

THE DAILY WEATHER REPORT

BRITISH SECTION

1st October to 31st December

1935.

AIR MINISTRY. METEOROLOGICAL OFFICE, LONDON. W.C.2.

INTRODUCTION

The Daily Weather Report has been issued in three sections since April 1, 1919. The section of which this forms the Introduction is known as the "British Section."

NOTES REGARDING THE BRITISH SECTION.

Description of each issue:—The British section is issued daily by 12.30 p.m. (except that Sunday's issue is printed on Monday) and contains—

(a) On pp. 1 and 4 two tables of observations taken generally at 13h. and 18h. G.M.T. of "yesterday," and at 1h. and 7h. G.M.T. of "to-day" from about 45 stations in the British Isles, which regularly report to the Meteorological Office, and of the weather in the intervening intervals. These observations are telegraphed in a figure and letter code. The stations are arranged according to Forecast Districts as described at the foot of p. 2 of the report, and also on p. 4 of this Introduction. Whenever it is possible to do so without occupying too much space, the decoded values are set out in full in the table; in other cases, code figures are entered; these are interpreted by reference first to the number printed at the head of the column, and then to the Explanation printed at the foot of pp. 1 and 4, where the column numbers are shown in connexion with each of the separate classes of observation.

(b) Observations made at nine London Stations during the 24 hours ending 7h. or 9h.

(c) Table of atmospheric pollution for "yesterday" for South Kensington and Kew Observatory.

(d) Observations for "yesterday evening" and "this morning" from five capital cities on the Continent of Europe.

(e) On p. 2, a table of weather reports from British health resorts for the previous day, arranged under forecast districts.

(f) A weather chart (scale 1 : 10,000,000) for the British Isles and the neighbouring parts of the Continent and of the Atlantic. An explanation of the chart is printed below it.

(g) A "general inference" drawn up by the forecaster from all the weather charts available. This inference sets out the meteorological changes in progress and the deductions to be drawn from them.

(h) Weather forecasts for the 24 hours commencing 12 noon of the day of issue for 20 districts into which the British Isles are divided.

(i) A "further outlook," i.e. an indication of the changes to be expected after the expiry of the term of the forecasts, if the meteorological conditions are such as to warrant the issue of such an extension.

(j) On p. 3, a weather chart for the greater part of the Northern Hemisphere, including the whole of Europe, part of N. Africa, the Northern part of the N. Atlantic, N. America and usually a part of Russia in Asia.

The observations presented on this chart are not synchronous. Those for most of Europe (excluding Russia) and neighbouring countries refer to 7h. G.M.T., exceptions being:—Bulgaria, Austria, Hungary, Greece, Turkey, Egypt, Sudan, Cyprus, Palestine, Syria (6h. G.M.T.) Azores (8h. G.M.T.). The Greenland observations shown are made at 0h. G.M.T. with the exception of these for Mygbugten, and Torgilsbu which are for 7h. G.M.T.; while those for North America are made at 1h. G.M.T.

In the case of ships at sea, the hour of observation for vessels east of 40° W. is 6h. G.M.T. while that for vessels west of 40° W. is 0h. G.M.T.

Thus, within each of the two sectors 40° W. to 170° W. and 30° E. to 40° W., the observations are approximately synchronous among themselves though most of those in the western sector refer to an epoch 6 hours earlier than do most of those in the eastern sector.

The observations shown for Russia and Siberia are especially to be noted from this standpoint of time. They are made at 7h. local time which implies that the absolute time to which they refer varies over a wide range, viz. : from 5h. G.M.T. in the longitude of Leningrad (35° E.) to 19h. G.M.T. of the previous day in longitude 180° E.

The map on the following page shows graphically the hours of observation over the various parts of the weather chart for the Northern Hemisphere.

Wind:—The force of the wind is indicated in each issue of the Report by figures on the Beaufort Scale. The equivalents between numbers of the Beaufort Scale and the indications of an anemometer when exposed at a height of 30 to 40 feet above the ground are set out at the foot of p. 2 of each issue. Stations where such anemometers are installed determine their Beaufort numbers from their anemometers. At stations where anemometers are not in use, the force of the wind is estimated by means of the specification set out below. All wind directions are "true" or geographical, as distinguished from "magnetic."

Gale warnings:—A note regarding the meaning of gale warnings and the method of indicating in the Report to what districts warnings may have been issued is also shown below.

THE INTERNATIONAL AND UPPER AIR SECTIONS.

The other two sections of the Daily Weather Report are Royal quarto in size.

The International Section contains 4 pp. per day and is issued daily by 3.30 p.m., but the issues for Saturday and Sunday are made on Monday. The "International Section" contains information received from the Continent of Europe, the Mediterranean Basin, Iceland and the Azores, and from ships on the Atlantic, arranged as follows:—

(a) Two weather maps (Scale 1 : 20,000,000) for Europe, the Mediterranean and Eastern Atlantic for 18h. yesterday and 7h. to-day.

(b) Two inset maps (Scale 1 : 20,000,000) for Northwest Europe for 13h. yesterday and 1h. to-day.

(c) Table of meteorological observations taken at about 80 stations, mostly on the Continent of Europe (not for the British Isles).

(d) Table of meteorological observations received by Wireless Telegraphy from Ships on the Northern Atlantic.

This section is very useful to one who wishes to trace the passage of various weather systems, since the 4 charts for each 24 hours enable the reader to follow the course of events in detail. From 1st March, 1933, the positions of well-defined warm, cold and occluded fronts have been indicated on the weather maps.

Upper Air Section:—The third section, called the "Upper Air Section" consists of 2 pp. Royal quarto per day and the issue for "yesterday" is published immediately prior to the issue of the British Section for "to-day." It contains maps, diagrams and tables showing upper air currents, pressures and temperatures over the British Isles and the Continent of Europe.

THE BEAUFORT SCALE OF WIND FORCE.

Beaufort Number	Admiral Beaufort's General Description of Wind.	Specification for use on Land, based on observations made at British Land Stations.	Limits of Mean Velocities Statute Miles per Hour as recorded by well exposed anemometers about 40 feet above ground.
0	Calm	Calm; smoke rising vertically	Less than 1
1	Light air	Direction of wind shown by smoke drift	1-3
2	Slight breeze	Wind felt on face; leaves rustle	4-7
3	Gentle breeze	Leaves and small twigs in constant motion; wind extends light flag	8-12
4	Moderate breeze	Raises dust and loose paper; small branches are moved	13-18
5	Fresh breeze	Small trees in leaf begin to sway; crested wavelets on inland waters	19-24
6	Strong breeze	Large branches in motion; whistling heard in telegraph wires	25-31
7	Moderate gale	Whole trees in motion; inconvenience felt when walking against wind	32-38
8	Fresh gale	Breaks twigs off trees; generally impedes progress	39-46
9	Strong gale	Slight structural damage occurs (chimney pots and slates removed)	47-54
10	Whole gale	Seldom experienced inland; trees uprooted	55-63
11	Storm	Very rarely experienced; accompanied by widespread damage	64-75
12	Hurricane		Above 75

GALE WARNINGS.

The Meteorological Office issues warnings to ports and fishing stations of gales on or near the coasts of the British Isles. When one of these notices has been received at a station a black canvas cone is hoisted. The Signals remain hoisted after the receipt of a warning telegram until danger of a gale is passed.

The *North Cone* (point upwards) is hoisted for gales commencing from a Northerly point.

For gales commencing from East or West the North Cone will be hoisted if the gale is expected to change to a Northerly direction.

The *South Cone* (point downwards) is hoisted for gales commencing from a Southerly point. Such gales often veer, sometimes as far as Northwest.

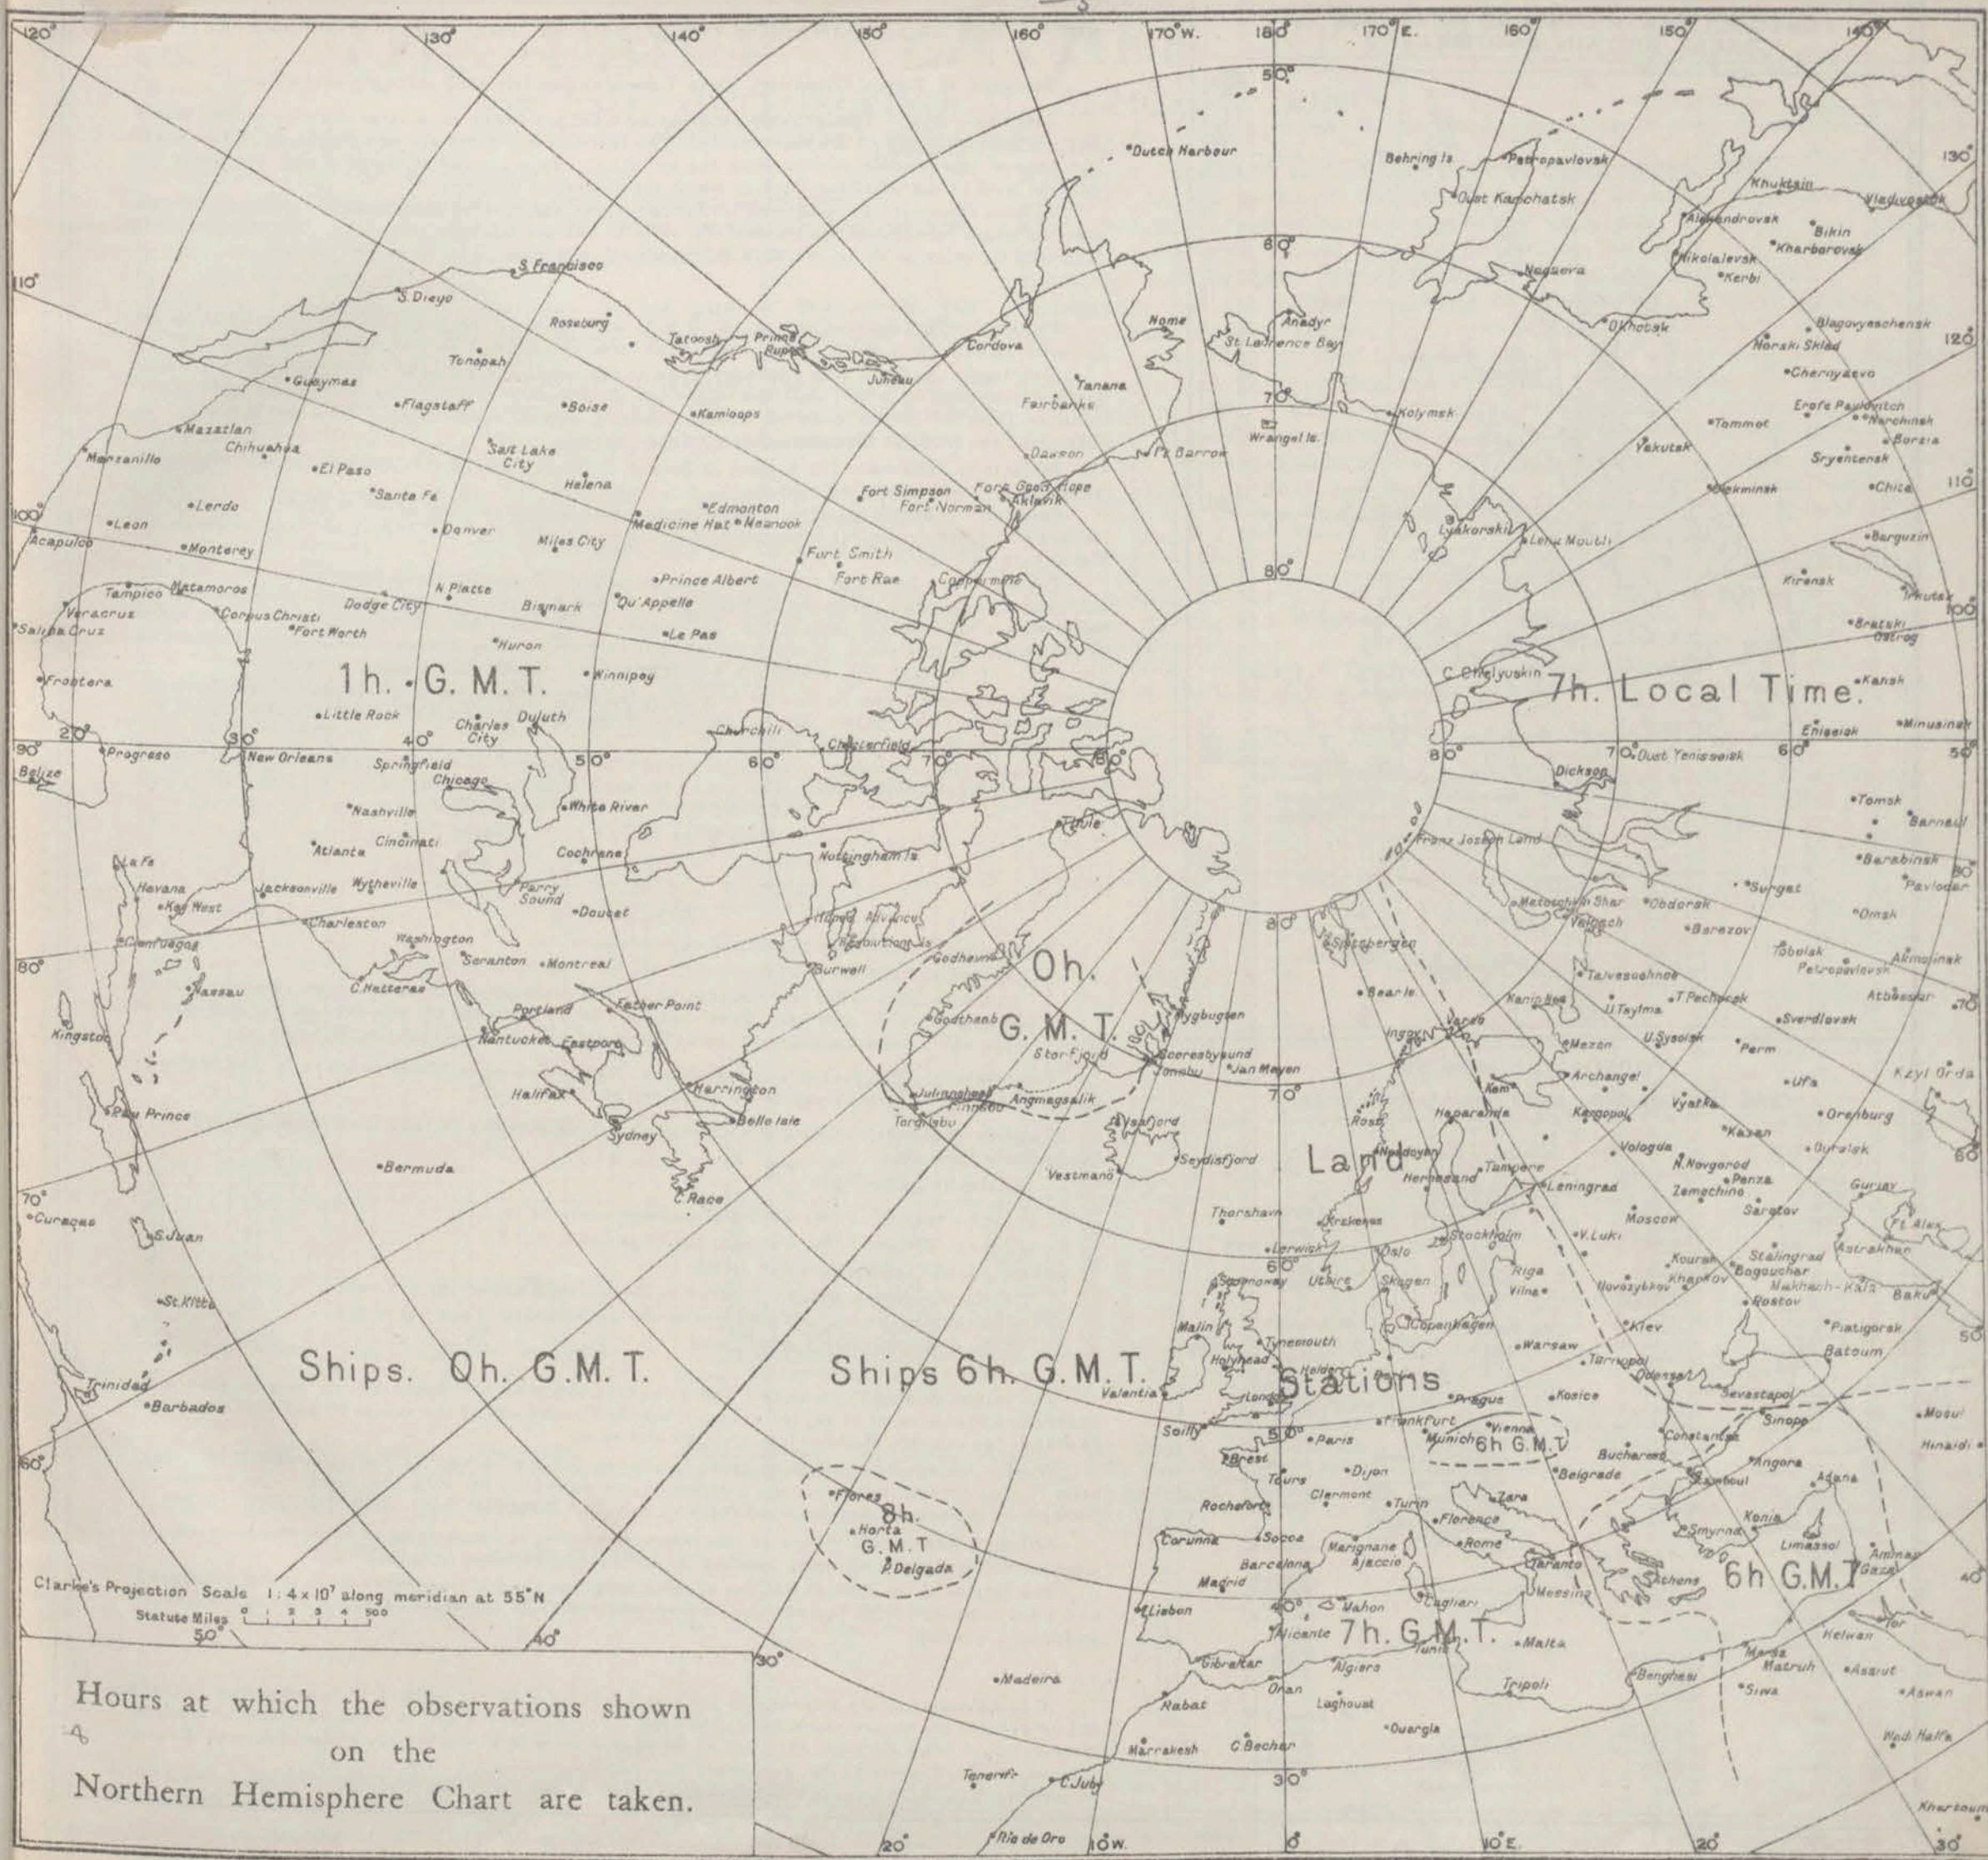

For gales commencing from East or West the South Cone will be hoisted if the gale is expected to change to a Southerly direction.

The districts to which warnings are sent are shown in the Report by the following symbols written on page 2 against the forecast districts to which they apply:—

▲ North Cone hoisted:

▼ South Cone hoisted:

The time or times of issue of the gale warning telegrams is shown below the "further outlook" on page 2 of the Report.

NOTES ON THE INFORMATION CONTAINED IN THE DAILY WEATHER REPORT.

Standard of Time.—Greenwich Mean Time is exclusively used throughout the Report.

Stations.—*Kew.*—Temperature readings at Kew are taken in a large louvered screen placed against the north wall of the observatory. The thermometer bulbs are at a height of 10 feet above the ground immediately surrounding the building. This ground is raised a few feet above the general level of the Old Deer Park in which the observatory stands.

London Observations.—As from 1st January, 1934, the rainfall measurements at all the London stations where raingauges are maintained, refer to two periods, day and night. The day period at Kew and Croydon is 7h. to 18h. G.M.T.; at all other stations it is 9h. to 18h. G.M.T.

Valentia.—The observations at 1h. G.M.T. are taken at the Post Office Wireless Station on Valentia Island, those at all other hours at the Observatory near Cahirciveen on the mainland.

Holyhead.—As from 10th February, 1934, as the result of a series of comparisons with another gauge surrounded by a turf wall, the raingauge at this very exposed station was moved a short distance from its former position, and surrounded with a standard turf wall, with a view to increasing the catch to that appropriate to the locality.

Heights of Stations.—The heights of British Stations above M.S.L. refer to the plot of ground on which the rain gauge is situated.

Pressure.—The distribution of barometric pressure at Mean Sea Level is shown by means of isobars which are drawn for intervals of 2 millibars on page 2 of the Report and for intervals of 4 millibars on Page 3.

The wind at a height of 1,500-2,000 feet above ground usually blows *along* the isobars and, for the same temperature, pressure and latitude, the speed of the wind is inversely proportional to the distance between the isobars, e.g., for isobars 1 inch apart for the chart on Page 2 the speed of the upper wind is about 12 m.p.h. in latitude 55°, with a temperature of 50° F. and a pressure of 1,015 mb; if, however, the isobars are ½ inch apart the corresponding speed is 24 m.p.h.

The scale below can be used to determine the theoretical wind as deduced from the pressure distribution on either chart. On the assumption that the path of the air is straight this theoretical wind is called the Geostrophic Wind.

If the distance between consecutive isobars is measured along the scale from the left-hand extremity the geostrophic wind is shown by the scale in miles per hour.

GEOSTROPHIC WIND SCALE FOR

8 mb isobars on 1: 4 × 10⁷ Charts.

or 2 mb 1: 10⁷ ..

100 30 20 10 5

Miles per hour.

This scale applies under the following conditions:—

Pressure, 1,015 mb. Temperature, 50° F. Latitude, 55°.

Corrections.—For an increase of 10 mb pressure, subtract 1% from velocity; for an increase of 10° F. add 2%. From Latitude 55° to Latitude 65° subtract 1% for each degree above 55°. From Latitude 55° to Latitude 45° add 1½% for each degree below 55°.

Temperature.—Temperature is specified in degrees Fahrenheit, and is shown on the charts by means of figures written alongside the positions of the stations.

Relative Humidity.—Relative Humidity at British stations is calculated from the following hygrometric formulae:—

$$\text{Relative humidity} = \frac{100x}{F}$$

$$x = f - .444 (t - t') \text{ for wet bulb readings above } 32^\circ \text{ F.}$$

$$x = f - .400 (t - t') \text{ for wet bulb readings below } 32^\circ \text{ F.}$$

where x is the vapour pressure in mb.:

f the saturation vapour pressure at the temperature of the dry bulb:

f' the saturation vapour pressure at the temperature of the wet bulb:

t the dry bulb temperature; and

t' the wet bulb temperature.

The values printed in columns 7 and 21 always end with the figure 5. By this it should be understood that a value of 95, for example, stands for any one of the values 90 to 100; a value of 85 stands for any one of the values 80 to 89 and so on.

Wind.—All wind directions specified in the reports are "true," as distinguished from "magnetic." The arrows indicating wind direction are drawn to fly with the wind. The number of feathers on the arrows denotes wind force by Beaufort number.

Adjusted Readings.—Where an instrumental reading is found to be in error and some adjustment is necessary, such adjusted reading is published in brackets thus (59).

The entries in the British Section of the Report for the stations in the main tables on pages 1 and 4 are compared with those in the returns received from the stations and errors in the Report so found are noted.

N.B.—Readers of the Report who are unacquainted with the method of construction and the use of weather charts are recommended to read "The Weather Map. An Introduction to Modern Meteorology," (2nd Edition, 1930), to be purchased from H.M. Stationery Office, Adastral House, Kingsway, W.C.2, price 3s. 2d. post free.

Corrections and additions can be obtained, if required, on application to the Meteorological Office.

AIR
MINISTRY.

THE DAILY WEATHER REPORT

OF THE METEOROLOGICAL OFFICE, LONDON.

MONTHLY
SUPPLEMENT,
DECEMBER 1935. No. 228

Page 1.

Wintry conditions, but mild towards end of month.

A notable feature of the weather during December was the abundant sunshine enjoyed at Stornoway in the Hebrides where the duration of 54 hours was the greatest since records began in 1881. From 1st-9th low pressure systems crossing the country gave generally unsettled and stormy conditions. Rainfall was not excessive and some bright intervals were reported, especially in Northwest Scotland. Thunderstorms occurred locally over a wide area on 1st and 2nd. Temperature fell on 5th but the following day rose to normal levels. From 10th - 13th the country came under the influence of an anticyclone which had developed over Scandinavia on 9th. Some drizzle occurred on the East Coast and slight snow was reported from Southeast England on 13th., but elsewhere conditions were mainly dry and dull with little diurnal temperature variation. Further low pressure systems crossed the country from 14th - 17th bringing wintry precipitation to all districts. Temperatures were generally low and in many parts roads became icebound on 16th. During the period 19th-23rd the country lay between two depressions centred to the Northeast and Southwest respectively. Widespread fog occurred, being particularly severe in London on 23rd. when the greatest atmospheric pollution for nearly eleven years was reported from Kew Observatory.

Some sunny periods were experienced however, chiefly in western coastal districts where Colwyn Bay and Aberystwyth each enjoyed 6.1 hours of sunshine on 23rd. Wintry precipitation occurred in northern districts on 21st and 22nd and locally in England on 22nd but amounts were generally small. Severe ground frost was widespread during this period and some very low temperatures occurred in Scotland, the most notable being minima of 11°F. and 14°F at Peebles on 20th and 21st respectively, 12°F. at Eskdalemuir on 23rd., and a maximum of 18°F., at Renfrew on 23rd. was the lowest value recorded at this station since records began in 1920. From 24th - 29th an intense depression moved slowly from the Atlantic to a position off Northwest Scotland and secondaries crossed the country daily. Mild conditions returned to the South on 24th and later spread northwards to all districts. Widespread rain occurred but a few bright periods were enjoyed in the South. Gales were frequent during this period and on the evening of Christmas Day gale warnings were in operation on all coasts of the British Isles, excepting West Ireland. Bright periods were reported over a large area on 29th but the approach of a new depression brought further rain to Ireland and later to all districts. The year ended with conditions unsettled, stormy and mild.

Daily Rainfall at KEW Observatory.

• = Less than 0.5 mm.

RAINFALL. Total for Month. 56 mm.

Daily Sunshine at KEW Observatory

SUNSHINE. Total for Month. 34 hrs.

Daily Range of Temperature at KEW Observatory.

STATE OF GROUND AT 18 h.

No. of Days EACH TYPE WAS RECORDED.

STATIONS.	0	1	2	3	4	5	6	7	8	9	CODE for State of Ground.
London (Kew)	0	28	0	0	3	0	0	0	0	0	0 Dry.
Ross-on-Wye	0	25	0	1	0	0	5	0	0	0	1 Wet.
Renfrew	0	18	2	0	8	2	1	0	0	0	2 Flooded.
Eskdalemuir	0	13	0	0	1	0	2	3	12	0	3 Covered with thawing snow.
Aberdeen	0	20	0	2	7	0	2	0	0	0	4 Frozen hard and dry.
Valentia	1	29	0	0	1	0	0	0	0	0	5 Covered with ice or glazed frost.
											6 Partly covered by snow or hail.
											7 Covered with snow, less than 6 ins., but ground not frozen.
											8 Covered with snow, less than 6 ins., and ground frozen.
											9 Covered with snow, greater than 6 ins. deep.

** In extremes of rainfall the short period returns from Inchkeith are supplemented by those from Leith, and extremes of rainfall and sunshine from Calshot by those from Southampton.

† Based in part on reports made by telegraph in which the day and night measurements are rounded off to the nearest whole millimetre. Small discrepancies may arise between these totals and those given in the Monthly Weather Report which are based on readings taken to 0.1 mm.

PRESSURE: ICELAND TO GULF OF LIONS

DECEMBER, 1935.

ISOPLETHS BASED ON SIX-HOURLY OBSERVATIONS.

* The diagram is obtained by drawing a line from Akureyri in Iceland to the south of France near Marseilles. The points at which the isobars drawn for 4 mb. pressure intervals intersect this line at 1h., 7h., 13h., and 19h. are plotted consecutively and joined to show the variation of pressure from day to day at any point in the line. The line terminates at Lat. 66° N., Long. 18° W., in the north; at Lat. 44½° N., Long. 4° E., in the south.

EXPLANATION OF FIGURES, LETTERS AND SYMBOLS.

COLUMNS 5, 19, 37, 38, 39, 40.—BEAUFORT NOTATION AND SYMBOLS FOR WEATHER.

b, blue sky (not more than a quarter covered with cloud).
bc, sky partly cloudy (one half covered). c, generally cloudy.
d, drizzle. e, wet air. g, gloom.
f, fog, visibility 220-1100 yds.
F, thick fog, less than 220 yds.
fa, fog over sea (coast station).
fg, fog on lower ground (inland station).
m, mist, visibility 1100-2200 yds.
h, hail. i, intermittent.
ip, precipitation within sight of station.
ks, storm of drifting snow.
k/s, slight storm of drifting snow (generally low).
K/S, heavy storm of drifting snow (generally low).
a/k, slight storm of drifting snow (generally high).
S/k, heavy storm of drifting snow (generally high).
KQ, line squall. l, lightning.
o, overcast sky. p, passing showers.

g, squalls. r, rain. s, snow.
rs, sleet. t, thunder.
u, ugly, threatening sky.
v, unusual visibility. w, dew.
x, bear frost. y, dry air.
z, dust haze: the turbid atmosphere of dry weather.
h(r), "hail" or "rain and hail."
Capital letters indicate intense; suffix o indicates slight; repetition of letters indicates continuity: thus R, heavy rain. r, slight rain.
rr, continuous rain.
C, less than (for cloud height).
Θ, Solar halo. Ω, lunar halo. ♀, gale.
With present weather is combined, whenever possible, the general character of the weather.
A "solidus" divides actual existing weather

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 1st December, 1935.
1. S.E. England	V Fresh or strong squally southwest or west wind, bright intervals, showers; average temperature.
2. E. England	V
3. E. Midlands	
4. W. Midlands	
5. S.W. England	V Strong squally west or northwest wind, gale at times on coasts, rain at first, bright intervals and showers later; average temperature.
6. South Wales	V
7. North Wales	V
8. N.W. England	V
9. N. Midlands	Strong squally west or northwest wind, gale at times on coasts, bright intervals, heavy showers of rain, hail or sleet; temperature slightly below average.
10. N.E. England	V
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. { A. W. Scotland. B. N.W. Scotland.	
14. Mid-Scotland	Light or moderate westerly or variable wind becoming fresh or strong northwesterly, cloudy, occasional showers of rain, hail or snow, heavy locally; temperature below average.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	V Strong squally west or northwest wind, gale at times on coasts, bright intervals, showers of rain or hail, heavy locally; temperature below average.
18. N.E. Ireland	V
19. S.E. Ireland	V
20. S.W. Ireland	V

A.N. Stationary Office Press, Singapore, 1935

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/8 clouded. ○ Sky 1/8 to 1/4 clouded. ○ Sky 1/4 to 1/2 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail.
Fog. — Mist. T Thunder. T Thunderstorm. ☁ Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

Pressure is low between the North Sea and Iceland with a very low centre southwest of Norway moving east. Secondary disturbances are crossing the British Isles.

FURTHER OUTLOOK.

Unsettled.

TIMES OF ISSUE OF GALE WARNINGS.

- V South Cone hoisted at 0830 on 28th and keep cone flying at 1000 on 1st in dists. 7, 8, 12, 17 & 18.
- V South Cone hoisted at 0145 on 30th in dists. 5 (part of 6, 19, & 20) and at 1520 on 30th in dists. 1, 2, 5 (part of 6) and 10

1 Max. Temp. for period 21h. yesterday to 17h. to-day; Min. Temp. 21h. 9h. 1 Min. Temp. 17h. 9h.

AIR MINISTRY, METEOROLOGICAL OFFICE.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 2nd December, 1935.
1. S.E. England	Moderate to light west wind; mainly fine; perhaps a few scattered showers at first; average day temperature, ground frost at night.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Fresh west to northwest wind, moderating; bright intervals, local showers of rain and hail; average day temperature ground frost at night.
5. S.W. England	
6. South Wales	
7. North Wales	Strong, squally northwest wind, gale locally at first; moderating; showers of rain and hail, bright intervals; rather cold.
8. N.W. England	
9. N. Midlands	
10. N.E. England	As 1 - 3.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	As 5 - 9.
13. A.W. Scotland & B.N.W. Scotland	
14. Mid. Scotland	Fresh northwest wind, strong locally at first; mainly cloudy, showers of rain, hail or sleet, with snow on higher hills; average temperature.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	As 5 - 9.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol: — ○
TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/8 clouded. ○ Sky 1/8 to 1/4 clouded. ○ Sky 1/4 to 1/2 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail. ☼ Fog. ☼ Mist. T Thunder. K Thunderstorm. ☼ Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A deep depression off southwest Norway is stationary and slowly filling up. Depressions on the Atlantic will pass to southwest of the British Isles. There will be showers of rain and hail in the West and extreme North, and locally elsewhere. Wind will moderate and ground frost will become more widespread and intense.

FURTHER OUTLOOK.

Similar conditions. Sharper ground frost at night in eastern and inland districts.

TIMES OF ISSUE OF GALE WARNINGS.

- South Cone hoisted at 0830 on 28th in districts 7, 8, 12, 13A, 17 & 18.
- South Cone hoisted at 0145 on 30th in districts 5 (part of) 8, 19 & 20.

Forecasts issued at 1030 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 3rd December, 1935.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 3rd December, 1935.
1. S.E. England	Light or moderate westerly wind; mainly fair, but a few local showers of rain or hail; average day temperature, ground frost night and morning.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind variable, light, then northwest, freshening; showers with local hail, but bright intervals; rather cold, ground frost locally at night.
6. South Wales	
7. North Wales	Moderate or fresh northwest to west wind, strong at times locally; showers, with local hail or sleet, snow on higher hills; bright intervals; rather cold, ground frost locally at night.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Moderate or fresh northwest to west wind; bright intervals, local showers; average day temperature, ground frost at night.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. { A. W. Scotl. B. N.W. Scot- land.	
14. Mid. Scotland	As 6 - 9.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars. WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. TEMPERATURE is given in degrees F. WEATHER SYMBOLS: — Clear sky. — Sky less than 1/8 clouded. — Sky 1/8 to 1/4 clouded. — Sky 1/4 to 1/2 clouded. — Overcast sky. — Rain falling. — Snow. — Sleet. — Hail. — Fog. — Mist. — Thunder. — Thunderstorm. — Slight haze. SEA DISTURBANCE. — Rough. — High. BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A depression off Norway is filling up. A deepening secondary centred 200 miles southwest of Scilly is moving east-southeast quickly, and another depression in the South Greenland area will also move east-southeast. There will be showers chiefly in the West and extreme North, but bright intervals.

FURTHER OUTLOOK.

Unsettled; probably mainly fair over tomorrow in Eastern England.

GEORGE G. SIMPSON, K.C.B., D.Sc., F.R.S., Director.
Forecasts issued at 1030 G.M.T.

AIR MINISTRY, METEOROLOGICAL OFFICE. Chart of Weather in the Northern Hemisphere.

EXPLANATION OF CHART.
 BAROMETER. Isobars are drawn for intervals of four millibars.
 WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
 ○ - Calm.
 TEMPERATURE is given in degrees F.
 WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

LONDON OBSERVATIONS.														EXPLANATION OF FIGURES, LETTERS, etc.									
Day 7h—18h. Kew & Croydon. 9h—18h. Kensington. 9h—21h. other stations except for rainfall which is 9h—18h.														The barometric tendency is expressed in tenths of a milliBar.									
24 hrs. ended 9h.														The BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers is the speed at about 30 feet above the ground.									
18h. G.M.T. 2nd December.														7h. G.M.T. 3rd December.									
Past 24 Hours.														0 Dense fog 55 yards. 1 Thick fog 220 " 2 Fog 550 " 3 Moderate fog 1,100 " 4 Mist or haze 1 1/2 miles. 5 Poor visibility 2 1/2 " 6 Moderate " 6 1/2 " 7 Good " 12 1/2 " 8 Very good " 31 " 9 Excellent " beyond 31m.									
COLUMNS 2, 16. The barometric tendency is expressed in tenths of a milliBar.														COLUMNS 8, 22 — Code for surface visibility.									
COLUMNS 4, 18. THE BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers is the speed at about 30 feet above the ground.														COLUMNS 30.—Code for State of Sea. 0 Calm. 5 Very rough. 1 Smooth. 6 High. 2 Slight. 7 Very high. 3 Moderate. 8 Precipitous. 4 Rough. 9 Confused.									
COLUMNS 34, 35. Tr. = rain has fallen, but amount less than 0.1 mm.

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h Wednesday, 4th December. 1935.

DISTRICTS. FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 4th December, 1935.

1. S.E. England	Moderate or fresh westerly wind; mainly fair at first; some showers tomorrow; rather cold.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Wind backing west, moderate to strong; showers, especially tonight; bright intervals; rather cold.
5. S.W. England	
6. South Wales	Wind backing west, fresh or strong, squally, veering somewhat later, probably a gale locally on coast; showers of rain, hail and sleet, heavy and frequent at times tonight; snow on higher hills; rather cold.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	Moderate to fresh or strong west wind; mainly fair at first, showery later with local sleet or snow; rather cold.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Wind backing southwest; moderate or fresh veering northwest later becoming strong, perhaps gale locally on coast; intermittent rain, hail, or or sleet, with snow on high ground; rather cold.
13. { A.W. Scotl. B.N.W. Scot- land.	
14. Mid Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	Wind northwest or variable, light or moderate; showers, bright intervals; rather cold.
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

As 5 - 8.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/2 clouded. ○ Sky 1/2 to 1/2 clouded. ○ Sky 1/2 to 1/2 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. * Hail.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

Pressure is low over the Scandinavian area and high over the Azores. A secondary depression about 300 miles westnorthwest of the Outer Hebrides is moving eastsoutheast slowly. Weather will be of a showery type with snow on the hills.

FURTHER OUTLOOK.

Wintry showers, especially in the West and extreme North, bright intervals; snow locally on high ground; rather cold.

TIMES OF ISSUE OF GALE WARNINGS.

A North Cone hoisted at 2000 on 3rd in dists; 5 (part of) 6, 19 (part of) and 20.

Forecasts issued at 1030 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

AIR MINISTRY, METEOROLOGICAL OFFICE.

DISTRICTS. FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 5th December, 1935.

1. S.E. England	Light northwest wind; fair or fine; local fog; rather cold, with night frost.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Light or moderate northwest wind; mainly fair but local wintry showers; local fog; rather cold, night frost.
5. S.W. England	
6. South Wales	Fresh or strong northwest wind, moderating; showers of rain, hail, or sleet, and of snow on high ground; bright intervals; rather cold, frost inland at night.
7. North Wales	
8. N.W. England	
9. N. Midlands	As 4.
10. N.E. England	Light westerly wind; fair or fine; local fog; cold, sharp night frost.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. { A.W. Scotl. B.N.W. Scot- land.	Moderate northwest to west wind, fresh locally at first; bright intervals, showers of snow, sleet or hail; cold, sharp night frost locally inland.
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	Moderate or fresh west to northwest wind; bright intervals, wintry showers; rather cold.
17. N.W. Ireland	
18. N.E. Ireland	Wind northwest, fresh locally, falling light, backing later; local wintry showers, becoming fair or fine; local morning fog; rather cold, night frost, sharp locally inland.
19. S.E. Ireland	
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/8 clouded. ○ Sky 1/8 to 1/4 clouded. ○ Sky 1/4 to 1/2 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail.
 ≡ Fog. ≡ Mist. T Thunder. K Thunderstorm. α Slight haze.
SEA DISTURBANCE. Rough. High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A wedge of high pressure off West Ireland is moving eastward. A deep depression off South Greenland is likely to move slowly northeast, while an associated trough advances on the Atlantic. There will be further wintry showers at first in the West and extreme North but otherwise weather will be fair with local fog.

FURTHER OUTLOOK.

Becoming milder in Ireland and West Scotland with rain spreading east; a fair interval over most of England with local fog and night frost.

Times of Issue of Gale Warnings.

A North Cone hoisted at 2000 on 3rd in districts 5 (part of), 6, 19 (part of) and 20.

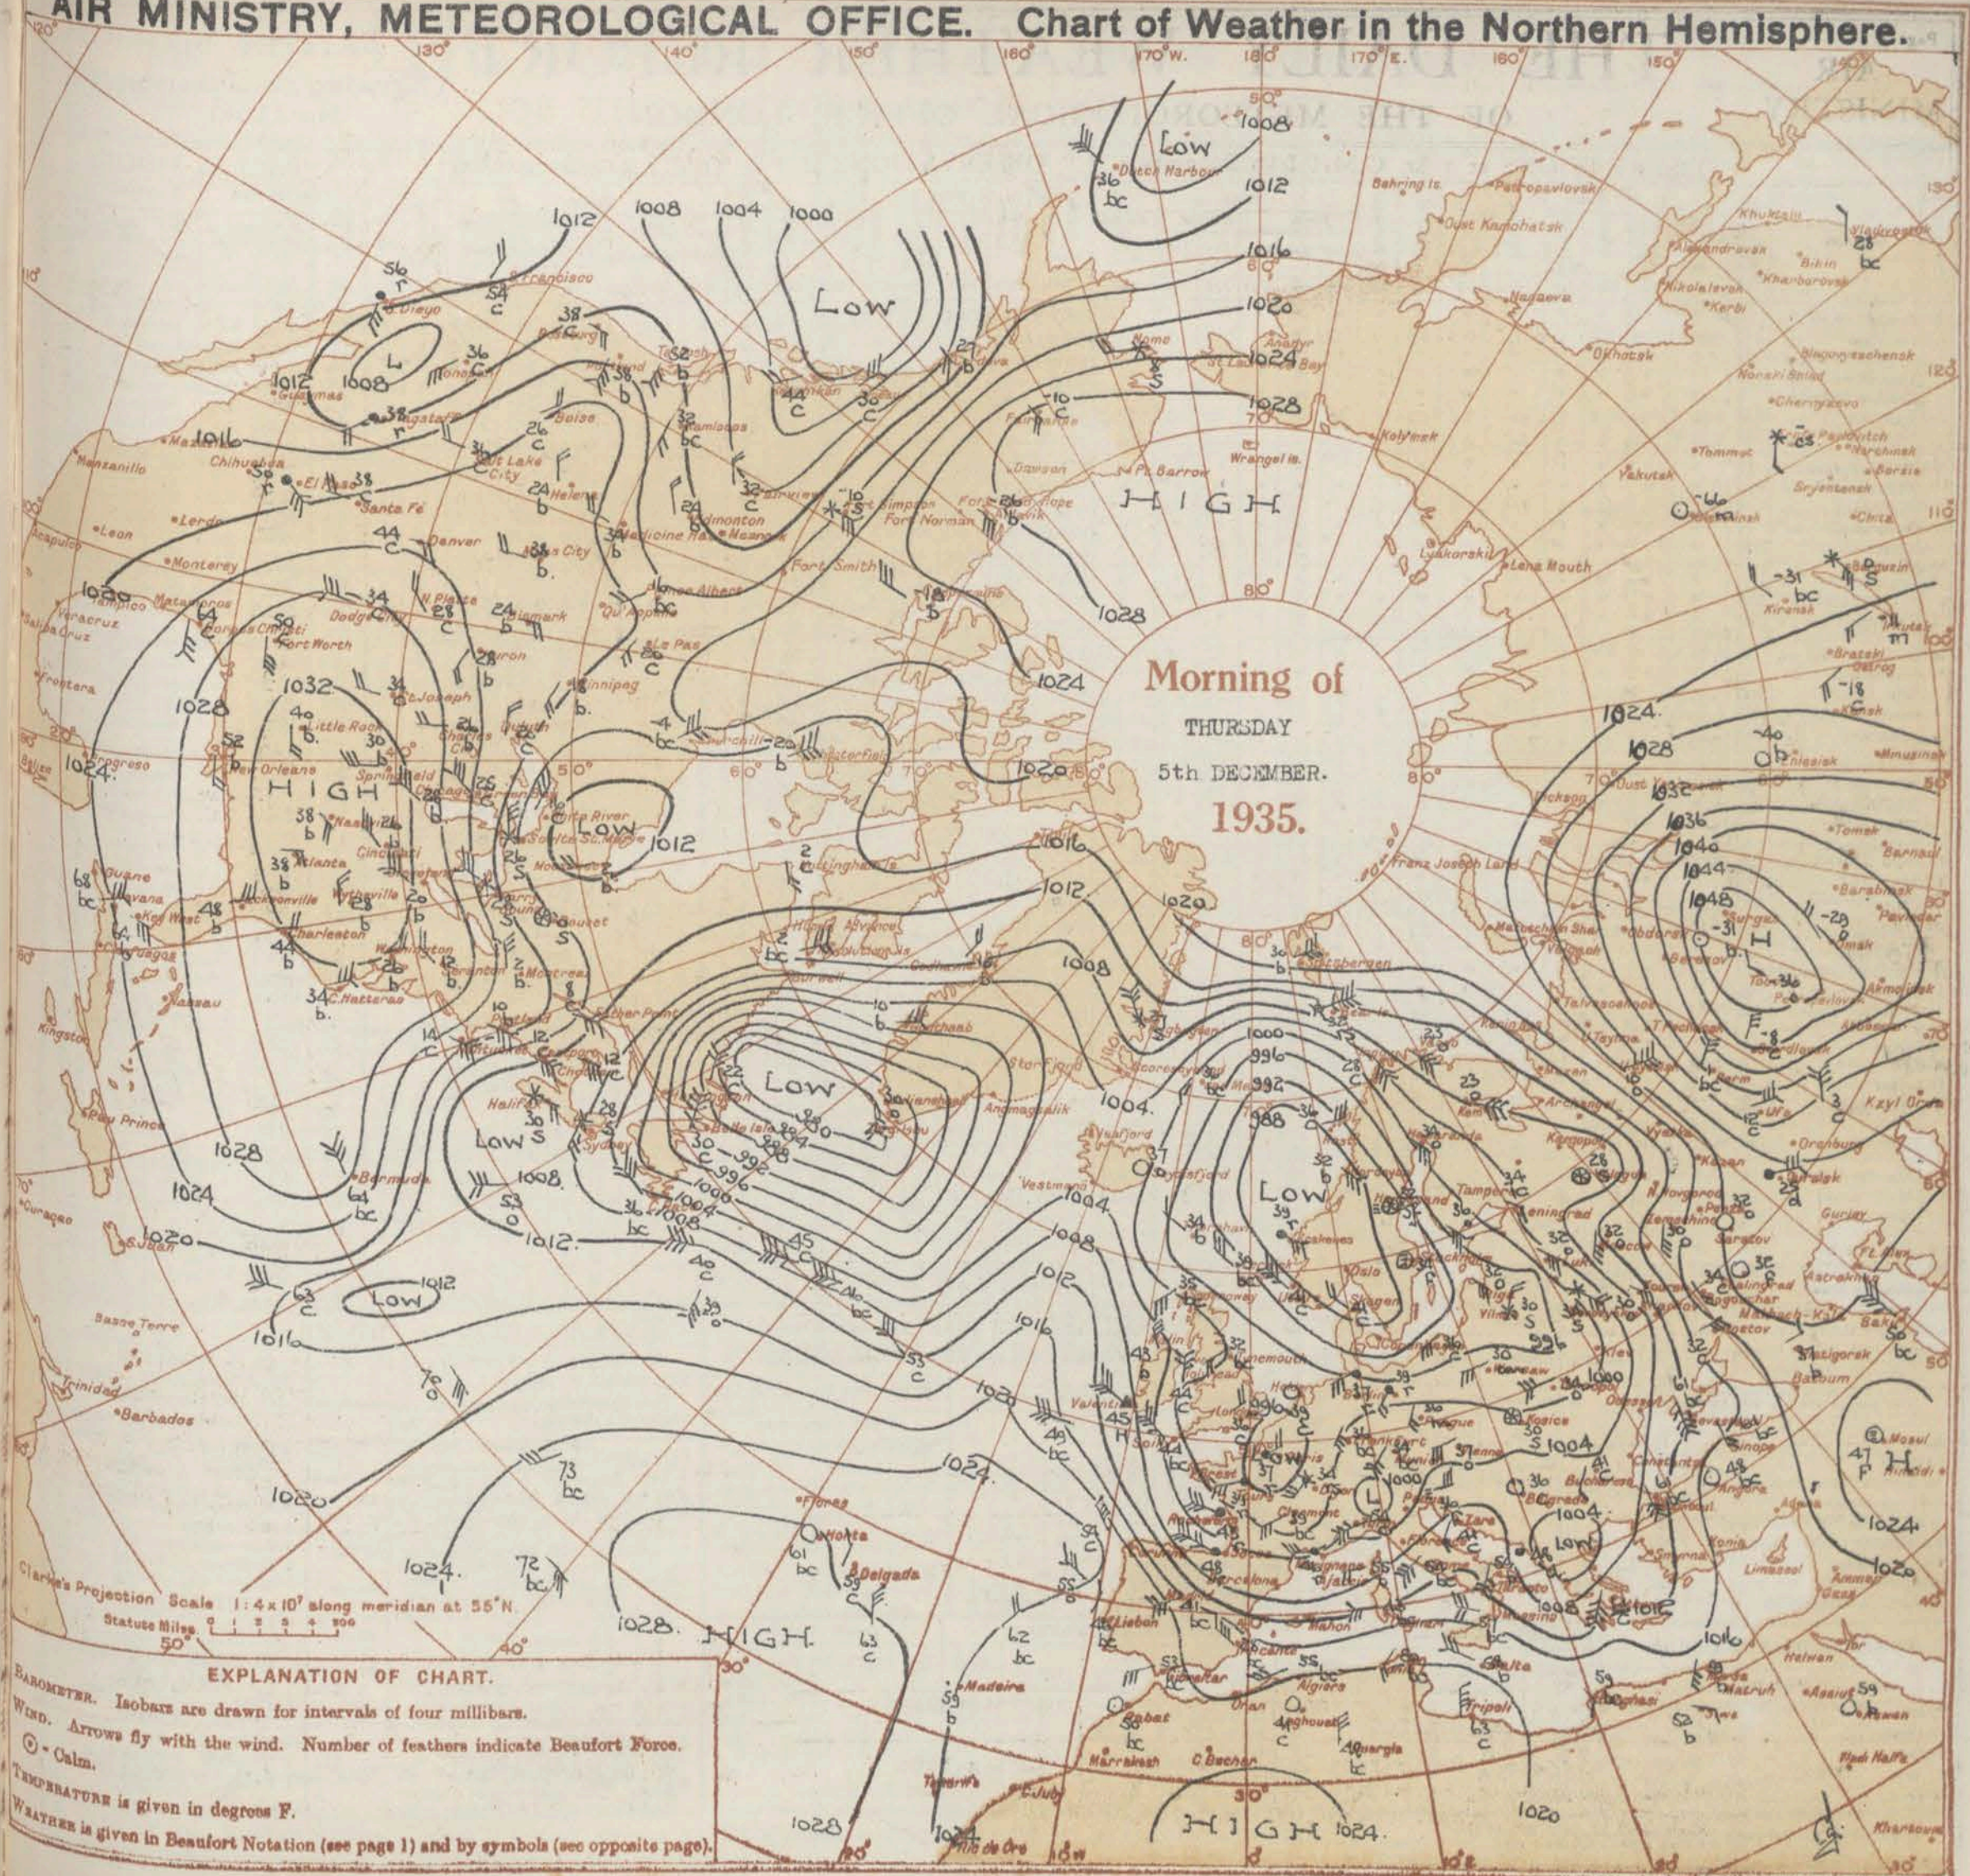

GEORGE G. SIMPSON, K.C.B., D.Sc., F.R.S.,
 Director.

EXPLANATION OF CHART.

BAROMETER. Isobars are drawn for intervals of four millibars.
WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
TEMPERATURE is given in degrees F.
WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 6th Dec. 1935.
1. S.E. England	Wind south, veering northwest, backing southwest again tomorrow, mainly light or moderate; rain at first, fair later; local mist or fog night and morning; average temperature.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind northwest, strong locally, moderating, backing west to southwest later; local rain, then bright intervals, local showers; average temperature.
6. South Wales	
7. North Wales	
8. N.W. England	Moderate or fresh westerly wind, backing tomorrow; bright intervals, local showers; average temperature.
9. N. Midlands	
10. N.E. England	Wind variable to west, light, freshening from southwest tomorrow; variable cloud, local sleet, rain, or snow; local mist or fog; rather cold.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland & N.W. Scotland	Light variable wind, freshening from south to southwest later; variable cloud; local rain, sleet or snow; rather cold.
14. Mid. Scotland	
15. N.E. Scotland	Light variable wind; fair apart from local wintry showers; local valley fog; cold, sharp frost inland at night.
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	Moderate or fresh west wind, backing southwest, becoming strong on coasts; fair at first apart from local showers, rain spreading east tomorrow; average temperature.
19. S.E. Ireland	
20. S.W. Ireland	

K.M. Stationery Office Press, Kingsway W.C.2.

12.11.1935. No. 1011. 1011. 1011. 1011.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. **TEMPERATURE** is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than 1/10 clouded. — Sky 1/10 to 1/10 clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A trough of low pressure is crossing the British Isles and a small centre near Scilly will move east or east-south-east. There will be rain with the trough and snow locally in the North. Subsequently there will be a fair interval, followed by unsettled milder weather.

FURTHER OUTLOOK.

Rain spreading east, Milder generally.

Forecasts issued at 10.40 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

EXPLANATION OF CHART.

BAROMETRIC. Isobars are drawn for intervals of four millibars.

WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.

☉ - Calm.

TEMPERATURE is given in degrees F.

WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

AIR MINISTRY, METEOROLOGICAL OFFICE.

Districts.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 7th Dec, 1935.
1. S.E. England	Light variable wind, becoming south or southeast, widespread fog at first, persisting locally; probably a little rain tomorrow; cold; becoming less cold tomorrow.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind backing south to southeast, light or moderate, veering west to northwest later, fresh locally; cloudy, local showers; a period of general rain tonight, bright intervals and local showers tomorrow; average temperature.
6. South Wales	
7. North Wales	
8. N.W. England	Light variable or south to southwest wind; fair at first with fog on low ground; probably occasional rain or sleet later; cold, becoming slowly less cold.
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Light or moderate southwest wind; cloudy, some rain or sleet tonight, local valley fog at first; becoming slowly milder.
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland & N.W. Scotland	
14. Mid. Scotland	As 11 - 12.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	Wind south, veering west, light to fresh; cloudy, a period of rain, bright intervals and local showers later; milder.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ☉ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS — ☉ Clear sky. ☉ Sky less than 1/8 clouded. ☉ Sky 1/8 to 1/4 clouded. ☉ Sky 1/4 to 1/2 clouded. ☉ Overcast sky. ☉ Rain falling. * Snow. * Sleet. ▲ Hail.
☉ Fog. ☉ Mist. ☉ Thunder. ☉ Thunderstorm. ☉ Slight haze.
SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A trough of low pressure off West Ireland is moving east slowly. A belt of rain will move eastward but will diminish in intensity and may die out. Fog will be widespread in Eastern England and the Midlands.

FURTHER OUTLOOK.

Probably milder generally. Unsettled but bright intervals.

10.40. G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.,
Forecasts issued at Director.

EXPLANATION OF CHART.

BAROMETER. Isobars are drawn for intervals of four millibars.
WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
 ☉ - Calm.
TEMPERATURE is given in degrees F.
WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 8th December, 1935.
1. S.E. England	Light or moderate westerly wind; fair; temperature rather above the average.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Moderate westerly wind, backing southwest later; mainly cloudy, some bright periods; showers; mild.
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	As 1 - 3.
10. N.E. England	
11. S.E. Scotland	Light or moderate westerly wind; bright periods, showers; average temperature, becoming milder.
12. S.W. Scotland & Isle of Man	
13. { A. W. Scotl'd. B. N.W. Scot- land.	Moderate westerly wind, backing southwest later; mainly cloudy, shower, hail locally; temperature rather above the average.
14. Mid-Scotland	
15. N.E. Scotland	As 11.
16. Orkney and Shetland	Moderate southerly wind, veering southwest; mainly cloudy, some bright periods; showers; temperature rather above the average.
17. N.W. Ireland	Moderate or fresh northwesterly wind, backing southwest; mainly cloudy, showers, perhaps hail locally at first, becoming mild.
18. N.E. Ireland	
19. S.E. Ireland	Moderate or fresh westerly wind, backing southwest and becoming strong; mainly cloudy, occasional showers at first, more general rain
20. S.W. Ireland	

AIR MINISTRY, METEOROLOGICAL OFFICE.

7th Sunday 8th December, 1935.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. **TEMPERATURE** is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than $\frac{1}{2}$ clouded. — Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A feeble ridge of high pressure is crossing the British Isles from west to east and a depression in mid-Atlantic will deepen and move northeast. Weather will be mainly fair in the East but showers will occur at first in the West and more general rain will spread later to extreme western districts.

FURTHER OUTLOOK.

Mild generally, rain spreading to most districts.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.
 Director.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 9th December, 1935.
1. S.E. England	Wind north to northwest, moderate, decreasing; local showers at first near the East Coast, fair elsewhere; average day temperature, frost inland at night, sharp in places; fog inland in the early morning, clearing slowly.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind northerly, moderate to fresh, decreasing; fair; average day temperature; frost inland at night.
6. South Wales	
7. North Wales	
8. N.W. England	Wind northerly, moderate, decreasing; fair; average day temperature, frost inland at night, sharp in places; fog inland in the early morning, clearing slowly.
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland	
14. B.N.W. Scotland	Wind northerly or variable light; fair; average day temperature, frost at night.
15. Mid. Scotland	As 7 - 13A.
16. N.E. Scotland	As 13B.
17. Orkney and Shetland	
18. N.W. Ireland	
19. N.E. Ireland	Wind light variable; fair; average day temperature, frost inland at night, sharp in places.
20. S.E. Ireland	
21. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
 WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — TEMPERATURE is given in degrees F.
 WEATHER SYMBOLS: — Clear sky. — Sky less than $\frac{1}{2}$ clouded. — Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. — Sky $\frac{3}{4}$ to $\frac{5}{8}$ clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail. — Fog. — Mist. T Thunder. T Thunderstorm. co* Slight haze.
 SEA DISTURBANCE. — Rough. — High.
 BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.
 An anticyclone lying off the Northwestern seaboard is spreading over the British Isles while a depression over Belgium is filling up and moving southeast. Apart from local showers at first in the East of England weather will become fair generally. Frost will occur at night with fog in the early morning.

FURTHER OUTLOOK.
 Fair for two or three days; frost and fog inland night and early morning.

Forecasts issued at 1030 G.M.T. GEORGE G. SIMPSON, R.C.B., D.Sc., F.R.S., Director.

† Max. Temp. for period 24h. yesterday to 17h. to-day; Min. Temp. 21h. - 9h. † Min. Temp. 17h. - 9h.

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h Wednesday, 11th December, 1935.

DISTRICTS. FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 11th Dec., 1935.

1. S.E. England	Wind northeast to east strong squally, a gale at times on the coast; cloudy; occasional slight rain; rather cold.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Wind northeast to east, fresh; mainly cloudy; rather cold.
7. North Wales	
8. N.W. England	Wind northeast to east moderate; bright periods; rather cold.
9. N. Midlands	As 8 - 5.
10. N.E. England	Wind east moderate; cloudy; rather cold.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	As 8.
13. A.W. Scotland, B.N.W. Scotland	Wind southeast light to moderate; mainly fine; rather cold, sharp frost at night.
14. Mid. Scotland	
15. N.E. Scotland	Wind southerly moderate; mainly cloudy; rather cold.
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	Wind easterly moderate; mainly fine; rather cold, sharp frost at night.
19. S.E. Ireland	
20. S.W. Ireland

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — Clear sky. ☁ Sky less than 1/8 clouded. ☁ Sky 1/8 to 1/4 clouded. ☁ Sky 1/4 to 1/2 clouded. ☁ Sky 1/2 to 3/4 clouded. ☁ Overcast sky. ☁ Rain falling. * Snow. * Sleet. * Hail. ☁ Fog. ☁ Mist. ☁ Thunder. ☁ Thunderstorm. ☁ Slight haze.
SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A ridge of high pressure extends southwest across the British Isles from an intense anticyclone over Scandinavia. Weather will be cloudy over most of England with occasional slight rain, but there will be less cloud in the West and Northwest than elsewhere. It will continue rather cold.

FURTHER OUTLOOK.

Similar.

Times of issue of Gale Warnings.

North Cone hoisted at 0950 on 15th in districts 1 and 2 and at 1400 on 15th in district 5.

GEORGE G. SIMPSON, K.C.B., D.Sc., F.R.S.,
Director.

Forecasts issued at 10.30 G.M.T.

Bar. Falling

Bar. Steady

Majestic

Scale 1:10,000,000.

Statute Miles.

15° 10° 5° W. 5° E.

BAROMETER. Isobars are drawn for intervals of two millibars.

WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol: — ○ TEMPERATURE is given in degrees F.

WEATHER SYMBOLS:— ○ Clear sky. ○ Sky less than $\frac{1}{10}$ clouded. ☉ Sky $\frac{1}{10}$ to $\frac{2}{10}$ clouded. ☁ Sky $\frac{3}{10}$ to $\frac{4}{10}$ clouded. ☁ Sky $\frac{5}{10}$ to $\frac{6}{10}$ clouded. ☁ Overcast sky. ● Rain falling. * Snow. ★ Sleet. ▲ Hail.

≡ Fog. ≡ Mist. T Thunder. T Thunderstorm. ∞ Slight haze.

SEA DISTURBANCE. Rough. High.

BAROMETRIC CHANGE from 4h to 7h in tenths of millibars is entered beneath the temperature.

An anticyclone over Scandinavia is decreasing in intensity while a ridge of high pressure extends southwest from it across the British Isles. Weather will be cloudy and rather cold generally to-day but there will be less cloud and colder weather to-morrow in the East and Southeast and these conditions will extend westwards.

Bright intervals and colder in the South and East; becoming colder elsewhere.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.,
Director.

EXPLANATION OF CHART.

BAROMETRIC. Isobars are drawn for intervals of four millibars.
WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
☉ = Calm.
TEMPERATURE is given in degrees F.
WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

AIR
MINISTRY.

7h Friday 13th December 1935.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 13th December, 1935.
1. S.E. England	Wind northeast, light to moderate; mainly cloudy, brighter intervals; mist or fog locally inland at night, clearing slowly; cold during the day, frost inland at night.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Wind light, variable; mainly cloudy, brighter intervals; fog inland at night, persisting locally; cold during the day, frost inland at night.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Wind westerly, light; cloudy; occasional slight rain; rather cold.
12. S.W. Scotland & Isle of Man	
13. { A.W. Scotland. B.N.W. Scotland.	
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	Wind northeast or variable, light; mainly cloudy, brighter intervals; rather cold during the day, frost inland at night.
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circles outside weather symbol. — ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/10 clouded. ○ Sky 1/10 to 1/2 clouded. ○ Sky 1/2 to 3/4 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail.
= Fog. = Mist. T Thunder. K Thunderstorm. ∞ Slight haze.
SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

An anticyclone is centred west of the British Isles and pressure is high along the Baltic to Central Russia. Weather will be mainly cloudy but with brighter intervals. It will continue cold and frost will occur inland at night.

FURTHER OUTLOOK.

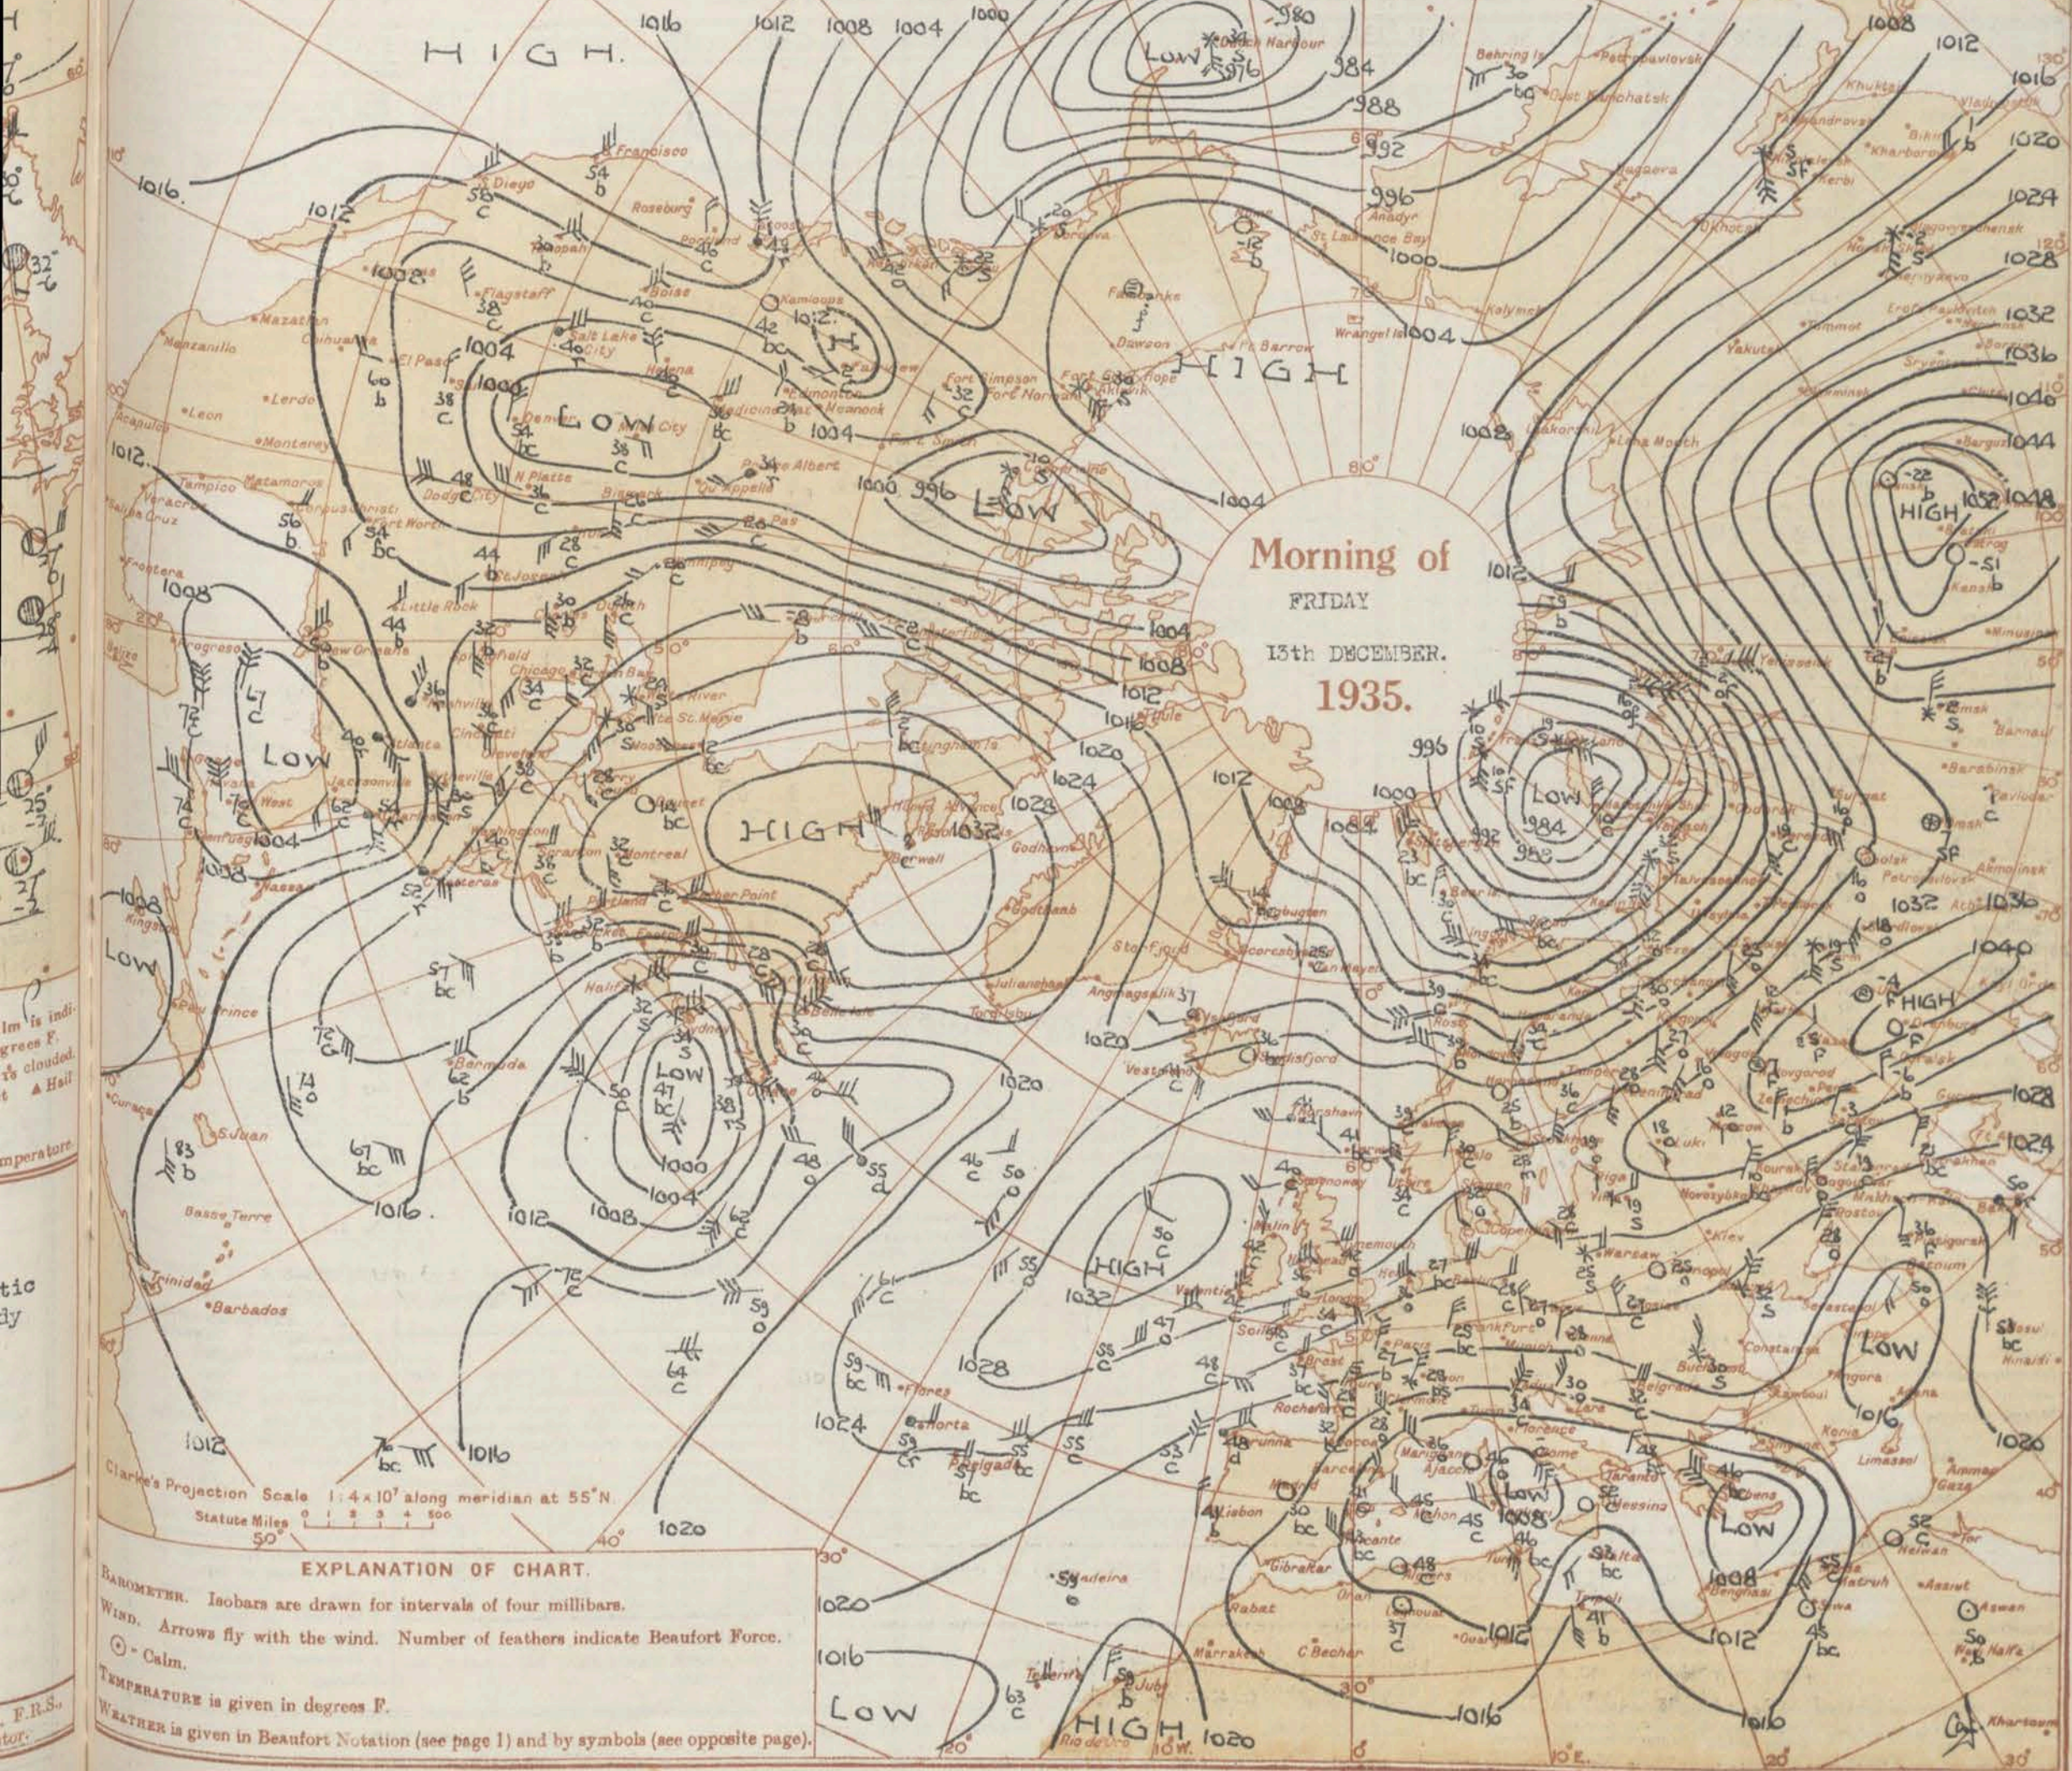

Becoming milder.

Forecasts issued 10.30 G.M.T.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.,
Director.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 14th December, 1935.
1. S.E. England	Wind light variable, becoming southwest, moderate; cloudy; mist or fog locally; cold, becoming milder.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Wind southwest, moderate; cloudy; becoming milder.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	Wind south to southwest, moderate, increasing; snow at first, changing later to rain; fog on the hills; cold, becoming milder towards evening.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. { A. W. Scotland. B. N. W. Scotland.	Wind southerly, fresh to strong, veering tonight; rain to-day, bright intervals and showers later; average temperature to-day, cooler tomorrow.
14. Mid Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	Wind south to southwest, fresh, veering tomorrow; occasional rain to-day, bright intervals and showers tomorrow; average temperature...
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than 1/8 clouded. — Sky 1/8 to 1/4 clouded. — Sky 1/4 to 1/2 clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail.
Fog. — Mist. T Thunder. K Thunderstorm. oo Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A depression off Eastern Iceland is moving northeast and a trough of low pressure is approaching the Western seaboard from the Atlantic. Snow will occur at first in northern districts, changing later to rain and it will be cloudy generally. It will become milder gradually in all districts.

FURTHER OUTLOOK.

Probably rain later in the North; fair and milder in the East and Southeast.

Forecasts issued at 10.05 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

† Max. Temp. for period 21h. yesterday to 17h. to-day; Min. Temp. 21h.-9h. † Min. Temp. 17h.-9h.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M. 15th December, 1935.
1. S.E. England	Light or moderate south to southwest wind, veering west later;
2. E. England...	cloudy with occasional rain and local mist or fog at first; some bright
3. E. Midlands	intervals but showers later; becoming milder.
4. W. Midlands	
5. S.W. England	Moderate to fresh west to northwest wind, bright intervals;
6. South Wales	showers with hail locally; average temperature.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	Light or moderate southerly wind, veering southwest or west later;
11. S.E. Scotland	cloudy with occasional rain or sleet and hill fog at first; some bright
12. S.W. Scotland	intervals and showers later; rather cold.
13. A.W. Scotland	Moderate to fresh westerly wind, mainly cloudy but some bright
14. B.N.W. Scotland	intervals; rain, hail and sleet showers with snow on hills; rather cold.
15. Mid-Scotland	
16. N.E. Scotland	Wind variable to southwesterly, fresh to strong; mainly cloudy;
17. Orkney and Shetland	rain and sleet showers; rather cold.
18. N.W. Ireland	As 12 - 14.
19. N.E. Ireland	
20. S.W. Ireland	As 4 - 9.

BAROMETER. Isobars are drawn for intervals of two millibars.

WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol.

WEATHER SYMBOLS: ☉ Clear sky. ☁ Sky less than 1/2 clouded. ☂ Sky 1/2 to 3/4 clouded. ☄ Sky 3/4 to 5/8 clouded. ☁ Overcast sky. ☔ Rain falling. * Snow. * Sleet. ▲ Hail.

SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.

BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A depression off North Scotland is moving southeast and a trough of low pressure over the east of Great Britain is travelling eastwards. Mainly cloudy conditions with occasional rain will continue for a time in eastern districts but bright intervals and showers will become general later.

FURTHER OUTLOOK.

showers and bright intervals.

L.A.C.

EXPLANATION OF CHART.

BAROMETER. Isobars are drawn for intervals of four millibars.
WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
☉ - Calm.
TEMPERATURE is given in degrees F.
WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

[illegible]

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

† Sea disturbance reported from Dungeness

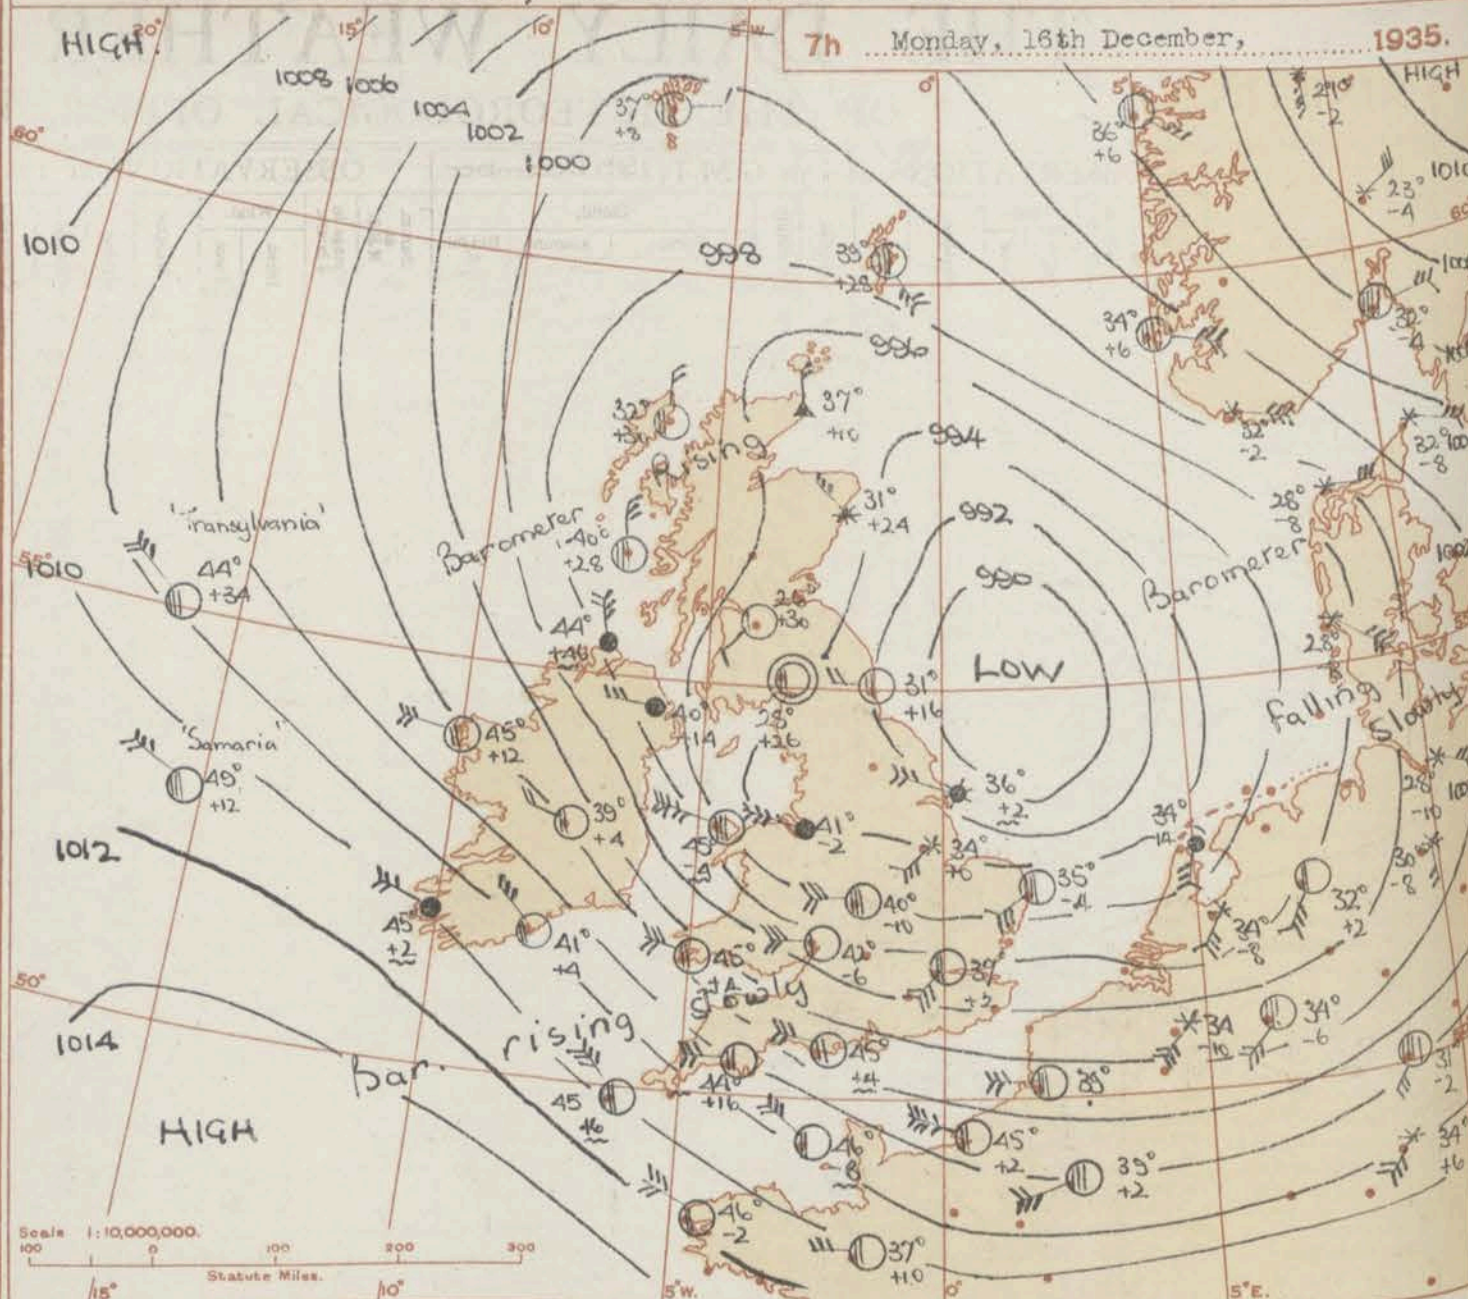

NOTE.—The accuracy of individual entries in this Report cannot be guaranteed. Corrections and additions can be obtained, if necessary, on application to the Meteorological Office, London, W.C.2

AIR MINISTRY, METEOROLOGICAL OFFICE.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 16th December, 1935.
1. S.E. England	Fresh southwest wind, veering and decreasing; bright periods, showers of rain, sleet or snow; local morning fog; cold, sharp frost at night.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Fresh squally northwest wind, decreasing; bright periods, showers of rain, or hail at first; perhaps occasional rain or sleet tomorrow, with snow on high ground; rather cold, frost locally at night.
6. South Wales	
7. North Wales	Strong northwest wind, gale locally on coasts at first, moderating; bright periods, showers of rain, hail, sleet or snow; local morning fog; cold, frost at night.
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Moderate wind, mainly between northwest and northeast; bright periods, showers of sleet, snow or hail; local morning fog; cold, frost at night.
13. A.W. Scotland & N.W. Scotland	
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	Fresh northwest wind, decreasing; bright periods, showers of rain, sleet or hail; cold, frost at night.
18. N.E. Ireland	
19. S.E. Ireland	Fresh northwest wind, decreasing; showers of rain or hail at first; occasional rain tomorrow; rather cold.
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
 WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — TEMPERATURE is given in degrees F.
 WEATHER SYMBOLS: — Clear sky. — Sky less than $\frac{1}{2}$ clouded. — Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail.
 — Fog. — Mist. T Thunder. T Thunderstorm. — Slight haze.
 SEA DISTURBANCE. — Rough. — High.
 BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A depression over the North Sea is moving southeast and another in mid-Atlantic is likely to move east-southeast. There will be wintry showers in most districts.

FURTHER OUTLOOK.

Rather cold or cold; local wintry showers.

Time of issue of Gale Warning.

North Cone hoisted at 1415 on 15th in districts 5, 6, 7, 8 and 19.

Forecasts issued at 1010 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 17th Dec, 1935.
1. S.E. England	Light north wind; mainly fair, but local sleet showers chiefly near east coast, local morning fog; rather cold, sharp frost inland at night.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Moderate east wind, decreasing, freshening from southeast tomorrow; mainly fair at first, perhaps occasional rain tomorrow; rather cold, frost locally at night.
6. South Wales	
7. North Wales	Light or moderate north wind, considerable bright periods, local wintry showers; local morning fog; rather cold, sharp frost inland at night.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Light or moderate northeast wind, bright periods, showers of rain, sleet or snow; local morning fog; rather cold, frost inland at night.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	As 6 - 9.
13. { A.W. Scotld. B.N.W. Scot- land.	
14. Mid Scotland	As 10 - 11.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	Light variable wind, fine at first, perhaps occasional rain tomorrow; rather cold, frost inland at night.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ☉ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ☉ Clear sky. ☉ Sky less than 1/8 clouded. ☉ Sky 1/8 to 1/4 clouded. ☉ Sky 1/4 to 1/2 clouded. ☉ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail.
☉ Fog. ☉ Mist. T Thunder. T Thunderstorm. ☉ Slight haze.
SEA DISTURBANCE: ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A depression over the Southern North Sea is filling up and another off Northwest France is moving east-south-east. A deep depression in Mid-Atlantic is moving east slowly. Weather will be mainly fair apart from local wintry showers.

FURTHER OUTLOOK.

Mainly fair and rather cold in the North and East; doubtful in the West.

Forecast issued at 1040 G.M.T. GEORGE O. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

AIR MINISTRY, METEOROLOGICAL OFFICE. Chart of Weather in the Northern Hemisphere.

Morning of
TUESDAY.
17th DECEMBER.
1935.

Clarke's Projection Scale 1:4x10⁷ along meridian at 55°N
Statute Miles 0 1 2 3 4 500

EXPLANATION OF CHART.

BAROMETER. Isobars are drawn for intervals of four millibars.

WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.

☉ = Calm.

TEMPERATURE is given in degrees F.

WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

OF THE METEOROLOGICAL OFFICE, LONDON.

EXPLANATION OF FIGURES, LETTERS AND SYMBOLS.

COLUMNS 11, 25.—FORM OF CIRRUS CLOUD.

- 0 No cirriform cloud.
- 1 Fine Ci not increasing: sparse.
- 2 Fine Ci not increasing: abundant but not
a continuous layer.
- 3 Anvil Ci (usually dense).
- 4 Fine Ci increasing: usually in tufts.
- 5 Ci or Ci-St increasing: still below 45° alti-
tude: often in polar bands.
- 6 Ci or Ci-St increasing and reaching above 45°
altitude: often in polar bands.
- 7 Veil of Ci-St covering whole sky.
- 8 Ci-St not increasing and not covering whole
sky.
- 9 Ci-Cu predominating, and a little cirrus.

(Ci-Cu may occur with any of the types 1 to 8).

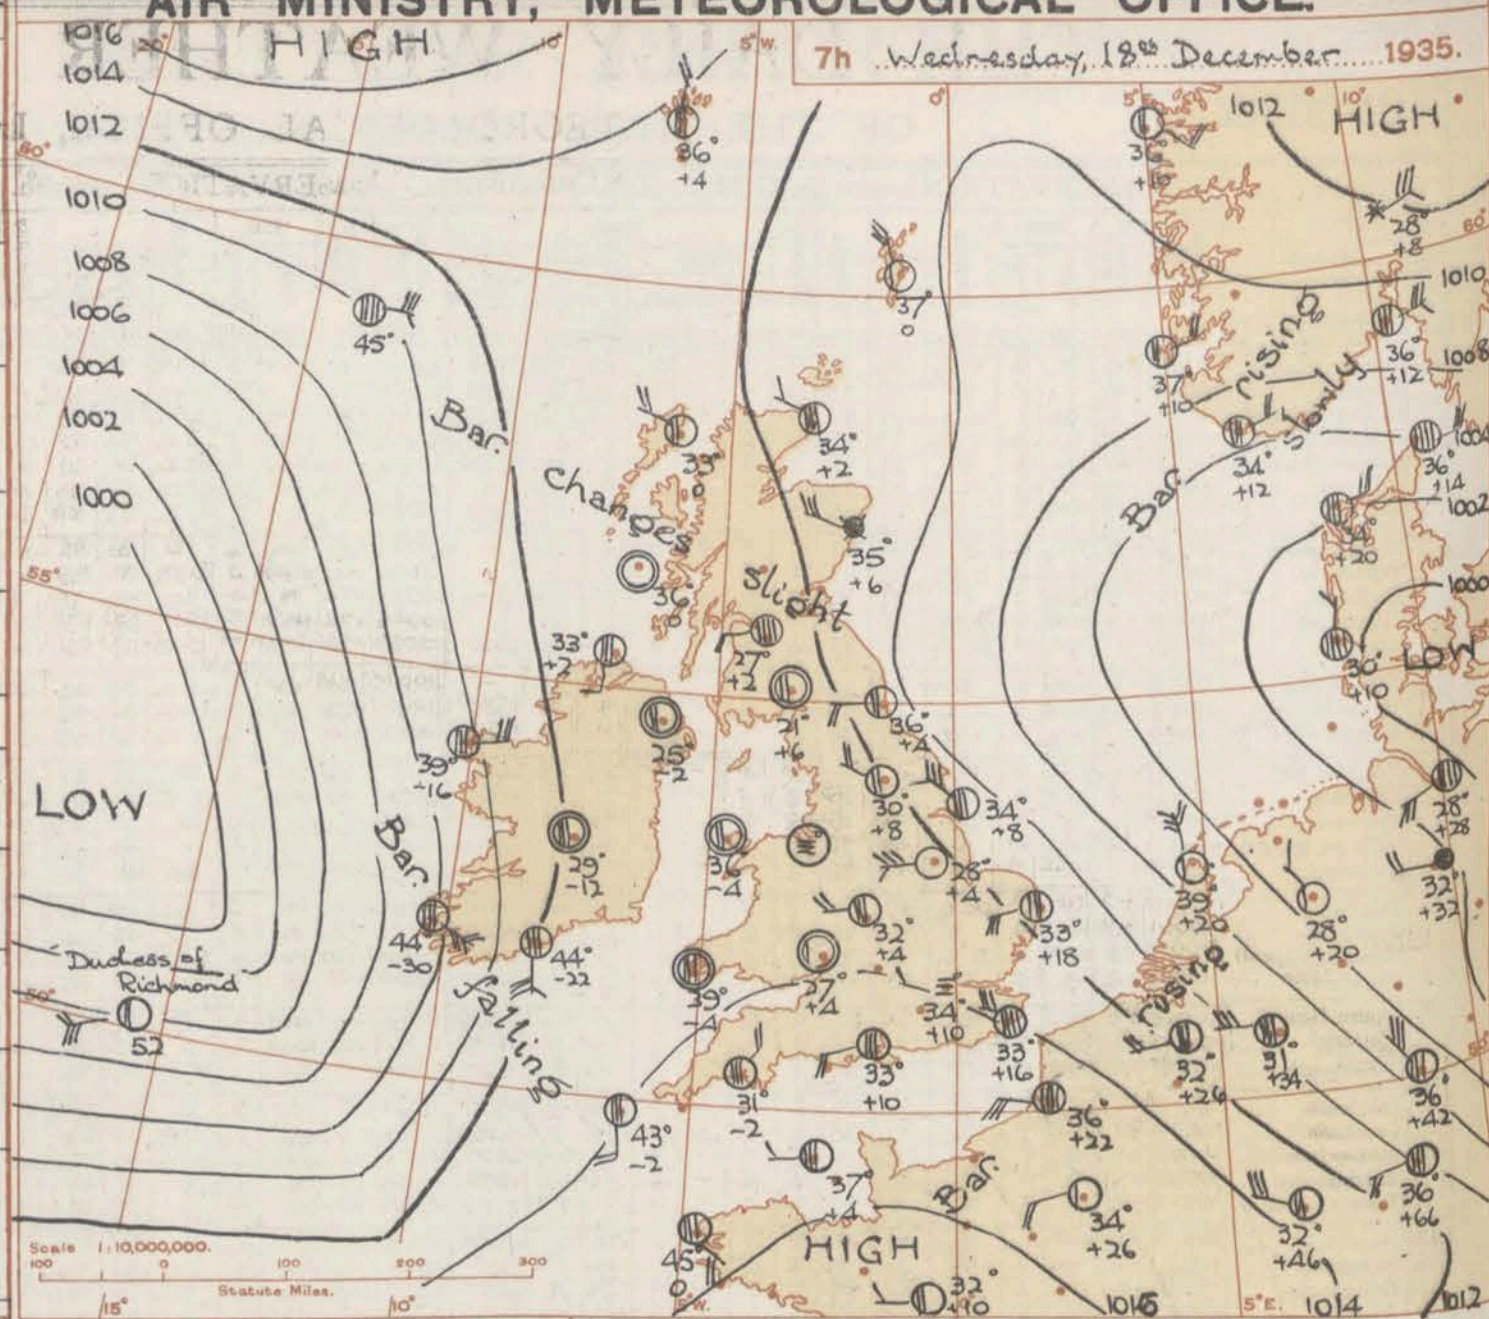

0 Dry.	5 Covered with ice or glazed frost.
1 Wet.	6 Partly covered by snow or hail.
2 Flooded.	7 Covered with snow, less than 6 ins., but ground not frozen.
3 Covered with thawing snow.	8 Covered with snow, less than 6 ins., and ground frozen.
4 Frozen hard and dry.	9 Covered with snow greater than 6 ins. deep.

NOTE.—The accuracy of individual entries in this Report cannot be guaranteed. Corrections and additions can be obtained, if necessary, on application to the Meteorological Office, London, W.C.2.

1 Sea disturbance reported from O. 1908.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 18th December, 1935.
1. S.E. England	Light variable wind, becoming southeast; mainly fair; local morning fog; rather cold; frost locally at night.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Light variable wind, backing southeast, strong locally on coast; cloud increasing, some rain later with local sleet or snow; rather cold.
5. S.W. England	
6. South Wales	
7. North Wales	Light or moderate southeast wind, fresh locally on coasts; mainly fair; local morning fog; rather cold, frost locally at night.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Light or moderate southeast wind; bright intervals, local showers of rain or sleet; local morning fog; rather cold, frost locally at night.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. { A.W. Scotl. B.N.W. Scot- land	As 7 - 9.
14. Mid-Scotland	
15. N.E. Scotland	As 10 - 11.
16. Orkney and Shetland	
17. N.W. Ireland	Freshening southeast wind, cloudy, rain at times, sleet locally at first; rather cold.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

H.M. Stationery Office Press, Kingsway, W.C.2.

BAROMETER. Isobars are drawn for intervals of two millibars.

WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circles outside weather symbol. — ○ TEMPERATURE is given in degrees F.

WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/10 clouded. ○ Sky 1/10 to 1/10 clouded. ○ Sky 1/10 to 1/10 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail.

SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.

BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A ridge of high pressure over the British Isles is moving east while a trough of low pressure off West Ireland and Southwest England is extending its influence eastwards. There will be rain in the West but in the East and North mainly fair weather is expected to continue.

FURTHER OUTLOOK.

Probably mainly fair and rather cold in the North and East; doubtful in the West.

Forecasts issued at 1000 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

EXPLANATION OF CHART.

BAROMETER. Isobars are drawn for intervals of four millibars.
WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
☉ Calm.
TEMPERATURE is given in degrees F.
WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h Thursday 19th December 1935.

FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 19th December, 1935.

1. S.E. England	Light northeast wind, mainly cloudy, local drizzle and fog; rather cold, frost locally at night.
2. E. England...	Light northeast wind; mist or fog in many places, bright periods locally, local showers; rather cold, frost at night.
3. E. Midlands	Light variable wind; mist or fog in many places; bright periods locally; cold; frost at night.
4. W. Midlands	Light or moderate east wind; local rain, bright periods later; rather cold; frost locally at night.
5. S.W. England	As 4.
6. South Wales	As 4.
7. North Wales	As 4.
8. N.W. England	As 4.
9. N. Midlands	As 4.
10. N.E. England	Light northeast wind; bright periods, local showers near coast; local fog; rather cold, frost locally at night.
11. S.E. Scotland	Light variable wind; bright intervals; local fog; cold, sharp frost at night.
12. S.W. Scotland & Isle of Man	As 10 - 11.
13. { A. W. Scotl. B. N.W. Scot- land	As 10 - 11.
14. Mid-Scotland	As 10 - 11.
15. N.E. Scotland	As 10 - 11.
16. Orkney and Shetland	As 10 - 11.
17. N.W. Ireland	Light east wind; bright periods, local fog; rather cold, frost locally at night.
18. N.E. Ireland	As 5.
19. S.E. Ireland	As 5.
20. S.W. Ireland	As 5.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/8 clouded. ○ Sky 1/8 to 1/4 clouded. ○ Sky 1/4 to 1/2 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A wedge of high pressure covers Northern districts of the British Isles and a shallow depression over Northwest France is moving southeast. A depression over Southern Scandinavia is moving north-northwest. There will be widespread fog. Local rain or drizzle will occur at first in the extreme South and later in the Northeast.

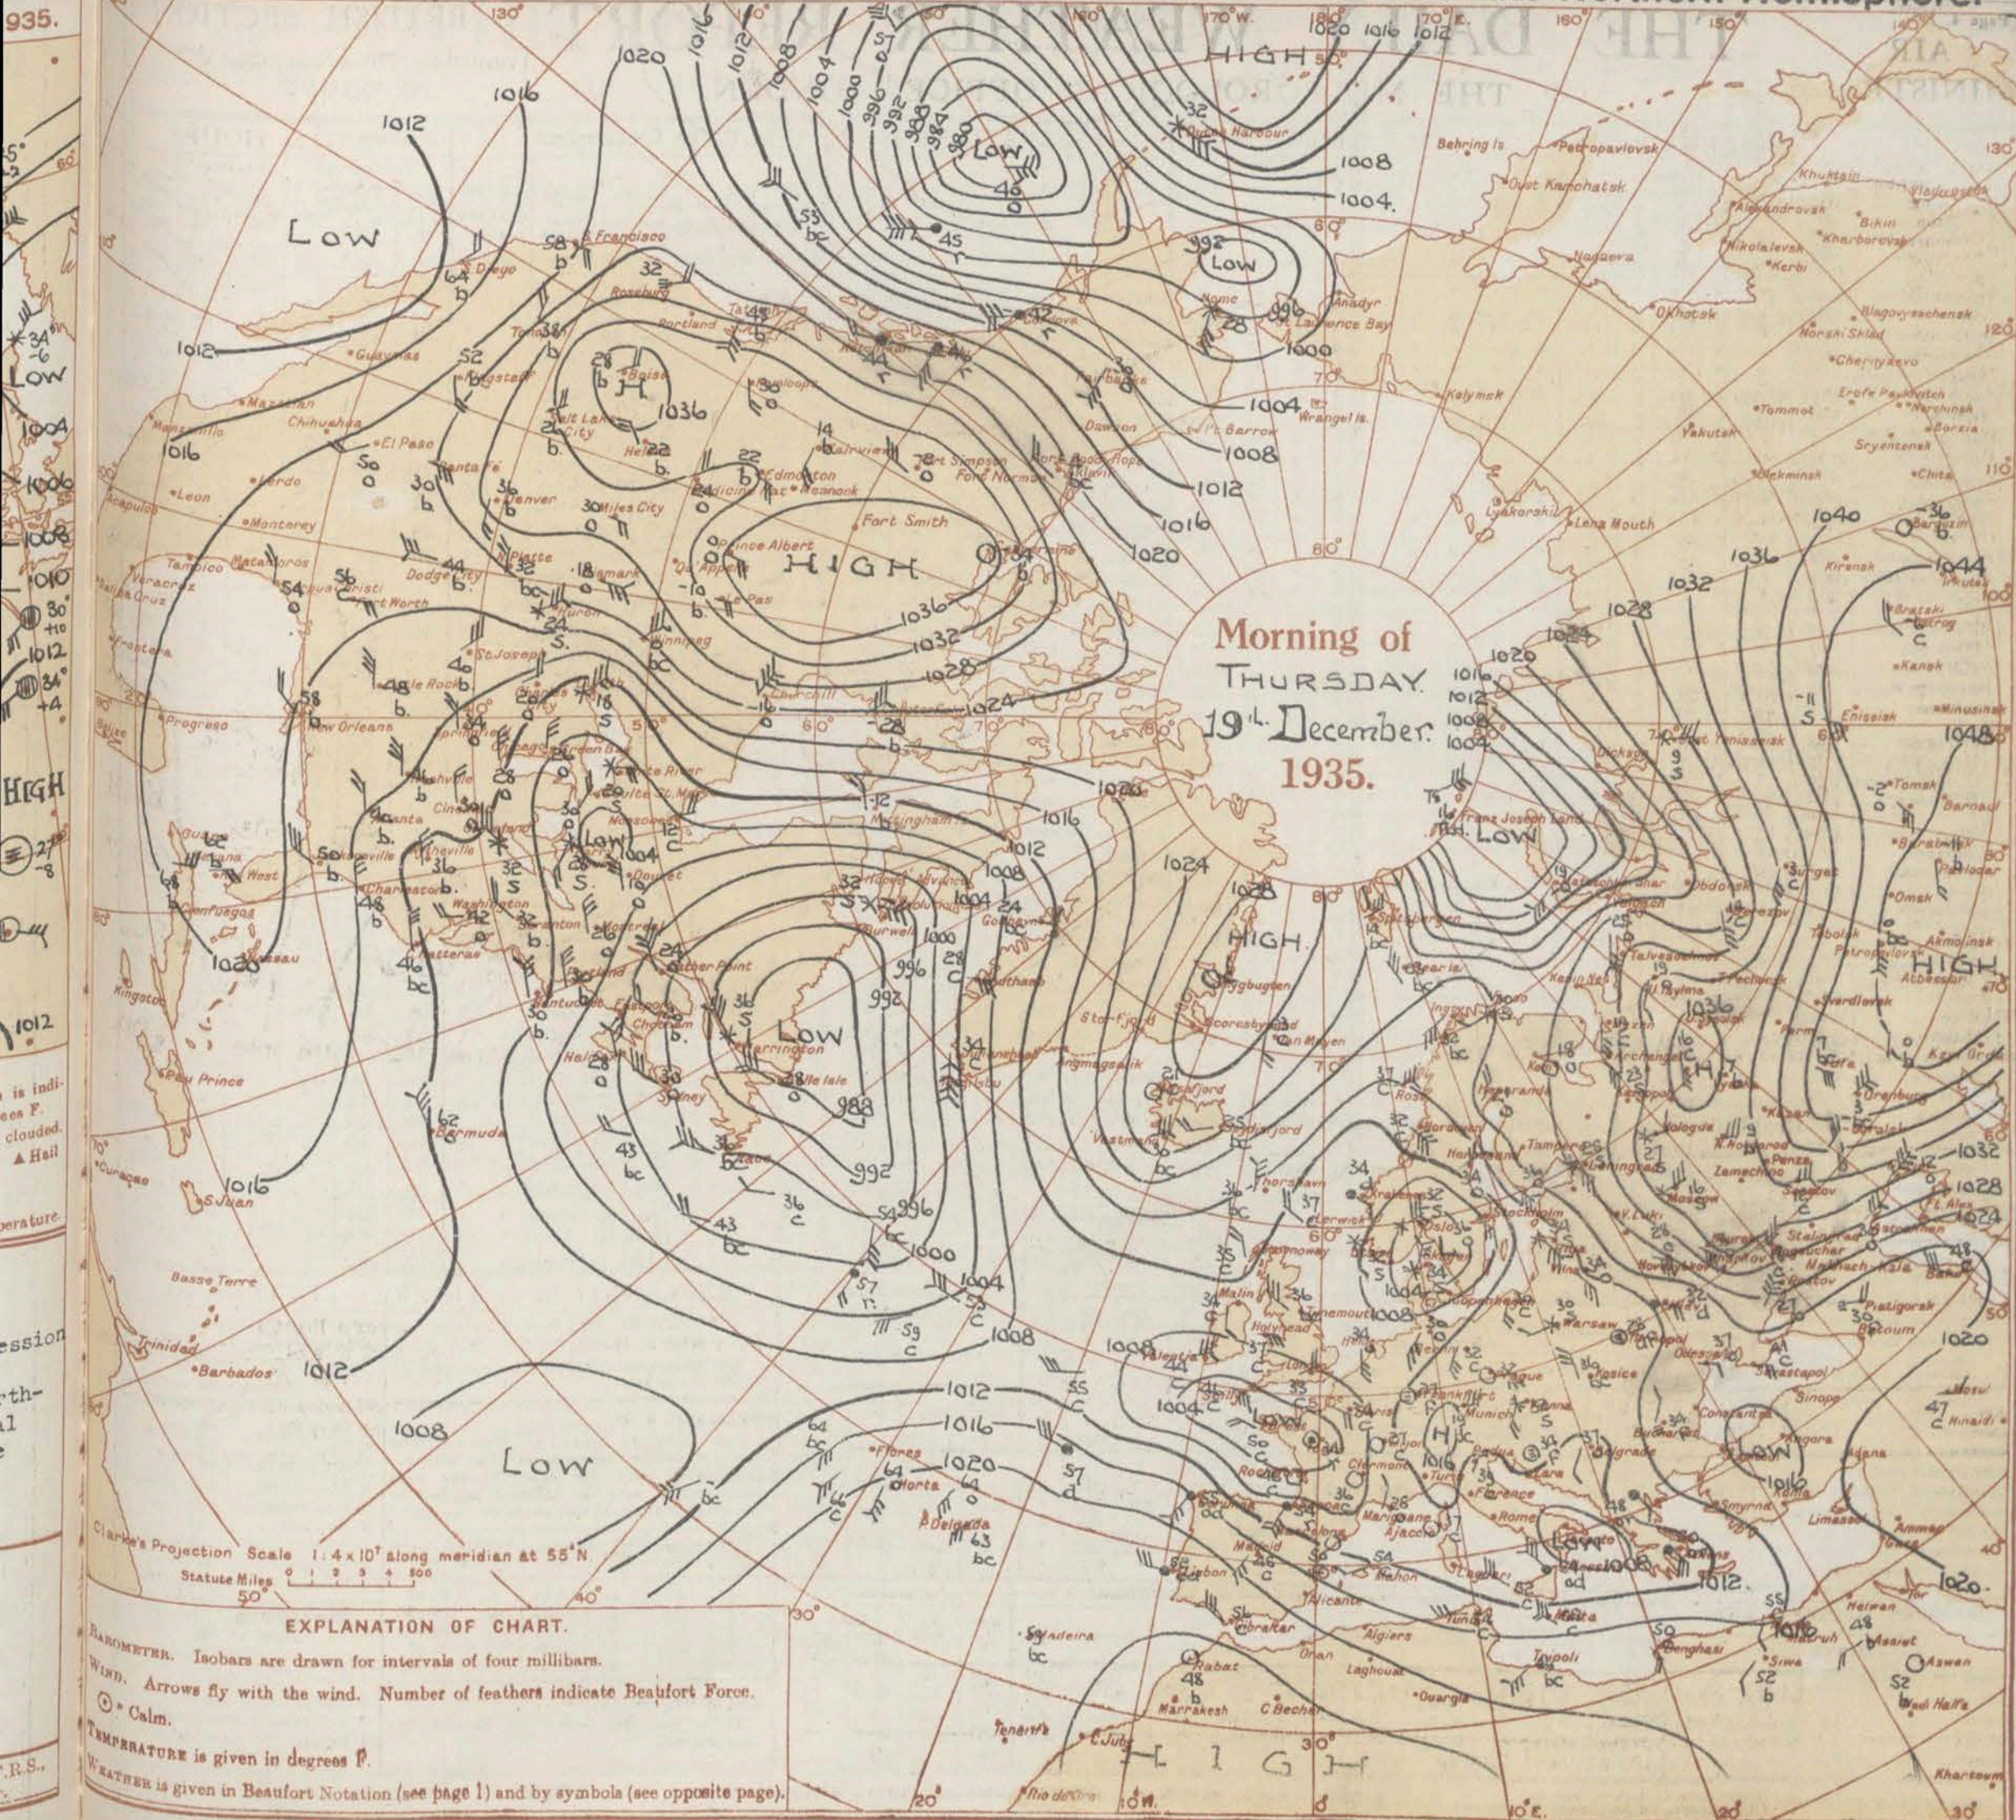

FURTHER OUTLOOK.

Fog and frost in many districts.

Forecasts issued at 1030 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

AIR MINISTRY, METEOROLOGICAL OFFICE. Chart of Weather in the Northern Hemisphere.

AIR MINISTRY, METEOROLOGICAL OFFICE.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol :— ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS :— ○ Clear sky. ○ Sky less than $\frac{1}{10}$ clouded. ⊕ Sky $\frac{1}{10}$ to $\frac{1}{10}$ clouded. ⊕ Sky $\frac{1}{10}$ to $\frac{1}{10}$ clouded. ⊕ Overcast sky. ● Rain falling. * Snow. ★ Sleet ▲ Hail
≡ Fog. ≡ Mist. T Thunder. T Thunderstorm. ∞ Slight haze.
SEA DISTURBANCE. ~ Rough. ~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

Pressure is high to the north of Iceland. A depression in Mid-Atlantic is moving east-south-east and another over Southern Scandinavia is almost stationary. There will be widespread fog over a large part of England and Wales. There will be local showers of rain or sleet in the North, with snow on the high ground, while in the Southwest occasional rain will occur.

FURTHER OUTLOOK.

Continuing rather cold or cold, with fog in many districts.

1030 G.M.T. GEORGE G. SIMPSON, K.C.B., D.Sc., F.R.S.
Forecasts issued at _____

PAST 24 HOURS.

EXPLANATION OF FIGURES, LETTERS AND SYMBOLS.

COLUMNS 5, 19, 37, 38, 39, 40—BEAUFORT NOTATION
AND SYMBOLS FOR WEATHER.

b, blue sky (not more than a quarter covered with cloud).
 bc, sky partly cloudy (one half covered). c, generally cloudy.
 d, drizzle. e, wet air. g, gloom.
 f, fog, visibility 220-1100 yds.
 F, thick fog, less than 220 yds.
 fs, fog over sea (coast station).
 fg, fog on lower ground (inland station).
 m, mist, visibility 1100-2200 yds.
 h, hail. i, intermittent.
 jp, precipitation within sight of station.
 ks, storm of drifting snow.
 k/s, slight storm of drifting snow (generally low).
 K/S, heavy storm of drifting snow (generally low).
 s_o/k, slight storm of drifting snow (generally high).
 S/k, heavy storm of drifting snow (generally high).
 KQ, line squall. l, lightning.
 o, overcast sky. p, passing showers.

q, squalls. r, rain. s, snow.
rs, sleet. t, thunder.
u, ugly, threatening sky.
v, unusual visibility. w, dew.
x, hoar frost. y, dry air.
z, dust haze: the turbid atmosphere
of dry weather.
h(r), "hail" or "rain and hail."
Capital letters indicate intense;
suffix o indicates slight; repetition
of letters indicates continuity; thus
R, heavy rain. r_o, slight rain.
rr, continuous rain.
<, less than (for cloud height).
⊕, Solar halo. ⊙, lunar halo. ↘, gale.
With present weather is combined,
whenever possible, the general
character of the weather.
A "solidus" divides actual exist-
ing weather from preceding con-
ditions thus:—bc/r, fair weather
after rain; —, has decreased;
+ has increased.

COLUMNS 9, 23.—FORM OF LOW CLOUD.

- 0 No low clouds.
- 1 Fair weather Cu.
- 2 Large Cu without anvil.
- 3 Cu-Nb.
- 4 St-Cu formed by the spreading out of Cu.
- 5 Layer of St or St-Cu.
- 6 Ragged low clouds of bad weather.
(or. Fracto-nimbus).
- 7 Fair weather Cu and St-Cu.
- 8 Large-Cu (or Cu-Nb) and St-Cu.
- 9 Large-Cu (or Cu-Nb) and ragged low clouds
of bad weather.

COLUMNS 12, 13, 26, 27.

The figures in these columns indicate the number of tenths of the sky covered by low cloud and all forms of cloud respectively. An entry "4-6" means that the cloud amount may be 4, 5 or 6; similarly for other grouped entries. "tr" signifies a small amount of cloud (trace) covering less than $\frac{1}{10}$ of the sky. "9" signifies an overcast sky with a few small openings.

COLUMNS 10, 24.—FORM OF MEDIUM CLOUD.

- 0 No medium clouds.
- 1 Typical A-St (thin).
- 2 Typical A-St (thick; sun or moon in-
visible), or Nimbo- stratus (Nb-St).
- 3 Single layer of A-Cu or high St-Cu.
- 4 A-Cu in isolated bands. Individually de-
creasing (often lenticular).
- 5 A-Cu in bands (increasing).
- 6 A-Cu formed from the spreading out of Cu.
- 7 A-Cu associated with A-St or A-St with parts
resembling A-Cu.
- 8 A-Cu Castellatus (or A-Cu in ragged frag-
ments).
- 9 A-Cu in several layers generally associated
with fibrous veils and a chaotic appearance
of the sky.

COLUMN 29.—STATE OF GROUND.

0 Dry.	5 Covered with ice or glazed frost.
1 Wet.	6 Partly covered by snow or hail.
2 Flooded.	7 Covered with snow, less than 6 ins., but ground not frozen.
3 Covered with thawing snow.	8 Covered with snow, less than 6 ins., and ground frozen.
4 Frozen hard and dry.	9 Covered with snow greater than 6 ins. deep.

COLUMNS 11, 25.—FORM OF CIRRUS CLOUD.

- 0 No cirriform cloud.
- 1 Fine Ci not increasing: sparse.
- 2 Fine Ci not increasing: abundant but not a continuous layer.
- 3 Anvil Ci (usually dense).
- 4 Fine Ci increasing: usually in tufts.
- 5 Ci or Ci-St increasing: still below 45° altitude: often in polar bands.
- 6 Ci or Ci-St increasing and reaching above 45° altitude: often in polar bands.
- 7 Veil of Ci-St covering whole sky.
- 8 Ci-St not increasing and not covering whole sky.
- 9 Ci-Cu predominating, and a little cirrus.

(Ci-Cu may occur with any of the types 1 to 8).

NOTE.—The accuracy of individual entries in this Report cannot be guaranteed. Corrections and additions can be obtained, if necessary, on application to the Meteorological Office, London, W.C.2.

1 Sea disturbance reported from Dungeness.

AIR MINISTRY, METEOROLOGICAL OFFICE.

A hand-drawn weather map of the South Pacific region, showing pressure systems, isobars, and temperature data. The map includes labels for 'HIGH', 'LOW', 'Barometer', 'Barometric', 'falling slowly', 'changes', and 'slight'. It also features a scale bar and a date stamp: '7h ... Saturday, 21st December, 1935.'

The map shows a high-pressure system (HIGH) in the upper left and a low-pressure system (LOW) in the lower right. Isobars are drawn at intervals of 2 units, ranging from 1000 to 1014. Temperature data is plotted at various locations, with some points marked by circles and others by crosses. The map also includes a scale bar (0 to 300 statute miles) and a date stamp: '7h ... Saturday, 21st December, 1935.'

Handwritten annotations on the map include:

- Barometer**: Written vertically across the center of the map.
- Barometric**: Written horizontally across the lower center of the map.
- falling slowly**: Written diagonally across the upper center of the map.
- changes**: Written diagonally across the lower right of the map.
- slight**: Written diagonally across the far right of the map.

Other labels on the map include 'Duchess of Atholl' and 'Ascania'.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol :—  TEMPERATURE is given in degrees F.
WEATHER SYMBOLS :—  Clear sky.  Sky less than $\frac{1}{10}$ clouded.  Sky $\frac{1}{10}$ to $\frac{3}{10}$ clouded.  Sky $\frac{3}{10}$ to $\frac{7}{10}$ clouded.  Overcast sky.  Rain falling. * Snow. * Sleet.  Hail.
 Fog.  Mist. T Thunder. K Thunderstorm. ∞ Slight haze.
SEA DISTURBANCE.  Rough.  High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

Pressure is high north of Iceland and relatively low to east and west of the British Isles. Weather will continue cold with mist or fog in many districts and local wintry showers in the North.

Little change.

Forecasts issued at 1030 G.M.T.

LONDON OBSERVATIONS.																																							
Day 7h-18h. Kew & Croydon.																																							
9h-18h. Kensington.																																							
9h-21h. other stations except for rainfall which is 9h-18h.																																							
Height above M.S.L. in feet.																																							
Weather.																																							
Temperature.																																							
Rainfall.																																							
Sunshine.																																							
Humidity.																																							
Atmospheric Pollution.																																							
EXPLANATION OF FIGURES, LETTERS, etc.																																							
COLUMNS 2, 16.																																							
The barometric tendency is expressed in tenths of a millibar.																																							
COLUMNS 4, 18.																																							
The BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers is the speed at about 30 feet above the ground.																																							
COLUMNS 8, 22 - Code for surface visibility.																																							
Objects not visible at																																							
0 Dense fog 55 yards.																																							
1 Thick fog 220 "																																							
2 Fog 550 "																																							
3 Moderate fog 1,100 "																																							
4 Mist or haze 1½ miles.																																							
5 Poor visibility 2½ "																																							
6 Moderate " 6½ "																																							
7 Good " 12½ "																																							
8 Very good " 31 "																																							
9 Excellent " beyond 31m.																																							
COLUMNS 30. - Code for State of Sea.																																							
0 Calm. 5 Very rough.																																							
1 Smooth. 6 High.																																							
2 Slight. 7 Very high.																																							
3 Moderate. 8 Precipitous.																																							
4 Rough. 9 Confused.																																							
COLUMNS 34, 35.																																							
Tr. = rain has fallen, but amount less than 0.1 mm.																																							
FOREIGN OBSERVATIONS.

AIR MINISTRY. METEOROLOGICAL OFFICE.

FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 22nd December, 1935.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 22nd December, 1935.
1. S.E. England	Light or moderate westerly wind, fresh locally on coast; fair or fine; local fog early morning; cold or rather cold; frost in many places at night.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Light variable wind; fine; cold; frost at night.
6. South Wales	As 1 - 4.
7. North Wales	Moderate or fresh northwest wind; showers of rain sleet or snow; rather cold; frost at night.
8. N.W. England	
9. N. Midlands	As 7 - 8.
10. N.E. England	As 1 - 4.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Moderate or fresh northwest to north wind; bright periods; local showers of snow or hail; cold or rather cold; frost at night.
13. { A.W. Scotland B.N.W. Scotland	
14. Mid. Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	Light variable wind; fine; cold; frost at night.
18. N.E. Ireland	As 11 - 16.
19. S.E. Ireland	As 17.
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than $\frac{1}{2}$ clouded. — Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. — Sky $\frac{3}{4}$ to $\frac{5}{8}$ clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail. — Fog. — Mist. T Thunder. T Thunderstorm. — Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

Pressure is low over Scandinavia and the Baltic and a ridge of high pressure extends from Iceland to Ireland and across to France. A depression off the northwest coast of Spain will move southeast. Apart from some wintry showers in the North weather will be fair or fine and cold generally.

FURTHER OUTLOOK

Continuing cold generally.

Forecasts issued at 1000 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M. 23rd December, 1935.
1. S.E. England	Wind variable becoming east to southeast, light or moderate; much fog at first, but otherwise fair; perhaps snow, sleet or rain tomorrow with chance of glazed frost; cold, with frost all day in foggy areas.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Freshening east to southeast wind; fair at first, rain or sleet later; perhaps snow locally inland; cold, becoming less cold.
6. South Wales	
7. North Wales	As 1 - 4.
8. N.W. England	
9. N. Midlands	Light variable wind; finally east to southeast, fair; much fog on low ground, dense locally; cold, severe frost at night, persisting locally in the day.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Light southeast wind, freshening later; dense fog at first, clearing tomorrow, with increasing cloud; cold, severe frost inland.
13. (A.W. Scotland) B.N.W. Scotland	
14. Mid. Scotland	Light northwest to variable wind; local snow showers, then fair; cold, severe frost inland at night.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	As 5 - 6.
19. S.E. Ireland	
20. S.W. Ireland	Strong to gale southeast wind; cloudy, some rain; becoming milder.

A.M. Stationary Office Press, Kingsway, W.C.2.

AIR MINISTRY, METEOROLOGICAL OFFICE.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than 1/8 clouded. ○ Sky 1/8 to 1/4 clouded. ○ Sky 1/4 to 1/2 clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail. = Fog. = Mist. T Thunder. Z Thunderstorm. w Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A feeble ridge of high pressure is crossing the British Isles. A large and deep depression is approaching West Ireland, and a trough extending to Southern France will move northeast. Weather will be fair at first apart from fog, but subsequently will become unsettled with snow in many districts, probably followed by milder weather in the South.

FURTHER OUTLOOK.

Unsettled generally. Becoming milder in the South; probably further snow locally in the North.

TIMES OF ISSUE OF GALE WARNING.

South Cone hoisted at 0950 G.L.T. in parts of districts 17 and 20, on 23rd December.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.
 Forecasts issued at 10. 35 G.L.T. Director.

EXPLANATION OF CHART.

BAROMETER. Isobars are drawn for intervals of four millibars.
WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
 ☉ = Calm.
TEMPERATURE is given in degrees F.
WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h Tuesday, 24th December, 1935.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 24th December, 1935.
1. S.E. England	
2. E. England...	Moderate or fresh southerly wind; dull, rainy; a mainly fair interval tonight and early tomorrow; milder.
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Fresh southerly wind, stronger locally later; a fair interval apart from local showers, followed by further rain; mild.
6. South Wales	As 1 - 4.
7. North Wales	
8. N.W. England	
9. N. Midlands	Fresh or strong southeast wind, approaching gale locally on coast at first, veering and moderating somewhat later; dull, some rain or sleet; snow locally at first; becoming milder.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A. W. Scotland	
14. Mid Scotland	Freshening southeast wind; cloudy, rain, sleet or snow later; becoming milder.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	Wind southeast or south, strong at times; cloudy or dull, rain at times; milder.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than 1/8 clouded. — Sky 1/8 to 1/2 clouded. — Sky 1/2 to 3/4 clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail. — Fog. — Mist. — Thunder. — Thunderstorm. — Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A very deep depression on the Atlantic is stationary and a trough over the English Channel is moving north. Further secondaries are approaching from southwest. Weather will be unsettled and milder generally. Snow will occur locally in the North at first, turning to rain later.

FURTHER OUTLOOK.

Mild and unsettled for several days.

TIMES OF ISSUE OF GALE WARNINGS.

- South Cone hoisted at 0950 on 23rd in dists. 17 and 20 (part of).
- South Cone hoisted at 1430 on 23rd in dists. 5, 6, & 19 (part of).
- South Cone hoisted at 0810 on 24th in dists. 2 (part of), 7, 8, 10, 12, 13A (part of) and 18.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.,
Director.

EXPLANATION OF CHART.

- BAROMETER. Isobars are drawn for intervals of four millibars.
- WIND. Arrows fly with the wind. Number of feathers indicate Beaufort Force.
- ☉ Calm.
- TEMPERATURE is given in degrees F.
- WEATHER is given in Beaufort Notation (see page 1) and by symbols (see opposite page).

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h Wednesday, 25th December, 1935.

DISTRICTS. FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 25th December, 1935.

1. S.E. England	Moderate or fresh south to southeast wind; cloudy; occasional local rain; mild.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Fresh south or southwest wind; occasional rain; very mild.
6. South Wales	
7. North Wales	
8. N.W. England	Moderate or fresh southeast to east wind, veering later; occasional rain; mild.
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Moderate to fresh southeast wind, veering later; occasional rain; becoming mild.
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland & B.N.W. Scotland	
14. Mid-Scotland	Moderate or fresh southeast wind, strong locally on coasts; occasional rain; mild.
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	Moderate variable wind, becoming southerly; rain at times; mild.
20. S.W. Ireland	As 13 - 18.

BAROMETER. Isobars are drawn for intervals of two millibars. WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. TEMPERATURE is given in degrees F. WEATHER SYMBOLS: — Clear sky. ☁ Sky less than 1/10 clouded. ☁ Sky 1/10 to 1/5 clouded. ☁ Sky 1/5 to 1/2 clouded. ☁ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail. ☁ Fog. ☁ Mist. T Thunder. T Thunderstorm. ☁ Slight haze. SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High. BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A large deep depression is stationary west of Ireland. A secondary depression in St. George's Channel is moving north or northeast and there are indications of other secondaries approaching from the Southwest. Weather will be cloudy and mild generally with occasional rain.

FURTHER OUTLOOK.

Unsettled and mild.

Times of issue of Gale Warnings.

- South Cone hoisted at 0950 on 23rd in district 17.
- " " " at 0810 on 24th in dists. 2 (part of), 7, 8, 10, 12, 13A (part of), and 18.
- " " " at 1415 on 24th in dists. 13B, 15 and 16.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 26th December, 1935.
1. S.E. England	Moderate or fresh southeast wind, strong locally on coasts; dull, occasional rain, a fair but cloudy period later; mild.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Fresh southwest to west wind; bright intervals; local showers later; mild.
6. South Wales	Variable wind becoming southwest to west, fresh; dull, rain at first, fair later; mild.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	Moderate or fresh southeast wind, strong to gale locally on coasts; cloudy or dull, occasional rain; mild.
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland	
14. B.N.W. Scotland	
15. Mid-Scotland	
16. N.E. Scotland	
17. Orkney and Shetland	
18. N.W. Ireland	
19. N.E. Ireland	Variable wind becoming southerly; bright intervals; showers; mild
20. S.E. Ireland	
21. S.W. Ireland	

Stationary Office Press, Kingsway, W.C.2.

AIR MINISTRY, METEOROLOGICAL OFFICE.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than 1/8 clouded. — Sky 1/8 to 1/4 clouded. — Sky 1/4 to 1/2 clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail. — Fog. — Mist. T Thunder. T Thunderstorm. — Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A deep stationary depression is centred westward of Ireland and a trough of low pressure over Southwest Ireland and Southwest England is moving northeast. Further secondaries will approach from the Southwest. Weather will continue unsettled and mild.

FURTHER OUTLOOK.

Continuing unsettled and mild.

Times of issue of Gale Warning.

South Cone hoisted 0810 on 24th in dists. 7, 8, 10, 12, 18 and 19; at 1415 on 24th in dists. 11, 13A, 13B, 15 and 16; at 1445 on 25th in dists. 5 and 6, and at 1945 on 25th in dists. 1 and 2.

Forecasts issued at 10.40 G.M.T. GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

AIR MINISTRY, METEOROLOGICAL OFFICE. Chart of Weather in the Northern Hemisphere.

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h ... Friday, ... 27th December, ... 1935.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 27th December, 1935.
1. S.E. England	Moderate or fresh south wind, strong on coast, veering west and moderating, backing south and becoming stronger again later; occasional rain, then a fair interval; further rain early tomorrow; mild.
2. E. England...	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Fresh west wind, backing south or southeast and becoming strong to gale later; bright intervals and local showers at first, a period of general rain later tonight or early tomorrow; mild.
6. South Wales	
7. North Wales	Wind variable to southwest light or moderate, backing southeast and freshening tomorrow; local rain or showers, bright intervals; general rain tomorrow; mild.
8. N.W. England	
9. N. Midlands	Wind southeast, becoming west, fresh locally, falling light or moderate, backing southeast, freshening tomorrow; rain at first, then fair; rain again tomorrow; mild.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Light or moderate south to southwest wind; showers at most places, bright intervals; local fog night and morning; mild.
13. { A.W. Scotl. B.N.W. Scotl. land.	
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	Moderate or fresh south wind; occasional rain or showers; mild.
17. N.W. Ireland	Light southwest to variable wind; showers and bright intervals; local morning fog; rather mild.
18. N.E. Ireland	
19. S.E. Ireland	Light or moderate southwest wind, backing southeast to east and freshening later; bright intervals and showers at first, perhaps general rain later; rather mild.
20. S.W. Ireland	

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ○ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ○ Clear sky. ○ Sky less than $\frac{1}{2}$ clouded. ○ Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. ○ Sky $\frac{3}{4}$ to $\frac{5}{8}$ clouded. ○ Overcast sky. ● Rain falling. * Snow. * Sleet. ▲ Hail. ≡ Fog. ≡ Mist. T Thunder. K Thunderstorm. ∞ Slight haze.
SEA DISTURBANCE: ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A depression off the Hebrides is moving slightly north and becoming less deep. A secondary over Devonshire is moving northeast, and another secondary to northeast of the Azores will also move northeast and is likely to deepen. Weather remains unsettled.

FURTHER OUTLOOK.

Unsettled and mild. Bright intervals in many districts.

Time of issue of Gale Warning.

South Cone hoisted at 0210 on 27th in district 1.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.,
Director.

Forecasts issued at 10.00 G.M.T.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M. 28th December, 1935.
1. S.E. England	Wind south, veering west, mainly light or moderate; rain at first, then fair; local morning fog; very mild at first, then cooler.
2. E. England...	
3. E. Midlands	Light variable wind, becoming west; rain at first, then fair; local fog night and morning; cooler than of late.
4. W. Midlands	
5. S.W. England	Moderate or light northwest to west wind; bright intervals, local showers; cooler than of late.
6. South Wales	
7. North Wales	
8. N.W. England	Light variable wind, finally west; local fog, otherwise mainly fair but local showers later; cooler than of late.
9. N. Midlands	As 3 - 4.
10. N.E. England	
11. S.E. Scotland	Light southwest wind; fair; local fog night and morning; cooler than of late.
12. S.W. Scotland & Isle of Man	
13. { A.W. Scotl. B.N.W. Scot- land.	Light or moderate southwest to west wind; bright intervals and showers; cooler than of late; perhaps local fog later.
14. Mid-Scotland	
15. N.E. Scotland	As 11.
16. Orkney and Shetland	Light or moderate west or southwest wind; bright intervals and showers; cooler than of late.
17. N.W. Ireland	
18. N.E. Ireland	Light variable to west wind; mainly fair, local showers, local fog; cooler than of late.
19. S.E. Ireland	
20. S.W. Ireland	As 16 - 17.

N.W. Stationary Office Press, Kingsway, W.C.2.

AIR MINISTRY, METEOROLOGICAL OFFICE.

7h Saturday 28th December, 1935.

Scale 1:10,000,000.
100 0 100 200 300
Statute Miles.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ☉ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ☉ Clear sky. ☉ Sky less than $\frac{1}{2}$ clouded. ☉ Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. ☉ Sky $\frac{3}{4}$ to $\frac{5}{8}$ clouded. ☉ Overcast sky. ☉ Rain falling. * Snow. * Sleet. ▲ Hail. ☉ Fog. ☉ Mist. T Thunder. T Thunderstorm. ☉ Slight haze.
SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

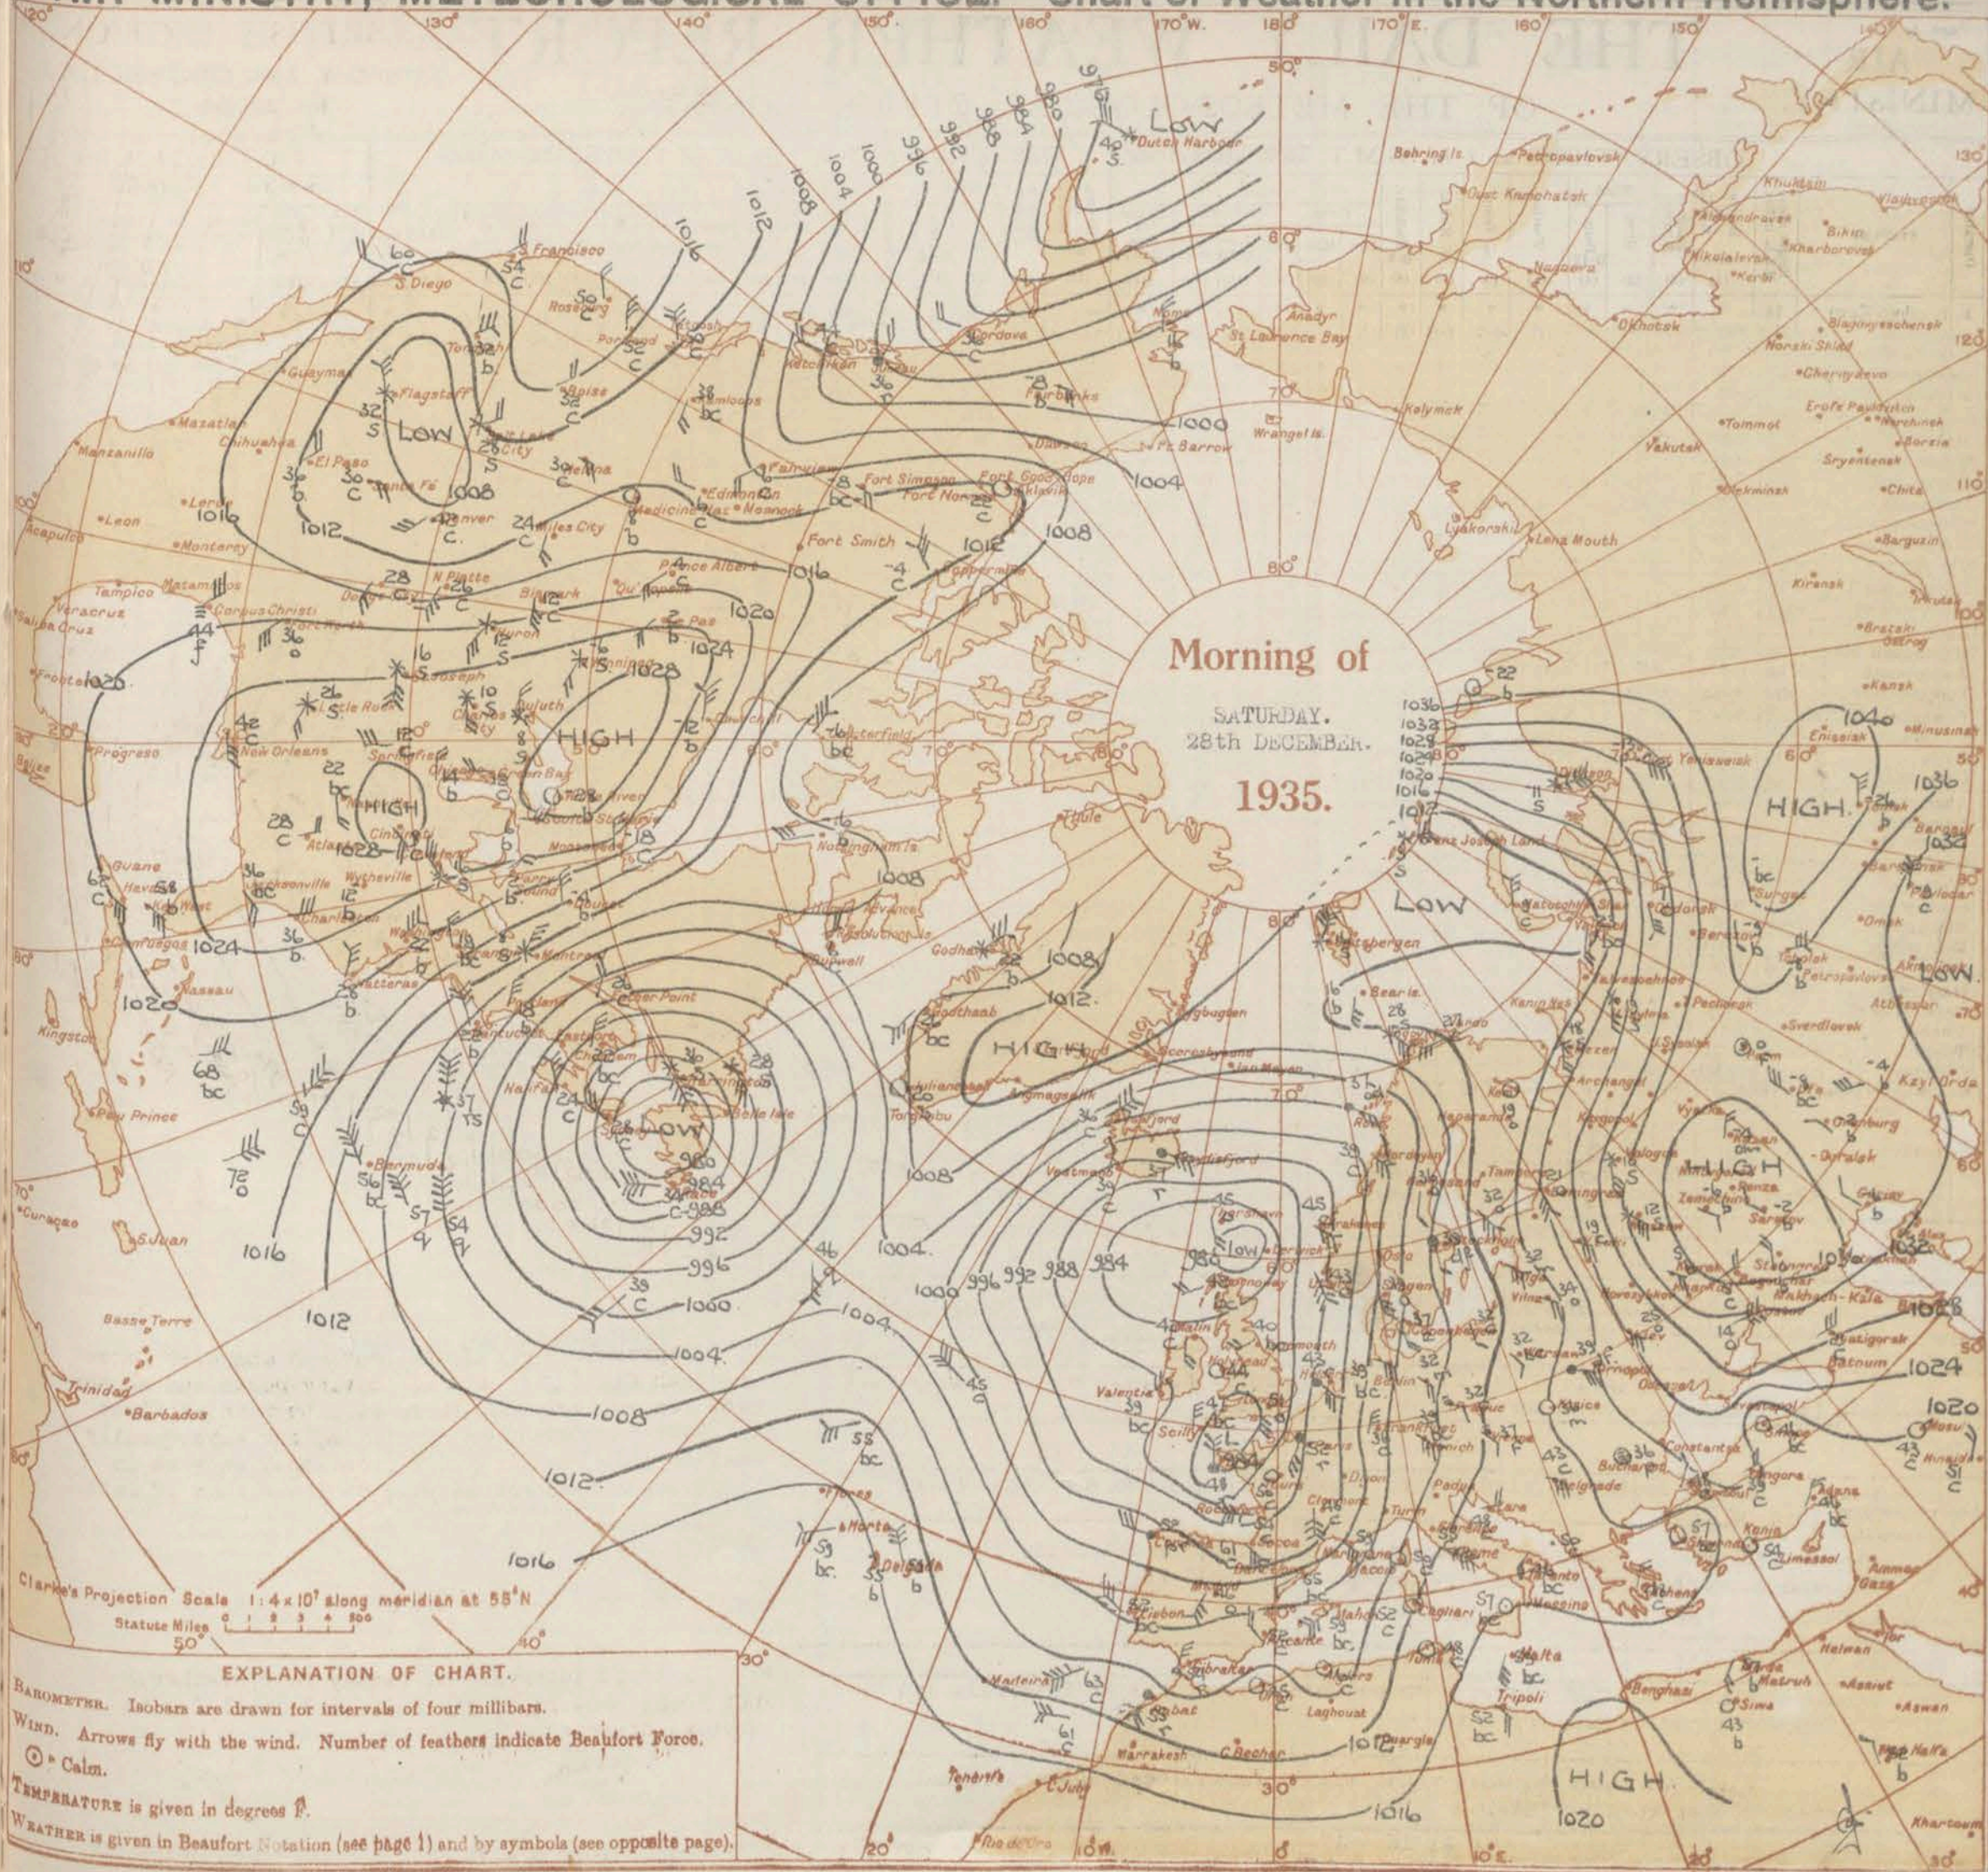

Depressions off North Scotland and over Dorset are both filling up and are moving north and north-east respectively. There will be rain at first in Eastern England and Midlands, but subsequently weather will be fair apart from local showers in the West. Temperature will be lower than of late.

FURTHER OUTLOOK.

A short interval of mainly fair weather, but local showers in the west, and local fog in several districts.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.,
Forecasts issued at 1030 G.M.T. Director.

DISTRICTS. FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 29th December, 1935.

1. S.E. England	Light southwest wind, becoming moderate southerly; fair today, cloudy with rain early tomorrow; mild.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Light to moderate south wind, becoming fresh southeasterly; fair with increasing cloud and rain tonight; mild.
5. S.W. England	
6. South Wales	Moderate south wind becoming fresh or strong, reaching gale force on the coast; cloudy, with continuous rain this evening; some bright periods and showers tomorrow; mild, becoming cooler.
7. North Wales	
8. N.W. England	As 4.
9. N. Midlands	
10. N.E. England	As 1 - 3.
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Light south wind, becoming fresh southeasterly; cloudy, some rain early tomorrow; average temperature, becoming temporarily milder.
13. A.W. Scotland & B.N.W. Scotland	Light south wind, becoming moderate easterly; cloudy; perhaps rain tomorrow; average temperature.
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	Moderate south wind becoming fresh easterly, perhaps gale on west coast; cloudy; rain tonight and at times tomorrow; average temperature.
18. N.E. Ireland	
19. S.E. Ireland	Fresh south wind, increasing to gale on the coast; cloudy; continuous rain by evening; some bright periods and occasional rain tomorrow; average temperature.
20. S.W. Ireland	

N.M. Stationary Office, London, England, U.K.

AIR MINISTRY, METEOROLOGICAL OFFICE.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — Clear sky. — Sky less than 1/2 clouded. — Sky 1/2 to 3/4 clouded. — Sky 3/4 to 1 clouded. — Overcast sky. — Rain falling. * Snow. * Sleet. * Hail. — Fog. — Mist. T Thunder. K Thunderstorm. — Slight haze.
SEA DISTURBANCE. — Rough. — High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.
A depression north of Shetland with a trough extending over the North Sea is moving northeast and filling up slowly. A very deep depression about 600 miles west of Ireland is moving east. Weather will be mainly fair but with rain spreading from the southwest this evening and during the night. On west and southwest coasts wind will freshen to a southerly gale, veering later.

FURTHER OUTLOOK.
Unsettled.

Time of issue of Gale Warning.
South Cone hoisted at 0900 on 29th in districts 5 (part of), 6, 17 (part of), 19 and 20.

GEORGE C. SIMPSON, K.C.B., D.Sc., F.R.S.

LONDON OBSERVATIONS.														EXPLANATION OF FIGURES, LETTERS, etc.													
Day 7h—12h. Kew & Croydon. 9h—12h. Kensington. 9h—21h. other stations except for rainfall which is 9h—12h.														COLUMNS 2, 16. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 8, 22 —Code for surface visibility.														COLUMNS 4, 18. THE BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers is the speed at about 30 feet above the ground.													
COLUMNS 30.—Code for State of Sea.														COLUMNS 34, 35. Tr. = rain has fallen, but amount less than 0.1 mm.													
COLUMNS 36, 37. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 38, 39. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 40, 41. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 42, 43. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 44, 45. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 46, 47. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 48, 49. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 50, 51. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 52, 53. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 54, 55. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 56, 57. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 58, 59. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 60, 61. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 62, 63. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 64, 65. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 66, 67. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 68, 69. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 70, 71. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 72, 73. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 74, 75. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 76, 77. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 78, 79. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 80, 81. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 82, 83. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 84, 85. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 86, 87. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 88, 89. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 90, 91. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 92, 93. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 94, 95. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 96, 97. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 98, 99. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 100, 101. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 102, 103. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 104, 105. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 106, 107. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 108, 109. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 110, 111. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 112, 113. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 114, 115. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 116, 117. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 118, 119. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 120, 121. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 122, 123. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 124, 125. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 126, 127. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 128, 129. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 130, 131. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 132, 133. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 134, 135. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 136, 137. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 138, 139. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 140, 141. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 142, 143. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 144, 145. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 146, 147. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 148, 149. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 150, 151. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 152, 153. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 154, 155. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 156, 157. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 158, 159. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 160, 161. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 162, 163. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 164, 165. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 166, 167. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 168, 169. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 170, 171. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 172, 173. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 174, 175. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 176, 177. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 178, 179. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 180, 181. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 182, 183. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 184, 185. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 186, 187. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 188, 189. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 190, 191. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 192, 193. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 194, 195. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 196, 197. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 198, 199. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 200, 201. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 202, 203. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 204, 205. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 206, 207. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 208, 209. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 210, 211. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 212, 213. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 214, 215. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 216, 217. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 218, 219. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 220, 221. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 222, 223. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 224, 225. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 226, 227. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 228, 229. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 230, 231. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 232, 233. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 234, 235. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 236, 237. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 238, 239. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 240, 241. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 242, 243. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 244, 245. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 246, 247. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 248, 249. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 250, 251. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 252, 253. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 254, 255. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 256, 257. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 258, 259. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 260, 261. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 262, 263. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 264, 265. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 266, 267. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 268, 269. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 270, 271. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 272, 273. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 274, 275. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 276, 277. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 278, 279. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 280, 281. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 282, 283. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 284, 285. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 286, 287. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 288, 289. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 290, 291. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 292, 293. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 294, 295. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 296, 297. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 298, 299. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 300, 301. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 302, 303. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 304, 305. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 306, 307. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 308, 309. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 310, 311. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 312, 313. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 314, 315. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 316, 317. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 318, 319. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 320, 321. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 322, 323. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 324, 325. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 326, 327. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 328, 329. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 330, 331. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 332, 333. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 334, 335. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 336, 337. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 338, 339. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 340, 341. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 342, 343. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 344, 345. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 346, 347. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 348, 349. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 350, 351. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 352, 353. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 354, 355. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 356, 357. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 358, 359. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 360, 361. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 362, 363. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 364, 365. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 366, 367. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 368, 369. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 370, 371. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 372, 373. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 374, 375. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 376, 377. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 378, 379. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 380, 381. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 382, 383. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 384, 385. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 386, 387. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 388, 389. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 390, 391. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 392, 393. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 394, 395. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 396, 397. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 398, 399. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 400, 401. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 402, 403. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 404, 405. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 406, 407. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 408, 409. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 410, 411. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 412, 413. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 414, 415. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 416, 417. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 418, 419. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 420, 421. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 422, 423. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 424, 425. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 426, 427. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 428, 429. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 430, 431. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 432, 433. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 434, 435. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 436, 437. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 438, 439. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 440, 441. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 442, 443. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 444, 445. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 446, 447. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 448, 449. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 450, 451. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 452, 453. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 454, 455. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 456, 457. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 458, 459. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 460, 461. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 462, 463. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 464, 465. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 466, 467. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 468, 469. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 470, 471. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 472, 473. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 474, 475. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 476, 477. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 478, 479. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 480, 481. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 482, 483. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 484, 485. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 486, 487. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 488, 489. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 490, 491. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 492, 493. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 494, 495. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 496, 497. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 498, 499. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 500, 501. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 502, 503. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 504, 505. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 506, 507. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 508, 509. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 510, 511. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 512, 513. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 514, 515. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 516, 517. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 518, 519. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 520, 521. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 522, 523. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 524, 525. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 526, 527. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 528, 529. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 530, 531. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 532, 533. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 534, 535. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 536, 537. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 538, 539. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 540, 541. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 542, 543. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 544, 545. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 546, 547. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 548, 549. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 550, 551. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 552, 553. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 554, 555. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 556, 557. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 558, 559. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 560, 561. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 562, 563. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 564, 565. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 566, 567. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 568, 569. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 570, 571. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 572, 573. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 574, 575. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 576, 577. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 578, 579. The barometric tendency is expressed in tenths of a millibar.													
COLUMNS 580, 581. The barometric tendency is expressed in tenths of a millibar.														COLUMNS 582, 583. The barometric tendency is expressed in tenths of a millibar.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 30th December, 1935.
1. S.E. England	Wind south to southeast, strong to a gale, squally; occasional rain or showers, heavy at times; brighter intervals late today; rather mild.
2. E. England...	
3. E. Midlands	
4. W. Midlands	Southerly gale becoming northwest, squally; bright intervals; occasional rain or showers, heavy at times; rather mild.
5. S.W. England	
6. South Wales	
7. North Wales	Wind southeast, strong, squally, backing; occasional rain or showers, heavy at times; brighter intervals late today; rather mild.
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	Wind easterly, fresh to strong, squally, backing; occasional rain or showers, heavy at times; bright intervals tomorrow; rather mild.
13. A.W. Scotl. B.N.W. Scot-land	Wind easterly, fresh to strong, backing; continuous rain, becoming intermittent; mainly cloudy; average temperature.
14. Mid-Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	As 12 - 13A.
18. N.E. Ireland	
19. S.E. Ireland	As 4 - 6.
20. S.W. Ireland	

† Stationary Office Press, Kingsway, W.C.2.

AIR MINISTRY, METEOROLOGICAL OFFICE.

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. — ☉ TEMPERATURE is given in degrees F.
WEATHER SYMBOLS: — ☉ Clear sky. ☉ Sky less than 1/8 clouded. ☉ Sky 1/8 to 1/4 clouded. ☉ Sky 1/4 to 1/2 clouded. ☉ Overcast sky. ☉ Rain falling. * Snow. * Sleet. * Hail. ☉ Fog. ☉ Mist. T Thunder. T Thunderstorm. ☉ Slight haze.
SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A very deep depression off Southwest Ireland is moving east-southeast. A trough of low pressure is moving northwards over Northern Scotland and another is approaching the Southwest coasts. There will be occasional rain or showers, heavy at times, in all districts but with brighter intervals and it will be rather mild.

FURTHER OUTLOOK.

Rain becoming continuous in the Southwest and spreading northeast.

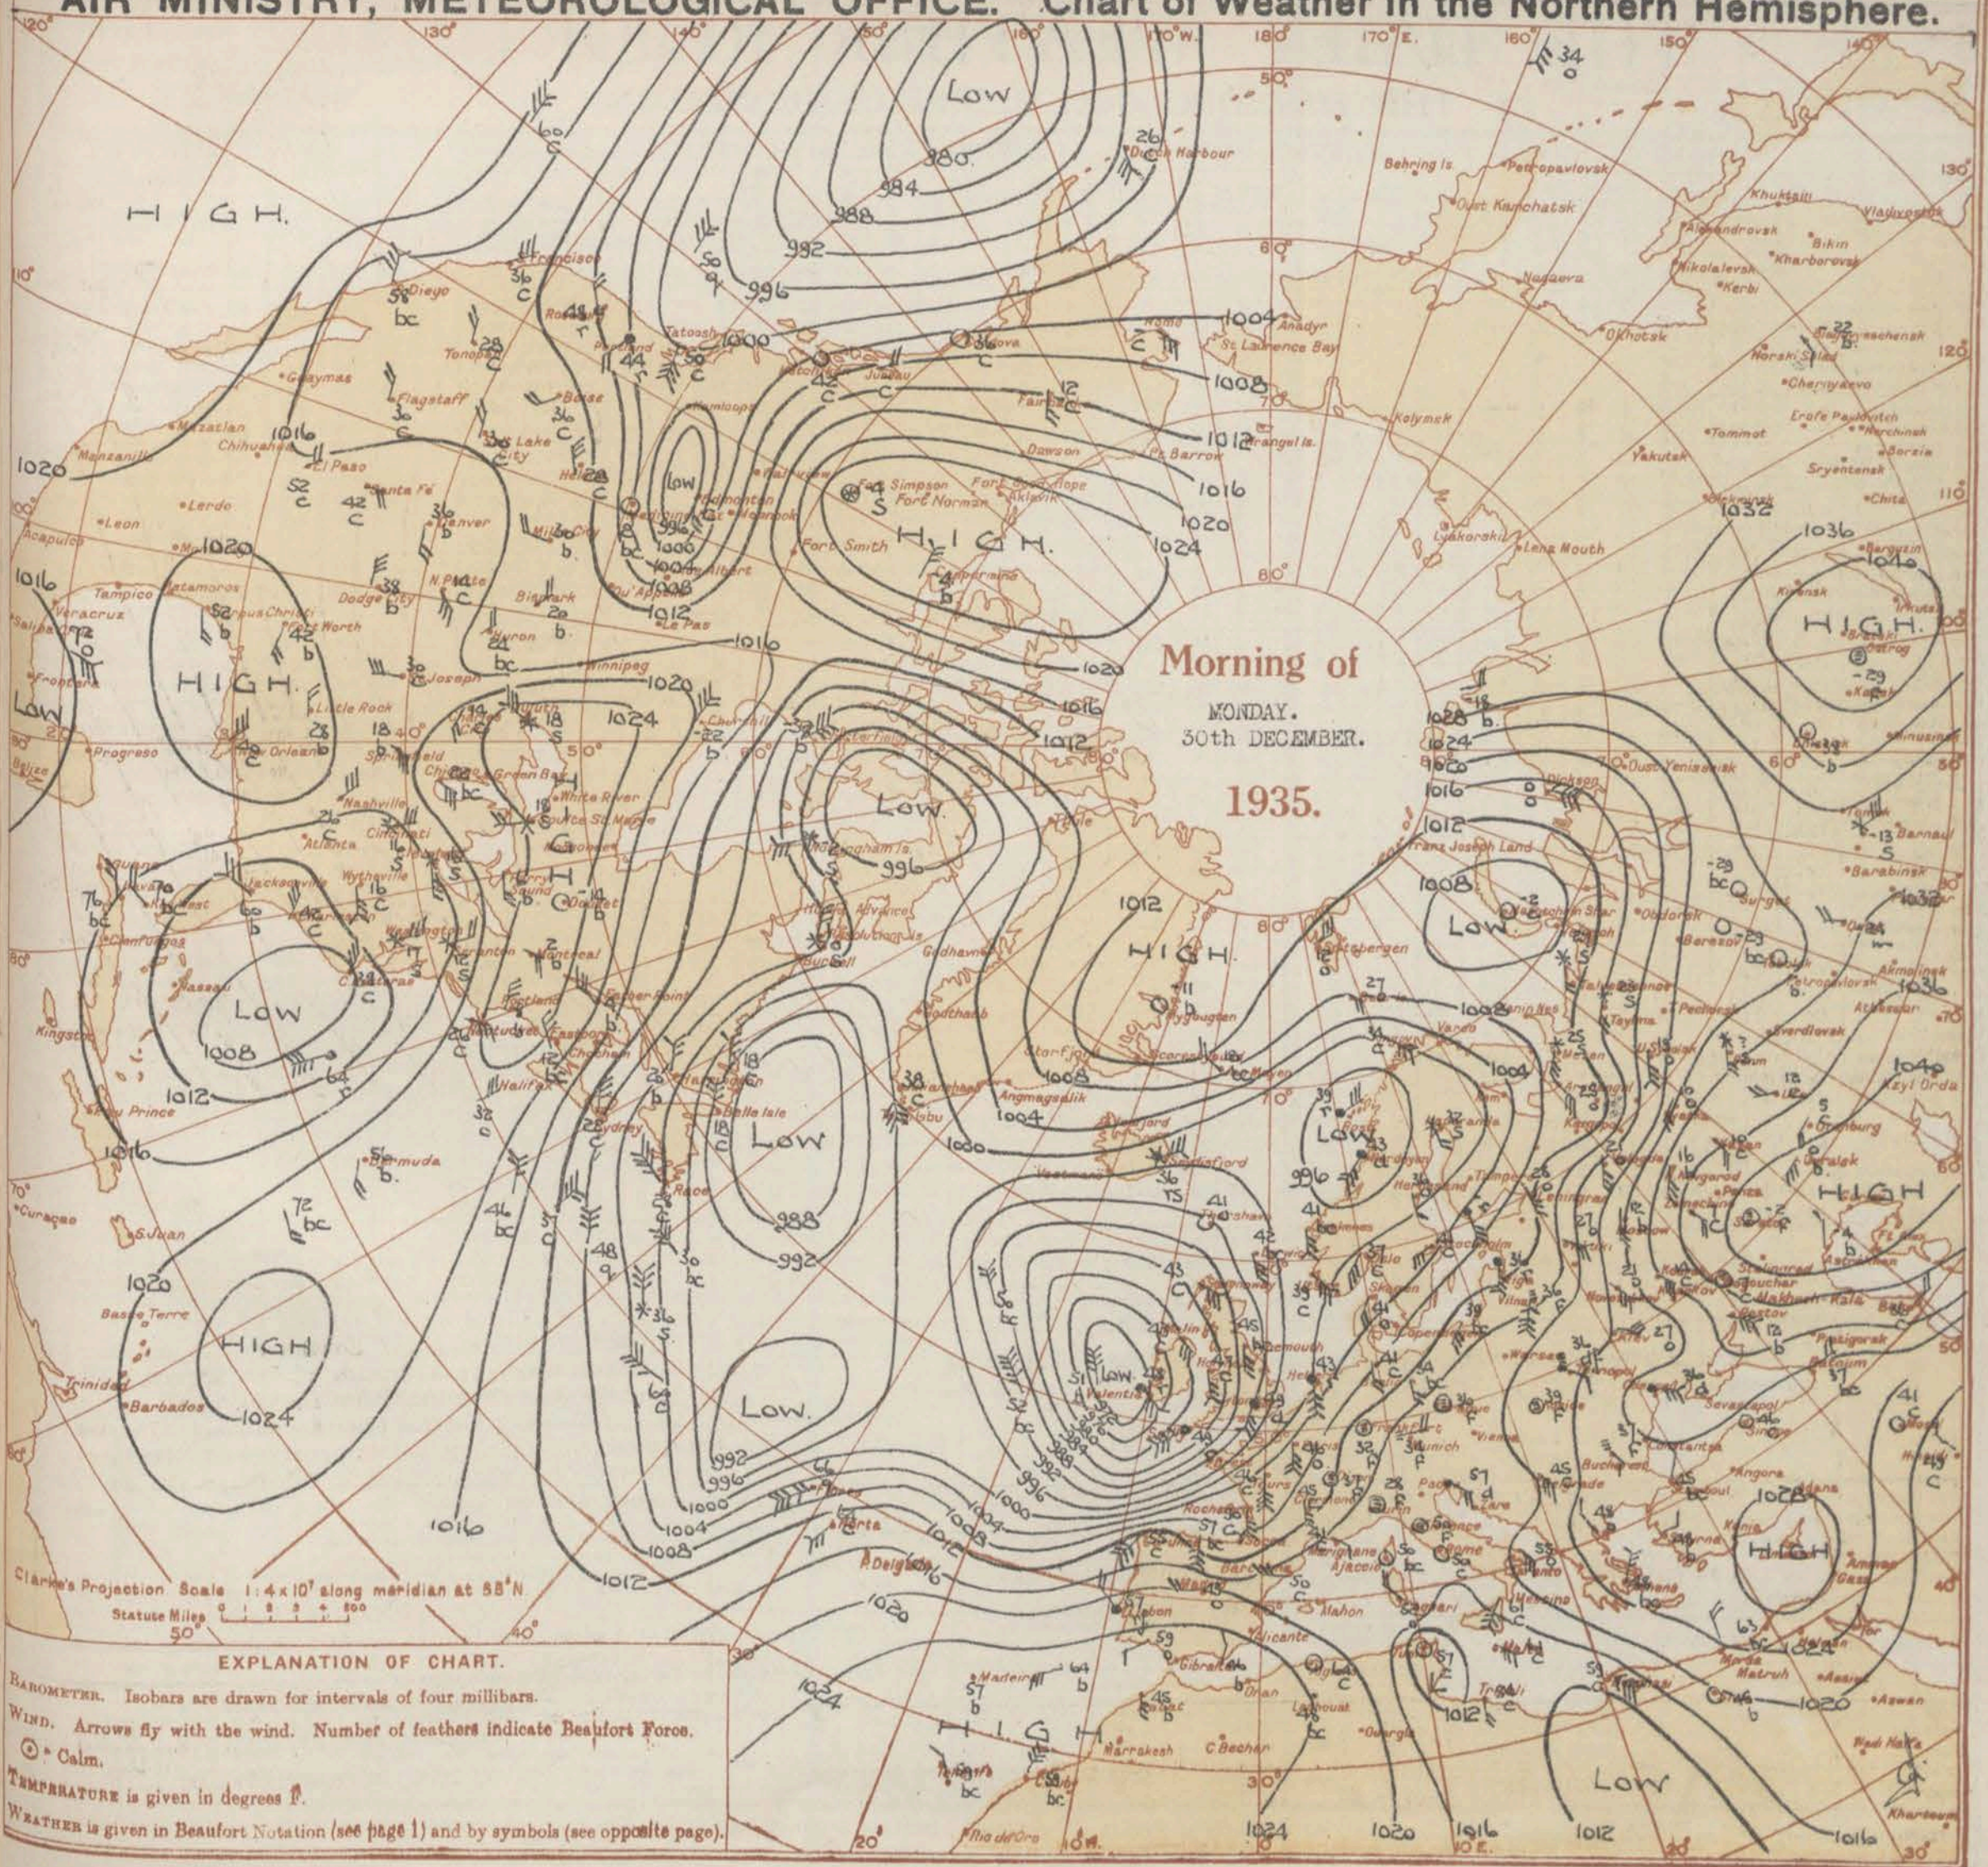

TIMES OF ISSUE OF GALE WARNINGS.

South coast hoisted 0910 29th in districts 6, 17, 19, 20.
" " " 1400 29th in districts 1, 2, 5, 7, 8, 12, 13 & 18.
" " " 1900 29th in districts 10, 11, 15, 16.

Forecast issued at 1030 G.M.T. GEORGE O. SIMPSON, K.C.B., D.Sc., F.R.S., Director.

AIR MINISTRY, METEOROLOGICAL OFFICE.

DISTRICTS.	FORECASTS FOR THE 24 HOURS COMMENCING 12 NOON, G.M.T. 31st December, 1935.
1. S.E. England	Wind south to southwest, fresh to strong; continuous rain, becoming intermittent in the afternoon; cloudy or dull; mild.
2. E. England	
3. E. Midlands	
4. W. Midlands	Wind south to southwest, fresh to strong; mainly cloudy; occasional rain; mild.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	Wind southeast fresh, veering; continuous rain, becoming intermittent towards dusk; cloudy or dull; becoming mild.
10. N.E. England	
11. S.E. Scotland	
12. S.W. Scotland & Isle of Man	
13. A.W. Scotland & N.W. Scotland	Wind easterly light, freshening; cloudy or dull; continuous rain tonight, intermittent tomorrow; rather cool, becoming milder.
14. Mid Scotland	
15. N.E. Scotland	
16. Orkney and Shetland	
17. N.W. Ireland	
18. N.E. Ireland	Wind southerly fresh, strong locally on the coast; mainly cloudy; occasional rain; mild.
19. S.E. Ireland	
20. S.W. Ireland	

N.W. Stationary Office Press, Kingsway, W.C.2.

12/31/35 12.00 PM

BAROMETER. Isobars are drawn for intervals of two millibars.
WIND. Arrows fly with wind. Number of feathers indicate Beaufort Force. Calm is indicated by circle outside weather symbol. **TEMPERATURE** is given in degrees F.
WEATHER SYMBOLS: ☉ Clear sky. ☁ Sky less than $\frac{1}{2}$ clouded. ☂ Sky $\frac{1}{2}$ to $\frac{3}{4}$ clouded. ☄ Sky $\frac{3}{4}$ to $\frac{5}{8}$ clouded. ☁ Overcast sky. ☔ Rain falling. ❄ Snow. ❄ Sleet. ⚡ Hail. ☁ Fog. ☁ Mist. ⚡ Thunder. ⚡ Thunderstorm. ☁ Slight haze.
SEA DISTURBANCE. ~~~~~ Rough. ~~~~~ High.
BAROMETRIC CHANGE from 4h. to 7h. in tenths of millibars is entered beneath the temperature.

GENERAL INFERENCE.

A very deep depression off West Ireland is moving slowly eastwards while a trough of low pressure is moving northeast from Southwest England and North Ireland. Rain will be continuous for several hours ahead of the trough but become intermittent later; it will continue mainly cloudy and mild.

FURTHER OUTLOOK.

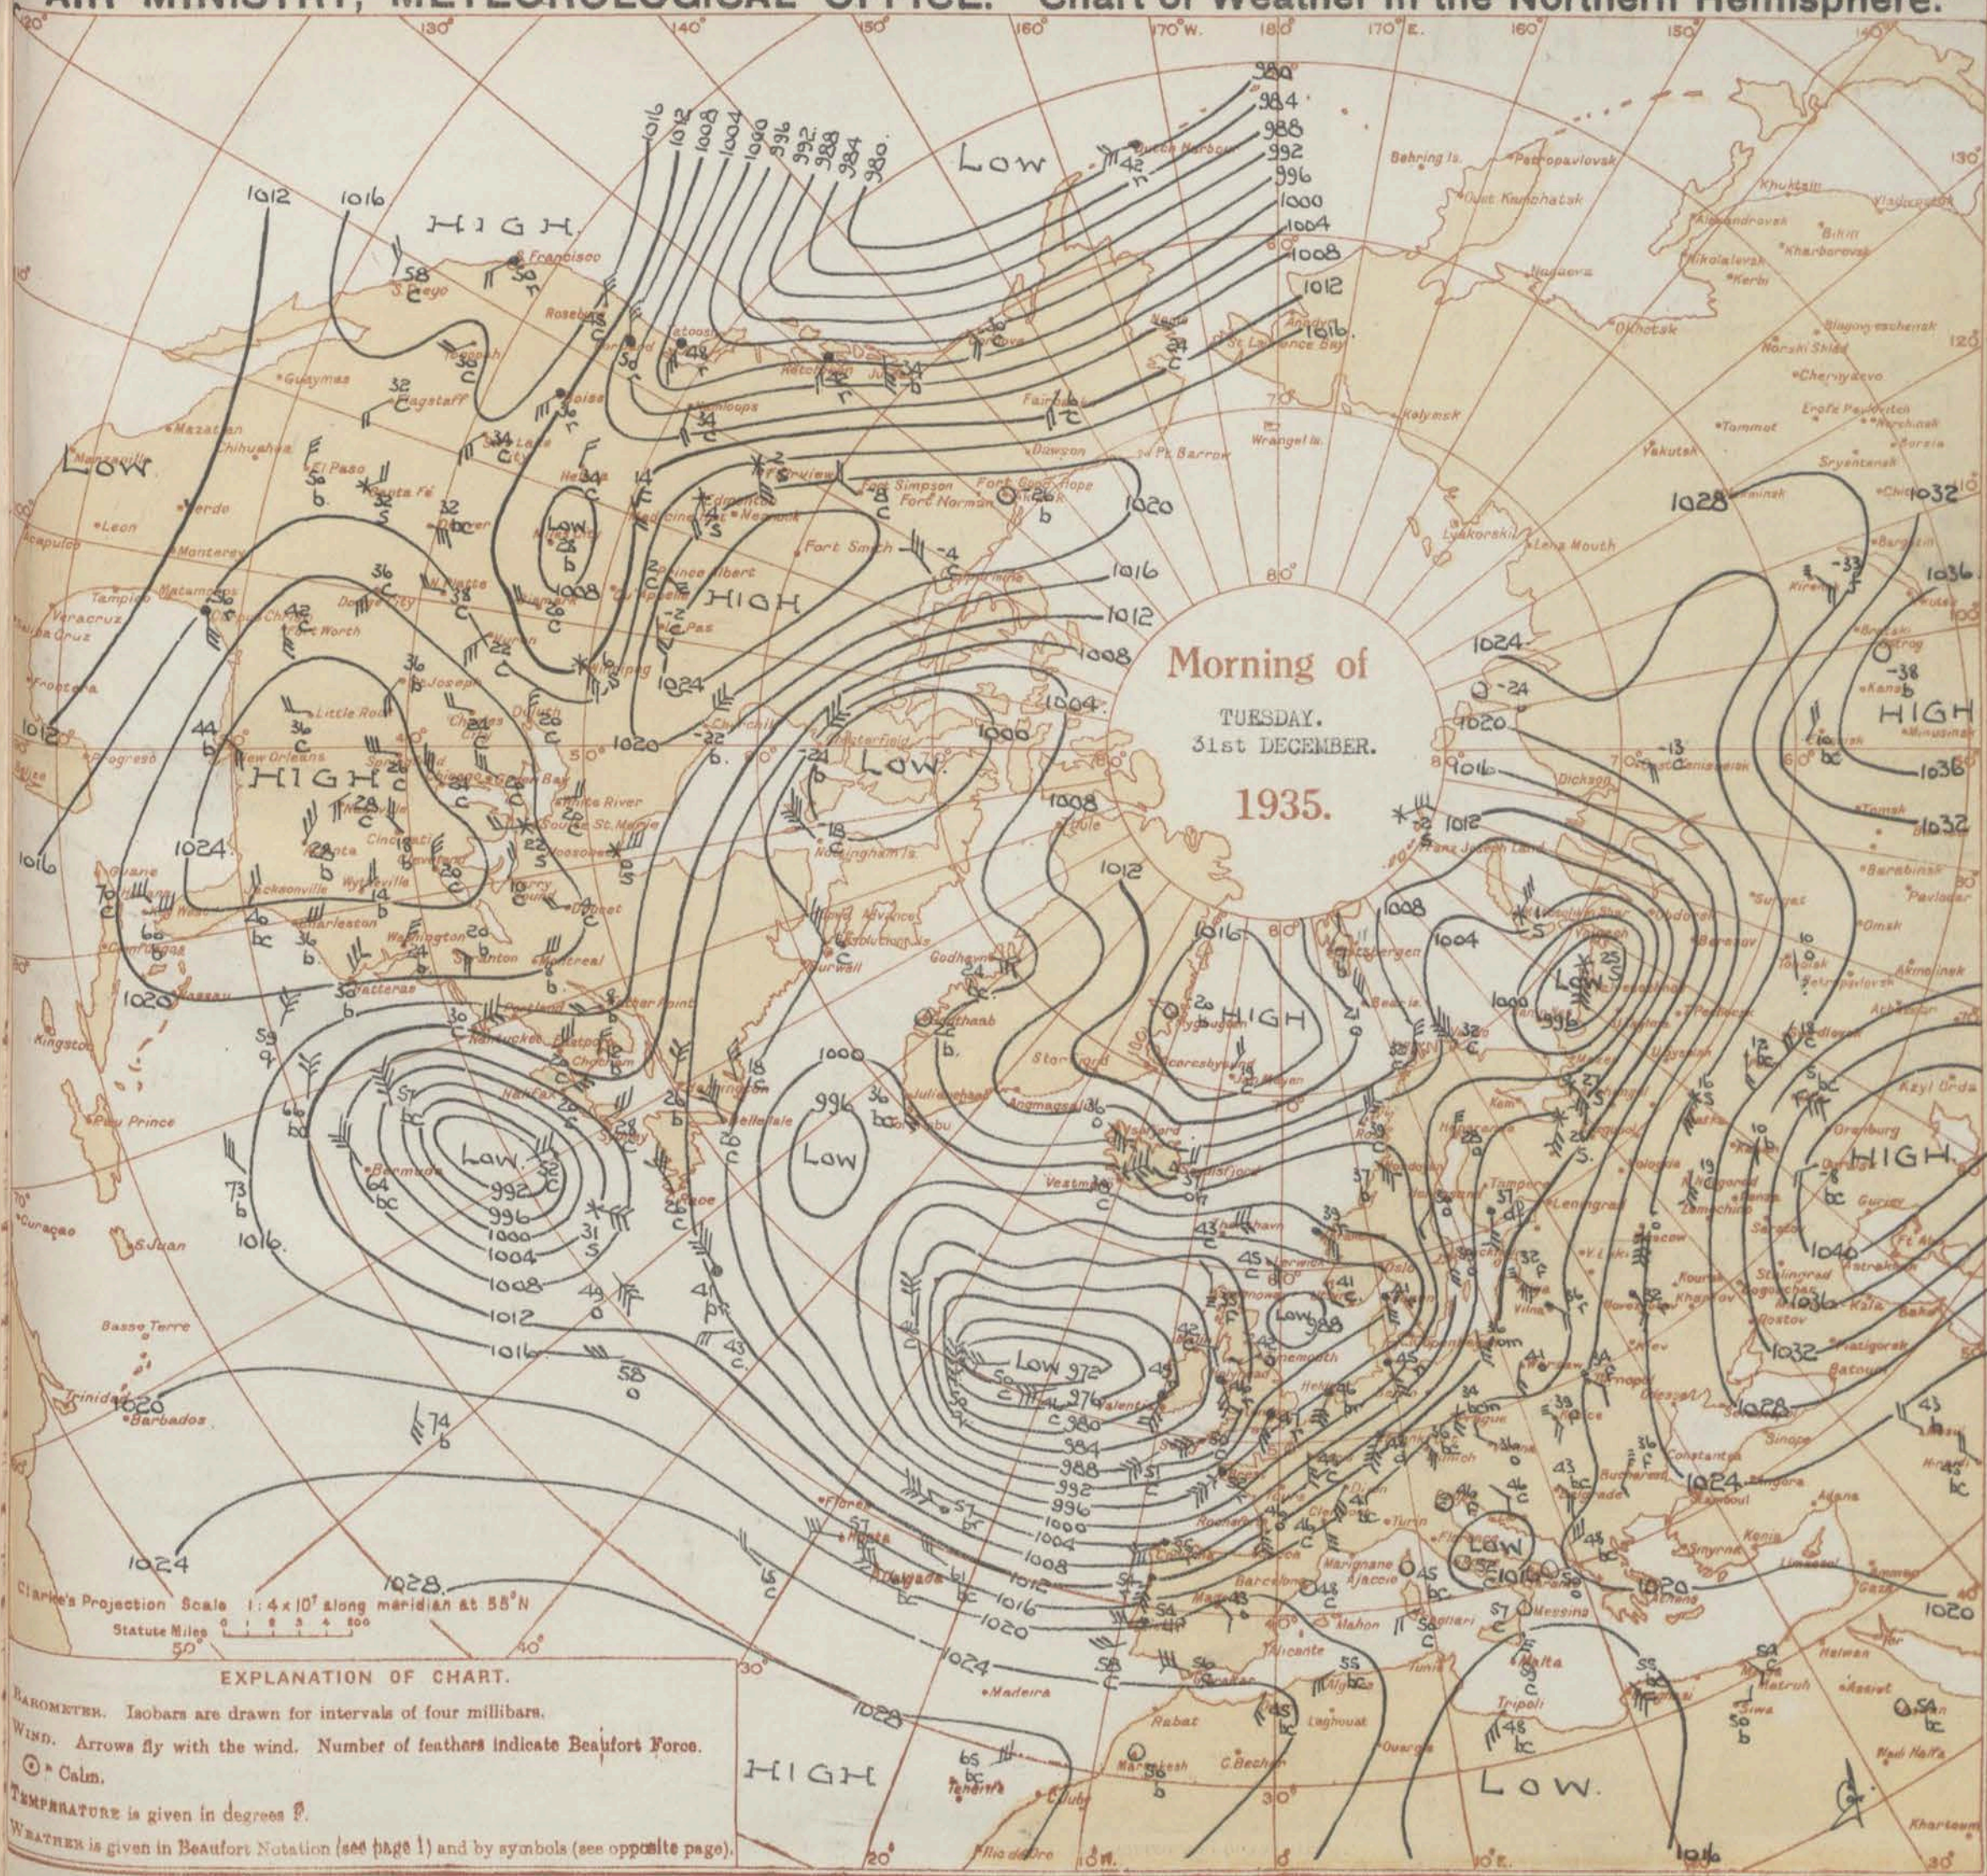

Continuing mild with occasional rain.

Times of issue of Gale Warnings.

- † South Cone hoisted 0900 on 29th in districts 6 and 19.
- † " " hoisted 1400 on 29th in districts 1, 2 and 5.

Forecast issued at 1010 G.M.T. GEORGE O. SIMPSON, R.C.B., D.Sc., F.R.S., Director.
