LONDON.

DAILY WEATHER REPORTS

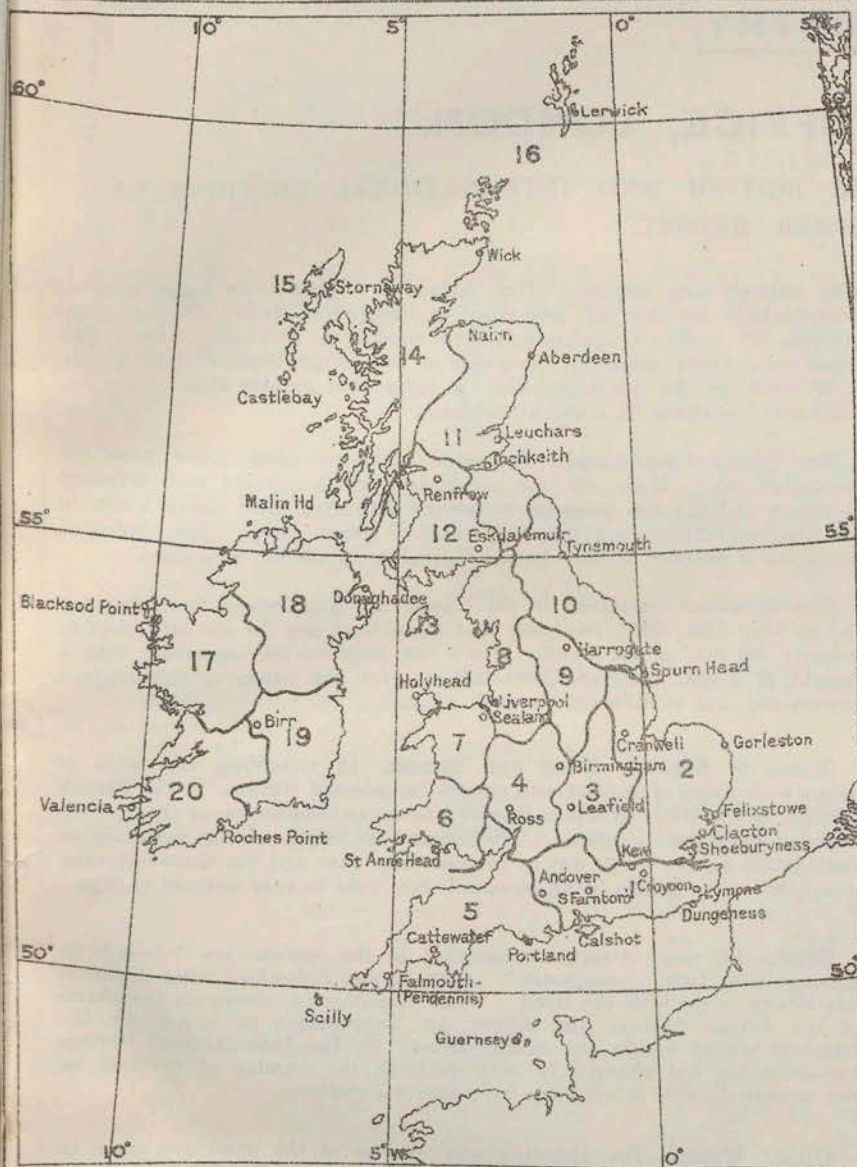

1ST JANUARY TO 31ST MARCH, 1925.

METEOROLOGICAL STATIONS.

Scale 1:2 x 10⁷
 Nautical Miles 0 1 2 3 4 5
 Statute Miles 0 1 2 3 4 5

FORECAST DISTRICTS AND BRITISH STATIONS.

STATIONS USED FOR UPPER AIR SUPPLEMENT.

THE BEAUFORT SCALE OF WIND FORCE.

Beaufort Number.	Admiral Beaufort's General Description of Wind.	Specification for use on Land, based on observations made at Land Stations.	Limits of Mean Velocities Statute Miles per Hour.
0	Calm	Calm; smoke rises vertically	Less than 1
1	Light air	Direction of wind shown by smoke drift	1-3
2	Slight breeze	Wind felt on face; leaves rustle	4-7
3	Gentle breeze	Leaves and small twigs in constant motion; wind extends light flag	8-12
4	Moderate wind	Raises dust and loose paper; small branches are moved	13-18
5	Fresh wind	Small trees in leaf begin to sway; crested wavelets on inland waters	19-24
6	Strong wind	Large branches in motion; whistling heard in telegraph wires	25-31
7	High wind	Whole trees in motion; inconvenience felt when walking against wind	32-38
8	Gale	Breaks twigs off trees; generally impedes progress	39-46
9	Strong gale	Slight structural damage occurs (chimney pots and slates removed)	47-54
10	Whole gale	Seldom experienced inland; trees uprooted	55-63
11		Very rarely experienced; accompanied by widespread damage	64-75
12	Hurricane		Above 75

BEAUFORT NOTATION OF WEATHER.

b blue sky (not more than a quarter covered).
 bc sky partly cloudy (one half covered).
 c generally cloudy (three-quarters covered).
 d drizzle. h hail. EQ line squall.
 l lightning. o overcast sky.
 m mist, visibility 1000-10000 m.
 f fog, 200-1000 m.
 F thick fog, less than 200 m.
 sp precipitation within sight of station.
 p passing showers. r rain.
 s snow. rs sleet. t thunder.
 v unusual visibility. y dry air.
 z dust haze; the turbid atmosphere of dry weather.

With present weather is combined, whenever possible, the general character of the weather. A "solidus" divides actual existing weather from preceding conditions, thus: -bc/r = fair weather after rain; i = intermittent; - = "decreasing"; + = "increasing"; h(r) = "hail" or "rain and hail".

Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus: -
 E = heavy rain.
 rr = continuous moderate rain.
 rrr = continuous light rain.

GALE WARNINGS.

The Meteorological Office issues warnings to ports and fishing stations of gales on or near the coasts of the British Isles. When one of these notices has been received at a station a black canvas cone is hoisted.

The South Cone (point downwards) is hoisted for gales from S.E., veering to S.W., W. or N.W.
 " S.W., veering to W. or N.W.
 " W., veering to N.W.
 " E., veering to S. or S.W.

The North Cone (point upwards) is hoisted for gales from S.E., E. or N.E., backing to N.
 " N.W., veering to N., N.E. or E.
 " N., veering to N.E. or E.
 " N.E., veering to E.

The Signals remain hoisted after the receipt of a warning telegram until danger of a gale is passed. The Districts to which warnings are sent are shown in the British Section of the Daily Weather Report by the following symbols: -

▼ South Cone hoisted
 ▲ North " "

AIR MINISTRY.

METEOROLOGICAL OFFICE, LONDON.

NOTES ON THE INFORMATION CONTAINED IN THE BRITISH AND INTERNATIONAL SECTIONS OF THE DAILY WEATHER REPORT.

Heights of Stations.—The heights of British Stations above M.S.L. published in the British Section of the Daily Weather Report refer to the plot of ground on which the rain gauge is situated.

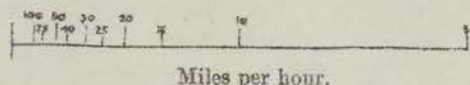

Pressure.—The distribution of barometric pressure at Mean Sea Level is shown by means of isobars which are drawn for intervals of 2 millibars on the British Section of the Report and for intervals of 4 millibars on the International Section.

The wind at a height of 1,500–2,000 feet above ground usually blows along the isobars and, for the same temperature, pressure and latitude, the speed of the wind is inversely proportional to the distance between the isobars, e.g., for isobars 1 inch apart (160 miles) in the Daily Weather Report the speed of the upper wind is about 12 m.p.h. in latitude 55°, with a temperature of 50° F. and a pressure of 1,015 mb; if, however, the isobars are $\frac{1}{2}$ inch apart the corresponding speed is 24 m.p.h.

The scale below can be used with both the International and the British Sections. If the distance between consecutive isobars is measured along the rule from the left-hand extremity the geostrophic wind is shown by the scale in miles per hour.

GEOSTROPHIC WIND SCALE FOR

4 mb isobars on 1 : 2 × 10⁷ Charts.
or 2 mb " " 1 : 10⁷ " "
or 1 mb " " 1 : 5 × 10⁶ " "

This scale applies under the following conditions:—

Pressure, 1,015 mb. Temperature, 283° A = 50° F. Latitude, 55°.

Corrections.—For an increase of 10 mb pressure, subtract 1% from velocity; for an increase of 10° F. add 2%. From Latitude 55° to Latitude 65° subtract 1% for each degree above 55°. From Latitude 55° to Latitude 45° add 1½% for each degree below 55°.

Weather.—In describing the distribution of weather over a district or during an interval of time such as a day, descriptive adjectives are used with the following meanings:—

Fine—mainly b and bc of the Beaufort notation (*see previous page*).

Fair or fair generally—mainly bc and c.

Cloudy—combinations of bc, c and o, c predominating.

Overcast—mainly c and o.

Dull—overcast with low heavy cloud.

Varying or variable cloud—combinations of b, bc, c, and o.

Precipitation when occurring is specifically mentioned.

Temperature.—Temperature is specified in degrees Fahrenheit, and is shown on the charts by means of figures written alongside the circles which indicate the positions of the stations.

Upper Air Temperature.—The British observations are made normally, one at 1,000 feet above the level of the aerodrome, and the remainder at pressures of 950, 900, 850, 800, etc., millibars. Heights are then computed and, apart from instrumental error, are correct heights: they do not require modification for differences of temperature from normal as these are allowed for in the computation. The values are shown graphically and in tabular form in the Upper Air Supplement. On the diagram, temperatures are given in degrees Fahrenheit and Absolute.

The oblique line marked "Dry Adiabatic" shows the lapse rate of temperature for dry air ascending or descending under adiabatic conditions, i.e., without communication of heat from external sources. The lapse rate under these circumstances is very approximately 5.5° F. per 1,000 feet, or 10a per kilometre. A lapse rate greater than this value indicates instability in a dry atmosphere.

The broken lines marked Saturated Adiabatic show lapse rates for saturated air. These are for air masses which contain just sufficient moisture at 1,015 mb. pressure to become saturated after rising 1 km. in an environment having the dry adiabatic lapse rate. The condensed moisture is assumed to be retained thereafter in the air as it rises.

The statement contained in the Upper Air Supplement from January 1st to May 31st, 1925, implying that these lines are for air saturated at exactly 900 mb. is not strictly true: the pressure corresponding with a height of 1 km. averages about 900 mb. for the range of temperature considered, but is different for each adiabat.

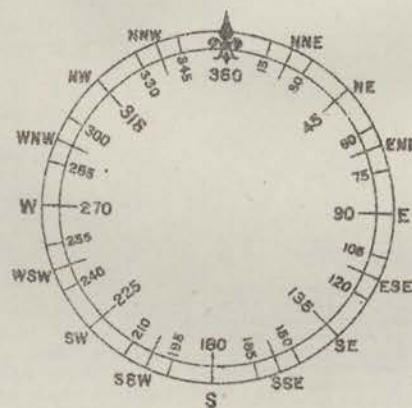

Times of Sunrise, Noon and Sunset.—In compiling the table of Greenwich times of sunrise and sunset for selected stations in the British Section of the Daily Weather Report, the mean declination of the sun for noon of each day is taken. No account is taken of the variation in declination on any given day as between leap year and the three following years, the same figures being repeated from year to year without change.

Wind.—All wind directions specified in the reports are "true," as distinguished from "magnetic." The arrows indicating wind direction are drawn to fly with the wind. Wind velocities are shown on the charts of the British Section and Upper Air Supplement in m.p.h. by the numbers placed within the small circles. In the International Section velocities are not shown. In both Sections the number of feathers on the arrows denotes wind force by Beaufort number.

Upper Winds.—The direction and velocity of the wind are given in the charts of the Upper Air Supplement for heights of 2,000 feet and 6,000 feet. The data are also given in tabular form for various heights. The reports are usually based on Pilot Balloon ascents.

Wind reports deduced from British Pilot Balloon Ascents refer to the 1,000 feet layers centering at the heights given in the table up to 16,000 feet. When winds are reported at greater heights, they refer to the 5,000 feet layers centering at 20,000 feet, 25,000 feet, 30,000 feet and 35,000 feet.

In the tabular statement direction is specified in degrees from true north measured through East 90°, South 180°, West 270° to North 360°. (*See diagram below.*)

SUPPLEMENT TO THE DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE, LONDON.
SUMMARY OF METEOROLOGICAL OBSERVATIONS AT SELECTED STATIONS ISSUED ON THE 1st DAY OF EACH MONTH.

Notes on the Weather of

JANUARY 1925

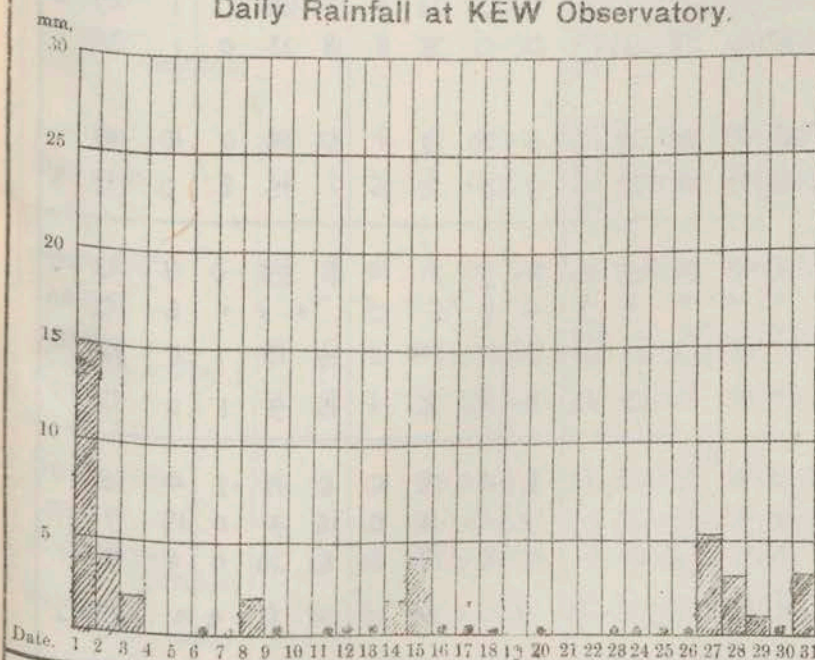

Rough weather which prevailed towards the end of December continued during the first few days of the New Year. Widespread gales occurred on the 1st & 2nd and at times force 10 (average velocity above 54 m.p.h.) was experienced in some parts, while 80 m.p.h. was attained in gusts at Weaver Point on the 1st and at Southport on the 2nd. Rainfall exceeded 20 mm. in many parts and amounted to 30-40 mm. in some localities.

In the rear of a secondary depression which crossed the British Isles on the 3rd-4th pressure increased considerably and by the 5th a ridge of high pressure extended to Iceland. This system gradually withdrew southeast with the approach of fresh depressions on the Atlantic but on the whole fairer weather predominated for some time in eastern England. Six or seven hours sunshine was recorded on several occasions though under the influence of an anticyclone which spread in on the 9th, there was a good deal of fog also locally in the southeastern counties on the 10th-12th.

Depressions between Iceland and the Azores extended gradually eastwards and rain fell more generally for a few days but on the 18th the anticyclone on the Continent moved westwards and drier but rather foggy conditions prevailed again for several days. After the 22nd, however, the weather was mostly unsettled with much rain in some places, e.g. in Southwest England on the 25th and 26th and in the north of England on the 29th. On the latter date the rapid development of a depression southward of Iceland caused high winds and gales on various parts of our coasts and conditions remained rather rough on the 30th & 31st.

The prevalence of southwesterly winds caused temperature to be well above the average for January. At Kew Observatory the deviation was $+3.6^{\circ}\text{F}$. Rainfall was below normal in many eastern localities and some parts of northwest England while in some other western districts, e.g. Valencia and Falmouth there was a large excess.

Daily Rainfall at KEW Observatory.

+ Since March 1st, 1921, the readings used have (except in the case of Phoenix Park & Bidston) been the maximum for the period 7h.-18h., and the minimum for the period 18h.-7h. Bidston adopted the same practice on April 1st, 1924. The normal values given above are based upon extremes taken over the 24 hours.

 9=Glazed roads (ice on roads from frozen rain or melted snow).

NOTES ON CHART OF 1901-1902.

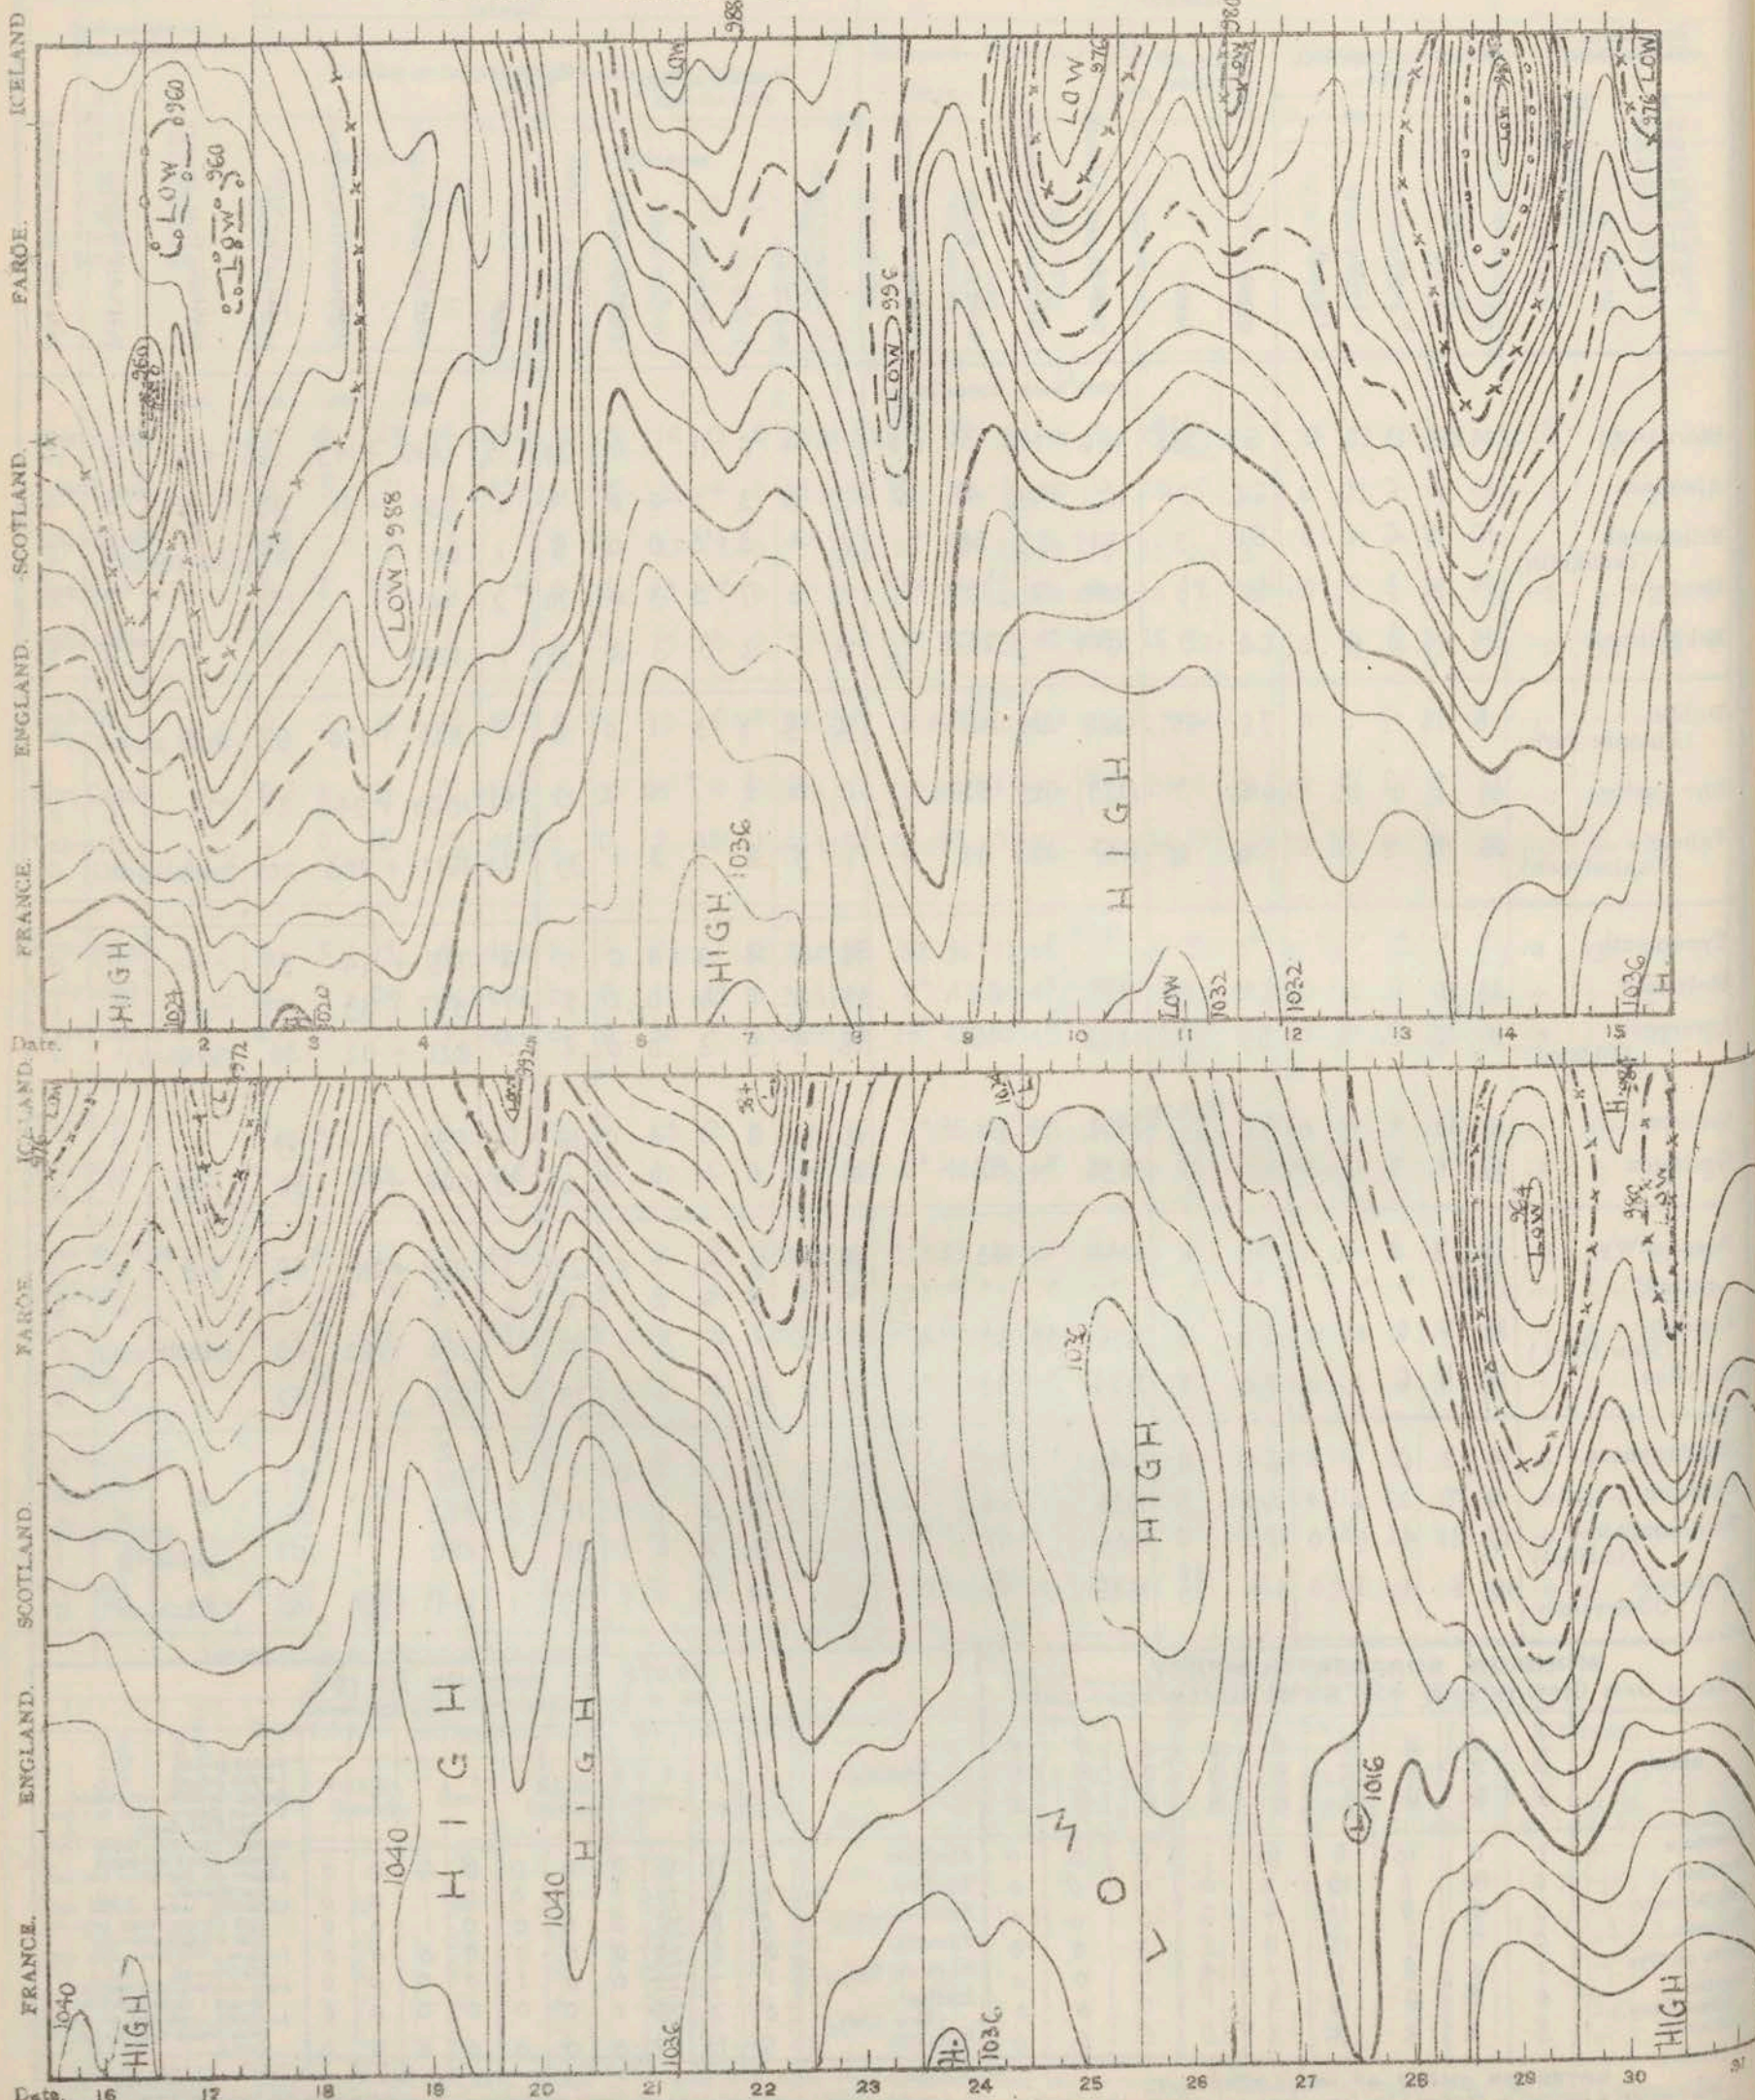

NOTES ON CHART OF ISOPLETHS (p. 4).
The diagram is obtained by drawing a line from Akureyri in Iceland to the South of France, near Marseilles. The points at which the isobars drawn for 4 mb pressure intervals intersect this line at 1h, 7h, 13h, and 18h, are plotted consecutively and joined to show the variation of pressure from day to day at any point in the line. The line termi-nates at Lat. 66° N., Long. 18° W. in the north, at Lat. 44° N., Long. 4° E. in the south.

* Based in part on reports made by telegraph in which the day & night measurements are rounded off to the nearest whole millimetre. Small discrepancies may arise between these totals and those given in Monthly Weather Report which are based on readings taken to 0.1 mm.

EXPLANATION.
TER.—Leoburn, 1871.

Isobars are drawn for
 intervals of two millibars.
 D.—Direction is shown by arrow
 blowing with the wind. Force, on the scale
 of 16, is indicated by the number of
 strokes. Mean velocity is shown in miles
 per hour by figures in small circles.
 TEMPERATURE is given in degrees F.
 OTHER SYMBOLS.—
 ☉ sky ☼ cloudy. ☼☼ sky ☼☼ cloudy.
 ☁ overcast sky. ☁☁ rain falling.
 ☁☁ snow. ☁☁ hail. ☁☁ fog ☁☁ mist.
 ⚡ thunder. ⚡ thunderstorm.
 DISTURBANCE.—
 ~~~~~ Rough ~~~~~ Very Rough.

GENERAL INFERENCE.

A very deep depression west of Ireland will probably cross Scotland and cause severe south-westerly gales today except possibly in the west of Scotland and northwest of Ireland, with much rain generally. Further disturbances are indicated out on the Atlantic and stormy, unsettled weather will continue beyond today.

| Districts.                | Forecast for the 24 hours commencing 15h. G.M.T. Friday, 2nd January, 1925.                                                                      | Further Outlook.          |

AS 7 - 10.

Meteorological Office: Air Ministry, Kingsway, London, W.C.2.

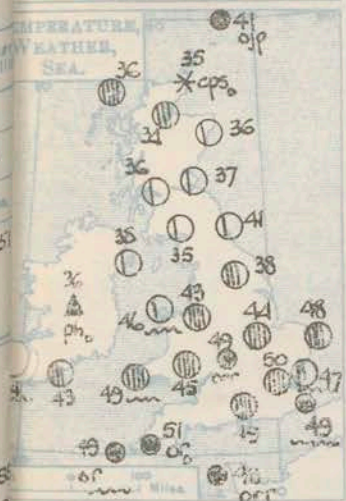

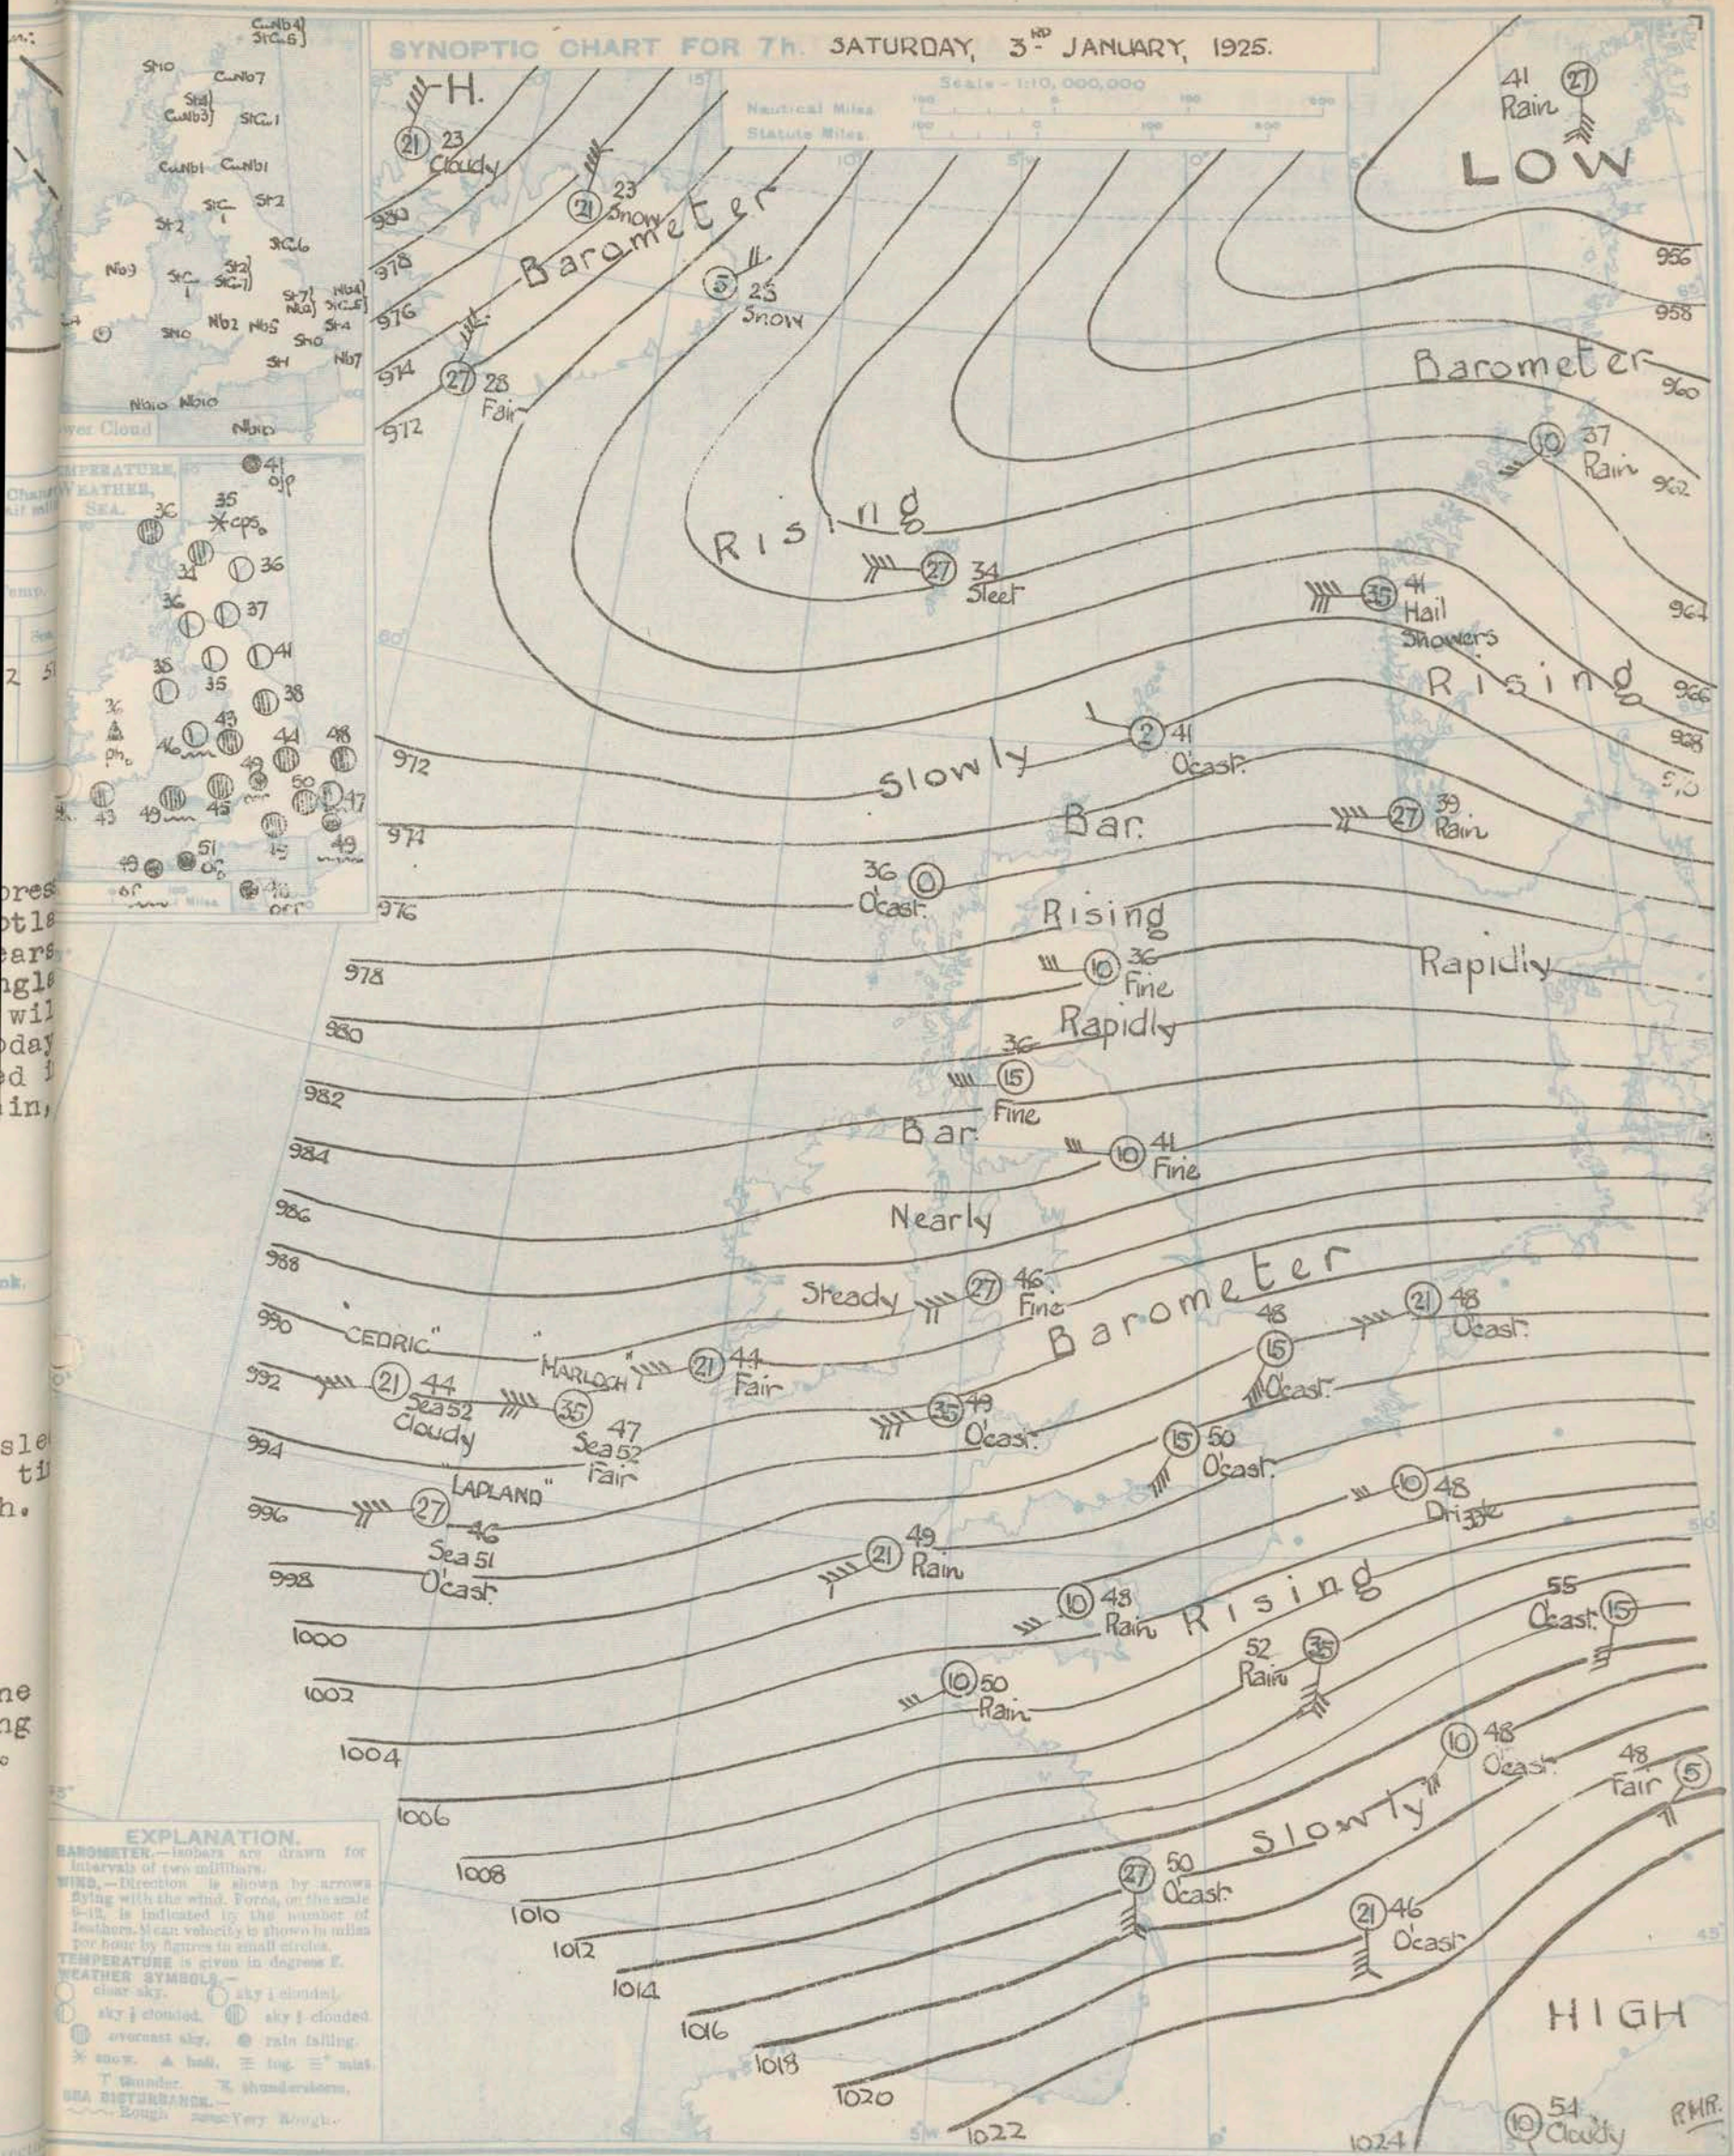

Forecasts issued at

0935 G.M.T.

G. C. SIMPSON, F.R.S., Director

SYNOPTIC CHART FOR 7h. SATURDAY, 3<sup>RD</sup> JANUARY, 1925.

**EXPLANATION.**  
BAROMETER.—isobars are drawn for intervals of two millibars.  
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in degrees F.  
WEATHER SYMBOLS—  
○ clear sky. ○ sky 1 clouded. ○ sky 2 clouded. ○ sky 3 clouded. ○ overcast sky. ○ rain falling. \* snow. & hail. ≡ fog. ≡ mist. T thunder. T thunderstorm.  
SEA DISTURBANCE.—  
~ Rough. ~~~~~ Very Rough.

## GENERAL INFERENCE.

A deep depression centres over the north of England is passing eastward and is likely to be followed by further disturbances from the Atlantic which will occasion a continuance of unsettled weather with strong winds and gales in the South.

SYNOPTIC CHART FOR 7h. SUNDAY, 4<sup>TH</sup> JANUARY 1925

Scale - 1 in. = 100,000

Nautical Miles  
Statute Miles

**EXPLANATION.**  
BAROMETER.—Isobars are drawn for intervals of two millibars.  
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE.—is given in degrees F.  
WEATHER SYMBOLS.—  
○ clear sky. ○ sky & clouded.  
○ sky & clouded. ○ sky & clouded.  
○ overcast sky. ○ rain falling.  
\* snow. \* hail. \* fog. \* mist.  
T thunder. T thunder.  
SEA DISTURBANCE.—  
— Rough. — Very Rough.

## GENERAL INFERENCE.

The nearest depression is beyond the Shetlands, and the barometer is rising generally over the British Isles and a large surrounding area, including mid-Atlantic. Fresh W. to N.W. winds are likely generally, squally at times, with mainly fine, rather cold weather, and precipitation will be confined to scattered showers. Slight frost will occur in places at night.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Monday, 5th January, 1925.                                                                                                     | Farther Outlook.                                                                                                                                   |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind W. to N.W., moderate or fresh, strong locally; mostly fine, a few scattered showers; visibility good; moderate to rather low temperature, slight frost in places at night.  | New depression now over Labrador quite likely to renew unsettled weather soon in N.W. of British Isles, probably spreading to all districts later. |

## GENERAL INFERENCE.

An anticyclone off the south west coasts is spreading over the British Isles and will give generally fine weather for a time with light or moderate N.W. to winds, but a rather deep depression which has now reached Iceland will cause increasing winds and less settled weather in the extreme Northwest later today.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Tuesday, 6th January, 1925.                                                                                                             | Farther Outlook.                                                                                                                                        |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind light, variable or westerly; fine; mist or light fog developing in places at night; moderate day temperature today followed by sharp night frost.                                    | Unsettled in the North; perhaps also becoming unsettled in the South but as yet rather uncertain owing to intensity of anticyclone now off S.W. Coasts. |
| 2. E. **EXPLANATION.**  
BAROMETER.—Isobars are drawn for intervals of two millibars.  
WIND.—Direction is shown by arrows pointing with the wind. Force, on the same scale, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE.—Isotherms are drawn for intervals of 2 degrees F.  
WEATHER SYMBOLS.—  
☉ Clear sky. ☁ sky & clouded. ☁☁ sky & clouded. ☁☁☁ overcast sky. ☁☁☁☁ rain falling. ☁☁☁☁☁ snow. ☁☁☁☁☁☁ hail. ☁☁☁☁☁☁☁ fog. ☁☁☁☁☁☁☁☁ thunder. ☁☁☁☁☁☁☁☁☁ thunderstorm.  
SEA DISTURBANCE.—  
— Rough. — Very Rough.

GENERAL INFERENCE.

The anticyclone now over France will move east, while a V-shaped secondary to a northern depression will move from the Atlantic eastward across the British Isles. Winds will be from a westerly point, strong or high in the North where occasional rain will occur, and freshening in the South where there will be much more cloud than of late, and a little rain later. Temperature will rise considerably in the South.

## Districts.

Forecasts for the 24 hours commencing 15h. GMT. Wednesday, 7th January, 1925

Further Outlook.

|                           |                                                                                                                                                                   |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind S.W., becoming fresh, strong locally; much more cloud than of late, probably a little rain later; visibility moderate or good; temperature rising decidedly. |
| 2. E. England             |                                                                                                                                                                   |
| 3. E. Midlands            |                                                                                                                                                                   |
| 4. W. Midlands            |                                                                                                                                                                   |
| 5. S.W. England           | Moderate to strong S.W. to W. winds; a good deal of cloud, some drizzle or a little rain; visibility moderate or good; rather mild.                               |
| 6. South Wales            |                                                                                                                                                                   |
| 7. North Wales            |                                                                                                                                                                   |
| 8. N.W. England           |                                                                                                                                                                   |
| 9. N. Midlands            | Strong westerly winds, higher at times; a good deal of cloud, occasional rain or drizzle; visibility moderate or good; rather mild                                |
| 10. N.E. England          |                                                                                                                                                                   |

Nautical Miles  
Statute Miles

Scale - 1:10,000,000

Scandinavian ship

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of two millibars.

WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.

TEMPERATURE.—Is given in degrees F.

WEATHER SYMBOLS.—

- clear sky.
- sky 1/4 clouded.
- sky 1/2 clouded.
- sky 3/4 clouded.
- overcast sky.
- rain falling.
- snow.
- hail.
- fog.
- mist.
- Thunder.
- Thunderstorm.

SEA DISTURBANCE.—

- Rough.
- Very Rough.

ISALLOBARS

8<sup>th</sup> JAN. 1928

POSITION NUMBERS

Barometric Change from 4h. to 7h. (Half millibar)

Isotherm

### GENERAL INFERENCE

Pressure is lowest northward of Scotland and highest over eastern France. A trough of low pressure, about two hundred miles west of Ireland, is moving east at about 25 miles an hour. Southerly winds will freshen generally, reaching gale force locally, but later veering towards west and moderating. There will be a good deal of cloud generally but rain is not expected today in the southeast of England. Temperature will be generally moderate or rather mild.

Metereological Office: Air Ministry, Kingsway, London, W.C.2.

G. C. SIMPSON, F.R.S., Director.

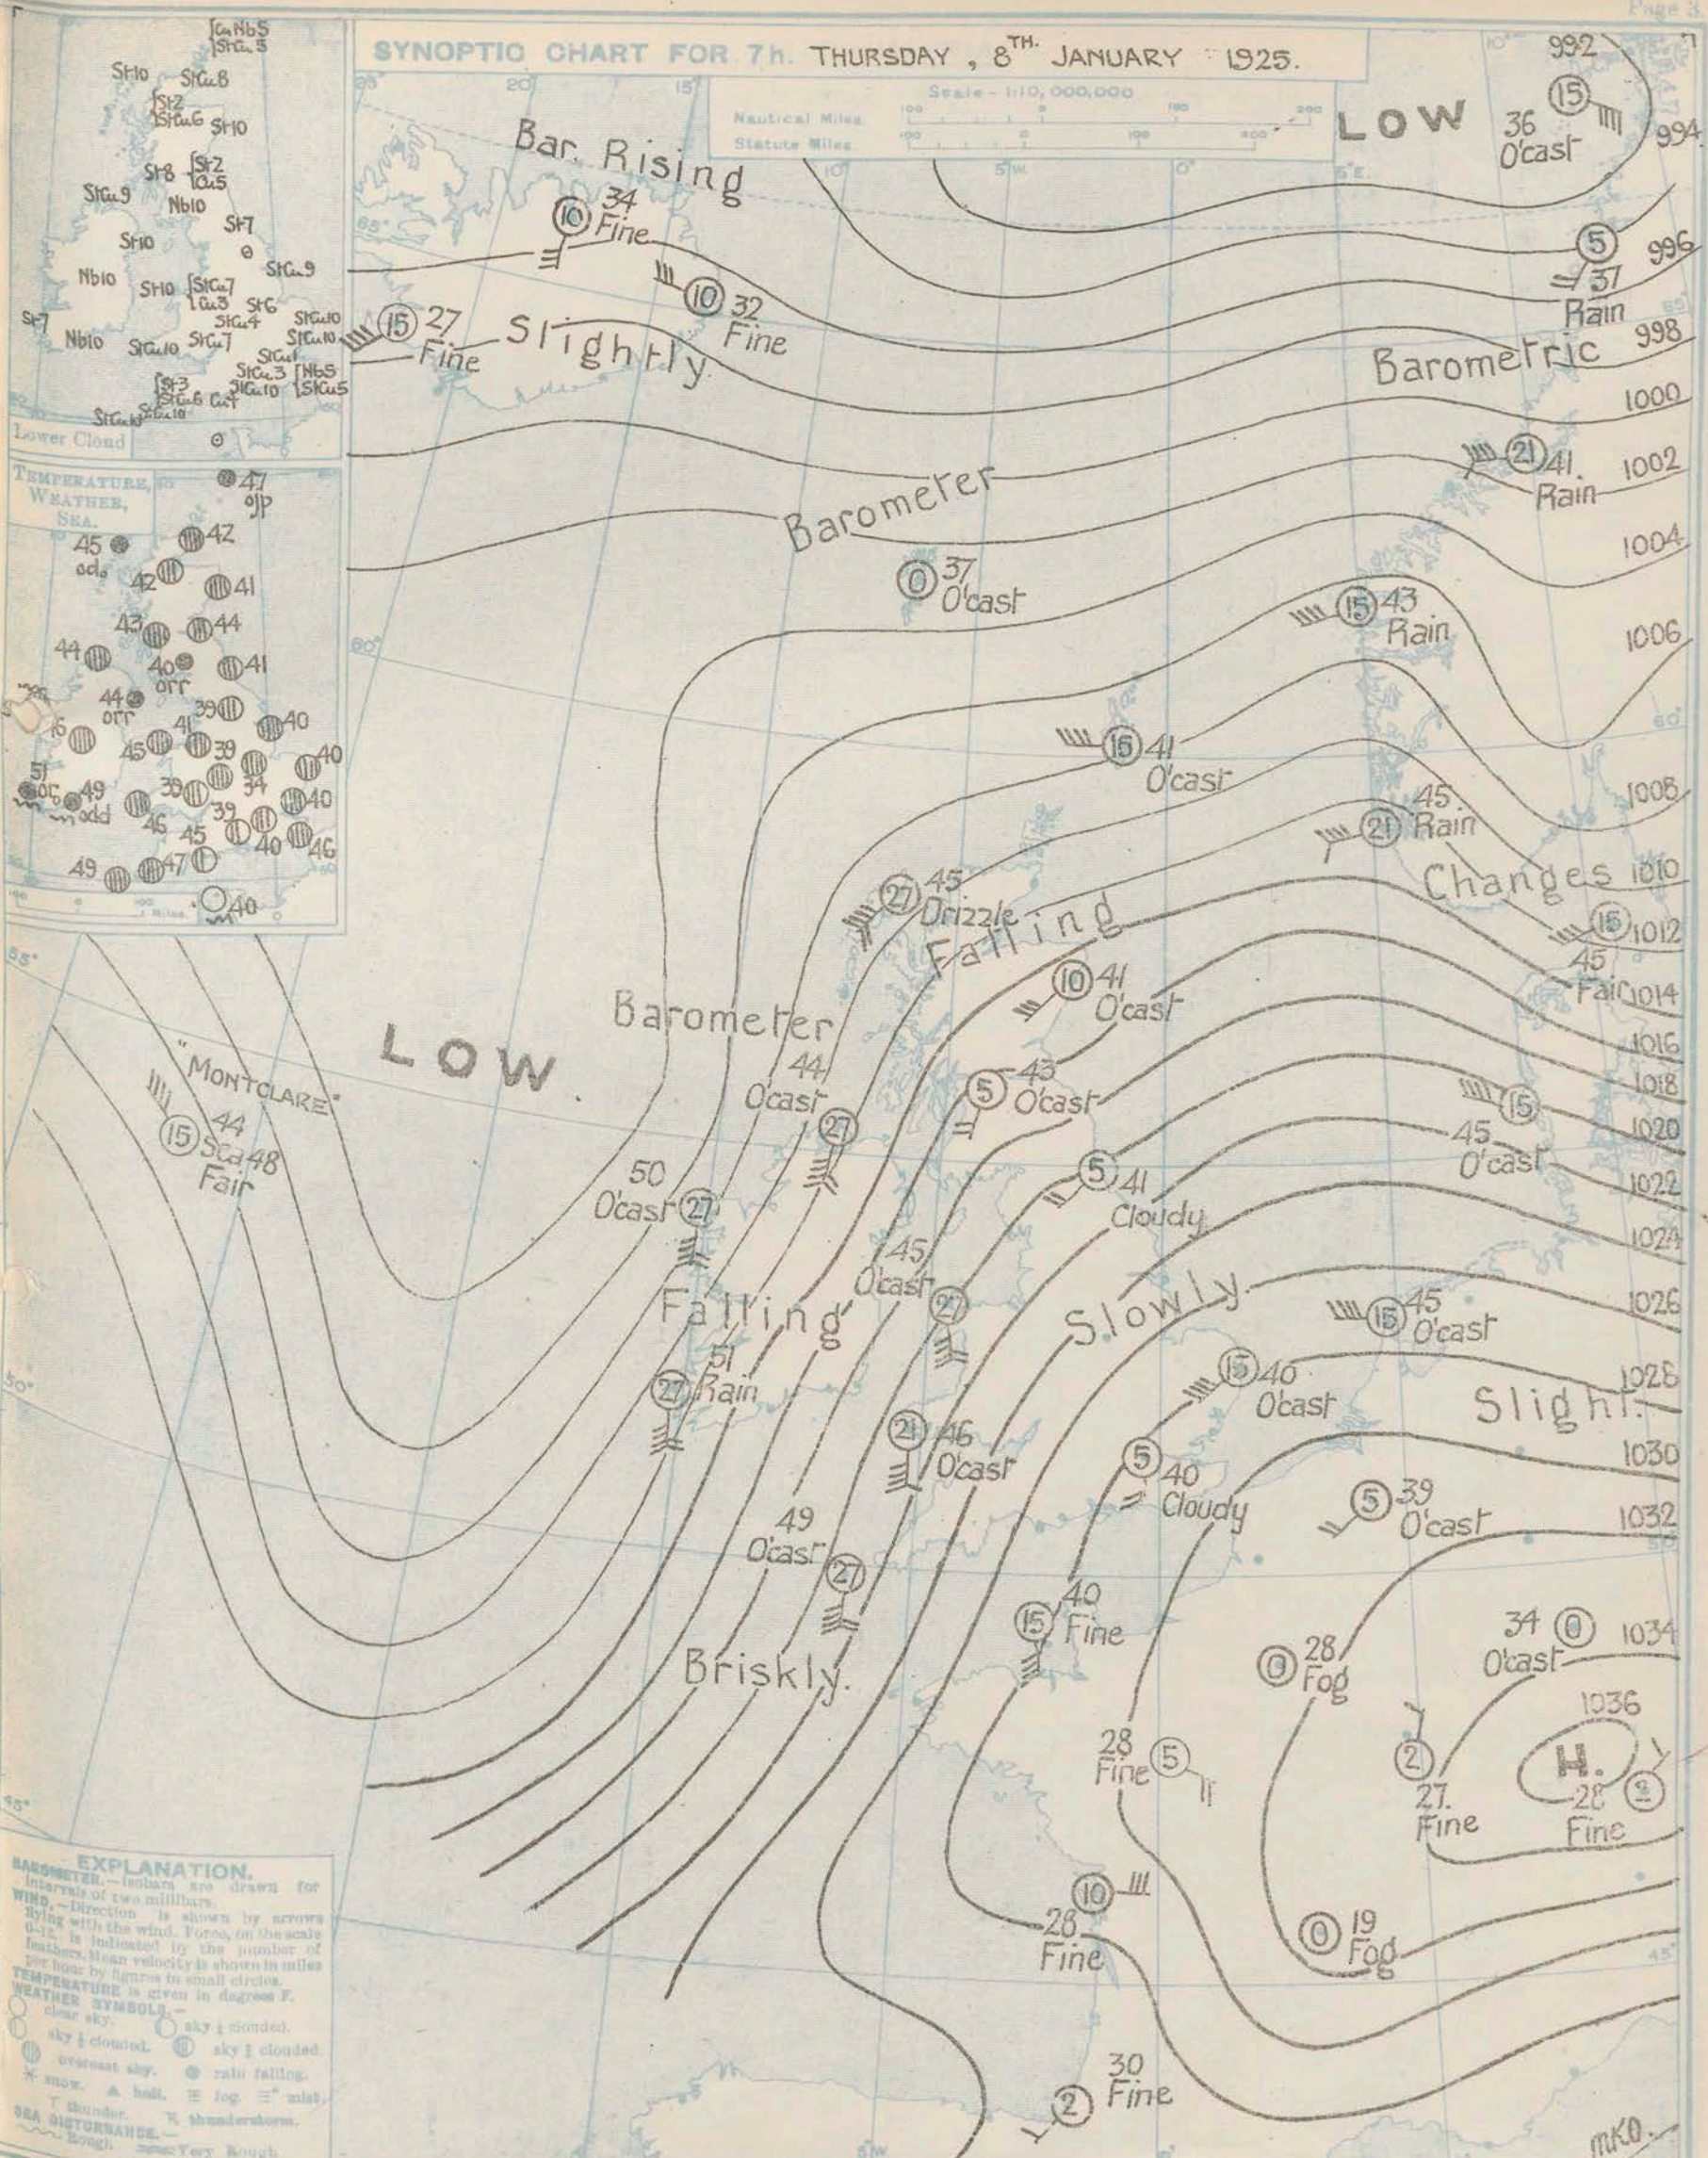

SYNOPTIC CHART FOR 7h. THURSDAY, 8<sup>TH</sup>. JANUARY 1925.

Scale - 1:10,000,000

Nautical Miles

Statute Miles

### EXPLANATION.

**BAROMETER.**—Isobars are drawn for intervals of two millibars.

**WIND.**—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.

**TEMPERATURE** is given in degrees F.

**WEATHER SYMBOLS.**—

|                    |                     |
|--------------------|---------------------|
| ☉ clear sky.       | ☁ sky 1/2 clouded.  |
| ☁ sky 1/2 clouded. | ☁☁ sky 3/4 clouded. |
| ☁☁ overcast sky.   | ☁☁☁ rain falling.   |
| * snow. A. hail.   | ☁ fog. ☐ mist.      |
| T thunder.         | K thunderstorm.     |

**SEA DISTURBANCE.**—

W. rough. M. very rough.

## GENERAL INFERENCE.

A ridge of high pressure off the western coasts is moving in over the British Isles and will give fine weather generally for a time with moderating north-westerly winds, a moderate to rather low temperature and night frost inland. There is however, a very deep low pressure system out on the Atlantic which will probably soon cause the wind to become southwesterly with unsettled weather in the extreme Northwest.

Further Outlook.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Friday, 9th January, 1925.                                                                                                              | Farther Outlook. |

# SYNOPTIC CHART FOR 7H. SATURDAY, 10<sup>TH</sup> JANUARY 1925

Scale - 1:10,000,000

**EXPLANATION**

**BAROMETER.**—Isobars are drawn at intervals of two millibars.

**WIND.**—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.

**TEMPERATURE** is given in degrees F.

**WEATHER SYMBOLS.**

|                  |                  |
|------------------|------------------|
| ○ clear sky.     | ☁ sky & clouded. |
| ☁ sky & clouded. | ☁ sky & clouded. |
| ☁ overcast sky.  | ☁ rain falling.  |
| ✕ snow.          | △ hail.          |
| ⊕ thunderstorm.  | ⊕ fog.           |

## GENERAL INFERENCE.

An anticyclone still covers France and a large part of the British Isles, and there is a deep depression far out on the Atlantic. In the West and Northwest of the British Isles the winds will be fresh to strong at times from S.W. or South, with mild cloudy weather and slight rain or drizzle locally but elsewhere the weather will be mainly fair and frost and fog locally in S.E. England.

## Districts.

Forecasts for the 24 hours commencing 15h. G.M.T. Sunday 11th January, 1925.

## Further Outlook.

1. S.E. England  
Calm or light variable winds, becoming Southwest or South, fine to cloudy but fog persisting and thick fog locally today, probably clearing in most places towards noon tomorrow; rather cold becoming milder; frost at night.
2. E. England
3. E. Midlands
4. W. Midlands
5. S.W. England  
Wind S.W. or S., light to moderate, freshening later, cloudy; local rain or drizzle later; visibility moderate to good; mild.
6. South Wales
7. North Wales
8. N.W. England
9. N. Midlands
10. N.E. England
11. E. Scotland  
Wind W. or S.W., light to moderate or fresh; fair to cloudy; visibility moderate or good; mild.
12. S.W. Scotland
13. Isle of Man
14. N. & N.W. Scotland
15. Hebrides  
Wind S.W. or S., fresh and strong at times; cloudy; some rain or drizzle; visibility good; mild.
16. Orkneys and Shetlands
17. N.W. Ireland
18. N.E. Ireland
19. S.E. Ireland  
Light or moderate Southerly winds; freshening; cloudy; some rain or drizzle; visibility moderate or good; mild.
20. S.W. Ireland

Unsettled in the West and N. West British Isles; but mainly fair apart from fog locally in S.E. England.

**GENERAL INFERENCE.**

A depression west of Ireland is tending to spread east but the continental anticyclone continues. Frost and fog will continue over most of the southeast of England today but elsewhere the weather will be fair to dull and rather mild with southerly winds, strong to high at times in Ireland and on the western coasts of England and Scotland.

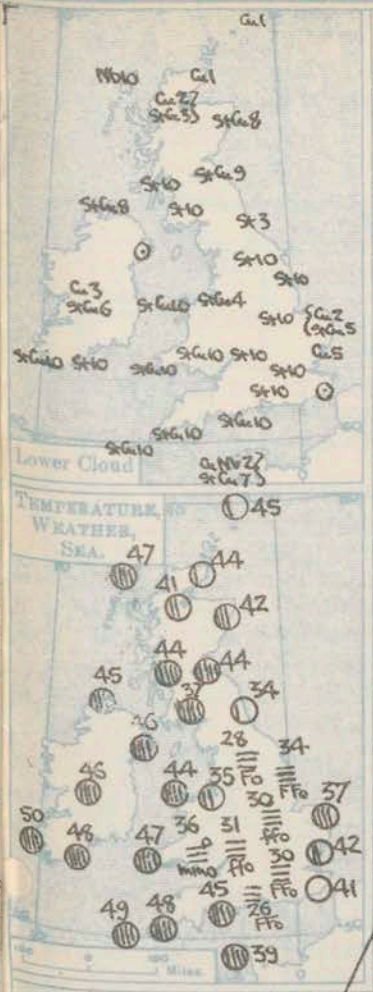

| Districts.                | Forecasts for the 24 hours commencing 15h. GMT. Monday, 12th January 1925.                                                                                              | Further Outlook.                                                                               |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Calms or light southeasterly breezes; frost and fog today and tonight generally inland but fine and clear with a moderate temperature in most of the coastal districts. | Unsettled and mild in Scotland and Ireland, probably fair over most of England apart from fog. |
| 2. E. England             |                                                                                                                                                                         |                                                                                                |
| 3. E. Midlands            | Calms or light southerly breezes; frost and fog continuing today nearly everywhere and probably tonight.                                                                |                                                                                                |
| 4. W. Midlands            | Light or moderate S.E. to S. winds; fair to dull; mist or fog at night; rather low to moderate temperature.                                                             |                                                                                                |
| 5. S.W. England           |                                                                                                                                                                         |                                                                                                |
| 6. South Wales            | Moderate southerly winds; fair to dull; mist locally inland; moderate temperature to rather mild.                                                                       |                                                                                                |
| 7. North Wales            |                                                                                                                                                                         |                                                                                                |
| 8. N.W. England           | Light to moderate southerly winds; fair; some mist or fog, especially at night; moderate temperature.                                                                   |                                                                                                |
| 9. N. Midlands            |                                                                                                                                                                         |                                                                                                |
| 10. N.E. England          |                                                                                                                                                                         |                                                                                                |
| 11. E. Scotland           | Moderate southerly winds; fair to dull; mist locally; moderate temperature to rather mild.                                                                              | South Coast still flying                                                                       |
| 12. S.W. Scotland         | Moderate to fresh southerly winds; fair to dull; visibility moderate to good; rather mild.                                                                              |                                                                                                |

EXPLANATION.  
BAROMETER.—Isobars are drawn for intervals of two millibars.  
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE.—Is given in degrees F.  
WEATHER SYMBOLS.—  
sky: sky; cloudy; sky: cloudy; overcast sky; rain falling; snow; hail; fog; mist; thunder; thunderstorm.  
SEA DISTURBANCE.—  
rough; very rough

## GENERAL INFERENCE.

A large complex low pressure system out on the Atlantic is spreading very slowly east and stronger winds from some southerly point will extend to all districts. The weather will be mainly cloudy with rain locally in the West and North.

## GENERAL INFERENCE.

A complex low pressure system persists off Ireland and further vigorous secondaries are likely to move in a northerly direction along our western seaboard. Squally winds between SW. and S. reaching gale force at times are probable with cloudy mild weather and occasional rain.

| Districts.                | Forecasts for the 24 hours commencing 15h. GMT. Wednesday, 14th January, 1925.                                                                                                    | Further Outlook.                    |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------|
| 1. S.E. England           | Wind southwesterly, fresh or strong and squally, probably backing and increasing later, perhaps to gale force; mainly cloudy, occasional rain; visibility moderate to good; mild. | Continuing very unsettled.          |

# SYNOPTIC CHART FOR 7<sup>TH</sup> WEDNESDAY, 14<sup>TH</sup> JANUARY 1925

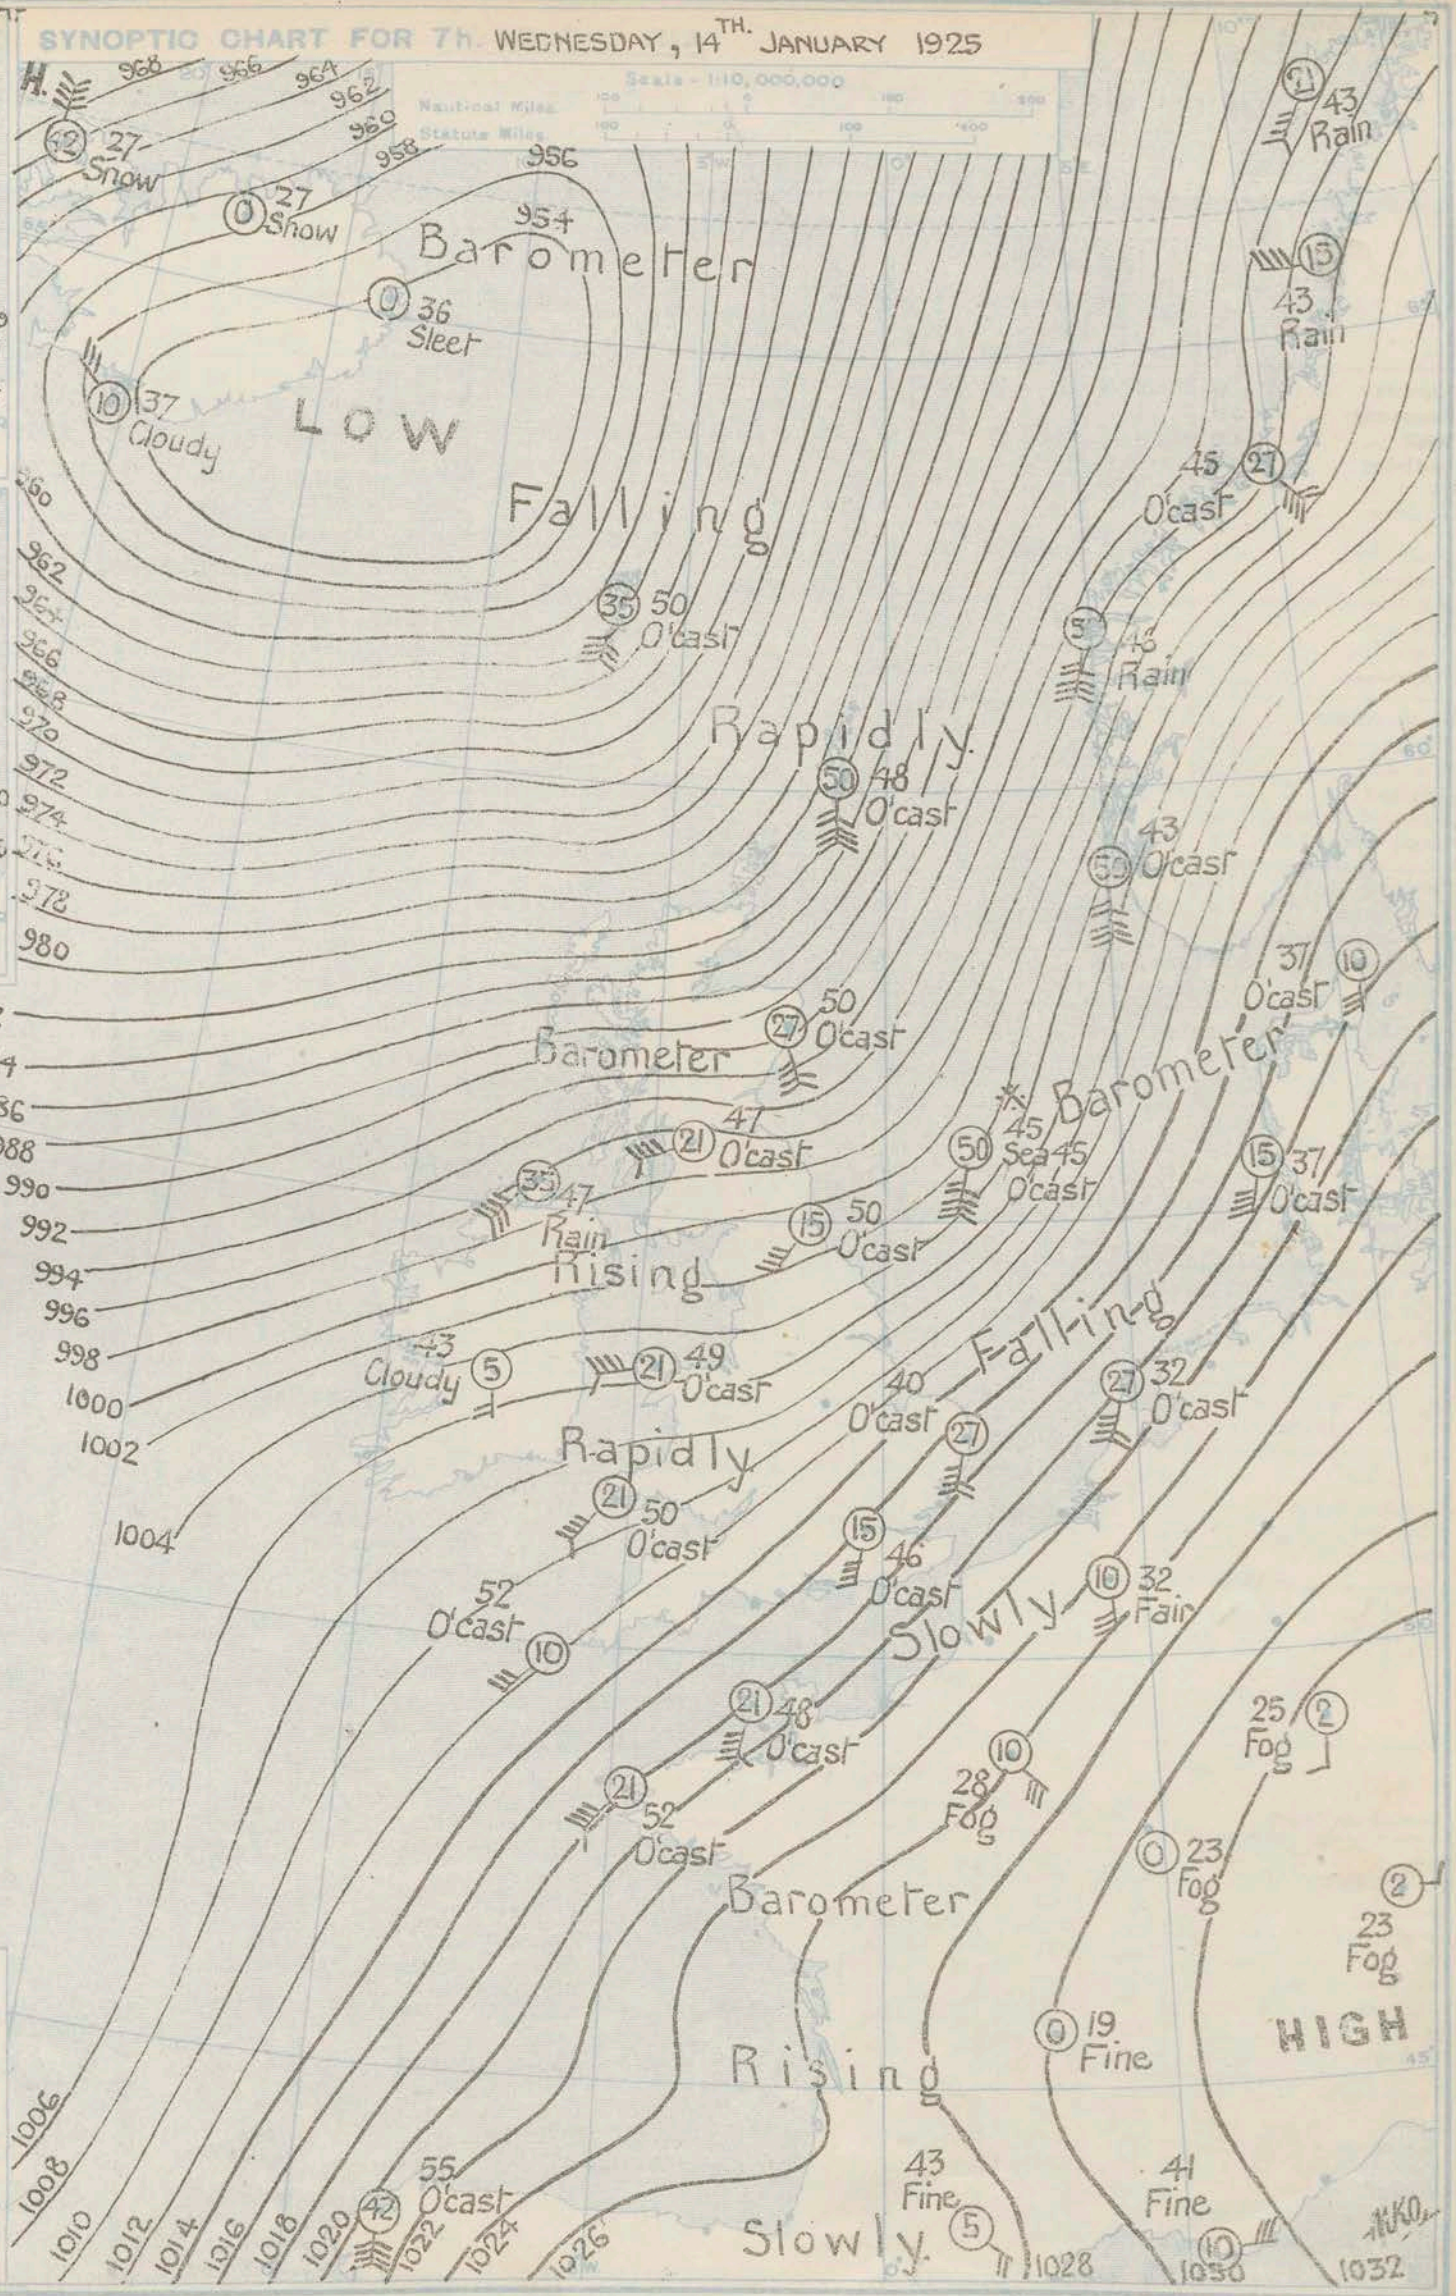

Scale - 1:10,000,000

Nautical Miles  
Statute Miles

Lower Cloud  
TEMPERATURE  
WEATHER  
SEA

**EXPLANATION.**  
BAROMETER.—Isobars are drawn for intervals of two millibars.  
WIND.—Direction is shown by arrows lying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE.—Is given in degrees F.  
WEATHER SYMBOLS.—  
☉ clear sky. ☁ sky & cloudy. ☂ sky & clouded.  
☉ overcast sky. ☂ rain falling.  
\* snow. \* hail. ☂ fog. ☂ mist.  
T thunder. T thunderstorm.  
SEA DISTURBANCE.—  
~ Rough. ~~~~~ Very Rough.

## GENERAL INFERENCE.

Pressure is high to the south and low to the north of the British Isles. Winds will be westerly, moderate to fresh, and weather, in most districts, mainly bright but with passing showers of rain or hail and a moderate temperature. In the South of England however, dull conditions will persist for a time with some rain or drizzle but an improvement is probable later.

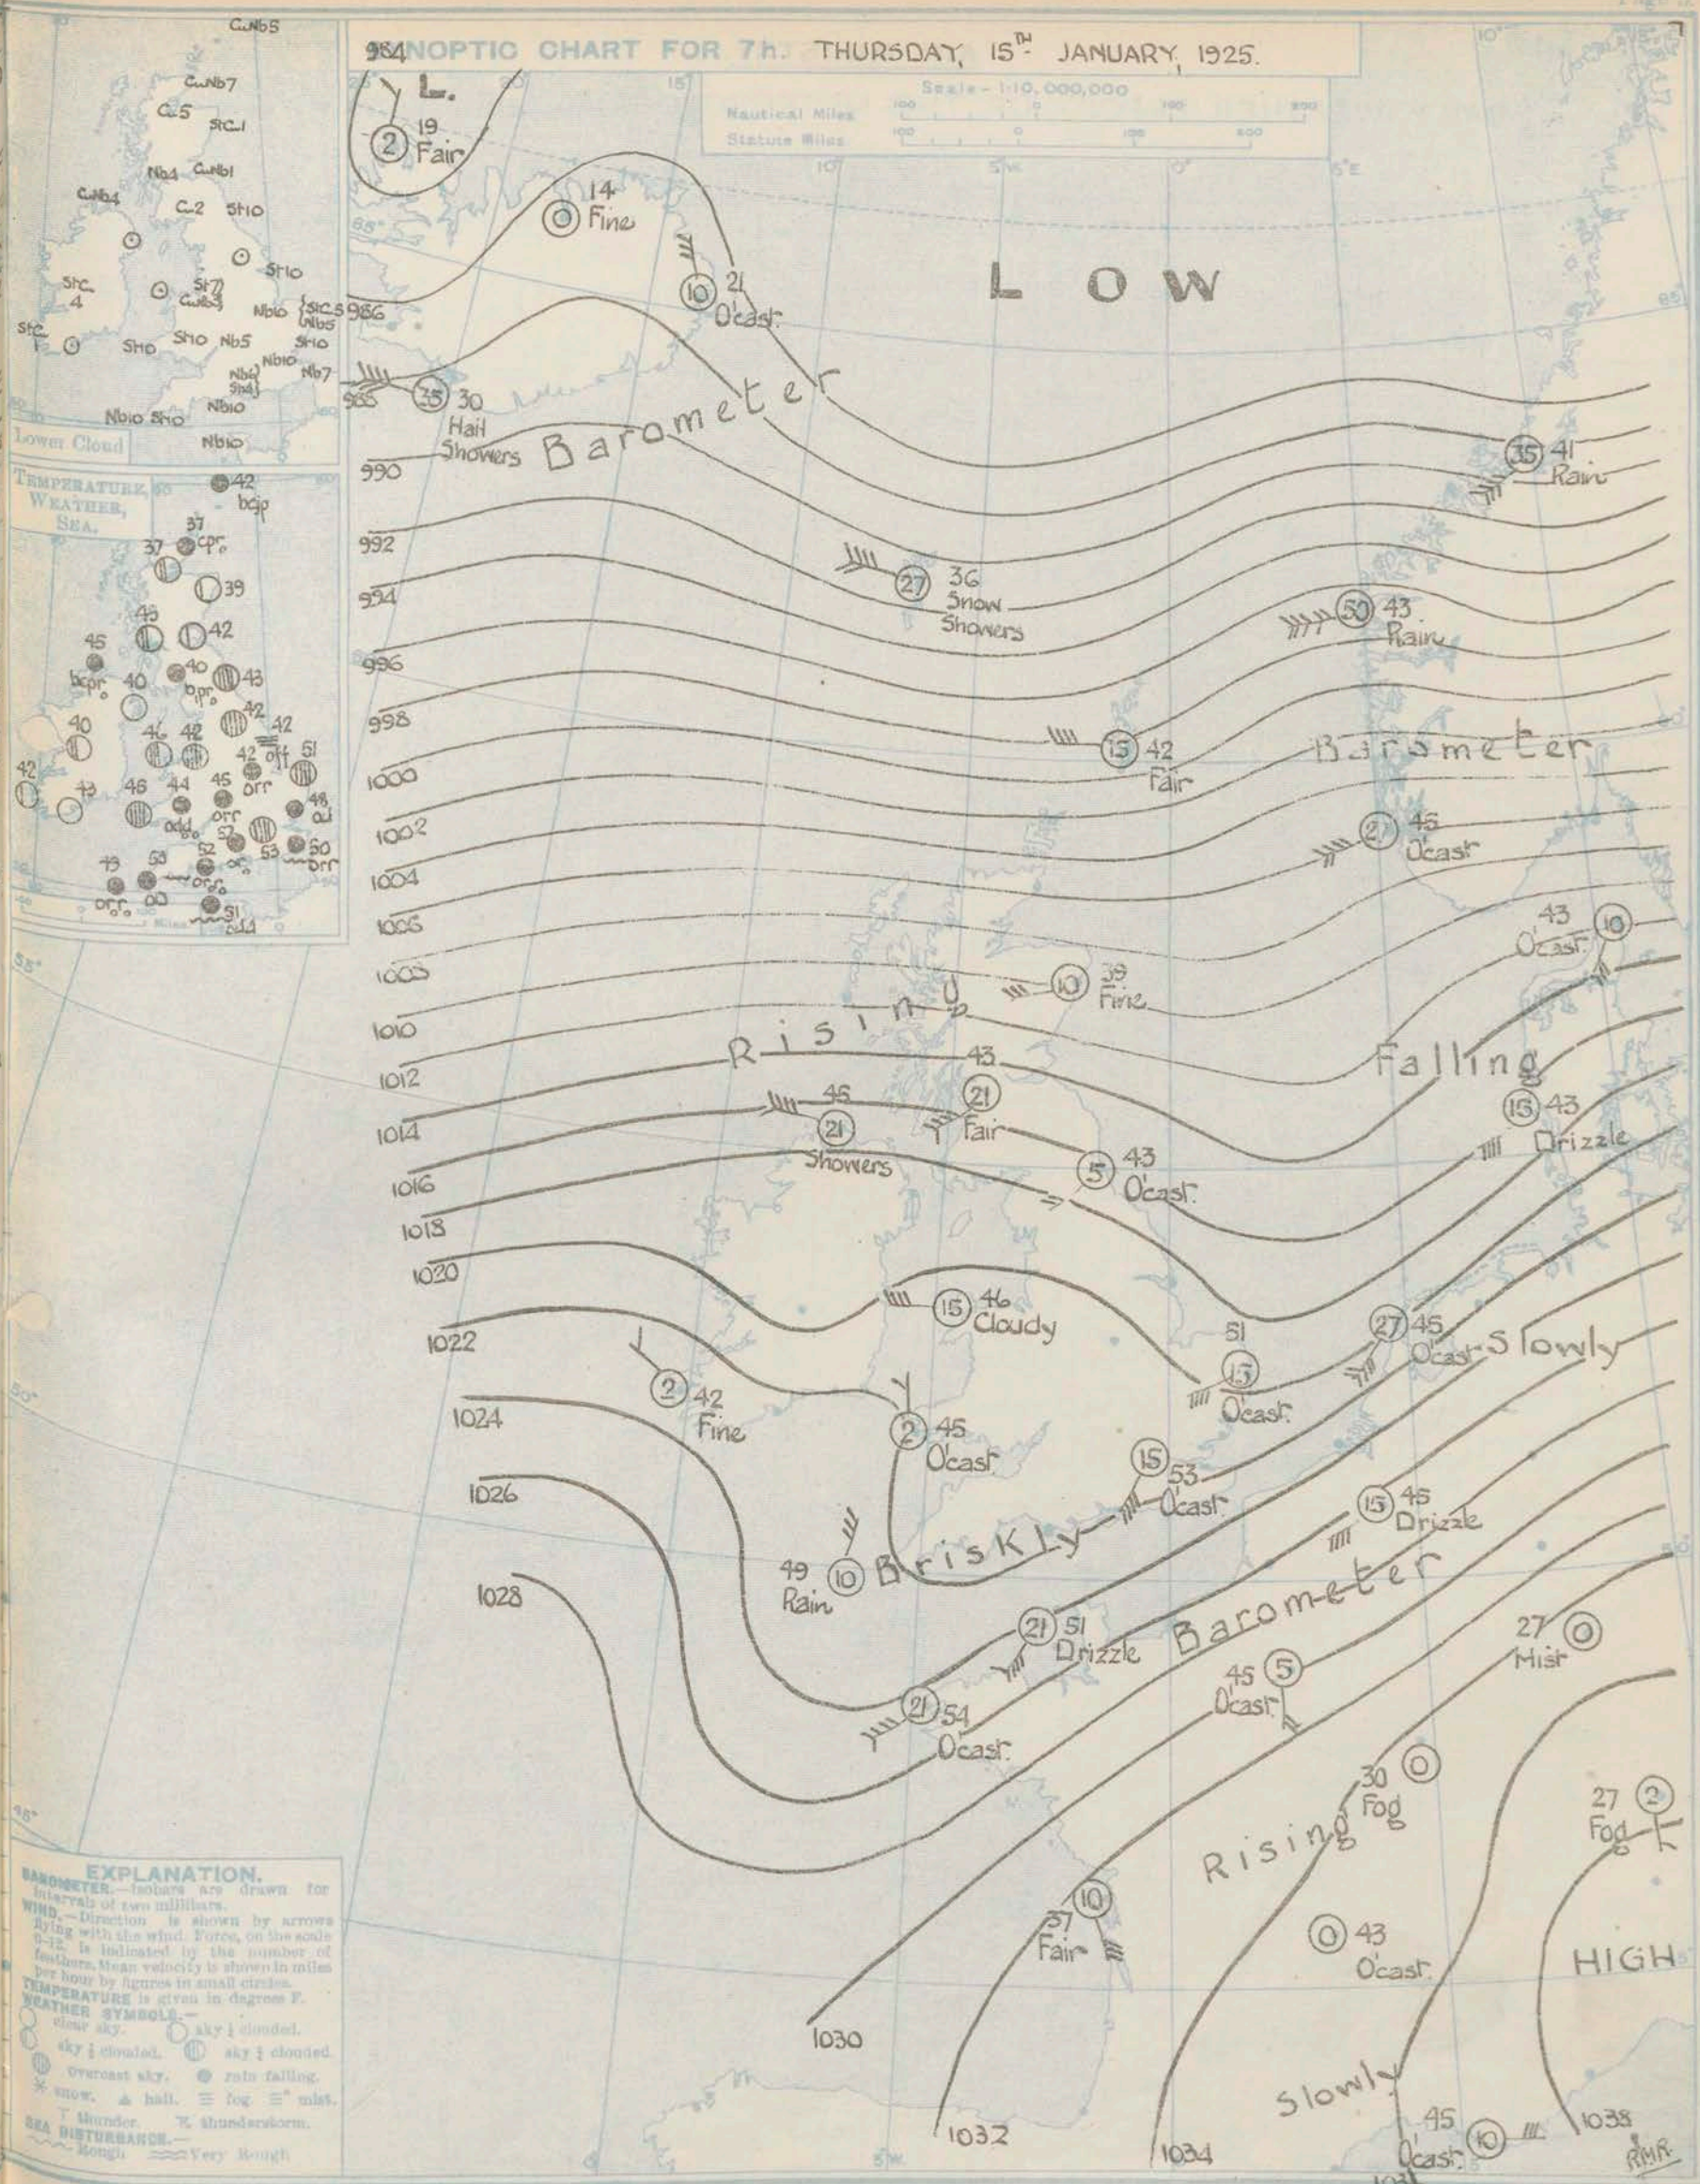

## Districts.

Forecasts for the 24 hours commencing 15h. G.M.T. Thursday 15th January, 1925.

## Further Outlook.

**EXPLANATION.**  
**BAROMETER.**—features are drawn for intervals of two millibars.  
**WIND.**—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
**TEMPERATURE** is given in degrees F.  
**WEATHER SYMBOLS.**—  
 ☉ clear sky. ☁ sky cloudy.  
 ☁ sky cloudy. ☁ sky cloudy.  
 ☁ Overcast sky. ☁ rain falling.  
 \* snow. \* hail. ☁ fog " mist.  
 T Thunder. T Thunderstorm.  
**SEA DISTURBANCE.**  
 ~~~~~ Rough. ~~~~~ Very Rough

| 1st January, 1924. | | | | | | | | | | | | | | | b blue sky (not more than a quarter covered with cloud).
bc sky partly cloudy (one half covered).
c generally cloudy (three-quarters covered).
d drizzle. e wet air. g gloomy.
f fog, visibility 200-1000 m.
F thick fog, " less than 200 m.
m mist, " 1000-16000 m.
h hail. i intermittent.
jp precipitation within sight of station.
KQ line squall. l lightning.
o overcast sky. p passing showers.
q squally. r rain. s snow.
re sleet. t thunder.
u ugly, threatening sky.
v unusual visibility. w dew. | | | | | | | | | | | | | | | x bore frost. y dry air.
z dust haze; the turbid atmosphere of dry weather.
h(r)="hail" or "rain and hail."
Capital letters indicate intense; suffix o indicates slight; repetition of letters indicates continuity.
R = heavy rain. r = slight rain.
rr = continuous rain.
SYMBOLS.
< = (less than (for cloud height).
@ = (before (for precipitation).
☉ = solar halo. ☽ = lunar halo.
☼ = with present weather is combined, whenever possible, the general character of the weather.
A "solidus" divides actual existing weather from preceding conditions, thus: bc/r = fair weather after rain.
- = has decreased + = has increased. | | | | | | | | | | | | | | | 0=Dense fog at 50 yards.
1. Thick fog 320 "
2. Fog 550 "
3. Moderate fog 1,100 "
4. Mist or haze 15 miles.
5. Poor visibility. 24 "
6. Moderate 51 "
7. Good 124 "
8. Very good 311 "
9. Excellent visibility, beyond 311 " | | | | | | | | | | | | | | |

GENERAL INFERENCE.

The British Isles lie between a large anticyclone centred over Switzerland and a low pressure system near Iceland. In Scotland and Northern Ireland weather will be unsettled with strong south-westerly winds reaching gale force at times. Light or moderate S. to SW. winds with mainly fair weather apart from rather widespread fog are probable in other districts although slight drizzle may occur locally, on the south coast of England.

Further Outlook.

| Districts. | Forecasts for the 24 hours commencing 15h. GMT. Friday 16th January 1925. | Further Outlook. |
|---------------------------|--|--|
| 1. S.E. England | Wind light, southerly; widespread fog today, probably clearing tomorrow; mainly fair but perhaps very slight coastal drizzle; temperature rising slowly. | Unsettled in the North; mainly fair in the South but some fog. |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | | |
| 5. S.W. England | | |
| 6. South Wales | | |
| 7. North Wales | Wind southwesterly, moderate; mainly fair; moderate visibility; moderate temperature. | South Cone hoisted 14.40 GMT. 15/1/25 |
| 8. N.W. England | | |
| 9. N. Midlands | | |
| 10. N.E. England | Wind southwesterly, fresh or strong; fair to cloudy, some rain or drizzle later; visibility moderate to good; moderate temperature. | |
| 11. E. Scotland | | |
| 12. S.W. Scotland | | |
| 13. Isle of Man | Wind southwesterly, fresh or strong to gale at times; cloudy, occasional rain; visibility good; moderate temperature. | |
| 14. N.N.W. Scotland | | |
| 15. Hebrides | | |
| 16. Orkneys and Shetlands | | |
| 17. N.W. Ireland | | |
| 18. N.E. Ireland | As 11-13 | |
| 19. S.E. Ireland | | |
| 20. S.W. Ireland | | |

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of two millibars.
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.
TEMPERATURE.—Is given in degrees F.
WEATHER SYMBOLS.—
☉ clear sky. ☁ sky & clouded. ☂ sky & clouded. ☔ rain falling. ☎ snow. ⚡ hail. ☄ fog. ☄ mist. ☄ thunder. ☄ thunderstorm.
SEA DISTURBANCE.—
⚡ Rough. ⚡ Very Rough.

| Position | Date and Time | Steamship | Wind | Weather | Temp. |
|----------|-----------------------|-----------|------|---------|-------|
| | | | Dir. | Force | Air |
| 2 | 16 th 1000 | "Scotia" | SE | 3 | C |
| 3 | 17 th 000 | "Dieppe" | W | 2 | O/f |

GENERAL INFERENCE.

Pressure continues lowest to NW. and W. and high to SE. and E. of the British Isles. Winds will be southwesterly, mainly moderate in force but stronger in the West and Northwest. There will be much cloud generally with local drizzle in most districts but any appreciable fall is likely to be confined to the Western and Northwestern seaboard.

| Districts | Forecast for the 24 hours commencing 15h. G.M.T. Saturday, 17th January, 1925. | Further Outlook. |
|---------------------------|---|---|
| 1. S.E. England | Wind southwesterly, moderate; mainly cloudy, perhaps slight local drizzle; some mist in places; mild. | Unsettled in the North; mainly cloudy in the South with some mist or fog but without much rain. |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | | |
| 5. S.W. England | | |
| 6. South Wales | | |
| 7. North Wales | Wind southwesterly, moderate or fresh; cloudy, occasional rain or drizzle; some mist in places; mild. | South Coast still flying. |
| 8. N.W. England | | |
| 9. N. Midlands | | |
| 10. N.E. England | | |
| 11. E. Scotland | | |
| 12. S.W. Scotland | | |
| 13. Isle of Man | Wind southerly, fresh or strong; cloudy, occasional rain or drizzle; moderate visibility; mild. | |
| 14. N.E. N.W. Scotland | | |
| 15. Hebrides | | |
| 16. Orkneys and Shetlands | | |
| 17. N.W. Ireland | As 7 - 13. | |
| 18. N.E. Ireland | | |
| 19. S.E. Ireland | | |
| 20. S.W. Ireland | | |

SYNOPTIC CHART FOR 7h. SATURDAY, 17th JANUARY, 1925.

EXPLANATION.
BAROMETER.—Isobars are drawn for intervals of two millibars.
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.
TEMPERATURE.—Is given in degrees F.
WEATHER SYMBOLS.—
○ clear sky. ○ sky 1 clouded.
⊙ sky 2 clouded. ⊙ sky 3 clouded.
⊙ overcast sky. ⊙ rain falling.
* snow. * hail. ⊙ fog. ⊙ mist.
T thunder. T thunderstorm.
SEA DISTURBANCE.—
— rough. — Very rough.

GENERAL INFERENCE.

An extensive continental anticyclone covers most of the British Isles and depressions are keeping well out over the Atlantic. Winds will be light or moderate from S. or S.W., but stronger at times on the northwestern coasts, and weather mainly fair apart from mist or fog in places.

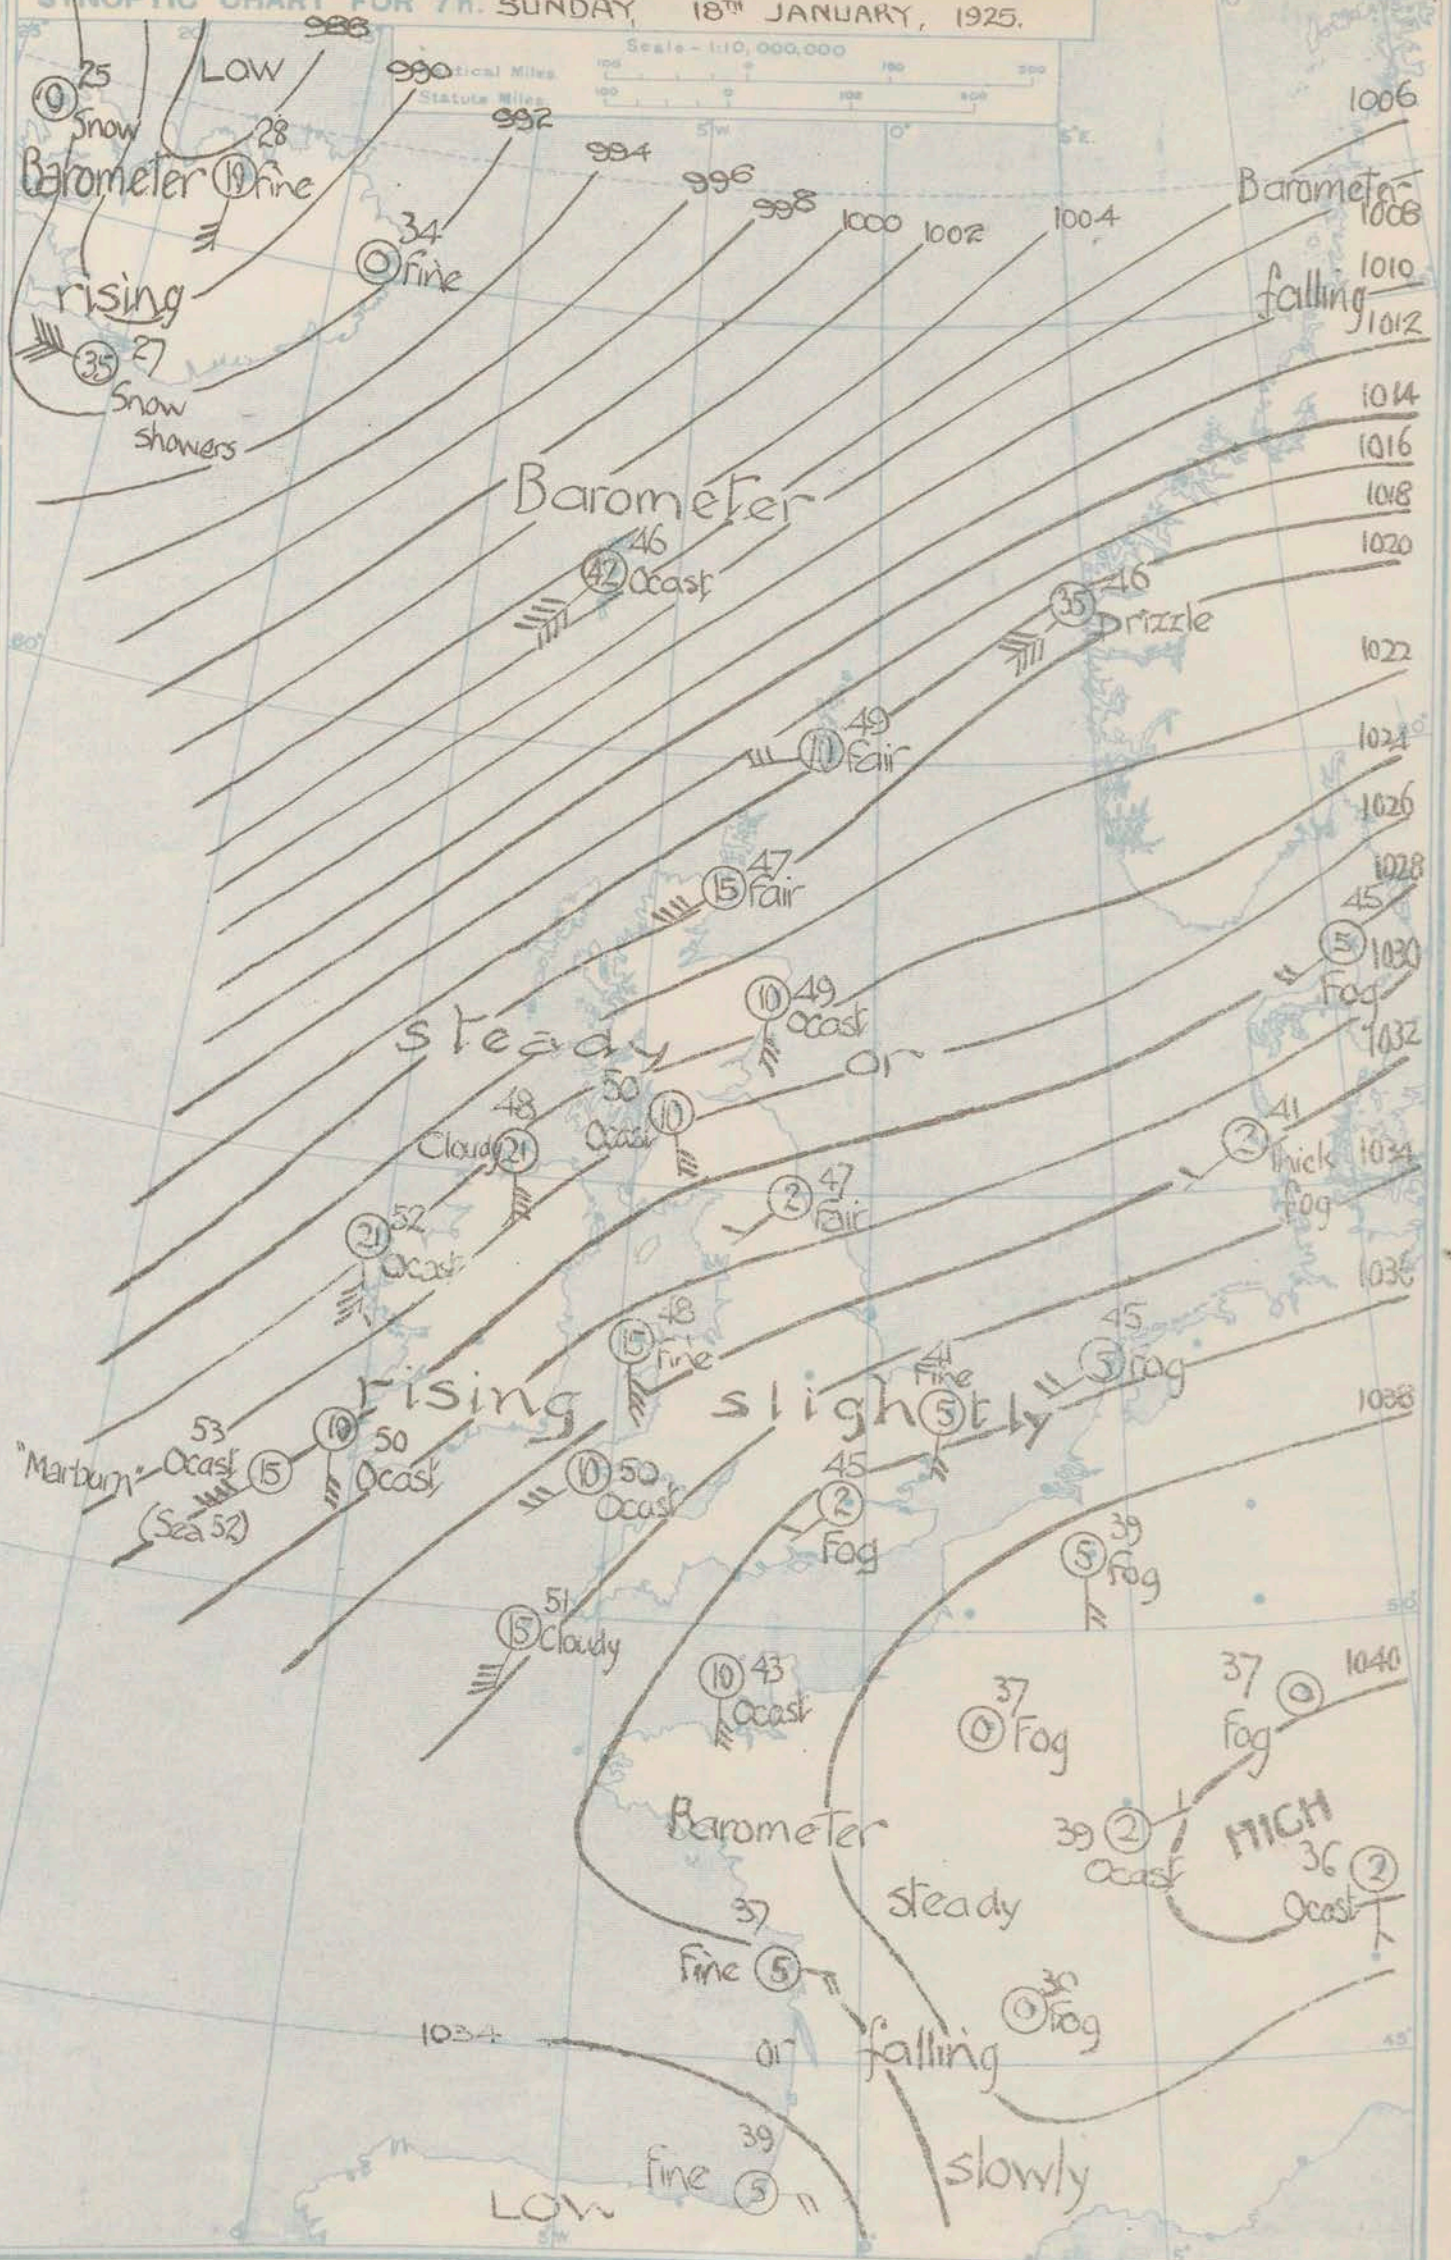

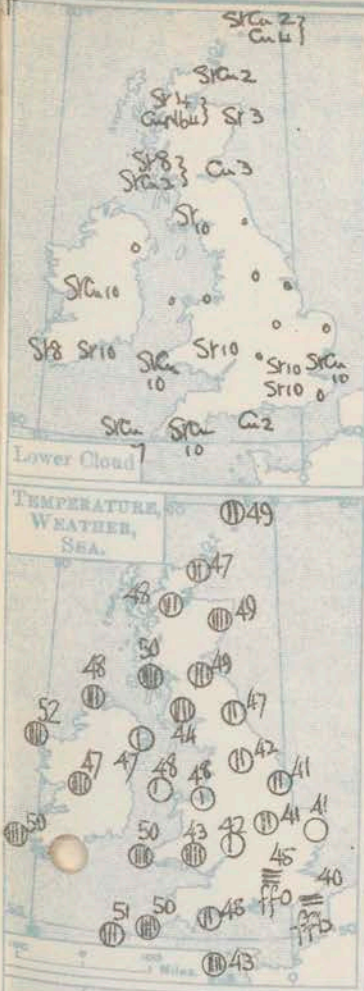

| Districts. | Forecast for the 24 hours commencing 15h. GMT. Sunday, 18th January, 1925. | Further Outlook. |
|---------------------------|--|-----------------------------------|
| 1. S.E. England | Wind S. or S.W., light; varying cloud; some fog or mist; temperature moderate or rather mild. | Similar conditions.
----- |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | | |
| 5. S.W. England | | |
| 6. South Wales | | |
| 7. North Wales | Wind S.W., light or moderate; varying cloud; some morning fog or mist; rather mild. | South Cone still flying.
----- |
| 8. N.W. England | | |
| 9. N. Midlands | | |
| 10. N.E. England | | |
| 11. E. Scotland | | |
| 12. S.W. Scotland | | |
| 13. Isle of Man | Wind S.W., moderate or fresh; varying cloud, some local showers; visibility moderate to good; rather mild. | S.W. |
| 14. N. & N.W. Scotland | | |
| 15. Hebrides | | |
| 16. Orkneys and Shetlands | | |
| 17. N.W. Ireland | | |
| 18. N.E. Ireland | | |
| 19. S.E. Ireland | As 7 - 13. | |
| 20. S.W. Ireland | | |

SYNOPTIC CHART FOR 7h. SUNDAY, 18th JANUARY, 1925.

Scale - 1:10,000,000

Statute Miles

Nautical Miles

EXPLANATION.
BAROMETER.—Isobars are drawn for intervals of two millibars.
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.
TEMPERATURE.—Temperature is given in degrees F.
WEATHER SYMBOLS.—
☉ clear sky. ☁ sky: clouded.
☁ sky: clouded. ☁ sky: clouded.
☁ overcast sky. ☁ rain falling.
☁ snow. ☁ hail. ☁ fog. ☁ mist.
☁ thunder. ☁ thunderstorm.
SEA DISTURBANCE.—
☁ Rough. ☁ Very Rough.

GENERAL INFERENCE.

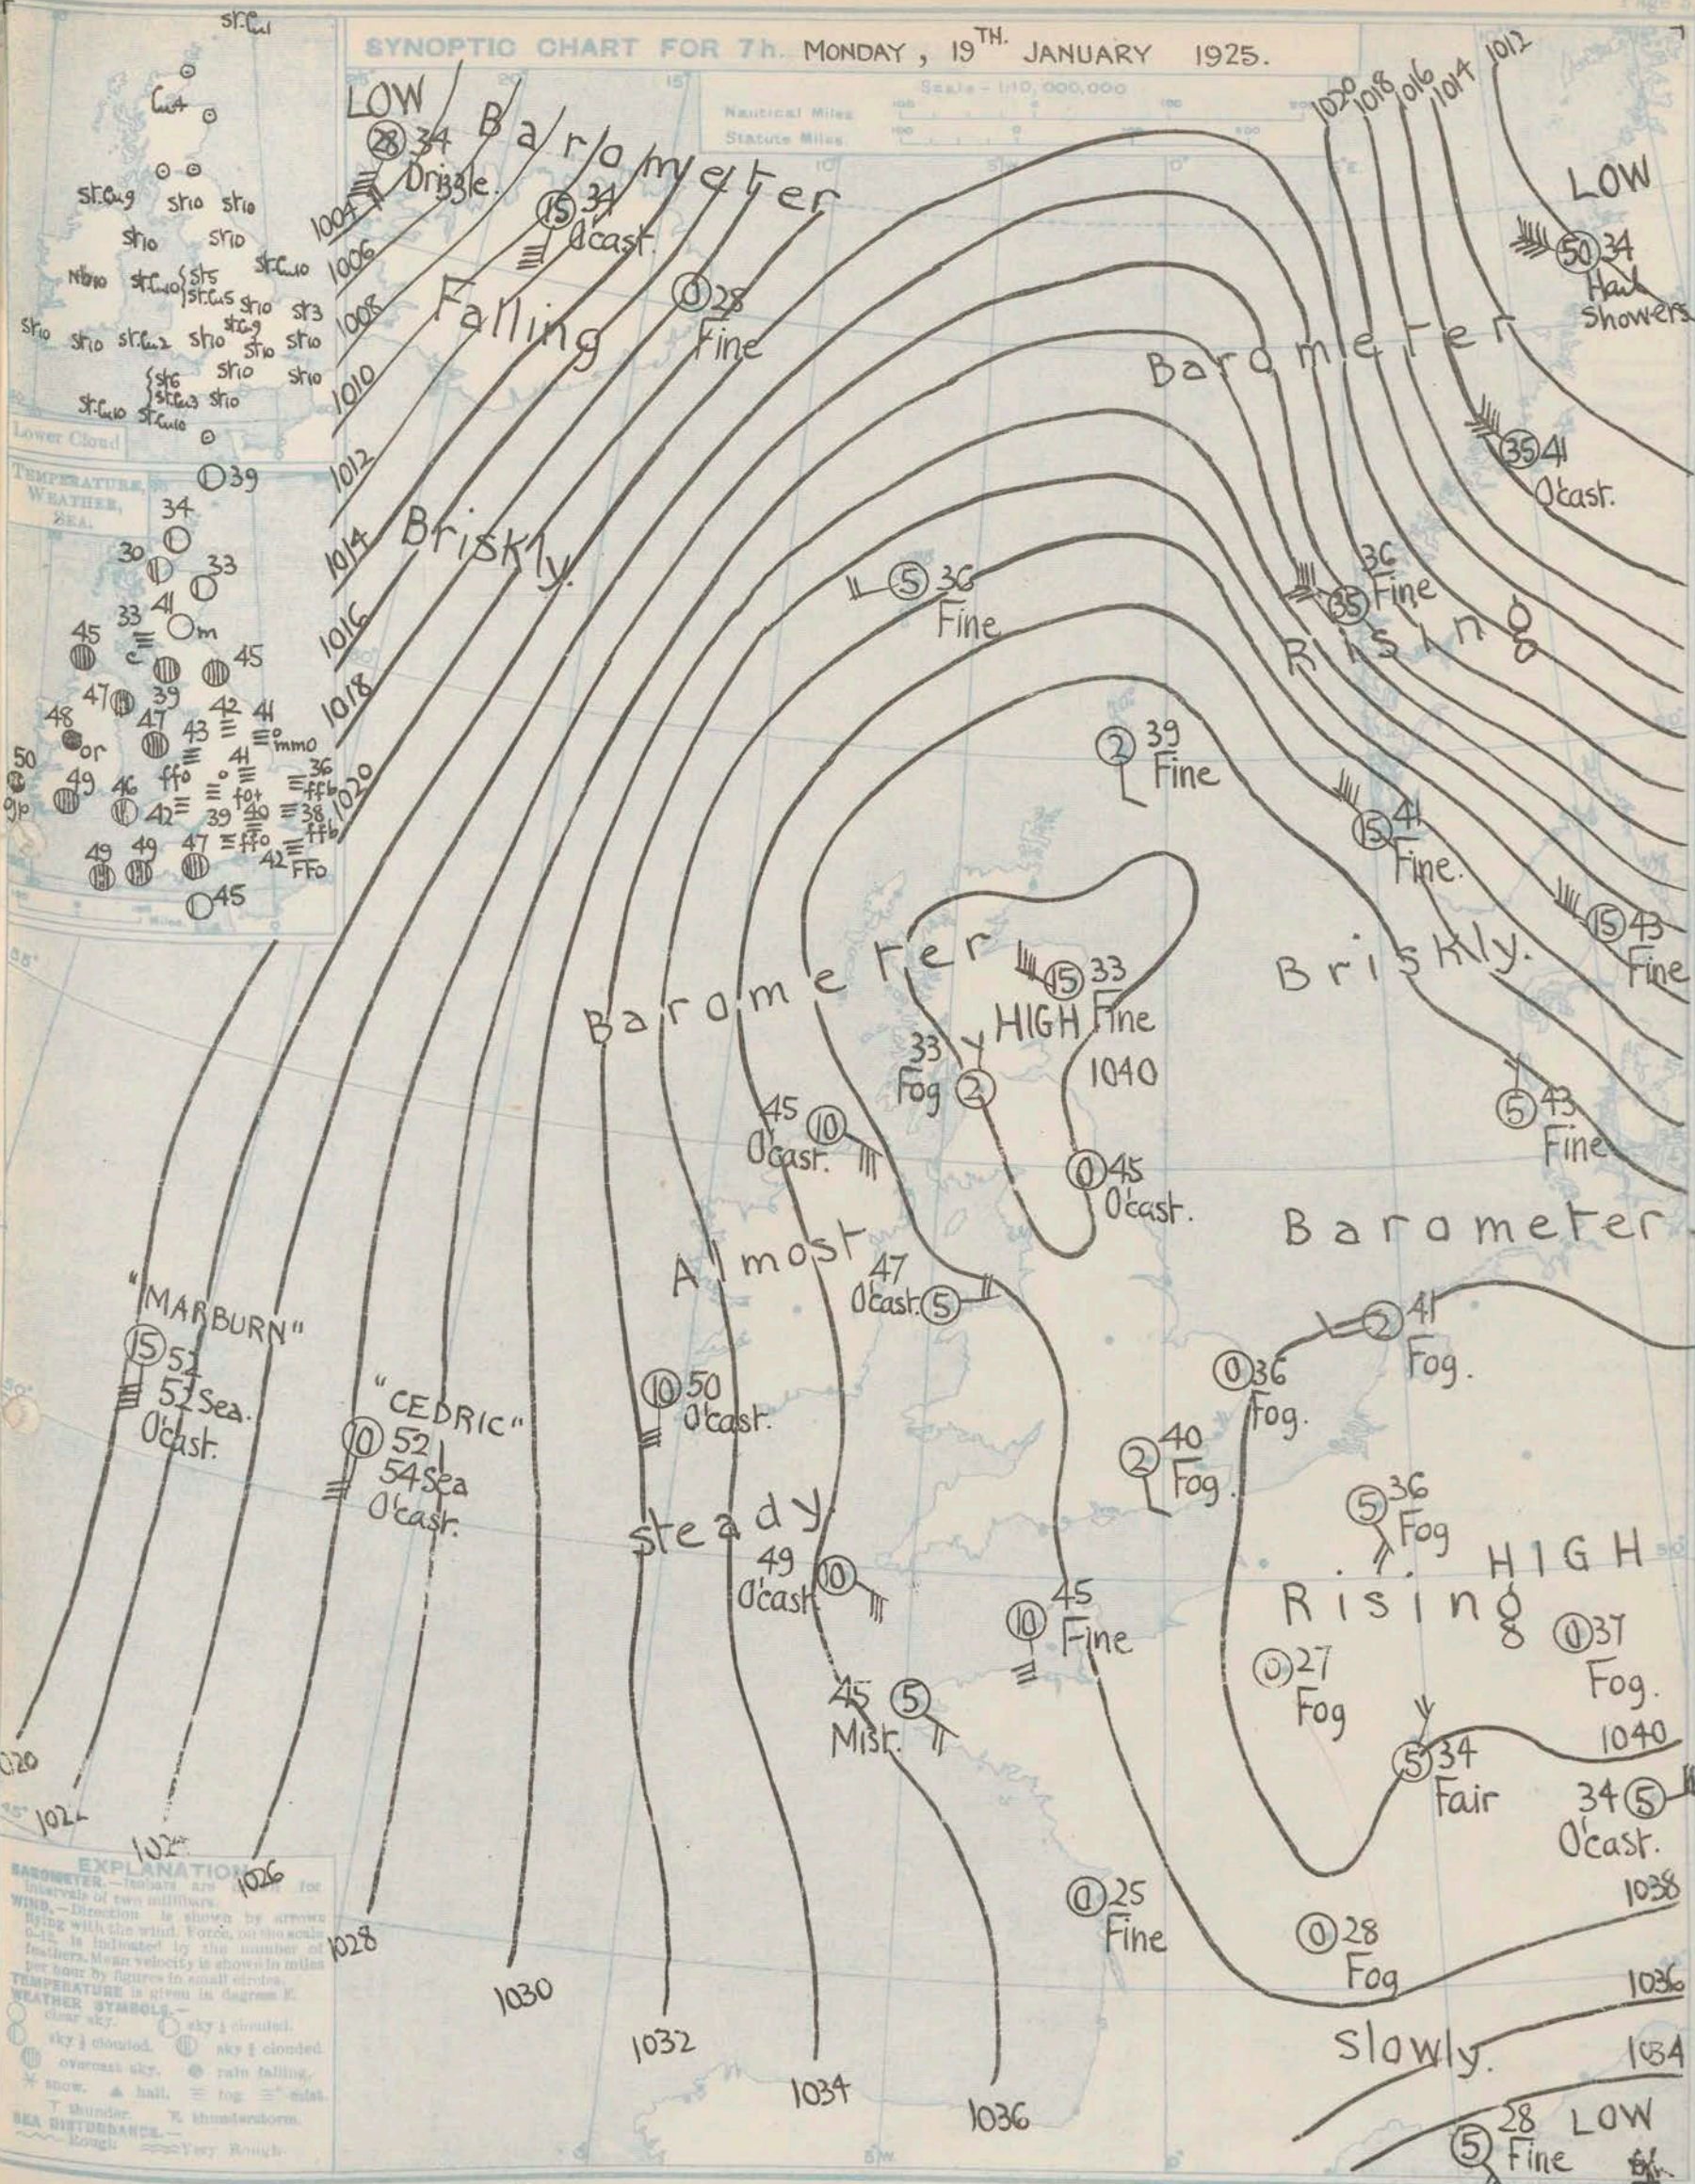

An anticyclone covers most of Europe and the British Isles. Winds will be light and indefinite and the weather mainly cloudy, with local drizzle in the West, and mist or fog over most of England and Scotland.

| Districts. | Forecasts for the 24 hours commencing 15h. G.M.T. Monday, 19th January, 1925. | Further Outlook. |
|---------------------------|--|-------------------------------------|
| 1. S.E. England | Light variable winds; mainly cloudy, mist or fog generally; rather cold. | Wind continuing light; further fog. |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | | |
| 5. S.W. England | Winds from between south and east, light or moderate; mainly cloudy; visibility moderate; moderate temperature. | ----- |
| 6. South Wales | | |
| 7. North Wales | | |
| 8. N.W. England | | |
| 9. N. Midlands | As 1 - 4. | |
| 10. N.E. England | | |

| 12. S.W. Scotland | | |
| 13. Isle of Man | As 5 - 7. | |
| 14. N. & N.W. Scotland | | |
| 15. Hebrides | | |
| 16. Orkneys and Shetlands | | |
| 17. N.W. Ireland | Wind from between south and east, light or moderate; mainly dull, local drizzle; visibility moderate or good; rather mild. | |
| 18. N.E. Ireland | | |
| 19. S.E. Ireland | | |
| 20. S.W. Ireland | | |

SYNOPTIC CHART FOR 7H. MONDAY, 19TH JANUARY 1925.

Scale - 1:10,000,000

Nautical Miles
Statute Miles

EXPLANATION

BAROMETER.—Isobars are drawn at intervals of two millibars.

WIND.—Direction is shown by arrows lying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.

TEMPERATURE is given in degrees F.

WEATHER SYMBOLS.

○ clear sky. ○ sky & clouded.
 ○ sky & clouded. ○ sky & clouded.
 ○ overcast sky. ○ rain falling.
 * snow. * hail. * fog. * mist.
 T thunder. T thunderstorm.

SEA DISTURBANCE.

— Rough. — Very Rough.

AIR MINISTRY.

GENERAL INFERENCE.

A large depression far out on the Atlantic is advancing towards the British Isles and cloudy weather is probable generally with southerly winds of gradually increasing strength. There will probably be mist or fog in most parts of England and Scotland during the next 24 hours subsequently decreasing generally.

| Districts. | Forecast for the 24 hours commencing 15h. G.M.T. Tuesday, 20th January, 1925. | Farther Outlook. |
|---------------------------|--|--|
| 1. S.E. England | Wind southeasterly, light to moderate, freshening later; cloudy; mist or fog, decreasing generally; rather cold to moderate temperature. | Rather stronger southerly winds, less fog. |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | | |
| 5. S.W. England | Wind southerly, moderate to fresh; cloudy; visibility moderate to good; mild. | --- |
| 6. South Wales | | |
| 7. North Wales | | |
| 8. N.W. England | Wind southerly, moderate to fresh; cloudy; mist or fog, decreasing; moderate temperature, becoming milder. | |
| 9. N. Midlands | | |
| 10. N.E. England | | |
| 11. E. Scotland | Wind southerly, fresh to strong at times; cloudy; visibility moderate to good; mild. | |
| 12. S.W. Scotland | | |
| 13. Isle of Man | | |
| 14. N.W. Scotland | Wind southerly, fresh to strong at times; cloudy; visibility moderate to good; mild. | |

GENERAL INFERENCE.

A deep depression between the Azores and Iceland is advancing very slowly towards the British Isles but is not likely to cause any very great changes in the weather over these islands today, cloudy or dull weather with southerly winds continuing.

Further Outlook.

Becoming unsettled in the West and North, little change in the East.

| Districts. | Forecasts for the 24 hours commencing 15h. G.M.T. Wednesday, 21st January, 1925. | Further Outlook. |
|---------------------------|--|------------------|
| 1. S.E. England | Wind S.E. to S., moderate; cloudy to dull, some mist; rather cold to moderate temperature. | |

GENERAL INFERENCE.

A secondary depression south west of Ireland is likely to move north and cause the southerly wind to become stronger for a time in the West and North, with local rain, but over most of England the wind will remain moderate and the weather will be fair to dull and rather cold with some mist.

| Districts. | Forecasts for the 24 hours commencing 15h. G.M.T. Thursday, 22nd January, 1925. | Farther Outlook. |
|---------------------------|---|------------------|
| 1. S.E. England | Wind S.E., light to moderate; fair to dull, misty; rather cold, slight frost locally at night. | |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | Wind between S. and S.E., mainly moderate; fair to dull, some mist; rather cold, perhaps slight frost locally at night. | |
| 5. S.W. England | | |
| 6. South Wales | Wind southerly, strong to high at times; mainly cloudy, visibility moderate or good; moderate temperature to rather mild. | |
| 7. North Wales | | |

GENERAL INFERENCE.

In the rear of the trough of low pressure which is passing northeastwards the weather will be mainly fair over England and Ireland today apart from a few local showers, and will improve in Scotland, but other disturbances are indicated out on the Atlantic and the further outlook is very uncertain.

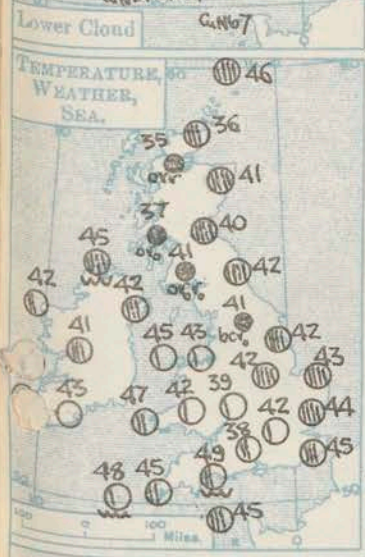

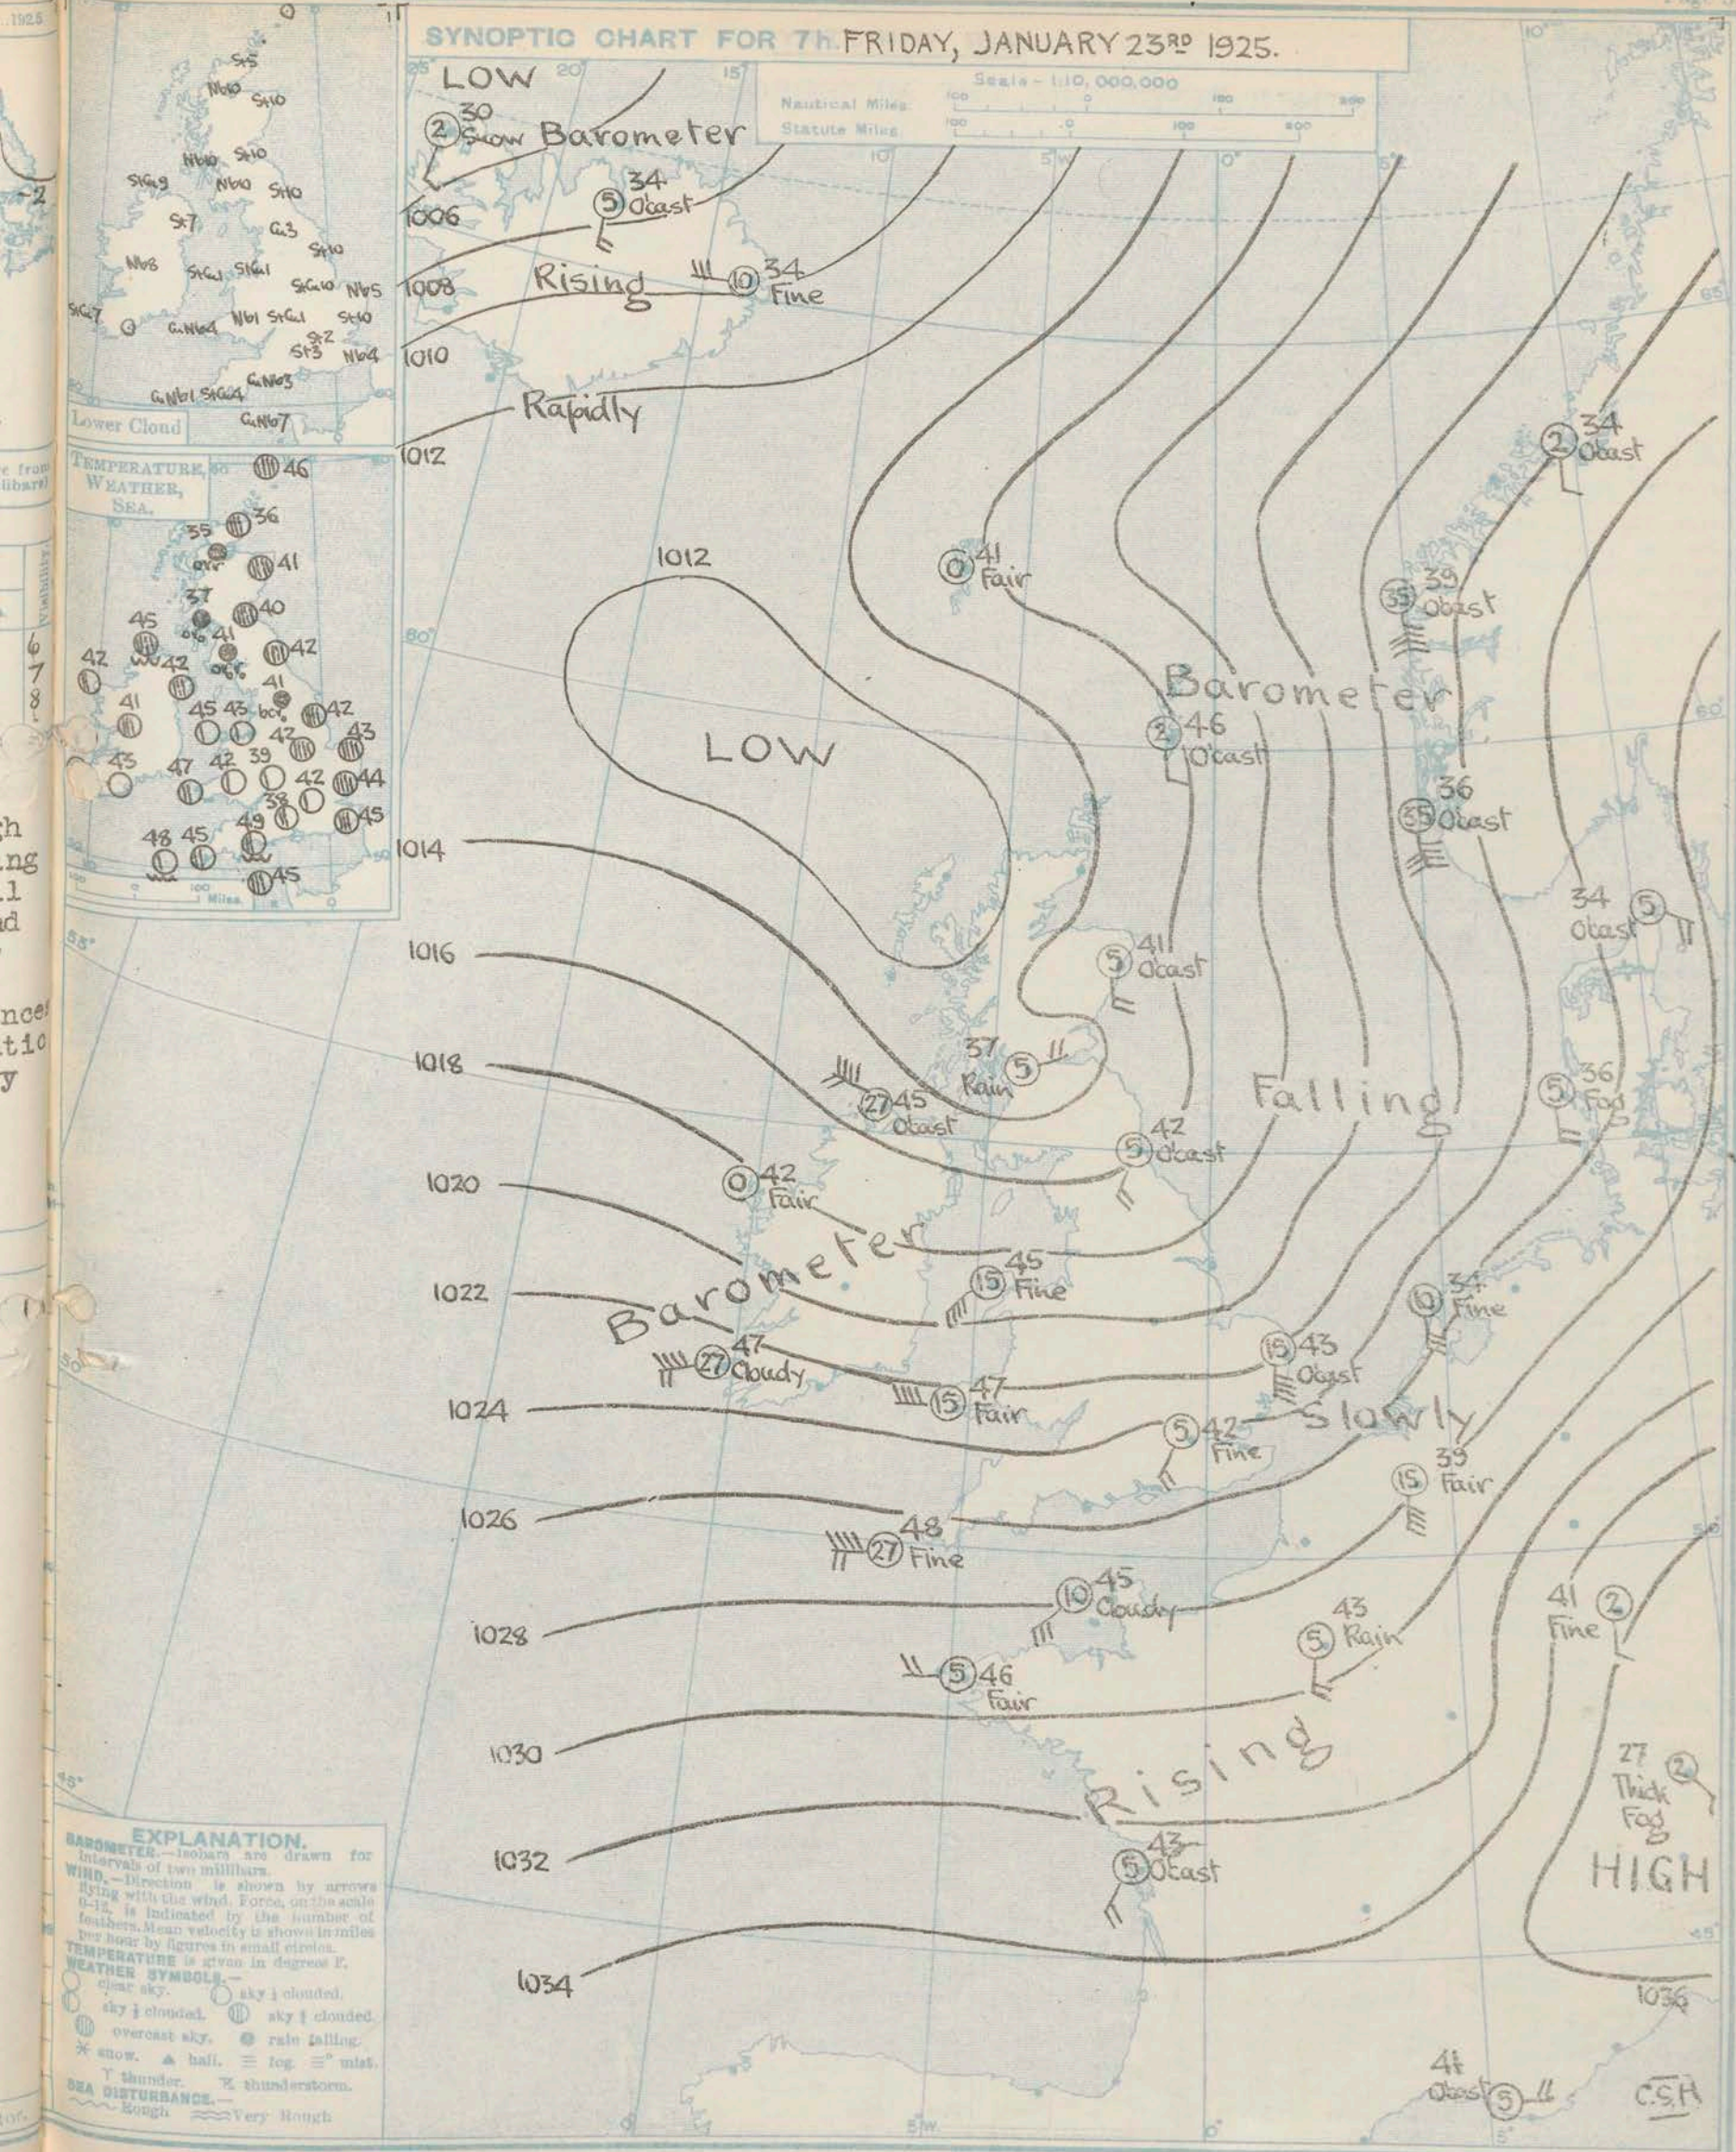

Further Outlook.

Uncertain.

Districts. Forecasts for the 24 hours commencing 15h. G.M.T. Friday, 23rd January, 1925.

| | |
|---------------------------|---|
| 1. S.E. England | Wind S.W. to S., moderate; mainly fair; visibility moderate to good apart from morning mist; moderate temperature. |
| 2. E. England | |
| 3. E. Midlands | |
| 4. W. Midlands | |
| 5. S.W. England | |
| 6. South Wales | Wind S.W. to S., moderate to fresh; fair to dull, a risk of some rain later; visibility good; moderate temperature to mild. |
| 7. North Wales | |
| 8. N.W. England | |
| 9. N. Midlands | |
| 10. N.E. England | As 1 - 4. |
| 11. E. Scotland | |
| 12. S.W. Scotland | |
| 13. Isle of Man | Wind S.W. to S., moderate or fresh, probably becoming stronger later; fair to dull, a risk of some rain later; visibility moderate to good; mild. |
| 14. N. & N.W. Scotland | |
| 15. Hebrides | |
| 16. Orkneys and Shetlands | Wind S.W. to S., moderate, cloudy, occasional rain; moderate temperature. |
| 17. N.W. Ireland | |
| 18. N.E. Ireland | Wind S.W. to S., moderate or fresh; becoming stronger; cloudy to dull, some rain; visibility mainly good; mild. |
| 19. S.E. Ireland | |
| 20. S.W. Ireland | |

SYNOPTIC CHART FOR 7th FRIDAY, JANUARY 23rd 1925.

EXPLANATION.
BAROMETER.—Isobars are drawn for intervals of two millibars.
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.
TEMPERATURE.—is given in degrees F.
WEATHER SYMBOLS.—
☉ clear sky. ☁ sky & clouded.
☁ sky & clouded. ☁ sky & clouded.
☁ overcast sky. ☁ rain falling.
* snow. ▲ hail. ≡ fog ≡ mist.
⚡ thunder. ⚡ thunderstorm.
SEA DISTURBANCE.—
~~~~~ Rough ~~~~~ Very Rough

\* Information for these columns not usually received.

: The barometric change is expressed in half millibars.

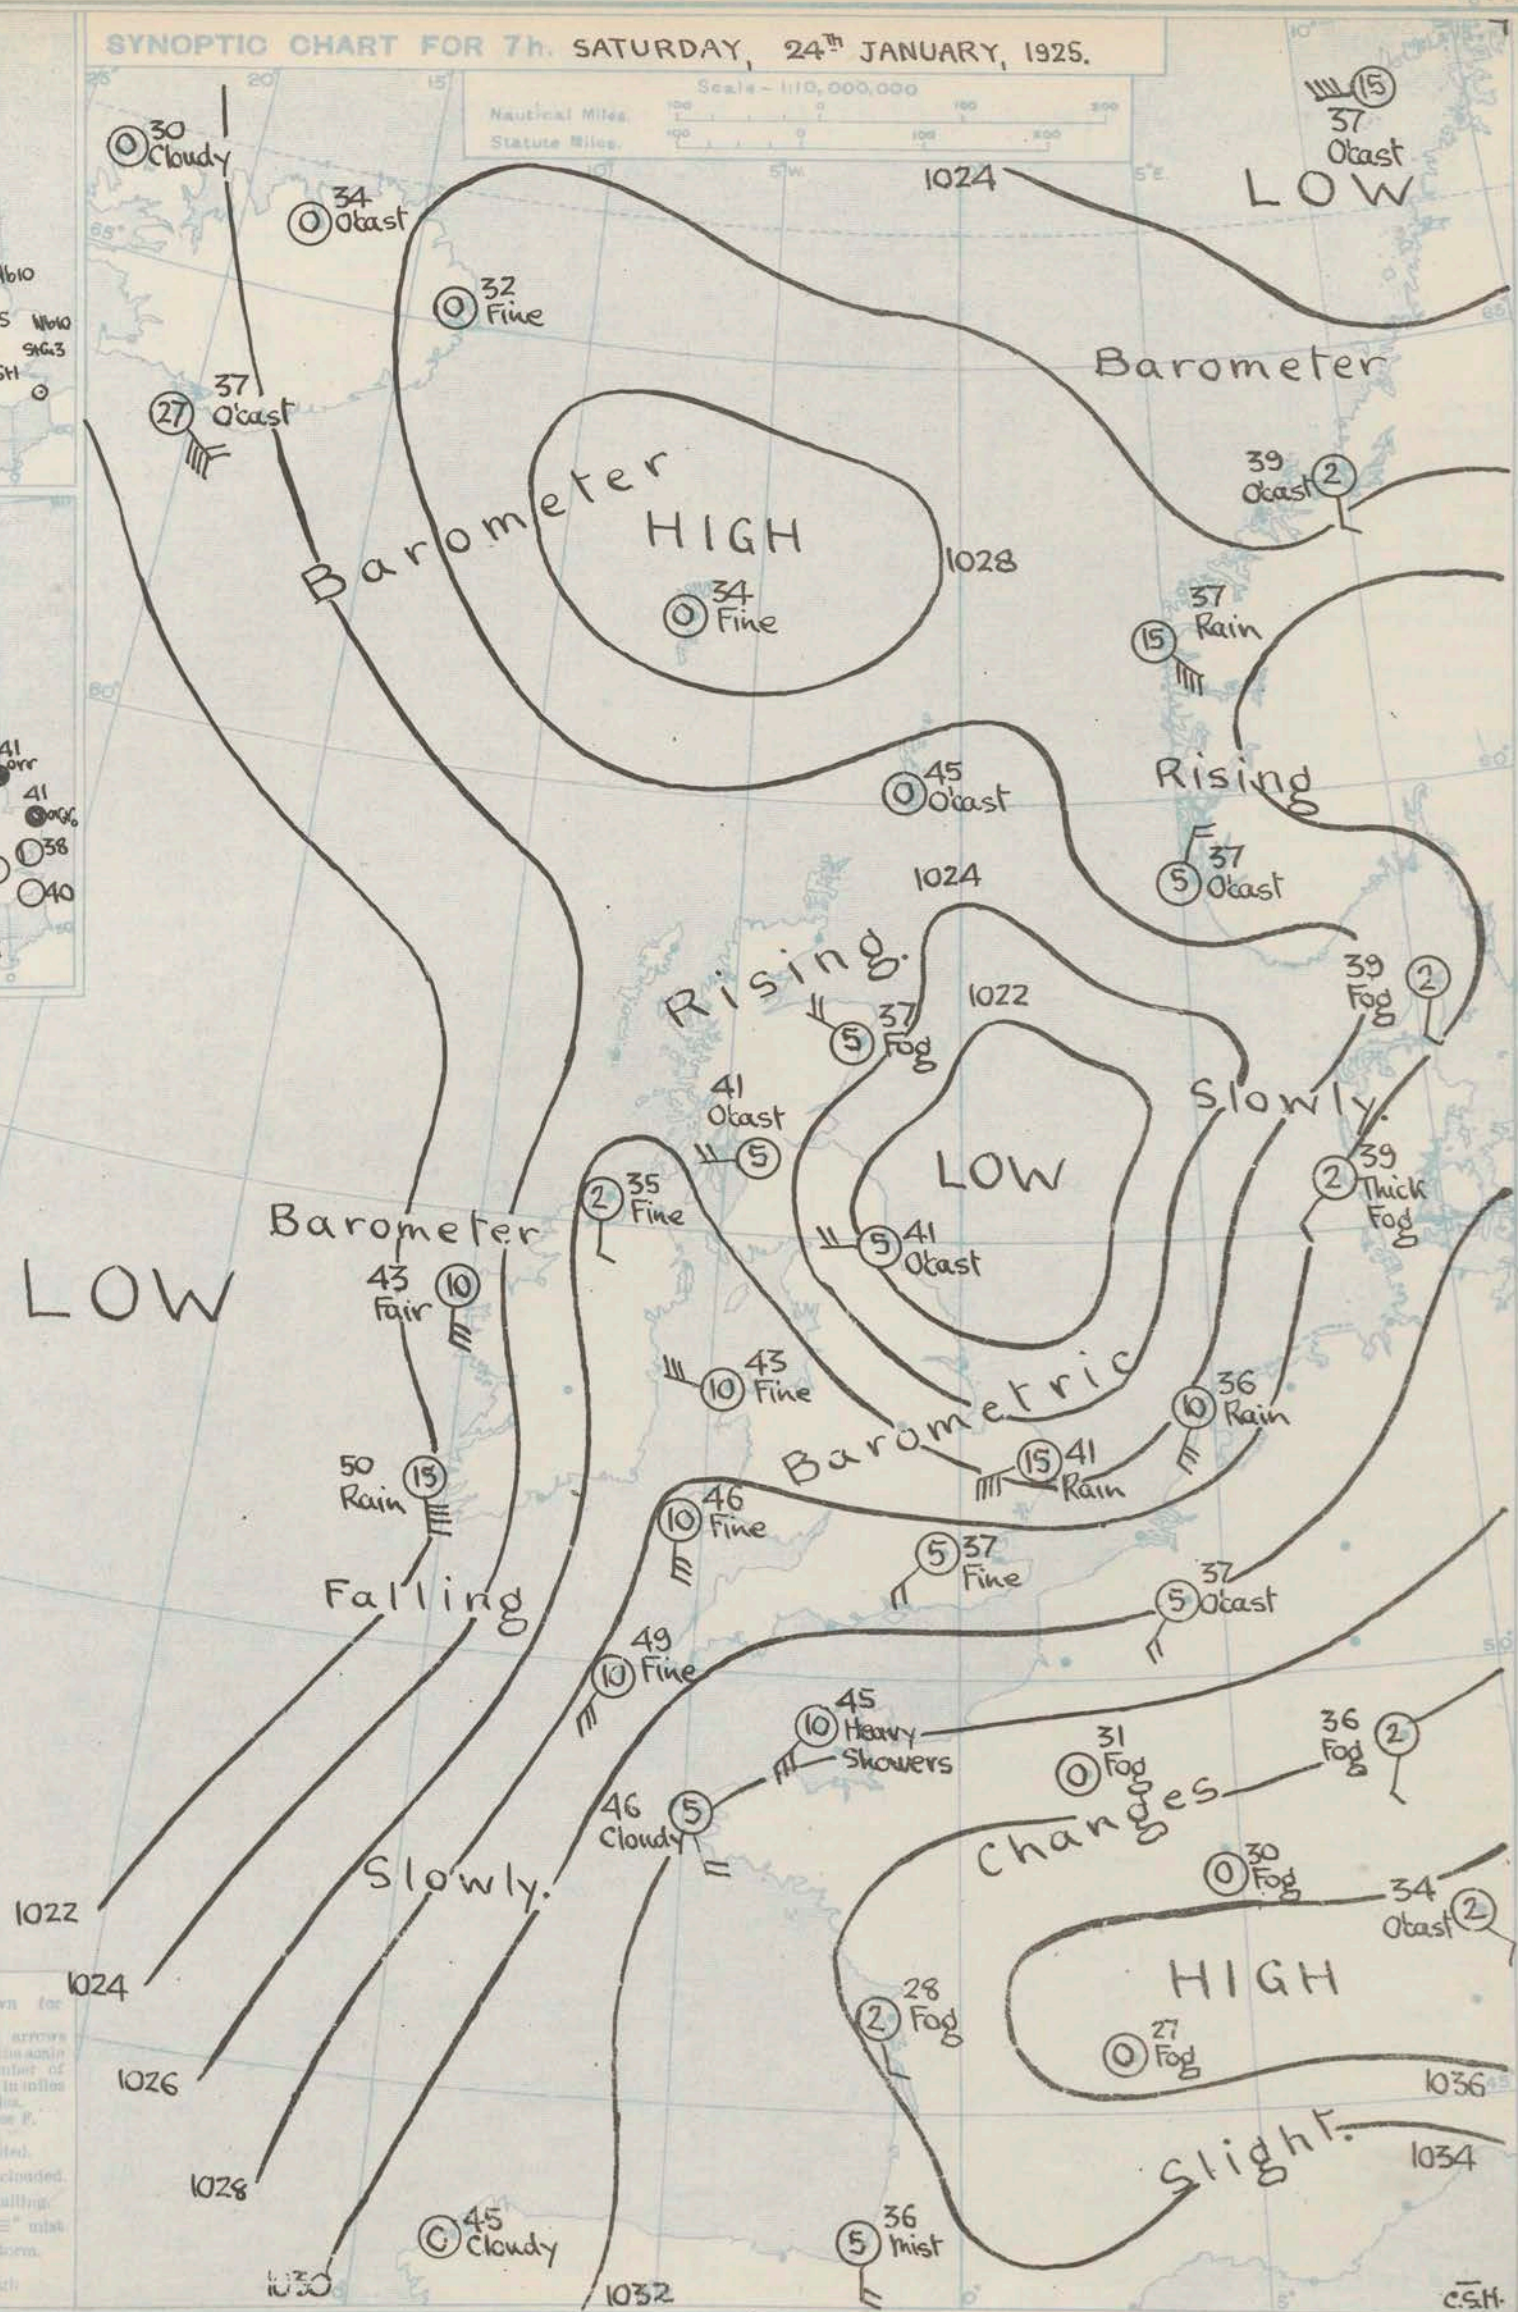

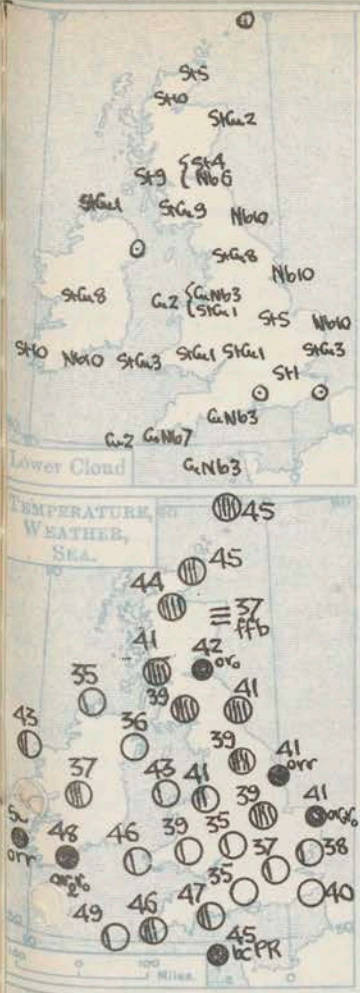

24<sup>th</sup> JAN 1925

SYNOPTIC CHART FOR 7h. SATURDAY, 24<sup>th</sup> JANUARY, 1925.

Scale - 1/10,000,000  
Nautical Miles  
Statute Miles

**EXPLANATION.**  
BAROMETER.—Isobars are drawn for intervals of two millibars.  
WIND.—Direction is shown by arrows flying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE.—is given in degrees F.  
WEATHER SYMBOLS.—  
☉ sky; clear sky. ☁ sky; cloudy. ☂ sky; overcast sky. ☔ rain falling. \* snow. ▲ hail. ≡ fog. ≡ mist. T thunder. K thunderstorm.  
SEA DISTURBANCE.—  
— Rough — Very Rough

## GENERAL INFERENCE.

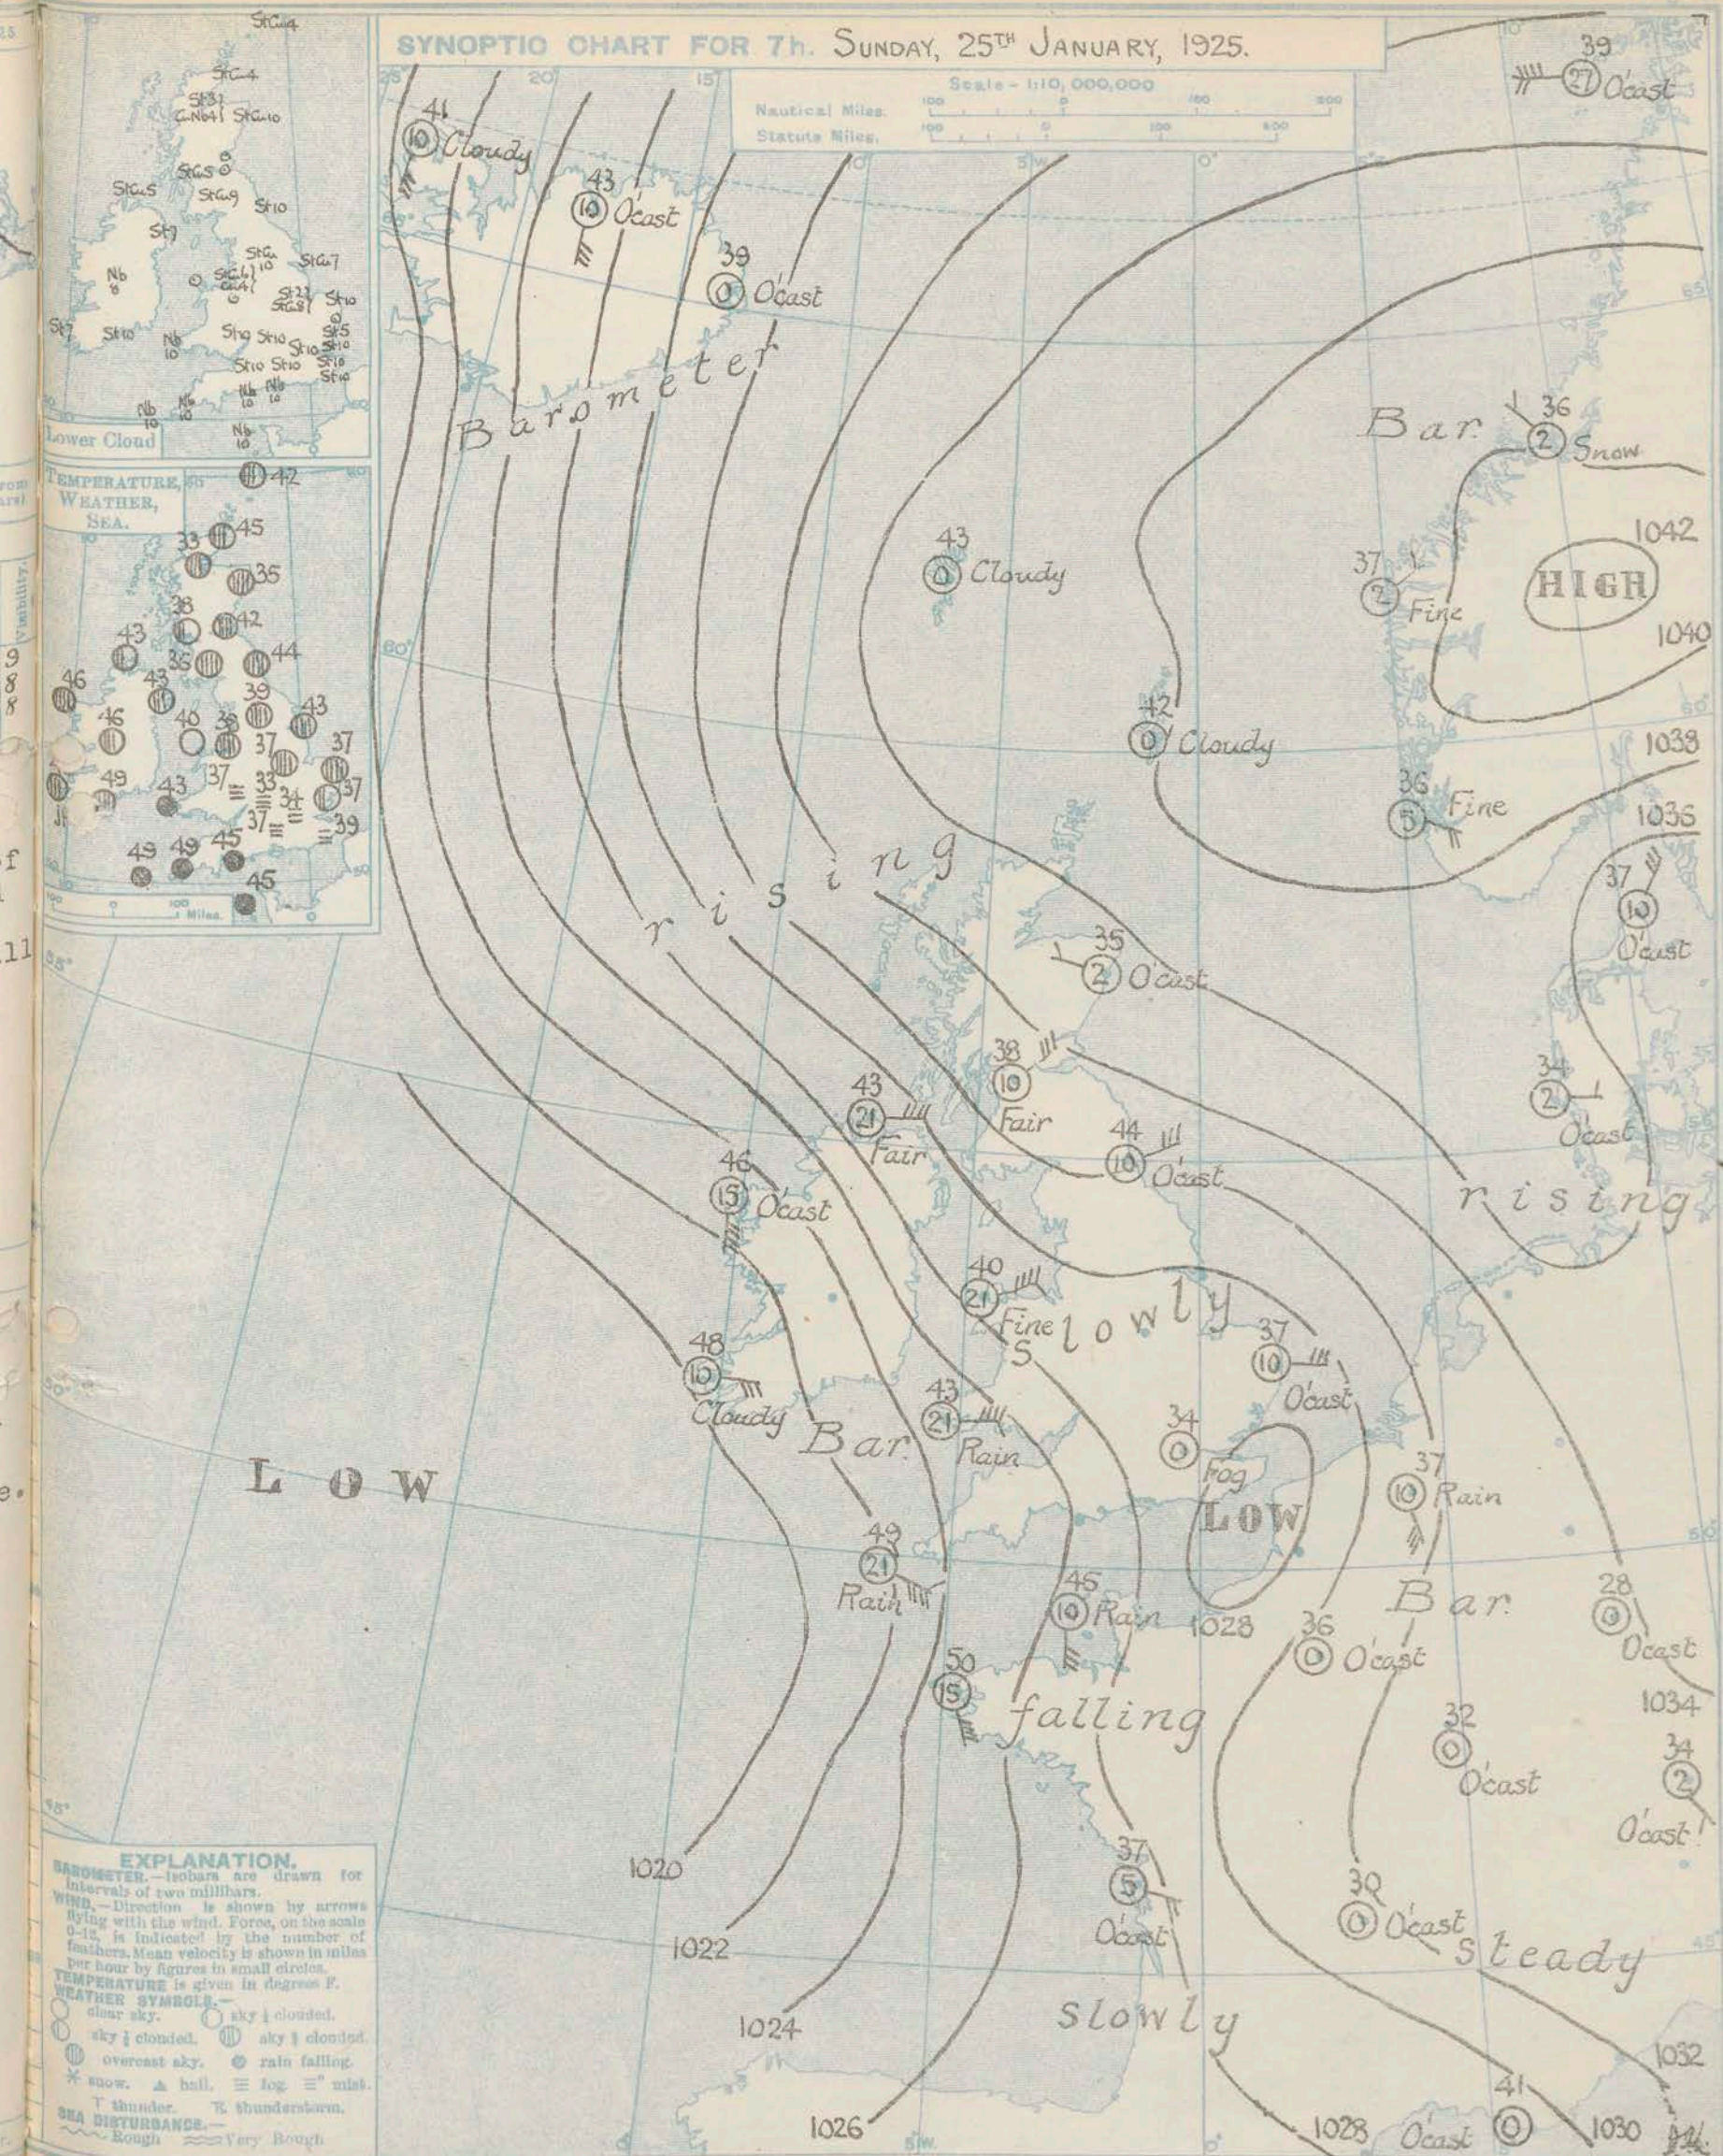

An anticyclone northward of Scotland is spreading south and a shallow depression lies over the Eastern Channel. Winds will be mainly easterly light or moderate, and weather cloudy to fair. Temperature will be rather low in the North, and moderate to rather low in the South.

## Further Outlook.

Easterly winds, mainly fair, rather low temperature.

| Districts.                | Forecasts for the 24 hours commencing 15h. GMT. Sunday, 25th January, 1925.                                                    |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind light variable, becoming easterly; dull to cloudy; mist in places, perhaps local fog; moderate to rather low temperature. |
| 2. E. England             |                                                                                                                                |

## GENERAL INFERENCE.

A large anticyclone over Scandinavia is likely to move slowly southeastward. Winds over the British Isles will be between E. and S.E. for a day or two, strong at times in the English Channel. Weather will be mainly dull, but fair locally in the Northwest. Some further rain is probable in S.W. England. Temperature will be rather low, but frost is not expected.

| Districts.                | Forecasts for the 24 hours commencing 15h. GMT. Monday, 26th January, 1925.                                                   |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Moderate easterly wind; dull; some mist; rather cold.                                                                         |
| 2. E. England             |                                                                                                                               |
| 3. E. Midlands            |                                                                                                                               |
| 4. W. Midlands            |                                                                                                                               |
| 5. S.W. England           | Wind E. to S.E., strong locally; dull, some rain, improving; visibility moderate; rather cold.                                |
| 6. South Wales            |                                                                                                                               |
| 7. North Wales            |                                                                                                                               |
| 8. N.W. England           |                                                                                                                               |
| 9. N. Midlands            | Wind E. to S.E., light or moderate; mainly cloudy to dull; local mist; rather cold.                                           |
| 10. N.E. England          |                                                                                                                               |
| 11. E. Scotland           |                                                                                                                               |

**GENERAL INFERENCE.**

The Scandinavian anticyclone is decreasing in intensity, and a trough of low pressure off our S.W. coasts will probably move slowly northeastward over the British Isles. Winds will be southeasterly at first, veering by tomorrow in the southern districts. Rain will fall in many places, but in the northern districts will be limited today to showers near the E. coast. Temperature will be rather low, but will rise somewhat in the South.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Tuesday, 27th January, 1925.                                                        |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | <u>To-day.</u>                                                                                                                        |

# SYNOPTIC CHART FOR 7h. TUESDAY, 27<sup>th</sup> JANUARY, 1925.

Scale - 1:10,000,000

Nautical Miles  
Statute Miles

**EXPLANATION.**  
 BAROMETER.—Isobars are drawn at intervals of two millibars.  
 WIND.—Direction is shown by arrow pointing with the wind. Force, on the scale, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
 TEMPERATURE.—Temperature is given in degrees F.  
 WEATHER SYMBOLS.—  
 ☉ sky; clear. ☁ sky; cloudy. ☂ sky; overcast. ☔ rain falling. \* snow. \* hail. ≡ fog. ≡ mist. T thunder. T thunderstorm.  
 SEA DISTURBANCE.—

GENERAL INFERENCE.

A deep depression centred between Iceland and Northern Ireland is moving eastwards. Strong southwesterly winds or gales are probable at first with dull, rainy, mild weather followed by squally westerly winds with brighter intervals but showers of hail and perhaps thunder locally.

| Districts. | Forecasts for the 24 hours commencing 15h. G.M. Thursday, 29th January 1925. | Further Outlook. |
|---------------------------|--|--|
| 1. S.E. England | Wind S.W., strong to gale, veering to west later; cloudy and rainy at first, brighter intervals, showers of hail or rain later; mild then colder; visibility moderate to good. | Very unsettled.

GENERAL INFERENCE.

A depression over the Atlantic northwest of Ireland is moving east or northeast. Winds will be southwest to west, strong to gale and further rain is probable in all districts followed by some brighter intervals tomorrow.

| Districts. | Forecasts for the 24 hours commencing 15h. G.M.T. Friday, 30th January, 1925. | Further Outlook. |
|---------------------------|---|------------------------------------|
| 1. S.E. England | Wind southwest, fresh to strong or high locally; cloudy, occasional drizzle or light rain; moderate or good visibility; mild. | Unsettled. |
| 2. E. England | | |
| 3. E. Midlands | | |
| 4. W. Midlands | | |
| 5. S.W. England | | |
| 6. South Wales | | |
| 7. North Wales | Wind southwest to west, strong to gale; cloudy, some rain, brighter intervals tomorrow; visibility moderate to good; mild, becoming colder again. | South Cone still flying all coasts |
| 8. N.W. England | | |
| 9. N. Midlands | | |

EXPLANATION.

BAROMETER.—Isobars are drawn for intervals of two millibars.
WIND.—Direction is shown by arrows pointing with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.
TEMPERATURE.—Is given in degrees F.
WEATHER SYMBOLS.

* Information for these columns not usually received.

The barometric change is expressed in half millibars.

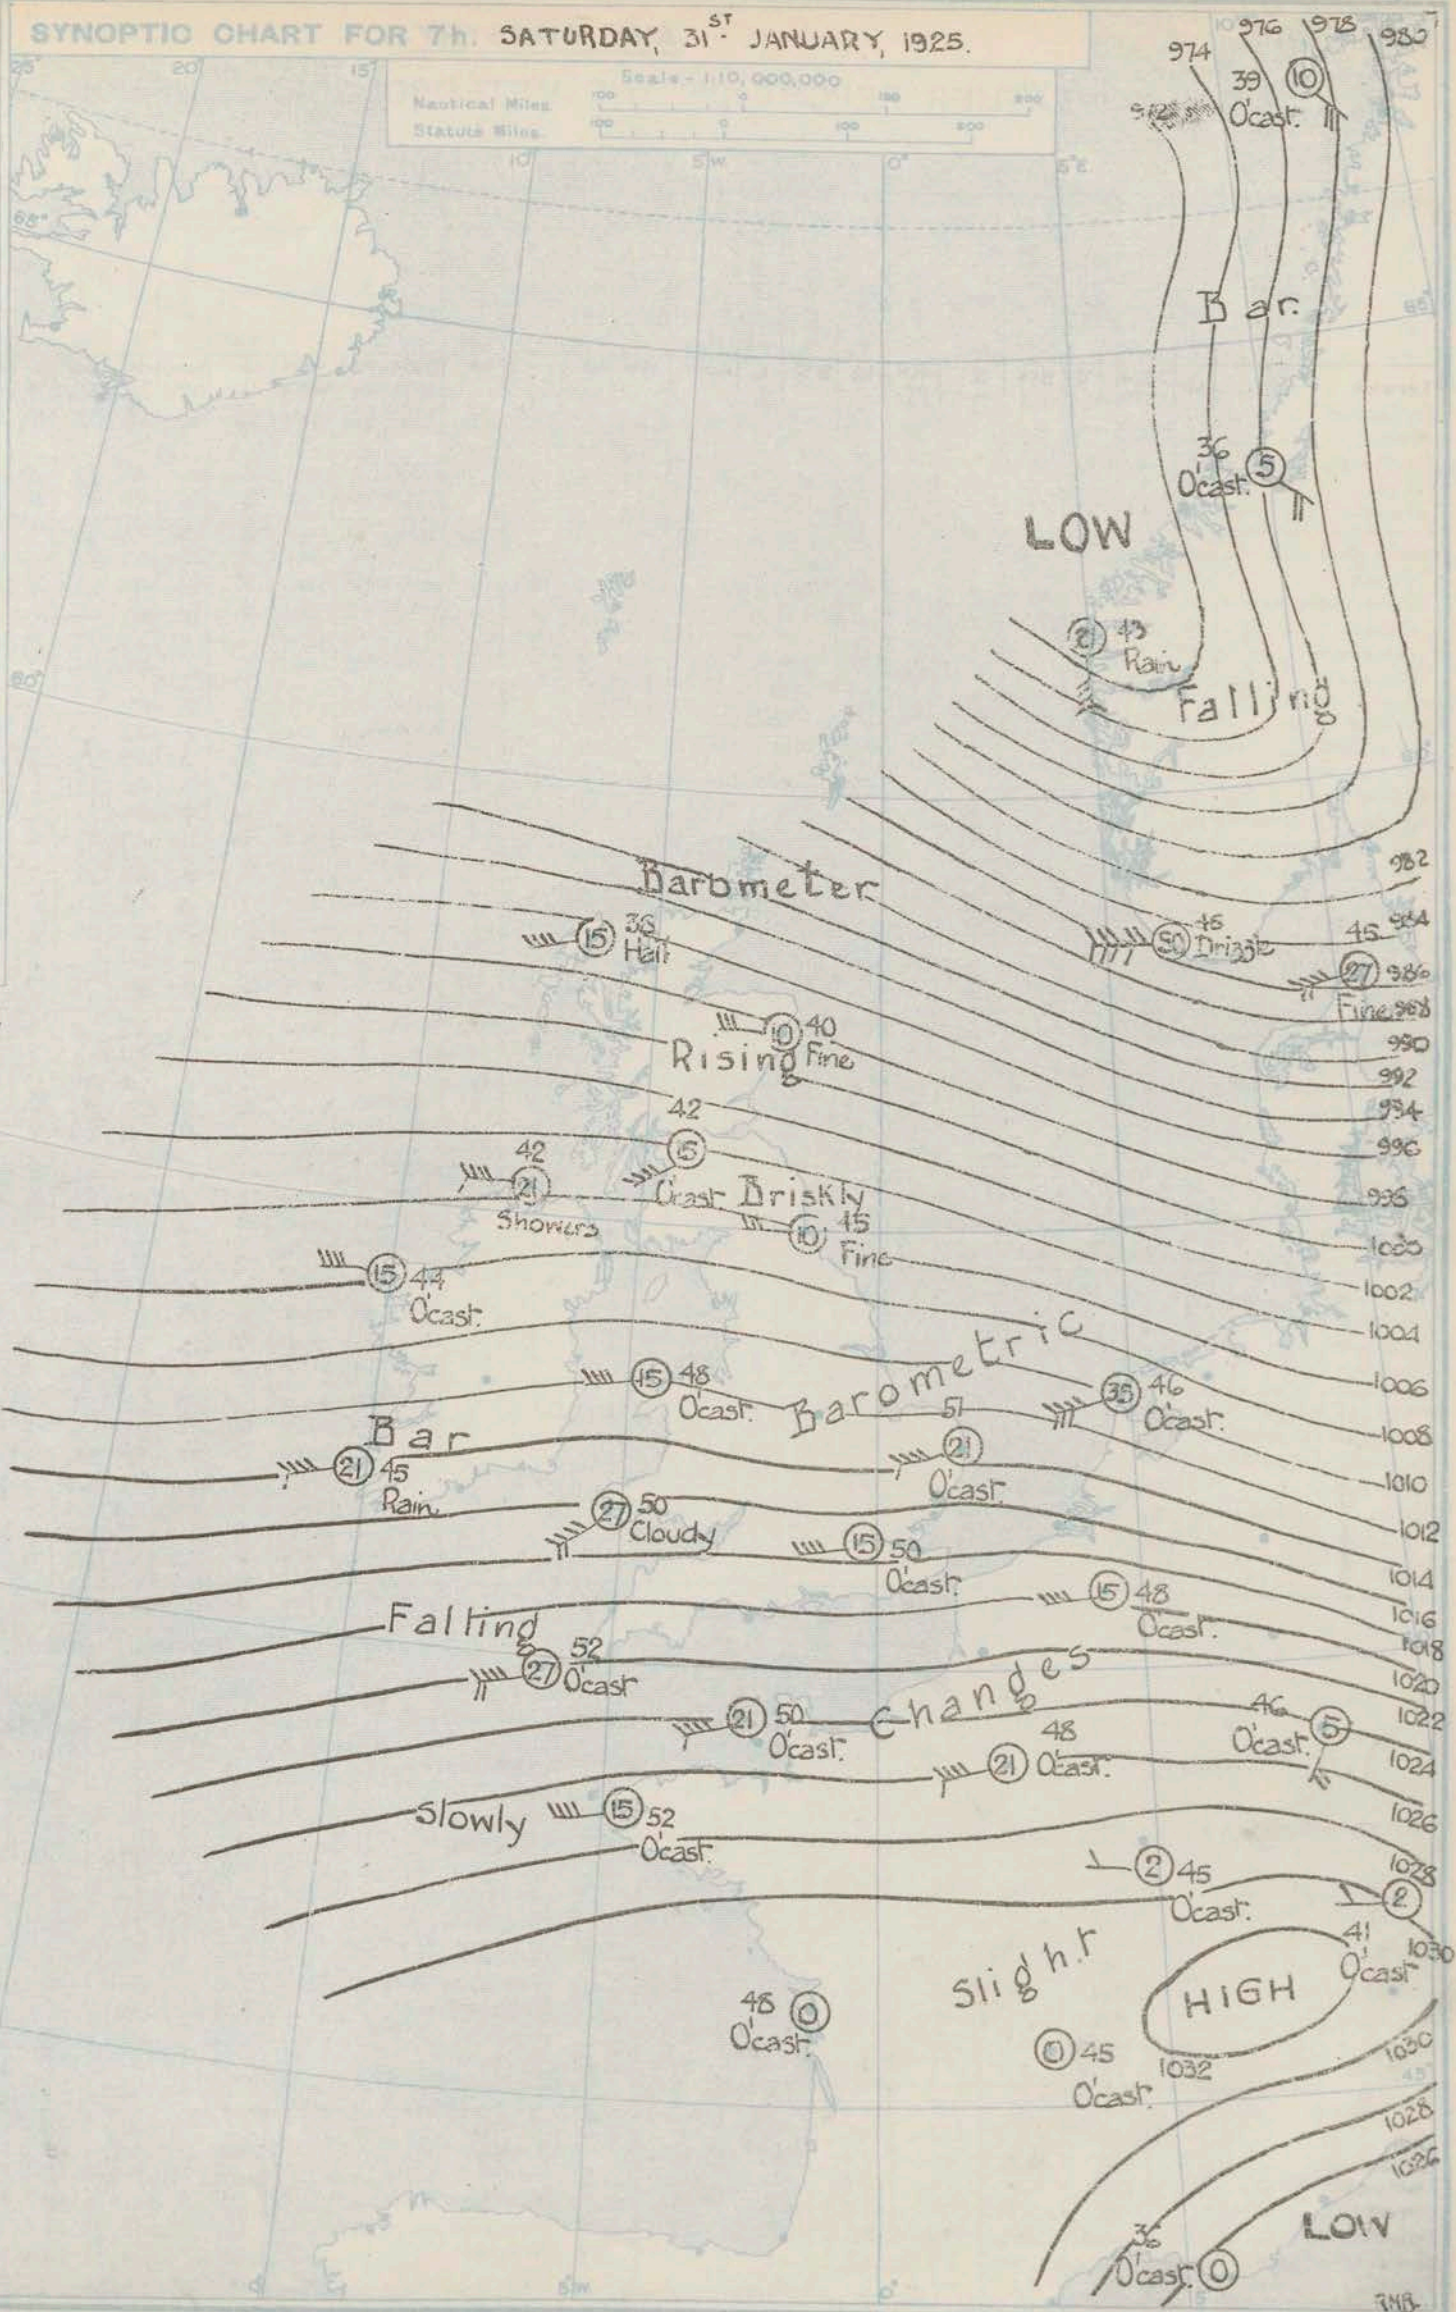

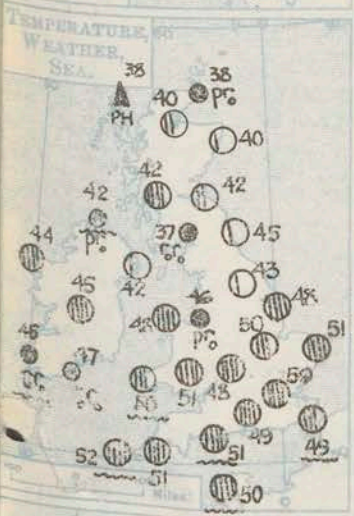

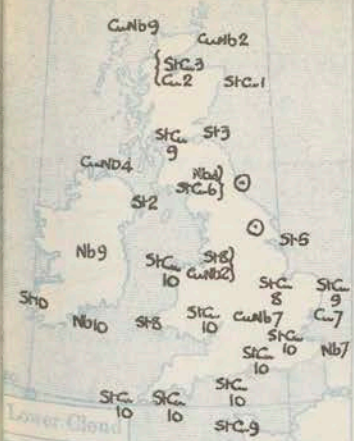

31st JANUARY.

GENERAL INFERENCE.

The depression which passed northward of Scotland last night is now over Norway, and no further large disturbances is indicated at present. Winds will be mainly west over the British Isles, moderating in force. In northern districts there will be considerable fair periods and local showers, but some rain is probable in the South, followed by an improvement tomorrow.

Meteorological Office: Air Ministry, Kingsway, London, W.C.2. Forecasts issued at 1000 G.M.T. G. C. SIMPSON, F.R.S., Director
