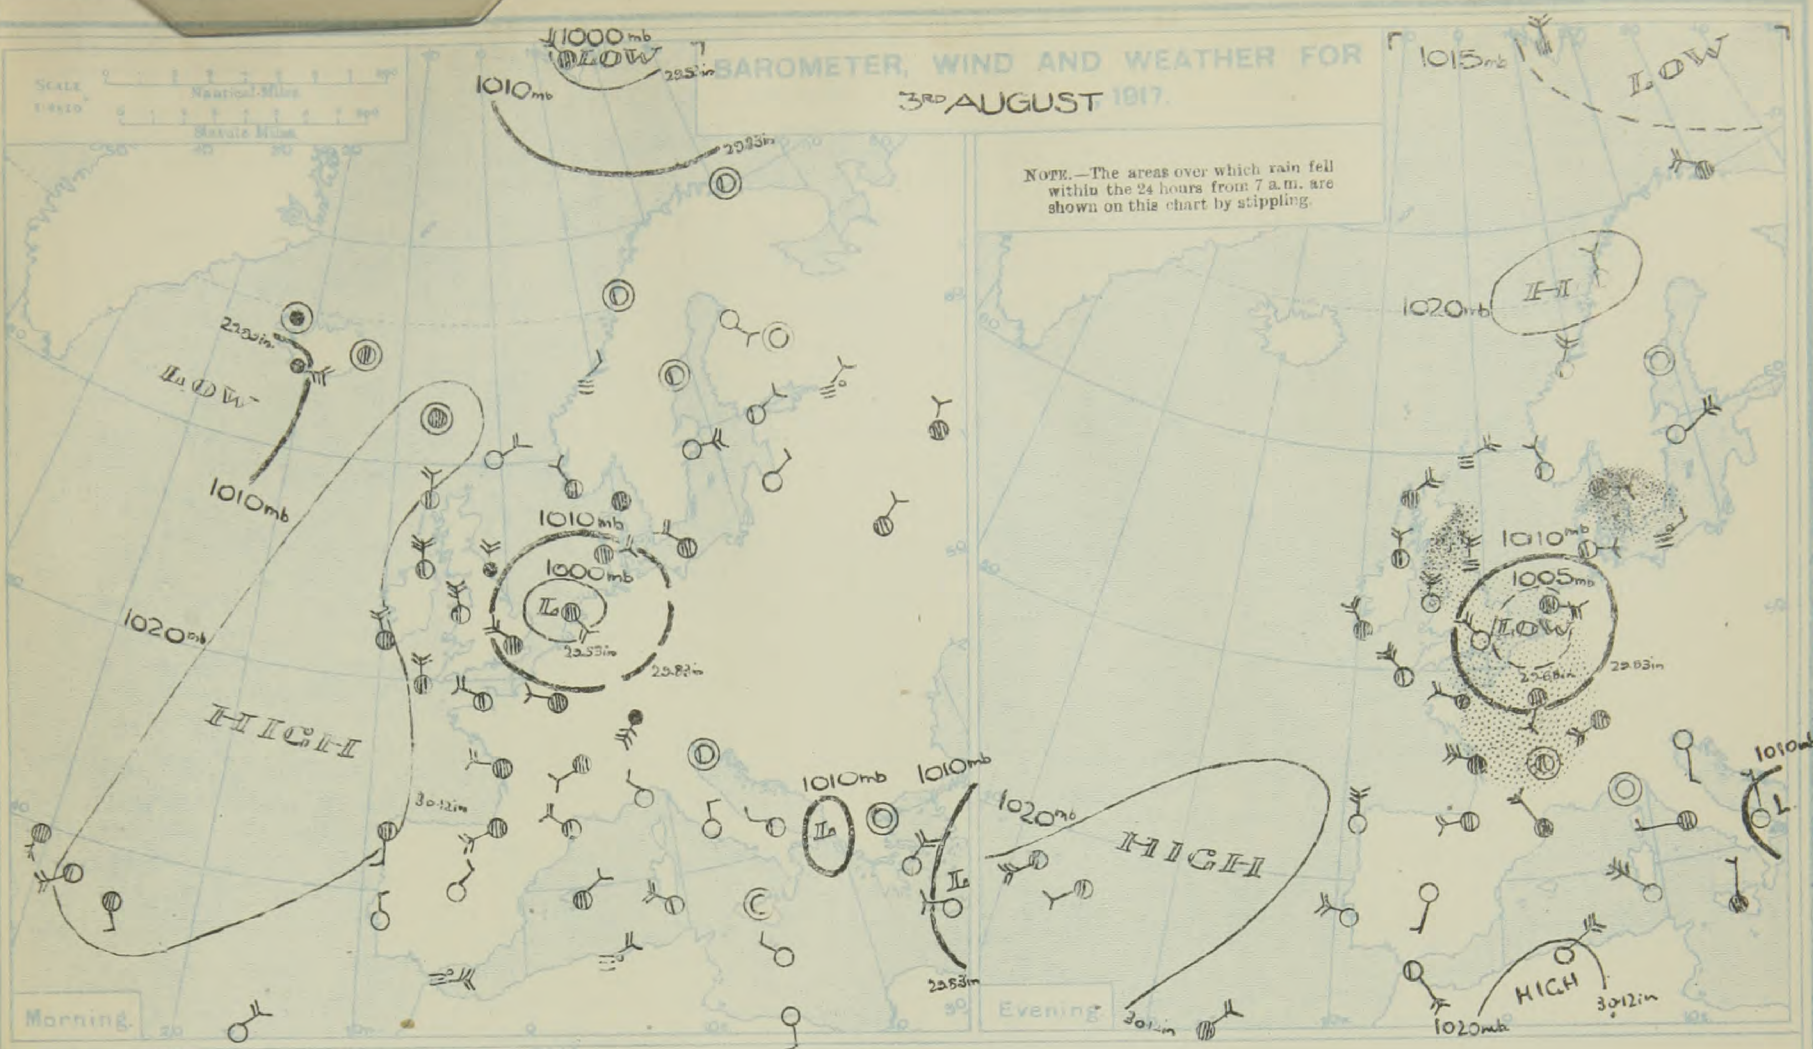

⚡, thunderstorm.

SEA DISTURBANCE.—Rough ~~~~~ High ~~~~~.

HIGH

1017.5mb

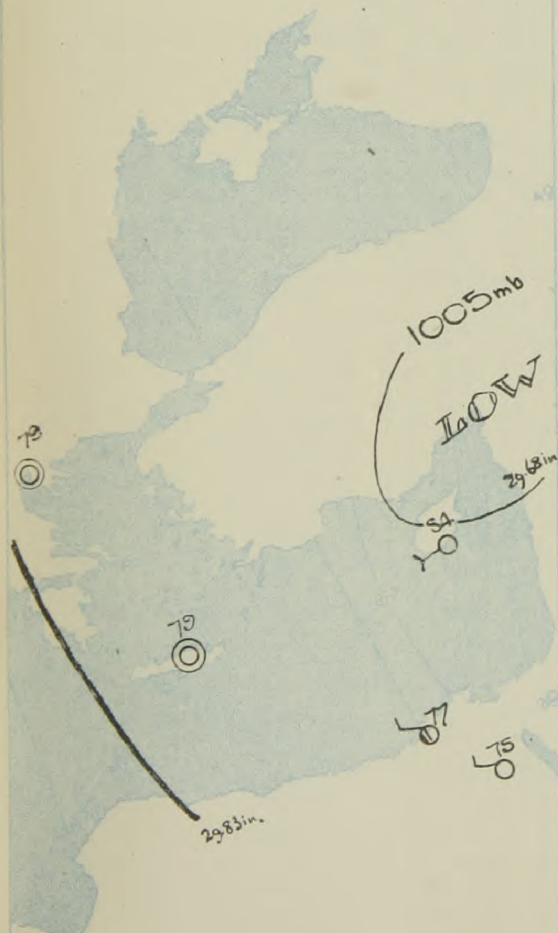

The Present Situation

A depression is centred over Kent, while the barometer has become highest over the North of Scandinavia. The barometrical gradient is less steep than of late over these Islands, and is at present tending to decrease in the vicinity of the depression.

The General Outlook

The depression which has reached the South-East of England from beyond the North Sea still appears to retain something of its tendency to move westward. Its motion is likely to be very slow, and it will cause unsettled weather with occasional rain in its neighbourhood for some time. Slight but irregular changes in pressure in the West and North-West of these Islands appear to indicate the early development of shallow depressions.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,345 SUNDAY, 5TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature rose to 70° at some northern and western stations and to above 65° over the Kingdom generally, but at stations on the north-east coast it failed to reach 60°. Showers were experienced in the south-east of England, with thunder in some parts of London. In the far west and north-west of the British Isles there was much bright sunshine, but elsewhere the duration was moderate to slight; at many places in the south the day was sunless.

FORECAST DISTRICTS.

EXPLANATION.

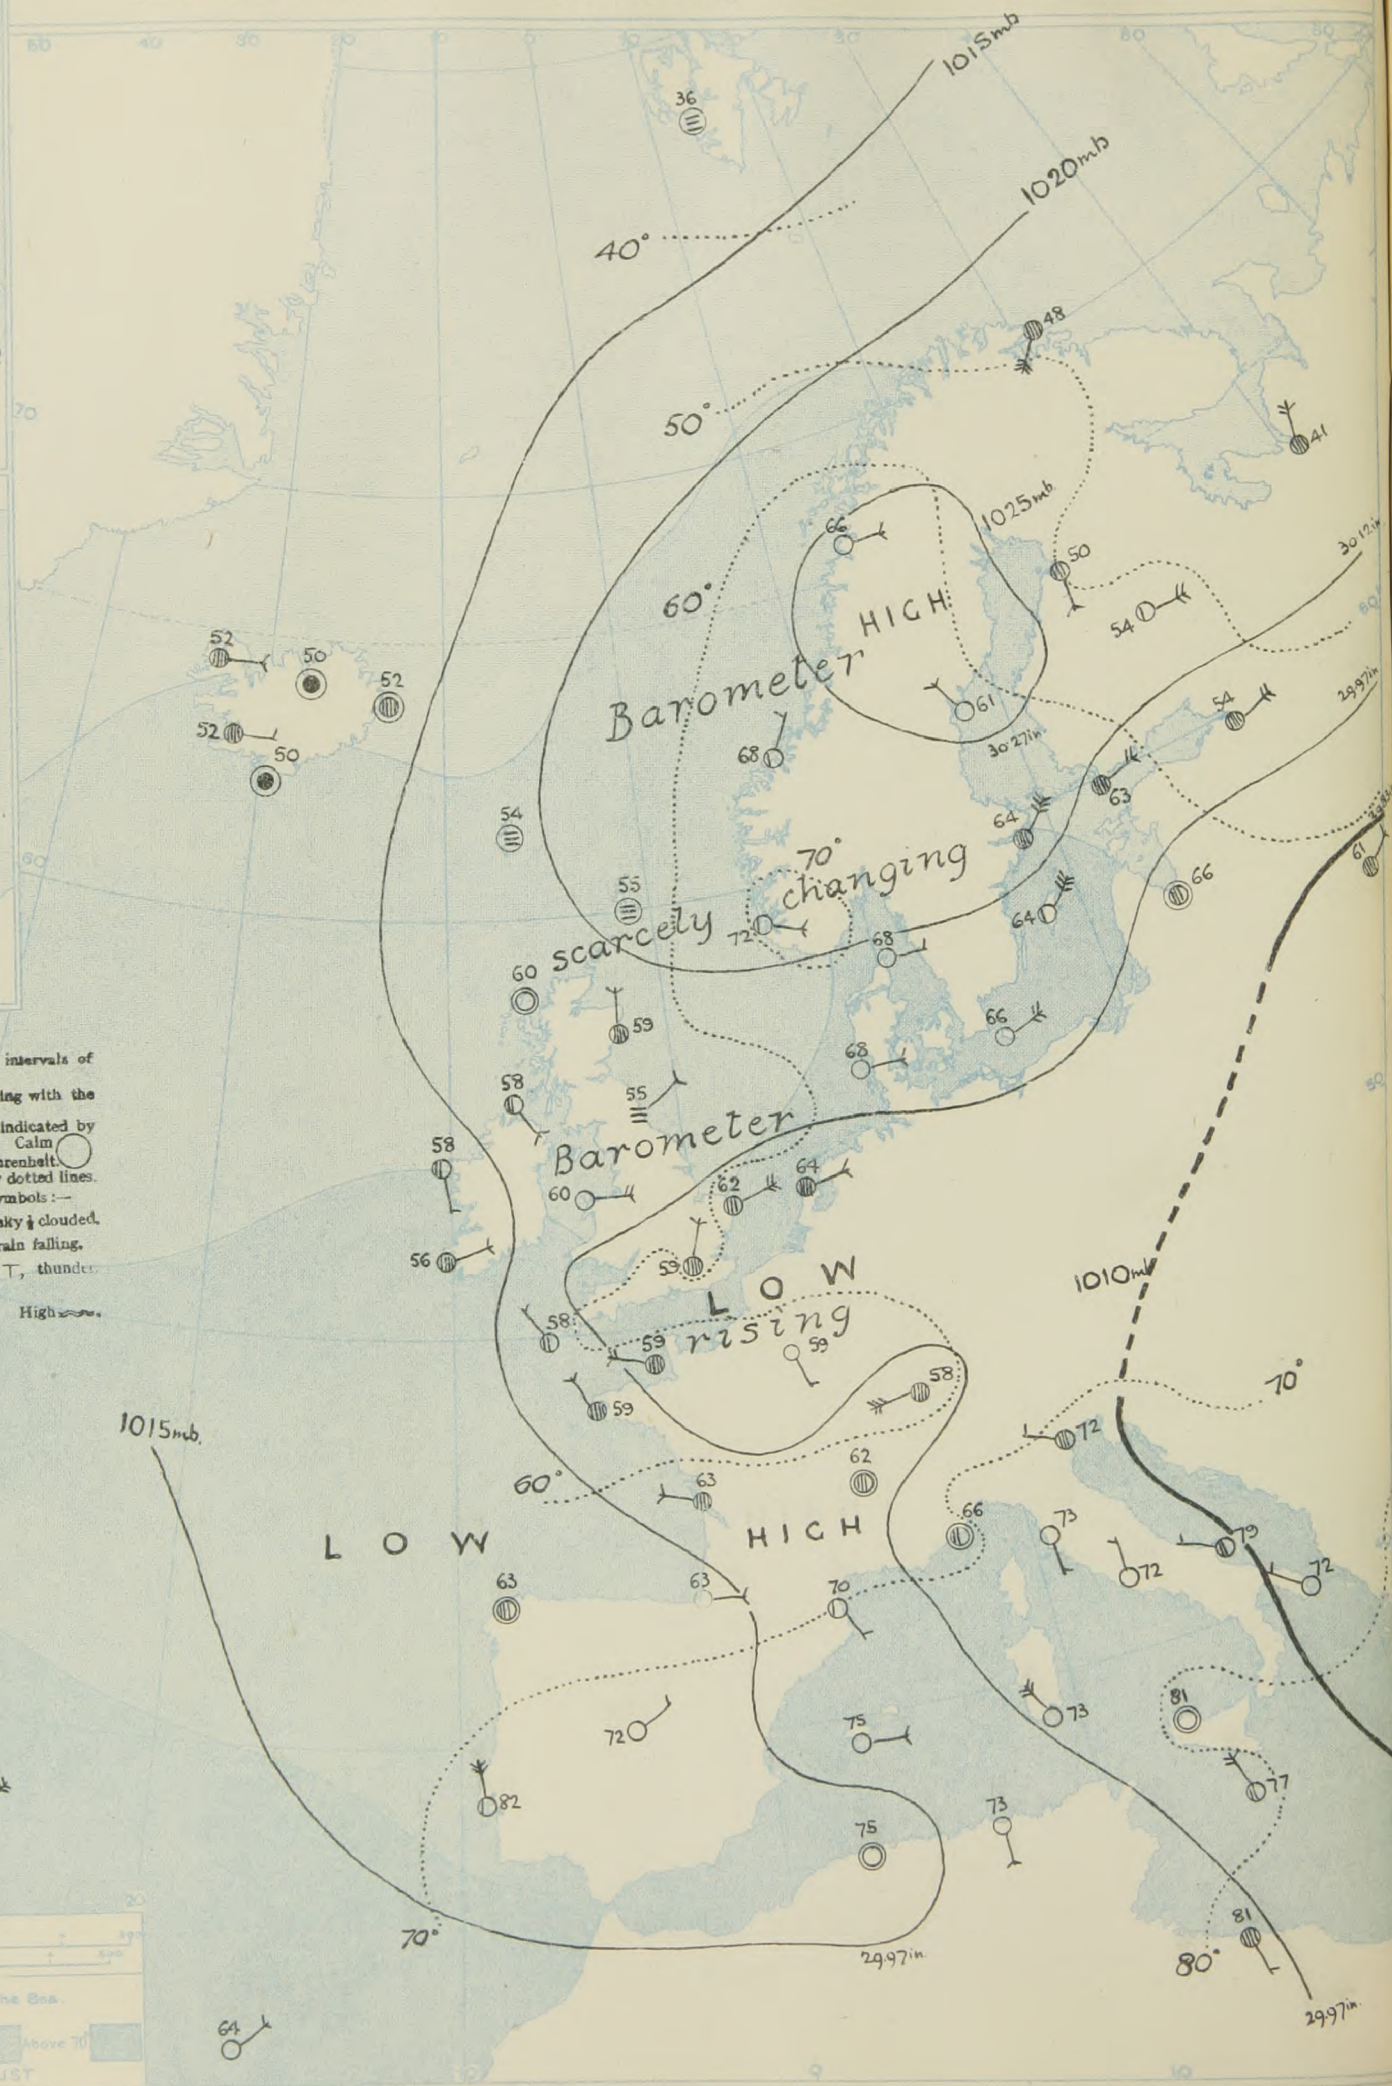

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm .

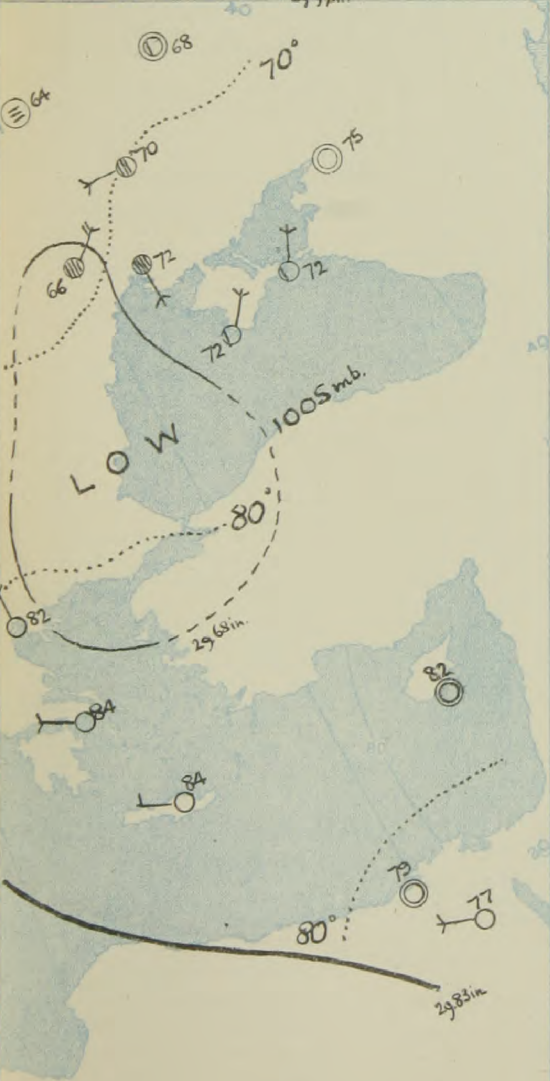

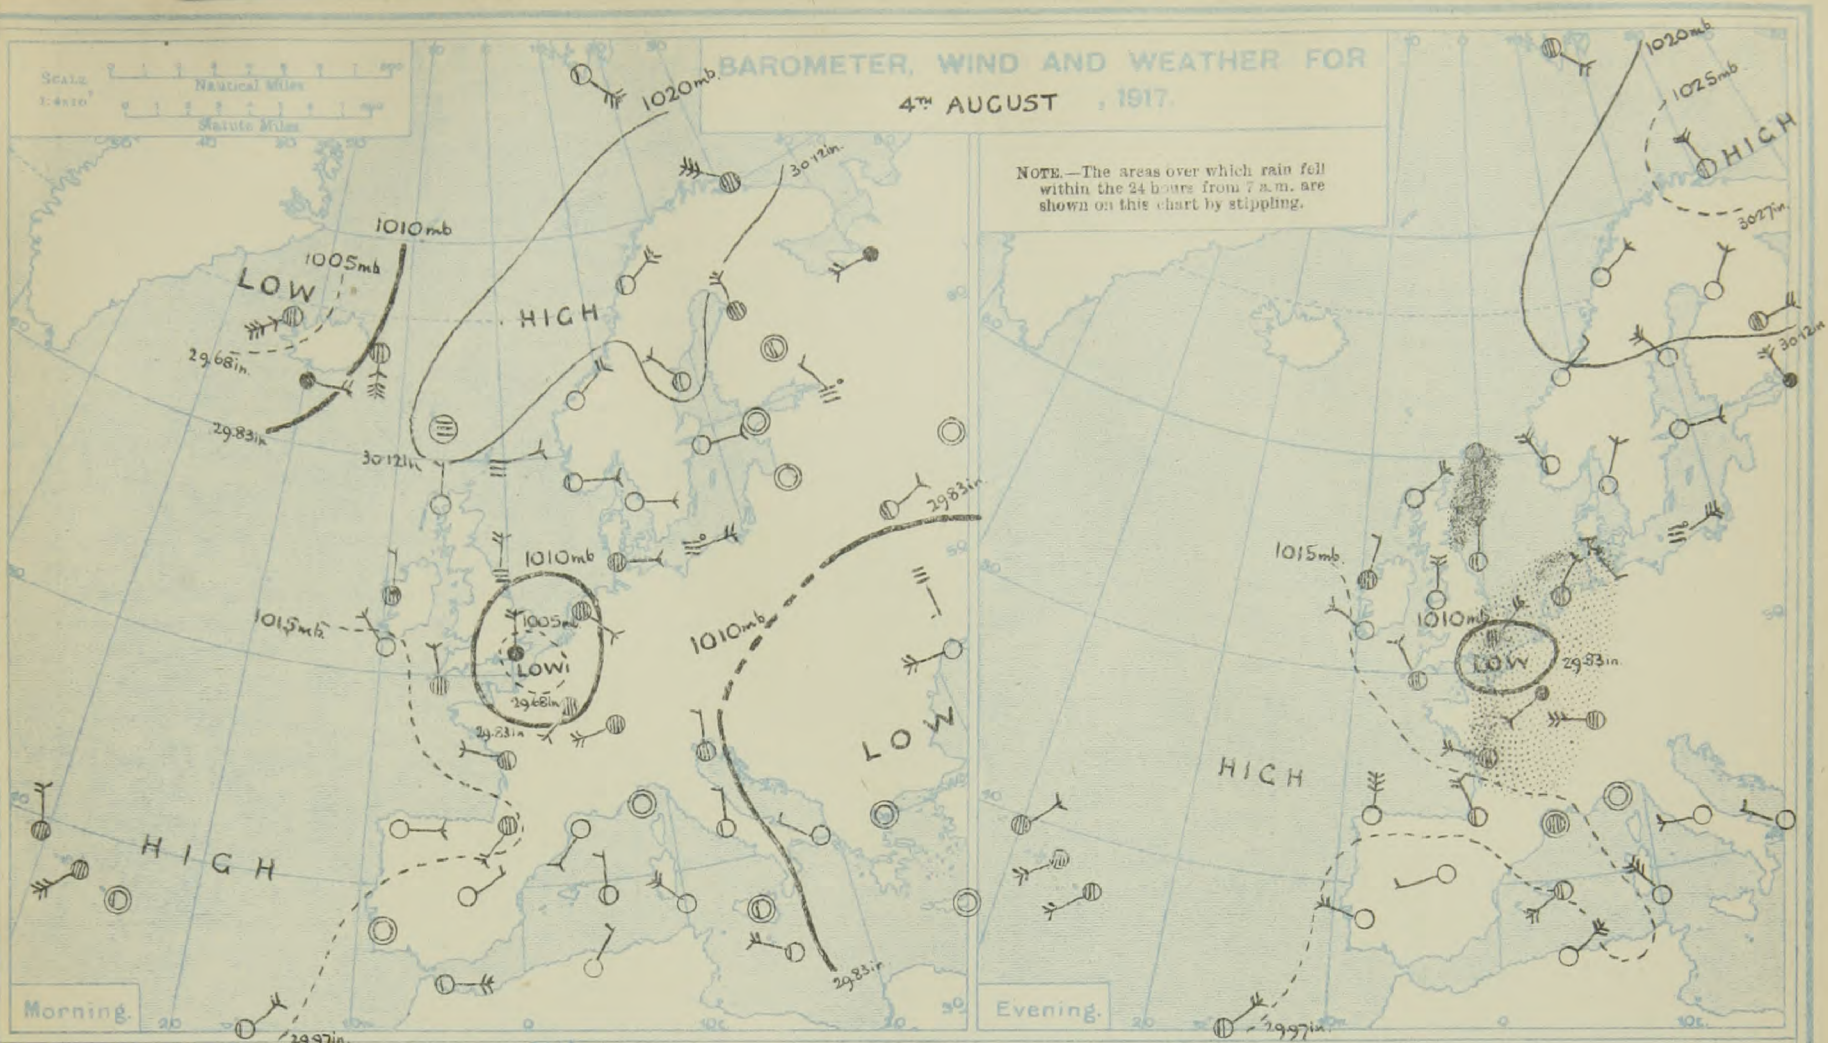

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—
 clear sky. sky & clouded. sky & clouded. overcast sky. rain falling. snow. hail. mist. thunder. thunderstorm.

SEA DISTURBANCE.—Rough High .

1917

The Present Situation at 7h. August 5th, 1917

The depression which came from the eastward is now shown centred near Havre, and the barometer is relatively low over France generally. The highest readings are in an anticyclone over Northern Scandinavia, but the barometer is nearly as high over the Azores region. A depression still exists to the westward of Ireland. Pressure is now steady or increasing slowly in nearly all regions, and the depression over France is still decreasing in intensity.

During the ensuing 24 hours there was little change in the actual height of the barometer and the general distribution of pressure. Over France and south-eastern England there was a slight rise and over Scotland and Ireland a slight fall, so that pressure became rather more uniform. Much sea fog prevailed along the eastern seaboard of Great Britain and at some places on the western coasts.

August, 6th, 1917.

No 20,346 MONDAY, 6TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4)

The maximum temperature lay for the most part between 60° and 70°, but at Birr Castle the thermometer reached 76°. At one or two stations on the East coast the sun never broke through the fog, but in general the hours of bright sunshine recorded were large, as much as 14 hours at Stornoway. The rainfall amounted to very little.

THE MORNING OF MONDAY, 6TH

AUGUST, 1917.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE

610m

FORECAST DISTRICTS

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

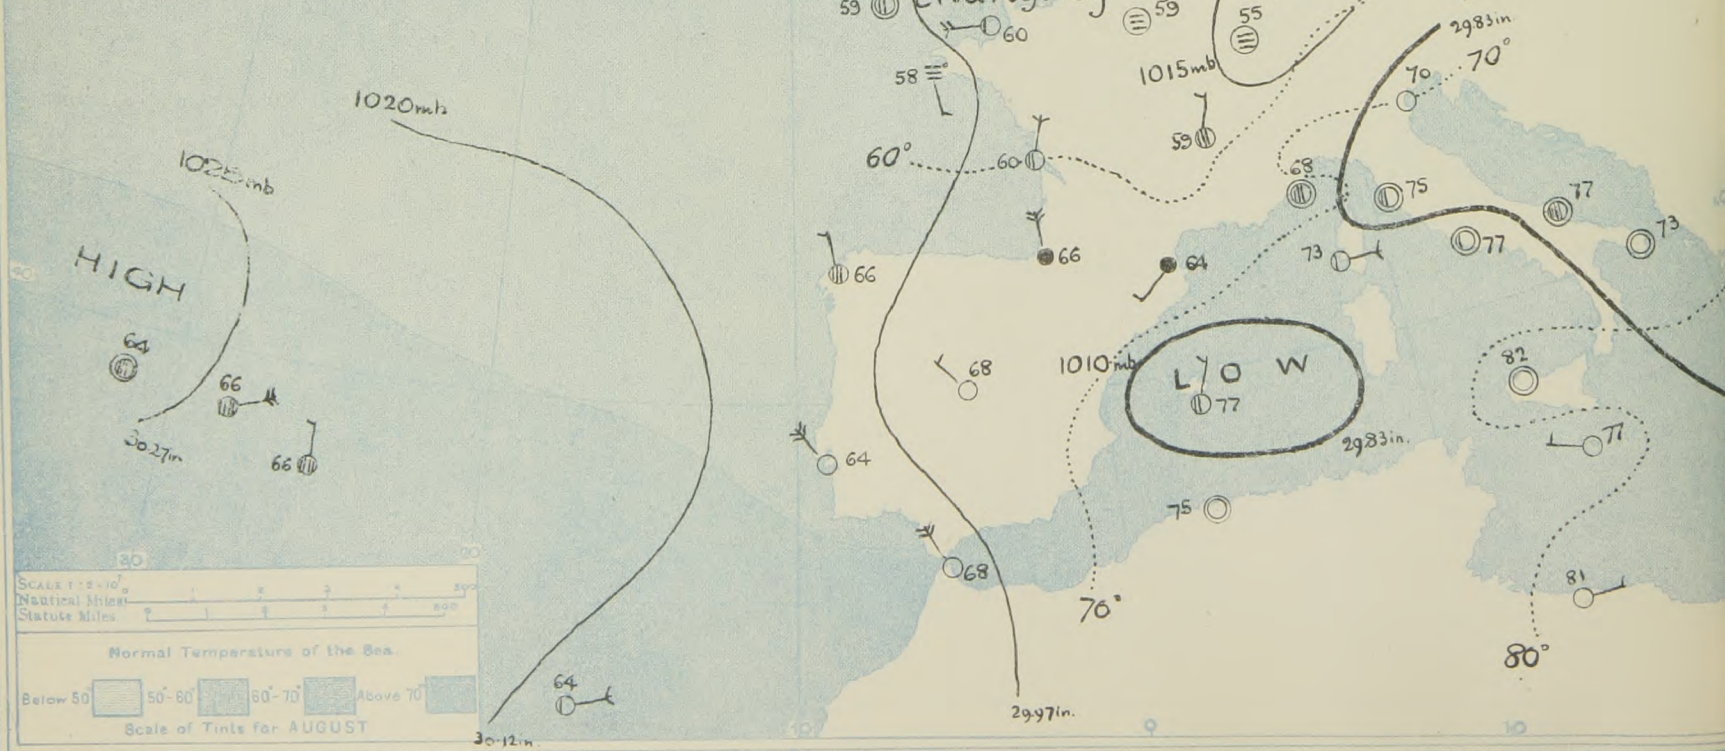

○ clear sky. ○ sky ½ clouded. ○ sky ¾ clouded.

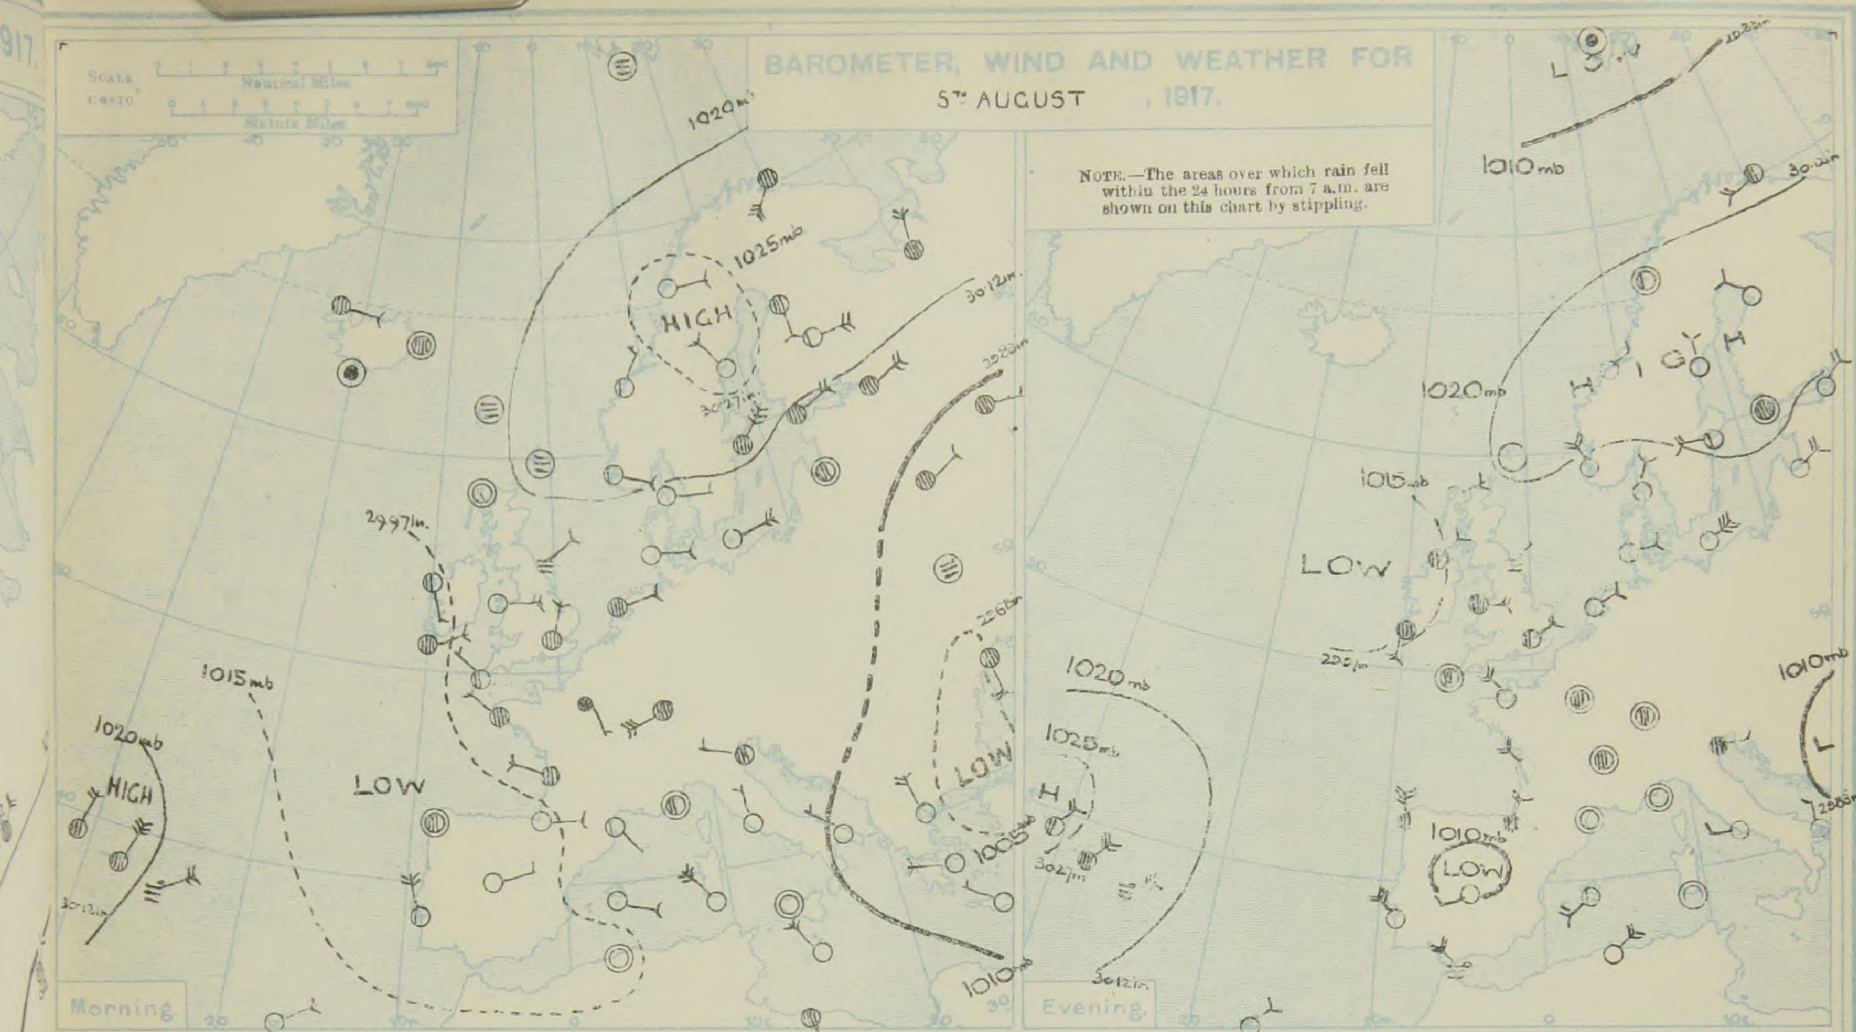

⊖ sky ¾ clouded. ⊖ overcast sky. ● rain falling.

✕ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

⚡, thunderstorm.

SEA DISTURBANCE.—Rough ~~~~ High ~~~~

Notes on the Situation at 7h. on August 6th.

Pressure is now very uniform over the British Isles. Over Scandinavia there is still an anticyclone of moderate intensity, the highest reading indicated being 1023.8 mb. at Hernösand. In the Azores pressure has risen to 1027 mb. at Santa Cruz. The Icelandic depression has advanced somewhat towards the north east. Calms or light NE. airs prevail over these Islands generally, but in the north-west the wind is southerly. Coastal fog is still widespread. Dull conditions prevail in the east, fair or fine weather on our western coasts.

During the ensuing twenty-four hours the barometer fell considerably in the western districts under the influence of low pressure out in the Atlantic, rain falling in Ireland. Anticyclonic conditions continued over the North Sea, however, with persistent fog on parts of the coast.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 29347 TUESDAY, AUG. 7TH 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature rose to over 70° in the South-East of England, and also in parts of Scotland, while 84° was reached at Nairn. Rather heavy rain fell in the West of Ireland, elsewhere there was little or none. Sunshine was very variable, up to 12.0 hours at Deerness and Pembroke.

FORECAST DISTRICTS.

EXPLANATION.

- BAROMETER.**—Isobars are drawn for intervals of five millibars.
- WIND.**—Direction is shown by arrows flying with the wind.
Force, on the scale 0–12, is indicated by the number of feathers. Calm
- TEMPERATURE.**—Given in degrees Fahrenheit.
Isotherms shown by dotted lines.
- WEATHER.**—Shown by the following symbols:—
○ clear sky. ○ sky & clouded. ○ sky & clouded.
⊙ sky & clouded. ⊙ overcast sky. ● rain falling.
✕ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.
T, thunderstorm.
- SEA DISTURBANCE.**—Rough High

The Present Situation

A depression which is slowly spreading in from the Atlantic has caused a southerly wind to prevail over the whole of Ireland and across to Holyhead. Rain is falling at Blacksod Point and weather is dull in Ireland. Over the rest of the country winds are very light and weather fine, but fog is very prevalent on our East and South-East coasts, and in the English Channel. A belt of relatively high pressure stretches from the Azores to the Bay of Biscay.

The General Outlook

The indications point to the depression spreading slowly eastward or north-eastward over the British Isles with S. or SW. winds and less settled weather.

GALES.
Duration at Extreme Force in British Isles.

BEAUFORT NOTATION.
b blue sky (not more than a quarter of the sky covered).
bc sky partly cloudy (one half covered).
c generally cloudy (three quarters covered).
d drizzle, or fine rain.
e wet air without rain falling, a copious deposit of water on trees, buildings or rigging.<

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20348 WEDNESDAY, 8TH AUGUST, 1917. 7h. C.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

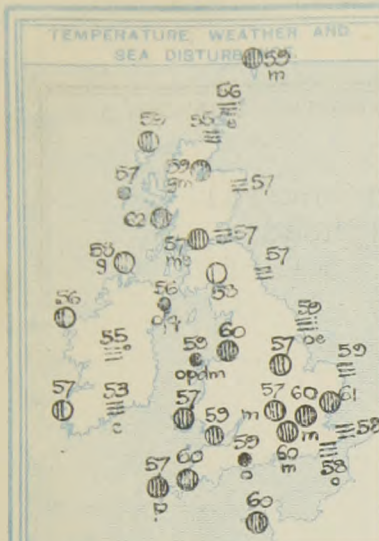

The conditions varied considerably, from sunless in several localities to as much as 11½ hours of bright sunshine at Holyhead. Afternoon temperature ranged from 59° at St. Andrews to 78° at Banff and Nottingham. Generally in the north and east the day was rainless, but in the west there was rather heavy rain, up to 22 mm. at Birr Castle. There was much fog on the coasts.

EXPLANATION.

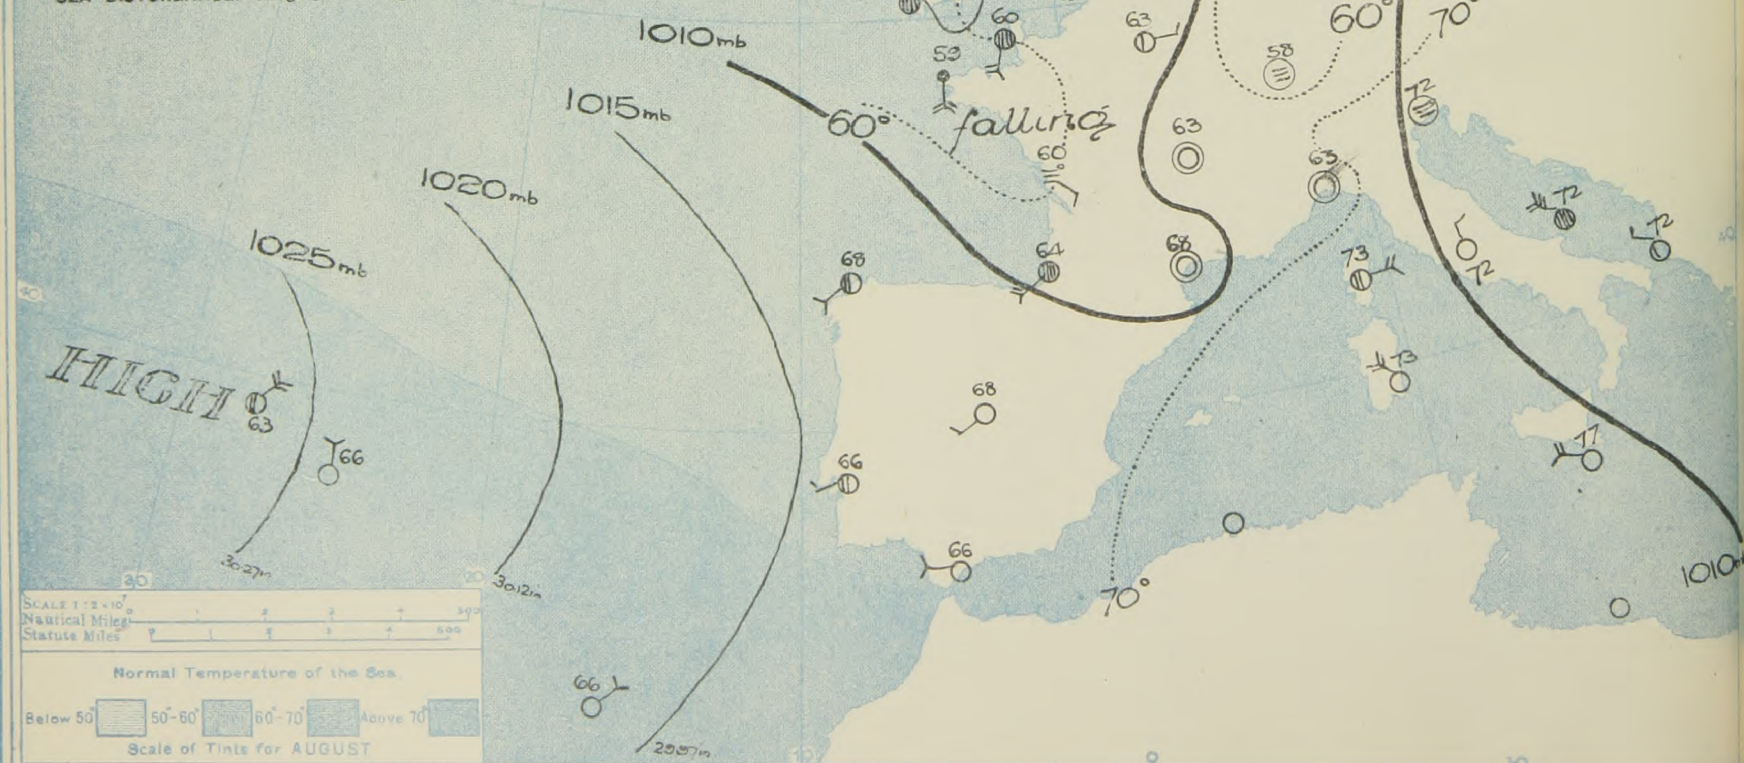

BAROMETER.—Isobars are drawn for intervals of five millibars.

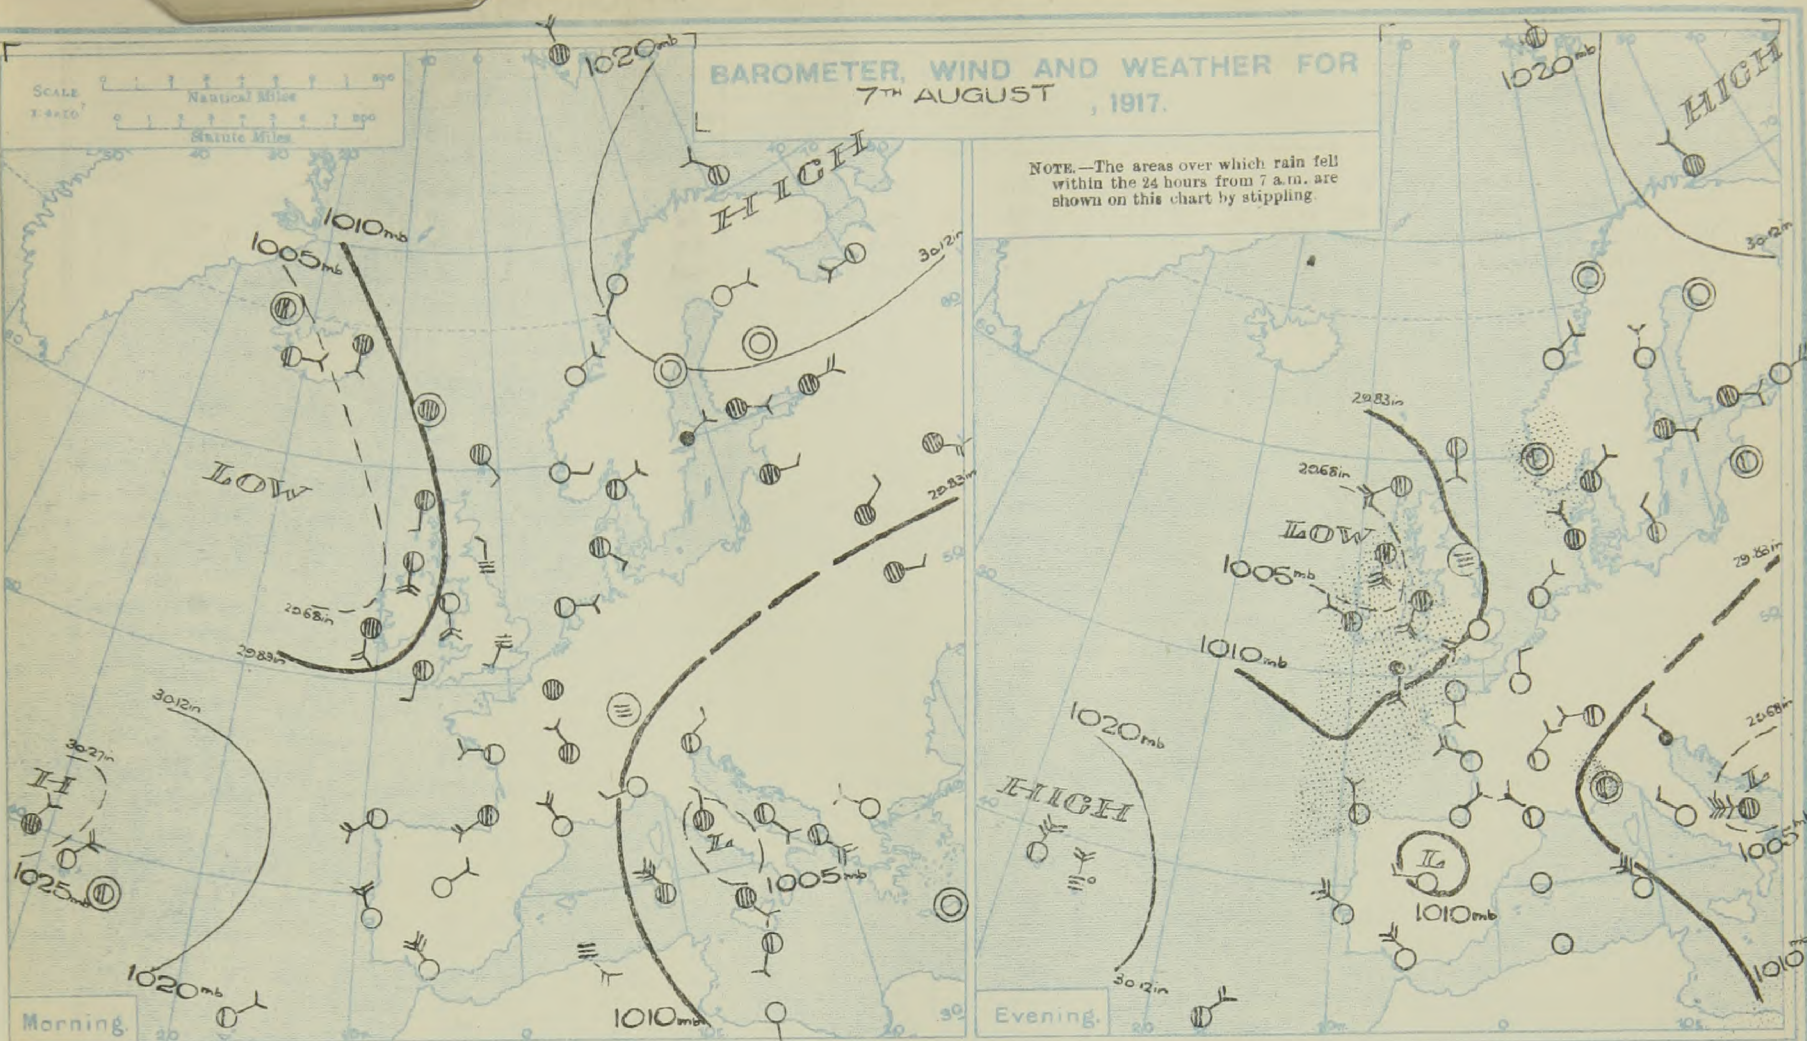

WIND. -- Direction is shown by arrows flying with the wind.
Force, on the scale 0-12, is indicated by the number of feathers. Calm

TEMPERATURE.--Given in degrees Fahrenheit.
Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols :—
 ○ clear sky. ⊙ sky $\frac{1}{2}$ clouded. ⊕ sky $\frac{1}{2}$ clouded.
 ⊗ sky $\frac{3}{4}$ clouded. ⊖ overcast sky. ☔ rain falling.
 ✕ snow. ▲ hail. ≡ fog. ≡^o mist. ⚡ thunder.

BEA DISTURBANCE.—Fough High .

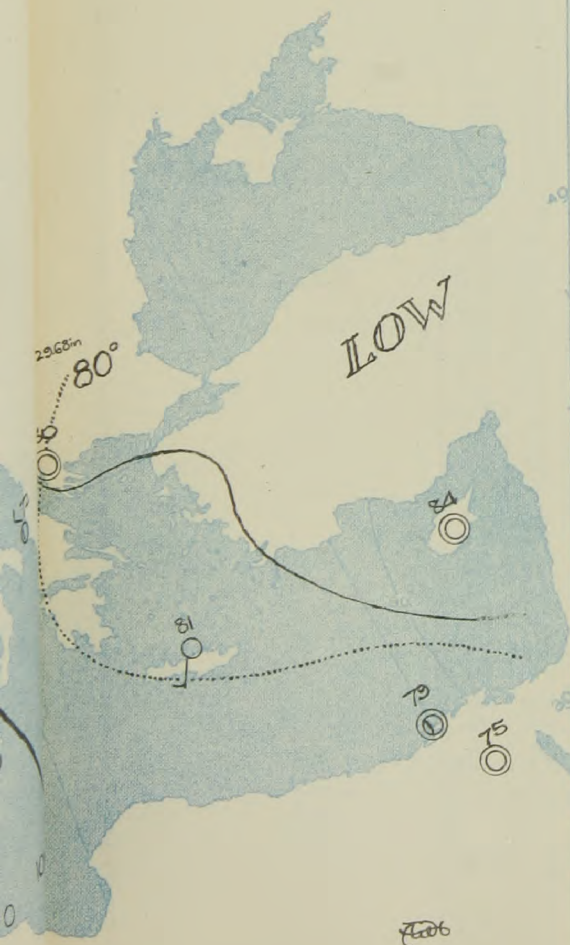

The Present Situation

The general distribution of pressure is undergoing very little modification, the depression which appeared over the North-Eastern quarter of the Atlantic on Sunday remaining stationary, but expanding slowly across the Western half of Europe, so that the pressure gradient over an extensive region has become slight. Winds from some Southerly points are general, but as a rule they are very weak, few localities feeling so much as a moderate breeze. Cloudy dullness is in the ascendant, with showers at some of the western stations, and much fog, especially down the east coast of Britain.

The General Outlook

With the continued eastward expansion of the Atlantic depression the conditions are likely to remain of an unsettled type over the British Isles generally.

LONDON		Humidity.		Sun- shine for 7th	24 HOURS ENDED 7 A.M. 8th Aug.										SOUTH KENSINGTON.					Vertical Component of Solar Radiation	

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No 20,344 ... THURSDAY, 9TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 3).

Unsettled rainy weather was general, with the rainfall ranging up to as much as 28mm. at Malin Head. Thunderstorms visited several districts. Valencia had nine hours sunshine, but as a rule there was little or none. Temperature was everywhere below the normal.

EXPLANATION.

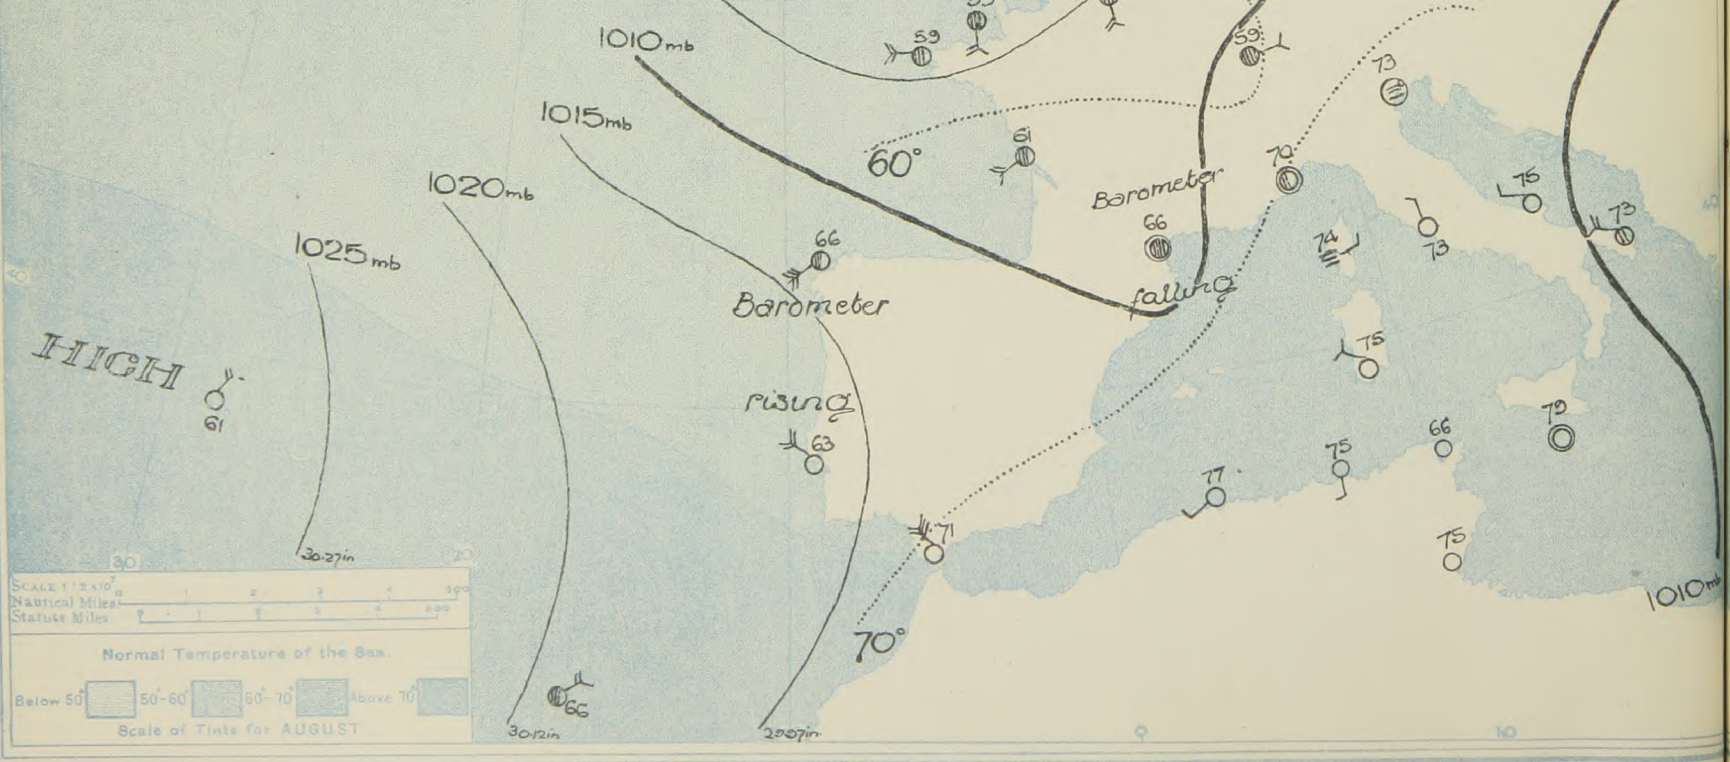

BAROMETER.—Isobars are drawn for intervals of five millibars.

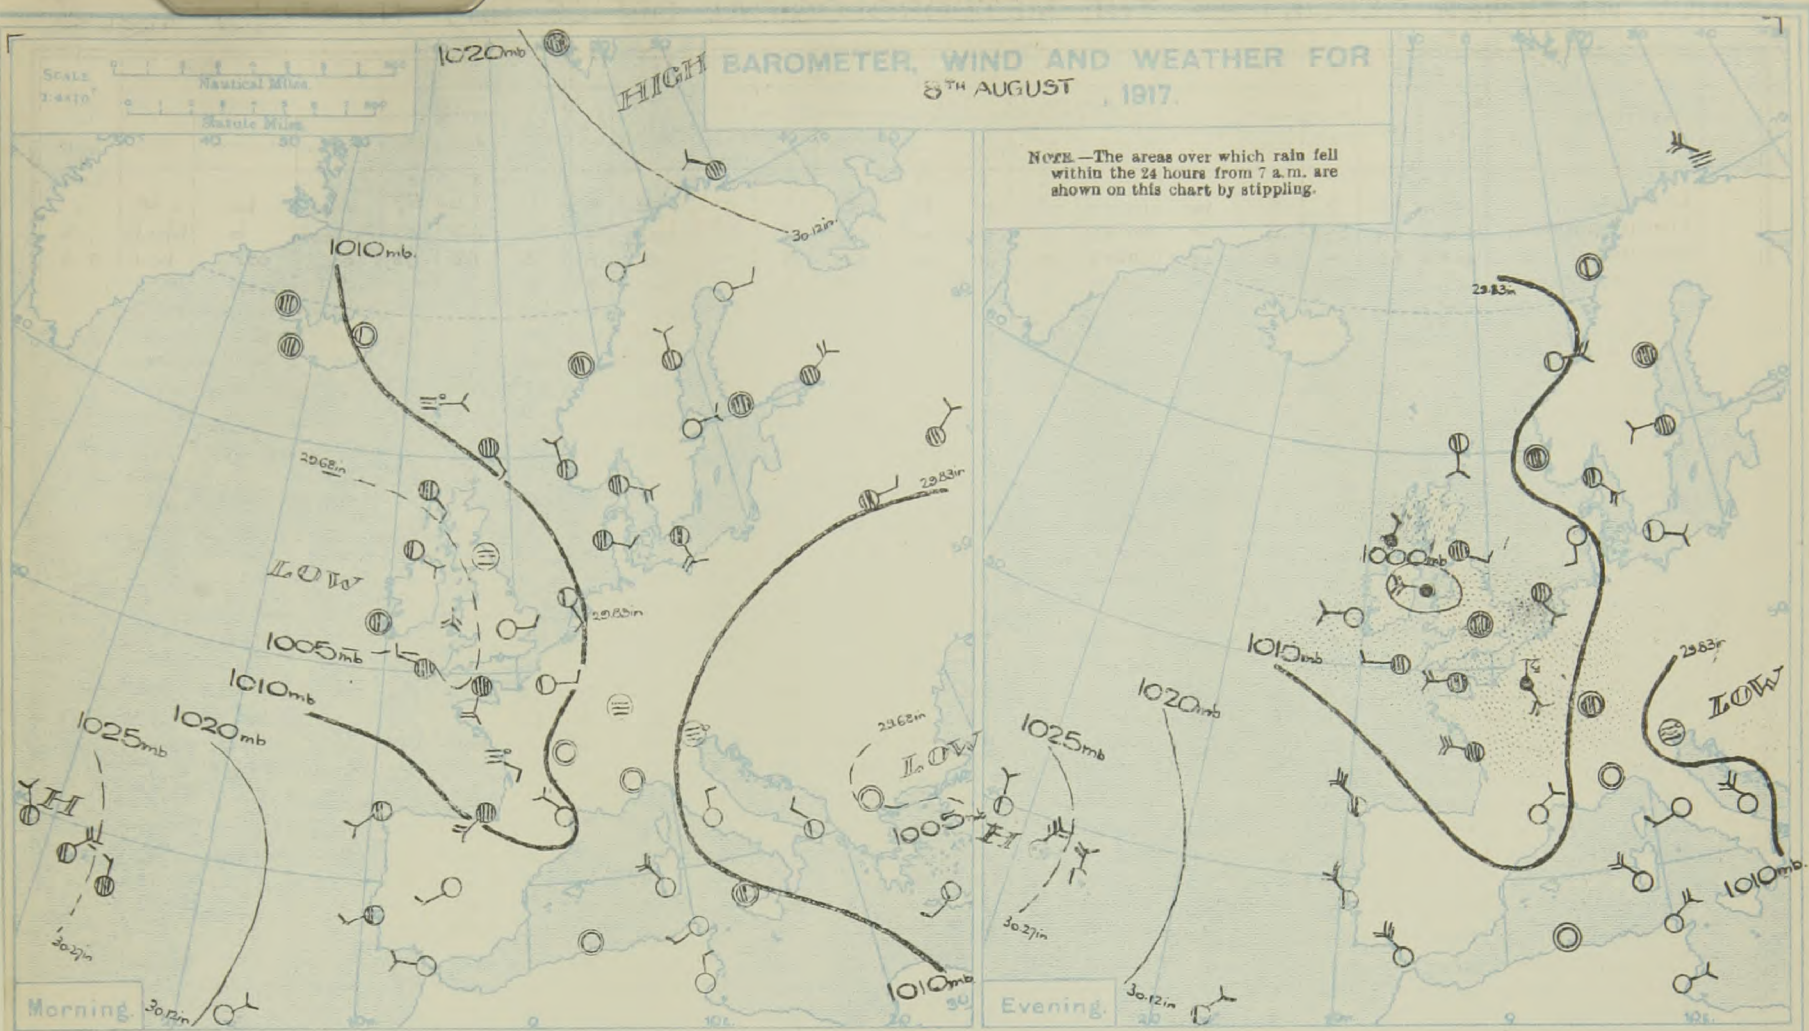

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm.

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—
 ○ clear sky. ○ sky & clouded. ○ sky & clouded.
 ○ sky & clouded. ○ overcast sky. ● rain falling.
 * snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.
 B, thunderstorm.

SEA DISTURBANCE.—Rough ~~~~ High ~~~~

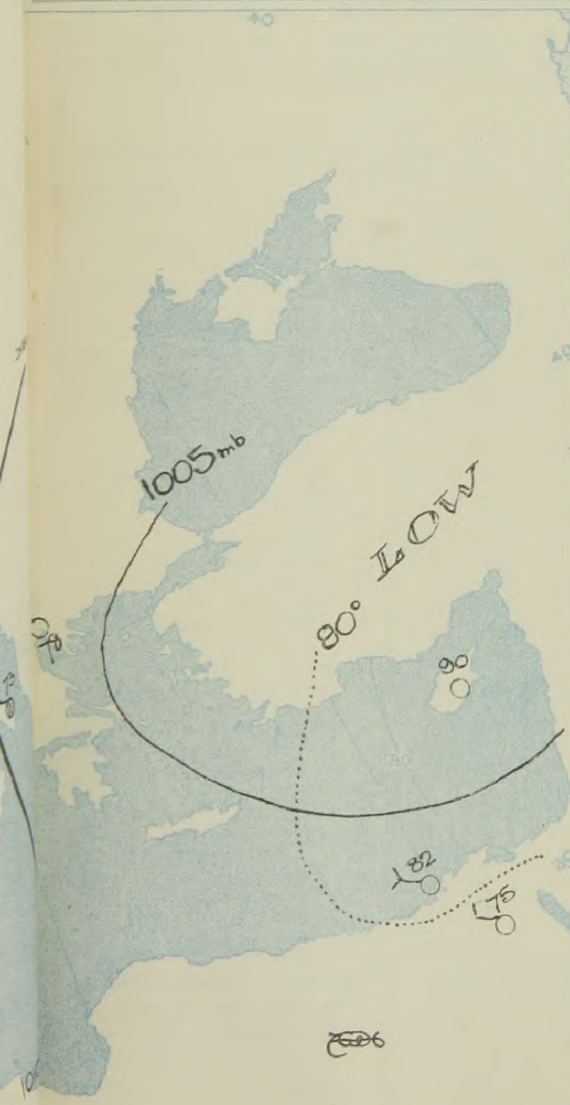

THE PRESENT SITUATION

The central space of the Atlantic depression arrived over the Irish Sea last evening, and has remained stationary since, but it has become deeper. On its northern side the barometer continues to fall, with light breezes from Easterly directions and dull to rainy weather. The anticyclone over the Azores region is maintained. In the south and south-west pressure is increasing, the gradient has also increased, and the South-Westerly wind has consequently become fresh or strong, with fair to fine clear weather.

THE GENERAL OUTLOOK.

From the tendency of the pressure variations it seems probable that the depression will drift slowly in some northerly direction, and the unsettled type of conditions will be maintained in our neighbourhood for a time.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,350 ... FRIDAY, 10TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Rain fell at nearly all stations, as much as 16 mm. at Hartland Quay. Thunderstorms visited several southern counties. Temperature reached 70° only in the Southern Hebrides. Bright sunshine was very erratic in its distribution, none in several places, 10½ to 11 hours in others.

THE MORNING OF FRIDAY, 10TH AUGUST, 1917.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers. Calm

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

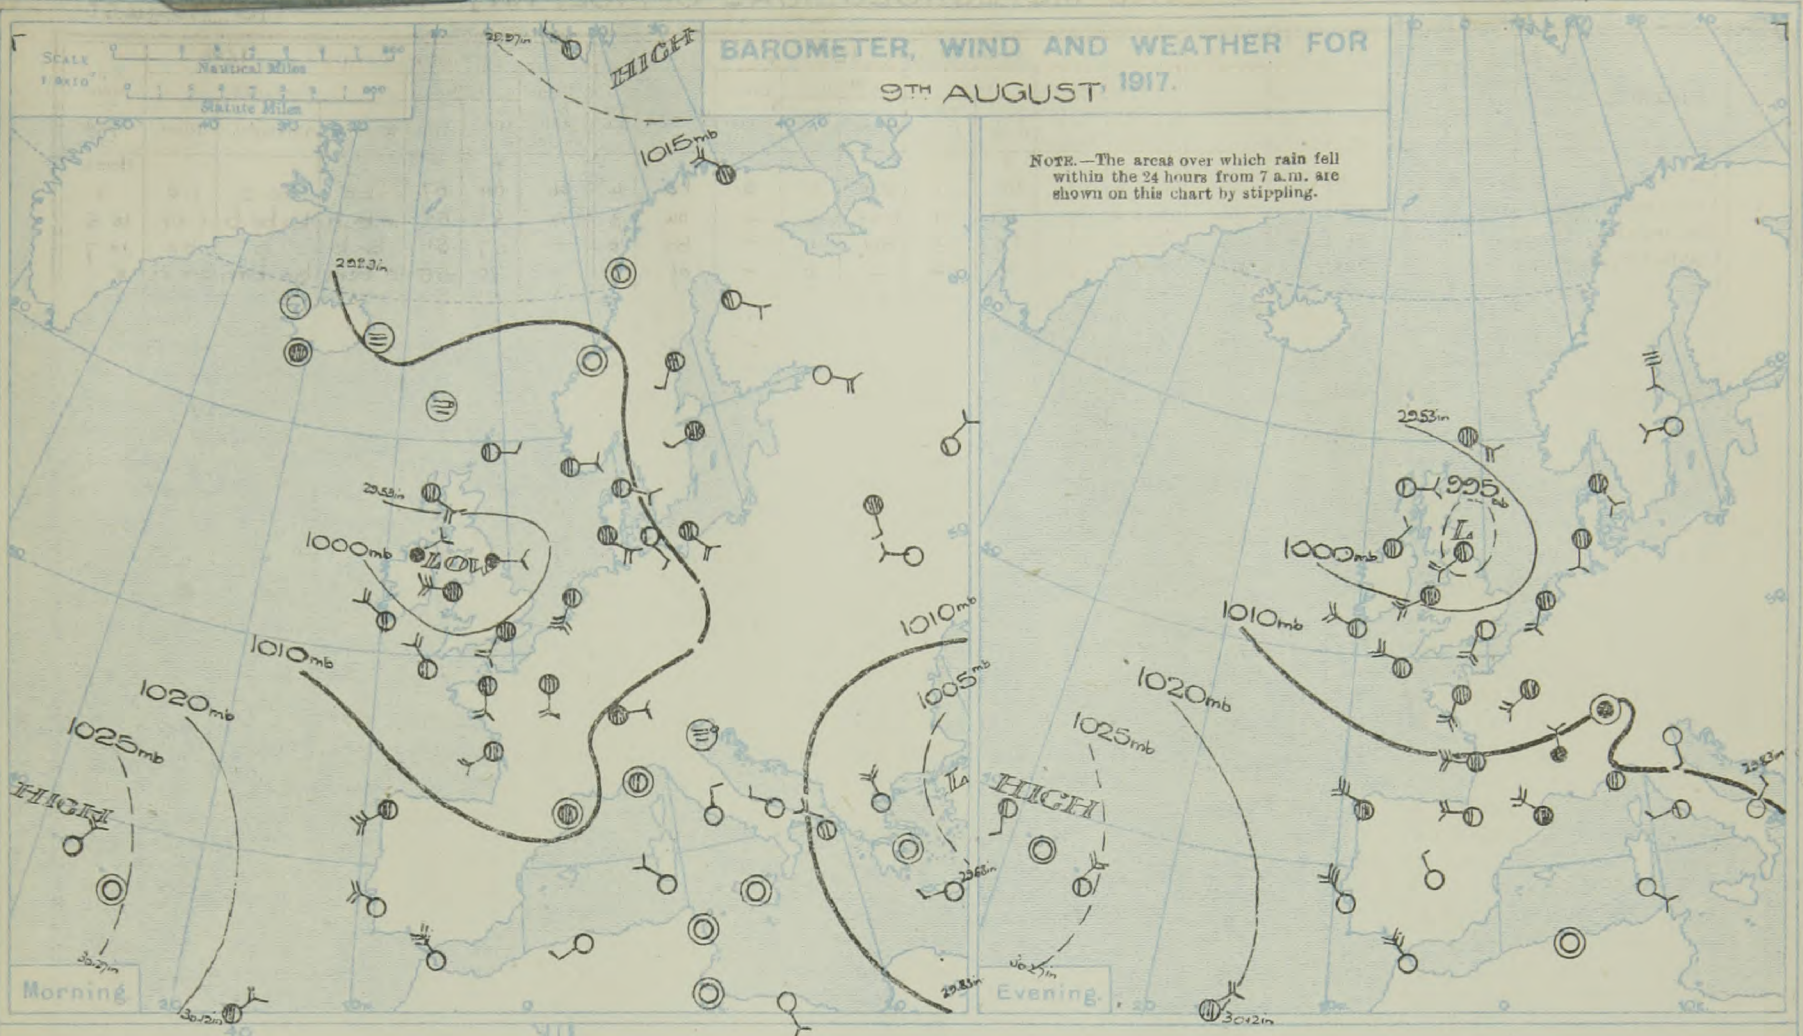

clear sky. sky 1/2 clouded. sky 3/4 clouded.

overcast sky. rain falling.

* snow. hail. fog. mist. T, thunder.

SEA DISTURBANCE.—Rough High

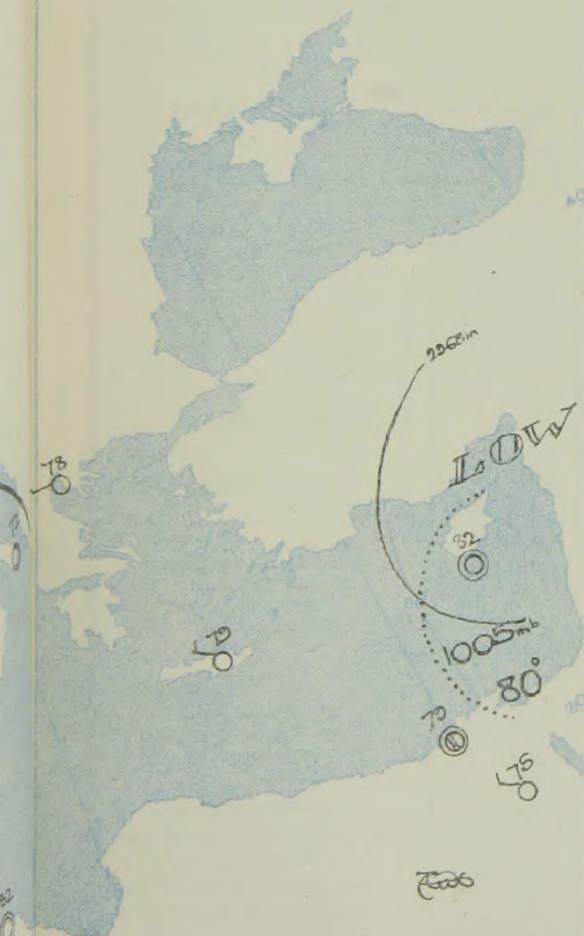

Present Situation

The very slow moving depression which during the past five days has ruled the winds and weather over the greater part of the area under observation, is now centred over Scotland, its depth not having been materially altered during the past 24 hours. It is occasioning a fresh SWly. breeze over the eastern portion of the English Channel and along the south-east coast, but in other regions light breezes from points between SW. and SE. or E. predominate. The weather in a variable state, from fine to dull, with local showers, and some coast mist or fog.

The General Outlook

Excepting on our extreme western coasts the barometer shows a general upward tendency, the tendency being for the depression to drift slowly out to the Atlantic, but its ultimate destination is very doubtful. It will probably maintain the changeable SWly. type of weather for the present.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,351

SATURDAY, 11TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Unsettled conditions were general, rain falling in most localities, heavily in Ireland, 26 mm. at Roche's Point, 48 mm. at Birr. Bright sunshine was variable, no station registering as much as ten hours. Temperature rose to about 70° in the south and east of Britain.

THE MORNING OF SATURDAY, 11TH AUGUST, 1917.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

TEMPERATURE.—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

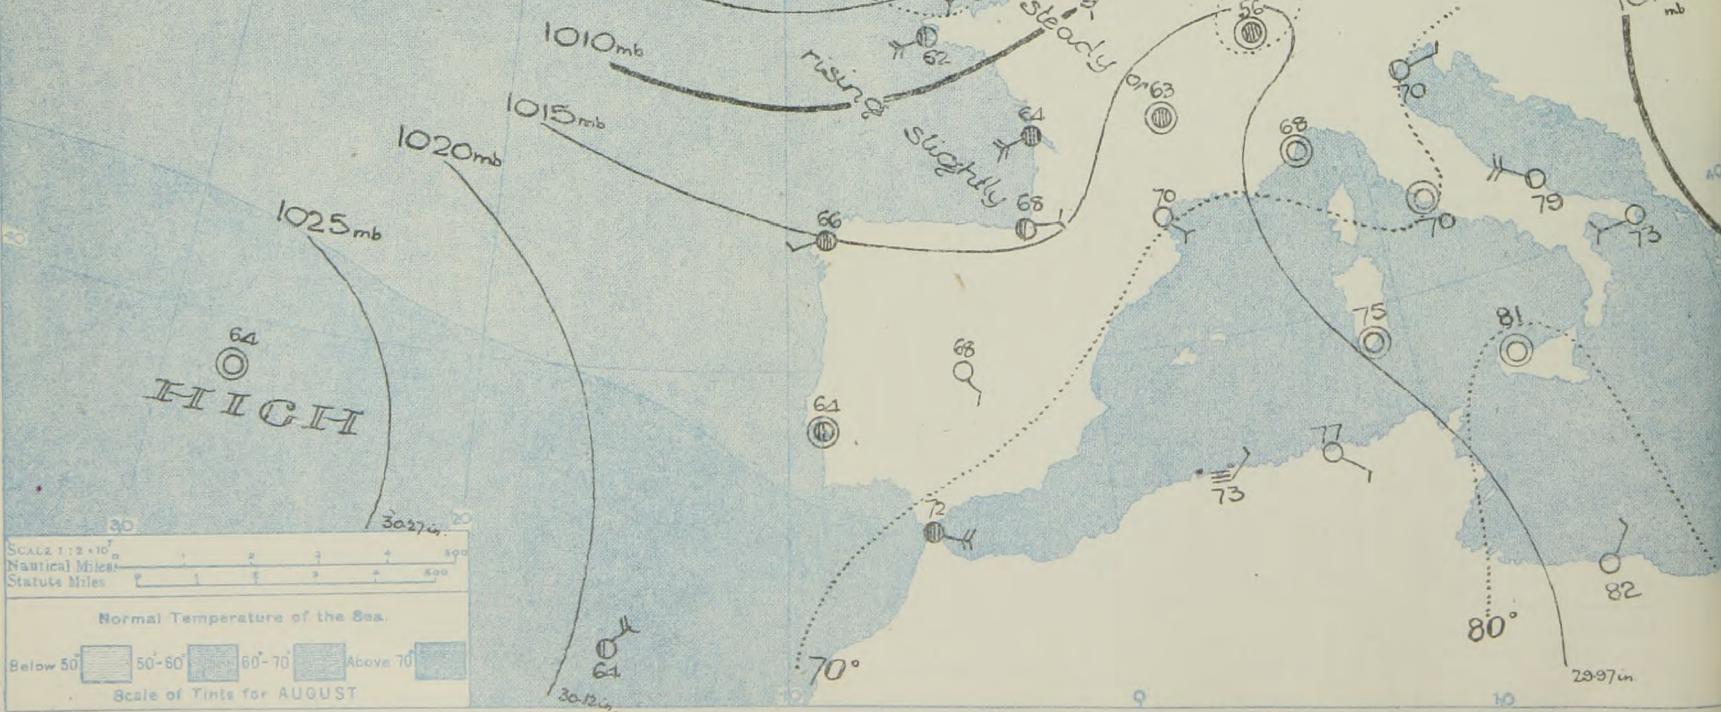

WEATHER.—Shown by the following symbols:—

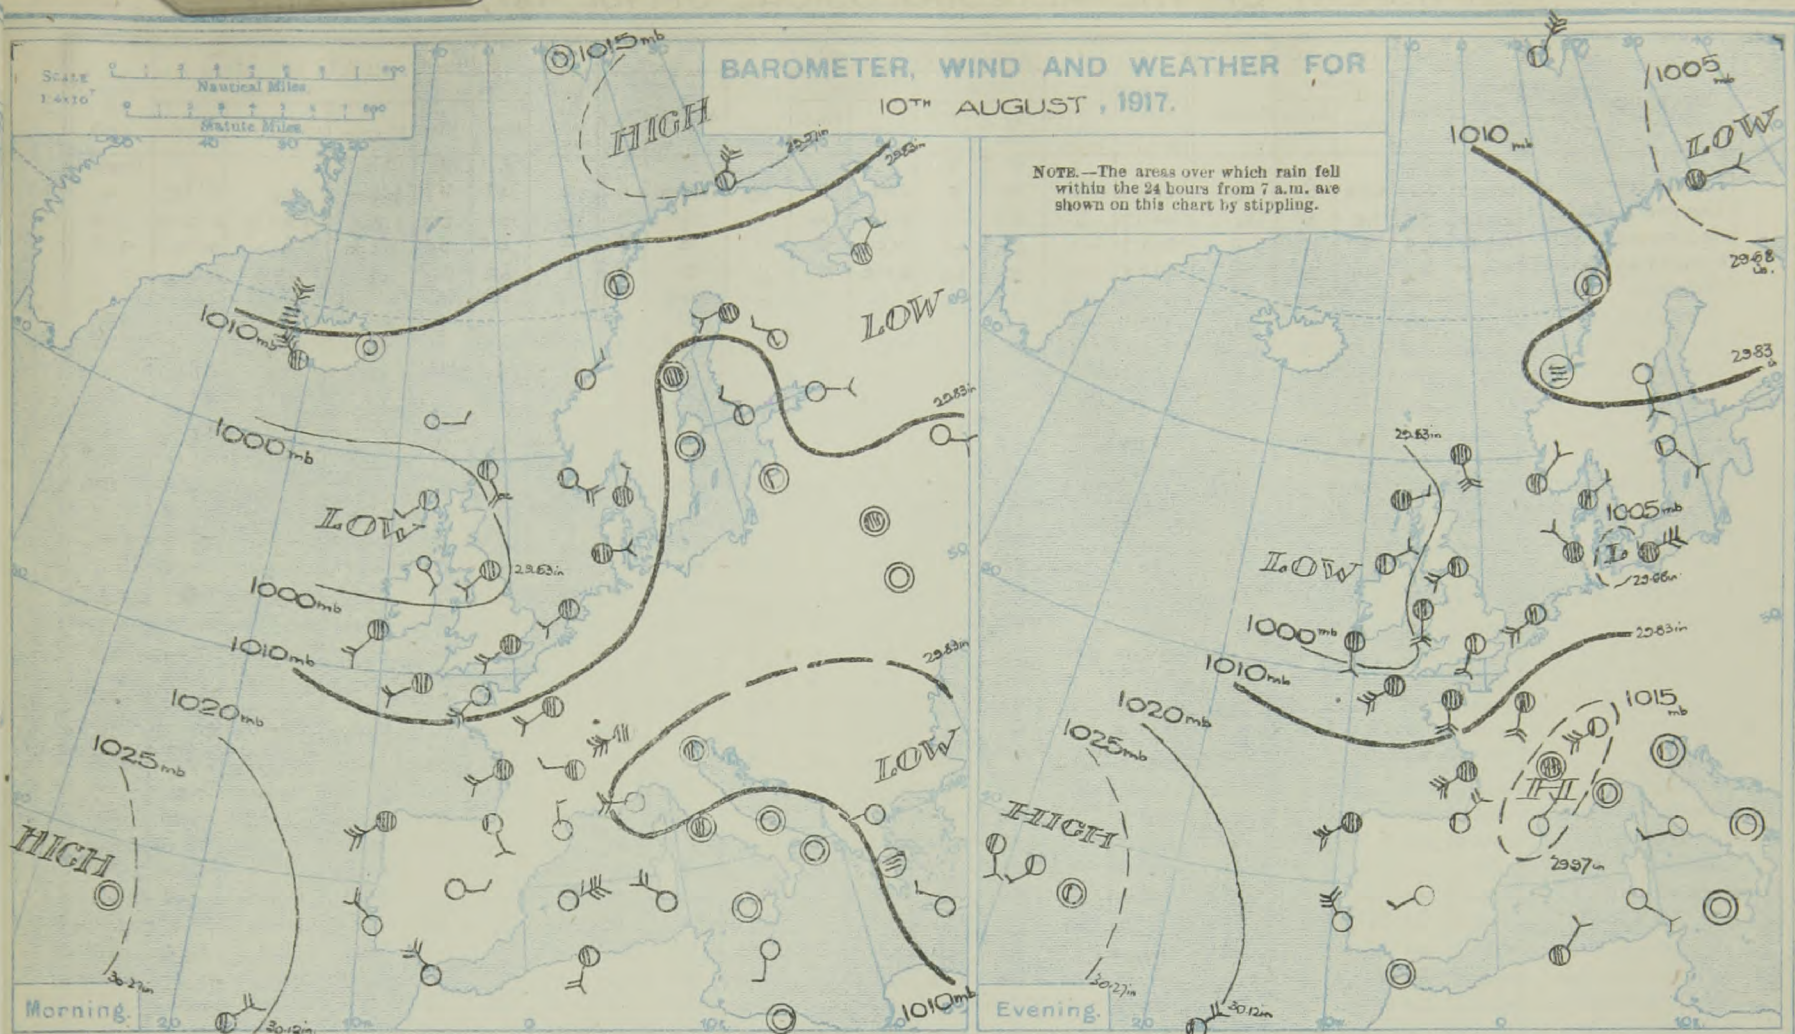

○ clear sky, ○ sky & clouded, ○ sky & clouded.

○ sky & clouded, ○ overcast sky, ○ rain falling.

* snow, ▲ hail, ≡ fog, ≡ mist, T, thunder.

SEA DISTURBANCE.—Rough, High.

The Present Situation

The recent slow-moving depression has passed out to the upper part of the Atlantic, but a small secondary disturbance on its southern margin reached the Cornish coast last evening, and in the course of the night moved northward and developed a complete cyclonic wind circulation, which is now centred over Ireland. In its south-eastern quadrant the SW. breeze blows freshly, but elsewhere light breezes prevail accompanied by variable weather, from fine to dull and showery or rainy, with mist or fog on some sections of our northern coasts.

The General Outlook

The barometer is falling along a narrow belt extending from the Hebrides across Southern Scotland and down to Holland, and on both sides of the belt there is a rising tendency. These changes afford no indication of the future movement of the system, but probably it will remain in our neighbourhood for a time, maintaining the unstable type of weather.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,352. ... Sunday, 12th August, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature rose to 70° in some parts of Eastern and Southern England, but only to about 60° in the extreme West and North of the United Kingdom. Rain fell in most districts and thunderstorms occurred locally; at Eskdalemuir the rain measured 32 mm. and at Birr Castle 20 mm. The records of bright sunshine were fair to rather high generally in England, but low in Ireland and Scotland.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm.

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

○ clear sky. ○ sky & clouded. ○ sky & clouded.

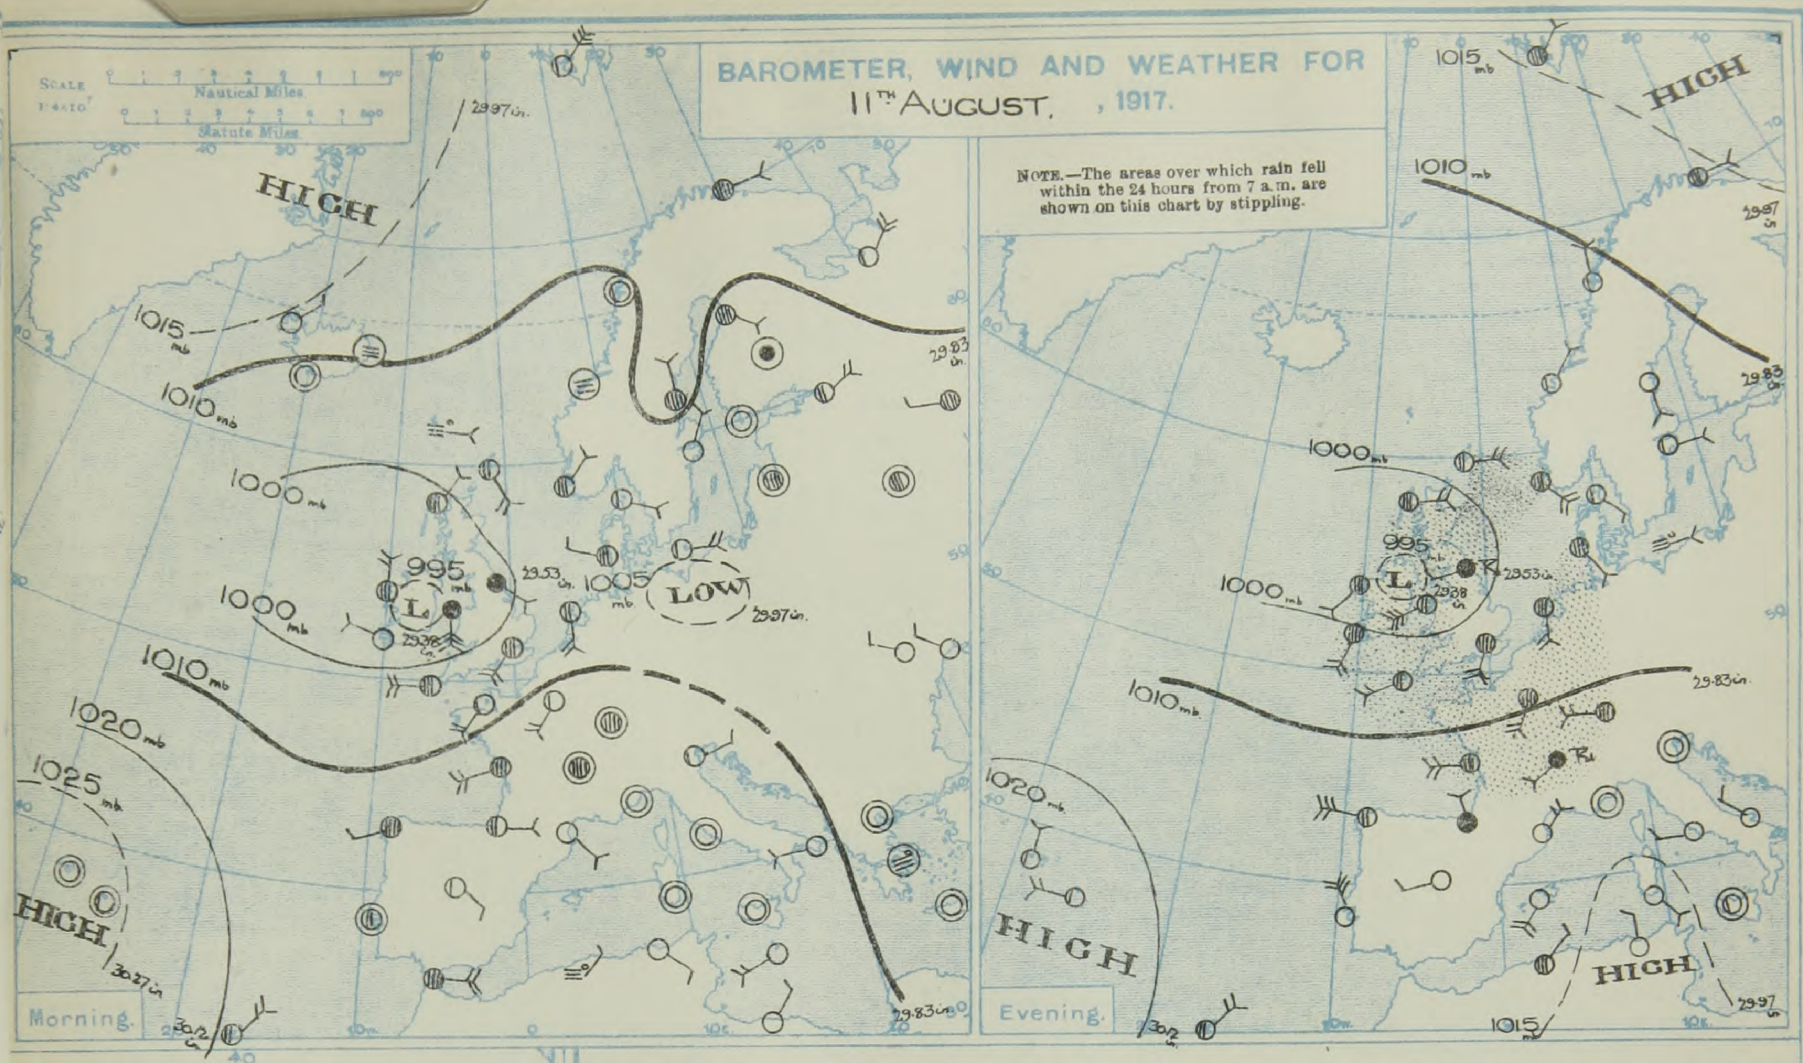

○ sky & clouded. ○ overcast sky. ● rain falling.

* snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

FX, thunderstorm.

SEA DISTURBANCE.—Rough. High.

The Present Situation at 7h. on 12th August.

The small depression which arrived on the Cornish coast on Friday evening has followed an irregular path to the northward deepening as it advanced. It is now passing out to the Upper Atlantic, off the west of Scotland. A general but slow rise of ^{the} barometer is taking place over the British Isles and an anticyclone of slight intensity is forming over Southern France and Switzerland. The anticyclone in the neighbourhood of the Azores has decreased somewhat in intensity. Light breezes between E. and S. prevail over Scotland, and light to moderate SW.-S. in most other regions. Over an extensive region the weather is much finer than might have been expected in the circumstances, but showers are falling at a few of our Western and Northern stations, and at Lyons.

In the Mediterranean region an anticyclone is situated between Rome and Tripoli, pressure decreasing thence eastward to a depression over Cyprus and Syria, fine summer weather being general.

BEAUFORT NOTATION.

b blue sky (not more than a quarter of the sky covered).
bc sky partly cloudy (one half covered).
c generally cloudy (three quarters covered).
d drizzle, or fine rain.
e wet air without rain falling, a copious deposit of water on trees, buildings or rigging.
f fog.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,353 .. Monday, 13th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Showers or moderate rains fell in nearly all localities, 15 mm. at Blacksod. There were a few sporadic thunderstorms. Bright sunshine was very variable, ranging up to 11 hours at Yarmouth. Temperature rose to about 70° in most parts of England.

THE MORNING OF

MONDAY, 13TH

AUGUST, 1917.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

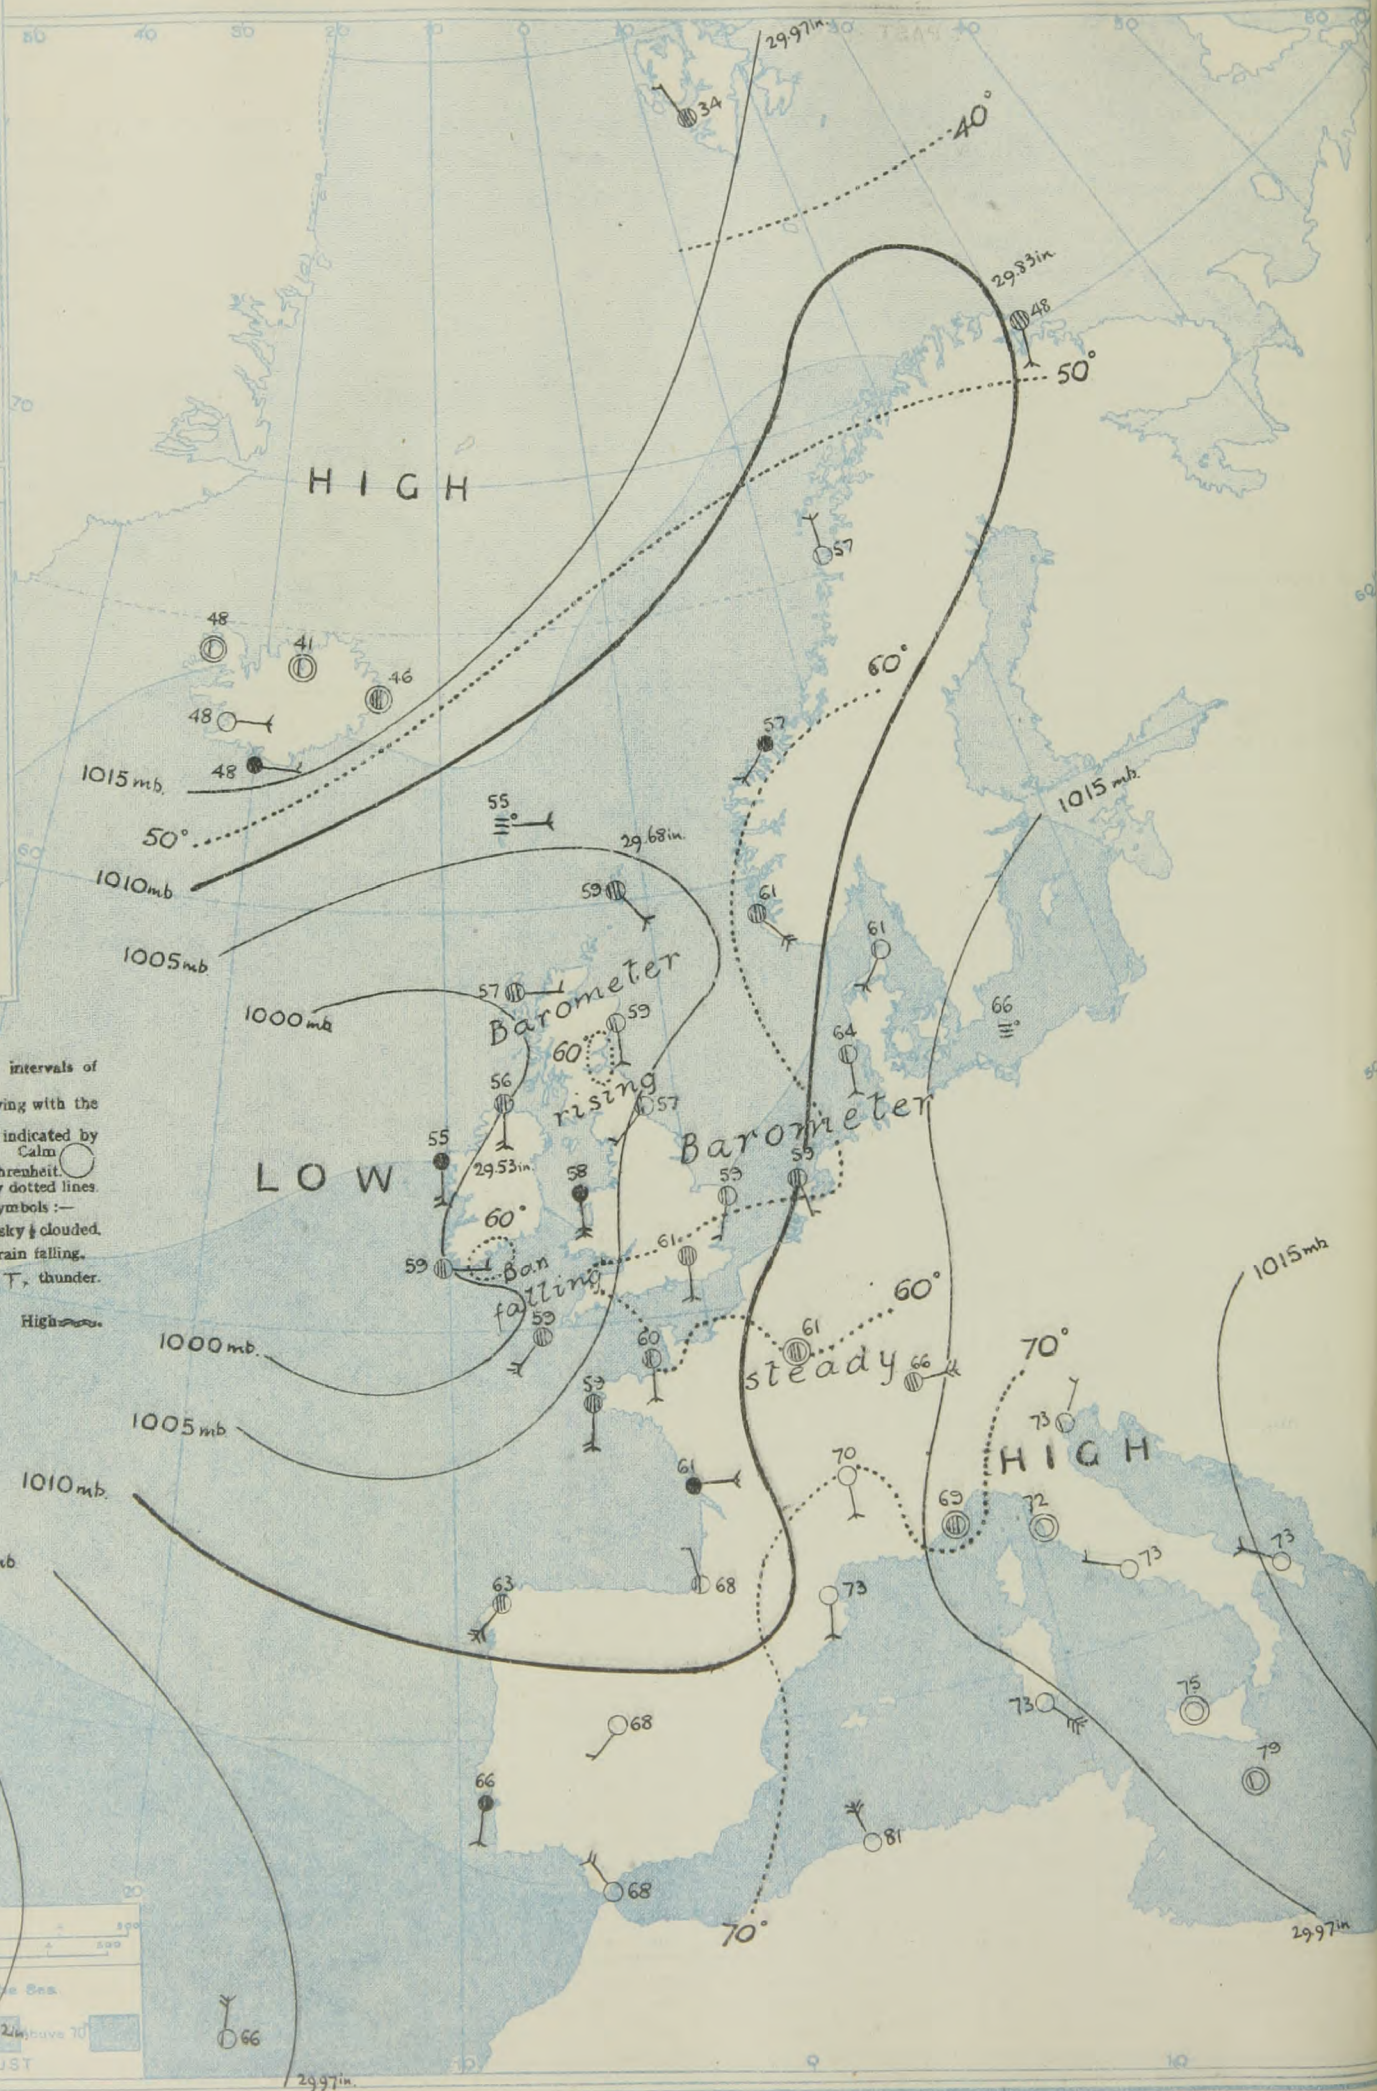

FORECAST DISTRICTS.

EXPLANATION.

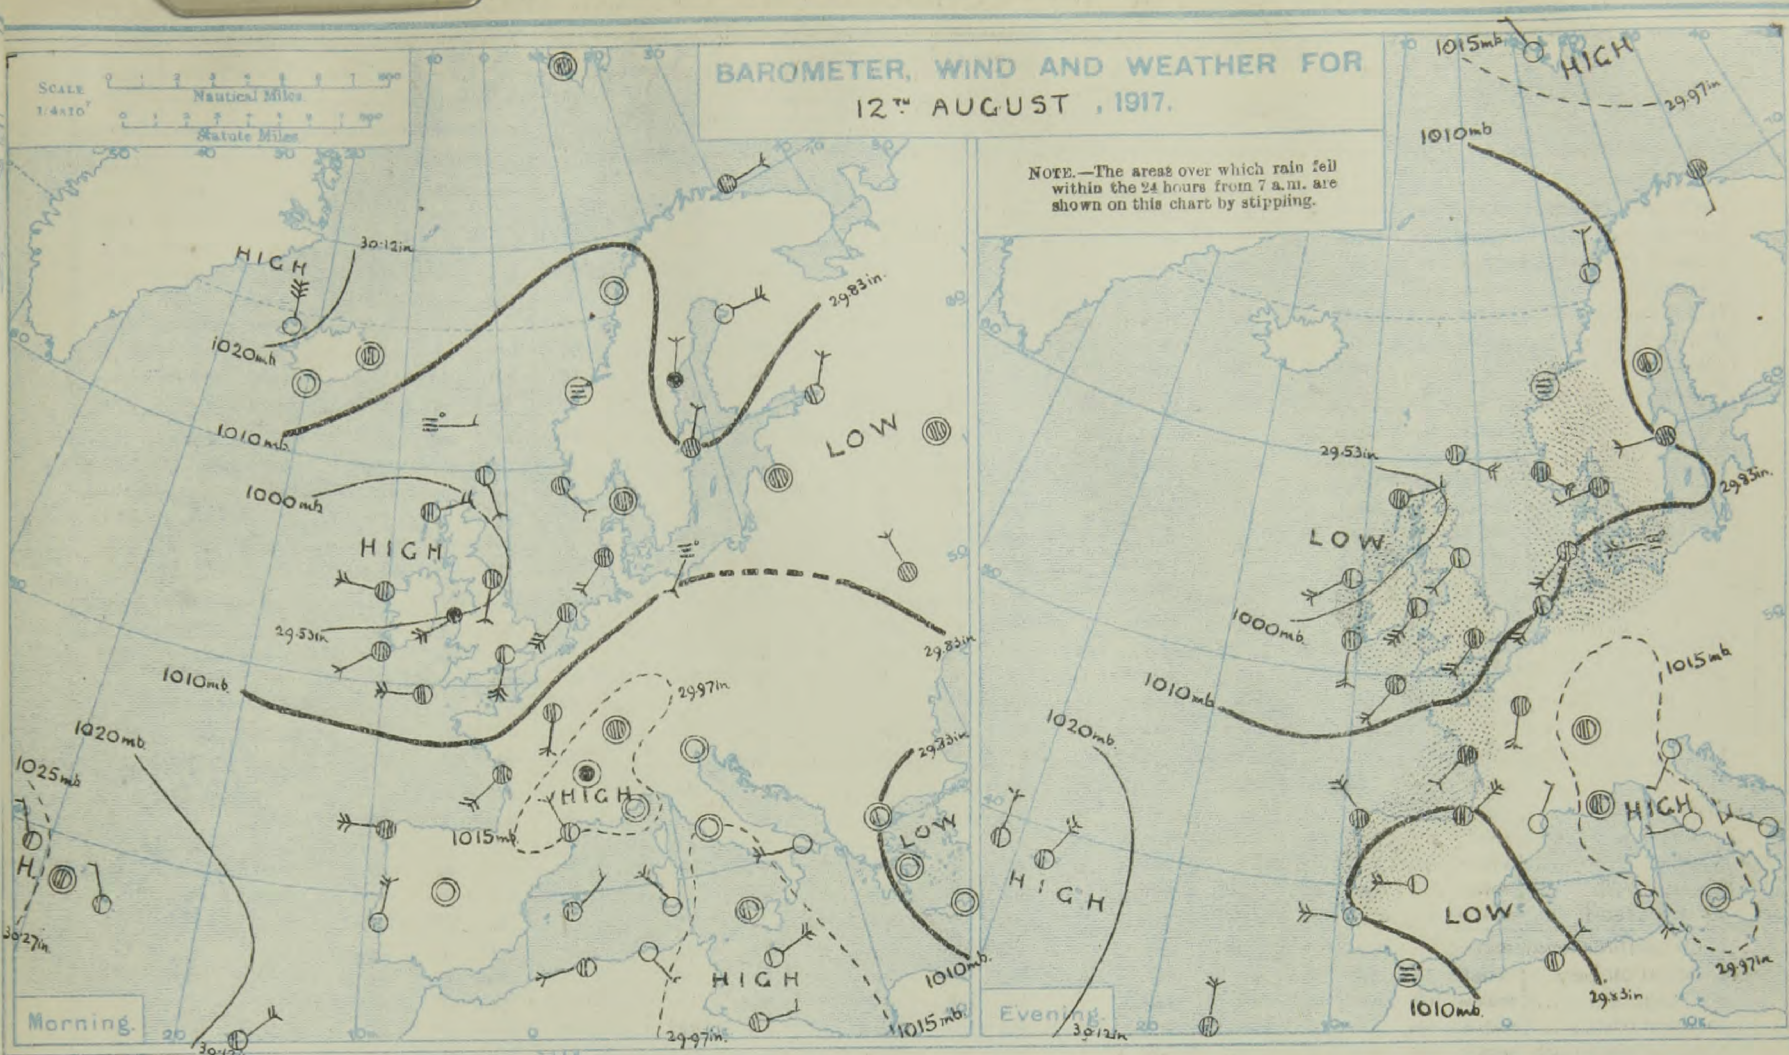

BAROMETER.—Isobars are drawn for intervals of five millibars.
WIND.—Direction is shown by arrows flying with the wind.
Force, on the scale 0-12, is indicated by the number of feathers. Calm
TEMPERATURE.—Given in degrees Fahrenheit.
Isotherms shown by dotted lines.
WEATHER.—Shown by the following symbols:—
○ clear sky. ☁ sky & clouded. ☂ sky & clouded.
☂ sky & clouded. ☂ overcast sky. ☂ rain falling.
* snow. ▲ hail. ☂ fog. ☂ mist. T, thunder.
☂ thunderstorm.
SEA DISTURBANCE.—Rough High

BAROMETER, WIND AND WEATHER FOR
12TH AUGUST, 1917.

SCALE
1:4810
Nautical Miles
Statute Miles

NOTE.—The areas over which rain fell
within the 24 hours from 7 a.m. are
shown on this chart by stippling.

The Present Situation

A slight pressure gradient is now shown between a depression of moderate depth centred out on the Atlantic, beyond our western coasts, and an anticyclone of moderate intensity indicated over the Central European region. Pressure is highest in an anticyclone over the Azores region and relatively high over Iceland. A small secondary depression has appeared between the south of Ireland and Cornwall. The anticyclone about the Azores continues to decrease slowly in intensity. From the Hebrides to the Farøe and in the south of Ireland light E. airs prevail, in other regions light S. breezes. Fair to fine weather is reported in most regions, but it is rainy or showery at a few widely scattered stations.

The General Outlook

The relative distribution of pressure is undergoing no change of importance, and with the tendency for it to remain low out on the ocean it seems probable that the existing changeable Southerly type will be maintained for the present.

* The barometric change is expressed in half-millibars.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20354. Tuesday, 14th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Moderate temperature prevailed yesterday, few maxima reaching 70°. At most stations there was a fairly good record of bright sunshine, the best being 13 hours at Deerness, and 12 hours at Valencia. Thunderstorms occurred in many parts of the British Isles in the afternoon and night, but did not visit the south-east counties of England. Fairly heavy falls of rain occurred, the greatest amount being 20 mm. at Tynemouth.

BRITISH WEATHER RECORD, TEMPERATURE, SUNSHINE AND RAINFALL To 17h. Monday, 13th AUGUST.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers. Calm 

TEMPERATURE.—Given in degrees Fahrenheit.

WEATHER — Shown by the following symbols:

WEATHER, — Shown by the following symbols :—

☉ clear sky. ☁ sky & clouded. ☂ sky & clouded

 clear sky,
 sky $\frac{1}{2}$ clouded,
 sky $\frac{3}{4}$ clouded,
 sky $\frac{3}{4}$ clouded,
 overcast sky,
 rain falling.

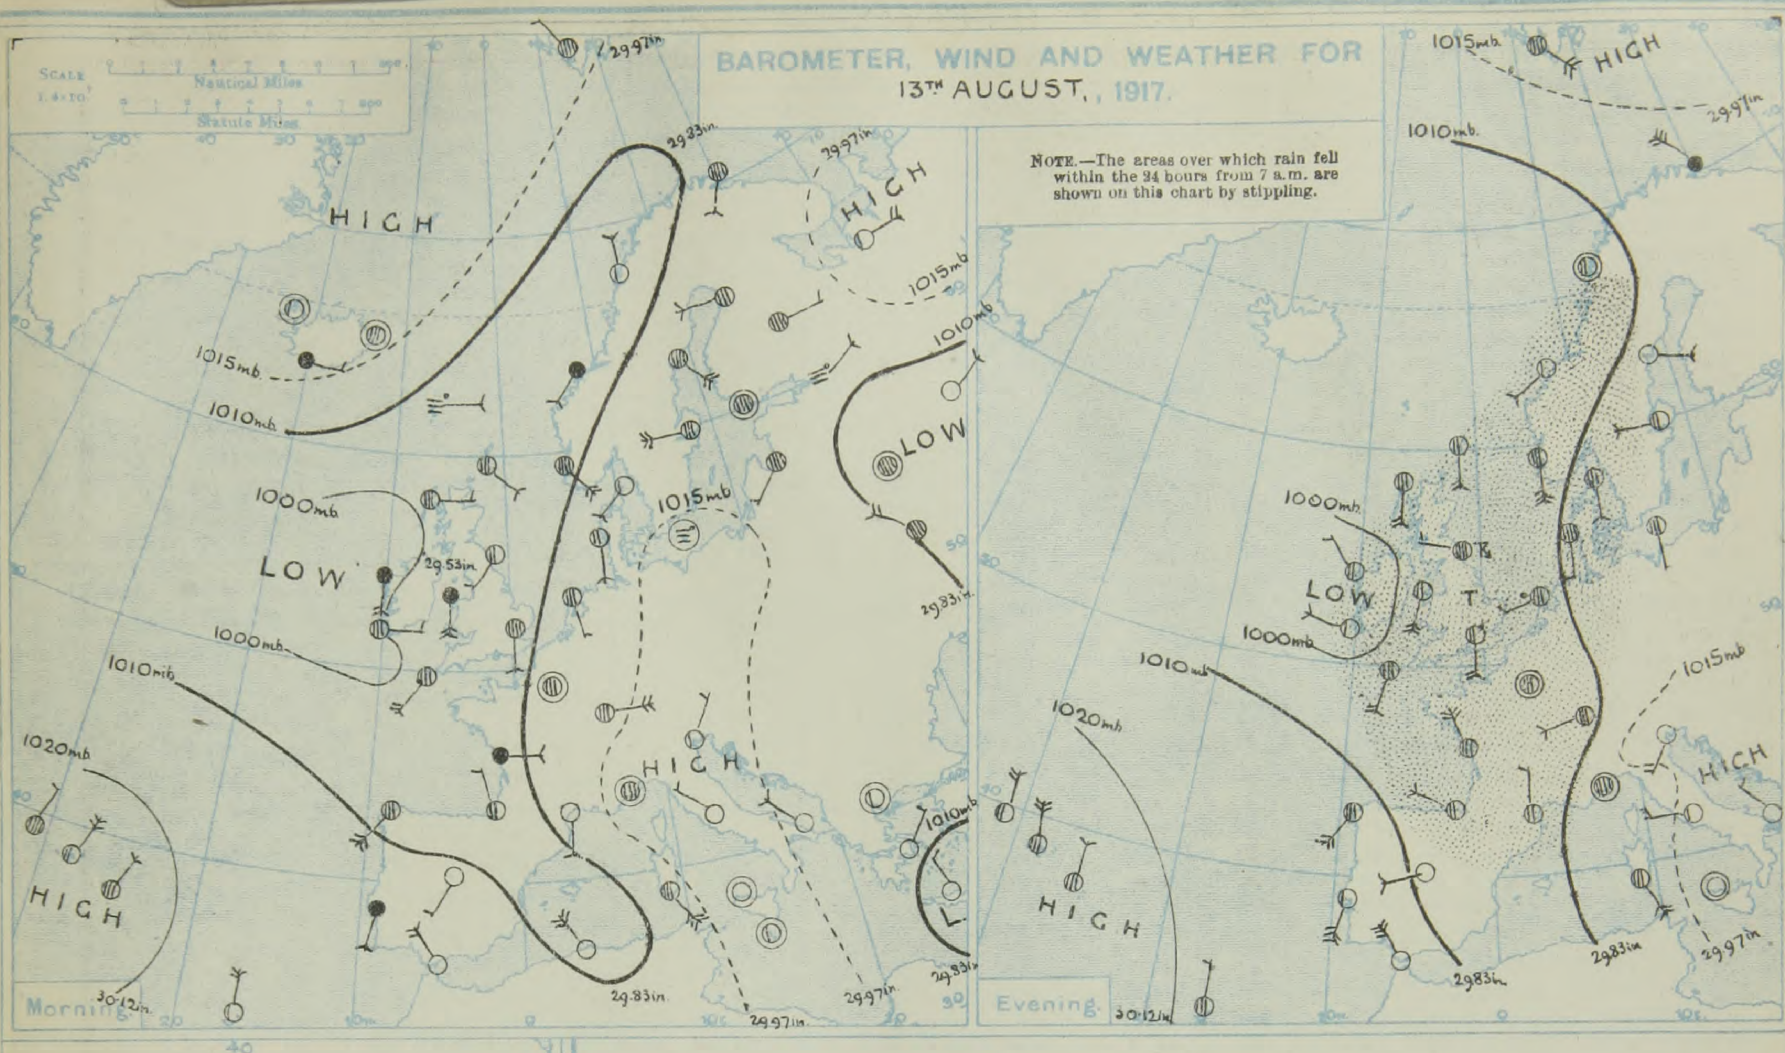

* snow, ▲ hail, ≡ fog, ≡^o mist, T, thunder.

K, thunderstorm.

SEA DISTURBANCE.—Rough . High .

Normal Temperature of the Sex.

Notes on the General Situation at 7h. to-day

A shallow depression lies over Ireland and the Irish Sea. The gradient is slight and light winds are general, Westerly at the Mouth of the Channel, Southerly over England, and Easterly in Scotland. The weather is dull in Scotland, but fairer in England and Ireland. Rain is falling at some stations in the neighbourhood of the Irish Sea and in Denmark.

The Outlook

The depression over Ireland is making very slow progress towards the east, and is likely to maintain showery weather with light Southerly or South-Westerly breezes over the country generally. More thunderstorms are likely to occur in the afternoon and at night. Temperature will differ little from the average.

NOTE
AURORA
was observed last night
at
STORNOWAY ,
CAHIRCIVEEN (at 23h.)
and at
DONAGHADEE (at 1h.).

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20355. Wednesday, 15th August, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

The maximum temperature was between 60° and 70° yesterday. Moderate amounts of sunshine occurred, the best record being between 10 and 11 hours at Clacton. Between 10 and 15 mm. of rain fell at some Scottish stations, and also at South Farnborough. Thunderstorms were reported from most districts except the south of England. Fog continued in the Orkneys.

SEA DISTURBANCE.—Rough . High .

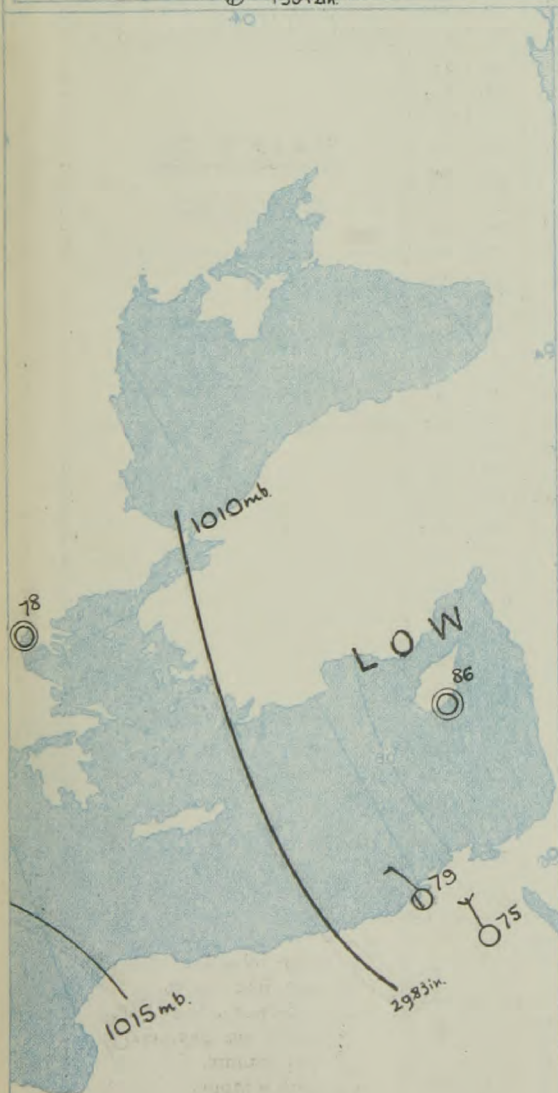

Notes on the General Situation at 7 a.m.

The shallow depression that yesterday lay over the Irish Sea is now centred over the extreme north of England, but shows signs of filling up. A decided rise of the barometer is taking place in the West of England and in Ireland. The wind has veered to NW. at a number of stations, but is light except in the Straits of Dover where there is a fresh breeze from SW. There is a considerable amount of cloud over the British Isles, and fog in the northern part of the North Sea. In Iceland calms and cloudy to rainy weather prevail.

The Outlook

There should be a slight temporary improvement in the weather, but local thunderstorms are likely to occur. The wind will be from between West and North, light or moderate in force.

NOTE **AURORA**

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 29356 Thursday, 16th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Maximum temperatures again lay between 60° and 70°. Some of the Scottish stations had very little bright sunshine, but Castlebay had twelve hours. There was much thunderstorm activity; especially in the Midlands and on the east coast of England, but the Irish stations and those in the South-West of England had none. At Yarmouth and Eskdalemuir the storms yielded 10 mm. of rain, elsewhere very little.

Valencia	5.27 5.29	12.45 12.45	8.4 8.2

THE MORNING OF THURSDAY, 16TH AUGUST, 1917.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers. Calm

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

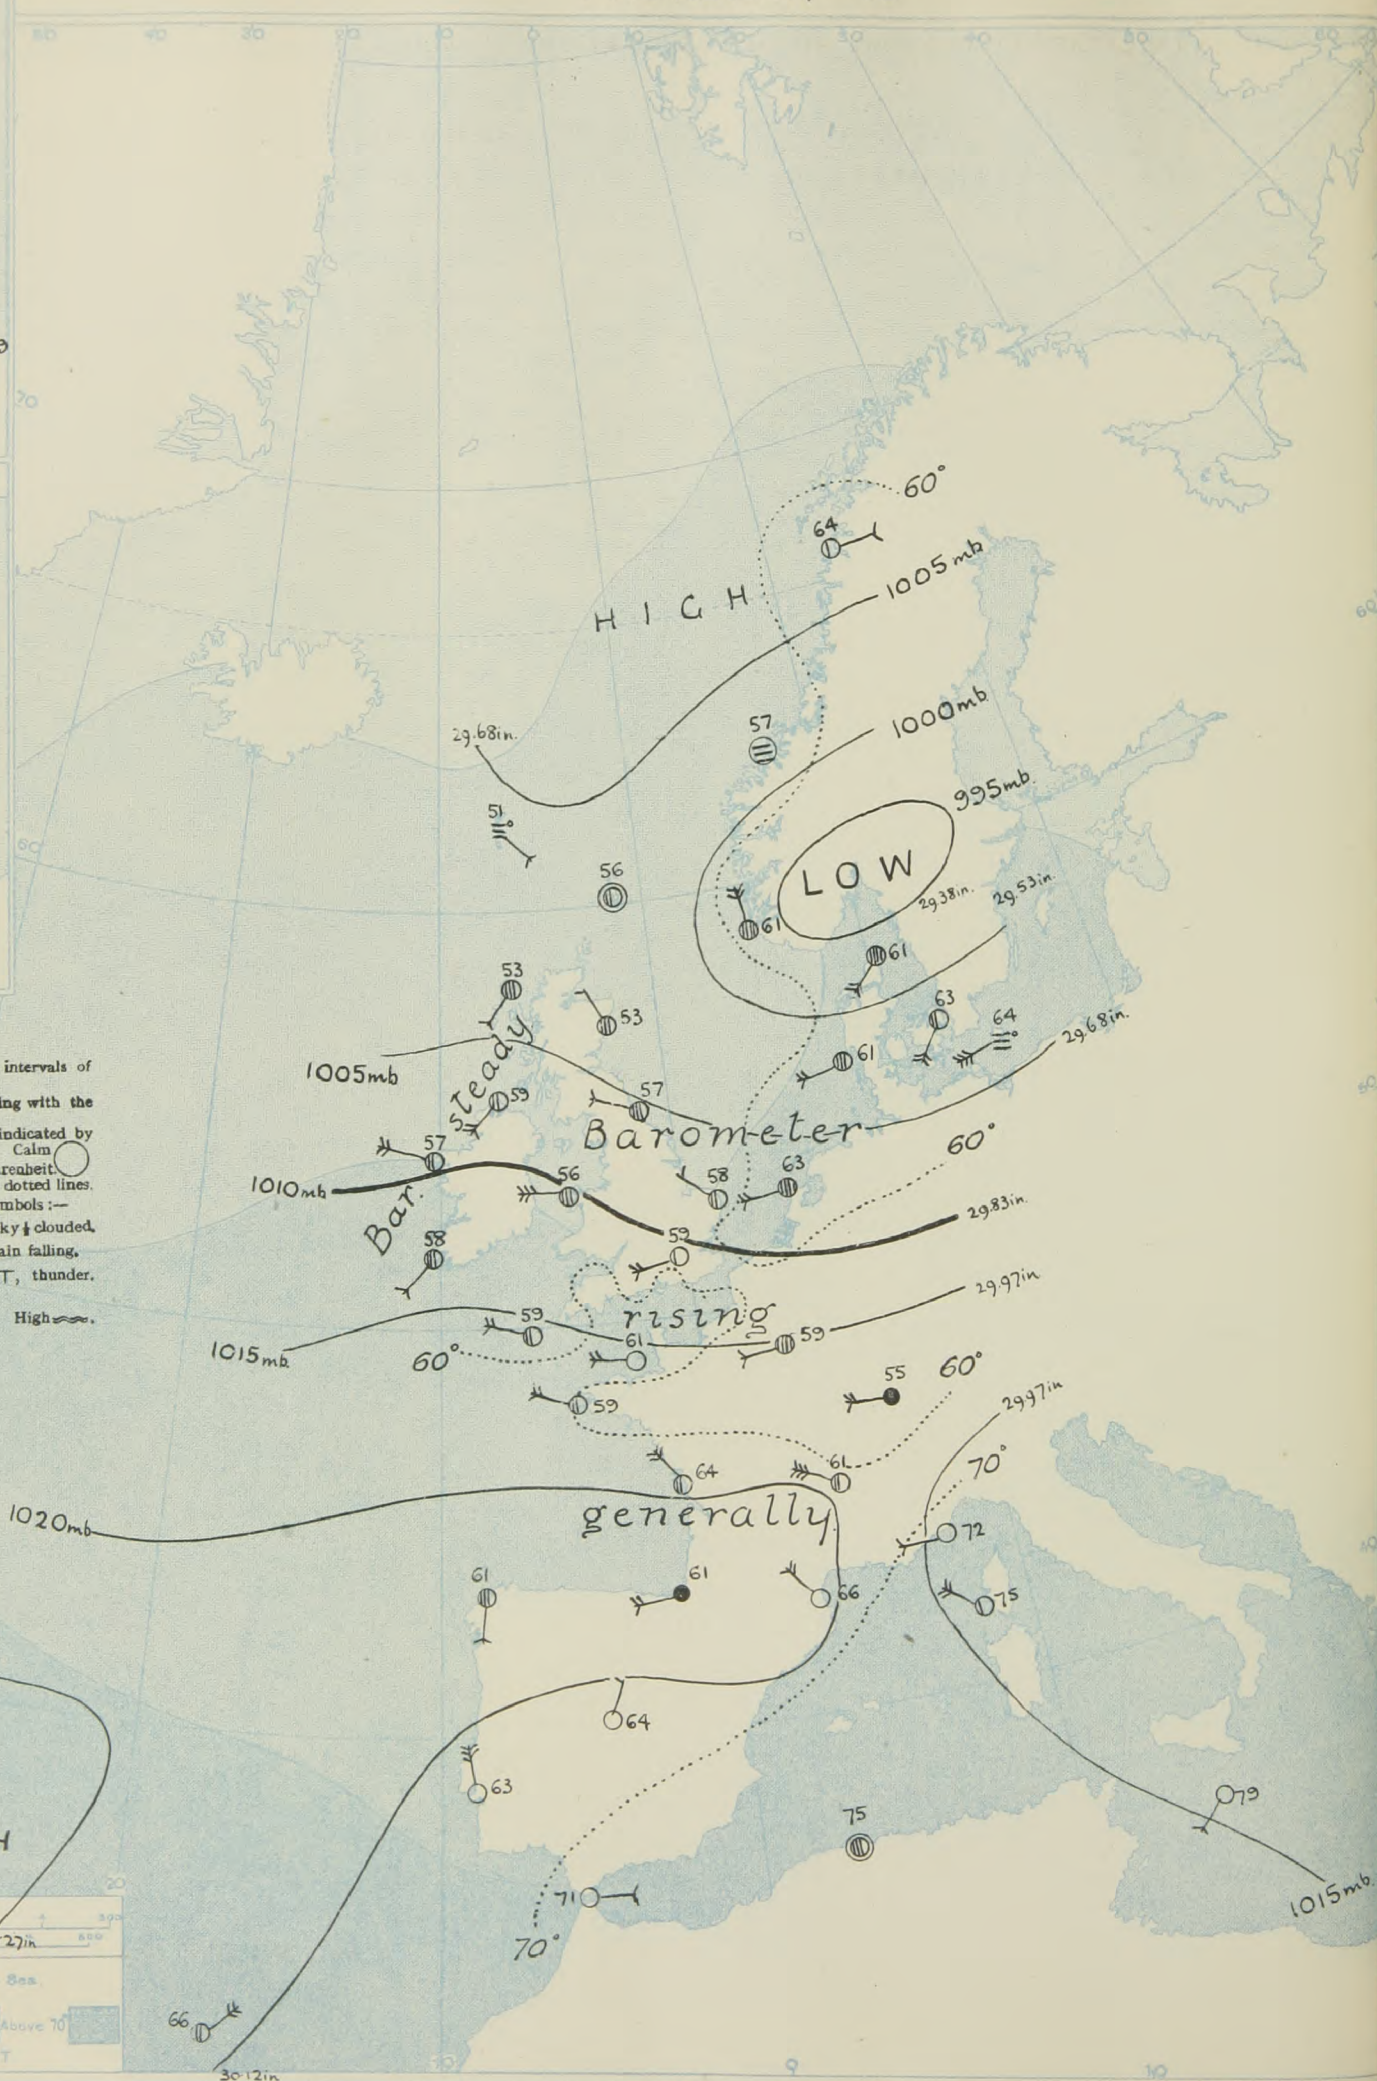

○ clear sky. ○ sky 1/2 clouded. ○ sky 3/4 clouded.

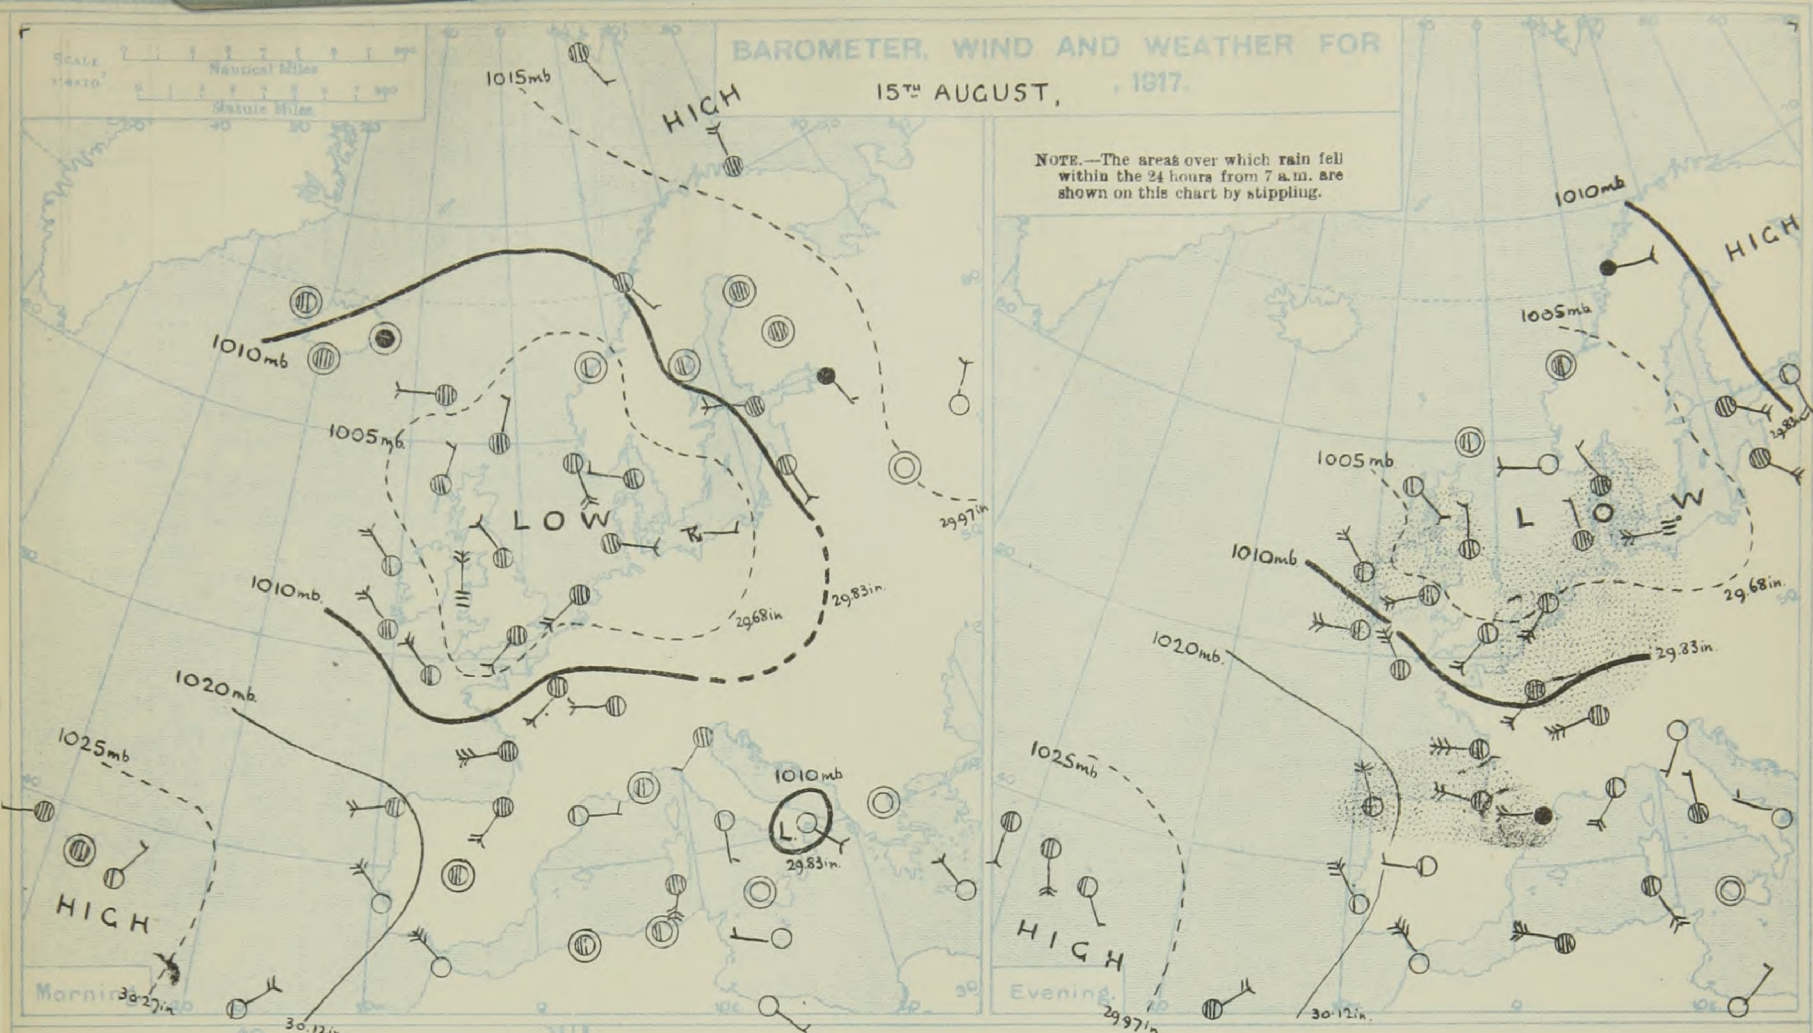

⊙ sky 1/2 clouded. ⊙ overcast sky. ● rain falling.

* snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

T, thunderstorm.

SEA DISTURBANCE.—Rough ~~~ High ~~~.

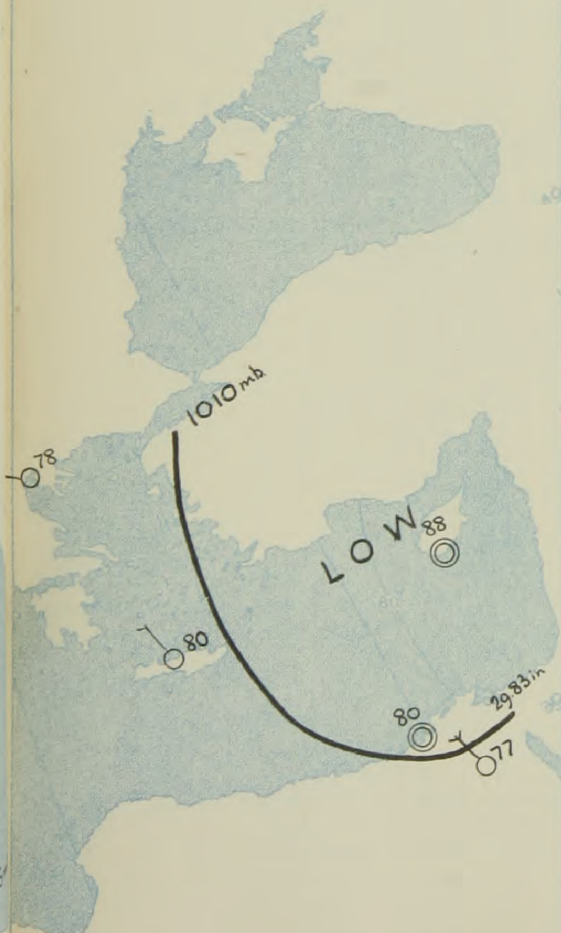

Note on the General Situation at 7 a.m to-day

The continued rise of the barometer over the British Isles and France has produced a rather steeper and more definite gradient than existed yesterday. A westerly current of moderate strength now prevails over England and Ireland. The barometer still shows a decided upward tendency but the wind has backed towards SW. in Southern Ireland and at Pembroke. The weather is mostly fair, with fog continuing in the Orkneys.

The General Outlook

The backing of the wind in Ireland suggests the existence of a new depression out in the Atlantic which may cause less settled weather in the west to-night or tomorrow. Over the remaining part of the country the weather is likely to be mainly fair with Westerly winds of moderate strength.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No.20357 ..Friday, 17th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature continued about the same as during the last few days, the maxima lying between 60° and 70°. Considerable rain fell in Ireland, and a moderate amount in Scotland. Valencia recorded 24 mm. and Castlebay 20mm. Sunshine was abundant in the South and East of England, the best record being 12 hours at Scilly. There were no more reports of thunderstorms.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

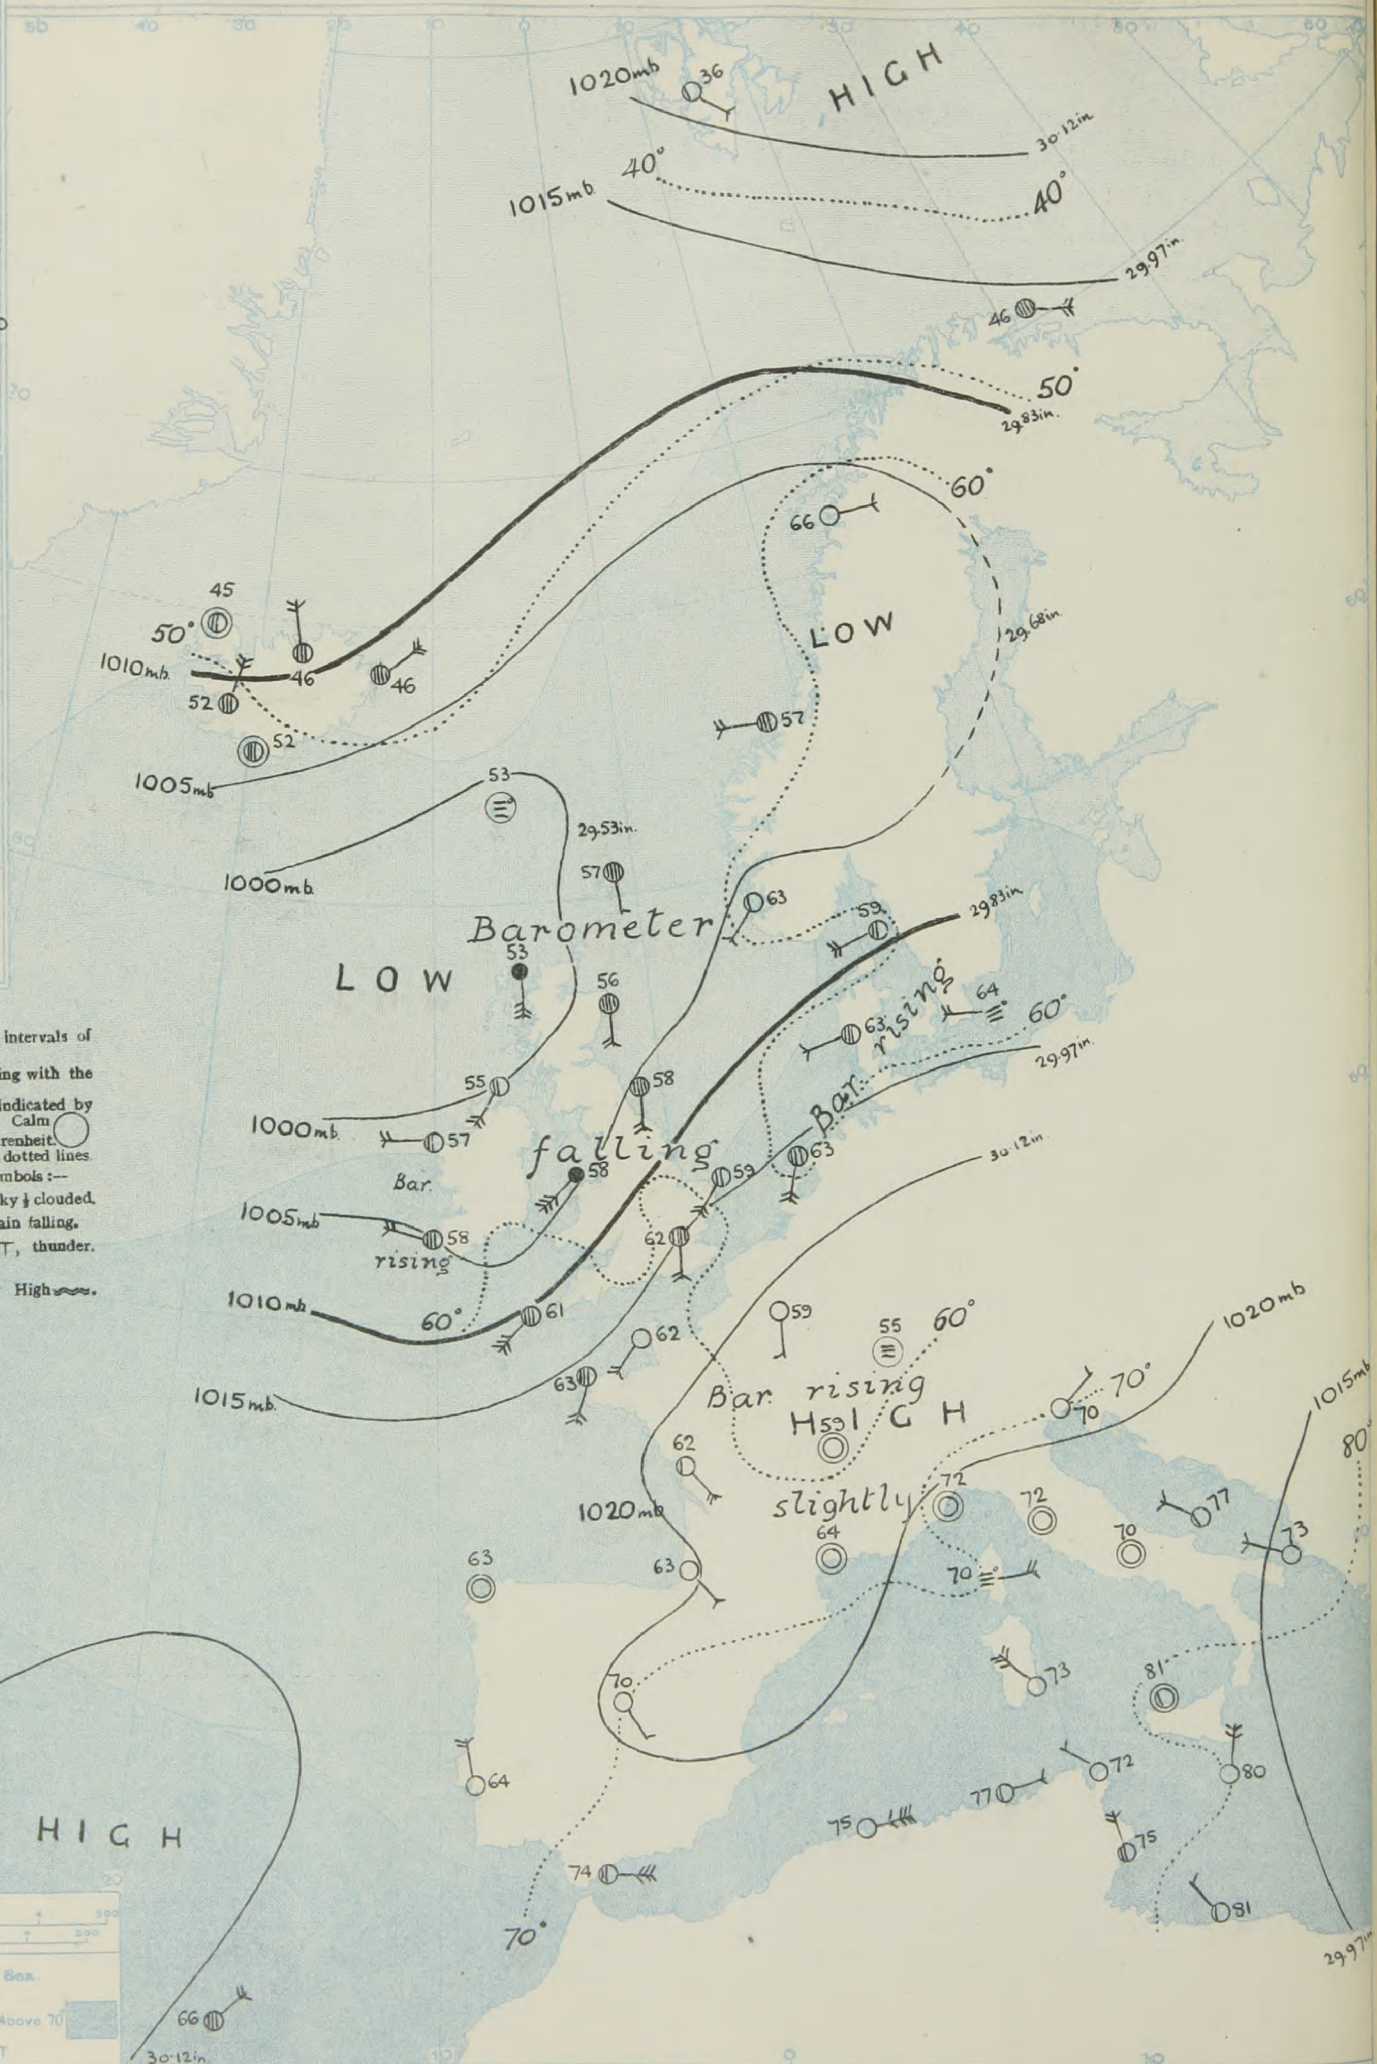

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm.

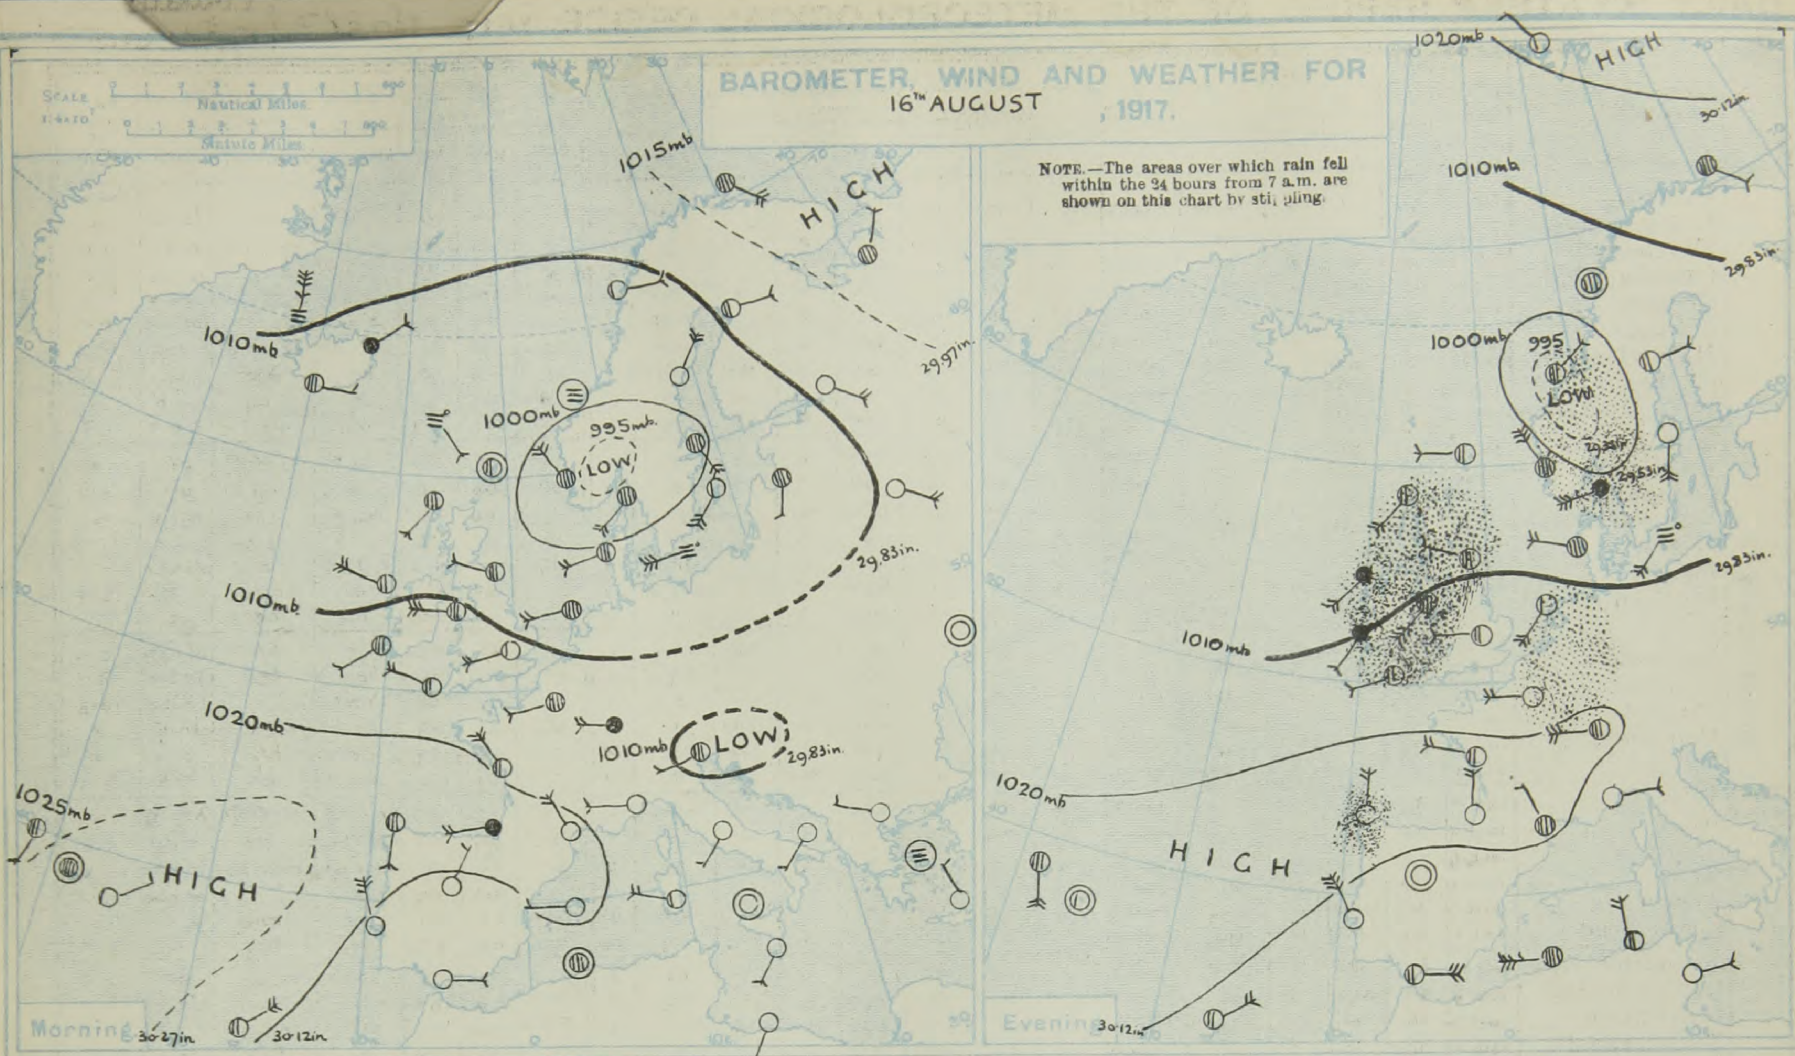

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

○ clear sky. ○ sky 1/2 clouded. ○ sky 3/4 clouded. ○ sky 3/4 clouded. ○ overcast sky. ● rain falling. ✕ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder. T, thunderstorm.

SEA DISTURBANCE.—Rough wavy line. High wavy line.

Notes on the General Situation at 7 a.m. to-day

The depression indicated off the west coast of Ireland yesterday is now off our north-west coasts. A small secondary is moving across the south of Ireland. Rain is falling at many stations in the west and north, and also as far east as South Farnborough. The wind is between S. and W. at all stations in the British Isles, and is strong locally in the west. Pressure has fallen in the Azores, but is still rather high in France. The weather is still fair in the neighbourhood of the Straits of Dover.

The Outlook

The rainy conditions caused by the depression in the north-west are likely to extend towards the east to-day and the SW. wind will at the same time freshen somewhat. There is a likelihood of fresh disturbances following the present one along a north-easterly course, so that the windy and unsettled weather may be expected to continue for the next few days.

NOTE.
SOLAR HALO
was observed at
HARTLAND QUAY
Yesterday at 13h.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at Meteorological Office.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20358. ... Saturday, 18th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature continued about the same as during the past few days, maxima lying between 60° and 70°. There was heavy rain at Liverpool, Holyhead and Pembroke, the totals being 36, 34, and 38 mm. respectively. At Morecambe Bay 49 mm. were recorded in the 24 hours ending at 17h. G.M.T. Sunshine was with few exceptions scanty, but Malin Head experienced 11 hours and Castlebay 10 hours. Thunder and lightning occurred in the evening at Deerness.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

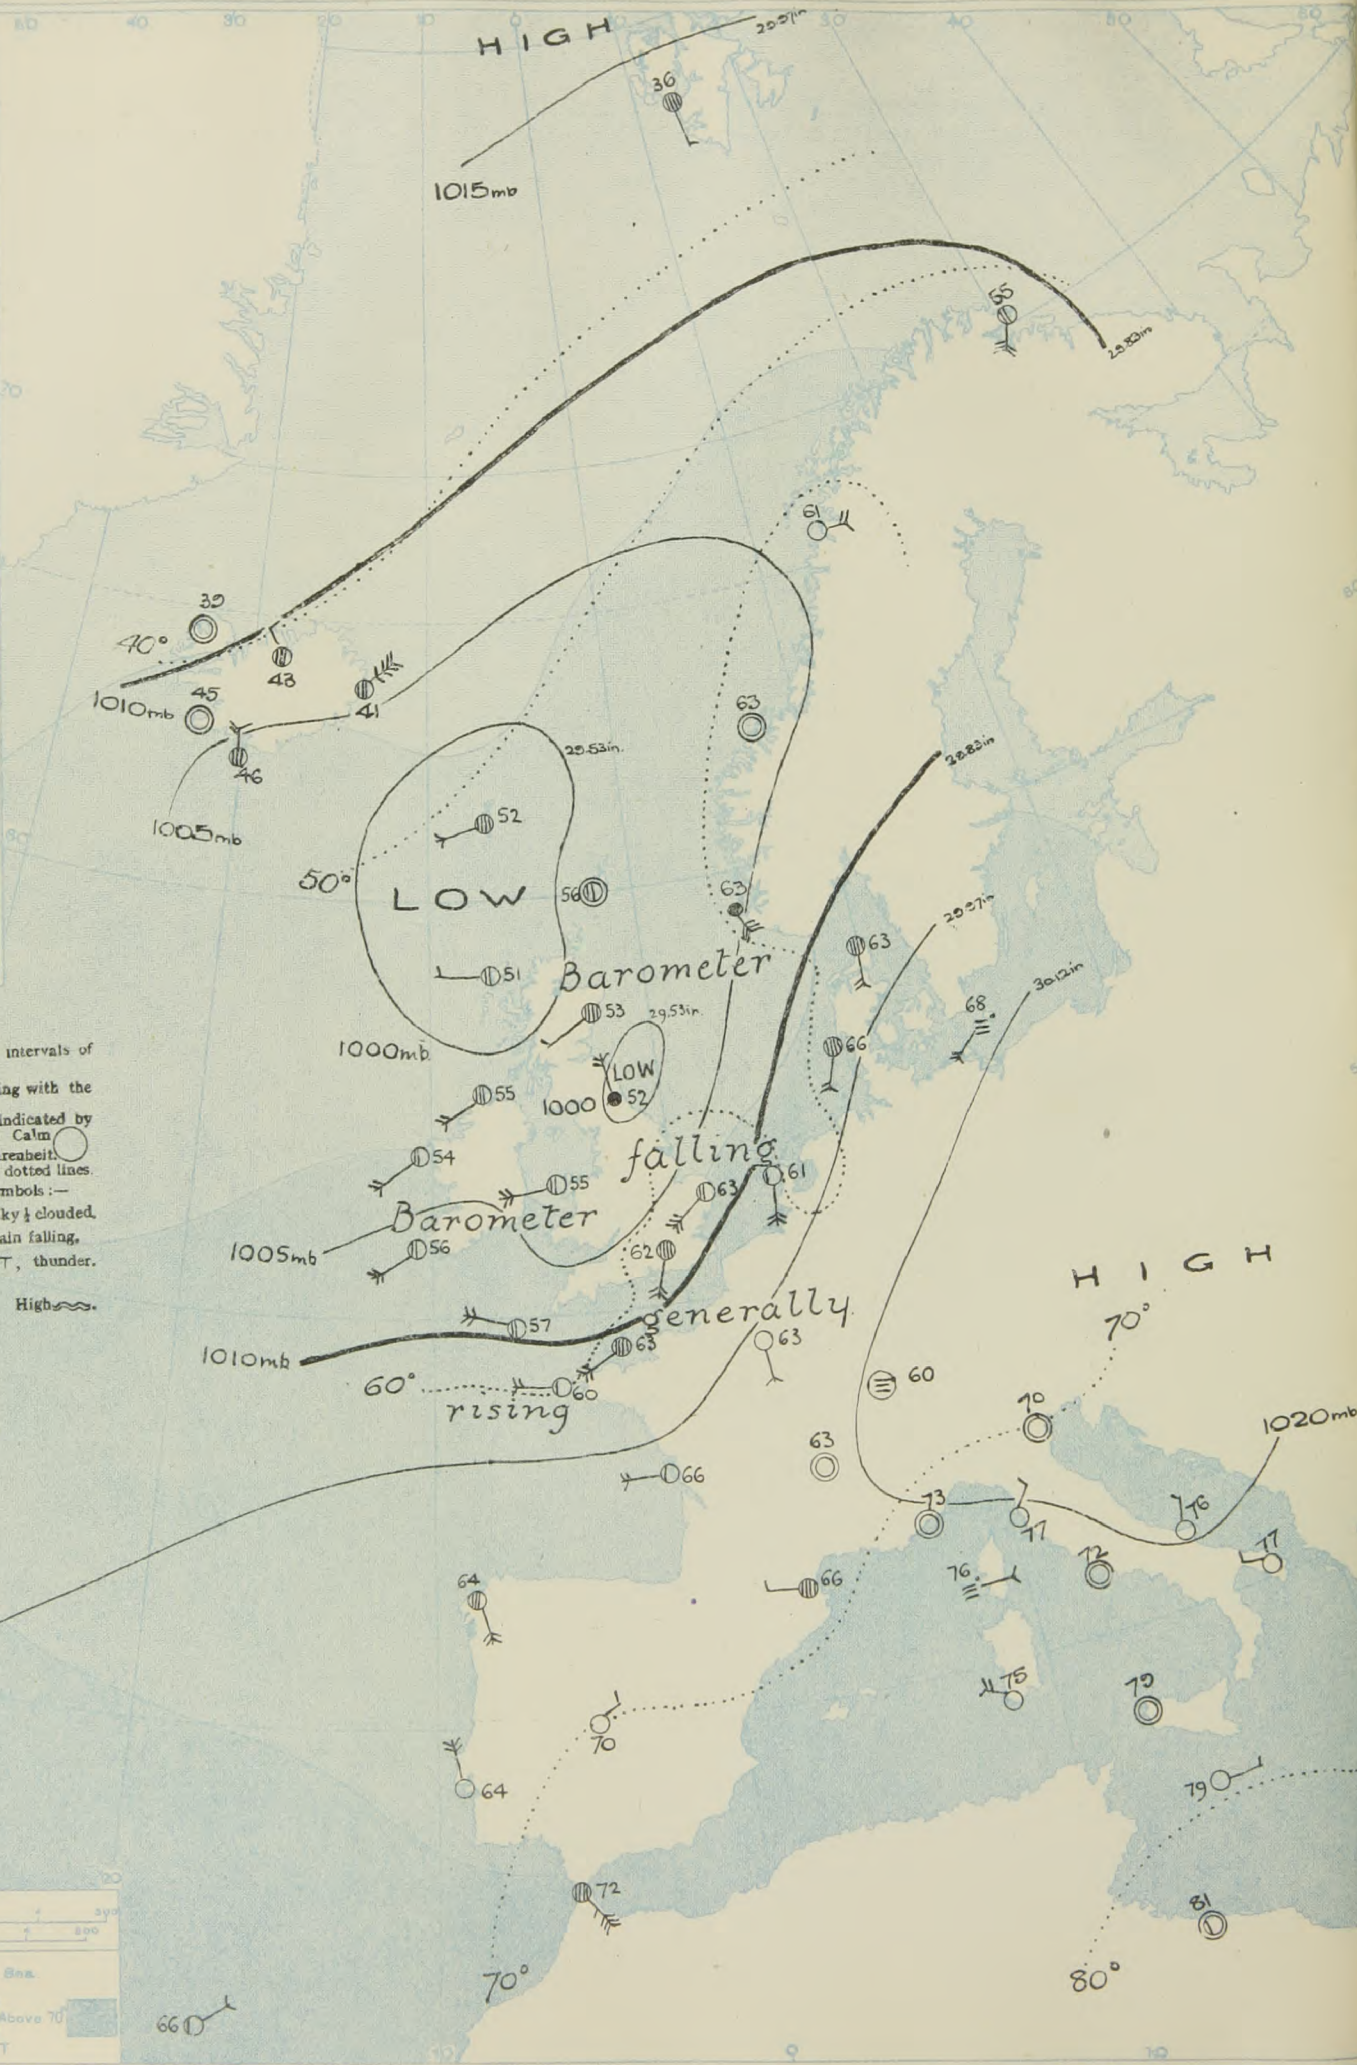

TEMPERATURE.—Given in degrees Fahrenheit.

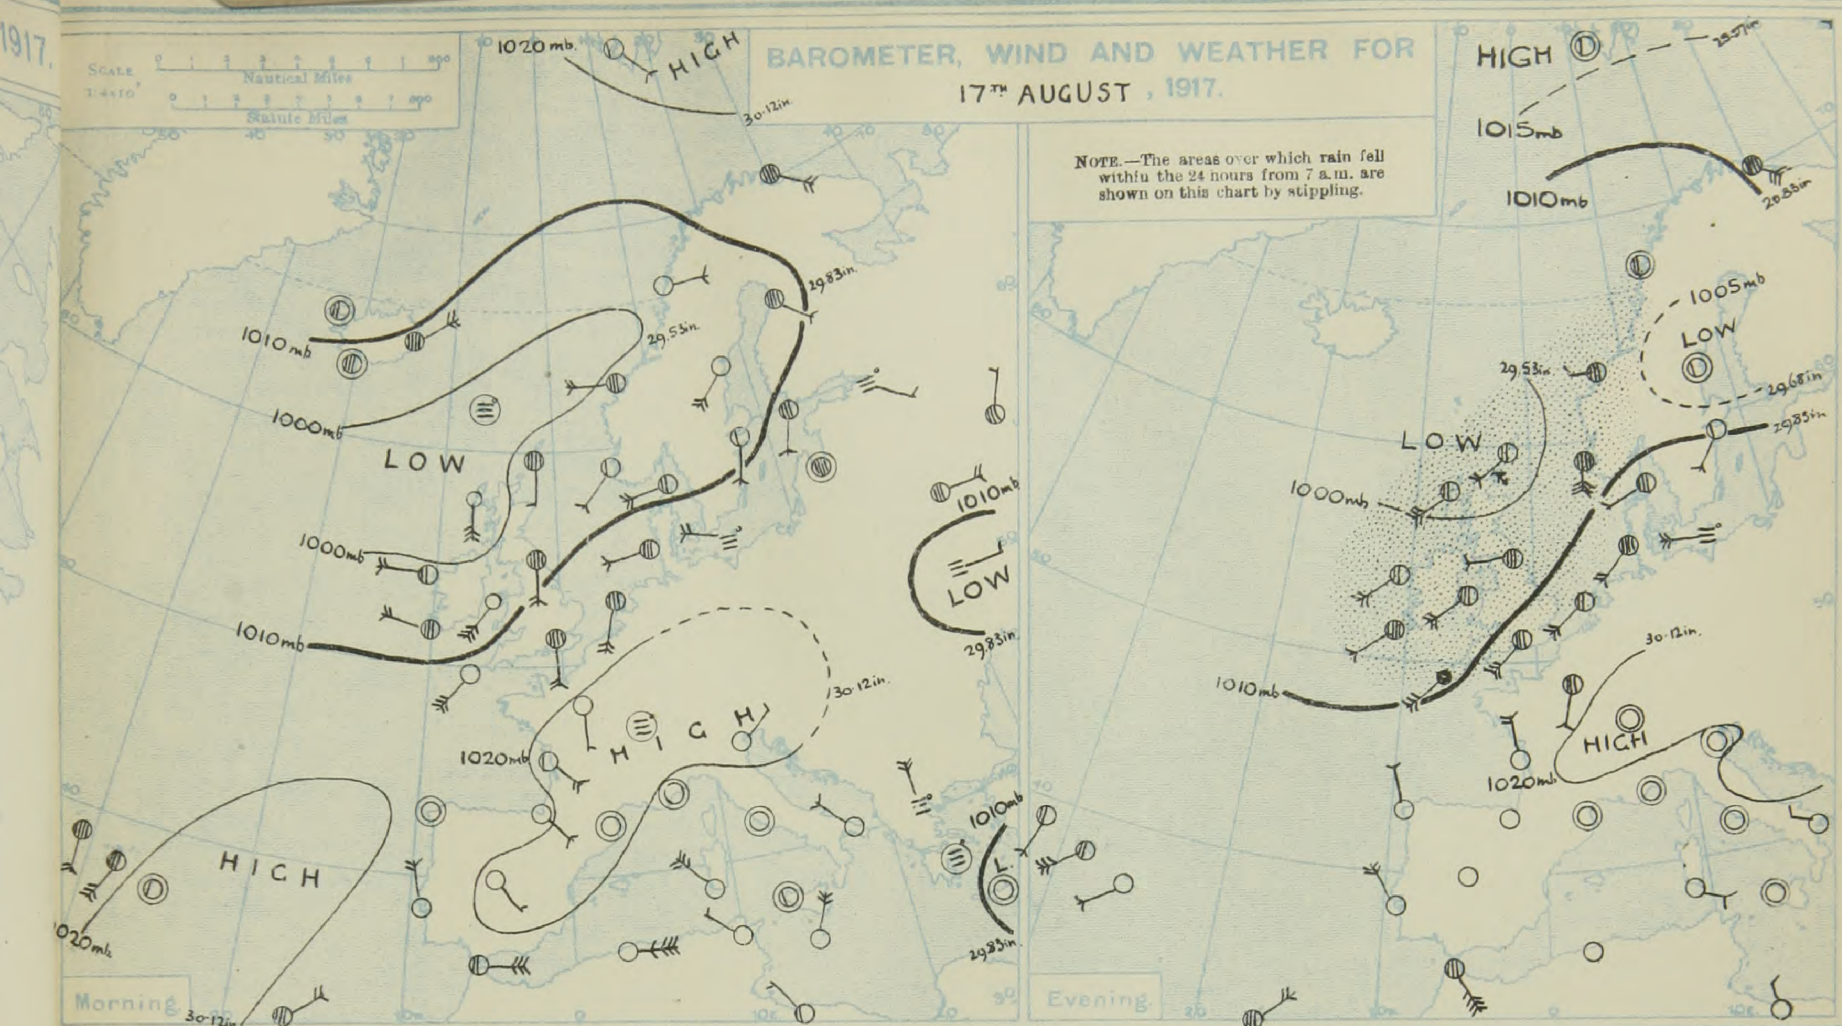

Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

○ clear sky. ○ sky ½ clouded. ○ sky ¾ clouded.
⊙ sky ¾ clouded. ⊙ overcast sky. ● rain falling,
✱ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

SEA DISTURBANCE.—Rough ~~~~~ High ~~~~~.

Notes on the Situation at 7 a.m. To-day

There is low pressure to the north of Scotland, and a secondary depression accompanied by strong Southerly to Westerly winds and rainy weather is crossing England from west to east. Rain is also falling at some stations in the North of England, but in the South-West of England and in Ireland the weather is fair or fine. In Scotland the wind has become light and variable, but over the remaining part of the British Isles and neighbouring parts of the Continent the wind is between S. and W.

The Outlook

In the rear of the secondary depression in the South of England the weather will become temporarily fair or fine with Westerly breezes, but there are some indications of a new disturbance out in the west, and it is not unlikely that the wind will back to South-West again tomorrow and the weather become unsettled again. In the northern part of the British Isles quiet conditions will hold. There is some prospect of local thunderstorms occurring in Scotland.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,359. SUNDAY, 19TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature showed little change from that prevailing during the last few days. The highest maximum was 72° at Kew. Scilly and Pembroke recorded 12 hours of bright sunshine, but in the north there was comparatively little. Thunderstorms occurred at Glasgow, Eskdalemuir and Spurn Head. Rain was abundant in Scotland and as much as 28 mm. fell at Stornoway.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE

FORECAST DISTRICTS

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers. Calm

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

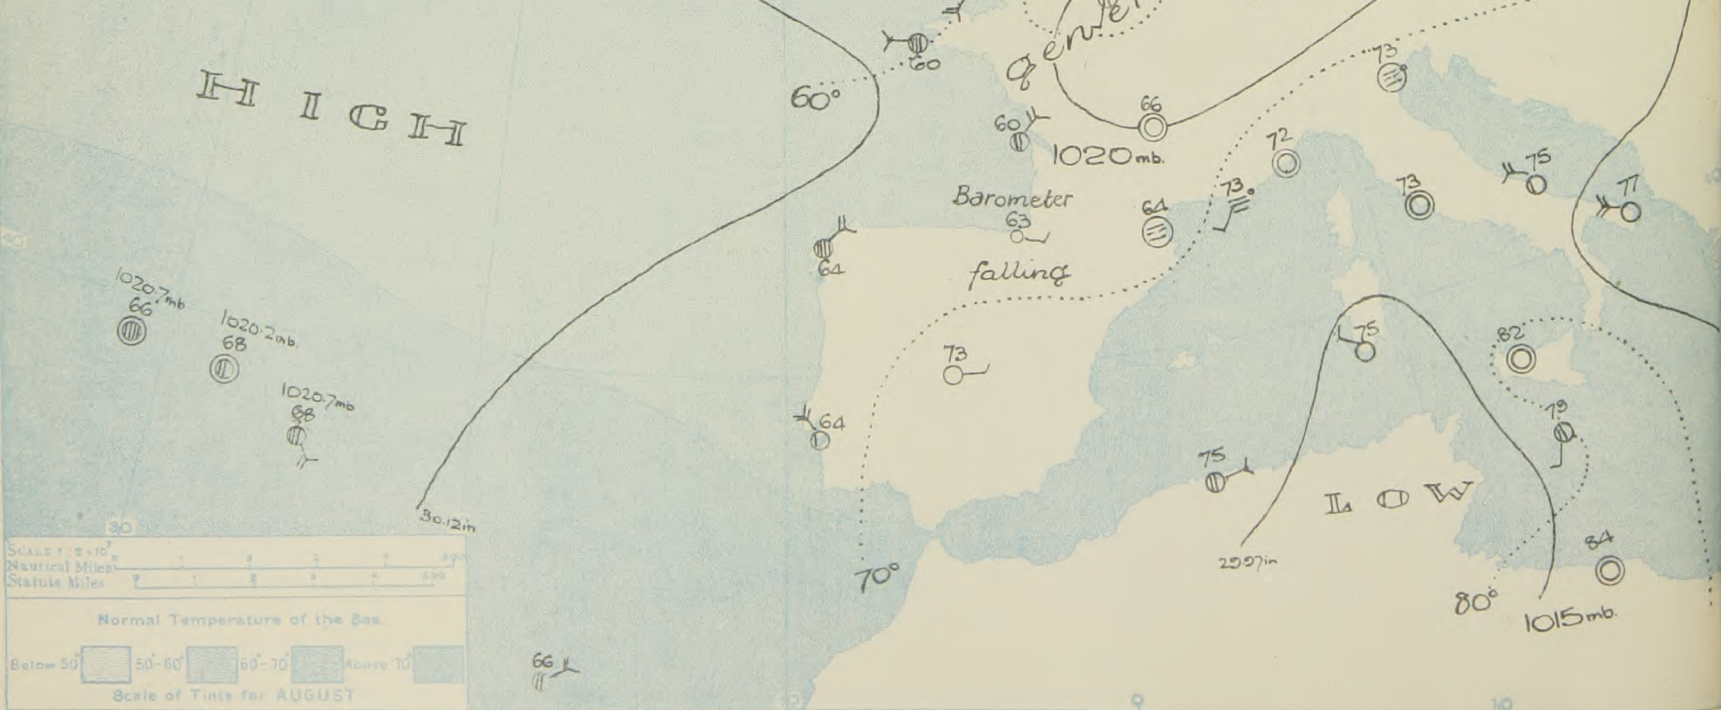

clear sky. sky & clouded. sky & clouded & rain falling.

overcast sky. rain falling.

* snow. ▲ hail. ≡ fog. ≡ mist. T. thunder.

thunderstorm.

SEA DISTURBANCE.—Rough High

A depression is still indicated to the north of the British Isles, and a secondary is crossing Scotland. The barometer is rising generally over the United Kingdom, Denmark and France. Westerly winds prevail from the Orkneys down to the English Channel and blow freshly in many places. The weather is fair over England and Ireland, but cloudy to rainy in Scotland, with squally conditions.

The Outlook

With pressure continuing low in the north, showery weather is likely to continue in Scotland. Over England the weather is likely to be fair for the most part, but may become showery again after to-day. The wind will continue to blow freshly from a Westerly direction.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No.20,360. MONDAY, 20th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature again rose to 70° during the day at stations in the SE. of England. Sunshine records were better than of late, and exceeded ten hours generally on our eastern and southern coasts and at Colwyn Bay. Rainfall was light, 5 mm. at Stornoway and Birr Castle. There was a thunderstorm at Torquay.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

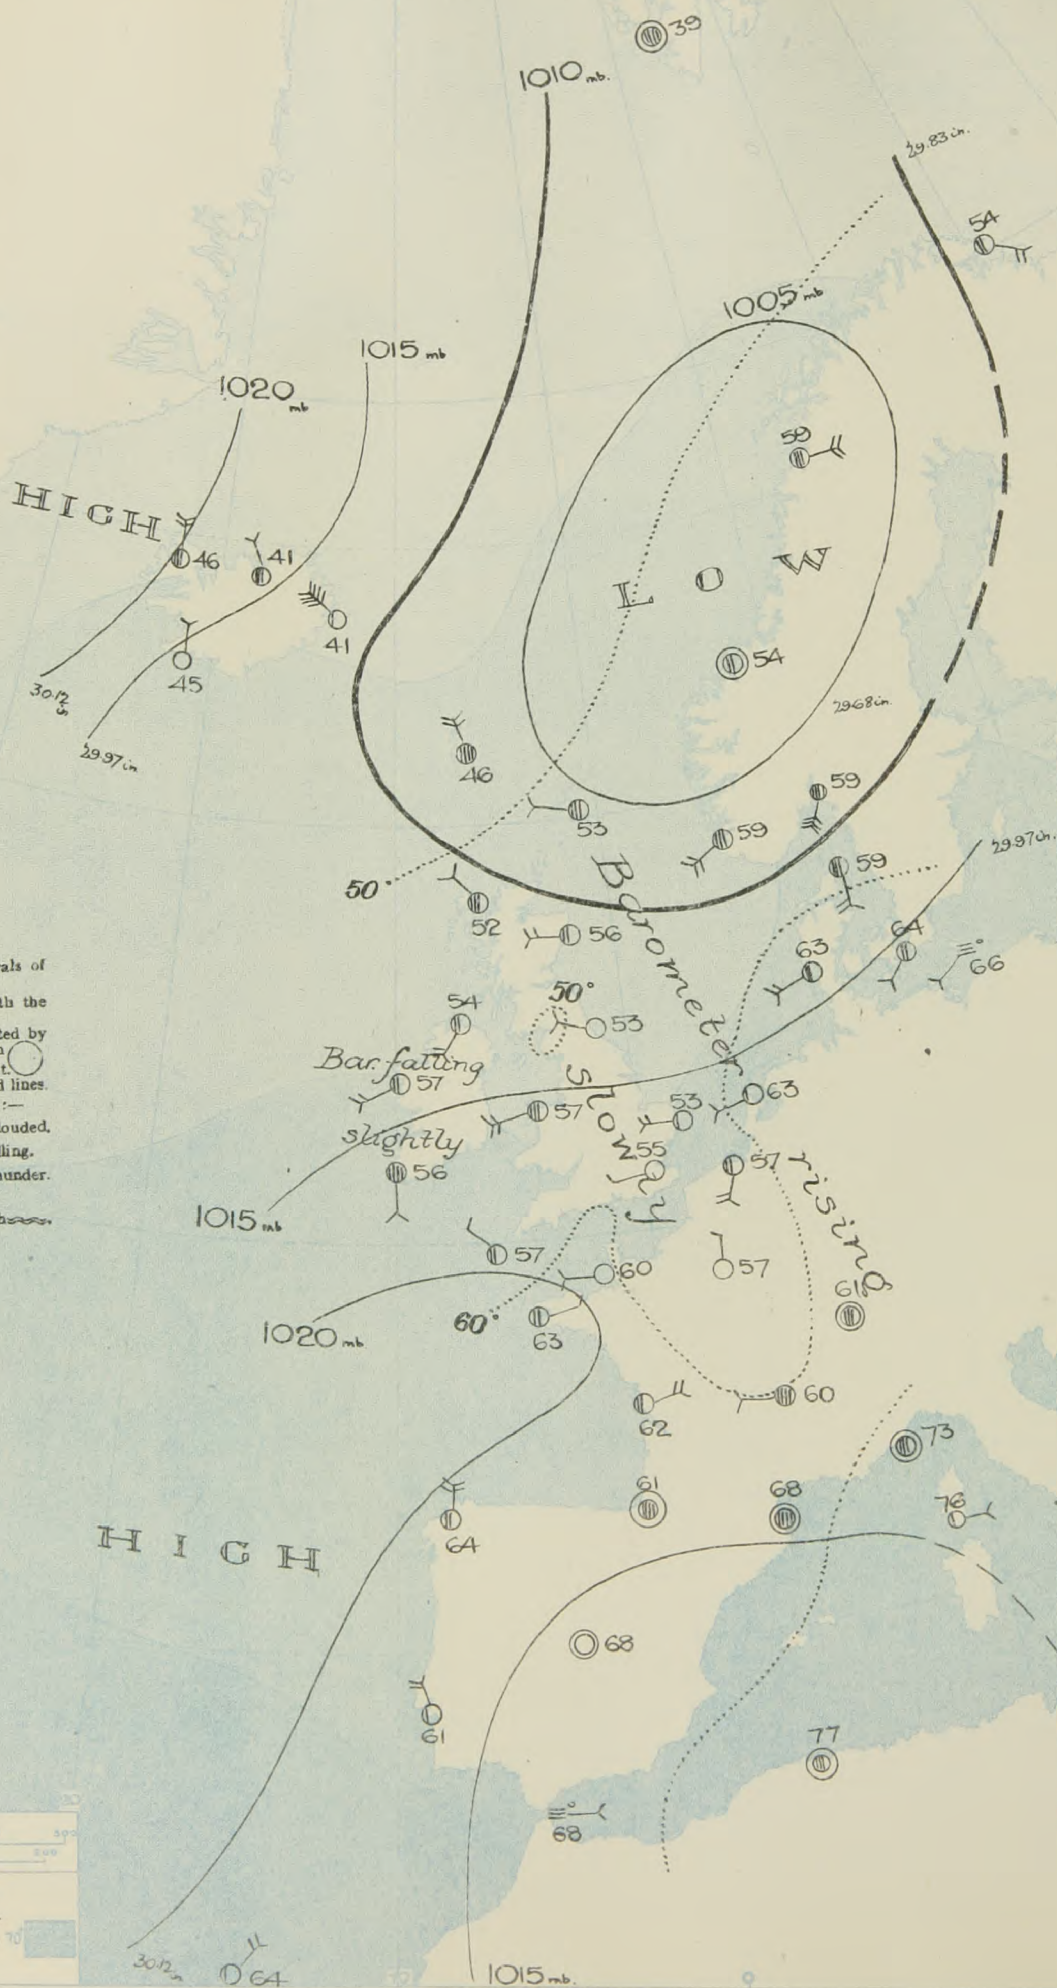

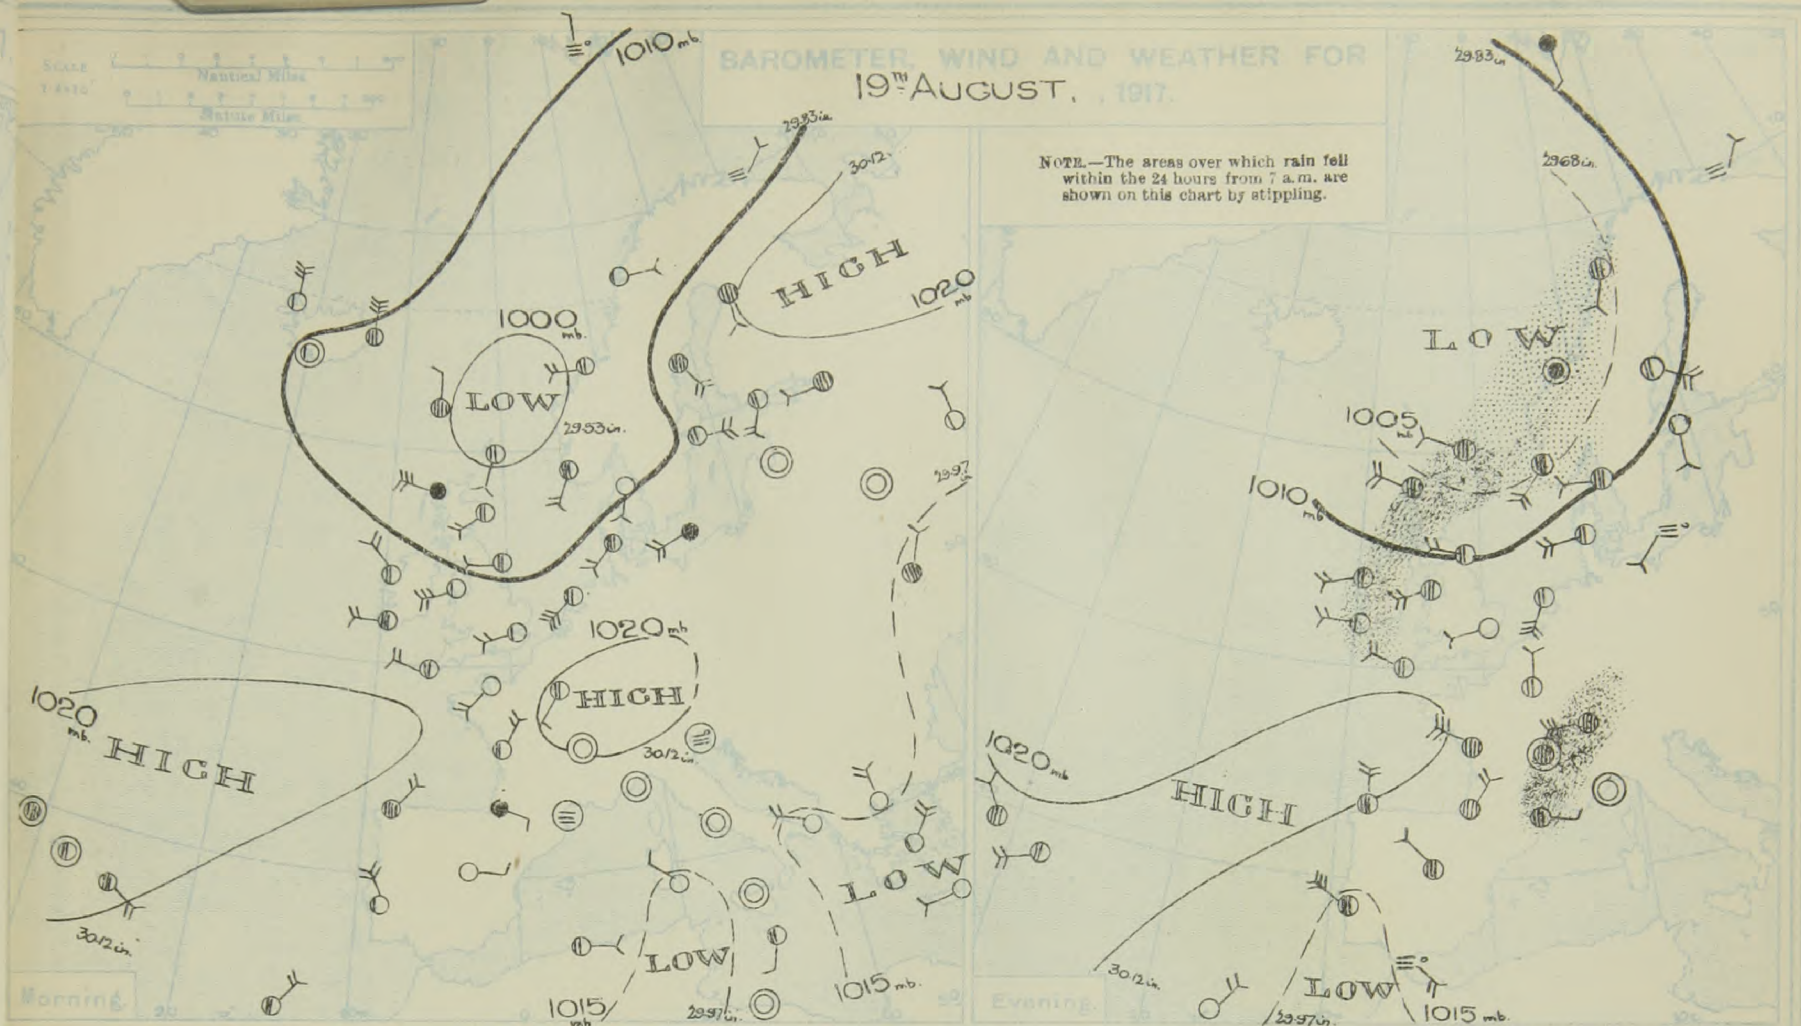

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.
WIND.—Direction is shown by arrows flying with the wind.
 Force, on the scale 0-12, is indicated by the number of feathers. Calm
TEMPERATURE.—Given in degrees Fahrenheit.
 Isotherms shown by dotted lines.
WEATHER.—Shown by the following symbols:—
 clear sky. sky $\frac{1}{2}$ clouded. sky $\frac{3}{4}$ clouded. overcast sky. rain falling.
 * snow. hail. fog. mist. thunder.
 thunderstorm.
SEA DISTURBANCE.—Rough High Very High Storm Gale Hurricane

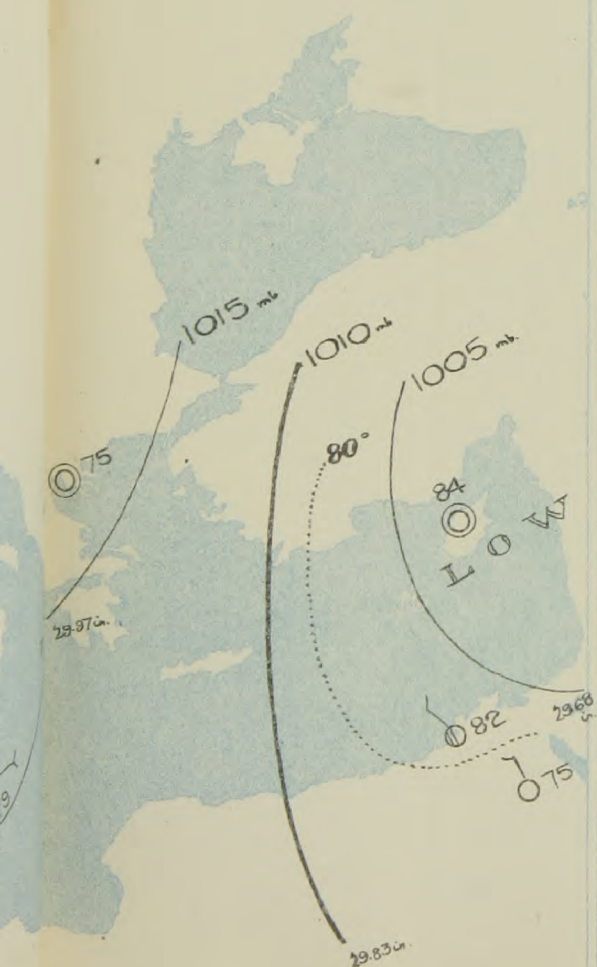

Notes on the Present Situation at 7 a.m. To-day

There is a large but not very deep depression off the west coast of Norway. The anticyclone over the Azores extends north-eastward as far as France. The barometer is rising slowly over Great Britain, but in Ireland a slight fall has commenced and in this region the light Westerly current has backed towards the South. The weather is fine over England, France and Holland, but is cloudy or showery further north.

The Outlook

The new depression in the west will probably extend its influence eastwards and bring about a gradual return of showery conditions over those parts of the British Isles where the weather has become fine. The wind will back to SW. generally, but is not likely to be of much strength.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20361. Tuesday, 21st AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Some rain fell at Malin Head and in the West of Scotland and slight passing showers were experienced in many other regions. At Glasgow there was thunder and at Margate a thunderstorm. Temperature touched or just exceeded 70° at a few English stations, but as a whole the readings were somewhat low for the time of year. Bright sunshine was more abundant in England than elsewhere. At some Southern stations it was more than 11 hours.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE

THE MORNING OF TUESDAY, 21ST AUGUST, 1917.

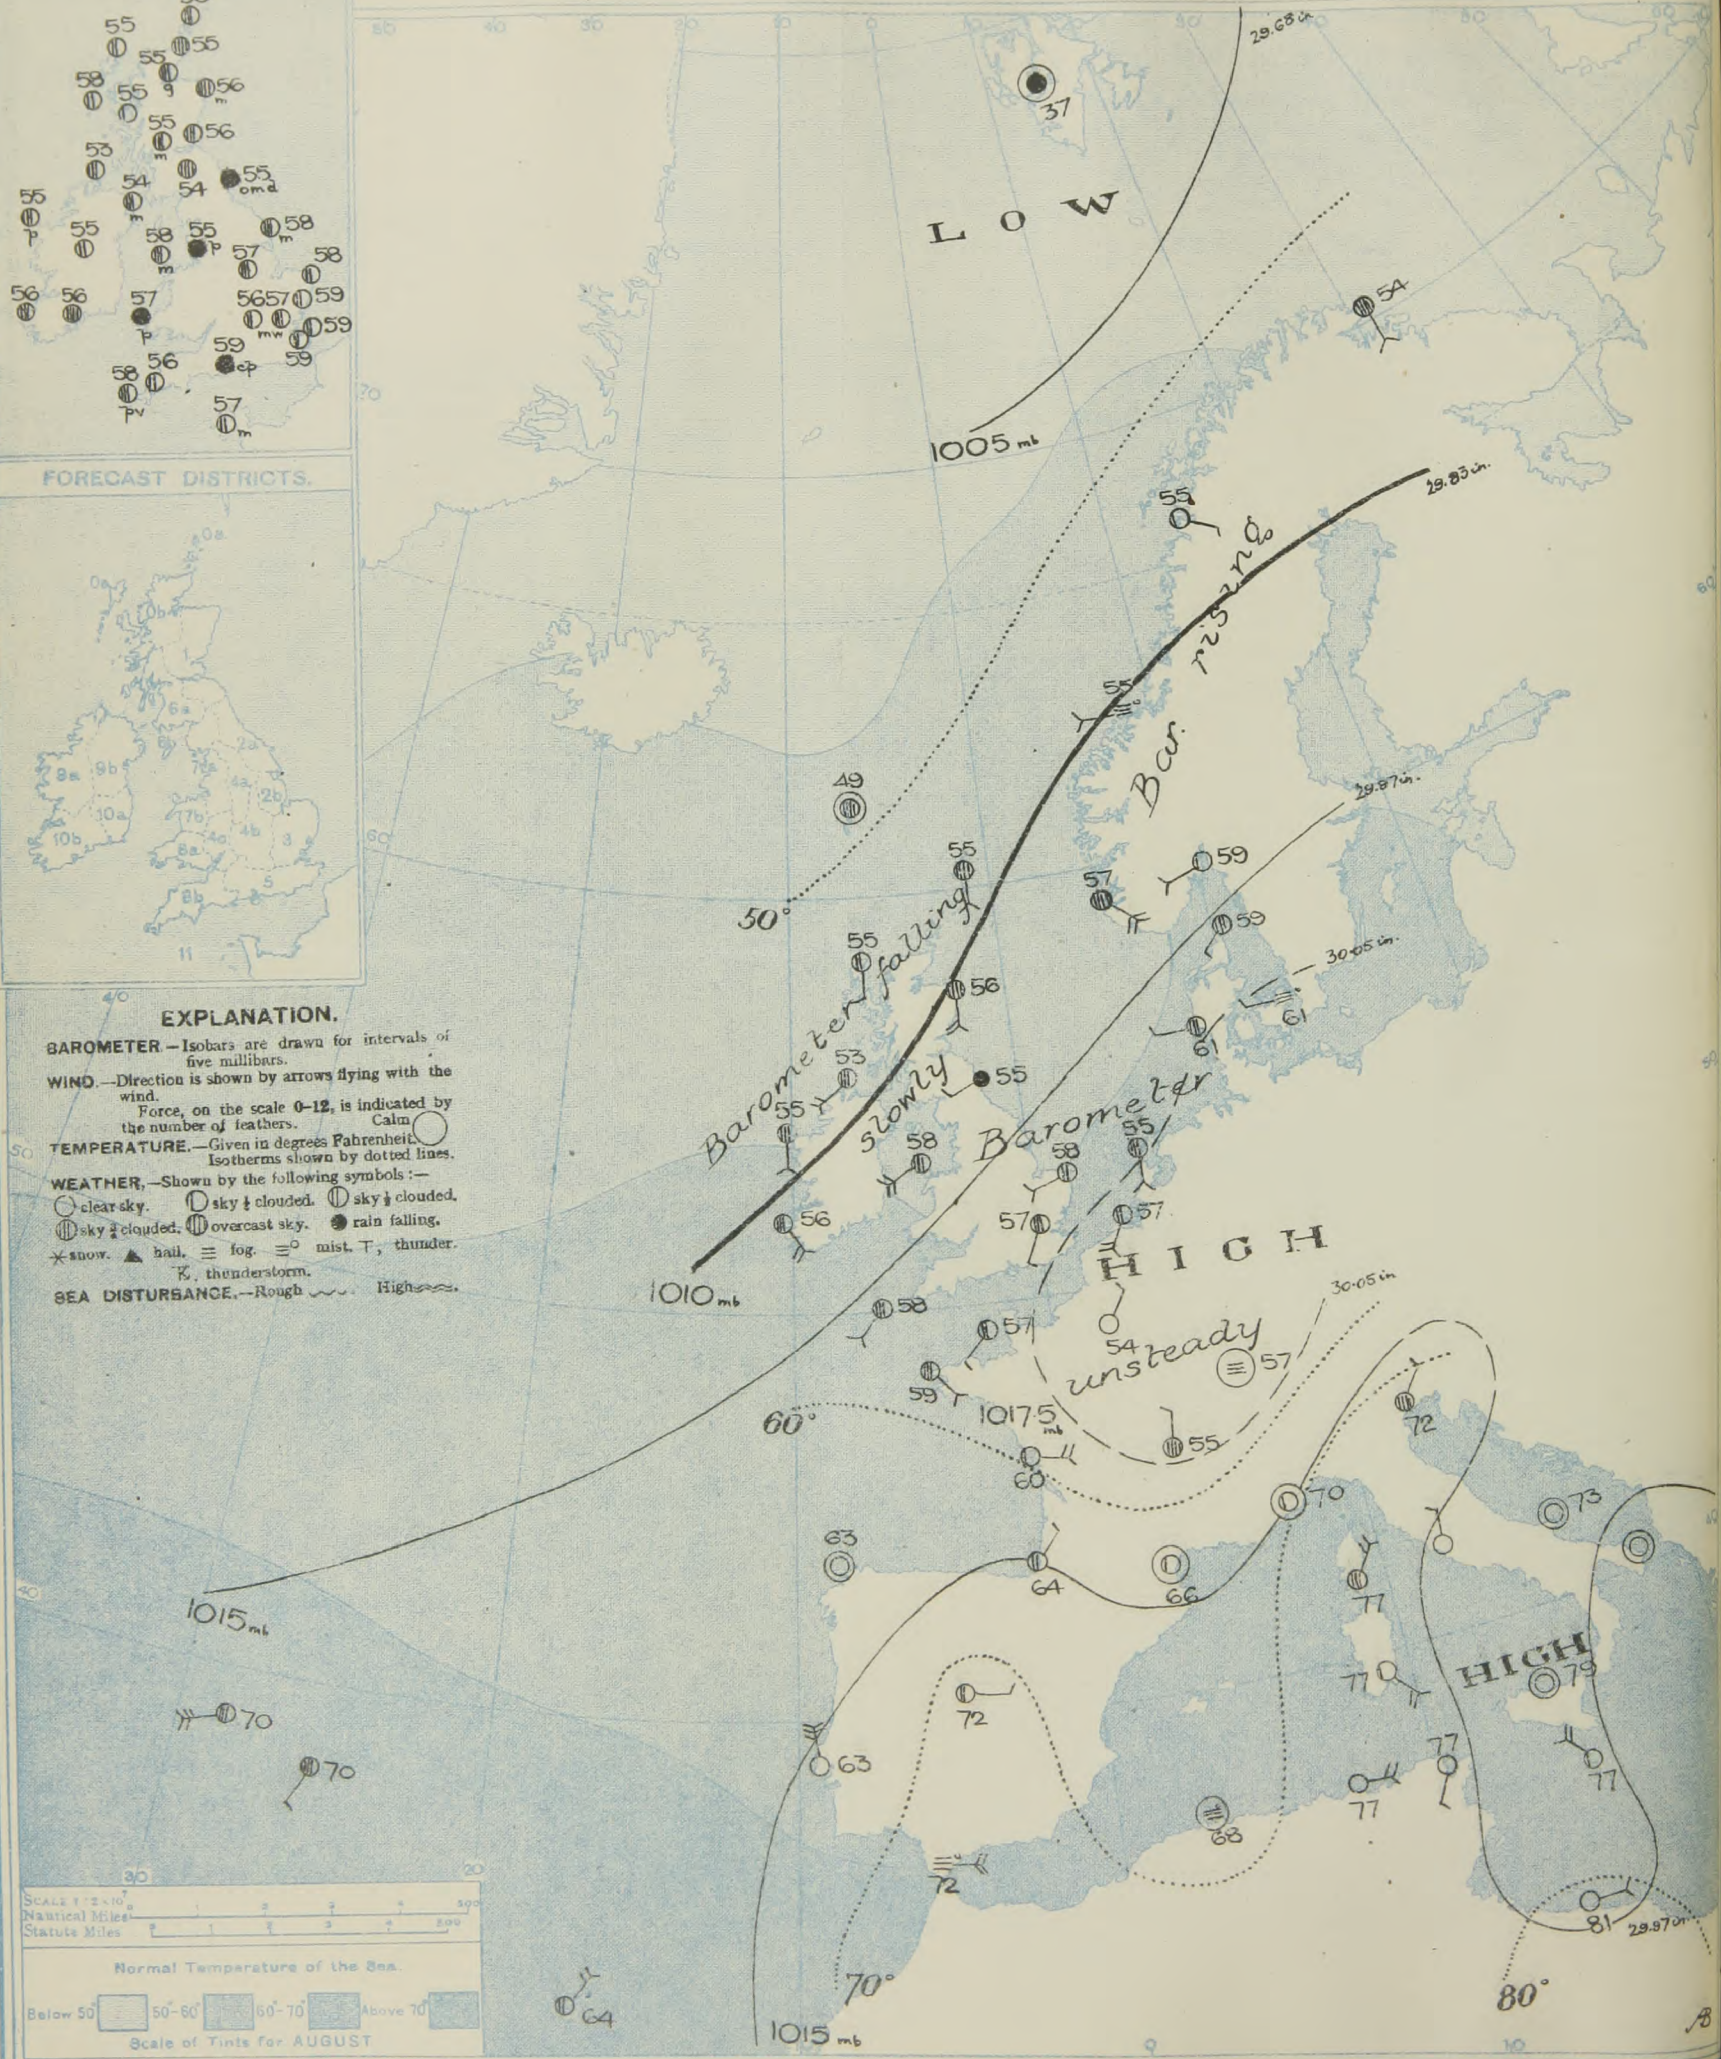

FORECAST DISTRICTS.

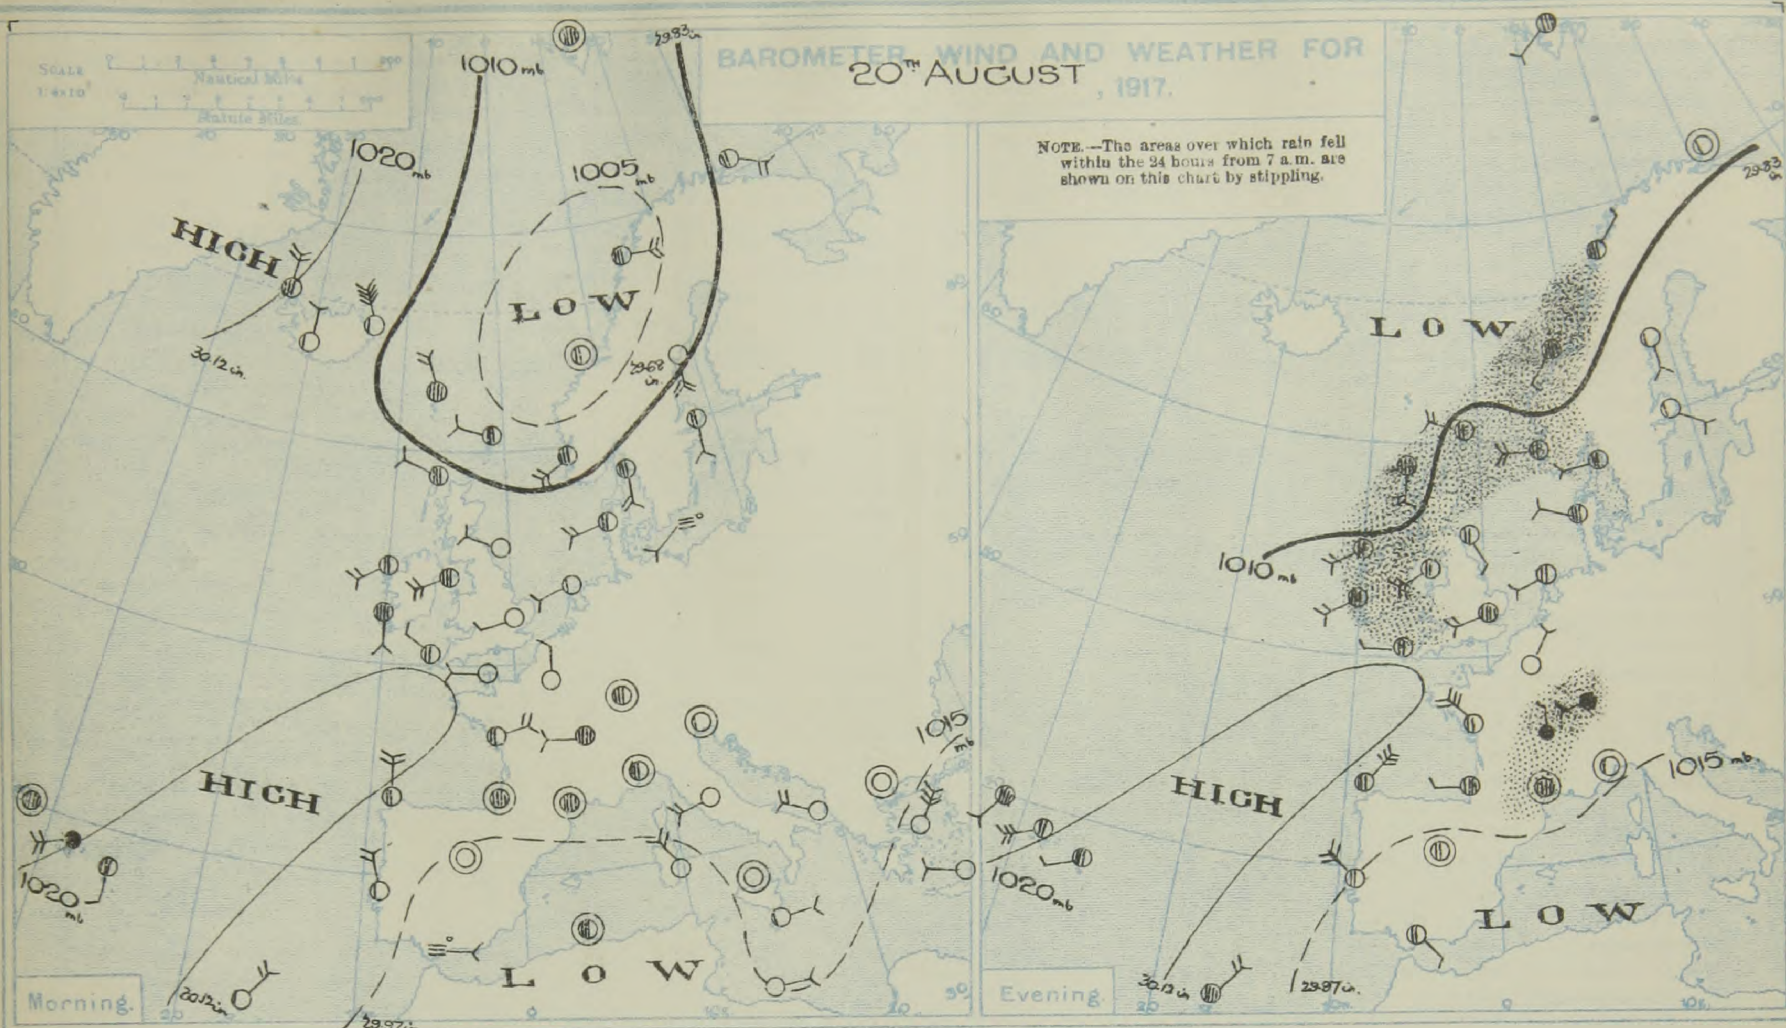

EXPLANATION.

- BAROMETER**—Isobars are drawn for intervals of five millibars.
- WIND**—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm.
- TEMPERATURE**—Given in degrees Fahrenheit. Isotherms shown by dotted lines.
- WEATHER**—Shown by the following symbols:—
 ○ clear sky. ○ sky & clouded. ○ sky & clouded.
 ○ sky & clouded. ○ overcast sky. ● rain falling.
 * snow. ▲ hail. ≡ fog. ○ mist. T, thunder.
 K, thunderstorm.
- SEA DISTURBANCE**—Rough High

BAROMETER, WIND AND WEATHER FOR 20th AUGUST, 1917.

Notes on the Present Situation at 7 a.m. To-day

There appears to be a moderately large but shallow depression beyond the West and North-West of Ireland. This is causing a very slight fall of the barometer in Ireland and Western England, but over Great Britain generally pressure is steady. Within the area of highest barometer over France it is either steady or inclined to increase.

The Outlook

The Atlantic depression will probably extend slowly over the British Isles as it moves in a North-Easterly direction, but it is not likely to cause any great alteration in the general distribution of pressure, so that the wind will continue between S. and SW. generally, the weather rather unsettled and the temperature moderate or rather low for the time of year.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,362. WEDNESDAY, 22ND AUGUST, 1917. 7h. C.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature rose to about 70° in some England localities, but remained below 65° in many Western and Northern districts. Rain fell in most places, as much as 24 mm. at Roches Point, little elsewhere. Thunder and lightning occurred locally. Bright sunshine was more prevalent in the South and South-East than in most other regions.

BRITISH WEATHER RECORD, TEMPERATURE, SUNSHINE AND RAINFALL To 17h. 21ST AUGUST.

TEMPERATURE, WEATHER AND SEA DISTURBANCE

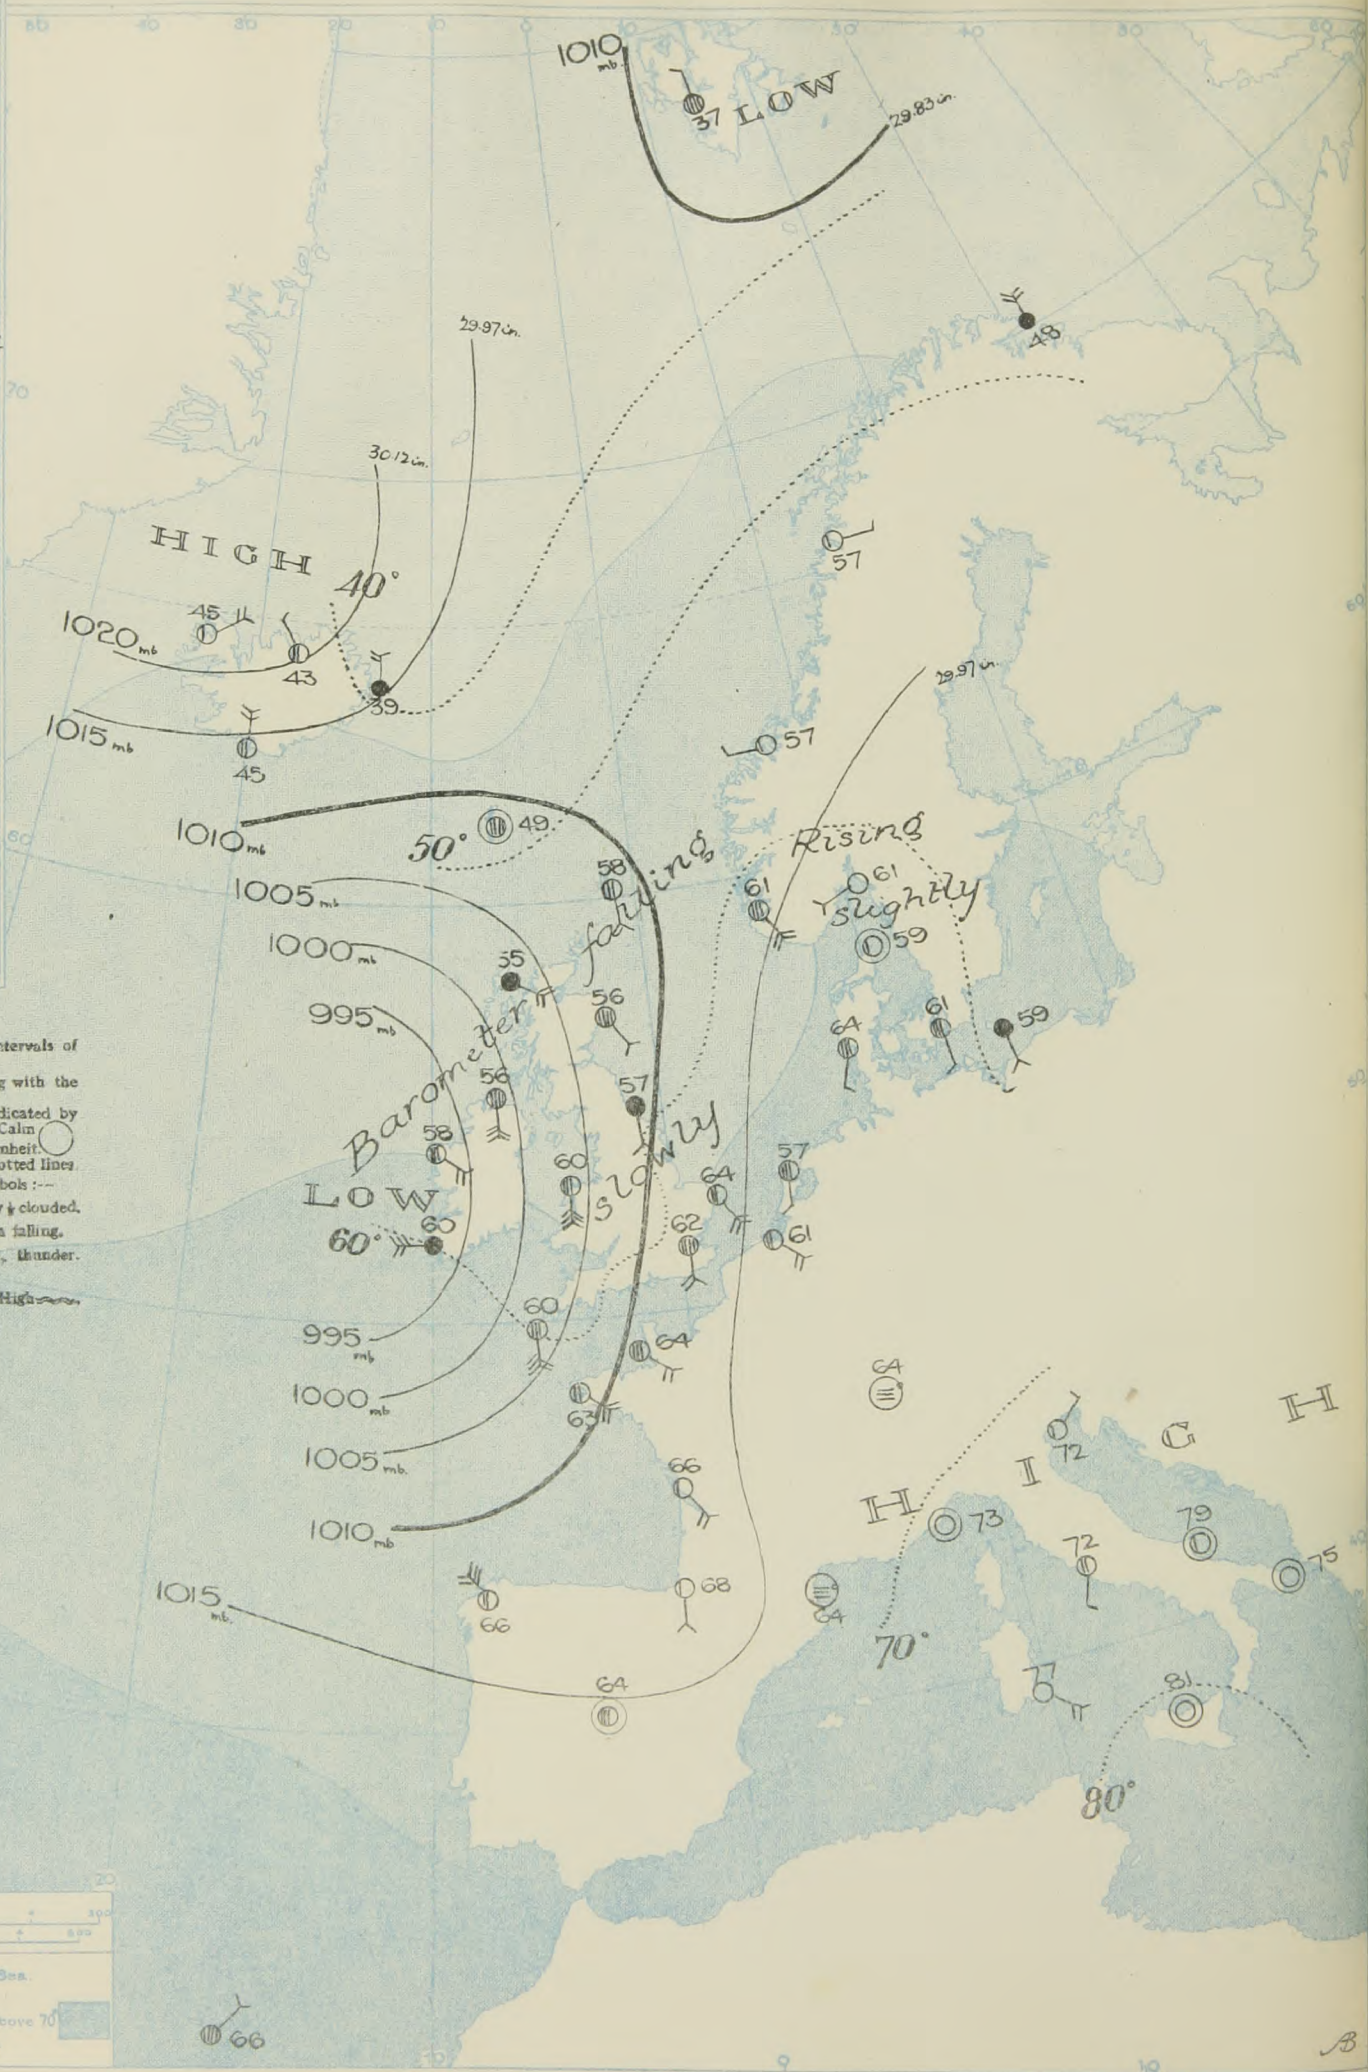

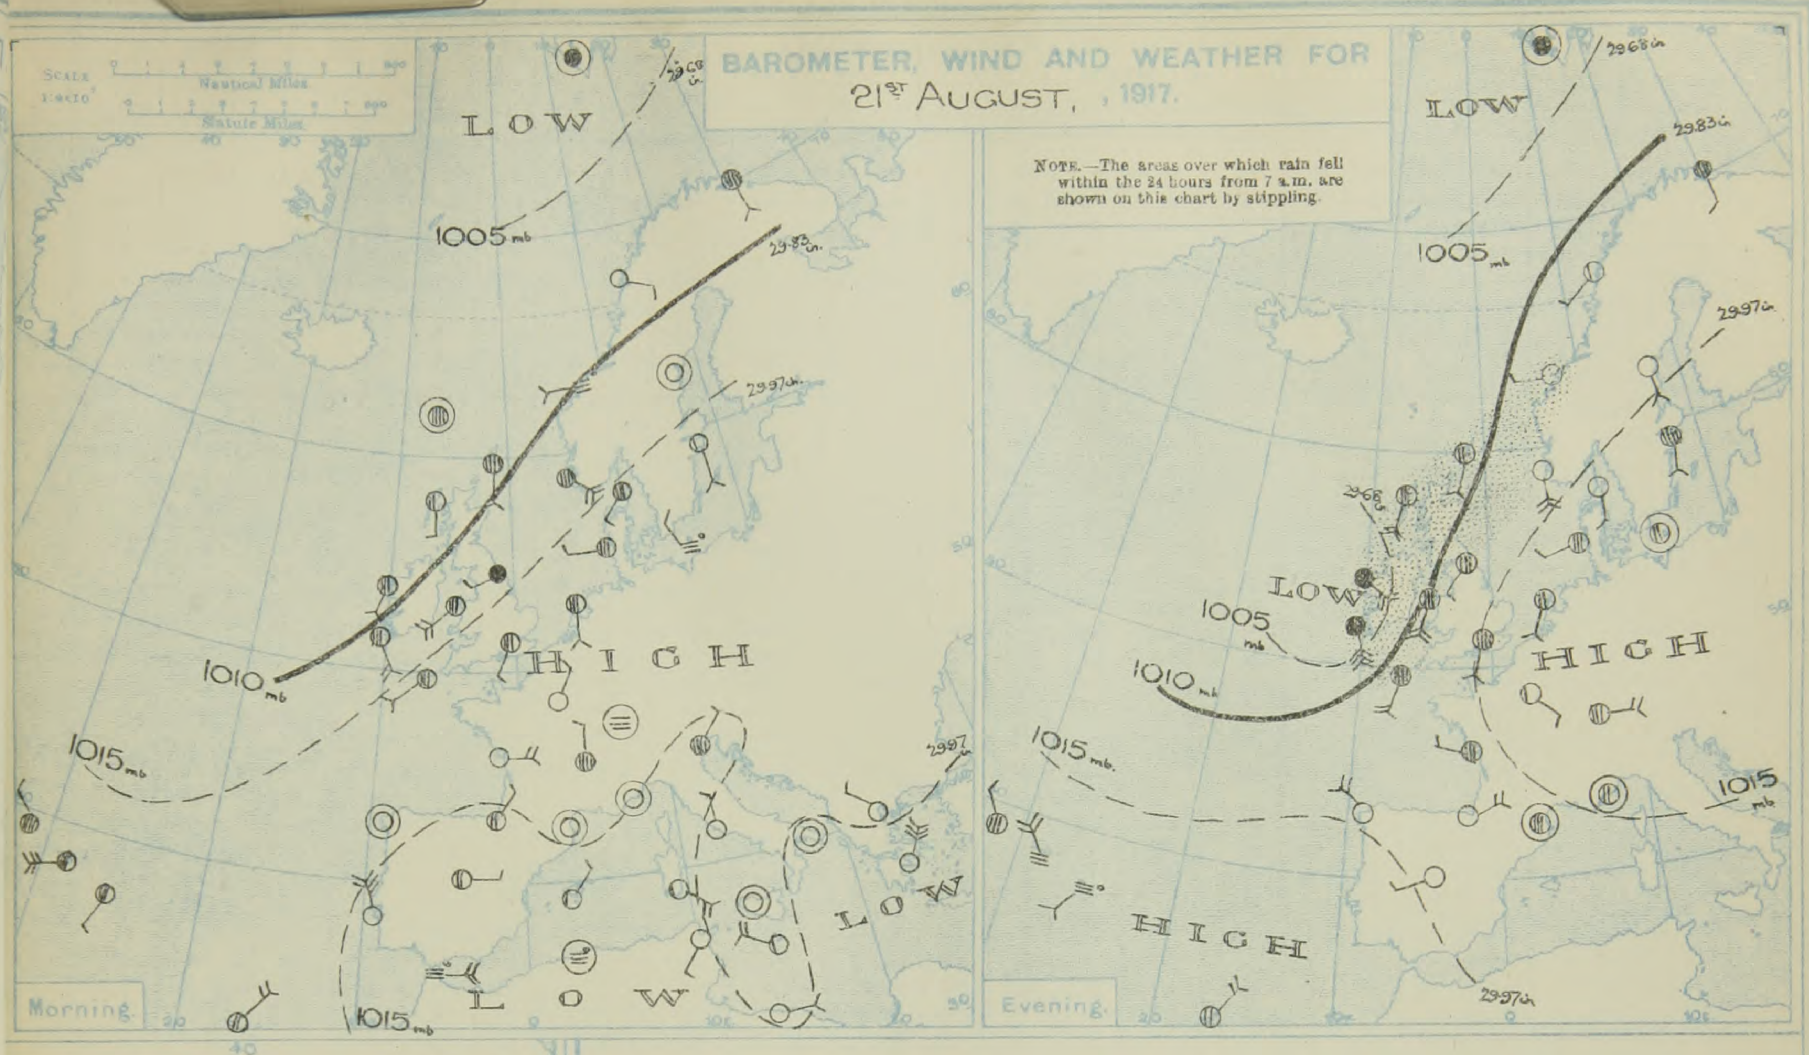

FORECAST DISTRICTS.

EXPLANATION.

- BAROMETER.**—Isobars are drawn for intervals of five millibars.
- WIND.**—Direction is shown by arrows flying with the wind.
Force, on the scale 0-12, is indicated by the number of feathers. Calm ☉
- TEMPERATURE.**—Given in degrees Fahrenheit.
Isotherms shown by dotted lines.
- WEATHER.**—Shown by the following symbols:—
☉ clear sky. ☉ sky & clouded. ☉ sky & clouded.
☉ sky & clouded. ☉ overcast sky. ☉ rain falling.
✕ snow. ▲ hail. ≡ fog. ≡ mist. T. thunder.
☉, thunderstorm.
- SEA DISTURBANCE.**—Rough ~~~~~ High ~~~~~

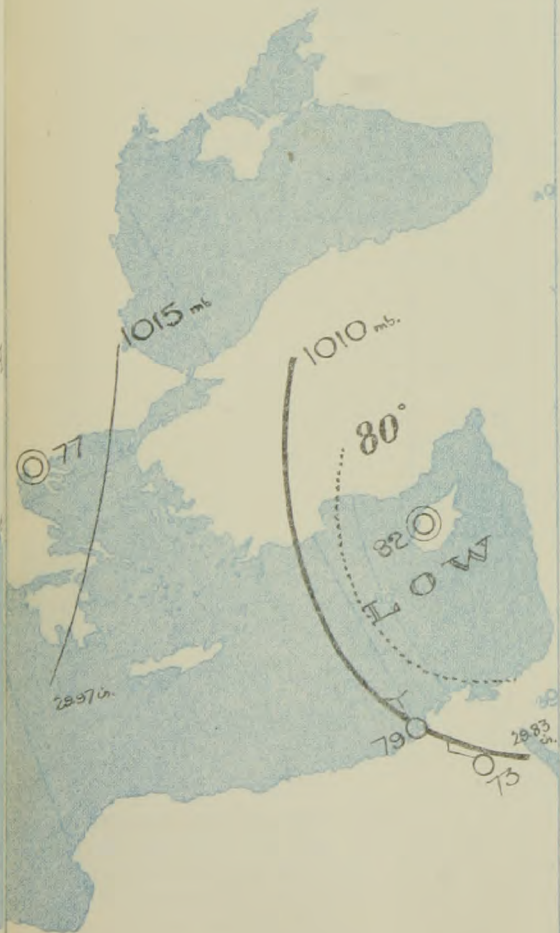

Notes on the Situation at 7 a.m. To-day

The depression on the Atlantic to the Westward of Ireland has proved to be deeper than appeared probable yesterday. It is still extending in an easterly direction, and the barometer is falling briskly at Valencia although the wind there has veered to West. The barometer is now highest to the Eastward and South-Eastward of the North Sea.

The Outlook

The depression on the Atlantic gives no definite indication of its ultimate destination, but it will probably continue to influence the weather conditions over the United Kingdom for some time, and the main wind current, with the barometer highest to the Eastward, is likely to continue Southerly.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,363.

THURSDAY, 23RD AUGUST, 1917.

7h. C.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature rose to about 75° in some parts of England, but barely touched 65° in the West and North of the United Kingdom. Rain fell very generally, the quantity being slight except in the South-West and North-West. At Falmouth the fall was 22 mm, and at Holyhead 36 mm. Thunder and lightning occurred in a few localities. From London unusually frequent lightning was observed in the East and South during several hours after 9 p.m.

TEMPERATURE, WEATHER AND SEA DISTURBANCE.

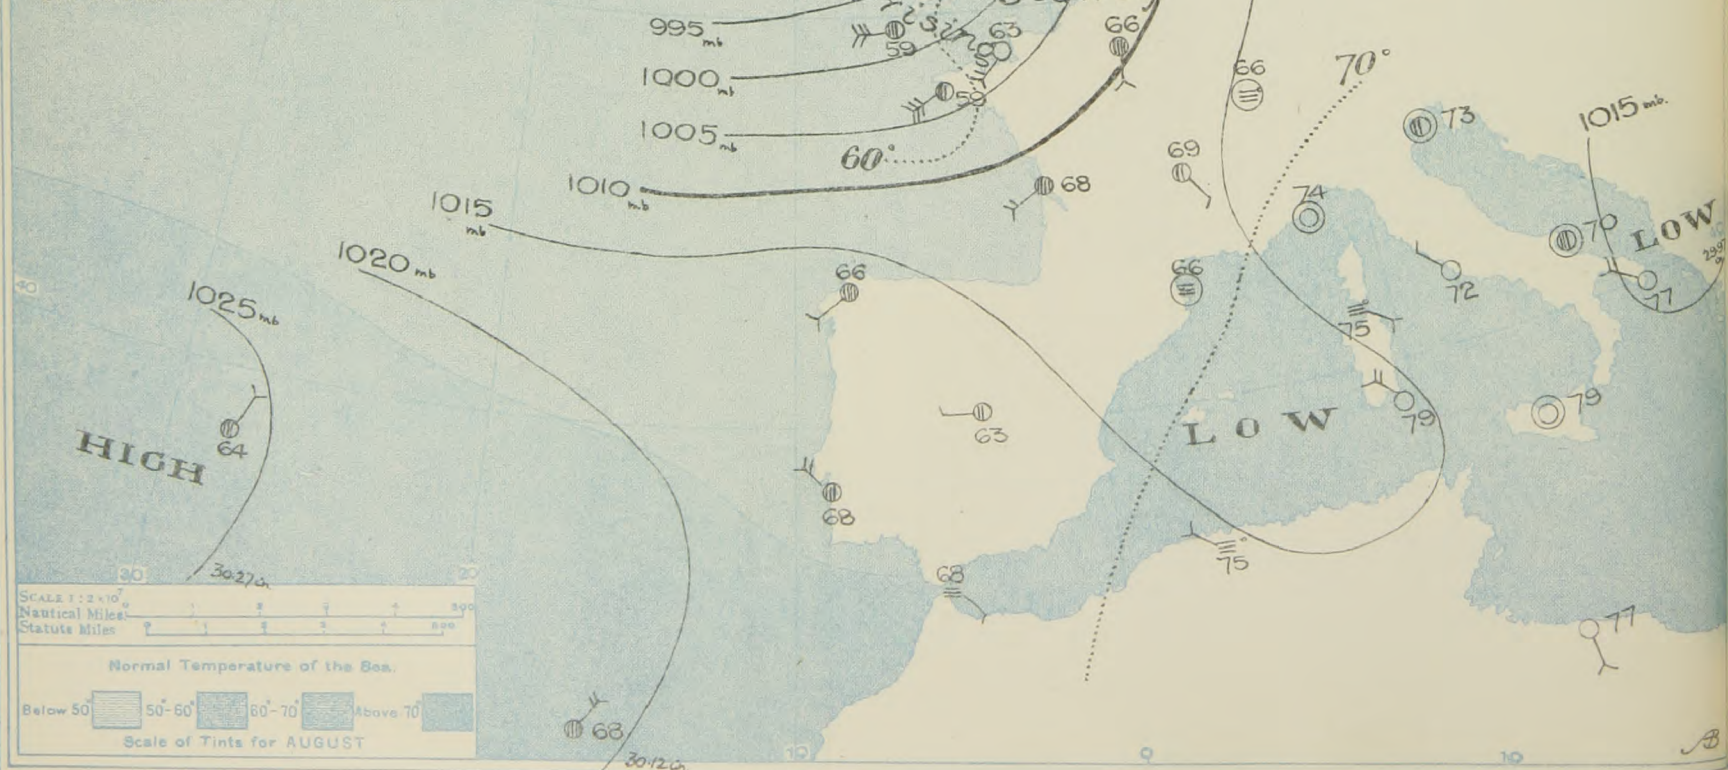

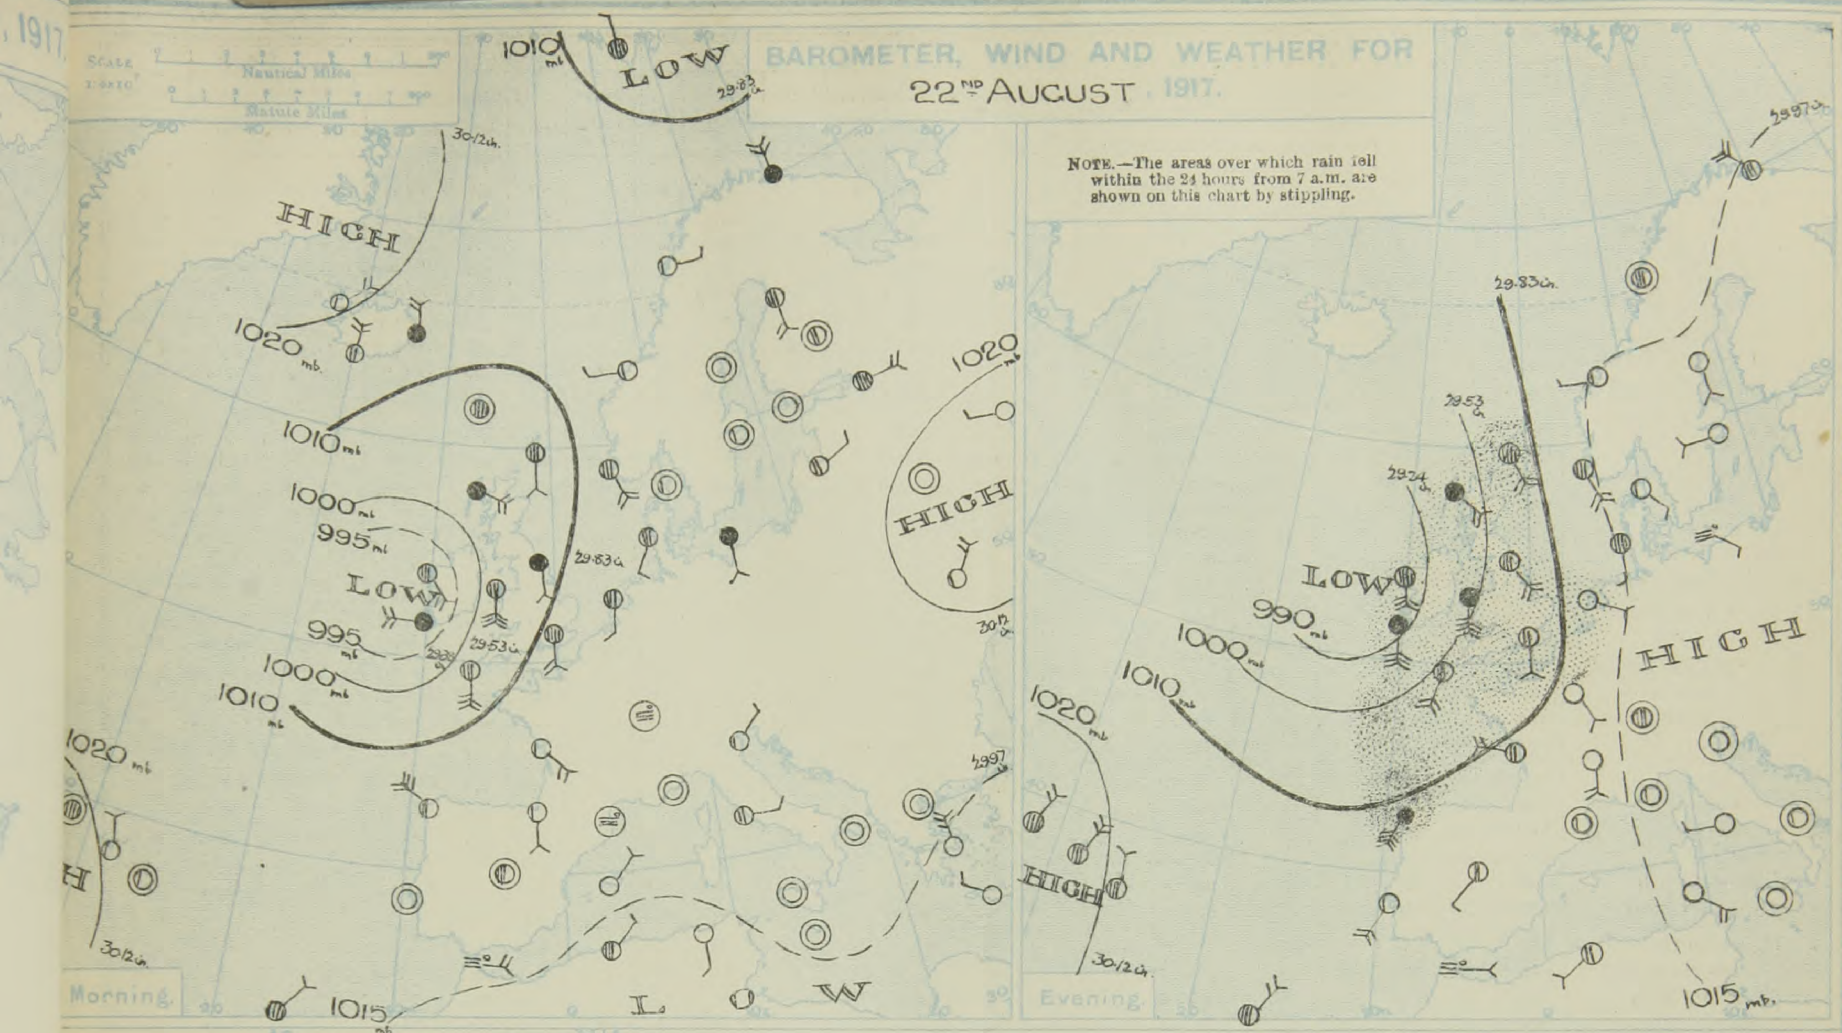

FORECAST DISTRICTS.

EXPLANATION.

- BAROMETER.**—Isobars are drawn for intervals of five millibars.
- WIND.**—Direction is shown by arrows flying with the wind.
Force, on the scale 0-12, is indicated by the number of feathers. Calm.
- TEMPERATURE.**—Given in degrees Fahrenheit.
Isotherms shown by dotted lines.
- WEATHER.**—Shown by the following symbols:—
○ clear sky. ○ sky & clouded. ○ sky & clouded.
○ sky & clouded. ○ overcast sky. ● rain falling.
✱ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.
T, thunderstorm.
- SEA DISTURBANCE.**—Rough. High.

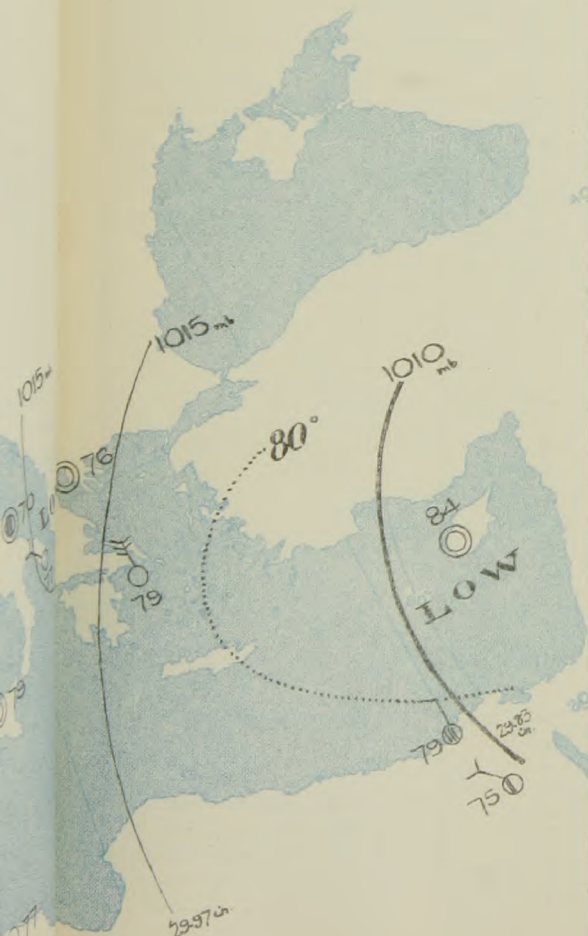

Notes on the Present Situation at 7 a.m. To-day

The centre of the depression is now off the North-West of Ireland, while a slight secondary is shown over the South of Ireland. Pressure is still decreasing slowly generally, but a rise has now commenced in the extreme South-West of these Islands, where also the wind is veering. Rain is falling with the South wind at many places in England, as well as at Havre and Cape Gris Nez.

The Outlook

It seems probable that the depression will move North-Eastward or Northward, while small irregularities of pressure pass directly over various parts of the United Kingdom, and pressure continues highest to the Eastward and Southward or South-Westward. A continuation of South and South-West to West winds is consequently to be expected, with occasional showers and thunder locally.

Thursday,
23rd AUGUST

BEAUFORT NOTATION.

b blue sky (not more than a quarter of the sky covered).
bc sky partly cloudy (one half covered).
c generally cloudy (three quarters covered).
d drizzle, or fine rain.
e wet air without rain falling, a copious deposit of water on trees, buildings or rigging.
f fog.
g gloom.
h hail.
l lightning.
m. mist.
o overcast sky.
p passing showers.
q squalls.
r rain.
rs sleet, i.e., rain and snow together.
s snow.
t thunder.
u ugly, threatening sky.
v unusual visibility. The horizon or distant hills unusually clear.
w dew.
x hoar frost.
y dry air; humidity less than 60 per cent.
z dust haze; the turbid atmosphere of dry weather.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,364.

FRIDAY, 24th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature again touched 70° in several parts of England. Rain or passing showers fell very generally, the quantity being considerable at some Western and Northern stations. A fair amount of sunshine was recorded in most English localities and a moderate amount in Ireland, but in Scotland there was very little.

TEMPERATURE, WEATHER AND SEA DISTURBANCE.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

Force, on the scale 0-12, is indicated by the number of feathers.

TEMPERATURE.—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

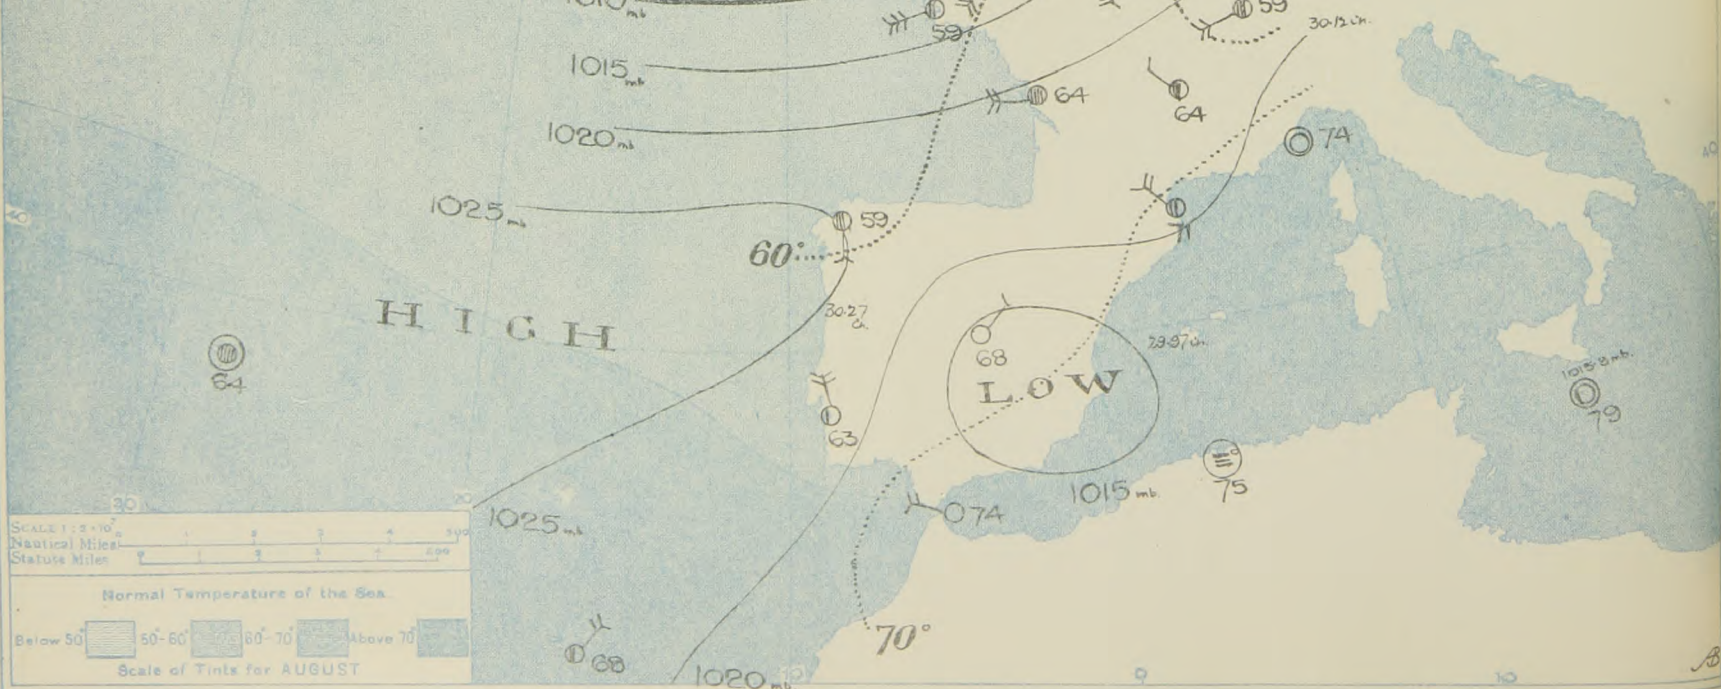

WEATHER.—Shown by the following symbols:—

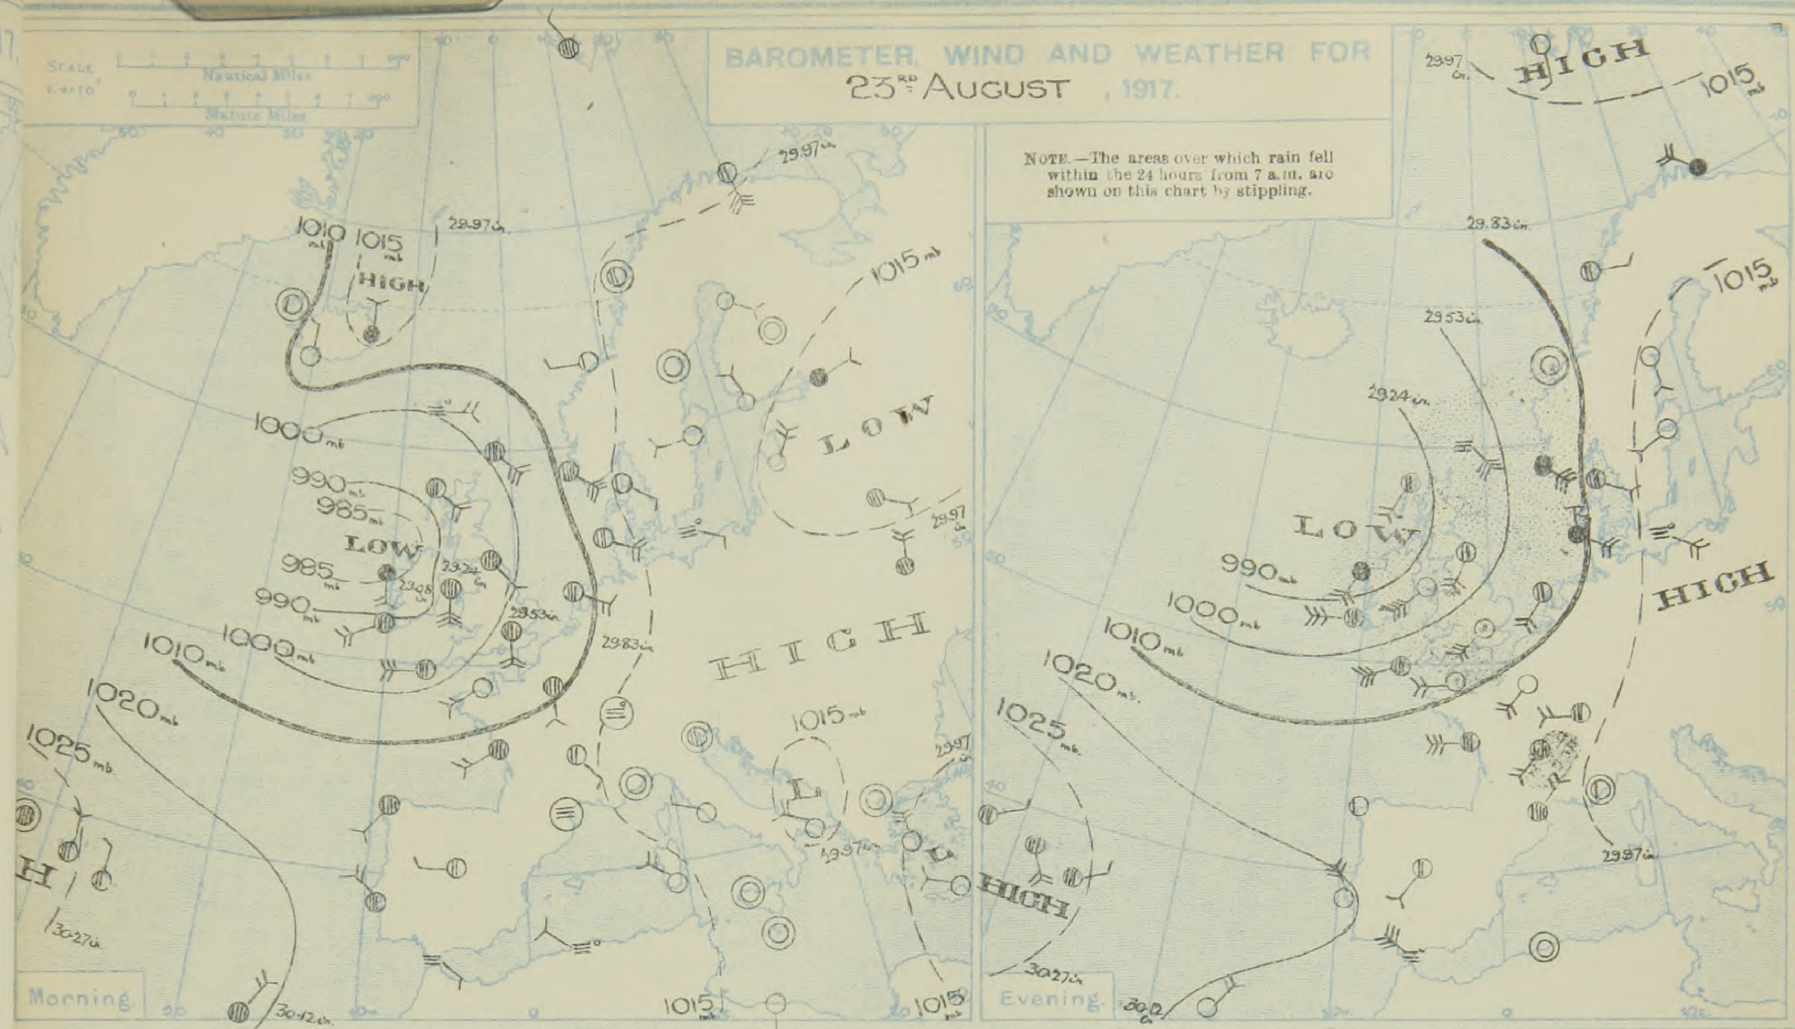

○ clear sky. ○ sky & clouded. ○ sky & clouded.

○ sky & clouded. ○ overcast sky. ○ rain falling.

* snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

SEA DISTURBANCE.—Rough. High.

Notes on the Situation at 7 a.m. To-day

The depression is now lying over Scotland, with the barometer falling slightly in the Eastward of that country, and rising briskly in Ireland and the South-West and South of England. The gradient has increased since yesterday over the British Isles generally, and is at present steepest in the South-West and South districts. At some stations on the shores of the English Channel the South-West wind blows with the force of a gale.

The Outlook

The present tendency of the depression appears to be to travel Eastward. Its rate of movement will probably continue slow, so that its effect on the wind and weather over these Islands will only cease gradually. In the meantime it is to be expected that small secondary disturbances will pass across the Kingdom from the Atlantic, accompanied by further squalls and showers.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,365. SATURDAY, 25th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Showers or more lengthy periods of rain were again experienced very generally; in most places the measurement was slight, but in Scotland the fall was heavier - 14 mm. at Nairn. Over the United Kingdom as a whole there was little bright sunshine, but the records were fair at some Southern and South-Eastern stations, and large in the Channel Islands.

THE MORNING OF SATURDAY, 25TH

AUGUST, 1917.

FORECAST DISTRICTS.

EXPLANATION.

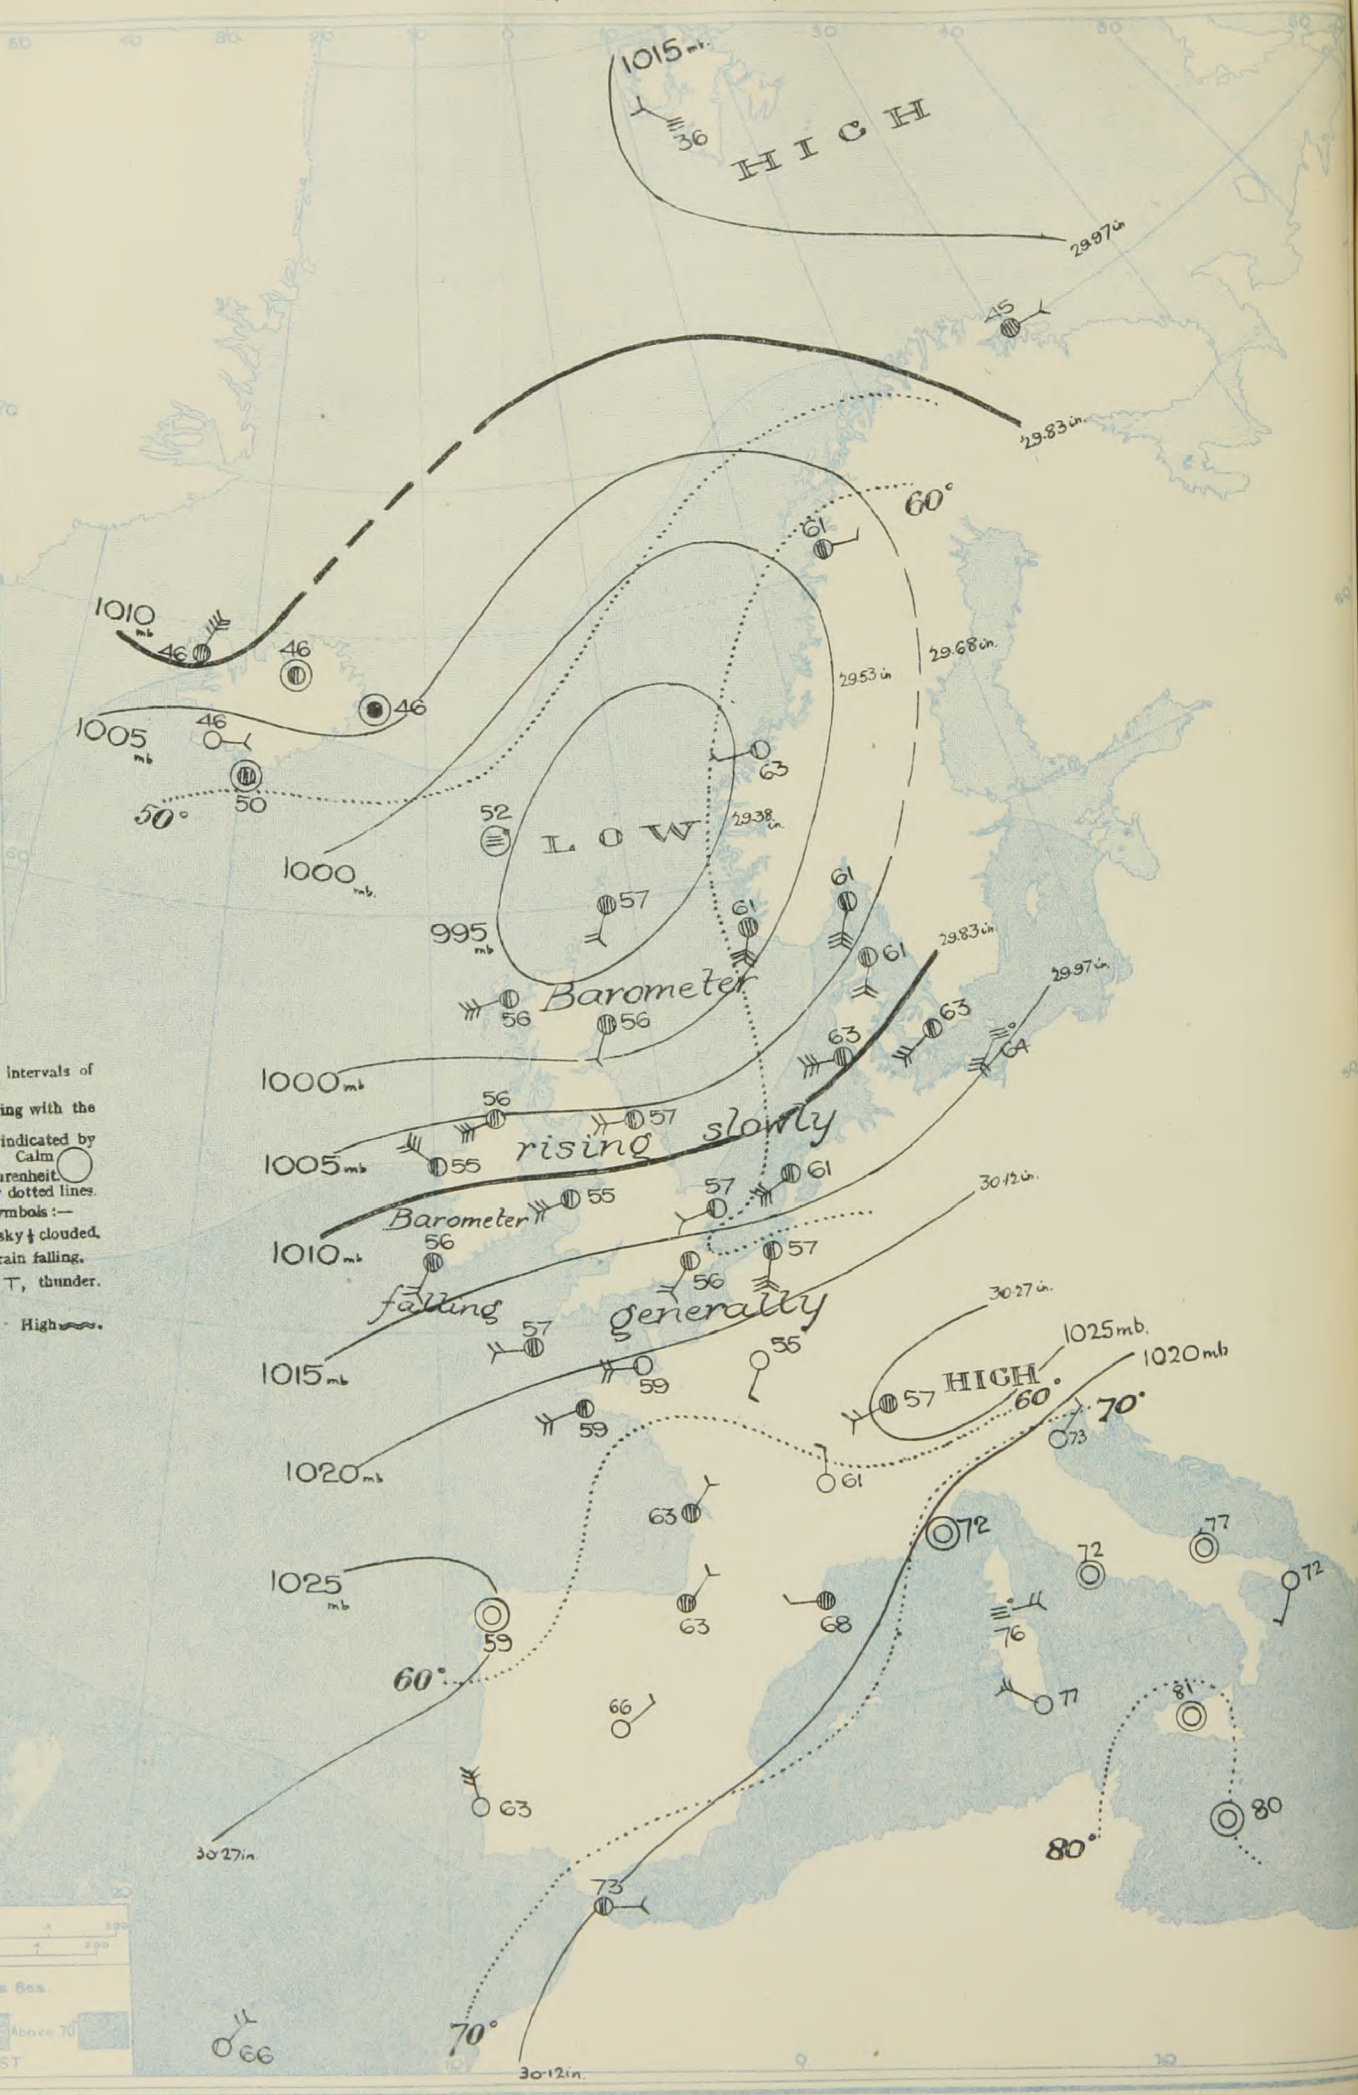

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm.

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—
○ clear sky. ○ sky 1/2 clouded. ○ sky 3/4 clouded.
● sky 3/4 clouded. ● overcast sky. ● rain falling.
✱ snow. ✱ hail. ☼ fog. ☼ mist. T, thunder.
T, thunderstorm.

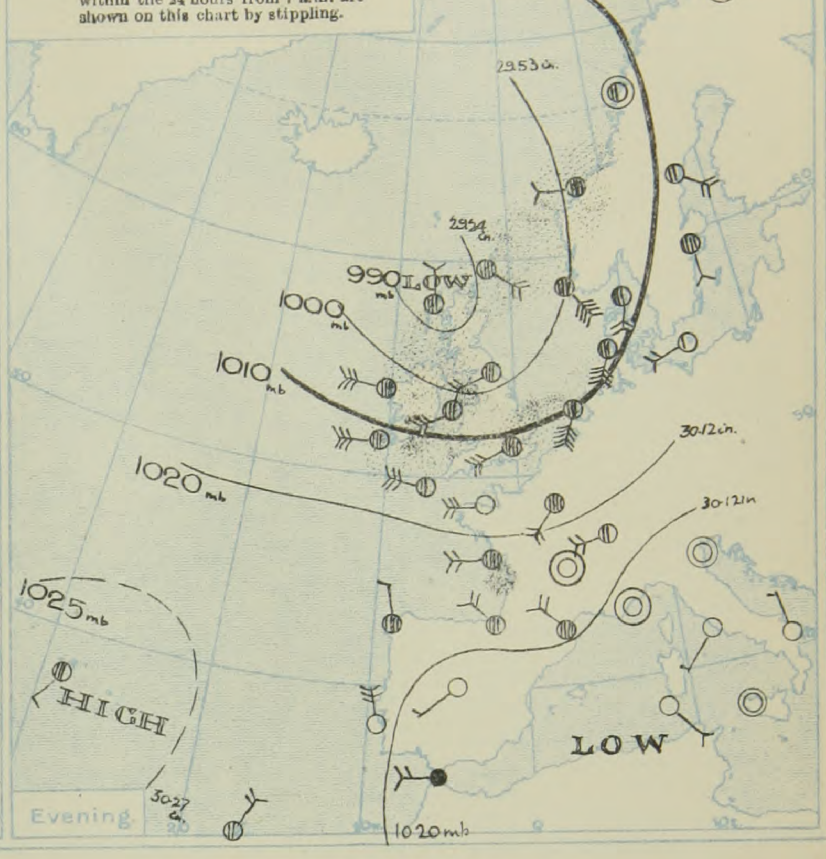

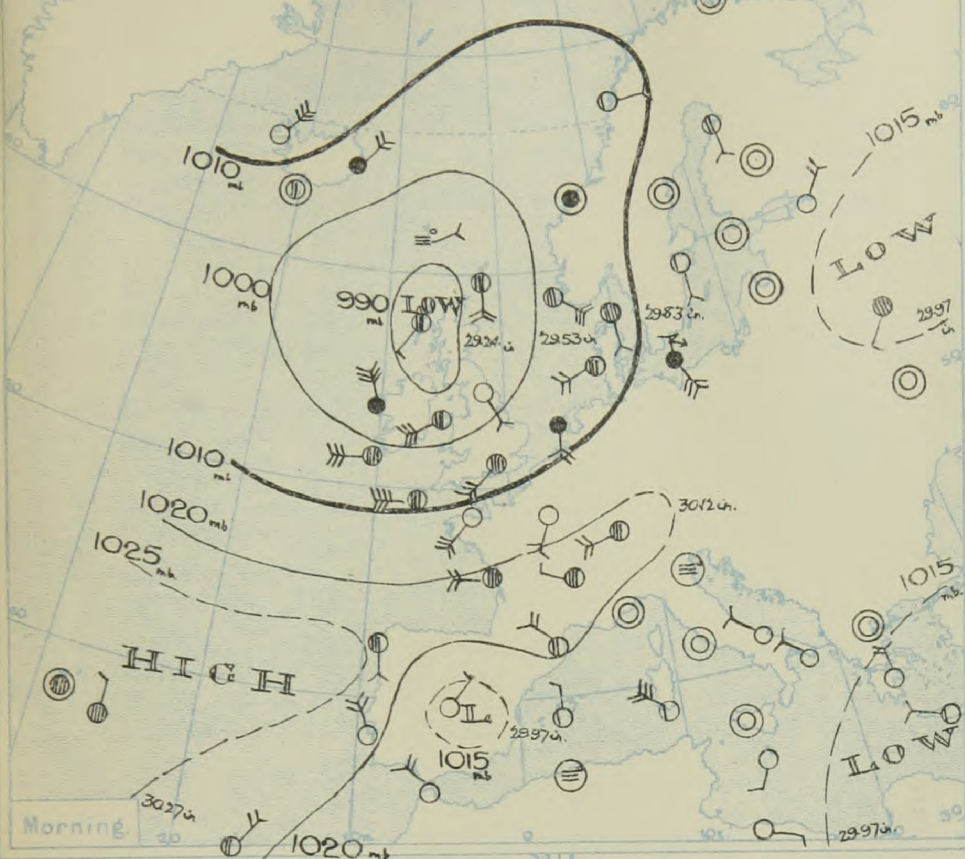

SEA DISTURBANCE.—Rough wavy. High wavy.

BAROMETER, WIND AND WEATHER FOR 24TH AUGUST, 1917.

NOTE.—The areas over which rain fell within the 24 hours from 7 a.m. are shown on this chart by stippling.

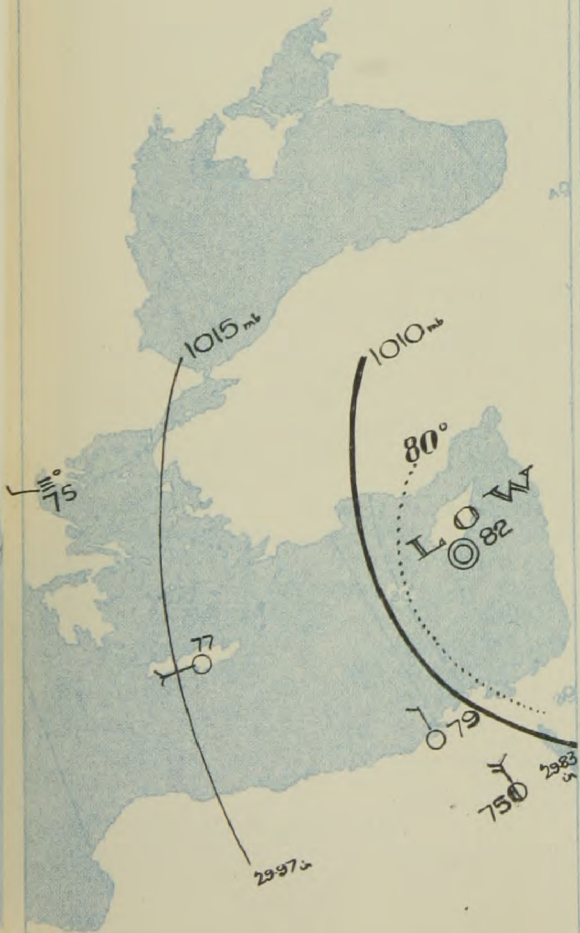

Notes on the Situation at 7 a.m. To-day

The depression of the past few days has now travelled beyond the North of Scotland and the SW. and W winds over the United Kingdom and its vicinity have decreased in force, while the general condition of the weather has improved considerably. Another fall of the barometer has, however, already begun at Valencia, where, too, the wind has backed to SSW.

The Outlook

The pressure distribution over Western and North-Western Europe appears likely to continue favourable for a South-Westerly to Westerly type of conditions for the present. The present fall of the barometer at Valencia probably indicates the approach of another depression which will cause a renewal of the showery conditions in the immediate future.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 6d. at Meteorological Office.

+ The barometric change is expressed in half-millibars.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 29366 SUNDAY, 26TH AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

The day temperature was rather low for the time of year generally, few maxima being above 65°. Rain fell in the northern and western districts, rather heavily over a large area, and except at some eastern and south-eastern stations the sunshine records were very small.

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers. Calm

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

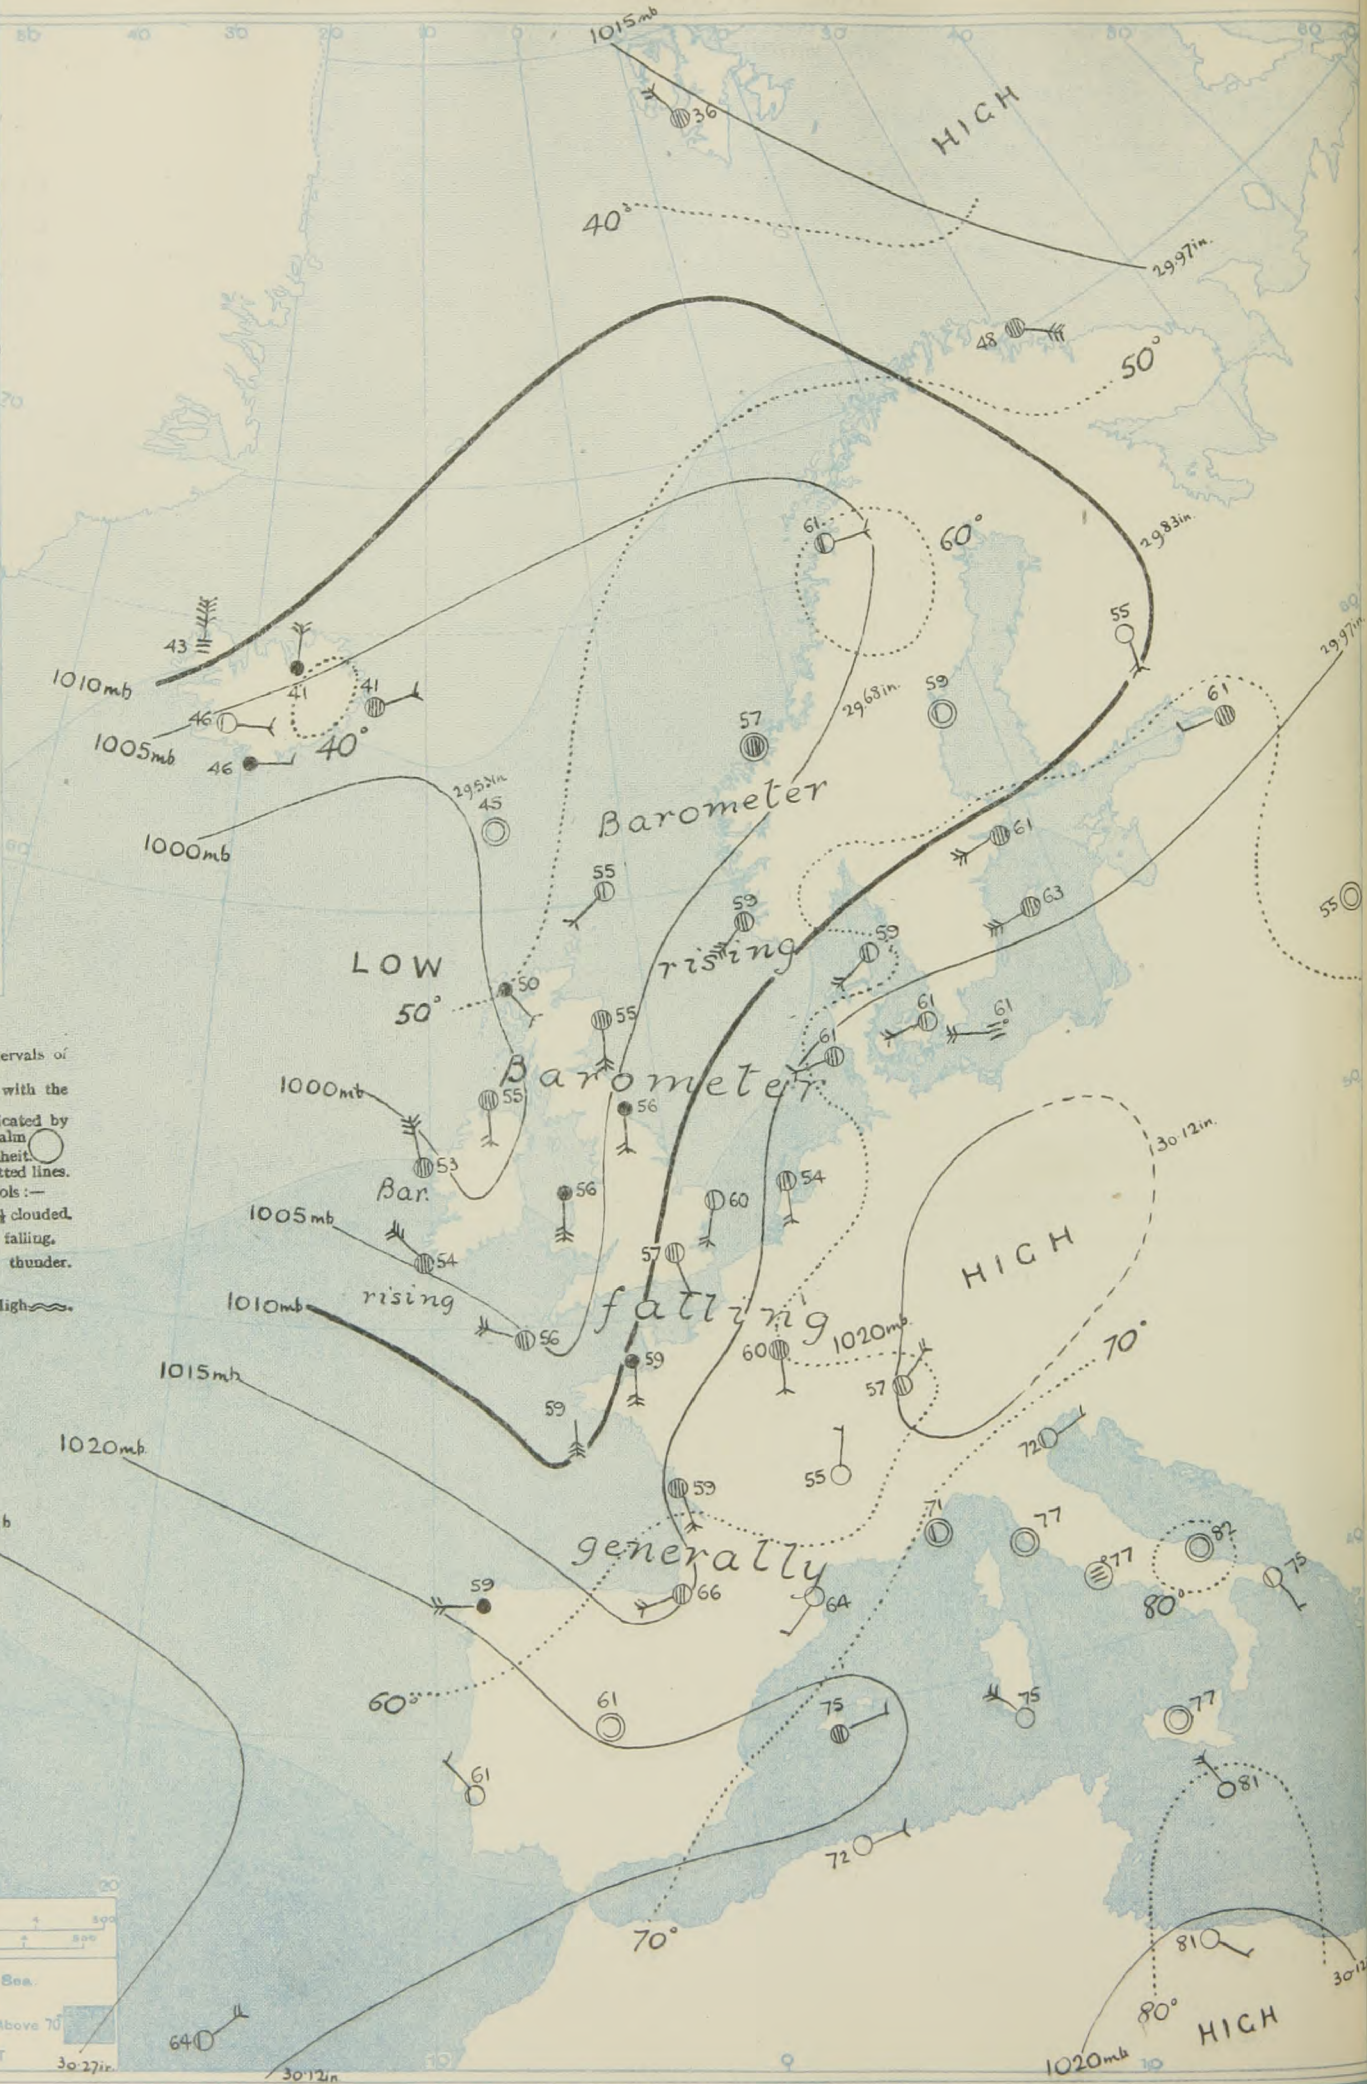

○ clear sky. ○ sky 1/2 clouded. ○ sky 3/4 clouded.

○ sky 3/4 clouded. ○ overcast sky. ● rain falling.

* snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.

⚡, thunderstorm.

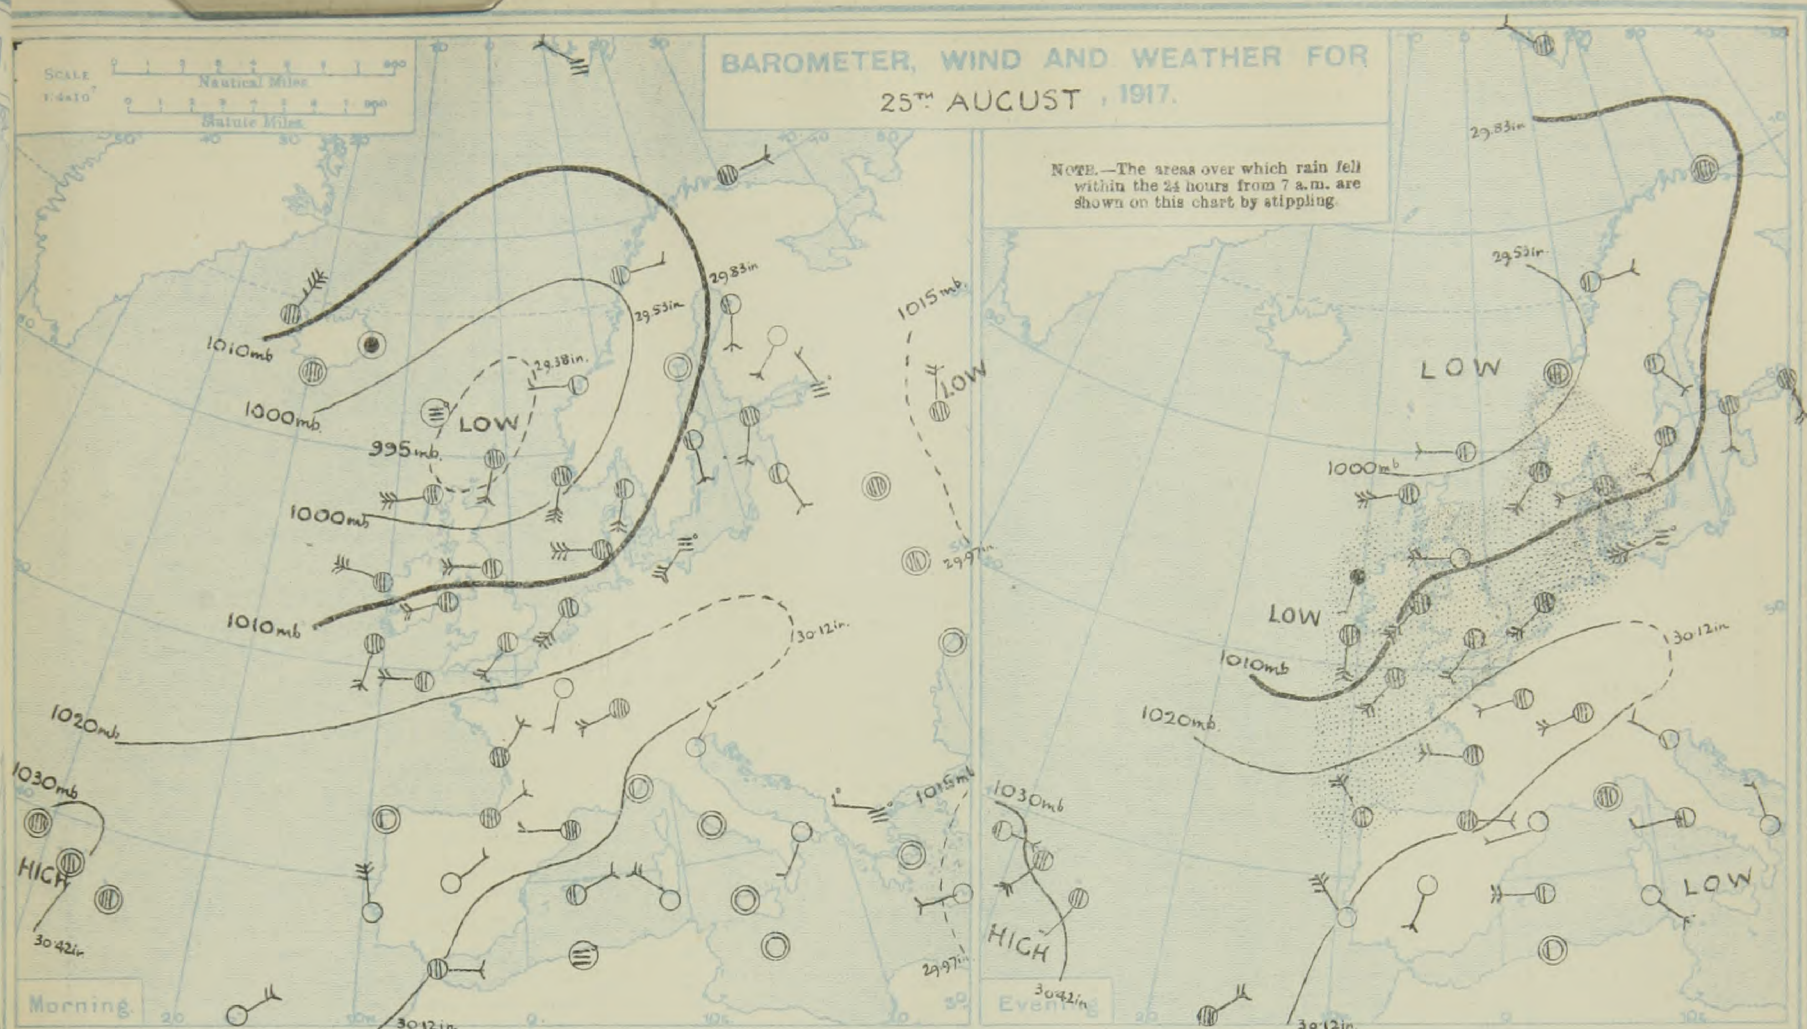

SEA DISTURBANCE.—Rough ~~~~~ High ~~~~~

BAROMETER, WIND AND WEATHER FOR 25TH AUGUST, 1917.

SCALE
1:4010
Nautical Miles
Statute Miles

NOTE.—The areas over which rain fell within the 24 hours from 7 a.m. are shown on this chart by stippling.

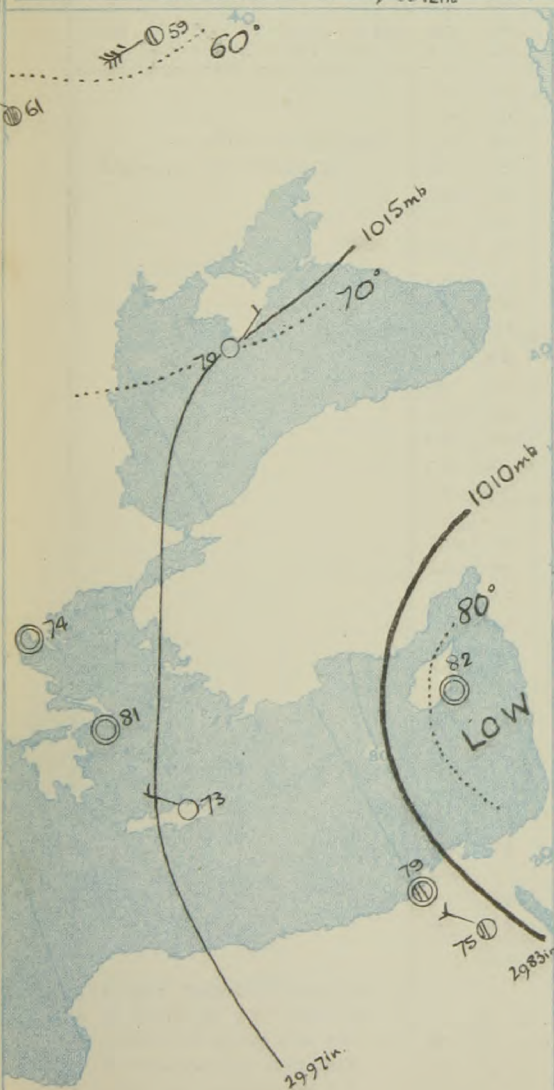

The Present Situation

A "V"-shaped depression has arrived from the Atlantic and now extends from beyond the Hebrides to the Bay of Biscay. The wind is fresh from North-West over the west coast of Ireland, and fresh to strong from the Southward, with rain, from Brittany to the Irish Sea. The highest pressure is still over the Azores region, with relatively high readings beyond Iceland and also over Central Europe.

(August, 26th 7h)

The "V" depression subsequently moved steadily eastward across England to the North Sea, where it became somewhat modified in form and also less deep. During the night a fresh and rapid decrease of pressure set in on the south-west coasts of the British Isles and it became evident that another depression of considerable intensity for the time of year was approaching.

(August 27th 7h)

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,367 MONDAY, 27th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Temperature remained below 65° over a large portion of this country and only touched 60° at many western stations. Rain fell rather heavily at various places; at Spurn Head the measurement was 28 mm. The sunshine records were small generally, but fairly large at a few stations in the south-east.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind.

Force, on the scale 0-12, is indicated by the number of feathers.

TEMPERATURE.—Given in degrees Fahrenheit.

Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—

☉ clear sky. ☁ sky & clouded. ☂ sky & clouded.

☁ sky & clouded. ☂ overcast sky. ☂ rain falling.

* snow. ▲ hail. ☂ fog. ☂ mist. T, thunder.

☂, thunderstorm.

Scale of Tints for AUGUST

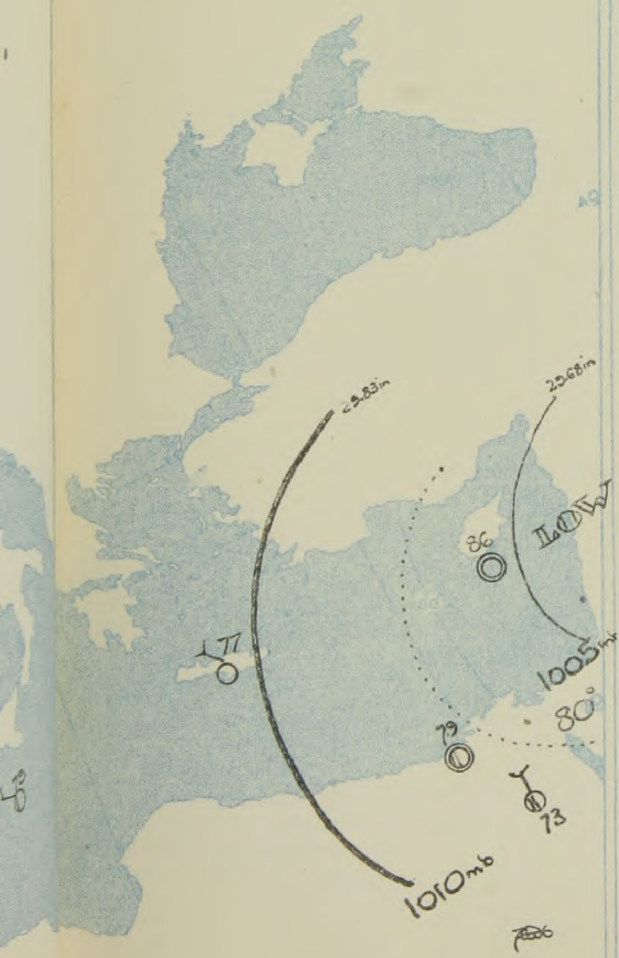

The General Situation.

A depression of a "V"-shaped type that appeared over the British Isles yesterday has become modified in form and now extends from the Dutch coasts to the west of Scotland. During the night a rapid fall of the barometer has set in on our south-west coasts, accompanied by increasing South-Easterly winds in the south-west of England, and strong South-Westerly winds over the Bay of Biscay.

The General Outlook

The new depression appears to be of considerable intensity, and with the general distribution of pressure obtaining, is likely to travel east or north-east directly across the United Kingdom. A prolongation of the unsettled weather is consequently to be expected, with further strong winds or gales in many districts.

BEAUFORT NOTATION.

- b blue sky (not more than a quarter of the sky covered).
- bc sky partly cloudy (one half covered).
- c generally cloudy (three quarters covered).
- d drizzle, or fine rain.
- e wet air without rain falling, a copious deposit of water on trees, buildings or rigging.
- f fog.
- g gloom.
- h hail.
- i lightning.
- m mist.
- o overcast sky.
- p passing showers.
- q squalls.
- r rain.
- rs sleet, i.e., rain and snow together.
- s snow.
- t thunder.
- u ugly, threatening sky.
- v unusual visibility. The horizon or distant hills unusually clear.
- w dew.
- x hoar frost.
- y dry air; humidity less than 60 per cent.
- z dust haze; the turbid atmosphere of dry weather.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20368. ... TUESDAY, 28TH AUGUST 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

The conditions became exceedingly unsettled and

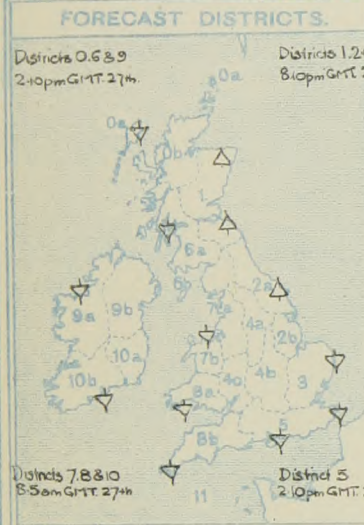

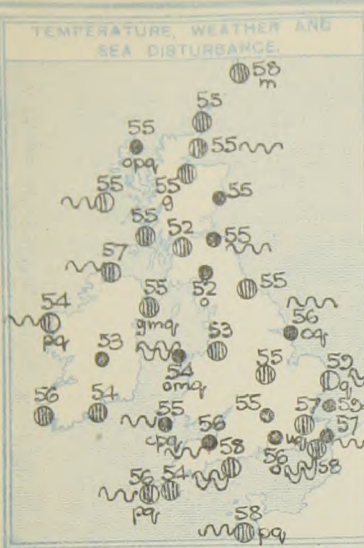

disturbed in the course of the day, squally, strong winds and gales from various quarters setting in, accompanied by heavy rains, ranging up to as much as 55mm. at Valencia. There was a general decline of temperature, remaining below 60° in many places. Sunshine varied greatly.

STORM WARNINGS.

The Coasts upon which the Warning Signals are at present displayed are indicated thus:—

Signals hoisted yesterday.	Signals hoisted this morning.
South Coast.	South Coast.
North Coast.	North Coast.

EXPLANATION.

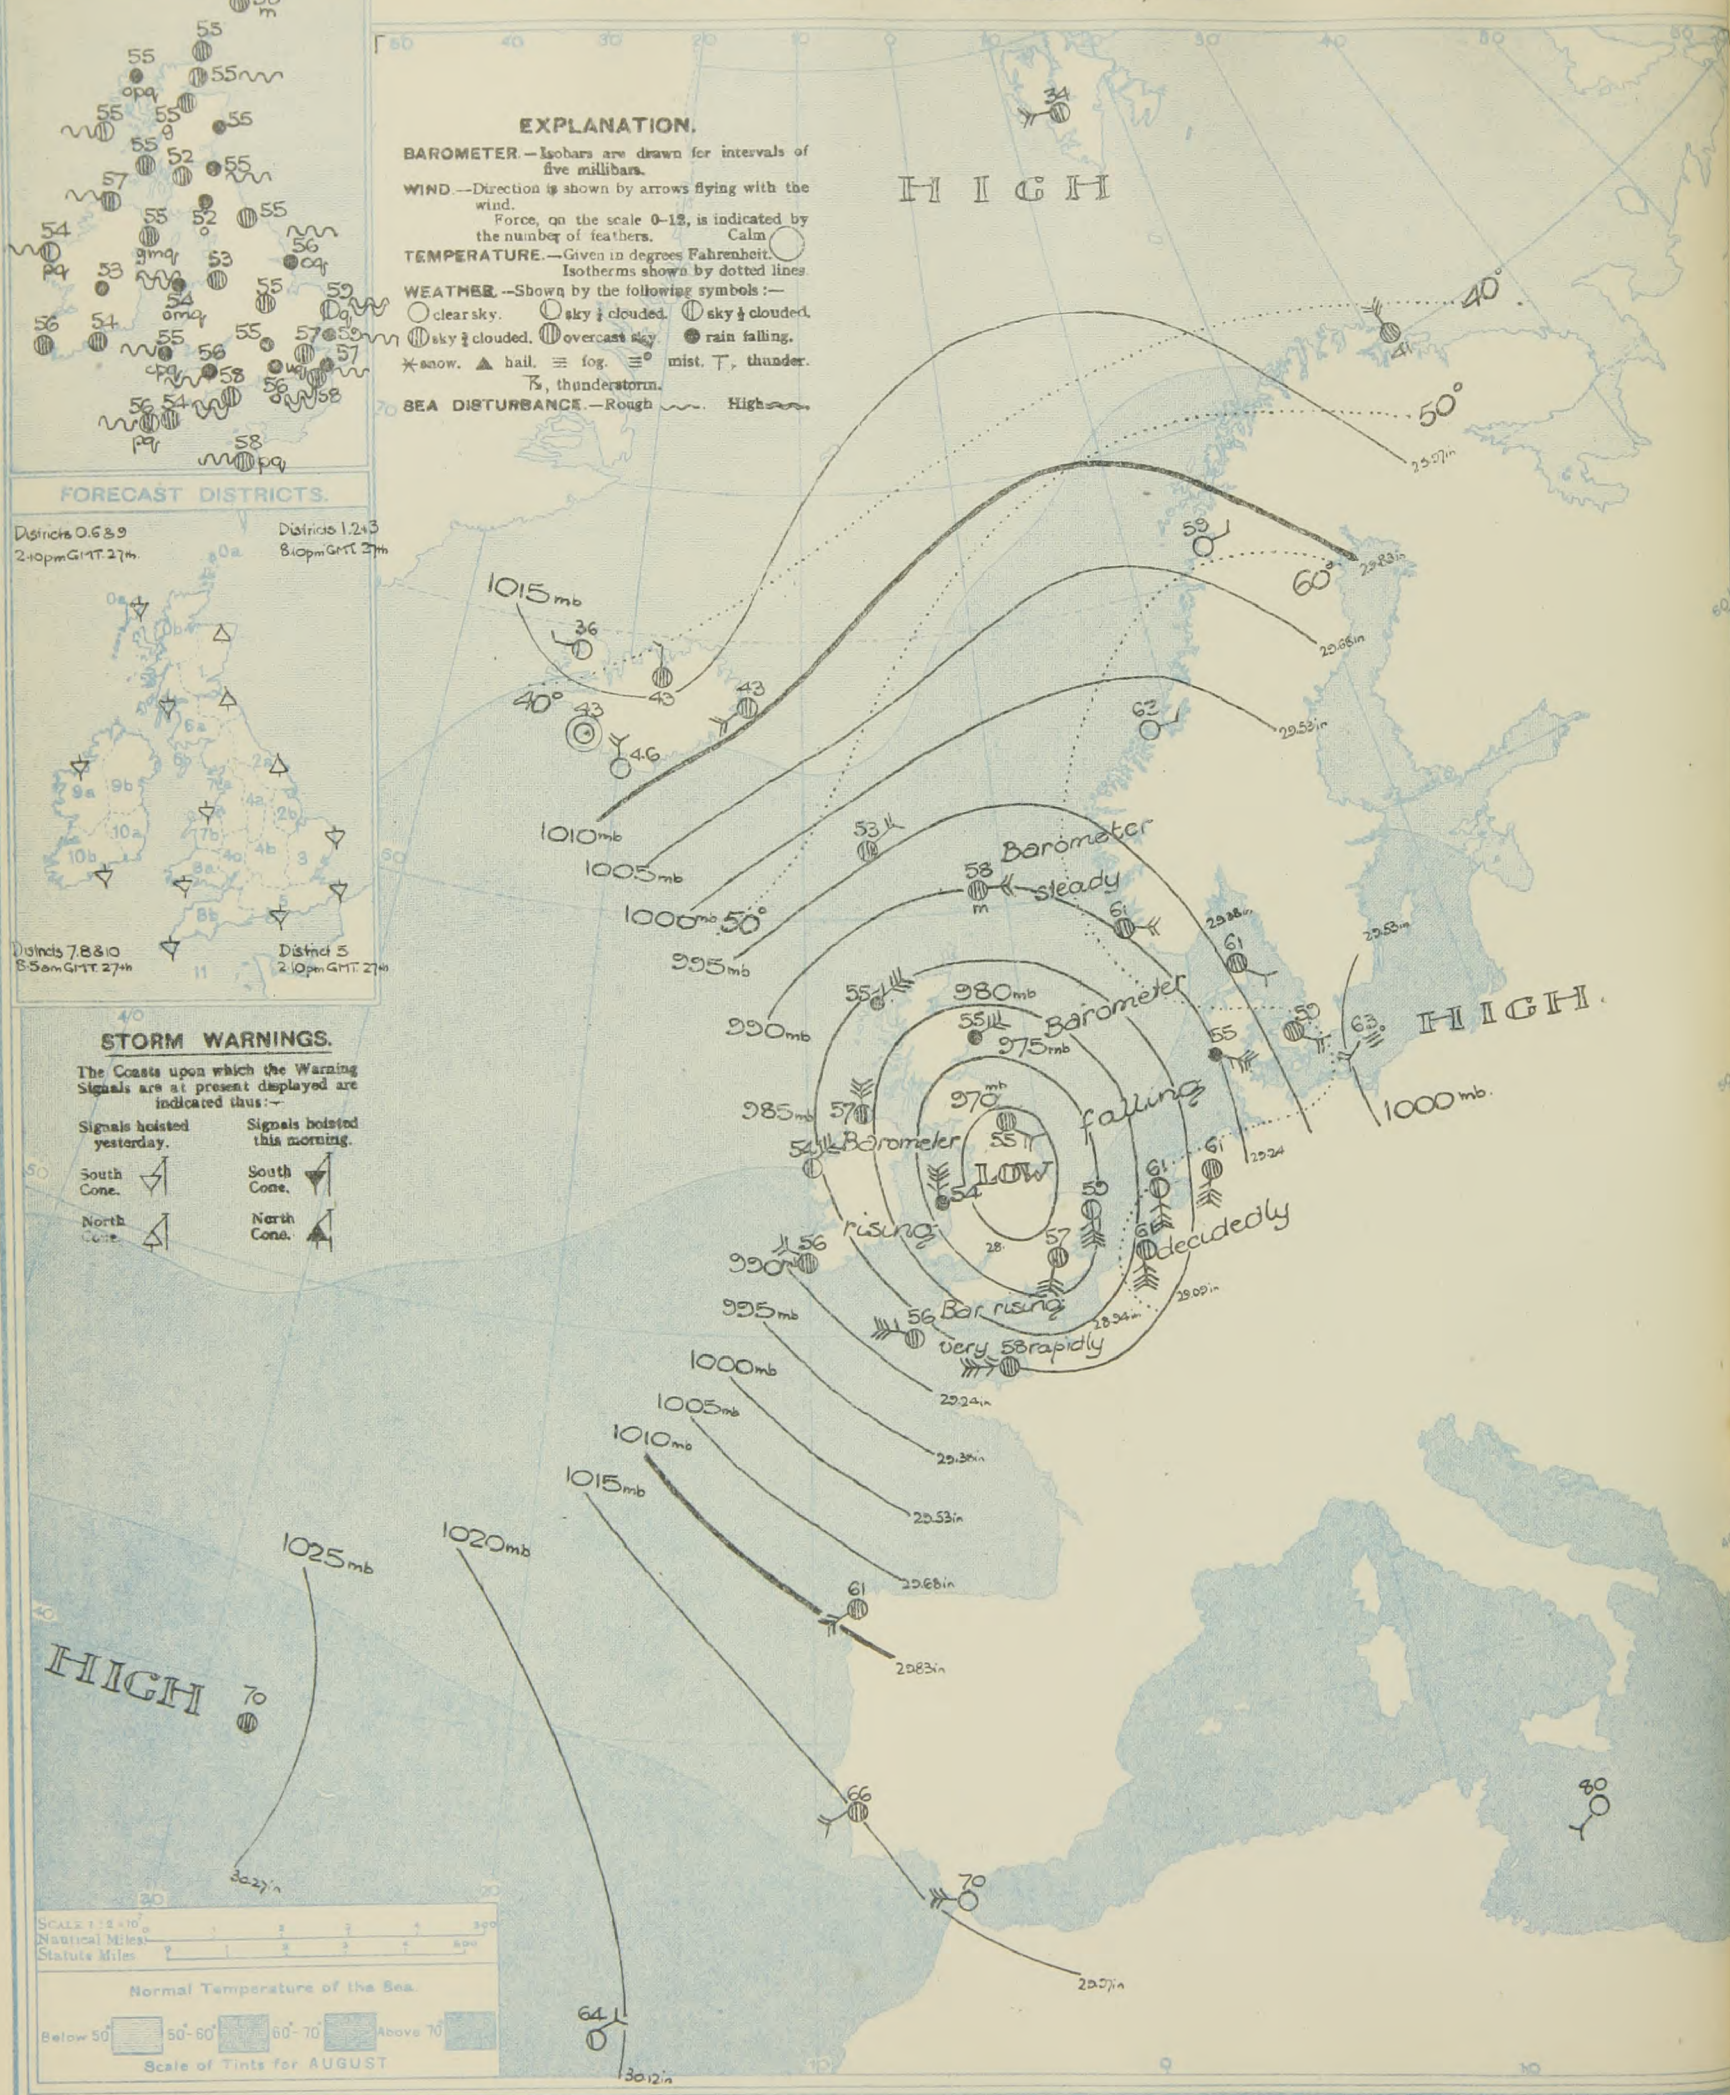

BAROMETER.—Isobars are drawn for intervals of five millibars.

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm

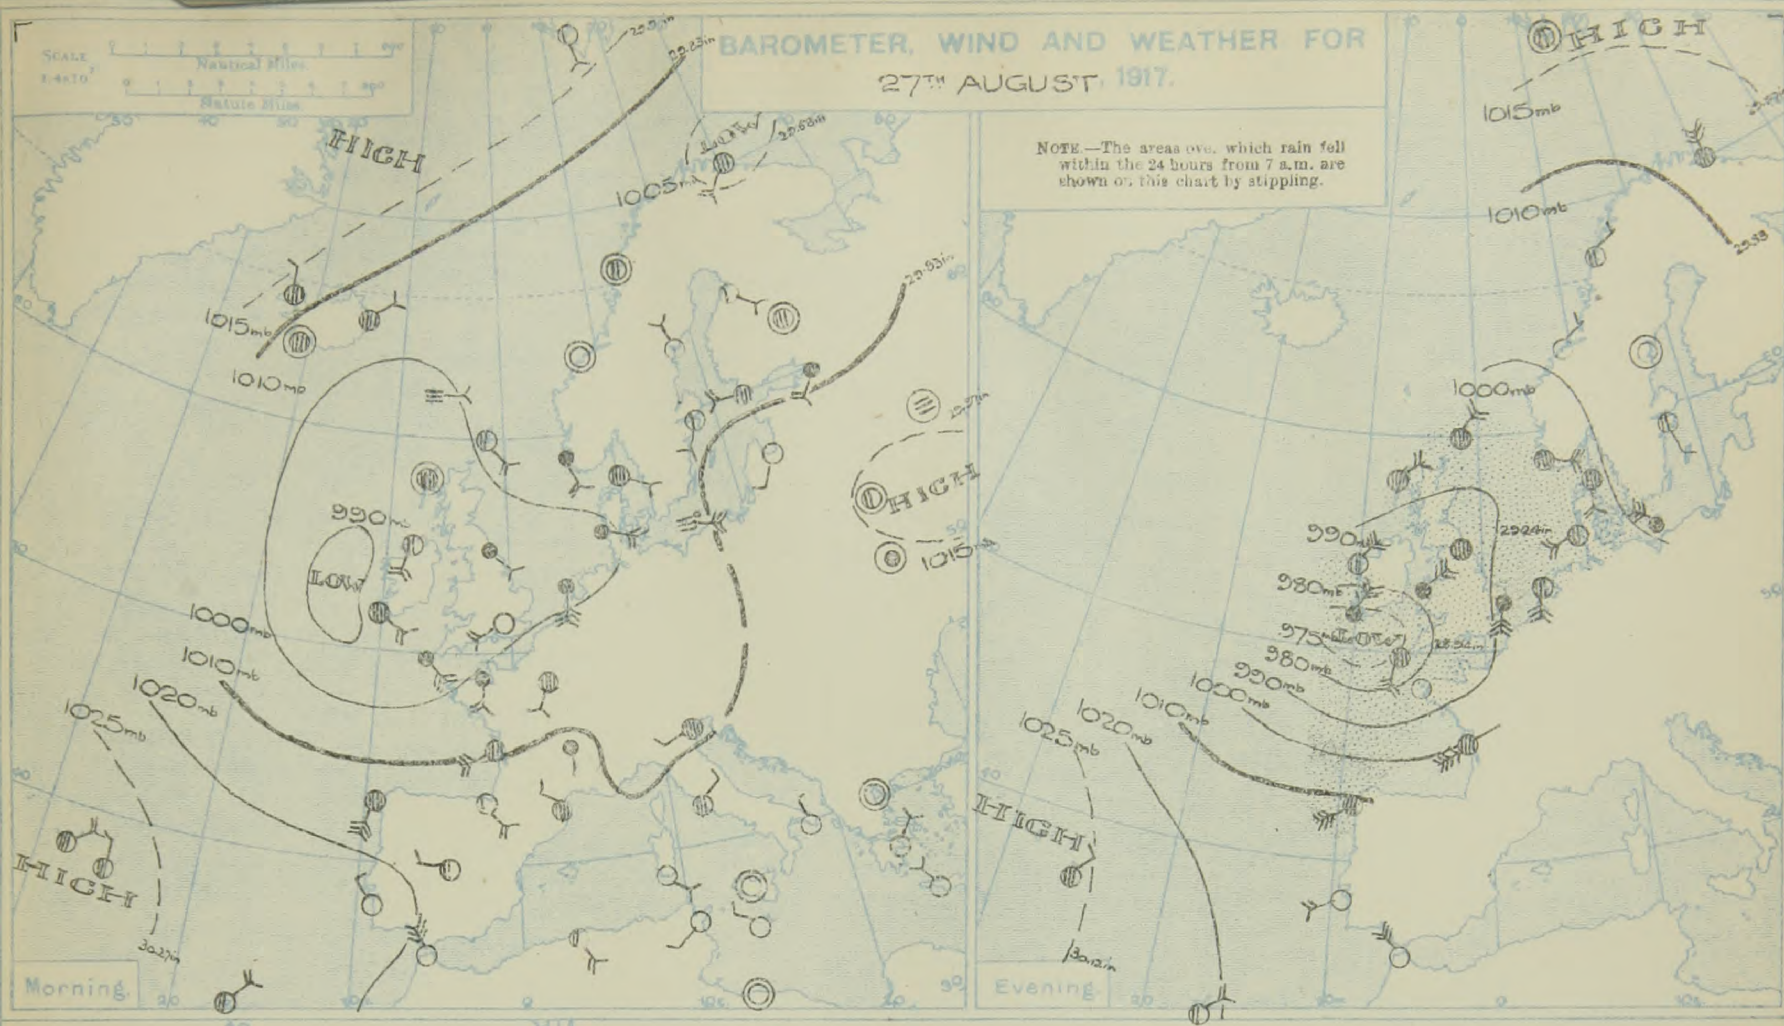

TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—
 clear sky. sky 1/4 clouded. sky 1/2 clouded. overcast sky. rain falling. snow. hail. fog. mist. thunderstorm.

SEA DISTURBANCE.—Rough High Very High

BAROMETER, WIND AND WEATHER FOR 27TH AUGUST 1917.

The Present Situation

The depression which was indicated out in the Atlantic yesterday morning advanced on an Easterly course to the Bristol Channel by midnight, then moved north-eastward to the north of England; the barometer now rising at a very rapid rate over south-western England. A complete cyclonic circulation of very squally winds is shown, strong to a strong gale in many localities, a whole gale on Dover Strait, with squalls of hurricane violence. Very heavy rain has fallen over a wide area during the progress of the disturbance.

The General Outlook

The barometer is rising too rapidly in the south-west, and on the Kerry coast the wind is backing westerly. It seems probable therefore that another disturbance will make its appearance shortly, so that the unsettled type of conditions will be maintained.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 20,369 WEDNESDAY, 29TH AUGUST 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Stormy conditions prevailed over our area, squally cyclonic winds of gale force being felt at numerous stations. Rain was general, heaviest in Scotland, 31mm at Nairn. In many localities the maximum temperature was 55° to 60°. Except at Jersey there was little or no bright sunshine.

FORECAST DISTRICTS.

EXPLANATION.

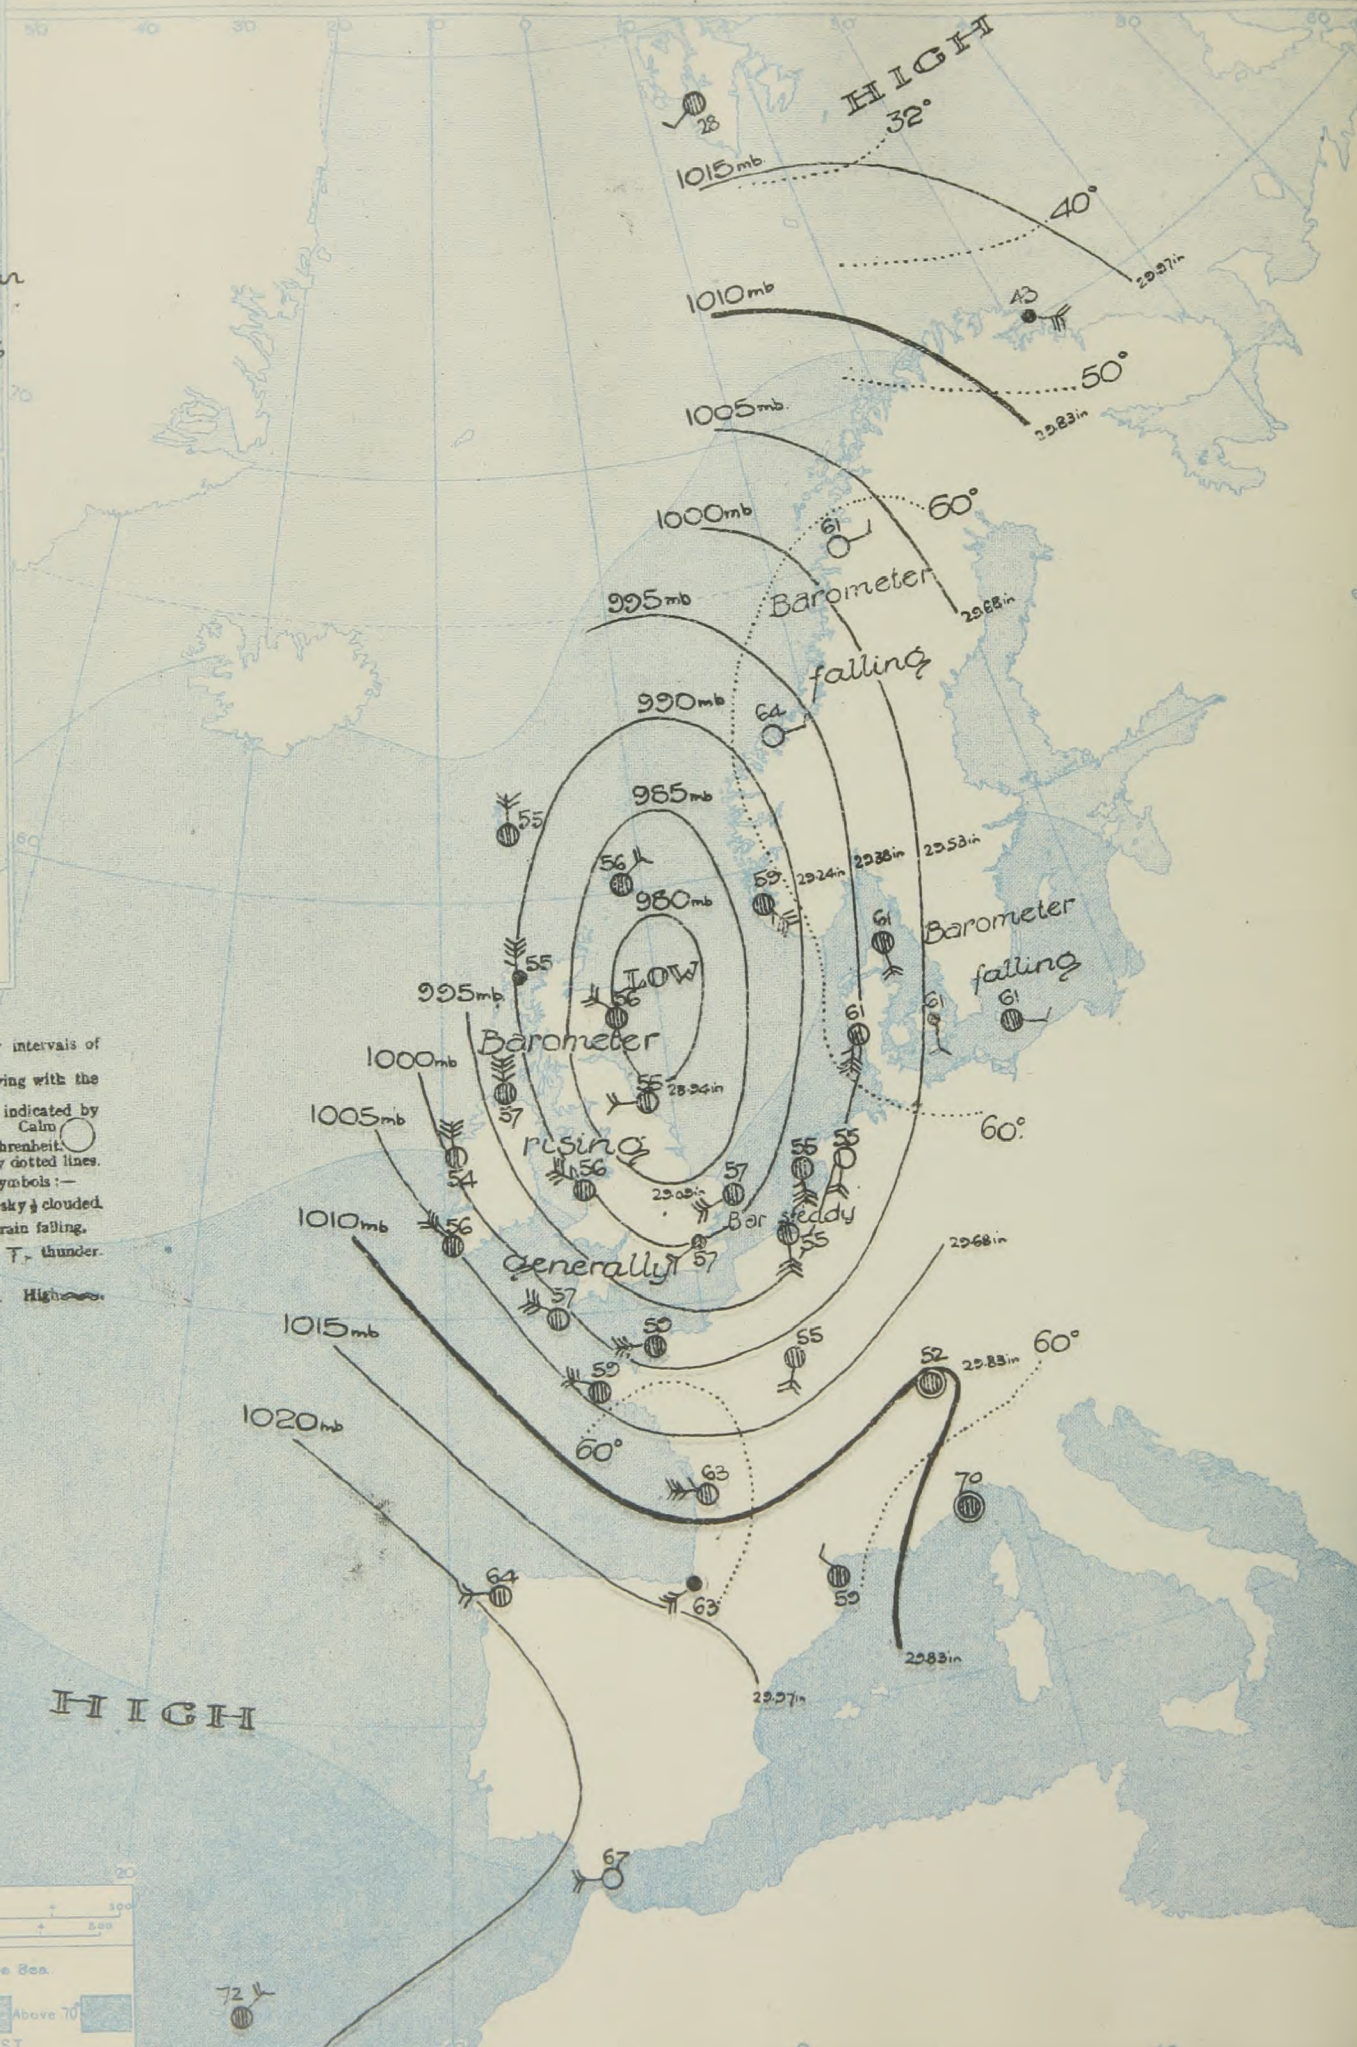

BAROMETER.—Isobars are drawn for intervals of five millibars.

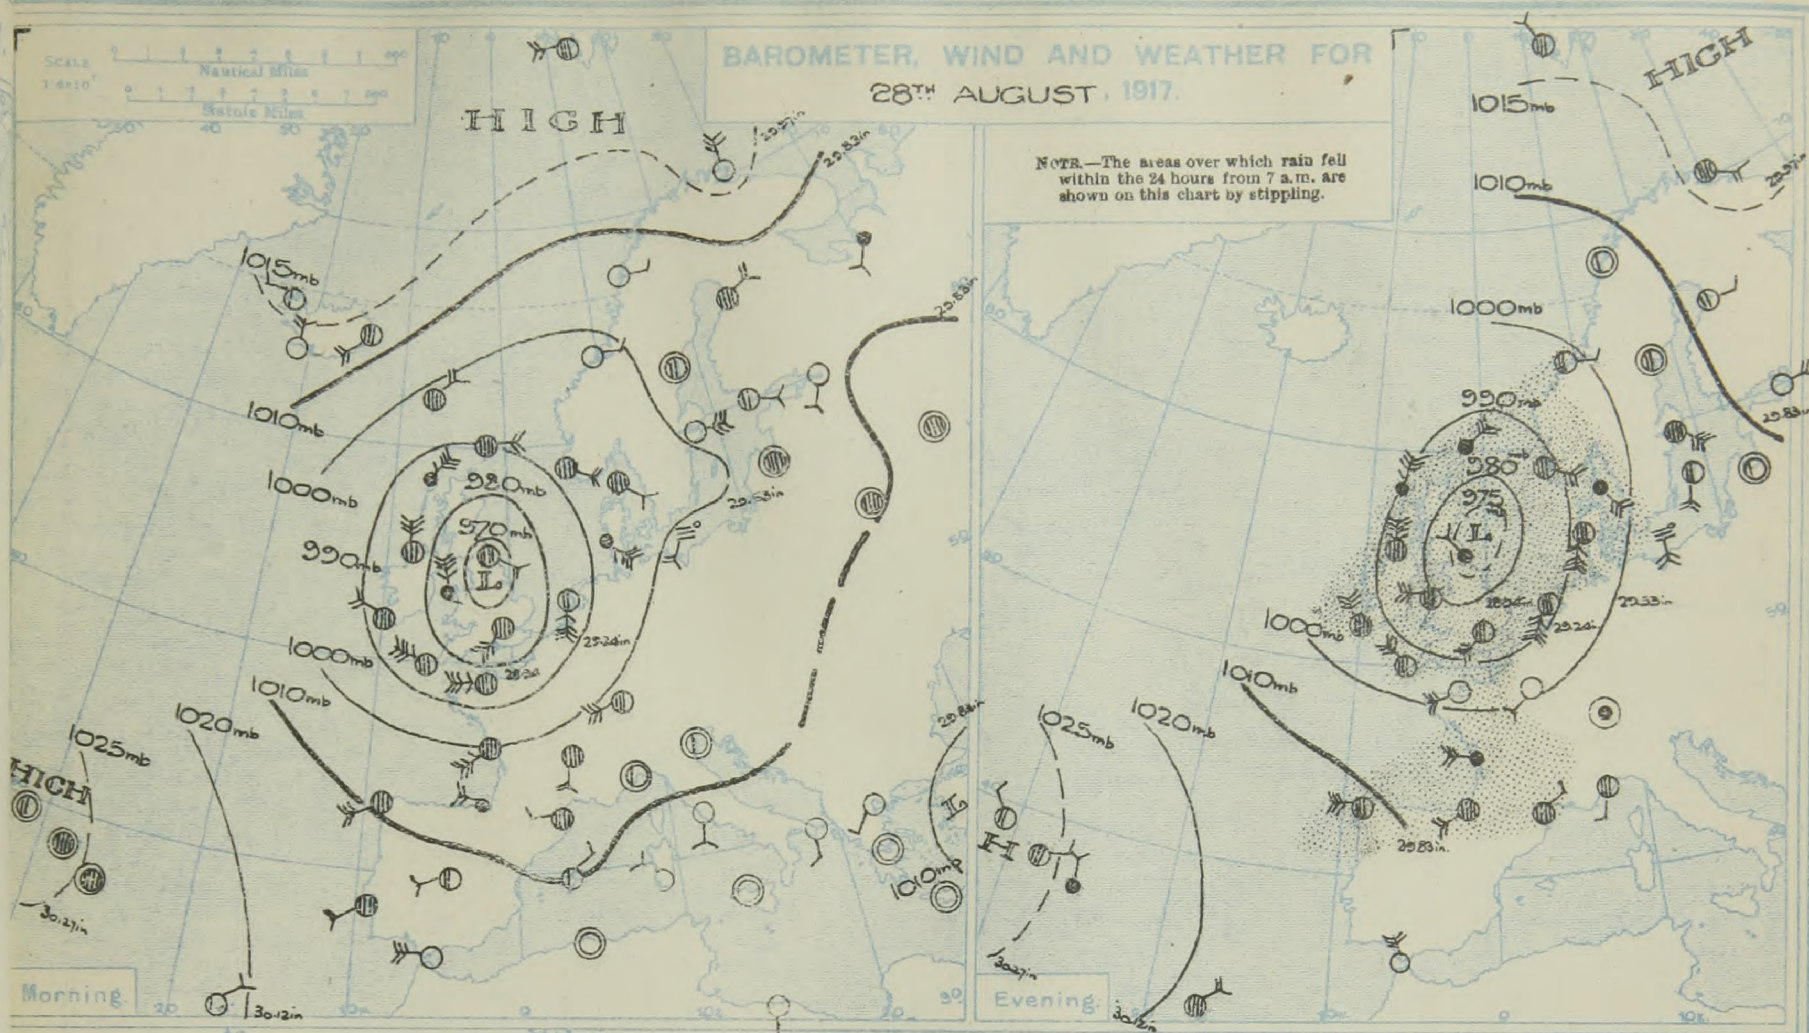

WIND.—Direction is shown by arrows flying with the wind.
Force, on the scale 0-12, is indicated by the number of feathers.
Calm.

TEMPERATURE.—Given in degrees Fahrenheit.
Isotherms shown by dotted lines.

WEATHER.—Shown by the following symbols:—
○ clear sky. ○ sky & clouded. ○ sky & clouded.
○ sky & clouded. ○ overcast sky. ● rain falling.
✱ snow. ▲ hail. ≡ fog. ≡ mist. T. thunder.
R. thunderstorm.

SEA DISTURBANCE.—Rough. High.

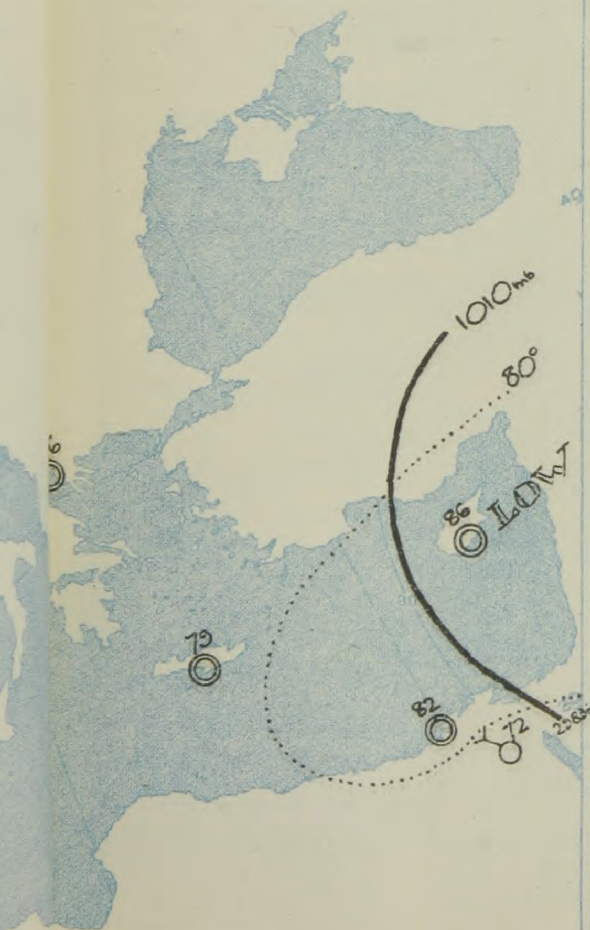

The Present Situation.

Yesterday's deep cyclonic system is now centred to the eastward of Scotland and is continuing on its course to the north-eastward. In its rear there is a general rise of the barometer over the British Isles, France and the Bay region. The winds maintain a complete cyclonic circulation round the pressure minimum, and in nearly all localities still blow strongly, with hard squalls. The weather is in a variable state, fair to dull, with steady rain or passing showers in very scattered neighbourhoods.

The General Outlook.

There are at present no signs of the approach of a disturbance from the Atlantic, the barometer continuing to ascend steadily on all our western coasts. The general distribution of pressure, however, is of an unstable type, and it is not anticipated that any immediate improvement in the weather will be maintained.

METEOROLOGICAL OFFICE, LONDON: DAILY WEATHER REPORT.

No. 29370 THURSDAY, 30th AUGUST, 1917. 7h. G.M.T.

NOTES OF THE WEATHER OF THE PAST 24 HOURS, BASED ON THE TELEGRAMS OF YESTERDAY EVENING AND THIS MORNING (p. 4).

Very windy, squally conditions prevailed in all districts, but with fairer weather generally, the rainfall being limited to local passing showers. Thunderstorms visited North-Eastern England. Temperature was again short of the normal. As a rule there was but little sunshine.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

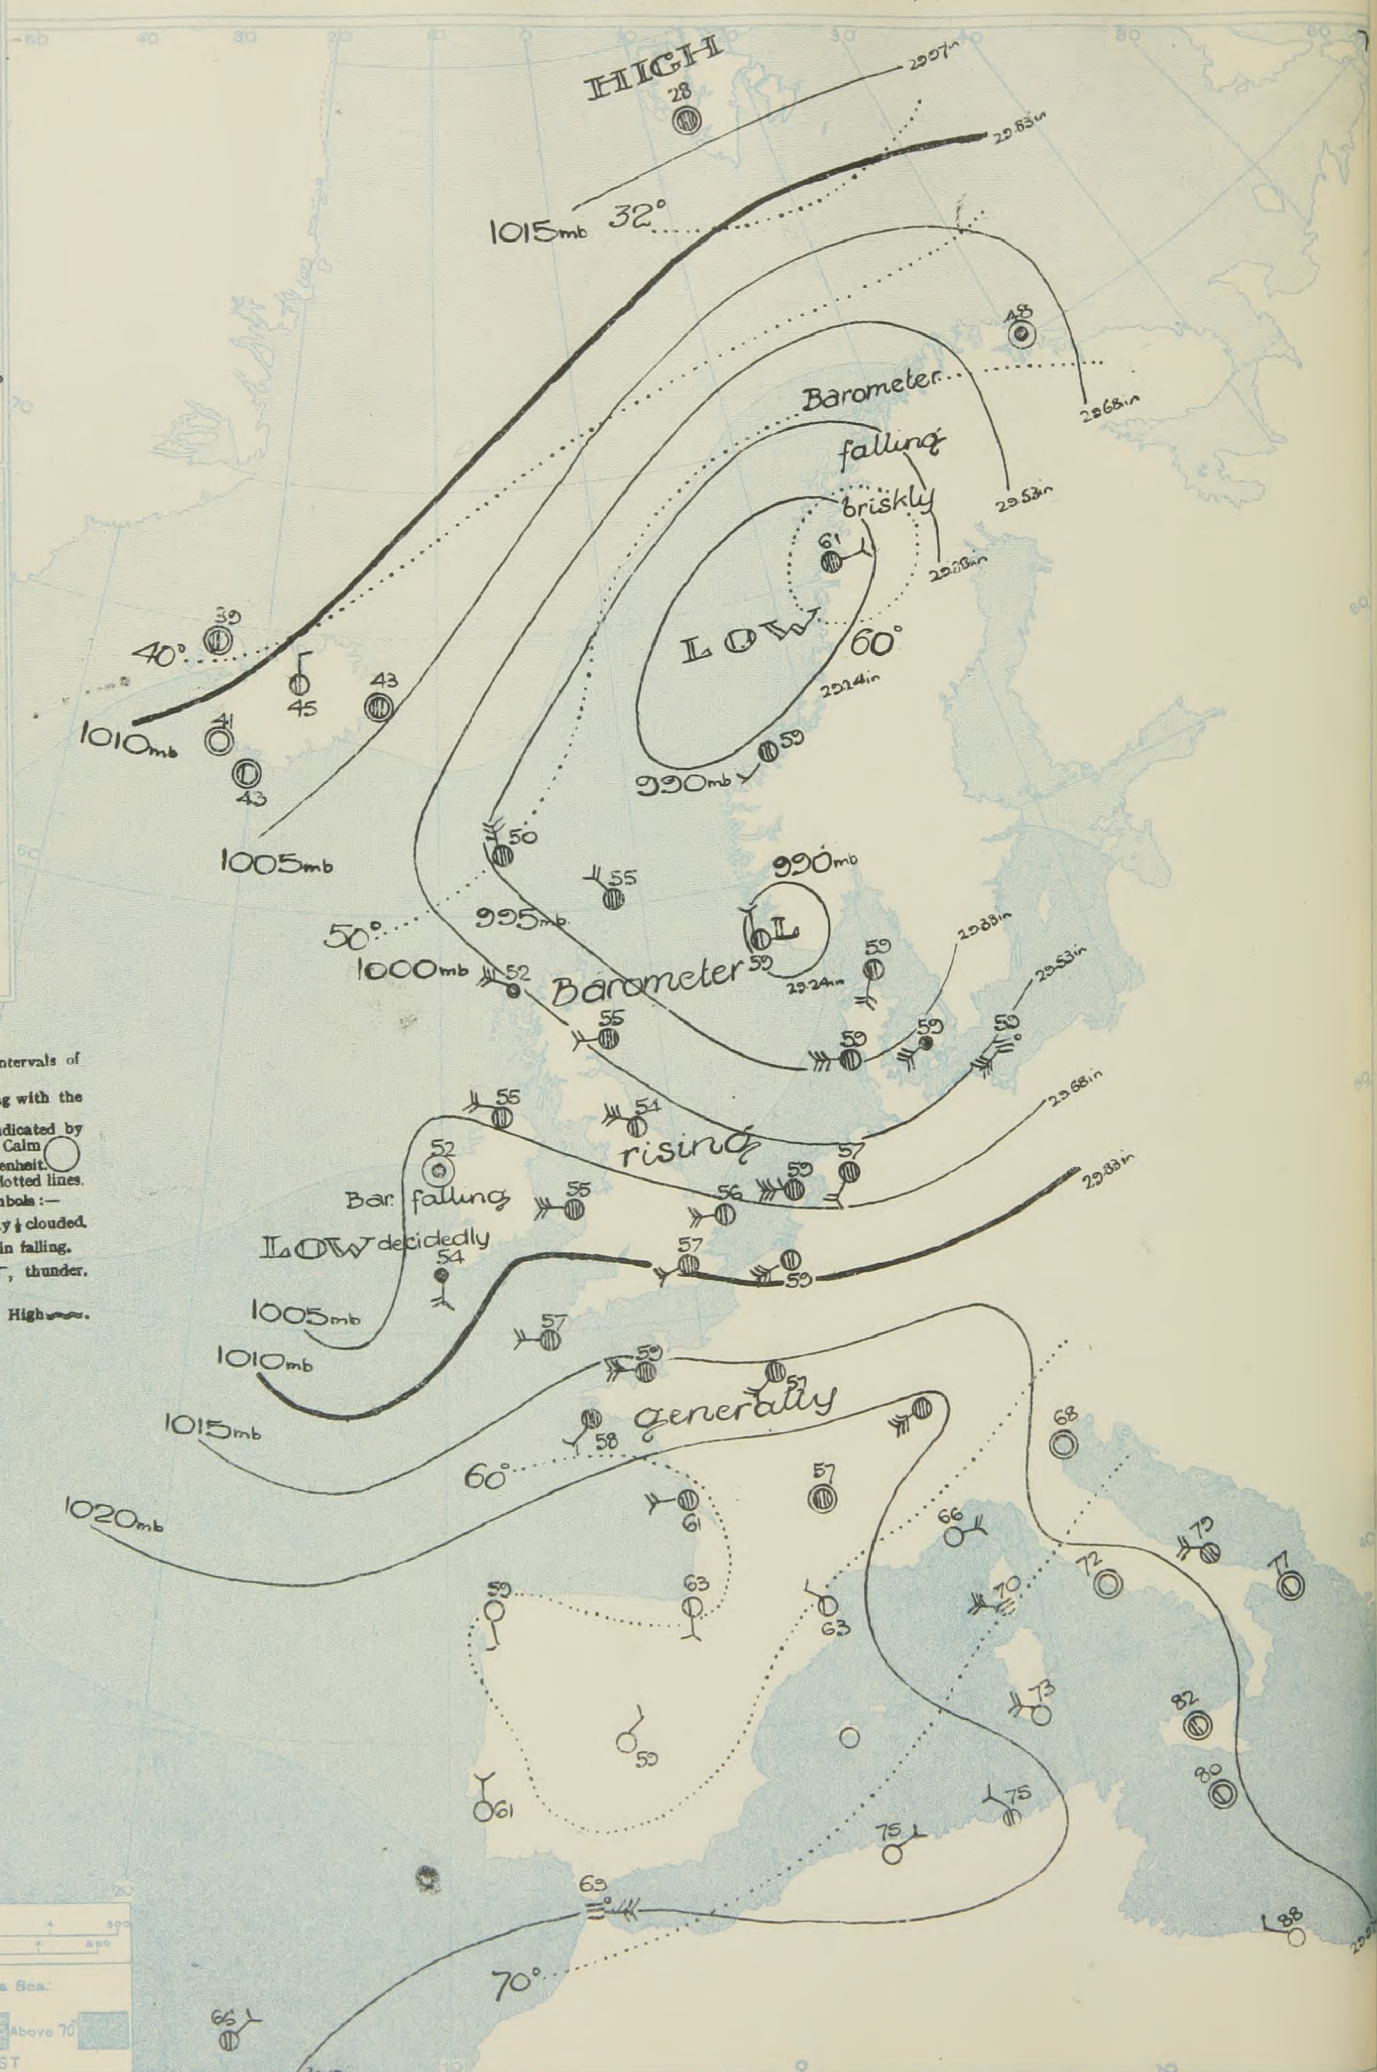

FORECAST DISTRICTS.

EXPLANATION.

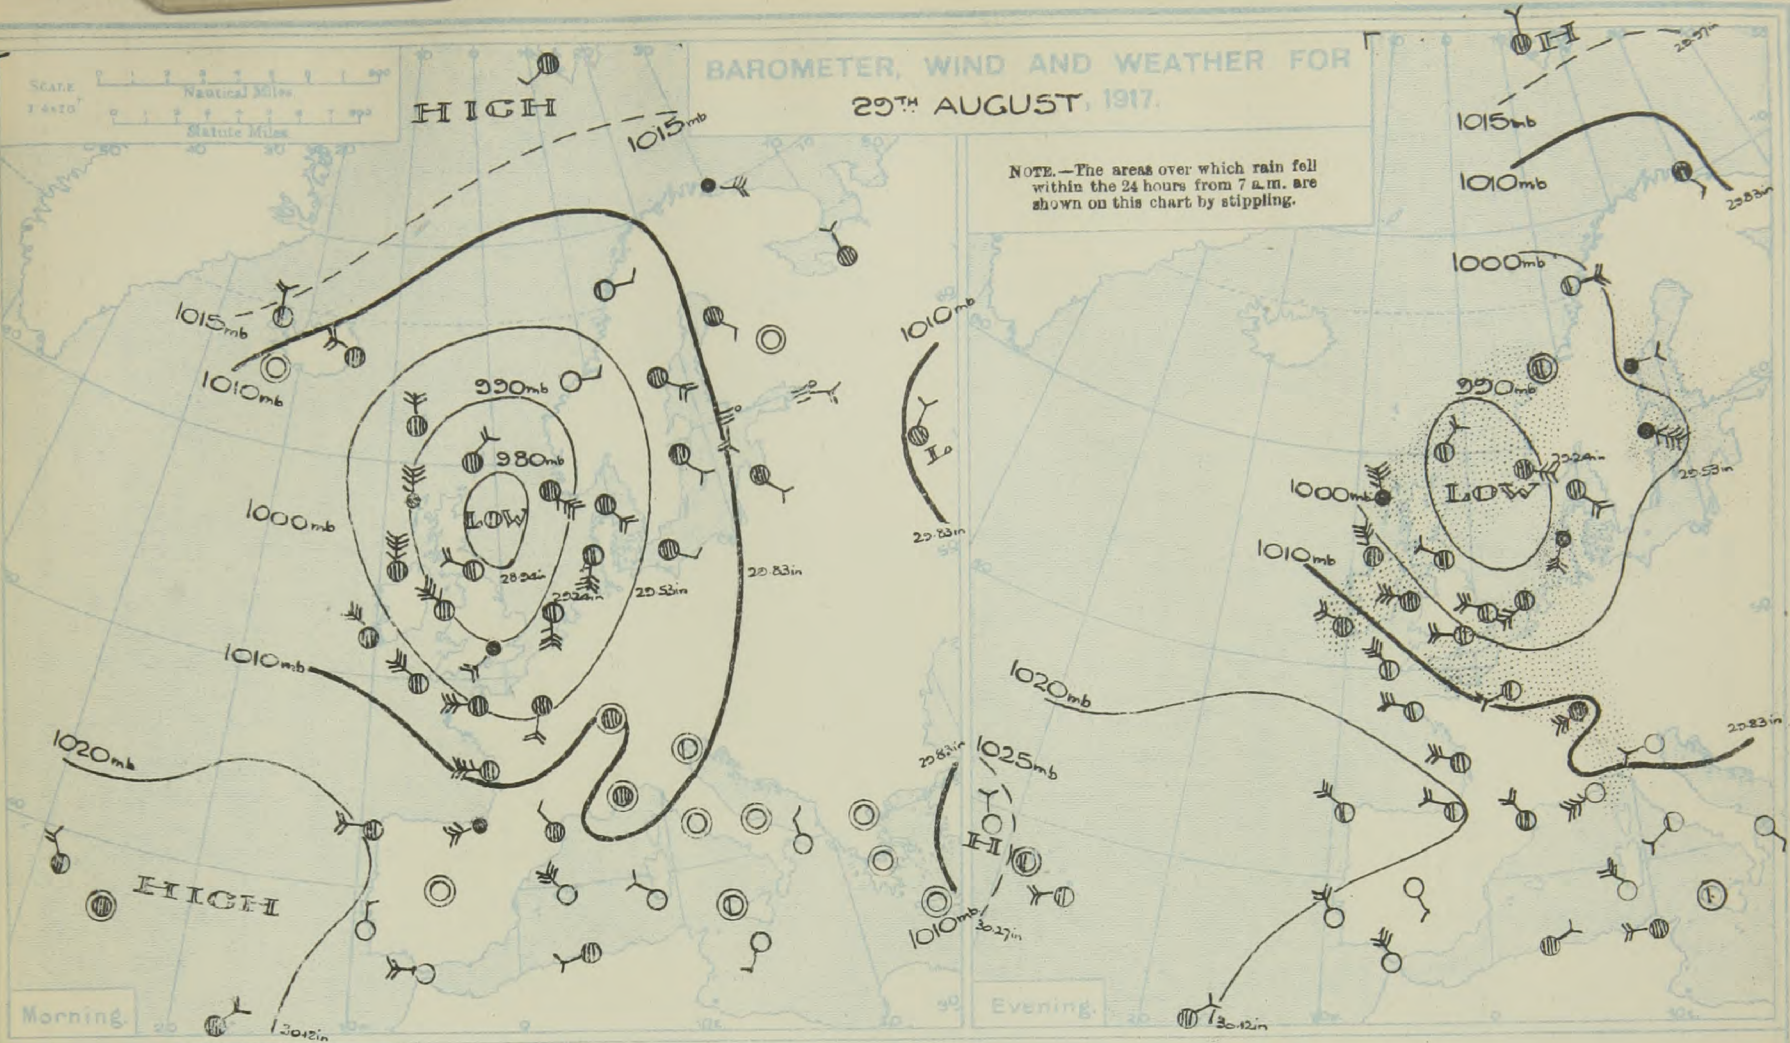

BAROMETER.—Isobars are drawn for intervals of five millibars.
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Calm
TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.
WEATHER.—Shown by the following symbols:—
 clear sky. sky 1/4 clouded. sky 1/2 clouded. sky 3/4 clouded. overcast sky. rain falling. snow. hail. fog. mist. thunder. thunderstorm.
SEA DISTURBANCE.—Rough High

BAROMETER, WIND AND WEATHER FOR

29TH AUGUST, 1917.

NOTE.—The areas over which rain fell within the 24 hours from 7 a.m. are shown on this chart by stippling.

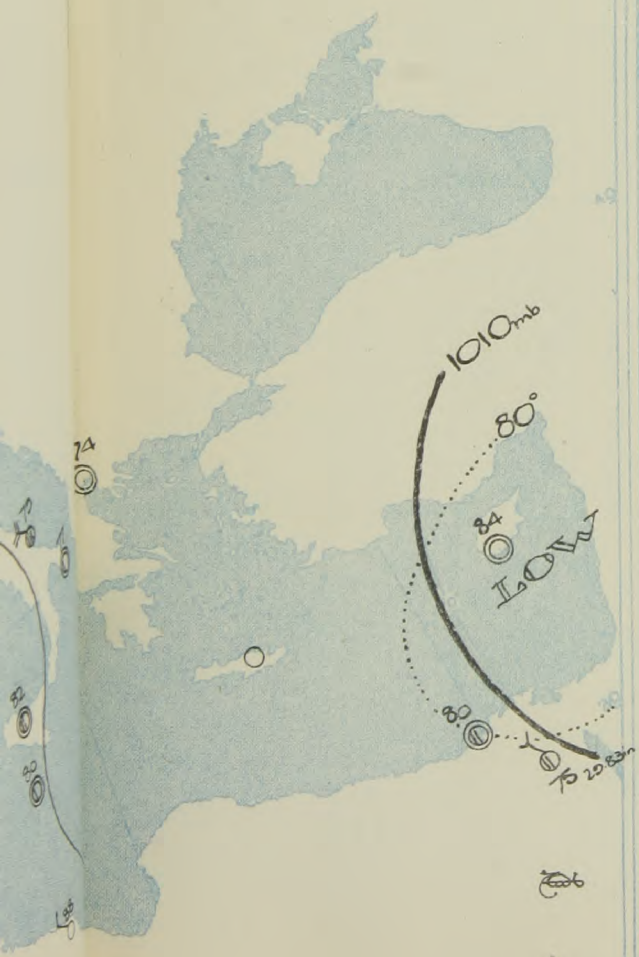

The Present Situation.

The recent deep cyclonic system is now passing away across Scandinavia, and in its rear the wind is falling light, with fairer weather generally. In Ireland, however, the conditions are again assuming a very unsettled appearance, a brisk decline of the barometer setting in on the western coast; the wind has again backed into South, and the weather become rainy. Further south an anticyclone extends from the Atlantic across Spain, the Bay, and Central and Southern France.

The General Outlook.

The line of advance of the new depression is at present uncertain, but the system will embrace the whole of the British Islands, and it will occasion a renewal of the unsettled weather conditions over the country generally for the remainder of the week.

THE MORNING OF FRIDAY, 31ST.

AUGUST, 1917.

TEMPERATURE, WEATHER AND
SEA DISTURBANCE.

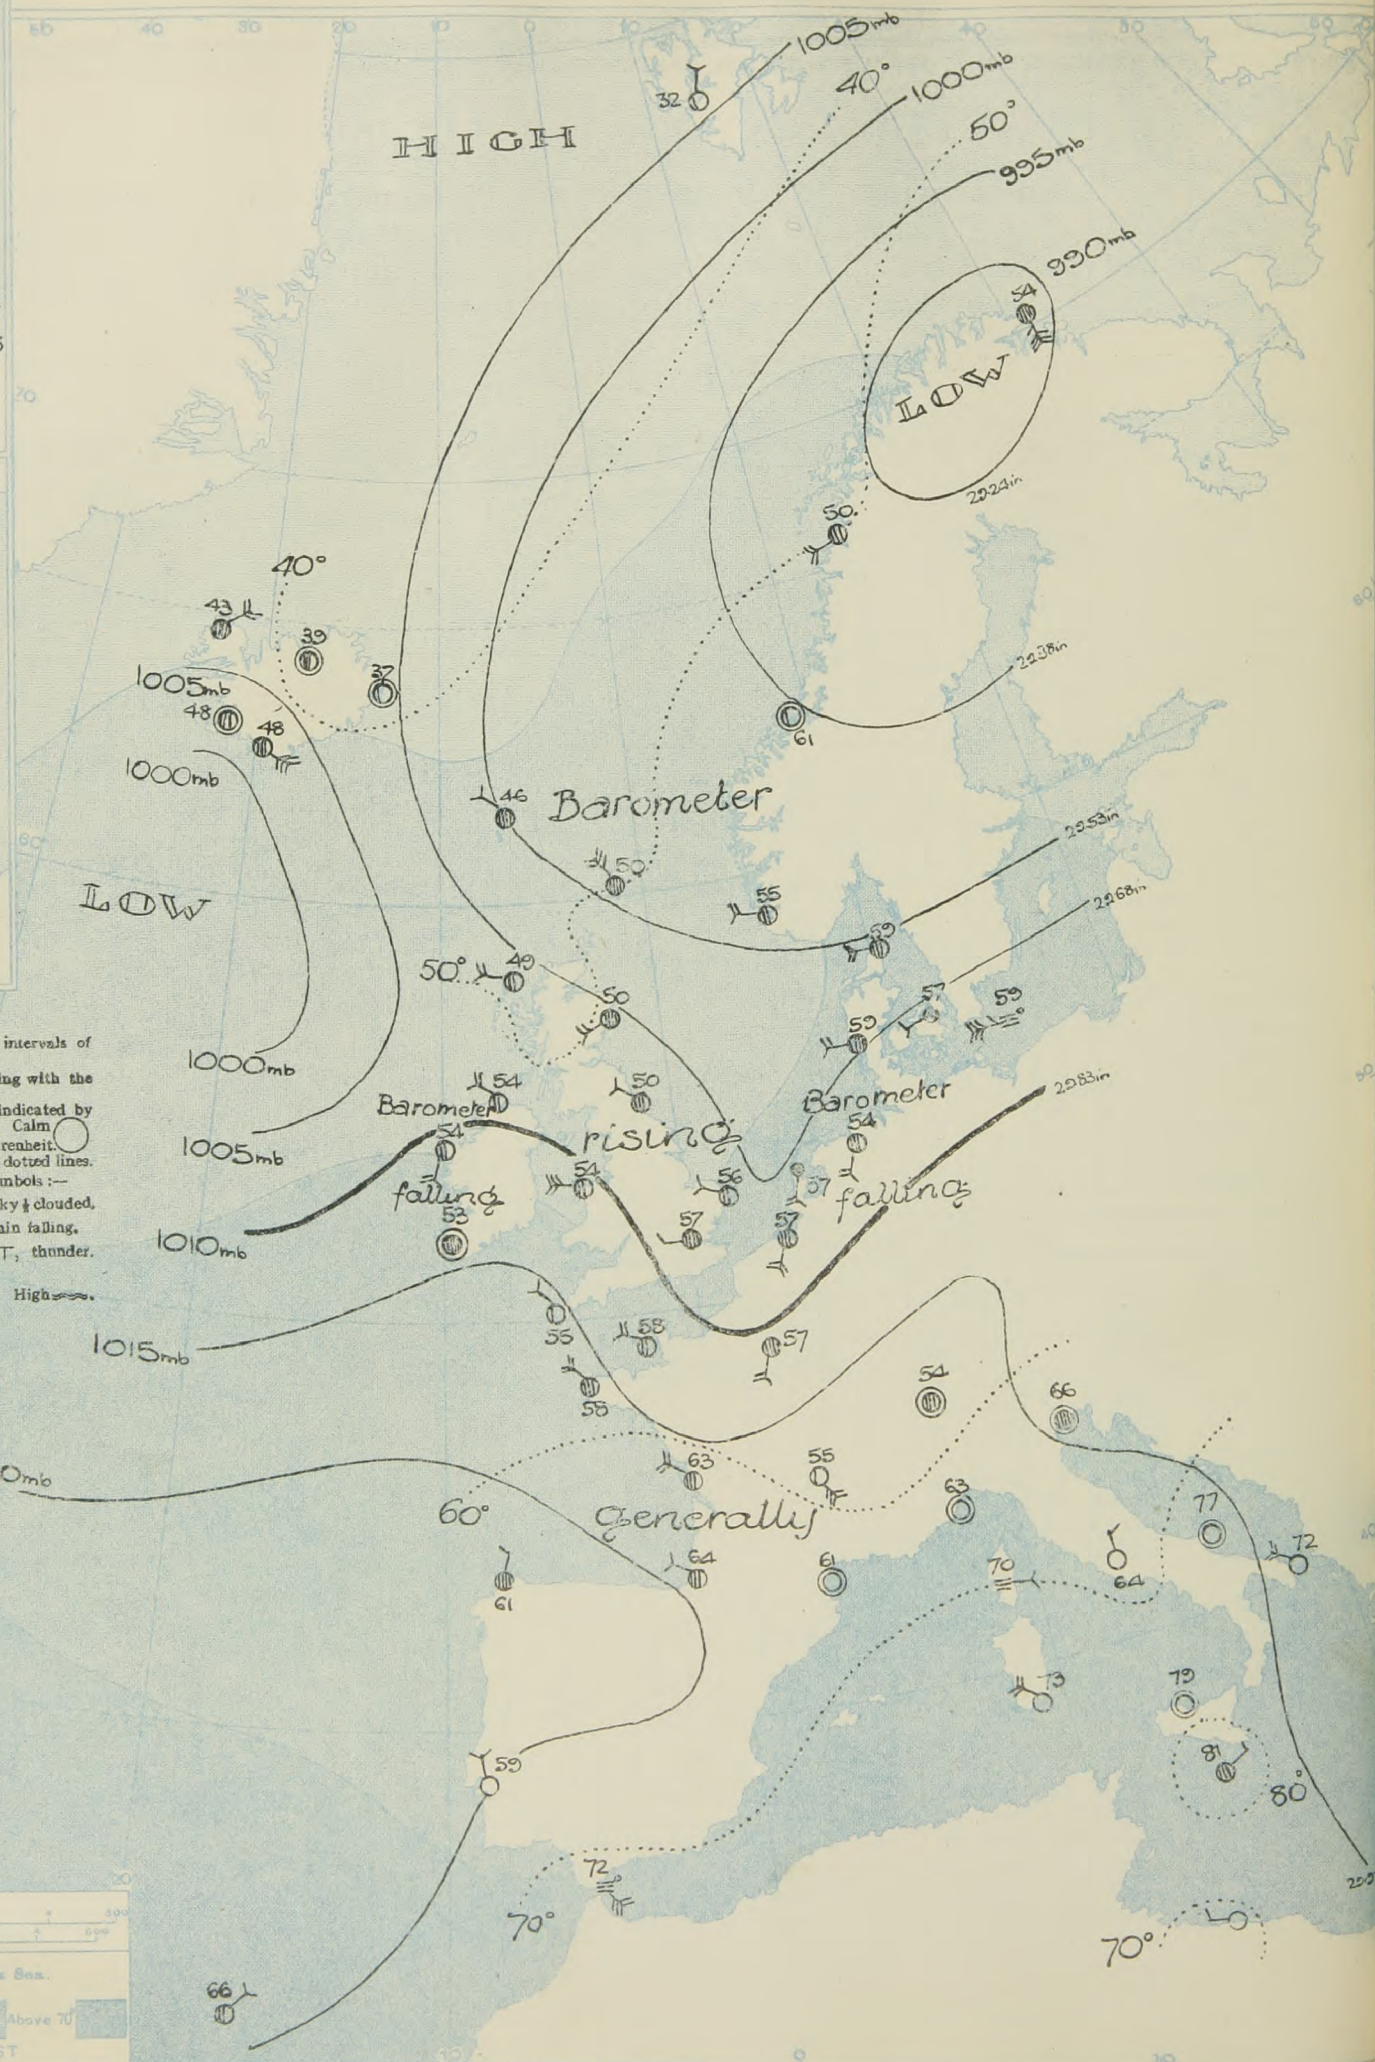

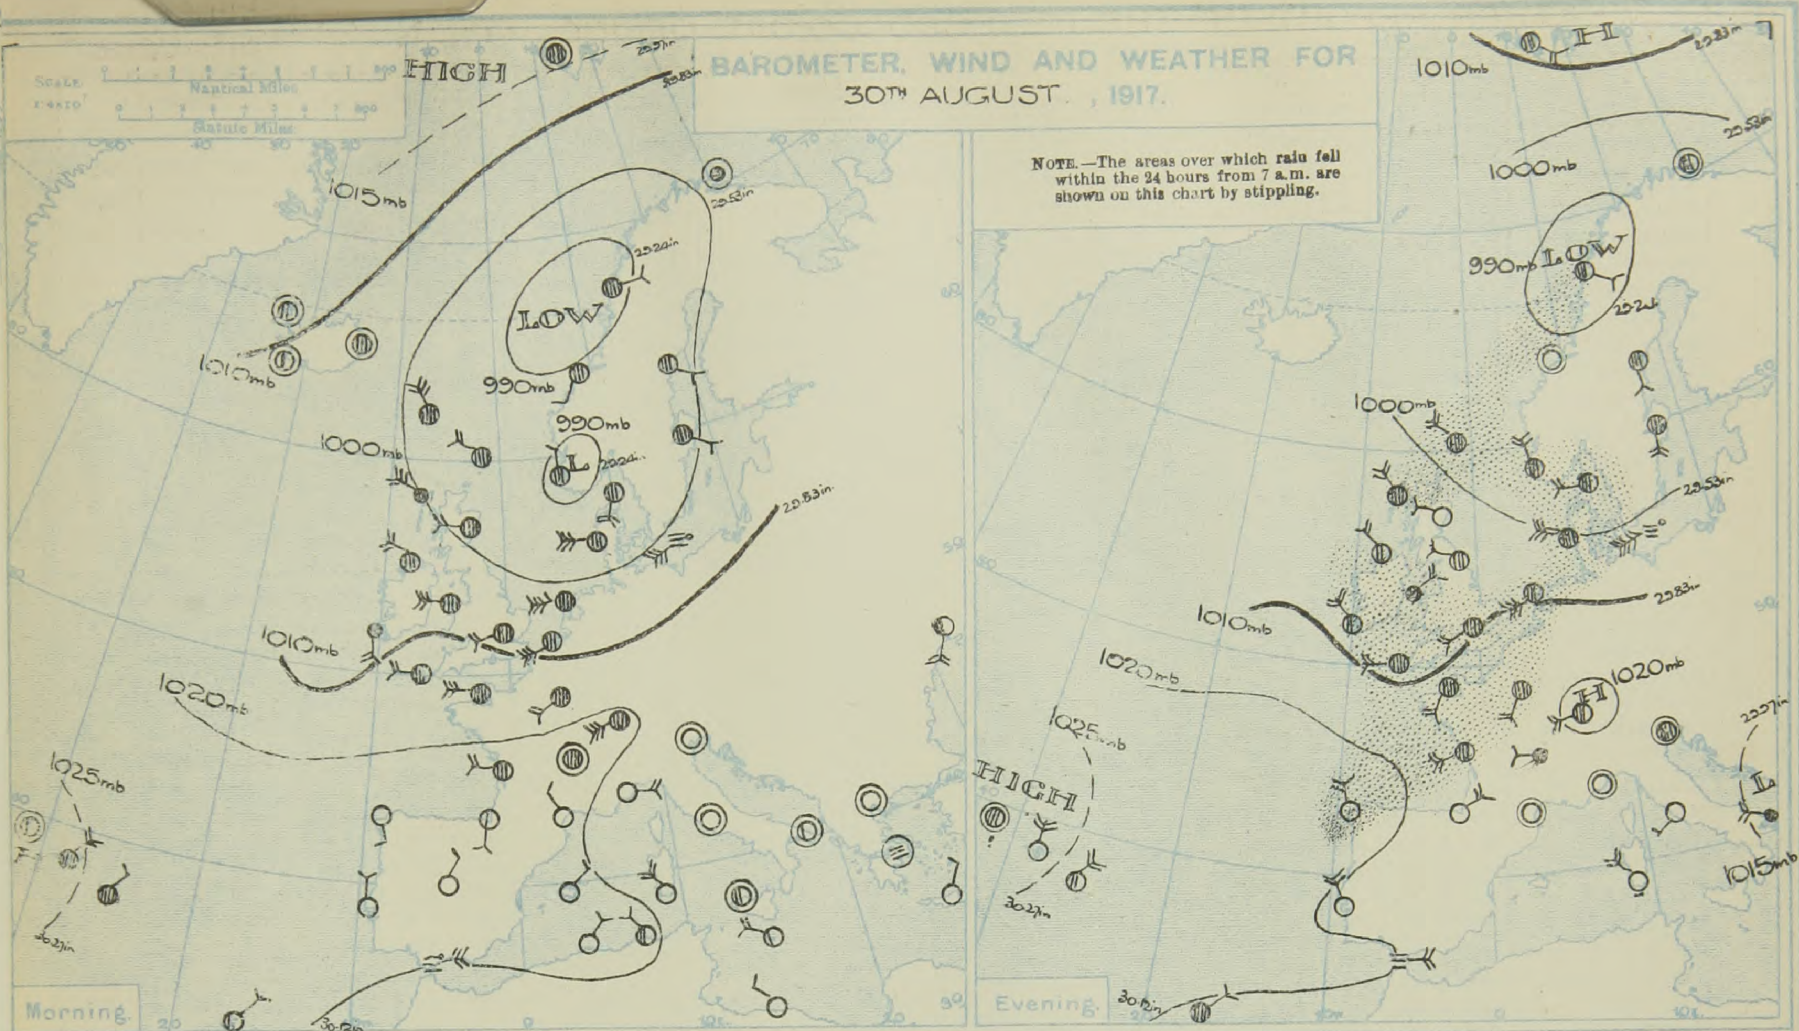

FORECAST DISTRICTS.

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of five millibars.
WIND.—Direction is shown by arrows flying with the wind.
Force, on the scale 0-12, is indicated by the number of feathers. Calm.
TEMPERATURE.—Given in degrees Fahrenheit. Isotherms shown by dotted lines.
WEATHER.—Shown by the following symbols:—
○ clear sky. ○ sky 1/2 clouded. ○ sky 3/4 clouded.
⊙ sky 3/4 clouded. ⊙ overcast sky. ● rain falling.
✱ snow. ▲ hail. ≡ fog. ≡ mist. T, thunder.
⚡, thunderstorm.
SEA DISTURBANCE.—Rough wavy line. High wavy line.

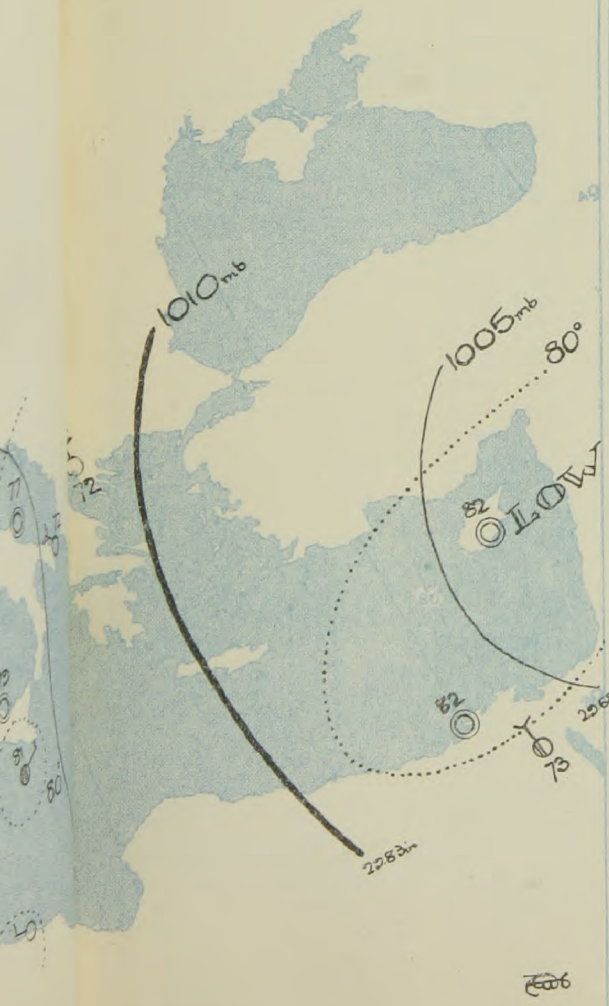

The Present Situation

Our area is now occupied by a complex type of pressure distribution. The Atlantic anticyclone extends from beyond the Azores to the Bay of Biscay and Southern Europe, while on its northern side depressions are found to the westward of Ireland, on the southern North Sea, and over Scandinavia. The winds consequently are from various quarters, but in few localities does the force exceed that of a moderate breeze. In most regions the weather is fine to cloudy, but rain is falling at a few foreign stations.

The General Outlook.

There is still a tendency for the chain of Atlantic depressions to be maintained for a time, so that a changeable type of weather seems likely to prevail pretty generally.

The Daily Weather Report is sent free by post to any address in the United Kingdom on payment of £1 per annum, for postage and wrappers. Single copies 1d. at Meteorological Office.

++ The barometric change is expressed in half millibars
