**BEAUFORT NOTATION OF WEATHER.**

Blue sky (not more than a quarter covered).  
 Partly cloudy (one half covered).  
 Generally cloudy.  
 Rain.  
 Drizzle.  
 Fog.  
 Thick fog.  
 Gloomy.  
 Within sight of station.  
 Passing showers.  
 Rain.  
 Snow.  
 Sleet.  
 Thunder.  
 Visibility.  
 Dry air.  
 Dust haze.  
 Turbid atmosphere of dry weather.

With present weather is combined, whenever possible, the general character of the weather.

A "solidus" divides actual existing weather from preceding conditions, thus: -bc/r = fair weather after rain; i = intermittent; - = "decreasing"; + = "increasing"; h(r) = "hail" or "rain and hail"; Capital letters indicate intensity, suffix o indicates slight; and repetition of letters continuity, thus: -

R = heavy rain.  
 rr = continuous moderate rain.  
 rrr = continuous light rain.

# AIR MINISTRY.

## METEOROLOGICAL OFFICE, LONDON.

### NOTES ON THE INFORMATION CONTAINED IN THE VARIOUS SECTIONS OF THE DAILY WEATHER REPORT.

**Heights of Stations.**—The heights of British Stations above M.S.L. published in the British Section of the Daily Weather Report refer to the plot of ground on which the rain gauge is situated.

**Pressure.**—The distribution of barometric pressure at Mean Sea Level is shown by means of isobars which are drawn for intervals of 2 millibars on the British Section of the Report and for intervals of 4 millibars on the International Section.

The wind at a height of 1,500–2,000 feet above ground usually blows along the isobars and, for the same temperature, pressure and latitude, the speed of the wind is inversely proportional to the distance between the isobars, e.g., for isobars 1 inch apart in the Daily Weather Report the speed of the upper wind is about 12 m.p.h. in latitude 55°, with a temperature of 50° F. and a pressure of 1,015 mb; if, however, the isobars are ½ inch apart the corresponding speed is 24 m.p.h.

The scale below can be used with both the International and the British Sections. If the distance between consecutive isobars is measured along the rule from the left-hand extremity the geostrophic wind is shown by the scale in miles per hour.

#### GEOSTROPHIC WIND SCALE FOR

4 mb isobars on 1 : 2 × 10<sup>7</sup> Charts.  
or 2 mb " " 1 : 10<sup>7</sup> "  
or 1 mb " " 1 : 5 × 10<sup>6</sup> "

This scale applies under the following conditions:—

Pressure, 1,015 mb. Temperature, 50° F. Latitude, 55°.

**Corrections.**—For an increase of 10 mb pressure, subtract 1% from velocity; for an increase of 10° F. add 2%. From Latitude 55° to Latitude 65° subtract 1% for each degree above 55°. From Latitude 55° to Latitude 45° add 1½% for each degree below 55°.

**Temperature.**—Temperature is specified in degrees Fahrenheit, and is shown on the charts by means of figures written alongside the circles which indicate the positions of the stations.

**Relative Humidity.**—From January 1st 1926, relative humidity at British stations has been calculated from the following hygrometric formulæ:

$$x = f - .444(t - t') \text{ for wet bulb readings above } 32^\circ \text{ F.}$$

$$x = f - .400(t - t') \text{ for wet bulb readings below } 32^\circ \text{ F.}$$

where  $x$  is the vapour pressure in mb.;

$f$  the saturation vapour pressure at the temperature of the wet bulb;

$t$  the dry bulb temperature; and

$t'$  " wet "

The use of Glaisher's tables has been discontinued.

The tables used for calculating humidities from the readings of the dry and wet bulb thermometers on aeroplanes, are based on a formula similar to the above, but allowance is made for the variation of barometric pressure with height and for the increased ventilation of the thermometers.

**Upper Air Temperature.**—The British observations are made normally, one at 1,000 feet above the level of the aerodrome, and the remainder at pressures of 950, 900, 850, 800, etc., millibars. Heights are then computed and, apart from instrumental error, are correct heights: they do not require modification for differences of temperature from normal as these are allowed for in the computation. The values are shown graphically and in tabular form in the Upper Air Supplement. On the diagram, temperatures are given in degrees Fahrenheit and Absolute. The oblique line marked "Dry Adiabatic" shows the lapse rate of temperature for dry air ascending or descending under adiabatic conditions, i.e., without communication of heat from external sources. The lapse rate under these circumstances is very approximately 5.5° F. per 1,000 feet, or 10°a per kilometre. A lapse rate greater than this value indicates instability in a dry atmosphere.

The broken lines marked Saturated Adiabatic show lapse rates for saturated air. These are for air masses which contain just sufficient moisture at 1,015 mb. pressure to become saturated after rising 1 km. in an environment having the dry adiabatic lapse rate. The condensed moisture is assumed to be retained thereafter in the air as it rises.

**Wind.**—All wind directions specified in the reports are "true," as distinguished from "magnetic." The arrows indicating wind direction are drawn to fly with the wind. Wind velocities are shown on the charts of the British Section and Upper Air Supplement in m.p.h. by the

numbers placed within the small circles. In the International Section velocities are not shown. In both Sections the number of feathers on the arrows denotes wind force by Beaufort number.

**Upper Winds.**—The direction and velocity of the wind are given in the charts of the Upper Air Supplement for heights of 2,000 feet and 6,000 feet. The data are also given in tabular form for various heights. The reports are usually based on Pilot Balloon ascents.

Wind reports deduced from British Pilot Balloon Ascents refer to the 1,000 feet layers centering at the heights given in the table up to 16,000 feet. When winds are reported at greater heights, they refer to the 5,000 feet layers centering at 20,000 feet, 25,000 feet, 30,000 feet and 35,000 feet.

In the tabular statement direction is specified in degrees from true north measured through East 90°, South 180°, West 270° to North 360°. (See diagram below.)

**Rainfall.**—At Stations marked † in the International Section of the Report, the rainfall is received in an abbreviated code and the measurement entered is therefore not necessarily correct to the nearest millimetre. For example any fall between 11 and 15 mm. would be reported by the same code figure and entered as 13 mm. in the Report.

**Sea Disturbance.**—The code for sea disturbance used at coastal stations is given on p. 1 of the British Section of the Report. Ships at sea use the following code:—

0. No or slight swell	} and { Sea smooth to moderate.	5. No or slight swell	} and { Sea rough or above.
1. Moderate swell		6. Moderate swell	
2. Heavy "		7. Heavy "	
3. Long low "		8. Long low "	
4. Confused "		9. Confused "	

**Adjusted Readings.**—Where an instrumental reading is found to be in error and some adjustment is necessary, such adjusted reading is published in brackets thus (59).

The entries in the British Section of the Report for the stations in the main tables on pages 1, 2, and 4 are compared with those in the returns received from the stations at the end of the month and errors in the Report so found are noted in the monthly correction sheets.

The reports from the London Stations on page 1 and from the Health Resorts on page 4 are not subjected to the same close scrutiny but if any errors are found these are also noted in the correction sheets.

**Times of Sunrise, Noon and Sunset.**—From January 1st, 1926, the times of Sunrise, Noon and Sunset published in the British Section of the Report for certain stations have been recalculated from (1) the figures for the duration of sunshine contained in the International Meteorological Tables and (2) the value of the sun's declination and the equation of time published in the Nautical Almanac. The change of declination of the sun on the same day from year to year over a cycle of four years is now taken into account. This change was formerly neglected.

**Valentia.**—The observations at 1 a.m. are taken at the Post Office Wireless Station on Valentia Island. Those at all other hours at the Observatory near Cahirciveen on the mainland.

**Guernsey.**—The observations at 7h., 13h., and 18h. are taken at Fort George, the station being situated at 295 feet above M.S.L. on the high ground to the south of St. Peter Port and outside the town. The observations at 1h. together with the sunshine readings are taken at the station of the States Meteorological Service which is situated in St. Peter Port at 173 feet above M.S.L.

**SUPPLEMENT TO THE DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE, LONDON.**  
**SUMMARY OF METEOROLOGICAL OBSERVATIONS AT SELECTED STATIONS ISSUED ON THE 1st DAY OF EACH MONTH.**

Notes on the Weather of **JUNE, 1928.**

Mainly anticyclonic conditions prevailed over the British Isles during the opening days of June. On the 2nd. and 3rd. records of bright sunshine were particularly good, some stations enjoying 15.0 hours or more on each of the two consecutive days. In northern districts records were also extremely good on the 1st. Temperatures of 70°F. or slightly above were recorded locally during the period 2nd. - 4th.

By the 6th, a depression which had been centred over the Bay of Biscay, moved northward and extended its influence over the British Isles causing rain fairly generally and thunderstorms in many places in Northern England and N. Wales. From then onwards weather was, on the whole, unsettled and cool with pressure high to the extreme north and south of the United Kingdom. Heavy rain fell locally at times, 49 mm. at Harrogate on the 7th, 48 mm. at Roches Point and 35 mm. at Valentia on the 12th, 47 mm. at Brighton during the night of 13th. - 14th, 39 mm. at Eskdalemuir on 28th. and 36 mm. at Tynemouth on the 13th. being among the largest measurements. Polar air broke through at intervals in the rear of depressions which passed east or northeast across the country giving both cool days and nights. Ground frosts occurred locally on the 11th. and 12th. and again from the 15th. - 17th. While day maxima of 50°F. or slightly less were recorded at times in Scotland and N.E. England.

From 25th. - 30th. rough weather prevailed with strong winds, local gales and sharp, squally showers, though some good records of bright sunshine were reported.

The month was extremely wet in parts of Scotland, Ireland and Northern England; at some stations the total rainfall was more than twice the normal and at Eskdalemuir it was the wettest June since observations were begun in 1910. Sunshine was above the normal in parts of Scotland and S.E. England but slightly below in Ireland and parts of Western England. Temperature was low generally and notably so in Northeast Scotland; at Aberdeen the mean for the month was 3.1°F. below the normal.

Daily Rainfall at KEW Observatory.

## TEMPERATURE.

The peaked curves indicate the maximum temperature recorded each day, and the minimum temperature each night throughout the month. The chain lines show normal values.

† The average sunshine for Liverpool and the average rainfall for the other stations marked \* have been computed from the records available for these several stations by reference to the nearest stations with long records.

‡ Based in part on reports made by telegraph in which the day & night mean minima are rounded off to the nearest whole millimetre. Small discrepancies may arise between these totals and those given in the Monthly Weather Report which are based on readings taken to 0.1 mm.

G. O. SIMPSON, F.R.S., Director.

ISOPLETHS<sup>8</sup> BASED ON SIX-HOURLY OBSERVATIONS

NOTE: The diagram is obtained by drawing a line from Akureyri in Iceland to the South of France, near Marseilles. The points at which the isobars drawn for 4 mb. pressure intervals intersect this line at 11h, 13h, and 15h are plotted consecutively and joined to show the variation of pressure from day to day at any point in the line. The line terminates at Lat. 65° N., Long. 10° W. in the north, at Lat. 44° N., Long. 4° E. in the south.

1. Race - ruin has fallen, but amount less than 2.1 mm.

\* Information for these columns not usually received.

<sup>†</sup> The barometric change is expressed in half-millibars.

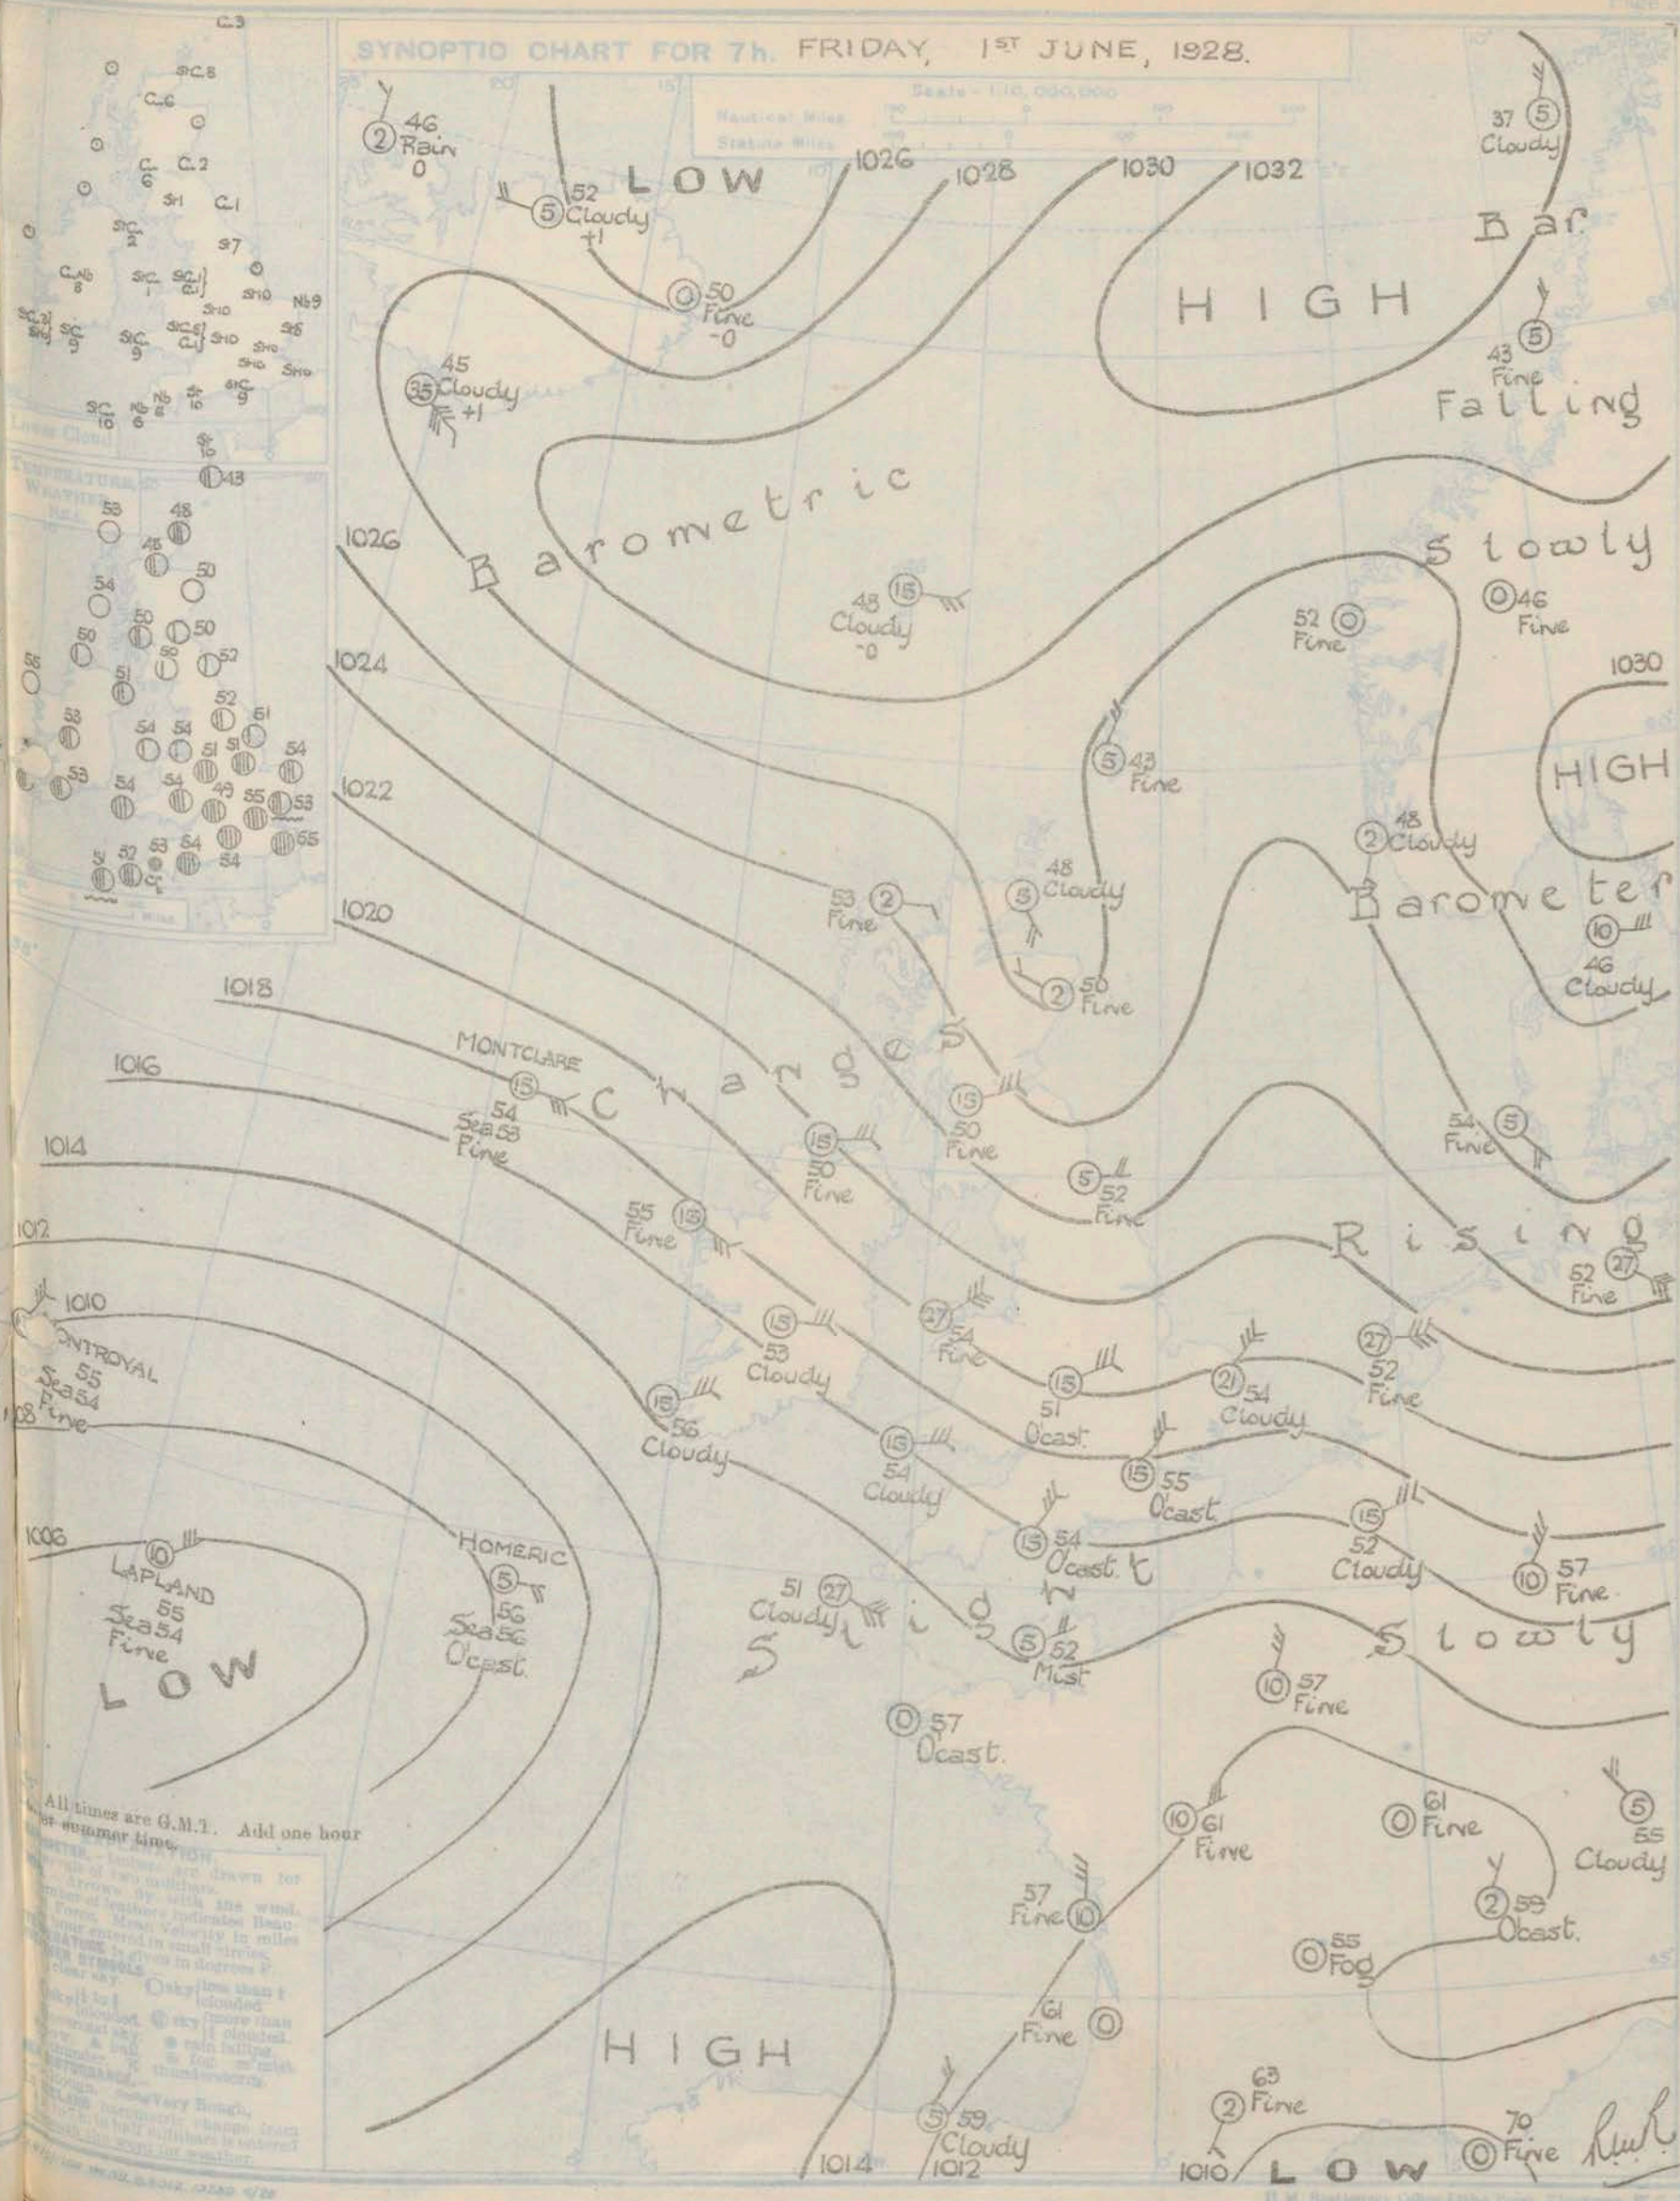

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M. Friday, 1st June 1940.
1. S.E. England	Wind E., moderate or fresh; fine; warm.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind E., moderate or fresh; variable strength; perhaps thunder; rather warm.
6. South Wales	
7. North Wales	As 1 - 4.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Wind E., moderate or light; fine; local showers; cool on coast; rather warm inland during day.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	As 1 - 4.
13. A.W. Scotland	
14. N.W. Scotland	Wind E., light; bright; rather warm.
15. Mid-Scotland	
16. N.E. Scotland	Wind variable or easterly, light; fine; local showers; cool on coasts; rather warm inland during day.
17. Orkneys and Shetlands	
18. N.W. Ireland	
19. N.E. Ireland	
20. S.E. Ireland	As 1 - 4.
21. S.W. Ireland	
22. S.W. Ireland	As 5.

ne, 1928.	Further Outlook
mer.	Mainly fine and rather warm, but thunder- storms not un- likely in the South.
ky, local rain;	
cal coastal fog; ay.	
; local fog; day.	
	ended

# SYNOPTIC CHART FOR 7h. FRIDAY, 1st JUNE, 1928.

Scale - 1:10,000,000  
Nautical Miles  
Statute Miles

All times are G.M.T. Add one hour for summer time.

**SYMBOLS**  
Arrows - indicate direction of wind.  
Number of lines - indicates force of wind.  
Mean velocity in miles per hour entered in small circles.  
Temperature is given in degrees F.  
Cloud symbols -  
Clear sky  
Partly cloudy  
Cloudy  
Overcast  
Rain  
Thunder  
Fog  
Mist  
Hail  
Snow  
Sleet  
Ice  
Frost  
Lightning  
Tornado  
Aurora  
Comet  
Meteor  
Shooting star  
Halley's comet  
Other celestial objects

## GENERAL INFERENCE.

A large anticyclone extending from Iceland to the North Sea is moving southwestward. A depression over Russia has become much deeper, and secondaries are likely to travel southward from Northern Norway to the Eastern North Sea. Except in the extreme northeast, bright weather will continue over tomorrow, but subsequently cool northerly winds are probable over Great Britain.

## Forecasts for the 24 hours commencing 12 Noon G.M. Saturday, 2nd June, 1928.

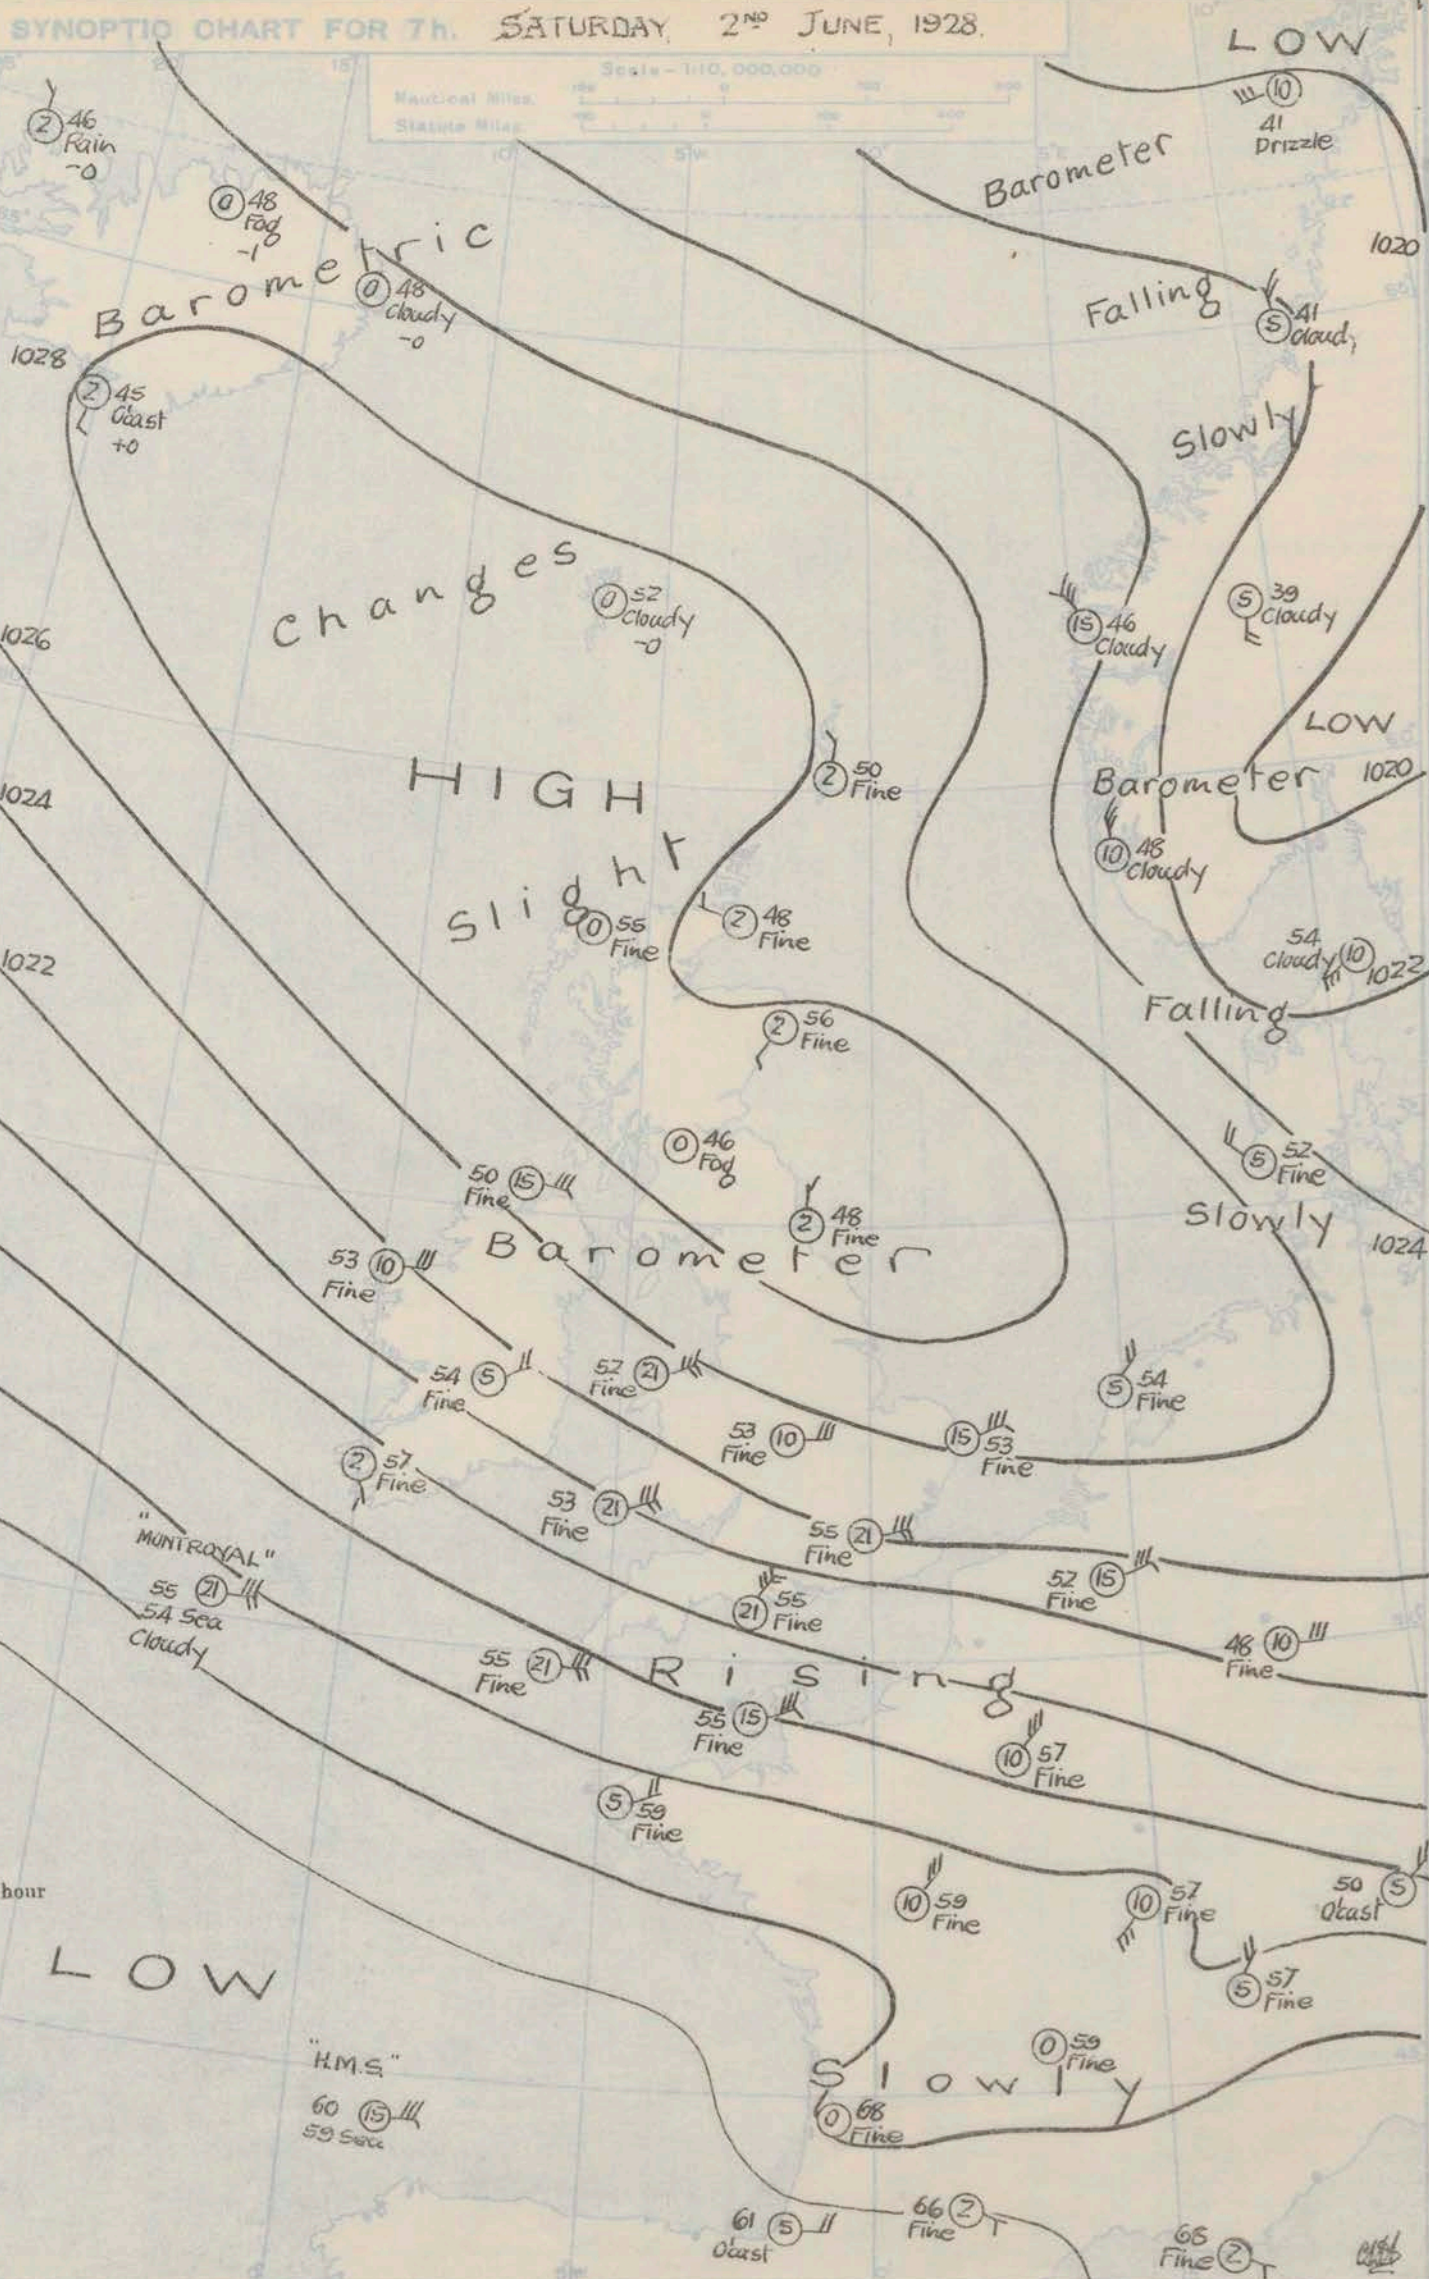

Districts.	Forecast.
1. S.E. England	Wind E., fresh or strong, backing N.E. or N., and falling moderate to light; bright; moderate day temperature, slight ground frost locally at night.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind E., fresh or strong; bright; moderate temperature.
6. South Wales	
7. North Wales	As 1 - 4.
8. N.W. England	
9. N. Midlands	Wind variable, finally N.W., light or moderate; bright; rather warm during day, ground frost locally at night.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. W. Scotland	
14. N.W. Scotland	Wind N.W., light or moderate; bright at first, cloudy later; moderate temperature.
15. N.E. Scotland	
16. Orkneys and Shetlands	Wind N.W., light or moderate, freshening; cloud increasing, perhaps local showers later; moderate temperature.
17. N.W. Ireland	
18. N.E. Ireland	Wind E., moderate or fresh, falling light; bright; moderate day temperature, slight ground frost locally at night.
19. S.E. Ireland	
20. S.W. Ireland	

Fine over Sunday except in N.E. Scotland, but subsequently becoming colder over Great Britain and less settled in eastern districts with northerly winds and local ground frost at night.

# SYNOPTIC CHART FOR 7h. SATURDAY, 2<sup>ND</sup> JUNE, 1928.

Scale - 1:10,000,000  
Nautical Miles  
Statute Miles

All times are G.M.T. Add one hour  
for summer time.

**EXPLANATION.**  
Isobars are drawn for  
every two millibars.  
Arrows, by with the wind.  
Number of feathers indicates Beau-  
fort force. Mean velocity in miles  
per hour entered in small circles.  
TEMPERATURE is given in degrees F.

Observations from Cross Channel Steamers

Position	Date and Time	Steamship	Wind		Weather	Temp.	
			Dir.	Force		Air	Sea
	12h 2nd	St. Helier	ENE	7	bc-	55	53
	10h 2nd	Hibernia	ENE	4	c	51	50
	1h 3rd	Dieppe	E	5	bc	55	53

## GENERAL INFERENCE.

A large anticyclone extends from south of Iceland southwards across the British Isles is moving very slowly south-westwards. A shallow secondary depression near the Faeroes will move southwards. Weather will continue fine or fair over Ireland, and most of England but will deteriorate in Scotland.

## Further Outlook.

Mainly fair or fine in the West and South cooler in the North.

## Districts.

Forecasts for the 24 hours commencing 12 Noon G.M.T.

Sunday, 3rd June, 1928.

1. S.E. England	Light variable winds; bright; rather high day temperature; slight ground frost locally at night.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Fresh to strong easterly winds; bright; moderate temperature.
6. South Wales	
7. North Wales	Light variable winds; bright; rather high day temperature, slight ground frost locally at night.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Light northwest winds; bright today; cloudier tomorrow; moderate temperature.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Light variable winds; bright; rather high day temperature.
13. A.W. Scotland	
14. N.W. Scotland	Light variable winds, becoming northwesterly; fair today; more cloudy tomorrow with perhaps some rain or drizzle.
15. Mid-Scotland	
16. S.E. Scotland	Light to moderate west or northwest winds; cloudy, some rain or drizzle, brighter intervals; moderate temperature.
17. Orkneys and Shetlands	
18. N.W. Ireland	
19. N.E. Ireland	Light variable to easterly winds; bright; rather high day temperature; slight ground frost locally at night.
20. S.E. Ireland	
21. S.W. Ireland

## GENERAL INFERENCE.

An anticyclone is centred between Scotland and Iceland whilst a shallow depression lies over East Anglia and a deeper one off our southwest coasts is moving northeastward. Dull rather warm weather with some rain will prevail over the southern half of the British Isles but brighter periods are likely in Scotland.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M. Monday, 4th June, 1928.	Further Outlook.
1. S.E. England	Moderate easterly winds, becoming fresh; dull, some rain; rather warm.	Remaining bright in Scotland and the extreme part of Northern England but unsettled elsewhere. Continuing rather warm generally.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Fresh easterly winds becoming southeasterly; dull; some rain; rather warm.	
6. South Wales		
7. North Wales	Moderate easterly winds becoming fresh; bright intervals at first becoming cloudy with some rain later; rather warm.	
8. N.W. England		
9. N. Midlands		
10. N.E. England	Moderate northeasterly winds becoming fresh easterly; bright periods at first; cloudy later; rather warm.	
11. S.E. Scotland		w.H.P.
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland	Fresh northeasterly winds; considerable bright periods; rather warm.	
14. Mid-Scotland		
15. N.E. Scotland		
16. Orkneys and Shetlands		
17. N.W. Ireland	Moderate northeasterly winds, fresh at times, becoming easterly; bright intervals at first, cloudy later; rather warm.	
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland	As 5 - 6.

A ridge of high pressure associated with an anticyclone centred north of Iceland extends southeastwards over the British Isles whilst a secondary depression centred north of Scotland will move down the North Sea. Rain or drizzle is likely to spread southwards down our eastern districts and is also likely to continue in the extreme southwest. Temperature will be moderate.

## Districts.

Forecasts for the 24 hours commencing 12 Noon G.M.T. Tuesday, 5th June, 1928.

## Further Outlook

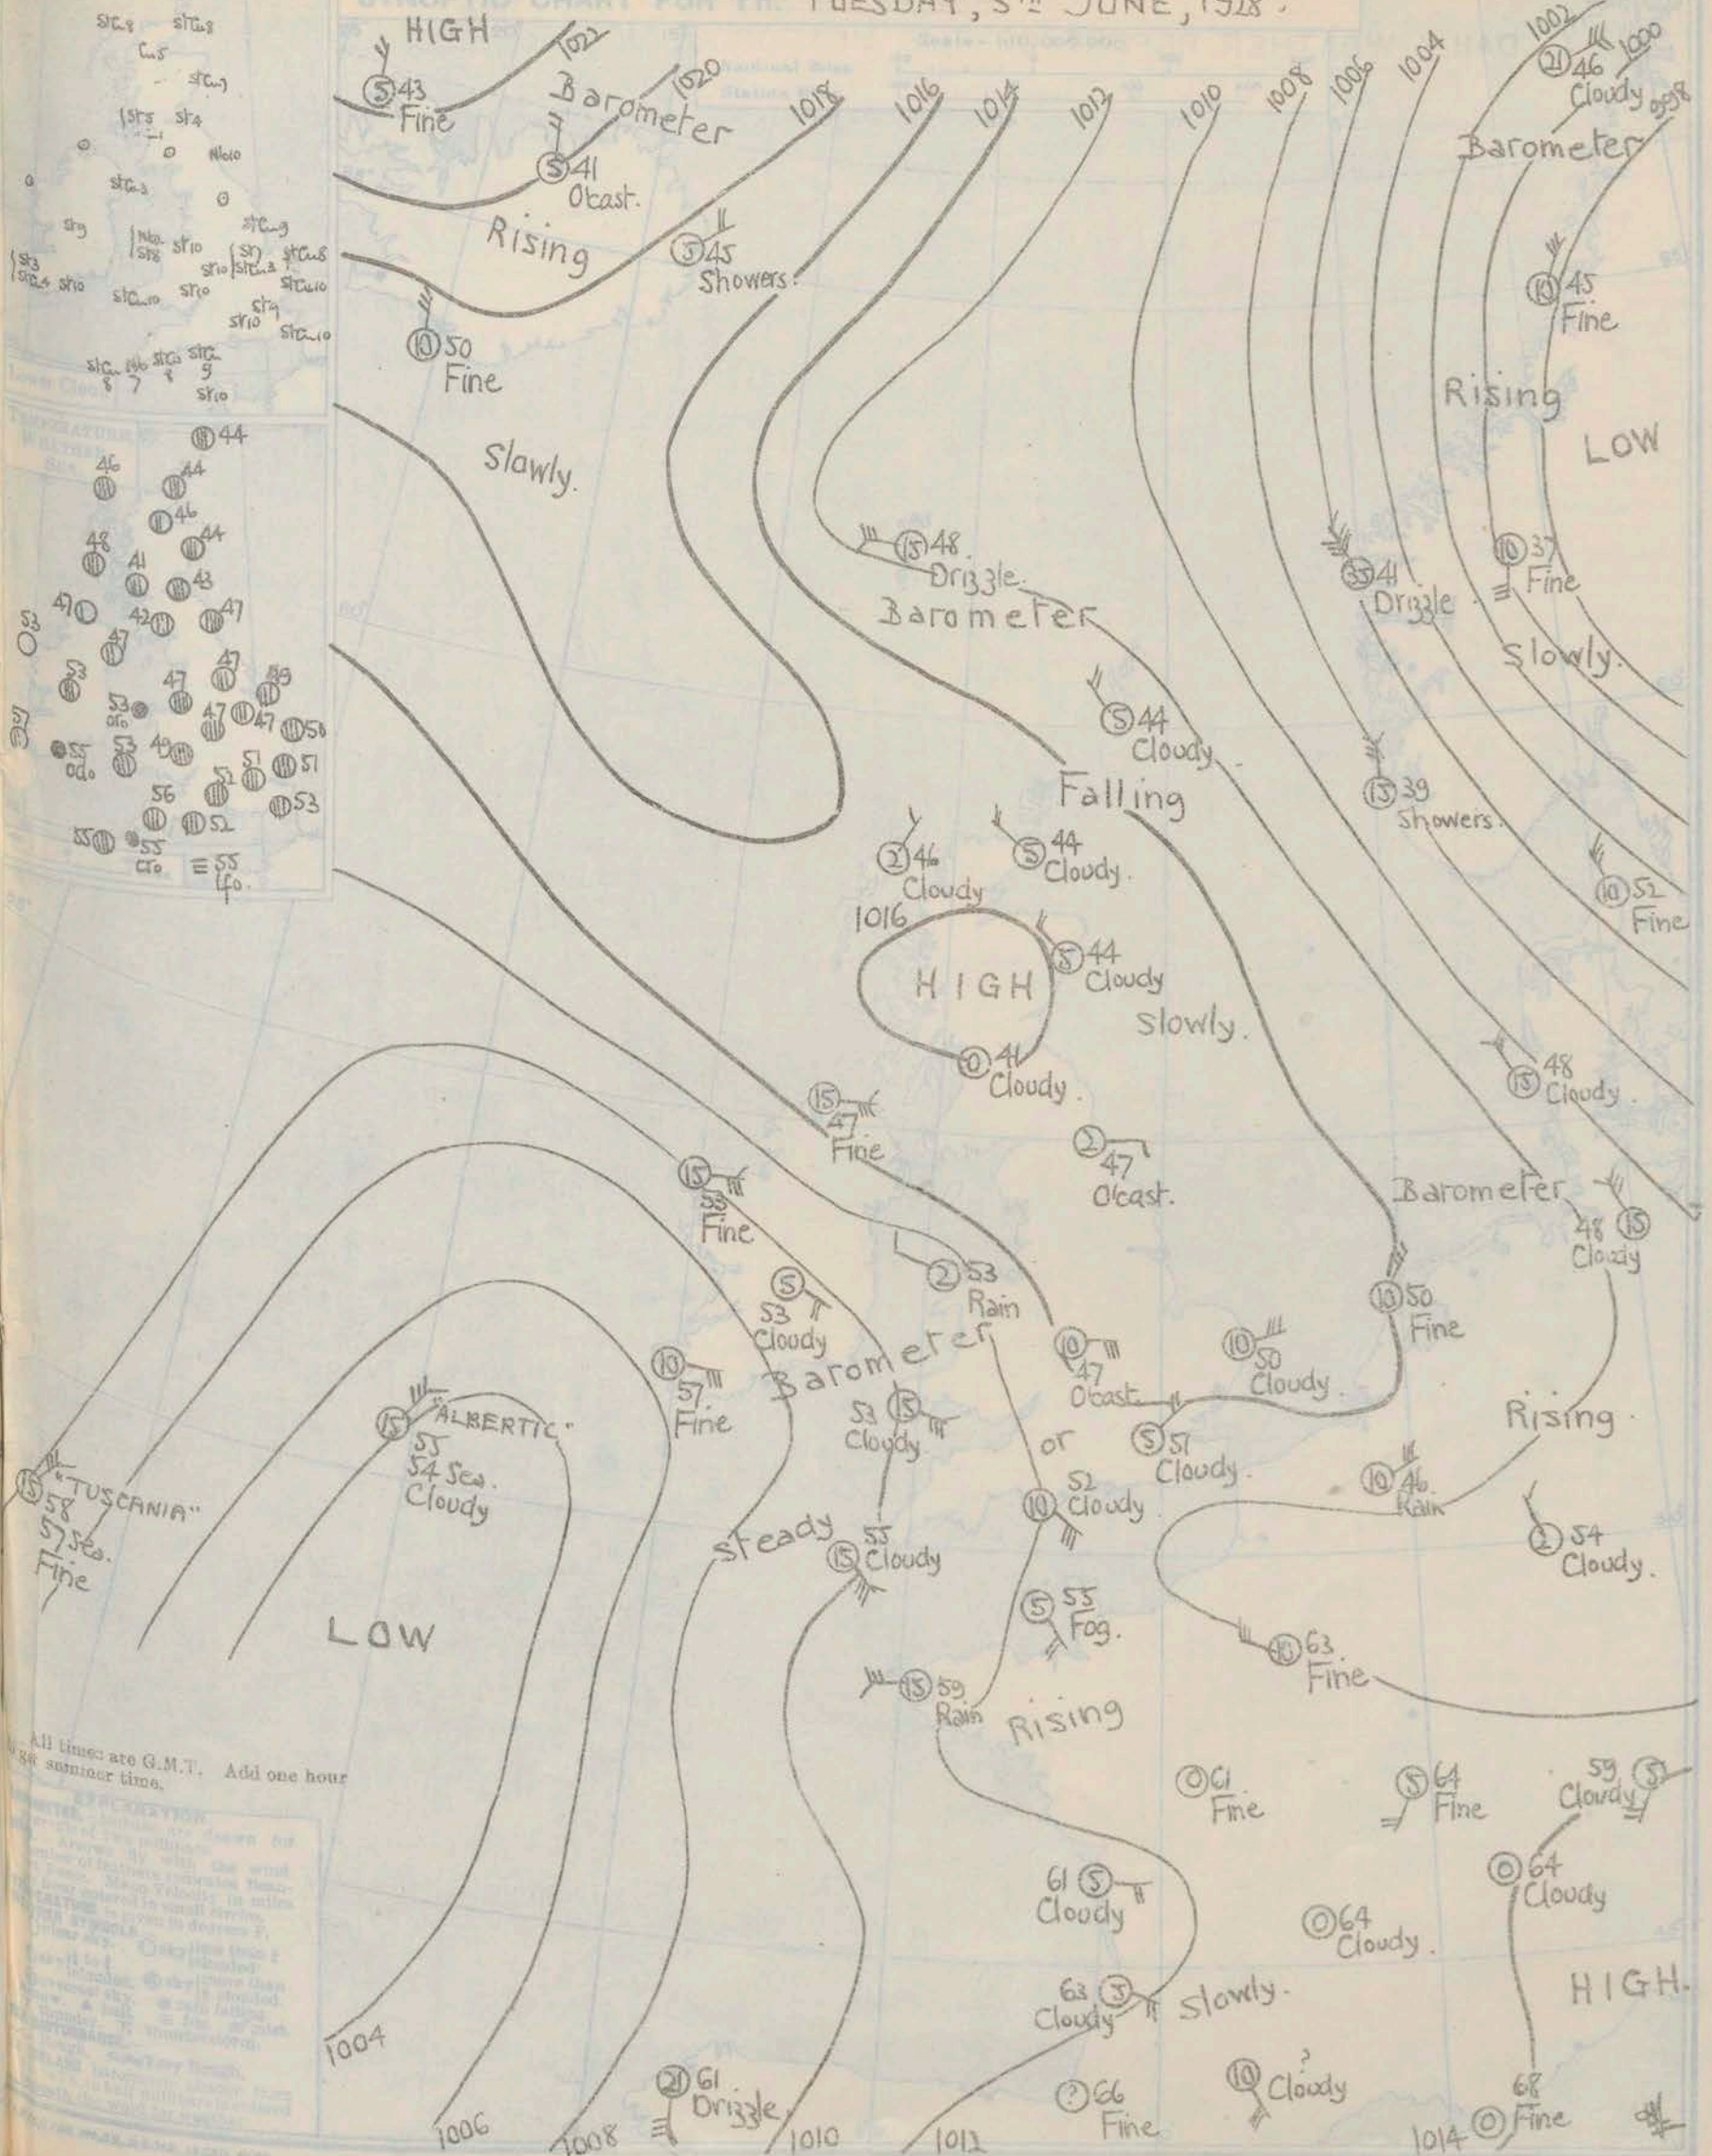

1. S.E. England	Light easterly winds at first becoming northwesterly to northerly later and freshening; dull with occasional light drizzle locally today, some rain tomorrow; moderate temperature, falling somewhat.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	Light easterly winds at first becoming northwesterly to northerly later and freshening; bright intervals at first; cloudy later with some rain; moderate temperature falling somewhat.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Light northwesterly winds, freshening; cloudy, with some rain later, moderate temperature falling somewhat.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	As 7 - 9.
13. A.W. Scotland	Moderate westerly winds becoming fresh northerly; cloudy, some rain; temperature falling.
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkneys and Shetlands	
17. N.W. Ireland	As 7 - 9.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

Bright intervals some showers, becoming cooler.

## GENERAL INFERENCE

A shallow depression off our southwest coasts is moving slowly northward whilst an anticyclone persists north of Iceland. Weather over the British Isles generally will be cloudy with showers and probably local thunderstorms. Temperature will be moderate and winds mainly from a southerly or southeasterly point.

Districts. Forecasts for the 24 hours commencing 12 Noon G.M.T. Wednesday, 6th June, 1928.

1. S.E. England	Light southeasterly winds, moderate at times; cloudy with occasional bright intervals; some showers, probably local thunderstorms; mist or fog at night and in the early morning; day temperature moderate to rather high.	
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England		
11. S.E. Scotland	Light variable or southeasterly winds; cloudy with bright intervals but occasional showers perhaps with thunder; mist or fog at night and in the early morning; day temperature moderate to rather high.	
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland		
14. N.W. Scotland		
15. Mid-Scotland		
16. N.E. Scotland		
17. Orkneys and Shetlands	Moderate south easterly winds; cloudy, some showers perhaps with thunder; mist or fog at night and in the early morning; day temperature moderate to rather high.	
18. N.W. Ireland		
19. N.E. Ireland		
20. S.W. Ireland		

Further Outlook

No important change is indicated.

## GENERAL INFERENCE.

A complex low pressure system covers the British Isles and is deepening whilst spreading northeastward. Weather will be mild and unsettled with rain or showers in all districts.

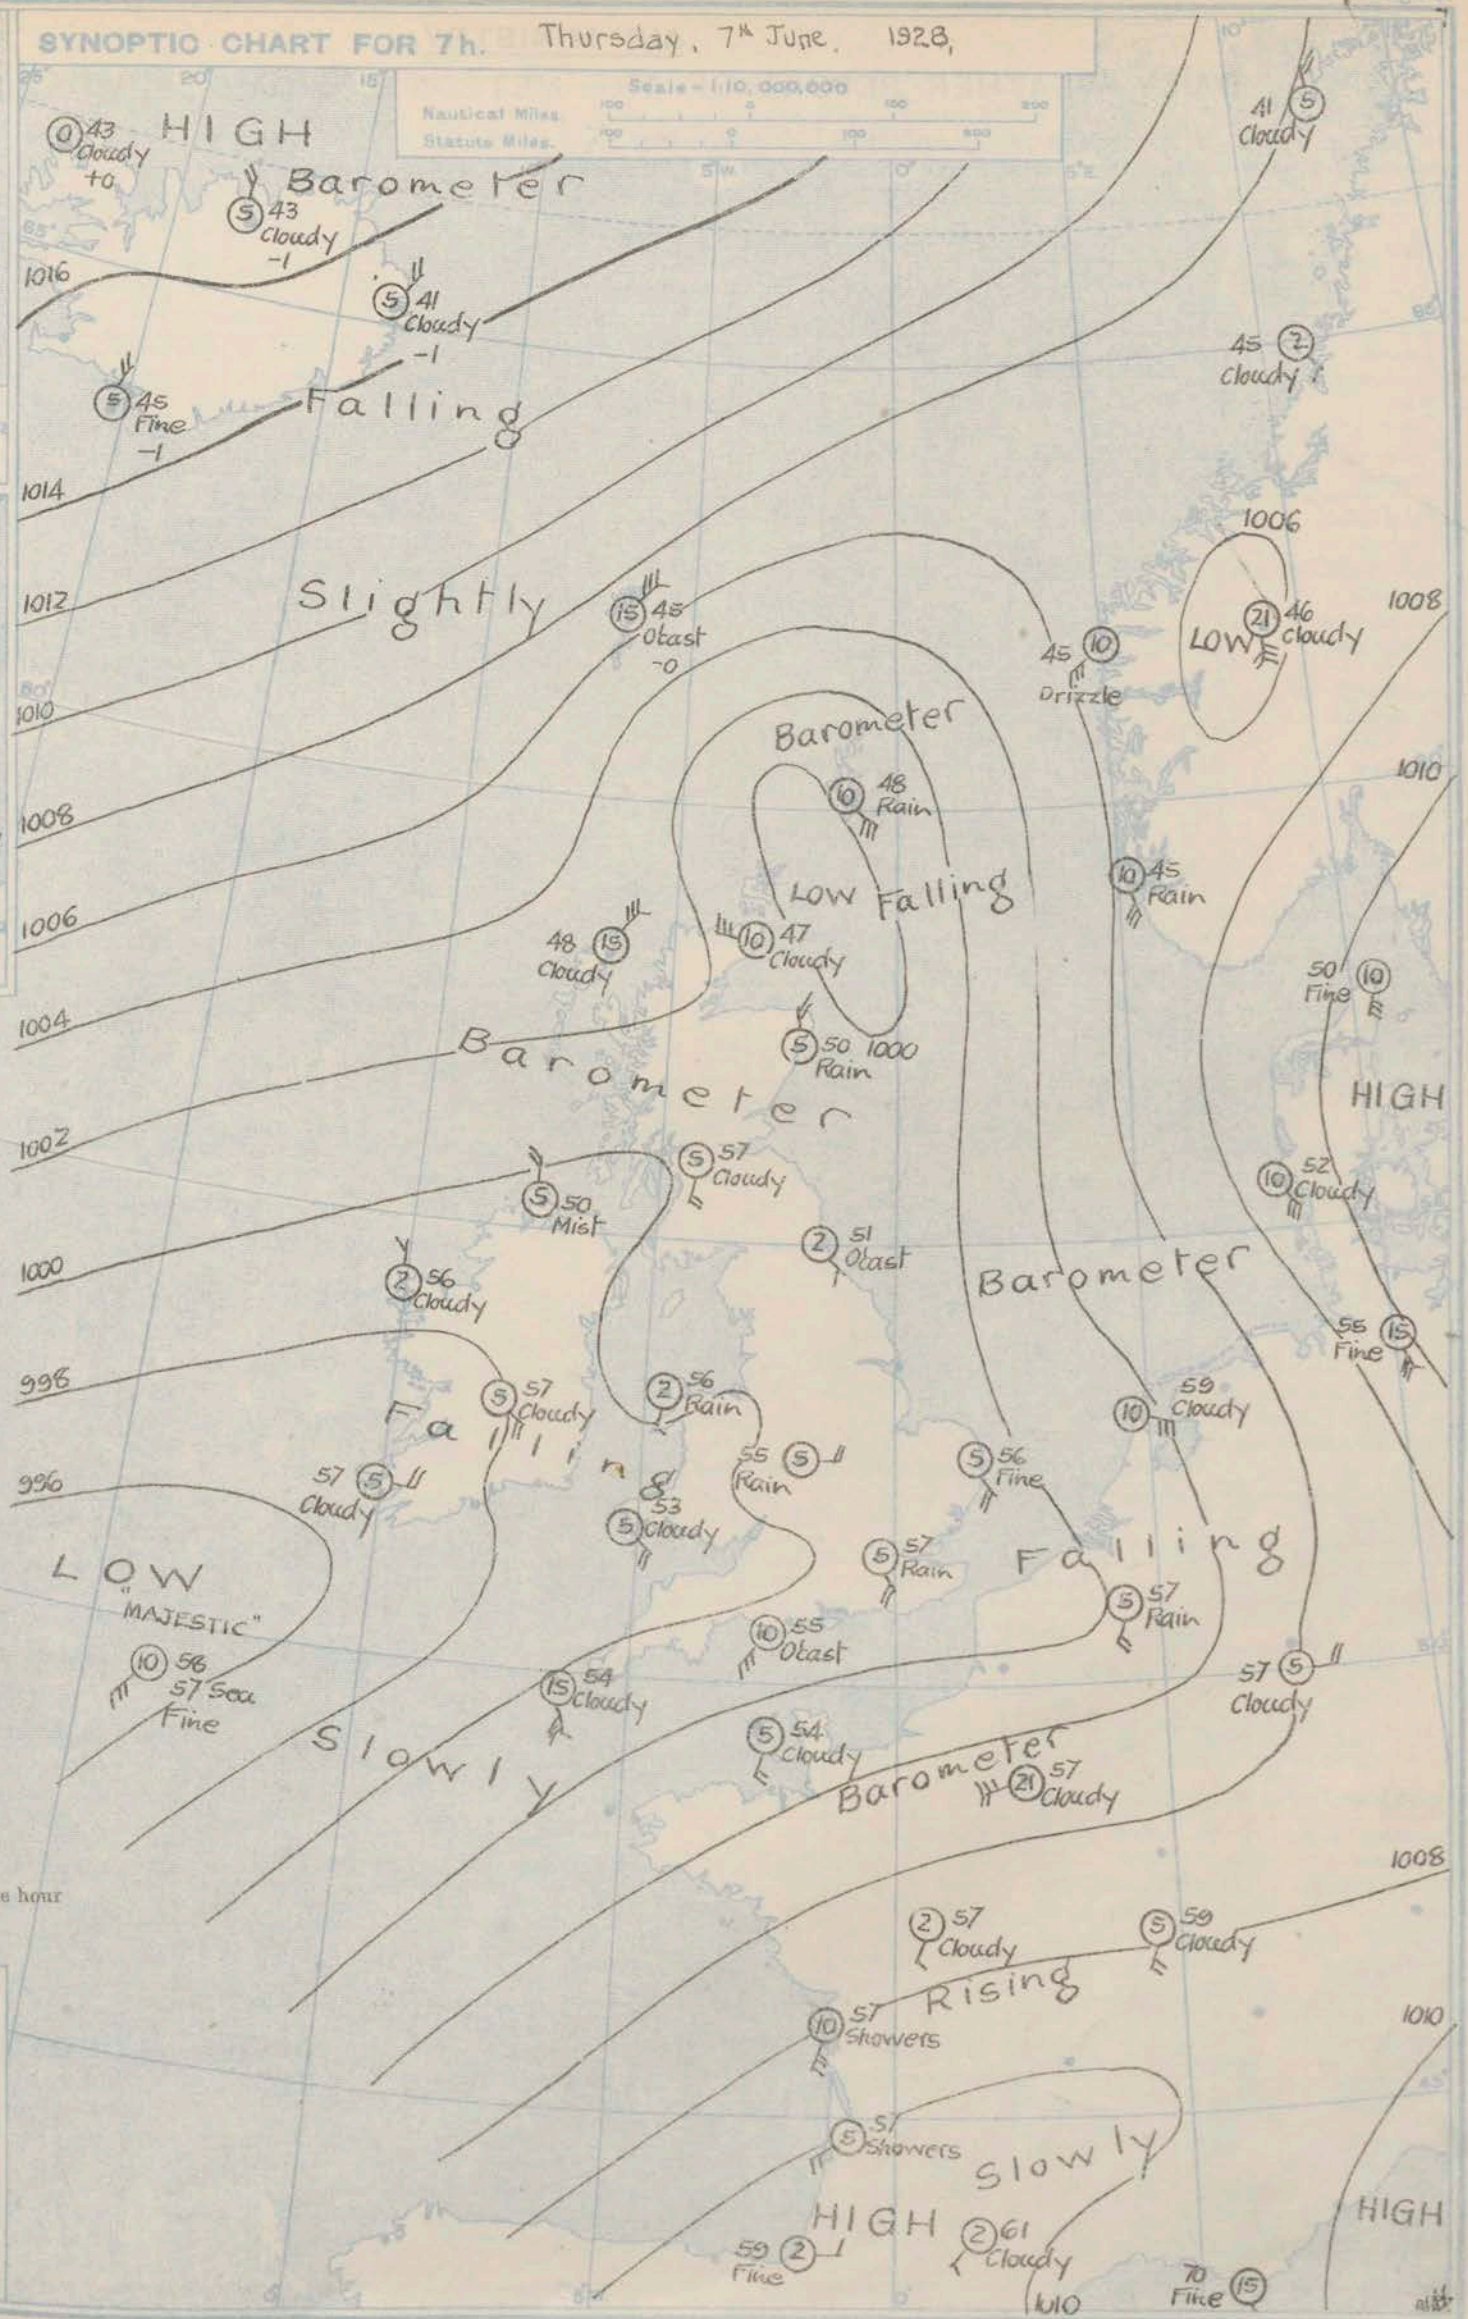

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Thursday, 7th June, 1928.	Further Outlook.
1. S.E. England	Light or moderate variable or southerly winds; generally cloudy with rain at first and some showers later; mild.	Mild and unsettled.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Light or moderate variable winds; cloudy; some rain or showers; mild.	
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands	Moderate northeasterly winds; cloudy, occasional brighter intervals; some showers; moderate temperature.	
10. N.E. England		
11. S.E. Scotland		
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland & N.W. Scotland	As 5 - 12.	
14. Mid-Scotland		
15. N.E. Scotland		
16. Orkneys and Shetlands		
17. N.W. Ireland	As 5 - 12.	
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

# SYNOPTIC CHART FOR 7h. Thursday, 7th June, 1928.

Nautical Miles  
Statute Miles

Scale - 1:10,000,000

All times are G.M.T. Add one hour to get summer time.

**EXPLANATION.**  
Isobars are drawn for intervals of two millibars.  
Arrows show the direction of the wind.  
Number at bottom indicates Barometer Force. Mean Velocity in miles per hour entered in small circles.  
TEMPERATURE is given in degrees F.  
WEATHER SYMBOLS:  
Clear sky. ☐  
Light clouds. ☁  
Overcast sky. ☁  
Thunder. ⚡  
Thunderstorm. ⚡  
Snow. ❄  
Fog. 🌫  
Mist. 🌫  
Rain. ☔  
Rain or snow. ☔  
Very Rough. 🌪  
Isobars: barometric change from 10. to 7.0 in half millibars is entered opposite the word for weather.

## GENERAL INFERENCE.

Pressure continues high north of Iceland but depressions will continue to move across the British Isles from the Atlantic. Weather will continue unsettled with further rain or showers in all districts though fairer periods will occur.

## Districts.

Forecasts for the 24 hours commencing 12 Noon G.M.T. Friday, 8th June, 1928.

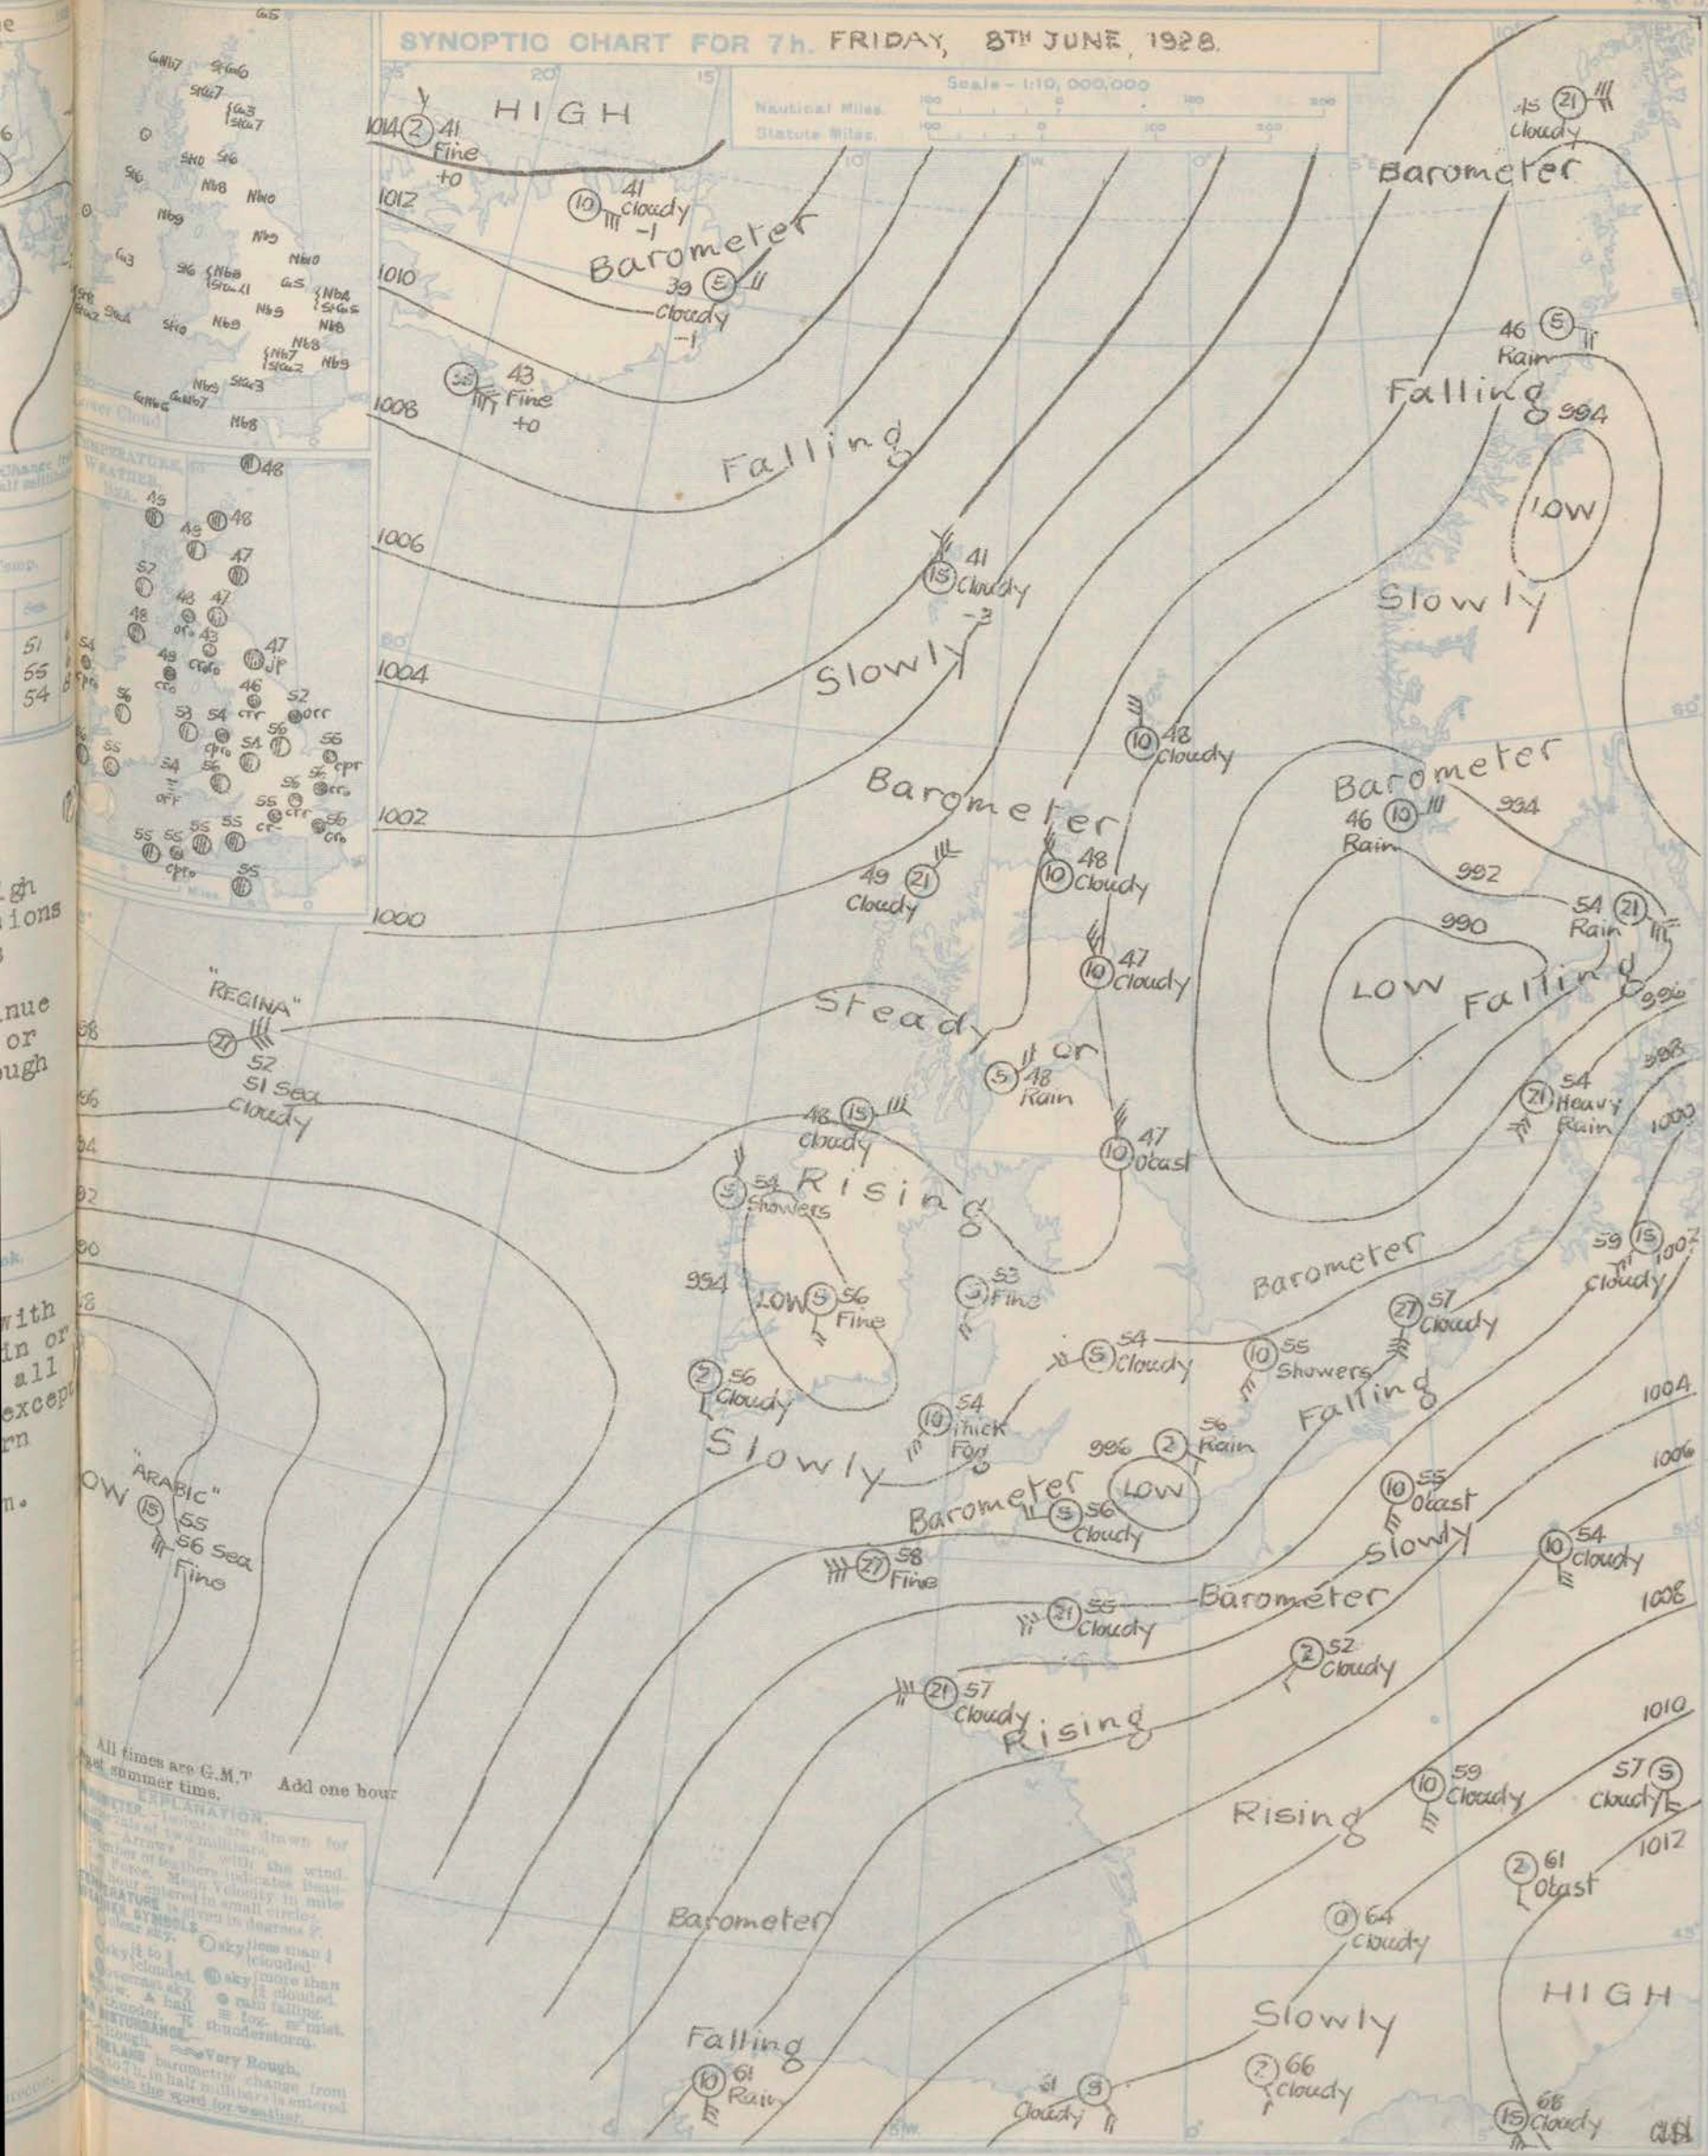

## Further Outlook.

1. S.E. England	Moderate westerly or southwesterly winds, fresh at times, backing later; cloudy with bright intervals and some showers at first, rain later; rather warm.
2. E. England	
3. E. Midlands	
4. W. Midlands	Moderate southwesterly winds freshening somewhat; cloudy with bright intervals and occasional showers at first; rain later; rather warm.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	Moderate easterly winds freshening somewhat; cloudy with brighter intervals and occasional showers at first; rain later; rather warm.
9. N. Midlands	
10. N.E. England	Moderate northerly or northwesterly winds at first becoming easterly later; cloudy with brighter intervals and occasional showers at first, rain later; rather warm.
11. S.E. Scotland	
12. S.W. Scotland	
13. Isle of Man	Moderate easterly winds, freshening somewhat; cloudy, bright intervals; occasional showers; rather warm.
14. A.W. Scotland	
15. N.W. Scotland	Moderate northeasterly winds; cloudy with bright intervals; moderate temperature.
16. N.E. Scotland	As 12 - 13A.
17. Orkneys and Shetlands	Moderate northeasterly winds; cloudy; occasional showers; moderate temperature.
18. N.W. Ireland	
19. N.E. Ireland	Moderate easterly winds, freshening somewhat; cloudy; some rain or showers; rather warm.
20. S.W. Ireland	Moderate southwesterly to southerly winds, freshening; fair at first; rain later; rather warm.

Unsettled with further rain or showers in all districts except northwestern Scotland. Rather warm.

## GENERAL REMARKS.

A deep depression centred over Southern Ireland is moving slowly northeastward and secondaries associated with it are likely to move up from the southwest across the British Isles. Weather will continue generally unsettled with further rain or showers in most districts though brighter periods are likely in the southwest and south especially at first.

## Further Outlook.

Districts.	Forecast for the 24 hours commencing 12 Noon 6 Saturday, 9th June, 1928.	Further Outlook.
1. S.E. England	Fresh southwesterly winds, strong at times; bright intervals and occasional showers today; some rain likely tomorrow; rather warm.	Continuing unsettled with showers in Northern districts and further rain in Southern ones. Rather warm in South, moderate in North.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales		South cone hoisted in Districts 5 and 6, at 18h. 55m. 8.6.25.
7. North Wales		
8. N.W. England	Fresh easterly winds, strong at times; rainy at first; bright intervals with showers later; rather warm.	
9. N. Midlands	As 1 - 7.	
10. N.E. England	As 8.	
11. S.E. Scotland		w.w.p.
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland	Fresh easterly to northeasterly winds; rainy at first; bright intervals with showers later; moderate temperature.	
14. N.W. Scotland		
15. Mid-Scotland		
16. N.E. Scotland		w.w.p.
17. Orkneys and Shetlands		
18. N.W. Ireland	Fresh northeasterly to northerly winds; bright intervals, occasional showers; moderate temperature.	
19. S.E. Ireland	Fresh westerly to northwesterly winds, backing later; bright intervals; occasional showers; moderate temperature.	
20. S.W. Ireland

## GENERAL INFERENCE.

A depression centred near the Firth of Forth is moving northeast, and is being succeeded by a wedge of relatively high pressure. A fresh depression is indicated at some distance on the Atlantic. Winds will be mainly between north and west fresh or strong generally at first and weather showery with local thunder but considerable bright intervals will occur in most districts.

## Districts. Forecasts for the 24 hours commencing 12 Noon G.M.Sunday, 10th June, 1928.

1. S.E. England	Fresh to strong southwest to west winds, moderating, thundery showers, bright periods; cool.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Fresh to strong N.W. winds, moderating and backing again later, thundery showers, bright periods; cool.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	Moderate to fresh W. to N.W. winds, cloudy, occasional rain at first, thundery showers and bright periods later; cool.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland	
14. B.N.W. Scotland	As 5 - 9.
15. Mid-Scotland	
16. N.E. Scotland	Wind between N.E. and N.W., moderate to fresh, cloudy, occasional rain at first, thundery showers and bright periods later; cool.
17. Orkneys and Shetlands	
18. N.W. Ireland	
19. N.E. Ireland	Fresh to strong northerly winds, moderating and backing again later, considerable bright periods apart from local thundery showers; cool.
20. S.E. Ireland	
21. S.W. Ireland	

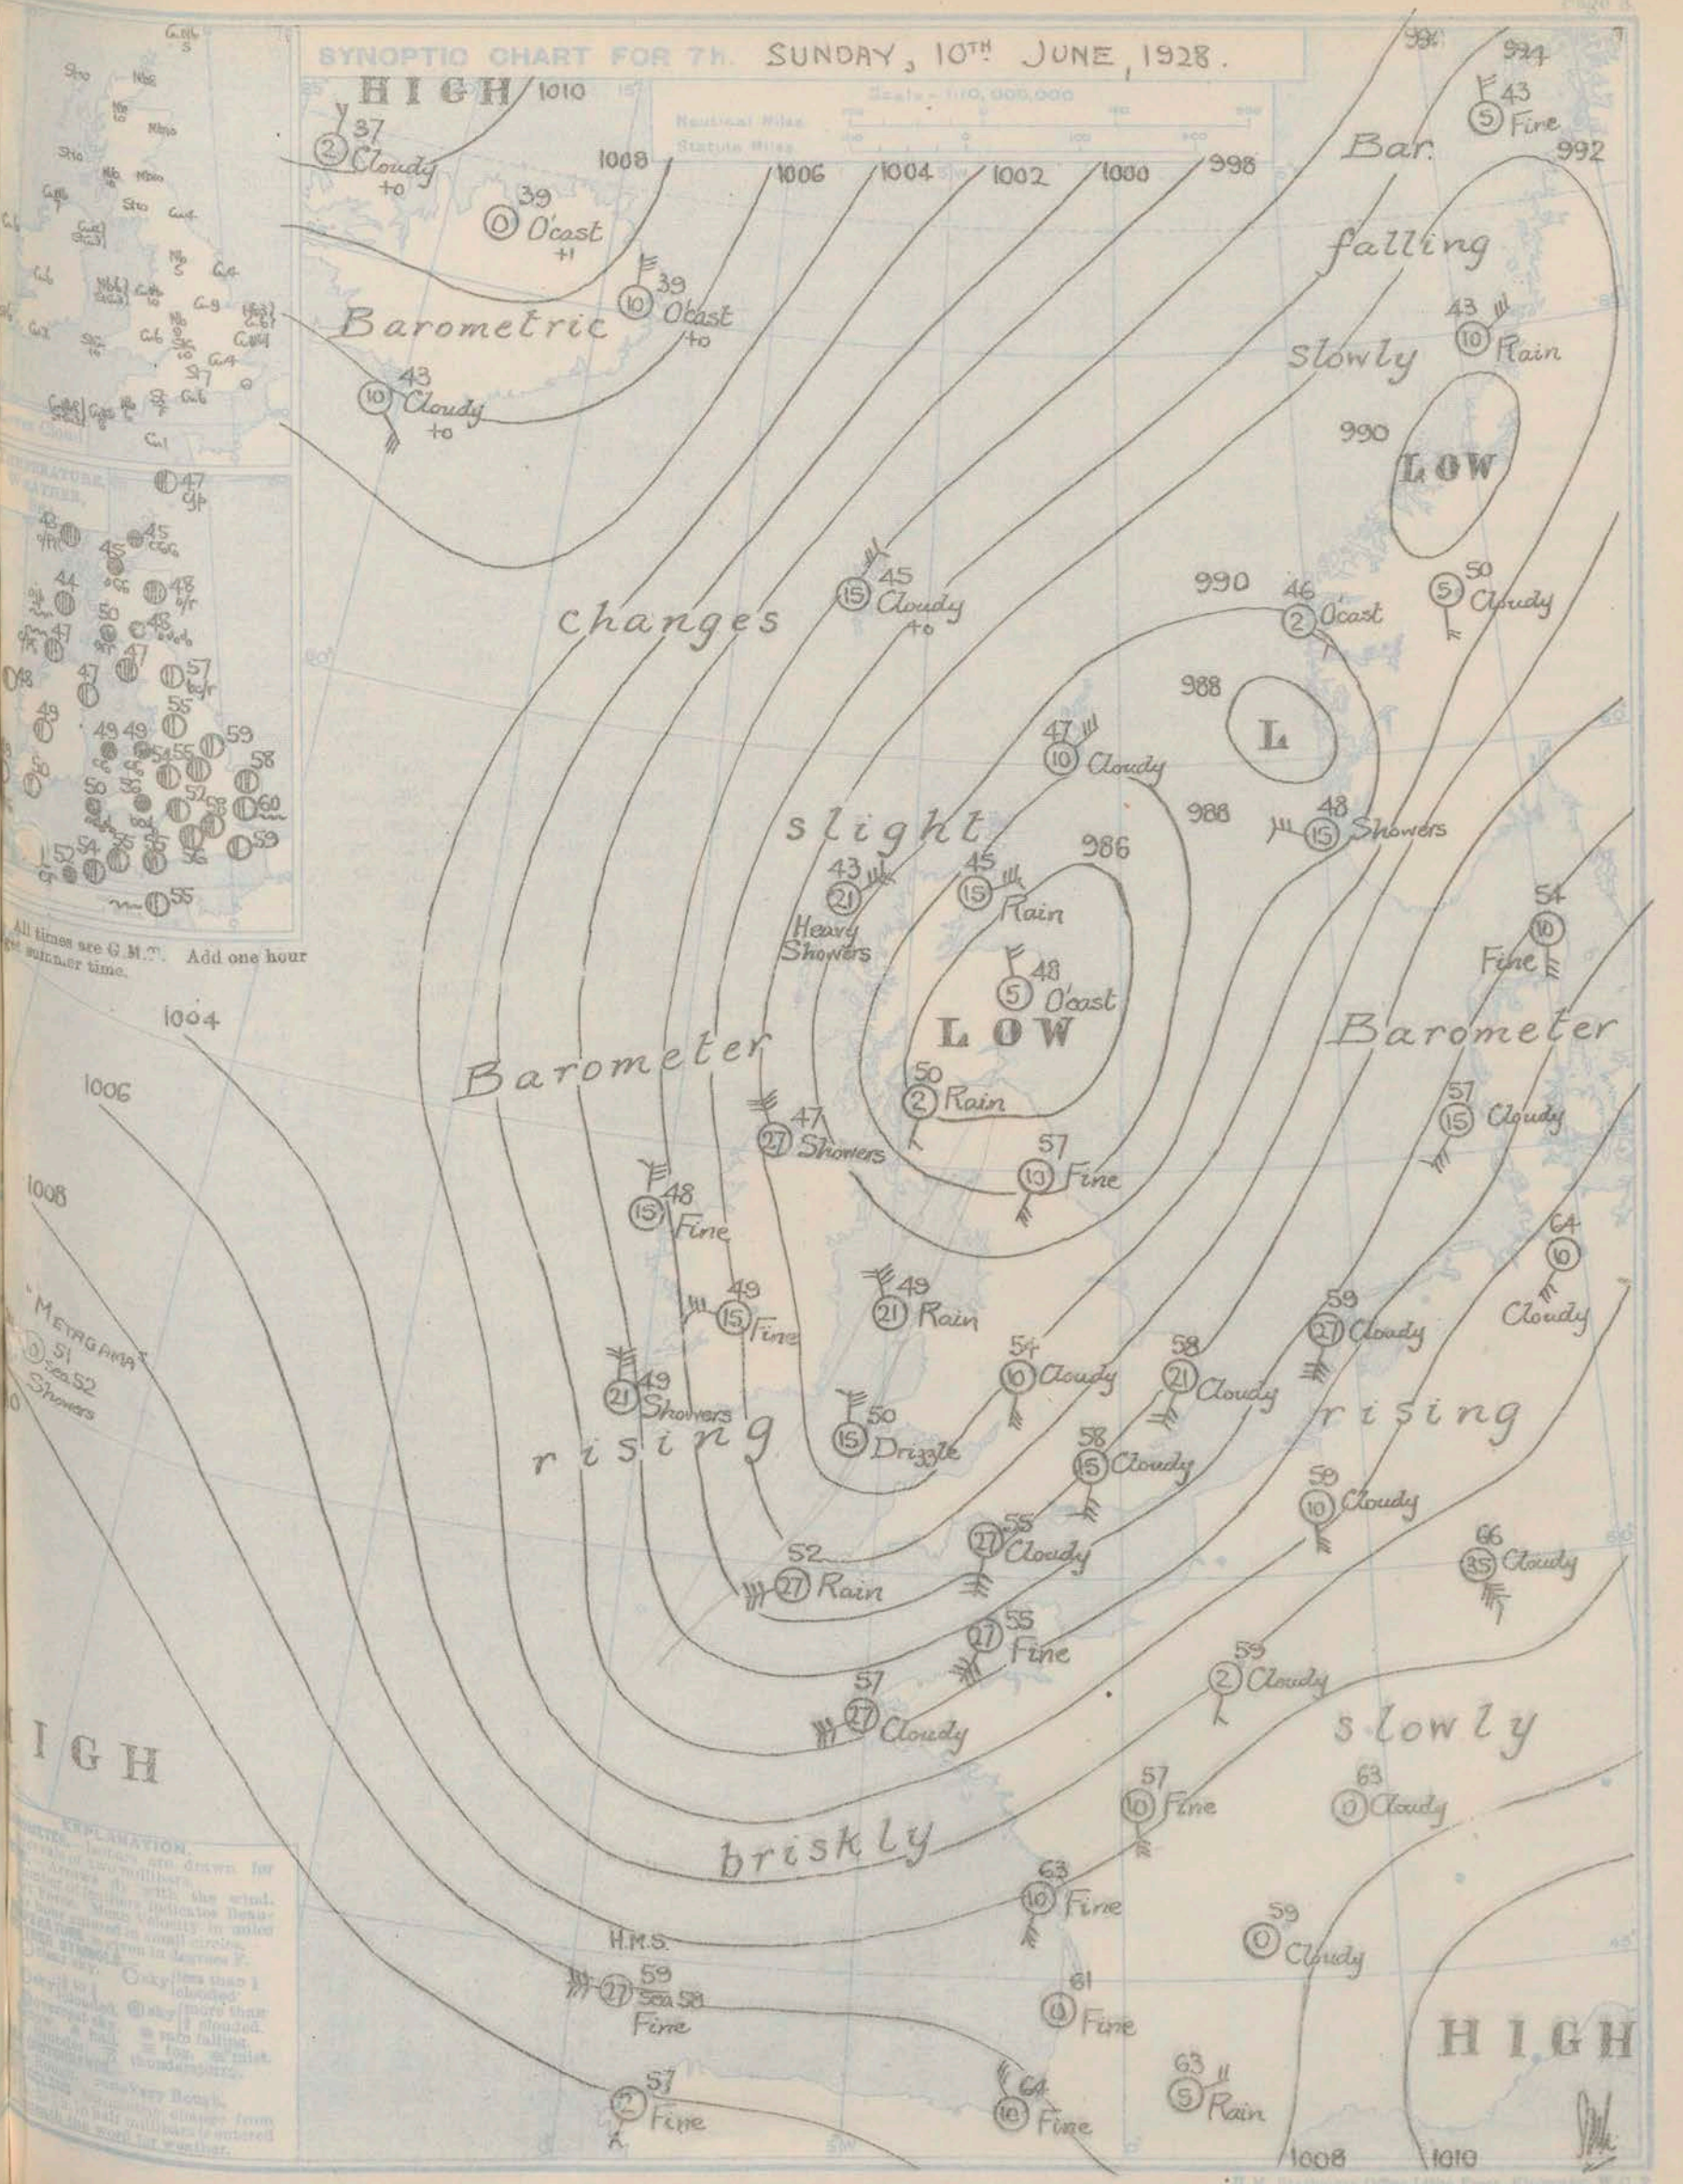

Farther Outlook.

A brief fair period will be succeeded by a renewal of unsettled conditions.

↓ South Cone still flying.

SYNOPTIC CHART FOR 7H. SUNDAY, 10TH JUNE, 1928.

All times are G.M.T. Add one hour for summer time.

EXPLANATION.  
Isobars are drawn for intervals of two millibars.  
Arrows show the direction of the wind.  
The number of millibars indicates the barometric tendency in the last 24 hours.  
The number in a circle indicates the number of hours since the last observation.  
The number in a square indicates the number of hours since the last observation.  
The number in a triangle indicates the number of hours since the last observation.  
The number in a diamond indicates the number of hours since the last observation.  
The number in a star indicates the number of hours since the last observation.  
The number in a cross indicates the number of hours since the last observation.  
The number in a plus indicates the number of hours since the last observation.  
The number in a minus indicates the number of hours since the last observation.  
The number in a dot indicates the number of hours since the last observation.  
The number in a dash indicates the number of hours since the last observation.  
The number in a vertical line indicates the number of hours since the last observation.  
The number in a horizontal line indicates the number of hours since the last observation.  
The number in a diagonal line indicates the number of hours since the last observation.  
The number in a curved line indicates the number of hours since the last observation.  
The number in a zigzag line indicates the number of hours since the last observation.  
The number in a wavy line indicates the number of hours since the last observation.  
The number in a dotted line indicates the number of hours since the last observation.  
The number in a dashed line indicates the number of hours since the last observation.  
The number in a solid line indicates the number of hours since the last observation.  
The number in a thick line indicates the number of hours since the last observation.  
The number in a thin line indicates the number of hours since the last observation.  
The number in a double line indicates the number of hours since the last observation.  
The number in a triple line indicates the number of hours since the last observation.  
The number in a quadruple line indicates the number of hours since the last observation.  
The number in a quintuple line indicates the number of hours since the last observation.  
The number in a sextuple line indicates the number of hours since the last observation.  
The number in a septuple line indicates the number of hours since the last observation.  
The number in an octuple line indicates the number of hours since the last observation.  
The number in a nonuple line indicates the number of hours since the last observation.  
The number in a decuple line indicates the number of hours since the last observation.

## GENERAL INFERENCE.

A depression centred between Northern Scotland and Scandinavia is filling up as it moves very slowly northeastwards. Weather will be mainly bright and sunny but there will be a few scattered showers, chiefly in northwestern and northern coastal districts.

Districts.	Forecast for the 24 hours commencing 12 Noon G.M.T. Monday, 11th June, 1928.	Further Outlook.
1. S.E. England	Westerly winds, light to moderate; variable skies with perhaps a few scattered thundery showers; local morning mist; moderate day temperature; chance of slight ground frost in early morning.	Little change in eastern districts; probably less settled in the West.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales		
7. North Wales		
8. N.W. England	Westerly winds, mainly light to moderate; bright periods; a few scattered showers; local morning mist; moderate day temperature, slight ground frost locally at night.	
9. N. Midlands		
10. N.E. England		
11. S.E. Scotland	Northwesterly to westerly winds, light to moderate; variable skies, occasional rain or showers; moderate day temperature, perhaps slight ground frost locally at night.	
12. S.W. Scotland & Isles of Man		
13. A.W. Scotland		
14. N.W. Scotland		
15. N.E. Scotland		
16. Orkneys and Shetlands	Westerly winds, backing, light to moderate; fine today, cloudy tomorrow with perhaps local rain; moderate day temperature, slight ground frost in early morning.	
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland

**GENERAL INFERENCE.**

A ridge of high pressure, extending northwestwards over the British Isles from an anticyclone over France, will move eastwards and be followed by a depression from the Atlantic. In the East and North weather today will be mainly bright but in the Southwest and West conditions will become generally less settled.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Tuesday, 12th June, 1928.	Further Outlook.
1. S.E. England	Variable to southeasterly or southerly winds, light to moderate, fine at first apart from a few scattered thundery showers, cloudy later; local morning mist; moderate temperature to rather warm.	Rather unsettled but some bright periods.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Winds variable to southeasterly, moderate to fresh; cloudy, occasional rain; moderate temperature.	
6. South Wales		
7. North Wales		
8. N.W. England	Light variable winds; mainly bright but occasional showers; local morning mist or fog; moderate day temperature, ground frost locally at night.	
9. N. Midlands		
10. N.E. England		
11. S.E. Scotland	Moderate westerly winds, backing; bright intervals; occasional local rain or showers; moderate temperature.	
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland		
14. Mid-Scotland	Variable to southeasterly or southerly winds, light to moderate or fresh; cloudy, occasional rain; moderate day temperature.

## GENERAL INFERENCE.

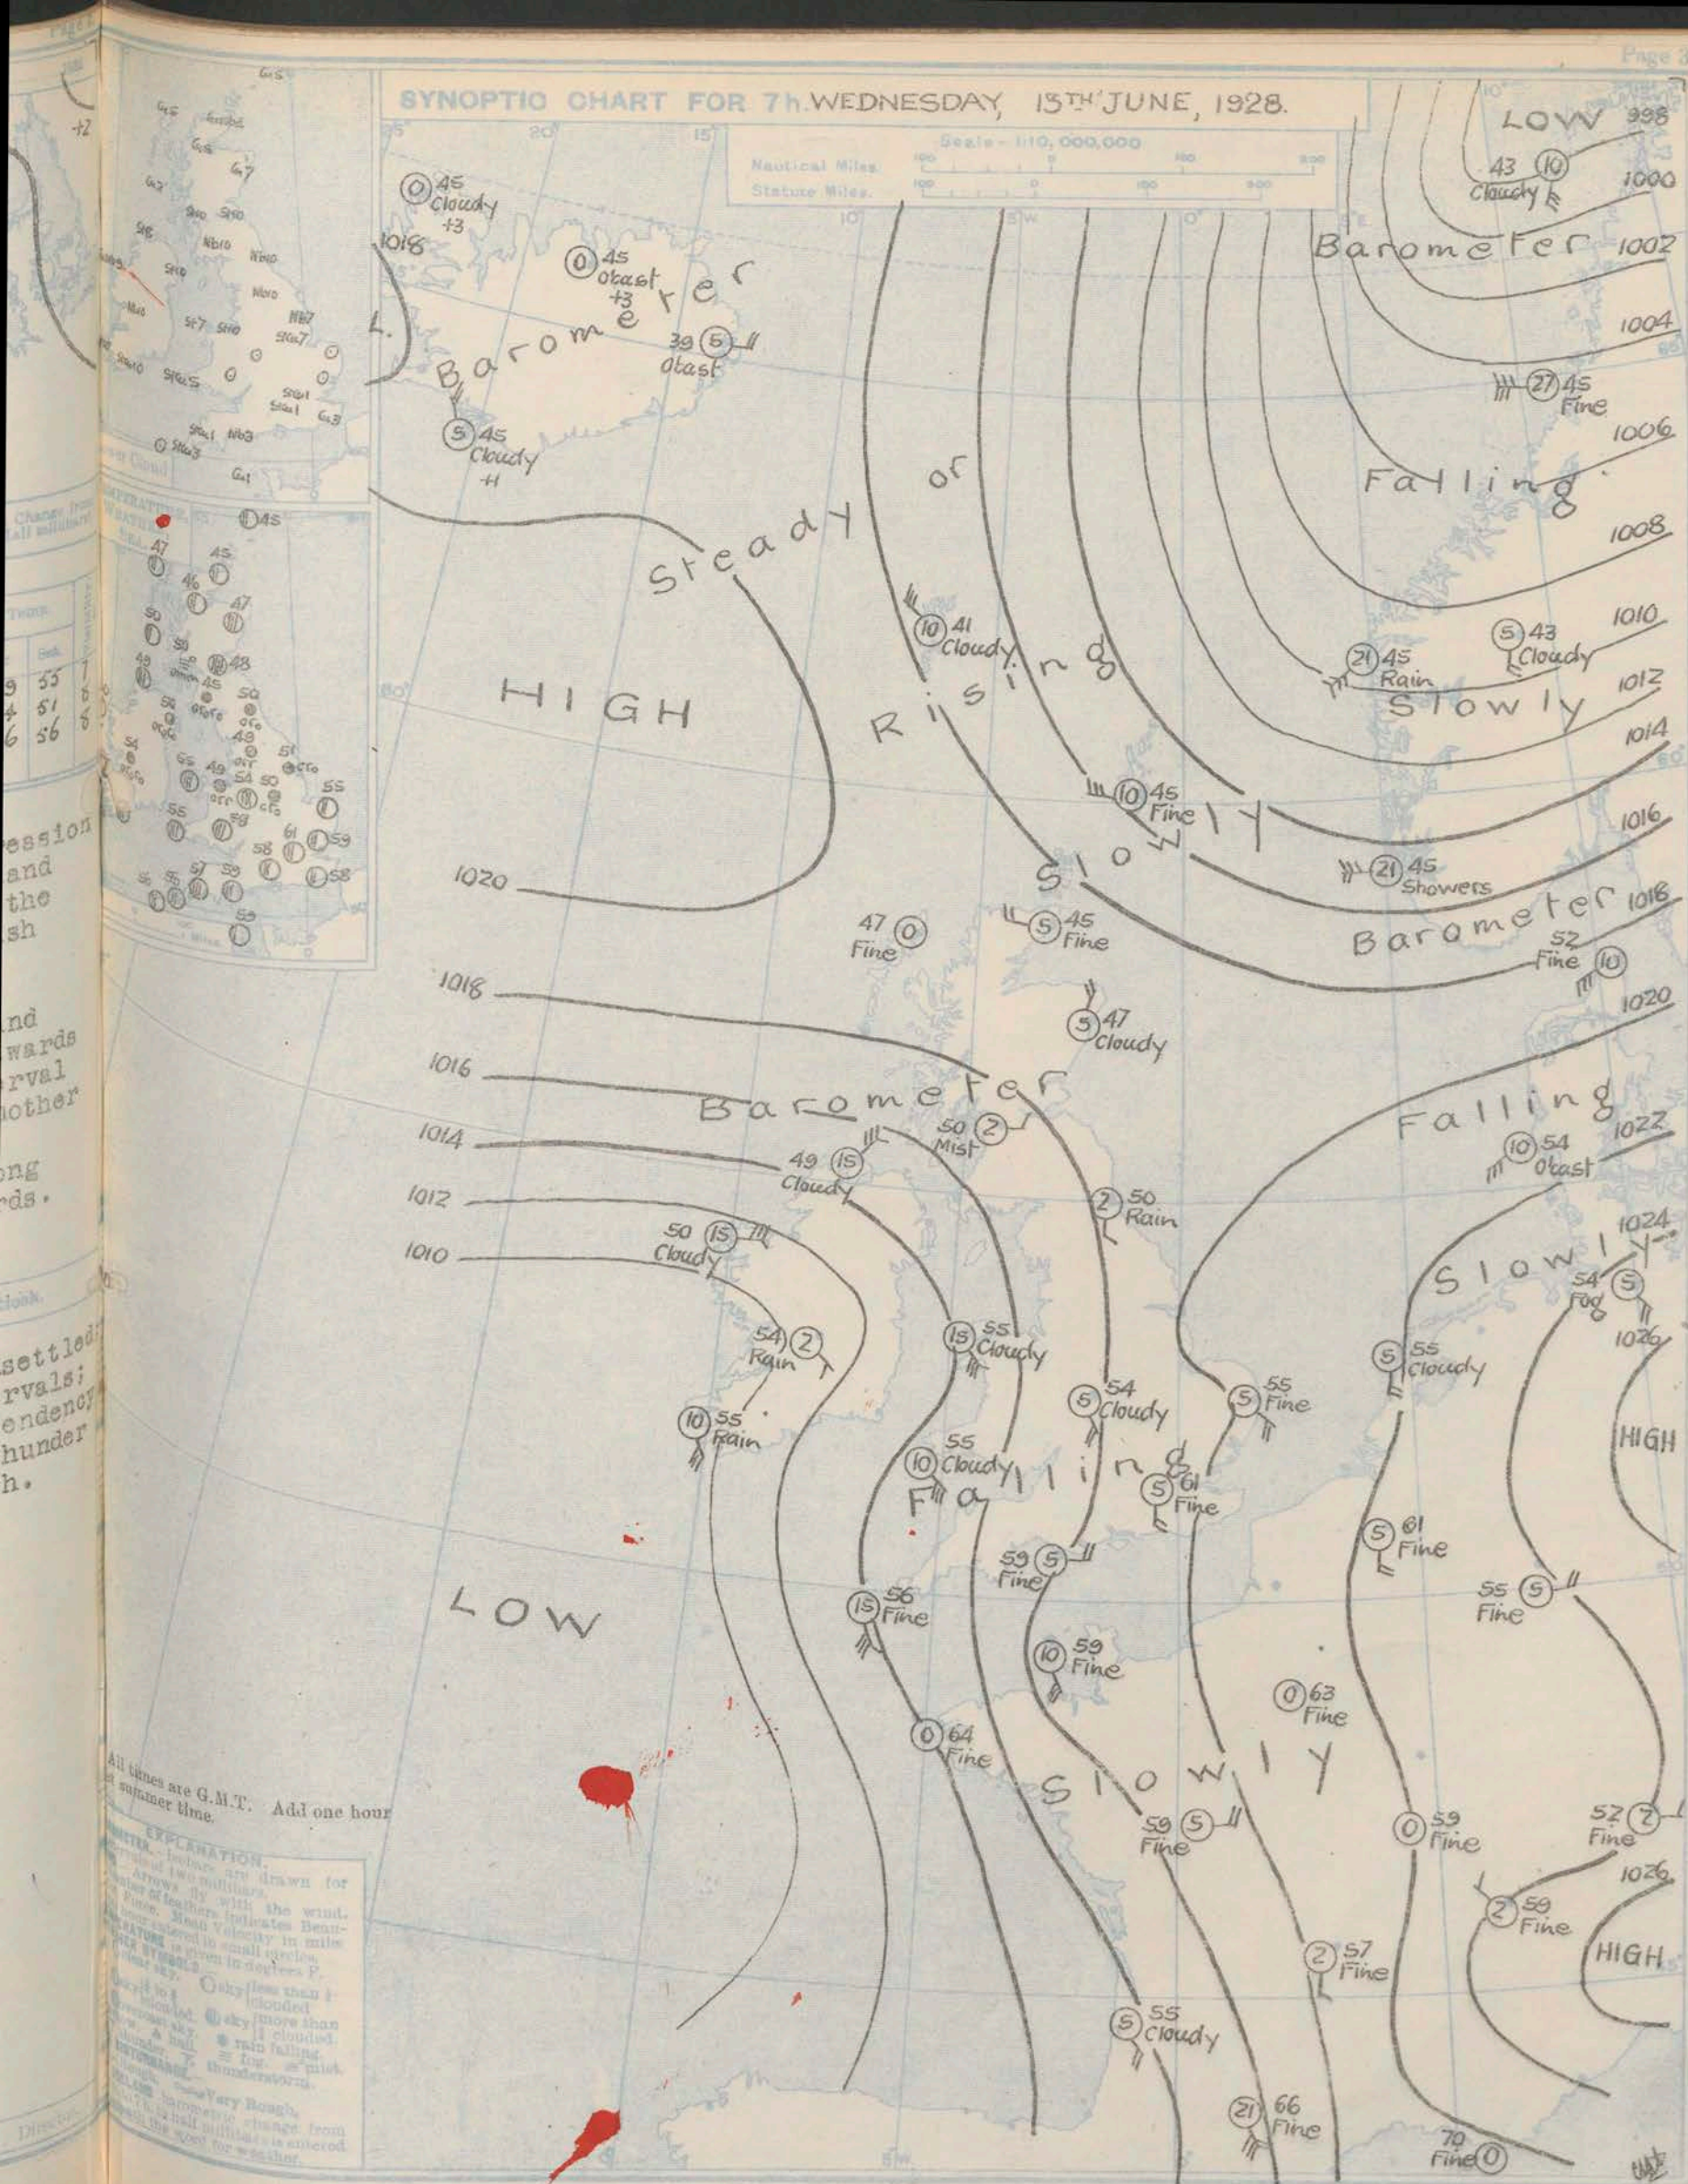

Secondaries to a depression centred off Southwest Ireland will move northwards from the Bay of Biscay to the British Isles. A belt of rain stretching from Southwest Ireland to Northeast England will move slowly northeastwards and be followed by an interval of mainly fine weather. Another rain belt will approach Southern England before long and spread slowly northwards.

Districts.	Forecast for the 24 hours commencing 12 Noon G.M.T. Wednesday, 13th June, 1928.
1. S.E. England	Southeasterly winds, mainly light to moderate; fine at first, cloudy later with perhaps local rain or thunderstorms; mist locally in early morning; warm.
2. E. England	
3. E. Midlands	
4. W. Midlands	Southeasterly winds, fresh at times; bright at first, then cloudy later with perhaps some local rain and thunder; warmer.
5. S.W. England	
6. South Wales	
7. North Wales	Southeasterly winds, mainly light to moderate; some rain at first, mainly bright later; moderate temperature to rather warm.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Variable to easterly winds, fresh locally; bright intervals at first, cloudy with occasional rain later; moderate temperature.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland	Southeasterly winds, fresh locally; some rain at first, then bright intervals, later becoming rainy again; moderate temperature.
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

## Further Outlook.

Rather unsettled; bright intervals; warm with tendency for local thunder in the South.

## GENERAL INFERENCE.

A depression over the North Sea will move away northeastwards and a ridge of high pressure spread from the Atlantic to the British Isles. After dull and rainy weather at first there will be a decided improvement, bright periods occurring in most places but there will be further local showers, perhaps of a thundery type.

Thursday, 14th June, 1928.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T.	Farther Outlook
1. S.E. England	Westerly winds, moderate to fresh; bright intervals, occasional rain or thundery showers; rather low to moderate temperature.	Rather unsettled but probably mainly bright.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales	Mainly northwesterly to northerly winds, fresh to strong at times locally; considerable bright periods but occasional local rain or thundery showers; moderate or rather low temperature.	
7. North Wales		
8. N.W. England		
9. N. Midlands

**EXPLANATION.**  
Isobars are drawn for every 2 millibars.  
Arrows show the wind direction.  
Mean velocity in miles per hour is indicated by the number of flags.  
Temperature is given in degrees F.  
Clouds are indicated by the number of circles.  
Other symbols are as follows:  
① Rain  
② Drizzle  
③ Fog  
④ Mist  
⑤ Cloudy

**GENERAL INFERENCE.**

An anticyclone off our southwest coasts is advancing slowly towards the British Isles. Weather will be quiet and mainly bright for two or three days except in northern districts where at first small secondaries moving southeastwards will cause some further rain or showers. Temperature will rise somewhat generally.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Friday, 15th June, 1928.
1. S.E. England	West to northwest winds, mainly light to moderate; variable skies; local morning mist; moderate temperature to rather warm.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	West to northwest winds, light to moderate; variable skies and local showers today, mainly bright tomorrow; temperature rising.
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Northwesterly to variable winds, light to moderate; variable skies and occasional local rain or showers today, mainly bright tomorrow; day temperature rising but slight ground frost locally in early morning.
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland	
14. B.N.W. Scotland	
15. Mid-Scotland	
16. N.E. Scotland	
17. Orkneys and Shetlands	
18. N.W. Ireland	
19. S.E. Ireland	Westerly winds, backing, light to moderate; bright intervals today, cloudy with perhaps local drizzle tomorrow; moderate temperature to rather warm.
20. S.W. Ireland	

**Further Outlook.**

Mainly bright the East and Southeast but probably becoming less settled in the West.

## GENERAL INFERENCE.

Pressure is high on the Atlantic from Spain to Greenland and a depression is centred over Sweden. Winds will be northwesterly and weather mainly bright. There will be a few scattered showers, perhaps of a thundery type.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Saturday, 16th June, 1928.	Further Outlook.
1. S.E. England	<p>ALL DISTRICTS.</p> <p>Winds between west and north, fresh locally; mainly bright, a few scattered showers of rain or hail, accompanied perhaps locally by thunder; moderate day temperature, cool at night with slight ground frost locally.</p>	Similar.

## GENERAL INFERENCE.

The anticyclone off the south of Ireland is moving slowly south and decreasing in intensity. Pressure is low over Scandinavia and secondary depressions are moving southward over the British Isles. Winds will be from between west and north, fresh or strong at times locally and weather more cloudy than of late with some rain or showers in all districts.

## Further Outlook

Rather unsettled

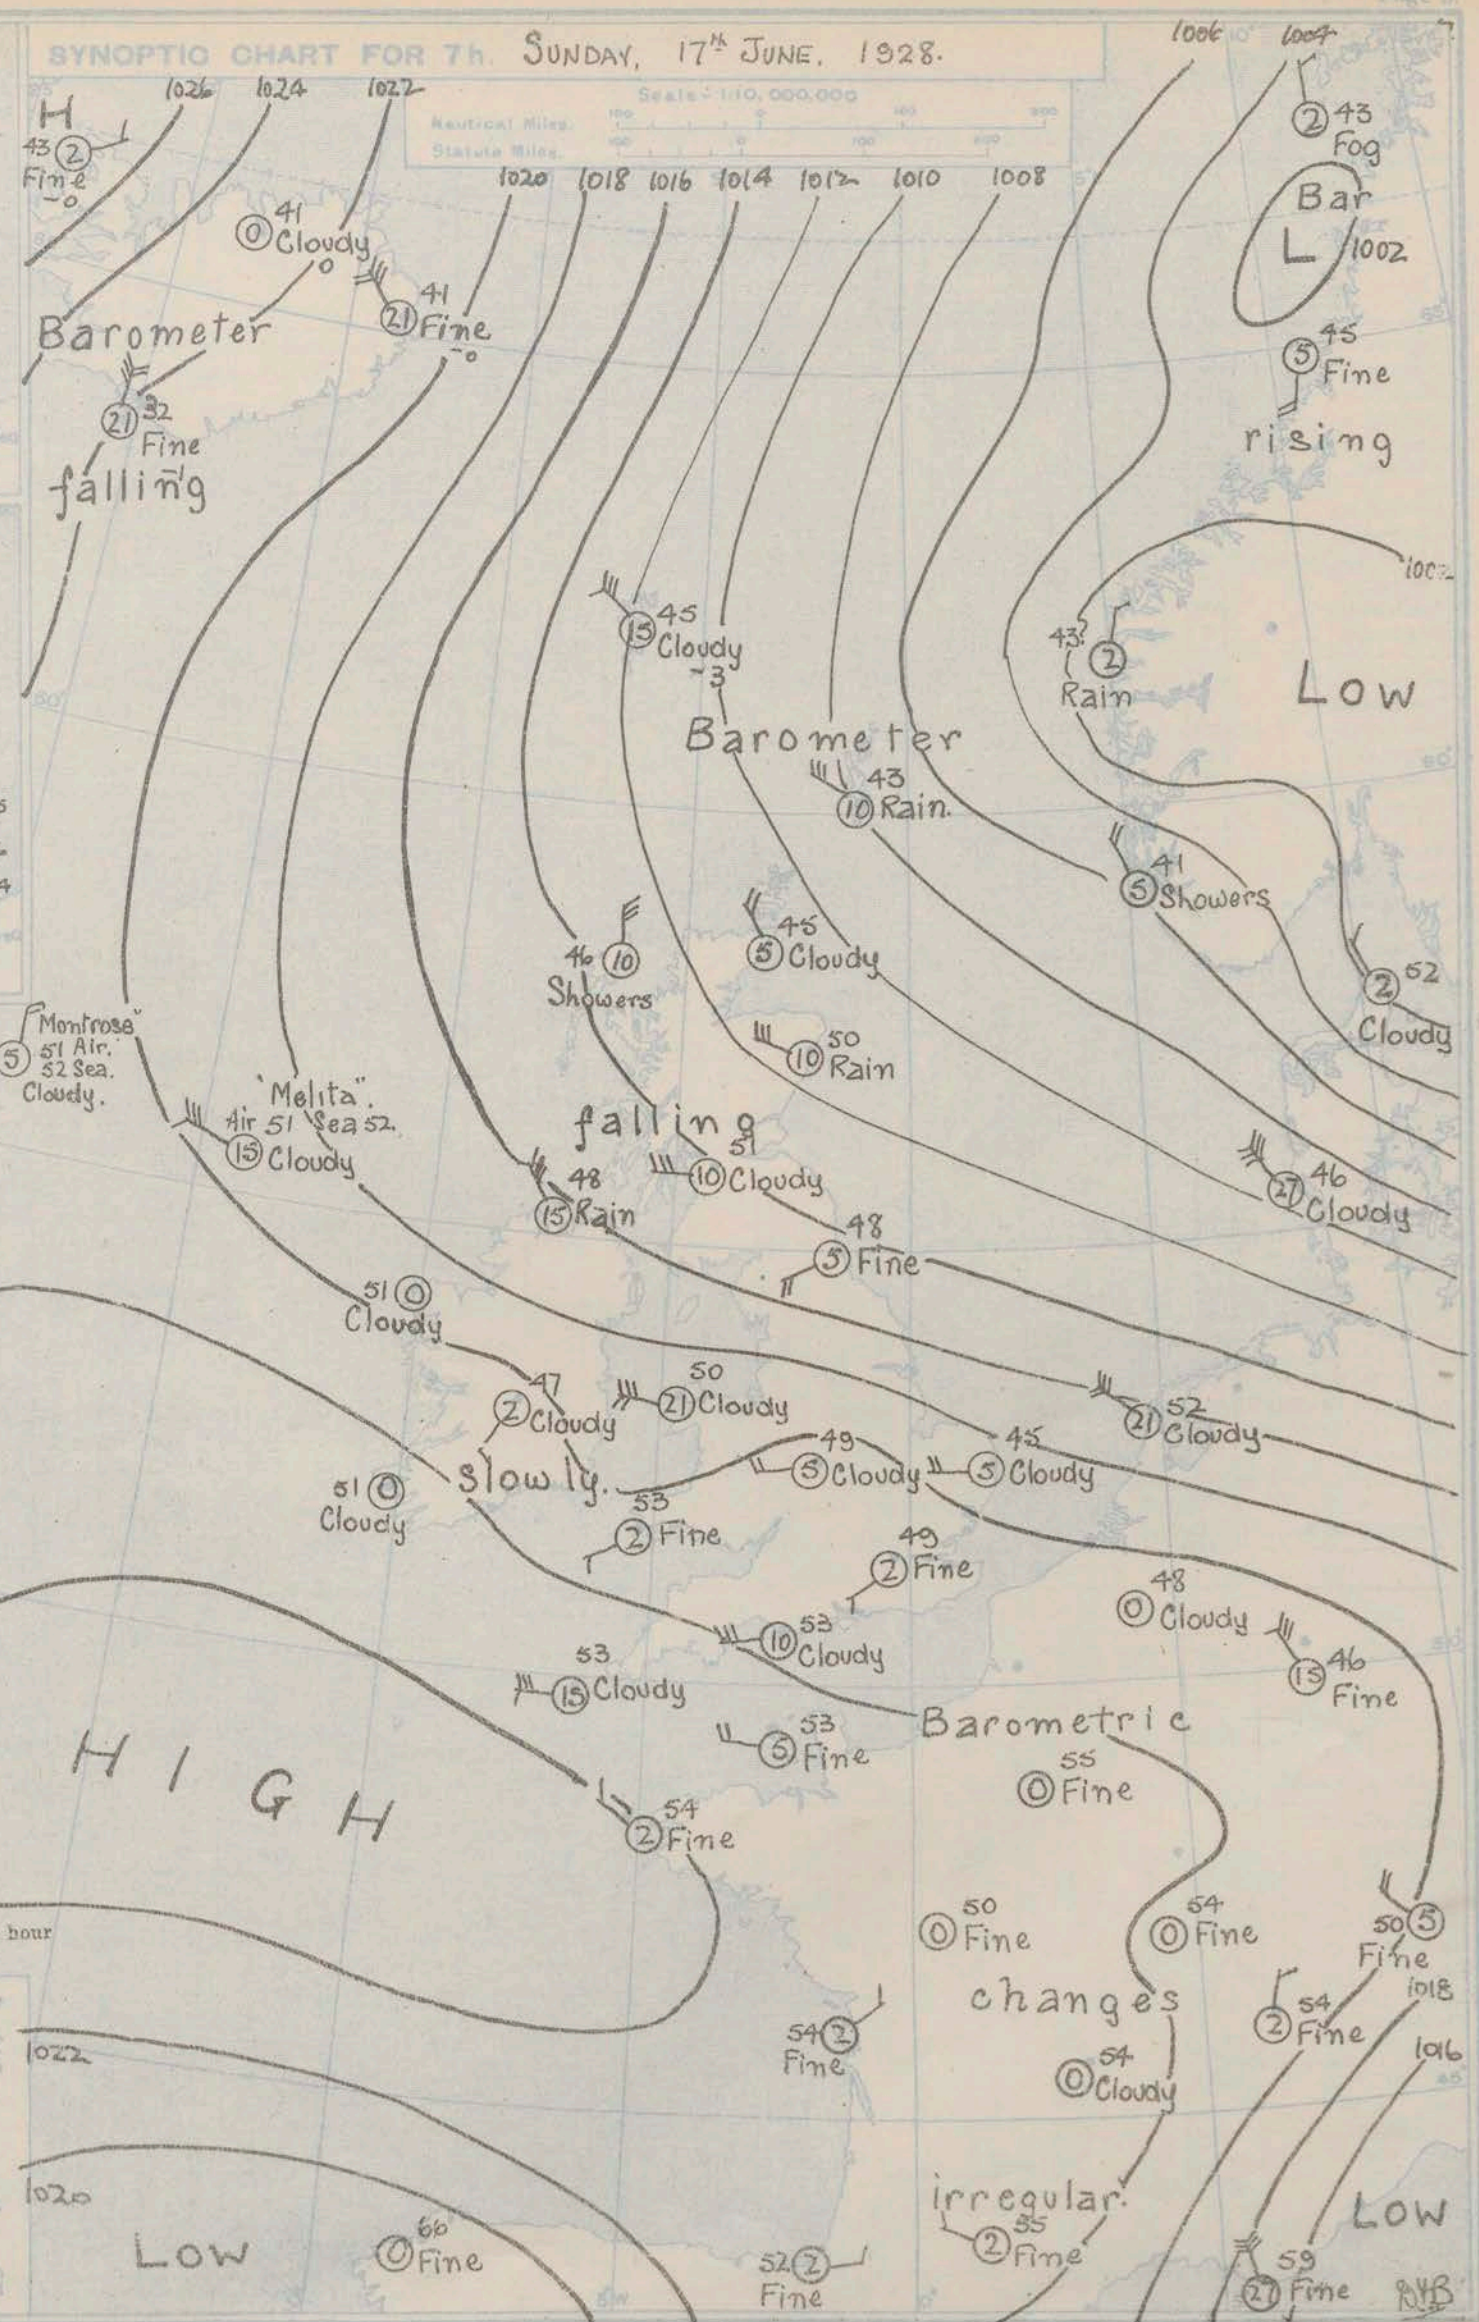

## Districts.

Forecasts for the 24 hours commencing 12 Noon G.M.T. Sunday 17th June, 1928.

1. S.E. England	Wind between west and northwest, light or moderate, increasing later; mainly cloudy, but some bright periods; occasional local rain or showers; moderate to rather low temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Wind between west and north, fresh or strong at times locally; mainly cloudy but some bright periods, local rain or showers; rather low temperature.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England

Station	Date and Time	Temperature	Wind	Weather	Alt	Sea
3	18 <sup>TH</sup> June	18.00	W	4	bc	sd

GENERAL INFERENCE.

A depression off West Ireland will move eastward across the British Isles, with very unsettled weather for some days.

Further Outlook

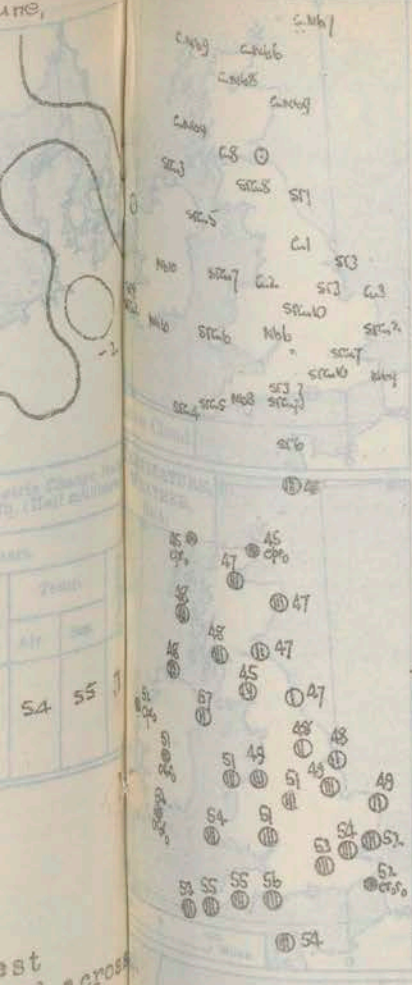

Districts	Forecast for the 24 hours commencing 12 Noon G.M.T. Monday, 18th June, 1928.
1. S.E. England	Wind S.W. or S., light to fresh, cloudy, some rain later temperature rising somewhat.
2. E. England	
3. E. Midlands	
4. W. Midlands	Wind S.W. or S., light to fresh, cloudy, some rain; temperature rising somewhat.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	Wind variable, light, becoming southeasterly; cloudy, rain later; cool.
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland & N.W. Scotland	Wind N.W., becoming variable, light; variable sky, local showers; cool.
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkneys and Shetlands	
17. N.W. Ireland	Wind S.E., light to fresh; cloudy, some rain; cool.
18. N.E. Ireland	
19. S.E. Ireland	Wind S. veering S.W. or W., moderate to fresh; rain at times; rather cool.
20. S.W. Ireland	

Very unsettled generally. Temperature low in the North, and moderate to rather low in the South.

EXPLANATION.  
The symbols are drawn for the purpose of indicating the nature of the weather. The numbers in circles indicate the direction and force of the wind. The letters in circles indicate the nature of the clouds. The letters in squares indicate the nature of the precipitation. The letters in triangles indicate the nature of the other weather phenomena.

## WALLONARE

19th June.

## Observations from Cross Channel Steamers

Position	Date and Time	Steamship	Wind		Weather	Temp.	
			Dir.	Force		Air	Sea
2	18th 10h	Scotia	NE	1	C	53	52
3	18th 1h	Brighton	W	4	C	54	55

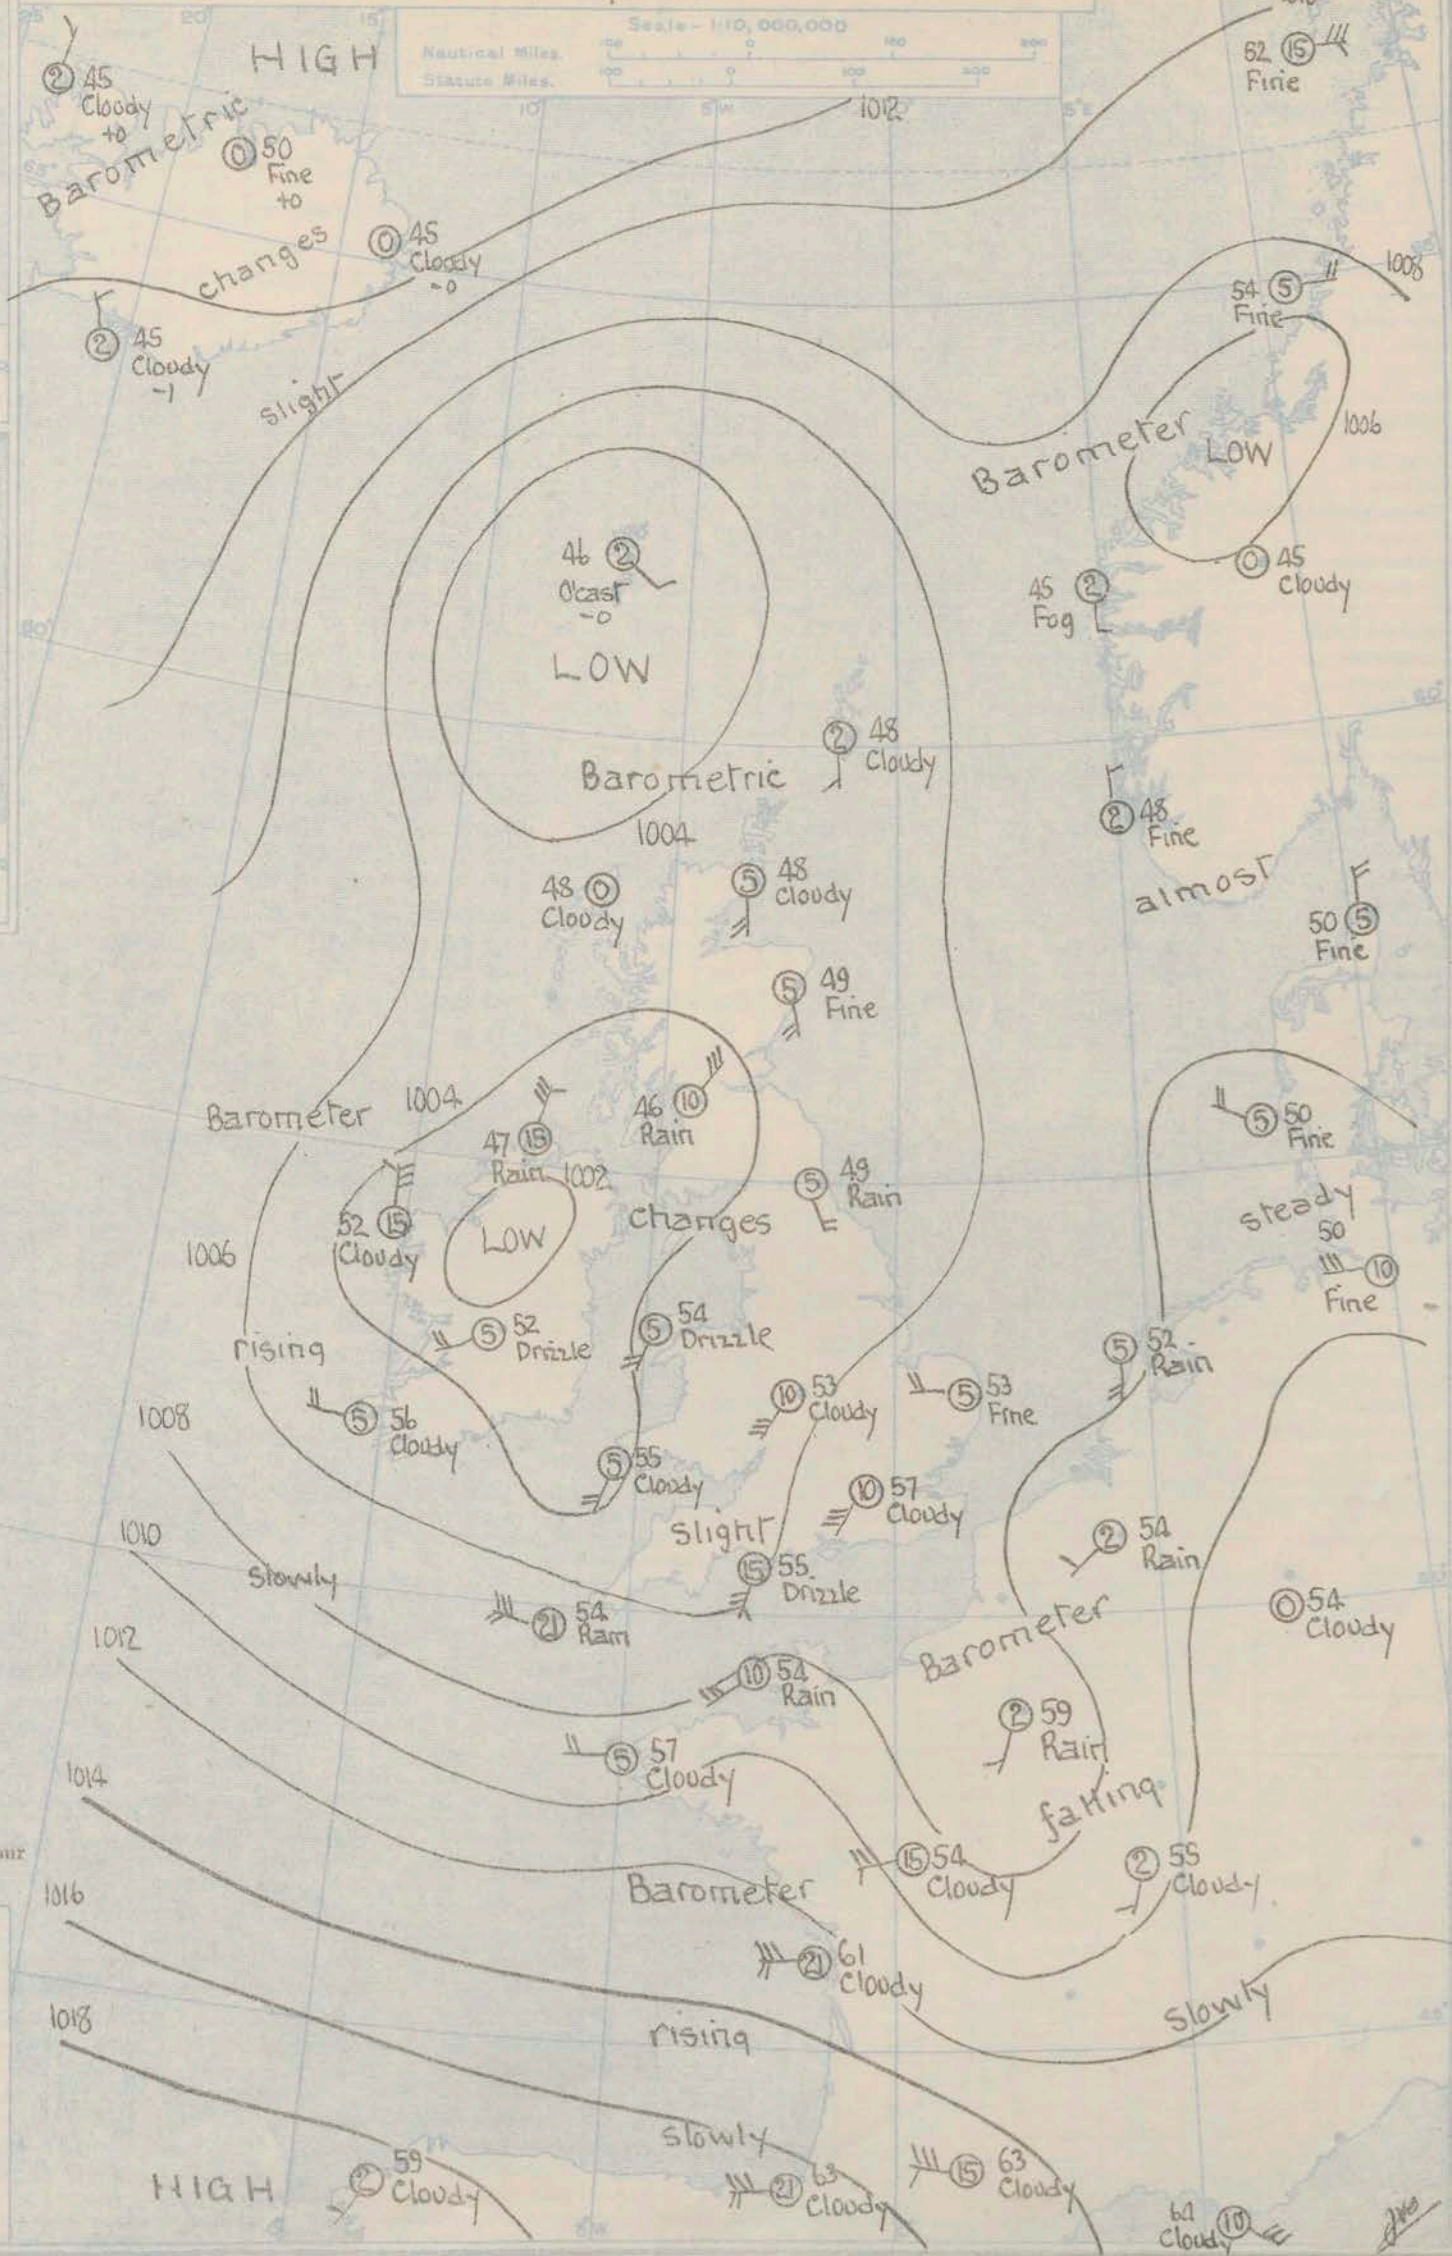

## GENERAL INFERENCE.

Pressure is high over the Azores and Spitzbergen. A shallow depression over Ireland is moving slowly eastward and tending to fill up, and further depressions will come in from the Atlantic. Unsettled rather cool weather is likely to persist for several days.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Tuesday, 19th June, 1928.	Further Outlook
1. S.E. England	Wind S. to S.W., veering W., light or moderate; cloudy, showery, thunder locally, some bright intervals later; rather cool.	Unsettled for several days; rather cool.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Wind W. or W.N.W., moderate or fresh; showers, bright intervals; cool.	
6. South Wales		
7. North Wales		
8. N.W. England	As 1 - 4.	
9. N. Midlands		
10. N.E. England		
11. S.E. Scotland	Wind variable, light; cloudy, some rain; some improvement tomorrow, but probably thundery showers; cool.	
12. S.W. Scotland & Isle of Man		
13. N.W. Scotland	Wind variable, light; showers, bright intervals; cool.	
14. Mid-Scotland		
15. N.E. Scotland		
16. Orkneys and Shetlands	Wind N.W., light or moderate, backing S.W. later; cloudy, showery, perhaps local thunder; some brighter intervals; cool.	
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

SYNOPTIC CHART FOR 7h. Tuesday 19<sup>th</sup> June 1928.

All times are G.M.T. Add one hour  
for summer time.

## AIR MINISTRY.

## GENERAL INFERENCE.

A wedge of high pressure over West Ireland will move eastward across the British Isles giving a short interval of mainly fine weather, but another depression is approaching from the Atlantic and will cause general rainfall before long.

Districts. Forecasts for the 24 hours commencing 12 Noon G.M.T. Wednesday, 20th June, 1928.

1. S.E. England	Wind N.W. light or moderate, backing W. later; mainly fine, but a few local showers at first; moderate temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Wind W. light or moderate, fresh locally; occasional showers but bright periods; moderate temperature.
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland	
14. N.W. Scotland	
15. Mid-Scotland	
16. N.E. Scotland	
17. Orkneys and Shetlands	Wind W. backing S., light or moderate, freshening later; fine at first, some rain tomorrow; moderate temperature.
18. N.W. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

Unsettled, with rain in all districts.

## GENERAL INFERENCE.

A depression off Northwest Ireland is moving northeastwards. Winds will be south to southwest and rain will occur generally though in Southern England amounts will not be large.

Districts.	Forecast for the 24 hours commencing 12 Noon G.M.T. Thursday, 21st June, 1928.	Further Outlook.
1. S.E. England	Wind S.W., moderate or fresh; cloudy, occasional rain or drizzle; moderate temperature.	Unsettled.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales	Wind S.W., moderate to strong; cloudy, rain at times; moderate temperature.	
7. North Wales		
8. N.W. England		
9. N. Midlands	Wind S., moderate, veering S.W., fresh or strong at times; rainy at first; some improvement later, but occasional rain or showers; moderate temperature.	
10. N.E. England		
11. S.E. Scotland		
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland		
14. N.W. Scotland	Wind S.E. to S., freshening; cloudy, some rain; moderate temperature.	
15. Mid-Scotland		
16. N.E. Scotland		
17. Orkneys and Shetlands	Wind S.W. to W., fresh or strong at times; mainly cloudy, occasional rain, perhaps brighter intervals later; moderate temperature.	
18. N.W. Ireland		
19. N.E. Ireland		
20. S.E. Ireland		
21. S.W. Ireland		

Meteorological Office: Air Ministry, Kingsway, London, W.C.2.

Forecast issued at 09.25 J.M.T.

G. C. SIMPSON, F.R.S., Director.

No. 173...

†1. See footnote page

† At stations marked thus the maximum temperature is for the period 31h.-17h., the minimum for the period 21h.-09h. ‡ 17h., 3h.

TERMS OF SUBSCRIPTION.—6/6 per quarter or 25/- per year, post free. Single copies may be obtained at the Meteorological Office, price 1d.

\* Information not usually received.

† The observations at 1h. C.M.T. and, at Guernsey, the sunshine readings are from an auxiliary station.

‡ For code see page 1.

§ See footnote page 1.

¶ At stations marked thus the maximum temperature is for the period 21h.-47h., the minimum for the period 21h.-9h., \* 17h.-9h.

**GENERAL INFERENCE.**

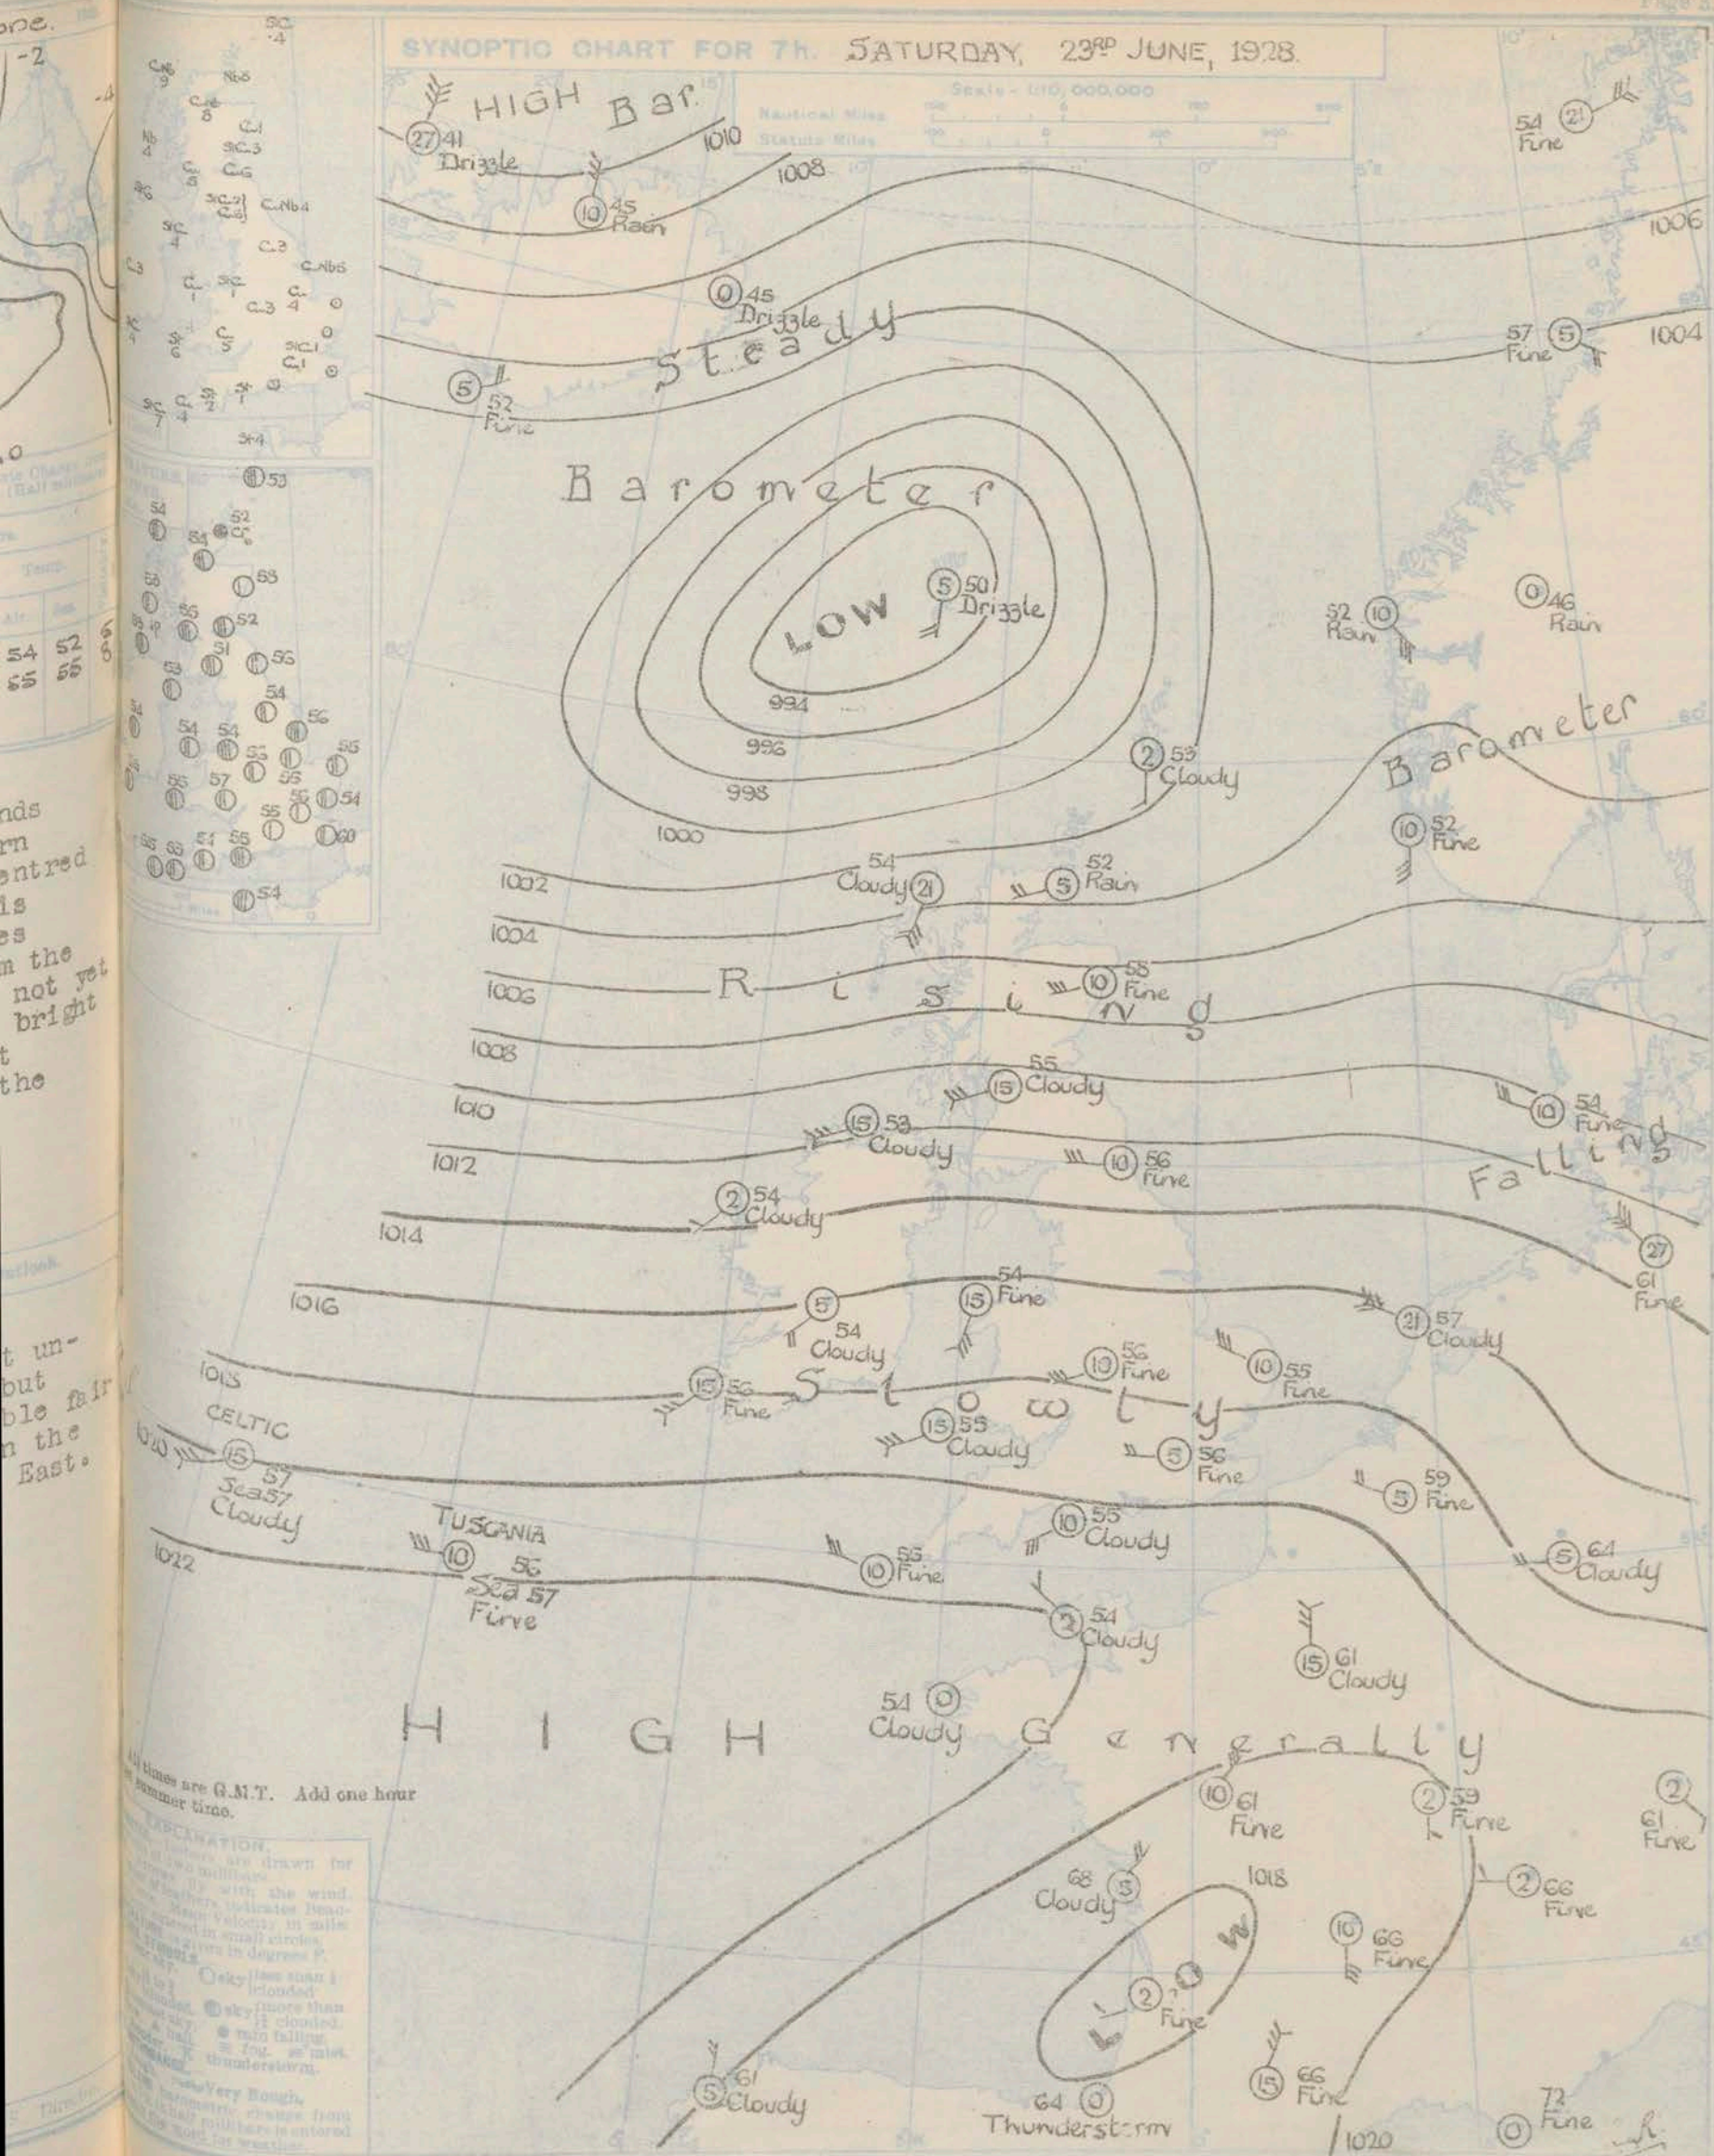

An anticyclone extends from the Azores to Northern France. The depression centred near the Faeroe Islands is filling up, but secondaries are likely to come in from the Atlantic. Conditions are not yet settled, but considerable bright periods will occur in most districts, especially in the South and East.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Saturday, 23rd June, 1923.
1. S.E. England	Wind W. to S.W., light or moderate; bright at first, more cloud later; rather warm.
2. E. England	
3. E. Midlands	
4. W. Midlands	Wind W. to S.W., light or moderate; cloud increasing, perhaps slight rain or drizzle later; rather warm.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	Wind S.W., moderate or fresh; variable sky, local showers; moderate temperature.
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Wind S.W., moderate or fresh; variable sky, some showers; moderate temperature.
13. A.W. Scotland & N.W. Scotland	
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkneys and Shetlands	As 7 - 11.
17. N.W. Ireland	
18. N.E. Ireland	Wind S.W., moderate to fresh; cloudy, occasional rain or showers; moderate temperature.
19. S.E. Ireland	
20. S.W. Ireland	

**Further Outlook**

Somewhat unsettled, but considerable fair periods in the South and East.

## GENERAL INFERENCE.

A depression near the Faeroes Islands continues to fill up slowly and the anticyclone over the Bay of Biscay is maintained. A new depression is indicated northward of the Azores. Weather will continue fine or fair in England, but in Scotland there will be scattered showers and some rain may occur in Western Ireland late in the period.

## Further Outlook.

Districts.	Forecast for the 24 hours commencing 12 Noon G.M.T. Sunday, 24th June, 1928.
1. S.E. England	Wind west, light or moderate, probably backing later, fine or fair, rather warm.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Wind westerly, moderate, fresh locally, probably backing later, mainly fair, but a few scattered showers; rather warm or moderate temperature.
12. S.W. Scotland & Isle of Man	
13. W. Scotland	
14. N.W. Scotland	
15. Mid-Scotland	
16. N.E. Scotland	Wind southwesterly, moderate or fresh, fine becoming cloudy, perhaps some rain later, rather warm or moderate temperature.
17. Orkneys and Shetlands	
18. N.W. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

Mainly fair in the East, unsettled in the West.

Station	Date and Time	Steamship	Wind	Weather	Temp.
3	25th	Brighton	-	bc	55 56

**GENERAL INFERENCE.**

A deep depression centred to the west of Ireland will move eastwards and cause winds to approach gale force at times in the West. Unsettled weather with rain in most places will occur in all but southeastern districts. In the southeast weather will be fine and warm at first but conditions will become cloudy with some rain late tonight or early tomorrow, accompanied perhaps by thunderstorms locally.

Districts.	Forecast for the 24 hours commencing 12 Noon G.M.T. Monday, 25th June, 1928.
1. S.E. England	Light to moderate, southeasterly to southerly winds, freshening; bright at first, becoming cloudy with perhaps some rain and thunder later; very warm today, cooler tomorrow.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Southeasterly or southerly winds, moderate to fresh or strong, probably stronger at times in exposed places; cloudy, some rain then bright intervals with local thundery showers; moderate temperature.
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	Light westerly or variable winds, freshening from southeast; cloudy, some rain; moderate temperature.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man

## GENERAL INFERENCE.

A deep depression over Wales will move eastwards and be followed by an anticyclone from the Atlantic. Southwesterly to westerly gales will be experienced at first in the southern half of the Kingdom. Some rain and heavy squalls will occur in most districts but there will also be some bright intervals.

## Further Outlook.

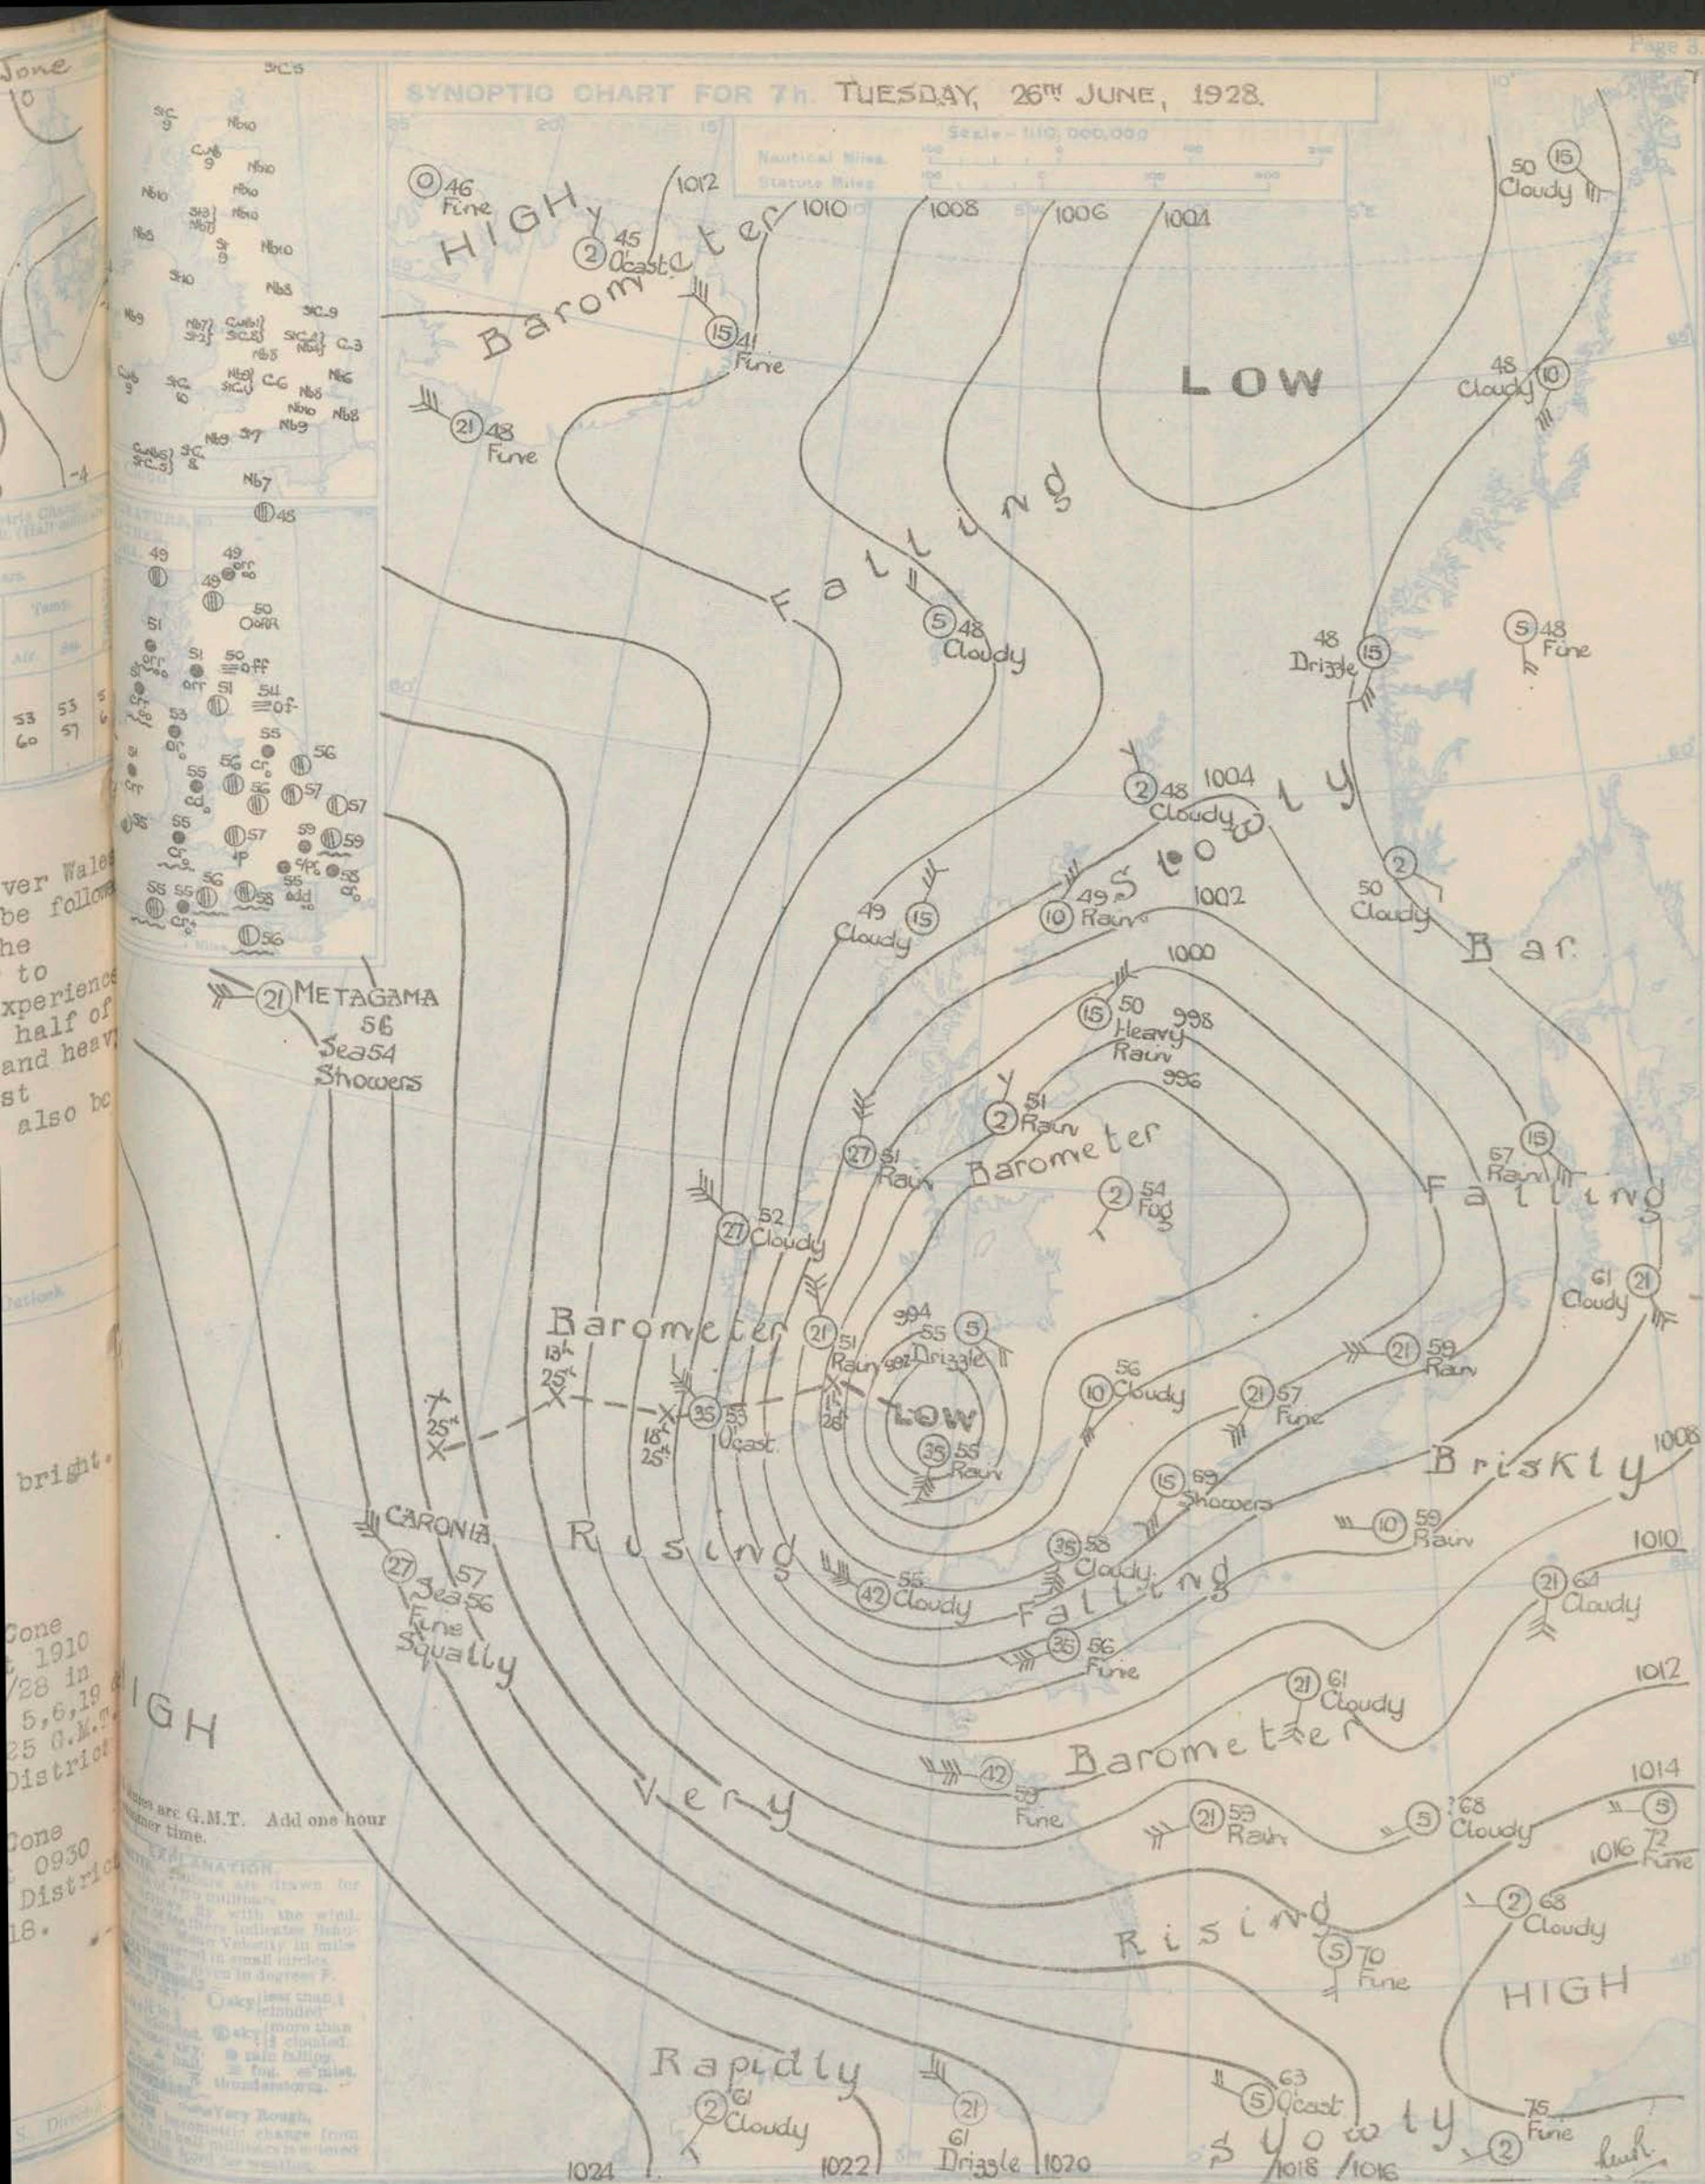

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M. Tuesday, 26th June, 1928.
1. S.E. England	Southerly winds, veering, strong to gale today, moderating tomorrow; occasional rain and squally showers today, mainly bright tomorrow; cooler.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	W. to N.W. winds, gale at first, moderating; squally; occasional rain then mainly bright; moderate temperature.
6. South Wales	
7. North Wales	Easterly winds backing N. or N.W., moderate to strong, stronger at times locally; some rain today, mainly bright tomorrow but occasional heavy showers locally; moderate temperature.
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Northeasterly winds, backing N.W. or W., moderate to strong, stronger locally at first; some rain today, mainly bright tomorrow but further showers locally; moderate temperature.
12. S.W. Scotland	
13. A.W. Scotland	
14. N.W. Scotland	
15. Mid-Scotland	Northwesterly winds, strong to gale, moderating; becoming mainly bright but a few scattered heavy showers; moderate temperature.
16. N.E. Scotland	
17. Orkneys and Shetlands	
18. N.W. Ireland	
19. S.E. Ireland	Northwesterly winds, strong to gale, moderating; becoming mainly bright but a few scattered heavy showers; moderate temperature.
20. S.W. Ireland	

Mainly bright.

South Cone hoisted at 1910 G.M.T. 24/6/28 in districts 5, 6, 19 & 20 & at 0825 G.M.T. today in District 1.

North Cone hoisted at 0950 G.M.T. in District 7, 8, 12 & 18.

2000

## GENERAL INFERENCE.

A ridge of high pressure, associated with an anticyclone centred between Southwest England and the Azores, will move southeastwards across the British Isles. Apart from a few scattered showers weather will be mainly bright but rather cool.

## Districts.

Forecasts for the 24 hours commencing 12 Noon G.M.T. Wednesday, 27th June, 1928.

## Further Outlook.

1. S.E. England
2. E. England
3. E. Midlands
4. W. Midlands
5. S.W. England
6. South Wales
7. North Wales
8. N.W. England
9. N. Midlands
10. N.E. England
11. S.E. Scotland
12. S.W. Scotland & Isle of Man
13. A.W. Scotland
14. N.W. Scotland
15. Mid-Scotland
16. N.E. Scotland
17. Orkneys and Shetlands
18. N.W. Ireland
19. N.E. Ireland
20. S.W. Ireland

Winds mainly between W. and N.W., moderate or fresh; bright periods, local thundery showers; moderate temperature.

Northwesterly winds, backing, fresh locally; variable skies, showers today, probably rainy periods tomorrow; moderate temperature.

As 1 - 11.

Bright periods with rising temperature but further showers.

## AIR MINISTRY.

GENERAL INFERENCES.

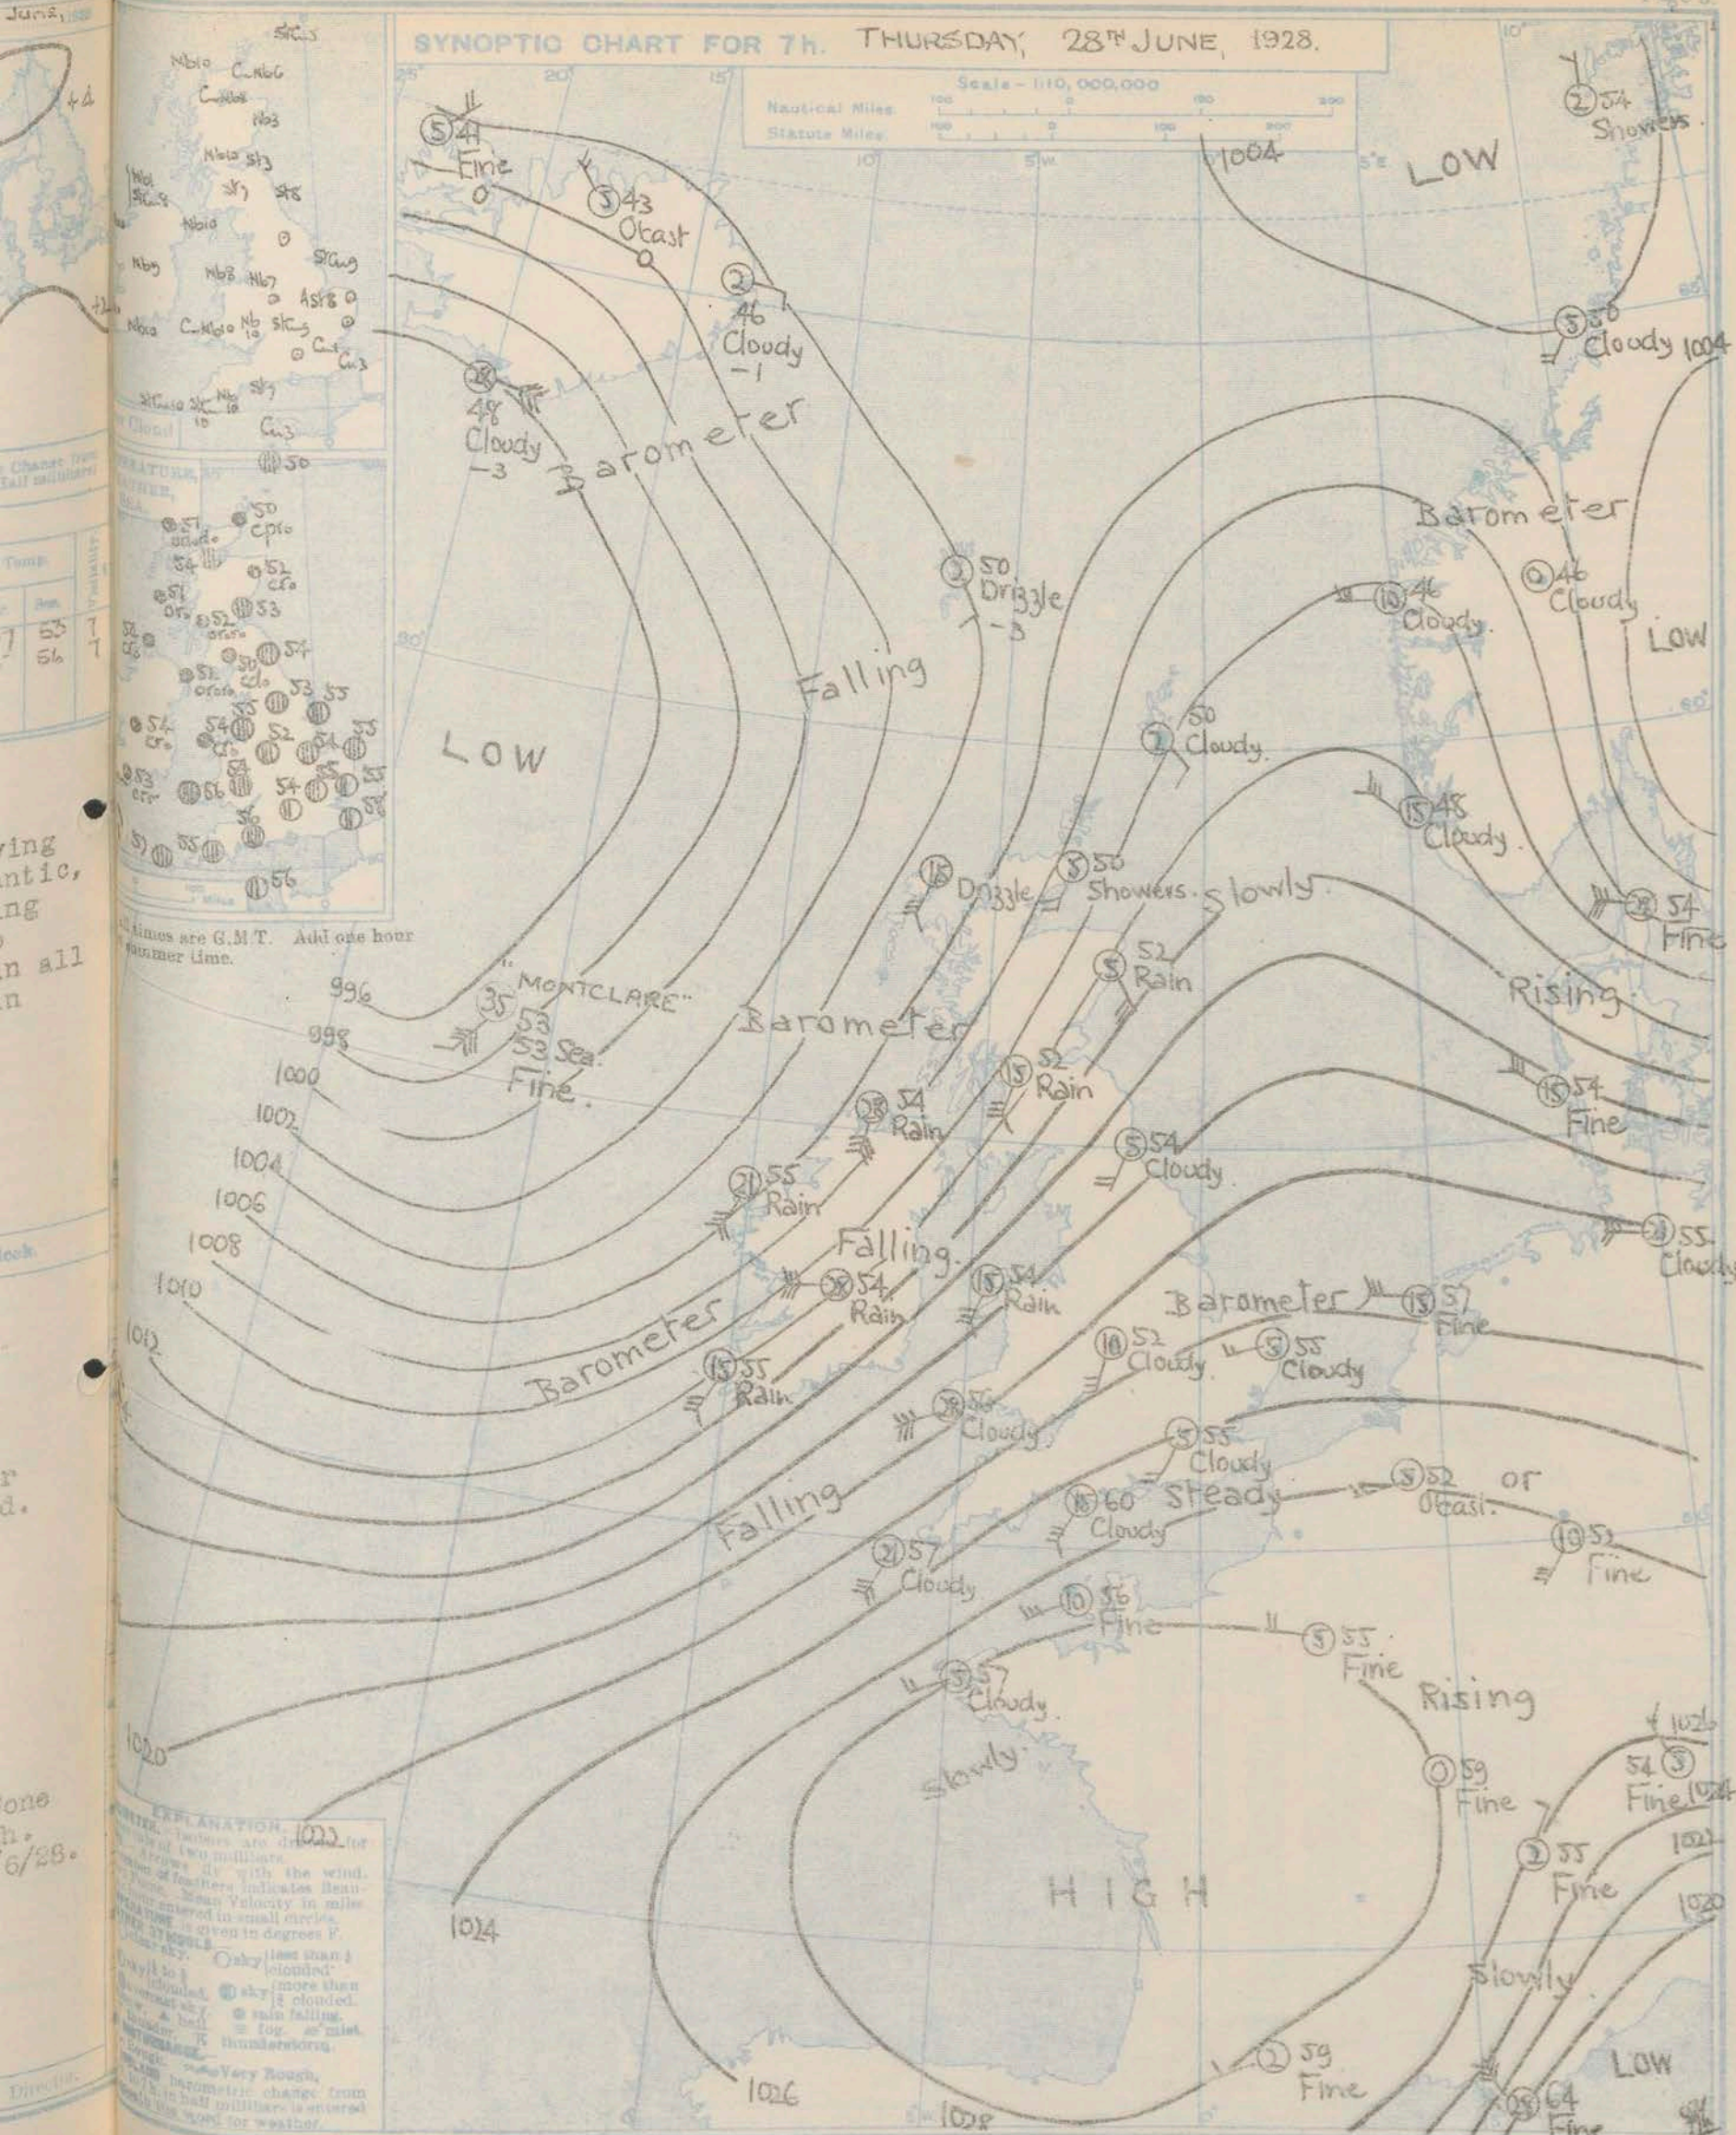

A deep depression, moving northeastwards on the Atlantic, will give rise to freshening southwesterly winds and to rather unsettled weather in all districts with some rain in most places.

Districts.	Forecasts for the 24 hours commencing 12 Noon G.M.T. Thursday, 28th June, 1928.	Further Outlook
1. S.E. England	Southwesterly winds, light to fresh or strong at times; bright intervals at first, cloudy with some rain or drizzle later; moderate temperature.	Rather unsettled.
2. E. England		
3. E. Midlands		
4. W. Midlands	South to southwest winds, veering west later, moderate to strong; cloudy, with rain at times today; bright intervals but occasional showers tomorrow; moderate temperature.	
5. S.W. England		
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England

# SYNOPTIC CHART FOR 7H. THURSDAY, 28<sup>TH</sup> JUNE, 1928.

Scale - 1:10,000,000  
Nautical Miles 100 200 300  
Statute Miles 100 200 300

All times are G.M.T. Add one hour summer time.

**EXPLANATION.** 1022 for 1022.0. Two dots are dropped for the last two millibars. Arrows in the wind direction indicate the direction of the wind. The number in the circle indicates the force of the wind in miles per hour. The number in the circle indicates the force of the wind in miles per hour. The number in the circle indicates the force of the wind in miles per hour.

## GENERAL INFERENCES.

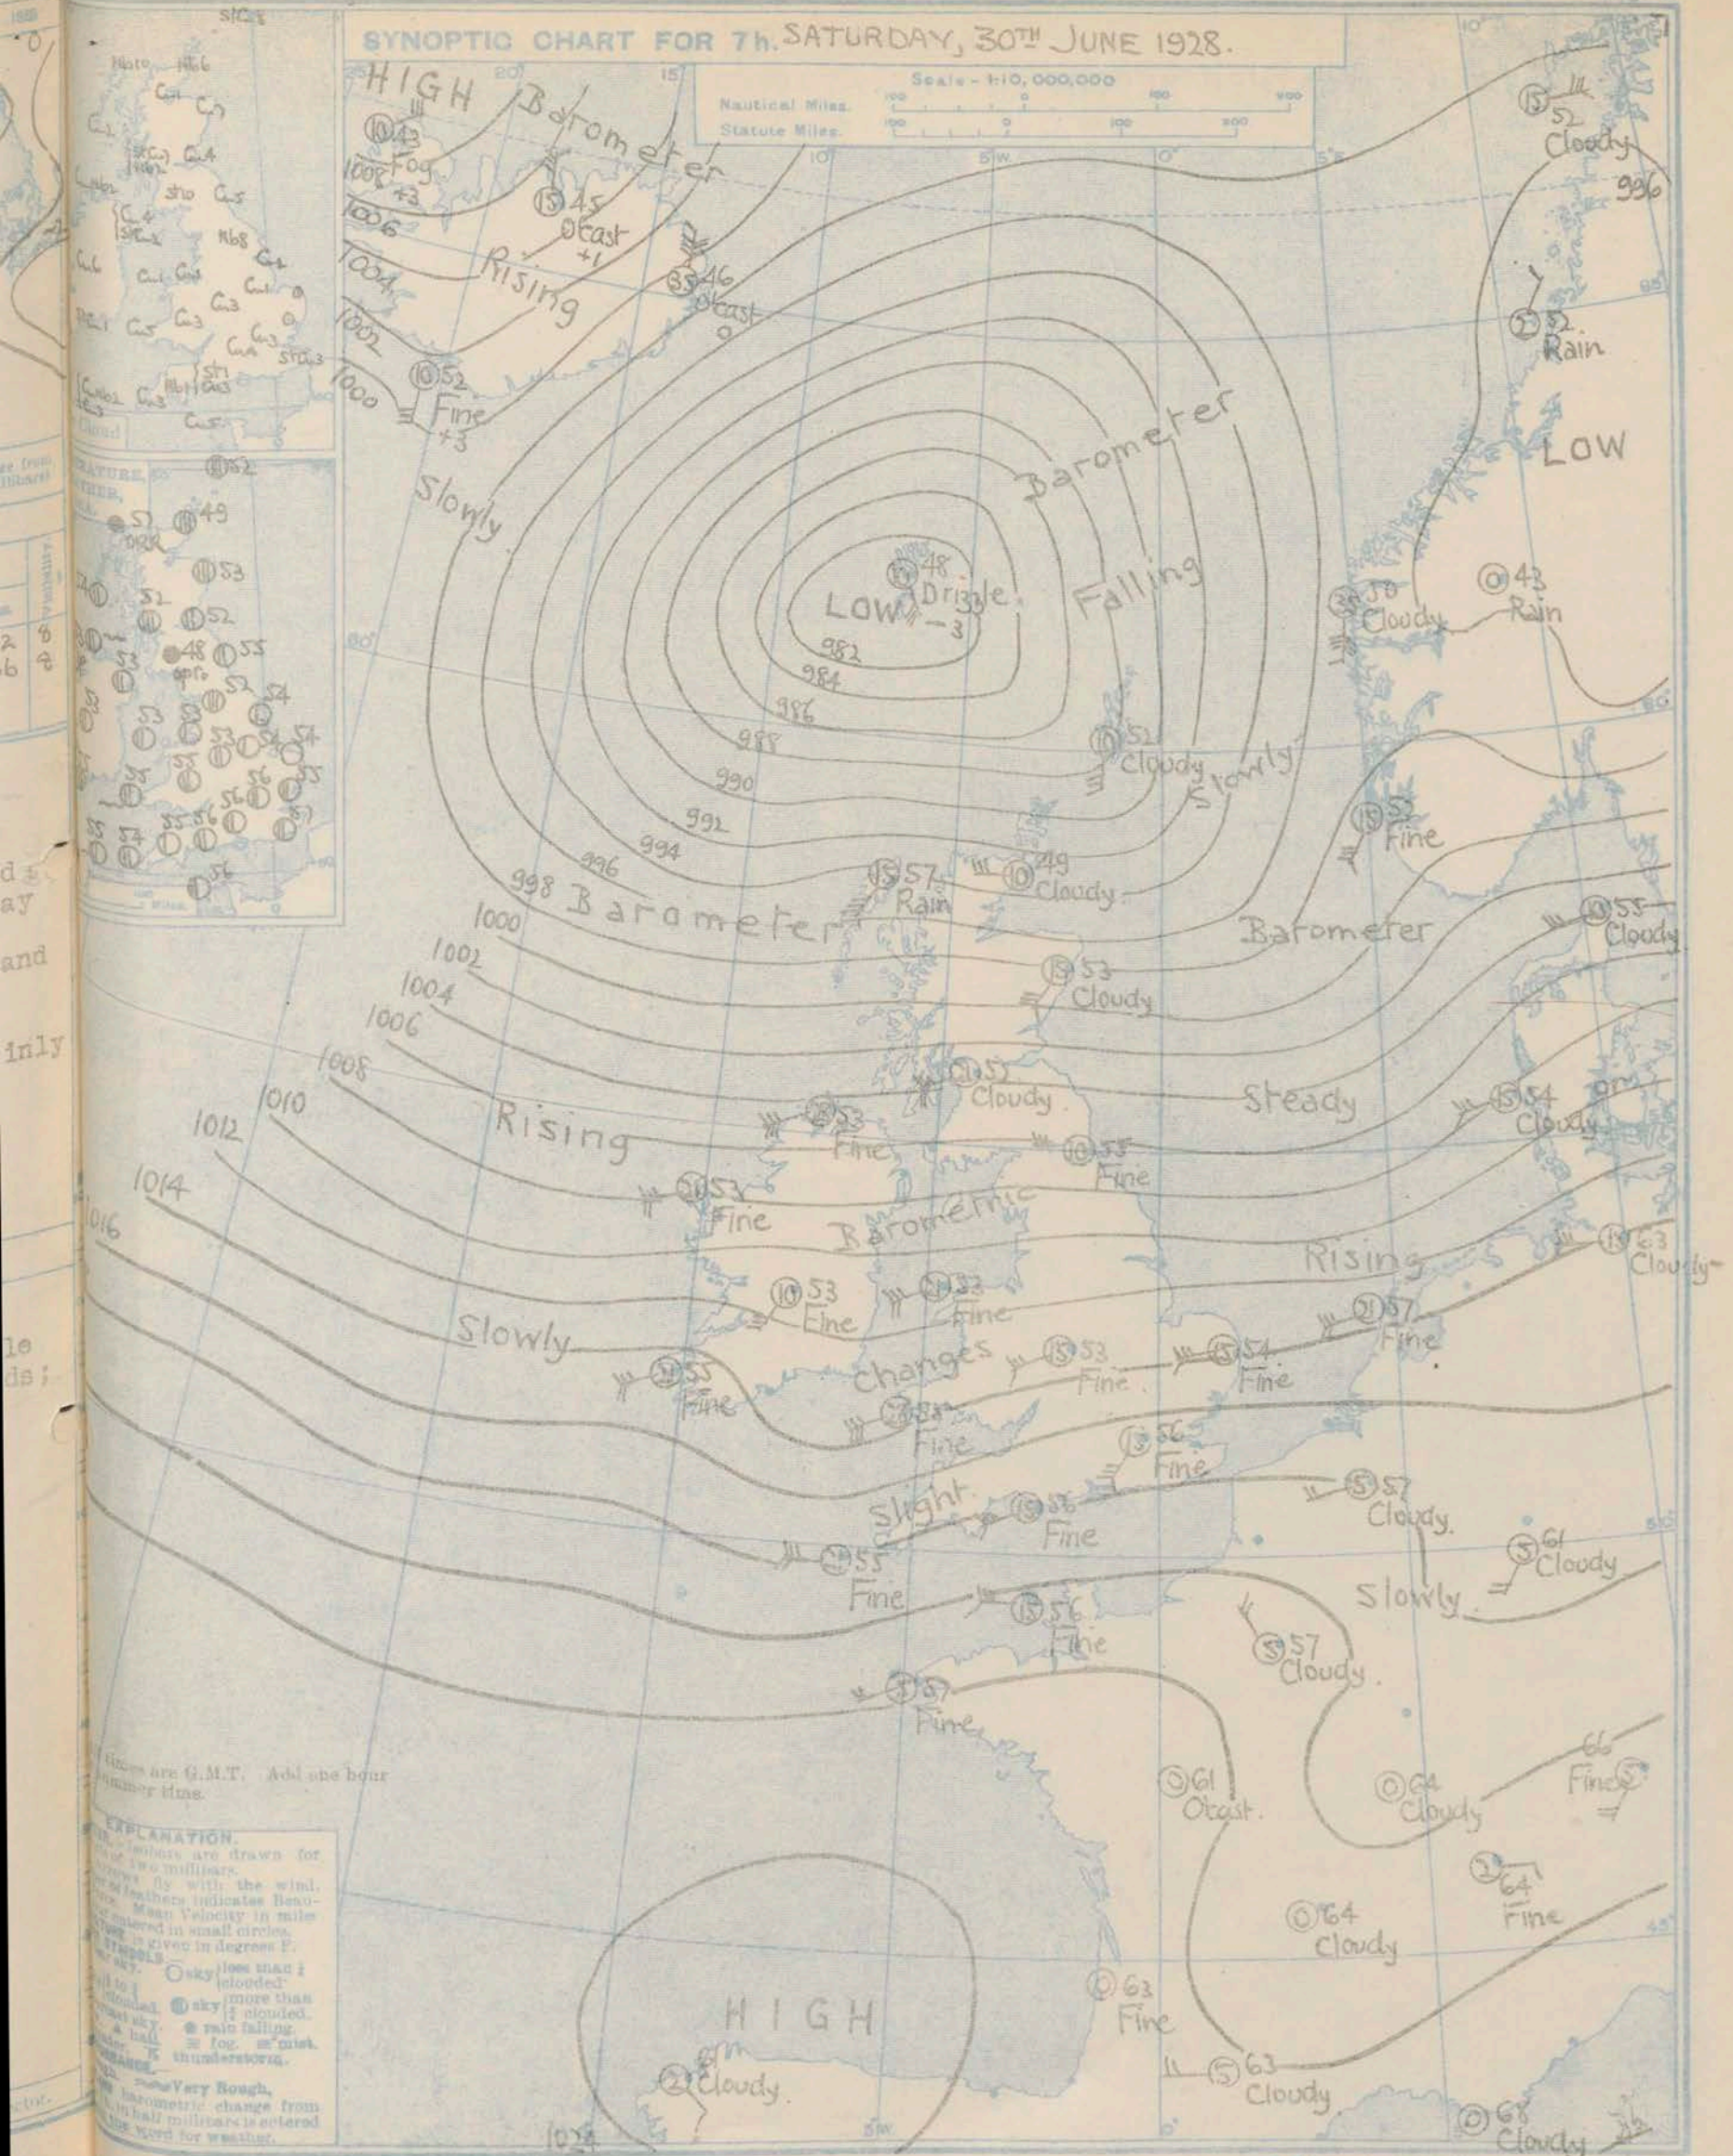

A deep depression centred over the Faeroes will move away northeastwards. The strong westerly winds will moderate and apart from a few showers, particularly in northwestern districts, weather will be mainly bright but rather cool.

Districts	Forecast for the 24 hours commencing 12 Noon G.M.T. Saturday, 30th June, 1928:	Further Outlook
1. S.E. England	Westerly winds, moderate to strong, moderating; bright and cloudy periods; a few scattered showers, particularly in the extreme north of Scotland; temperature rising.	Considerable bright periods; warmer.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England		
11. S.E. Scotland		
12. S.W. Scotland & Isle of Man		
13. A.W. Scotland & N.W. Scotland		
14. Mid-Scotland		
15. N.E. Scotland		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

# SYNOPTIC CHART FOR 7h. SATURDAY, 30th JUNE 1928.

Scale - 1:10,000,000  
Nautical Miles 0 100 200 300 400  
Statute Miles 0 100 200 300 400

Times are G.M.T. Add one hour  
summer time.

**EXPLANATION.**  
Isobars are drawn for  
every two millibars.  
Arrows fly with the wind.  
Small feathers indicate baro-  
metric change in millibars.  
Mean Velocity in miles  
per hour is given in small circles.  
Direction is given in degrees P.  
or M.  
Sky:   
☉ less than 1  
clouded  
☁ more than  
1 clouded  
☁☁ sky  
☁☁☁ rain falling  
☁☁☁ fog  
☁☁☁ thunderstorm  
☁☁☁ Very Rough.  
Barometric change from  
normal in half millibars is entered  
in word for weather.
