# SYNOPTIC CHART FOR 7H. SUNDAY, 16<sup>TH</sup> AUGUST, 1925.

Scale - 1/10,000,000

Nautical Miles.  
Statute Miles.

**HIGH**

**LOW**

**EXPLANATION.**  
Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows lying with the wind. Force, on the scale, is indicated by the number of lines. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in degrees F.  
**SYMBOLS.**  
☉ sky clear.  
☁ sky cloudy.  
☁☁ overcast sky.  
☁☁☁ rain falling.  
☁☁☁☁ snow & hail.  
☁☁☁☁☁ fog.  
☁☁☁☁☁☁ thunderstorm.  
☁☁☁☁☁☁☁ Very Rough

All times are G.M.T. Add one hour to get summer time.

63 Fog

## AIR MINISTRY.

### GENERAL INFERENCES

A belt of high pressure extends from the south of Iceland, across the British Isles to Switzerland, but this is tending to become broken over England, while a shallow depression spreads up from the Southwest. Fine weather will continue generally for a time but subsequently less settled, thundery weather is probable in the southern districts.

## GENERAL INFERENCE.

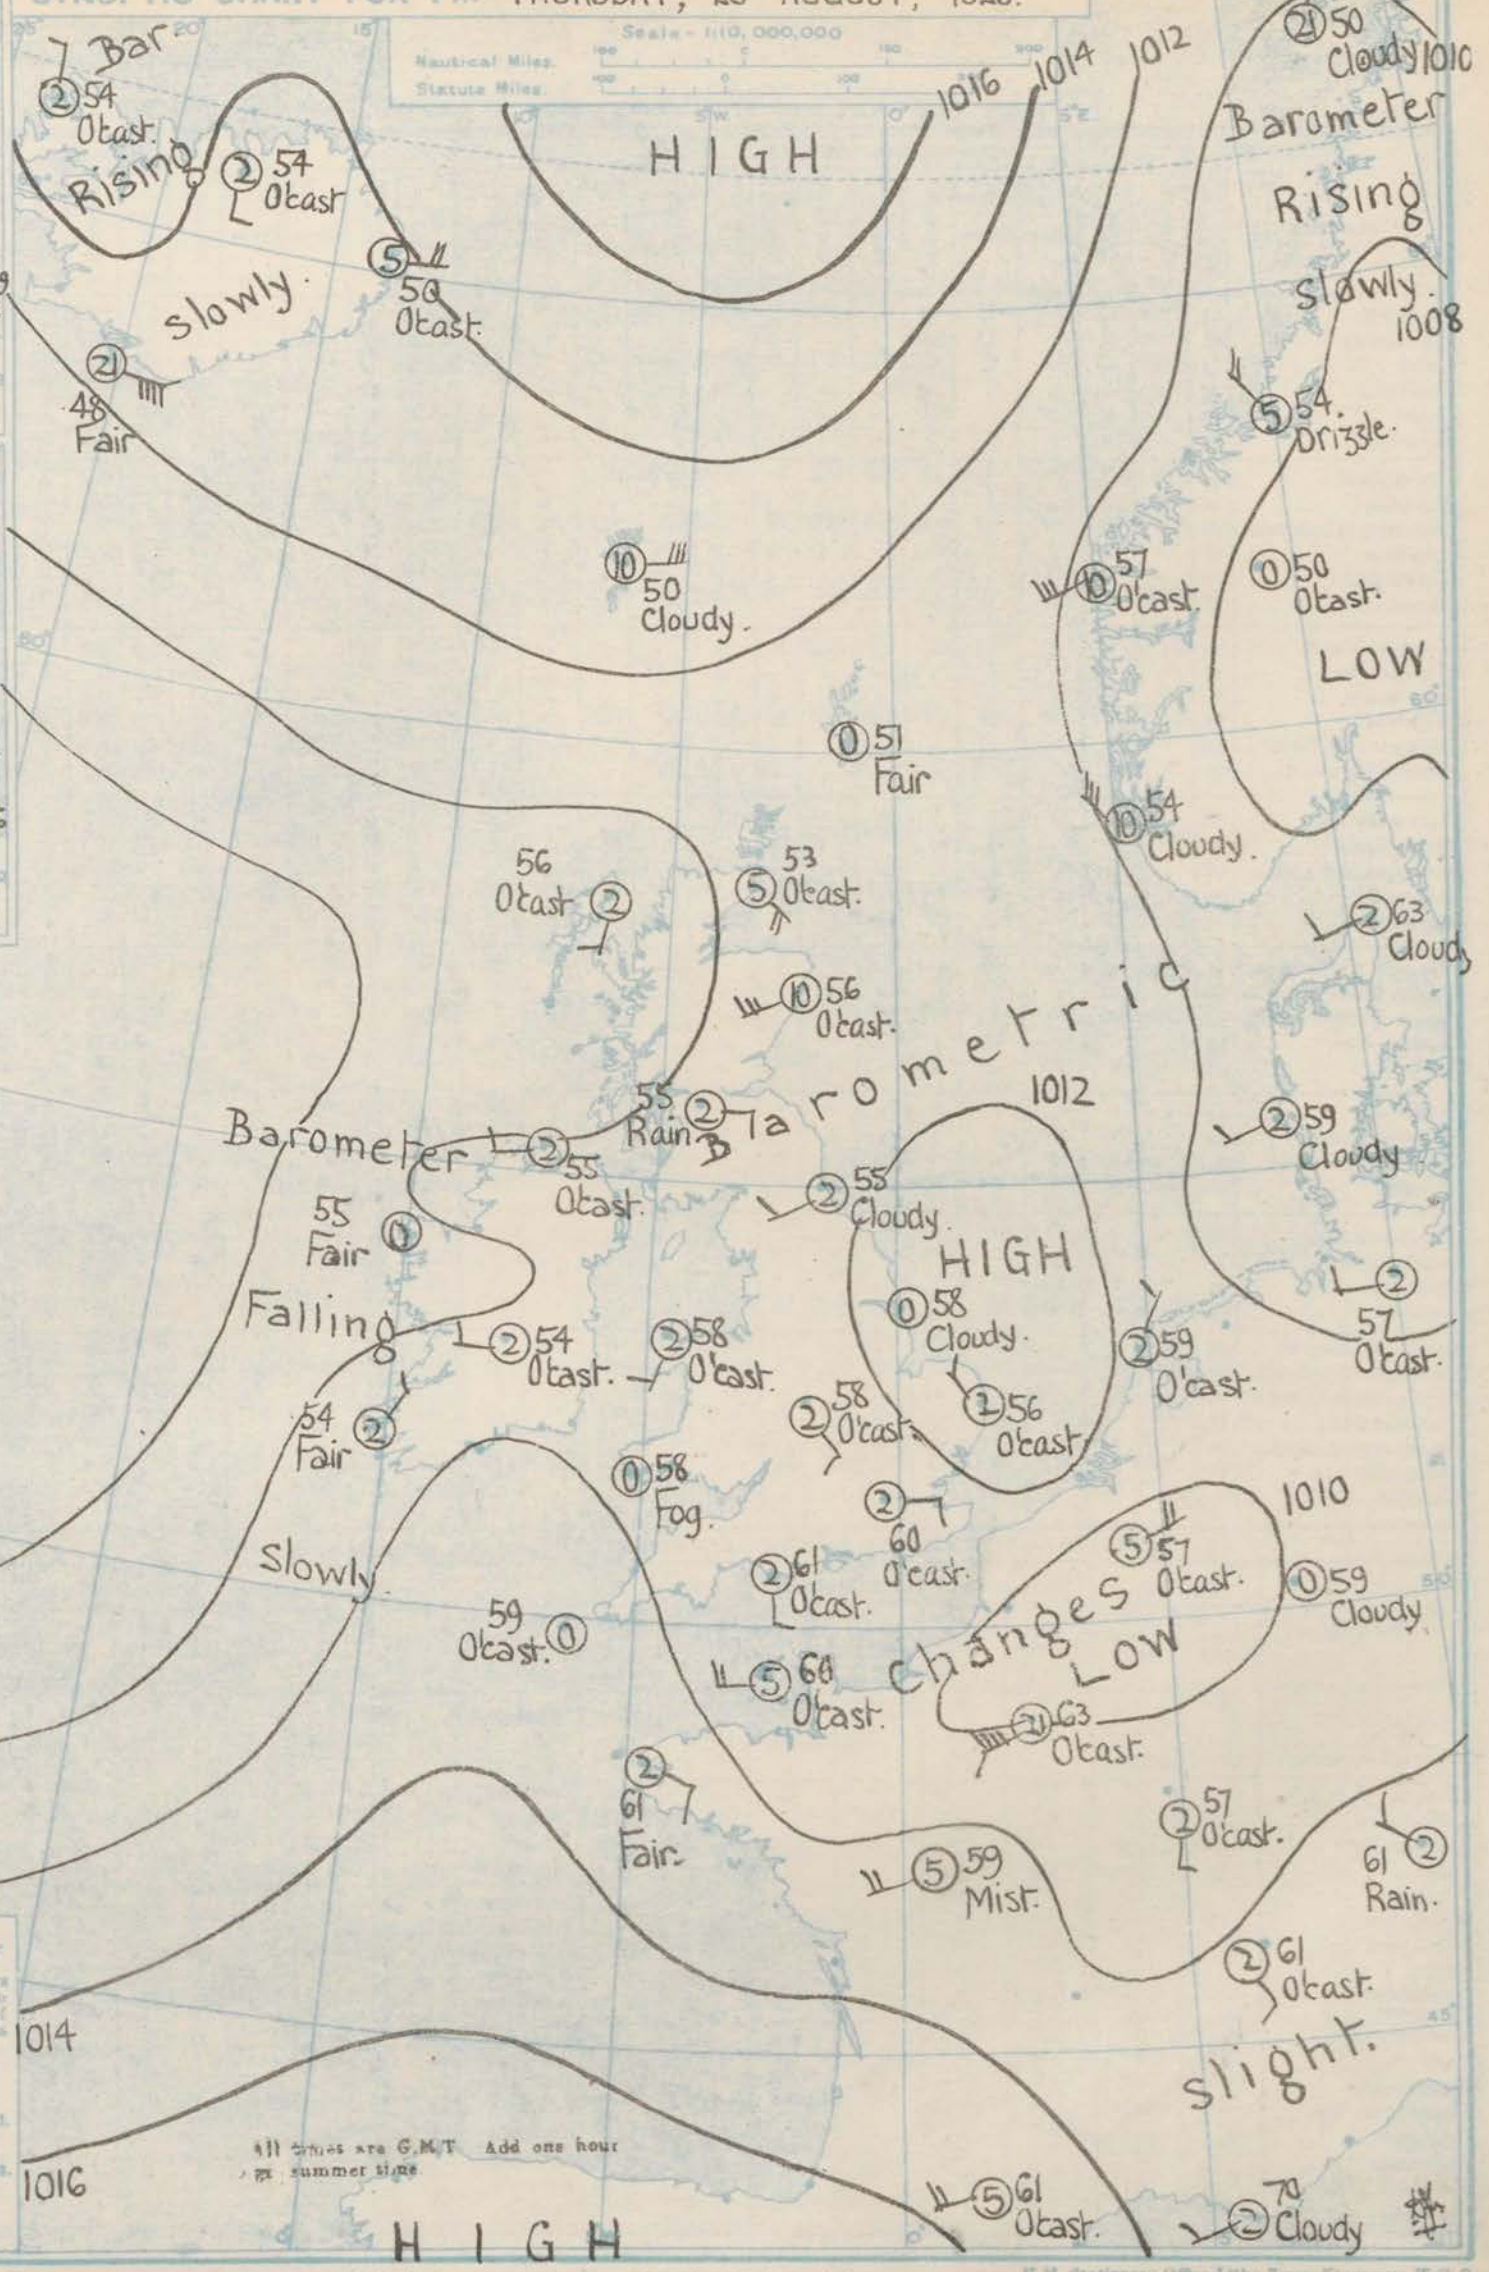

A depression off the west of Ireland will probably move eastward across the British Isles, accompanied by generally unsettled weather. Except in West Ireland only local showers will occur today, though skies will be mainly cloudy.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Thursday, 20th August, 1925.                                                                                  | Further Outlook.     |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|

SYNOPTIC CHART FOR 7h. THURSDAY, 20<sup>th</sup> AUGUST, 1925.

Scale - 1:10,000,000  
Nautical Miles. 100 200 300  
Statute Miles. 100 200 300

100% HUMIDITY  
59 Sea  
1010 Fair

EXPLANATION.  
Barometer - isobars are drawn for intervals of two millibars.  
Wind - Direction is shown by arrows pointing with the wind. Force, on the scale 0-12, is indicated by the number of strokes. Mean velocity is shown in miles per hour by figures in small circles.  
Temperature is given in degrees F.  
Weather Symbols -  
clear sky. sky & clouded. sky & rain falling. overcast sky. rain falling. snow. A hail. fog. mist. Thunder. Thunderstorm. Squall. Very Rough.

All times are G.M.T. Add one hour for summer time.

## GENERAL INFERENCE.

The deep depression off Southwest Ireland will move to a position off the Mouth of the Channel and probably become stationary, while secondaries move northward over England. Winds will be between south and east, fresh or strong in places, with intermittent rain in all districts and thunderstorms locally.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Friday, 21st August, 1925.                                                                                   | Further Outlook.                                                                                        |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind S.E. to S., moderate or fresh, strong at times locally; mainly cloudy, rain at times, perhaps thunder; visibility moderate to good; temperature moderate. | Generally unsettled with thunderst and heavy rain locally; probably some bright intervals in the South. |
| 2. E. England             |                                                                                                                                                                |                                                                                                         |

Further Outlook.

Winds mainly easterly and weather unsettled.

# SYNOPTIC CHART FOR 7h. SUNDAY, 23<sup>RD</sup> AUGUST, 1925.

Scale - 1:10,000,000  
Nautical Miles 100 200 300  
Statute Miles 100 200 300

**EXPLANATION.**  
Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows.  
Force, on the scale, is indicated by the number of the bar.  
Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in degrees F.  
WEATHER SYMBOLS:  
☉ sky clear.  
☁ sky cloudy.  
☂ overcast sky.  
☔ rain falling.  
☁☔ fog.  
☁☔☔ mist.  
☁☔☔☔ thunderstorm.  
☁☔☔☔☔ heavy rain.  
☁☔☔☔☔☔ very heavy rain.

All times are G.M.T. Add one hour to get summer time.

GENERAL INFERENCE.

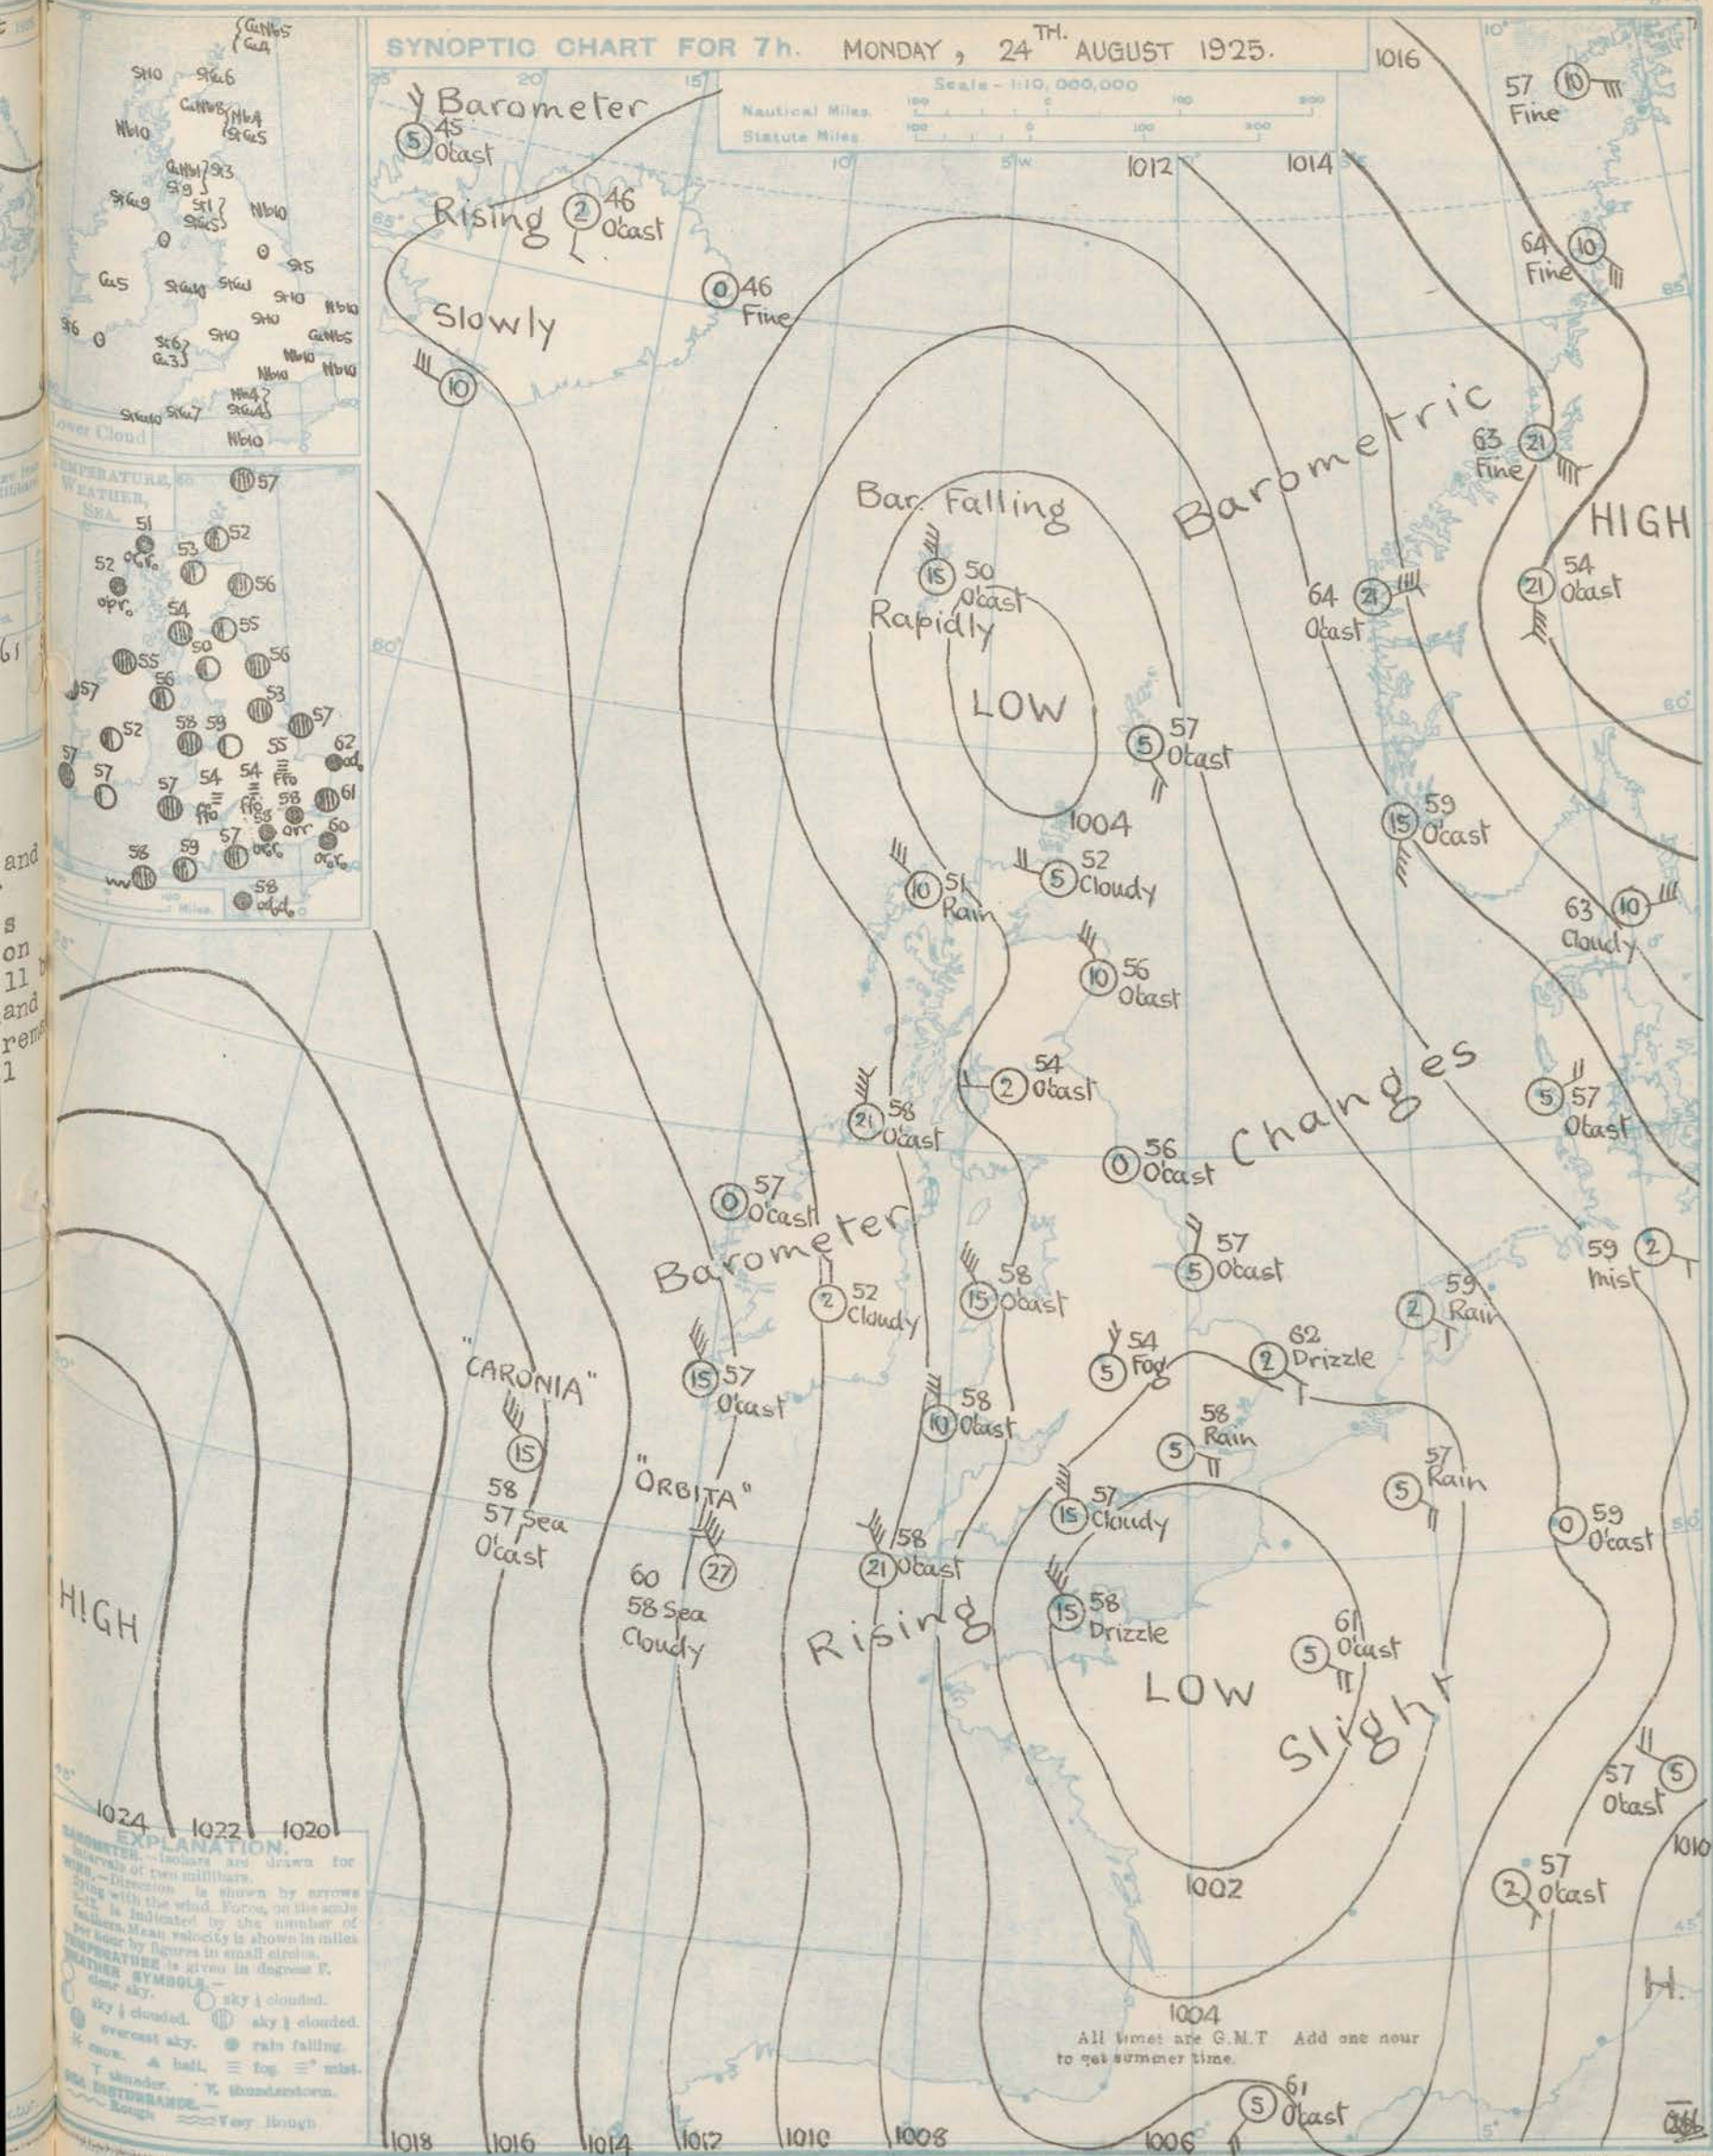

A trough of low pressure extends from between Iceland and Norway down the east coast of England to France and there is a ridge of high pressure out on the Atlantic. The weather will mainly be fine and sunny in Ireland and Western England but will be unsettled elsewhere with local thunderstorms.

There are depressions over Holland and to the south of Iceland, but a ridge of relatively high pressure extends across Ireland and Scotland. This ridge is likely to move slowly south-east. Fair to fine weather is probable over Scotland, Ireland and Western and Central England today, and the weather will become fair over Eastern England except on the coast, where dull weather will probably continue for another twentyfour hours.

| Districts.                | Forecasts for the 24 hours commencing 15h. G.M.T. Tuesday, 25th August, 1925.                                                  | Further Outlook. |

GENERAL INFERENCE.

There is a rather deep and nearly stationary depression over Iceland and slight secondary depressions will continue to pass across the British Isles. South-westerly winds will continue with mainly cloudy weather and occasional rain or drizzle.

Meteorological Office: Air Ministry, Kingsway, London, W.C.2.      Forecasts issued at 0845 G.M.T.      G. C. SIMPSON, F.R.S., Director

SYNOPTIC CHART FOR 7h. THURSDAY, 27<sup>th</sup> AUGUST, 1925

Scale - 1:10,000,000  
Nautical Miles 100 200 300  
Statute Miles 100 200 300

**EXPLANATION**  
Isobars are drawn for intervals of two millibars.  
Wind direction is shown by arrows lying with the wind. Force, on the scale 0-12, is indicated by the number of feathers. Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in degrees F.  
WEATHER SYMBOLS:  
clear sky, sky & clouded, sky & cloudy, overcast sky, rain falling, moon, a hail, fog, mist, thunder, thunderstorm.  
SEA DISTURBANCE:  
Rough, Very Rough

All times are G.M.T. Add one hour to get summer time.

**GENERAL INFERENCE.**

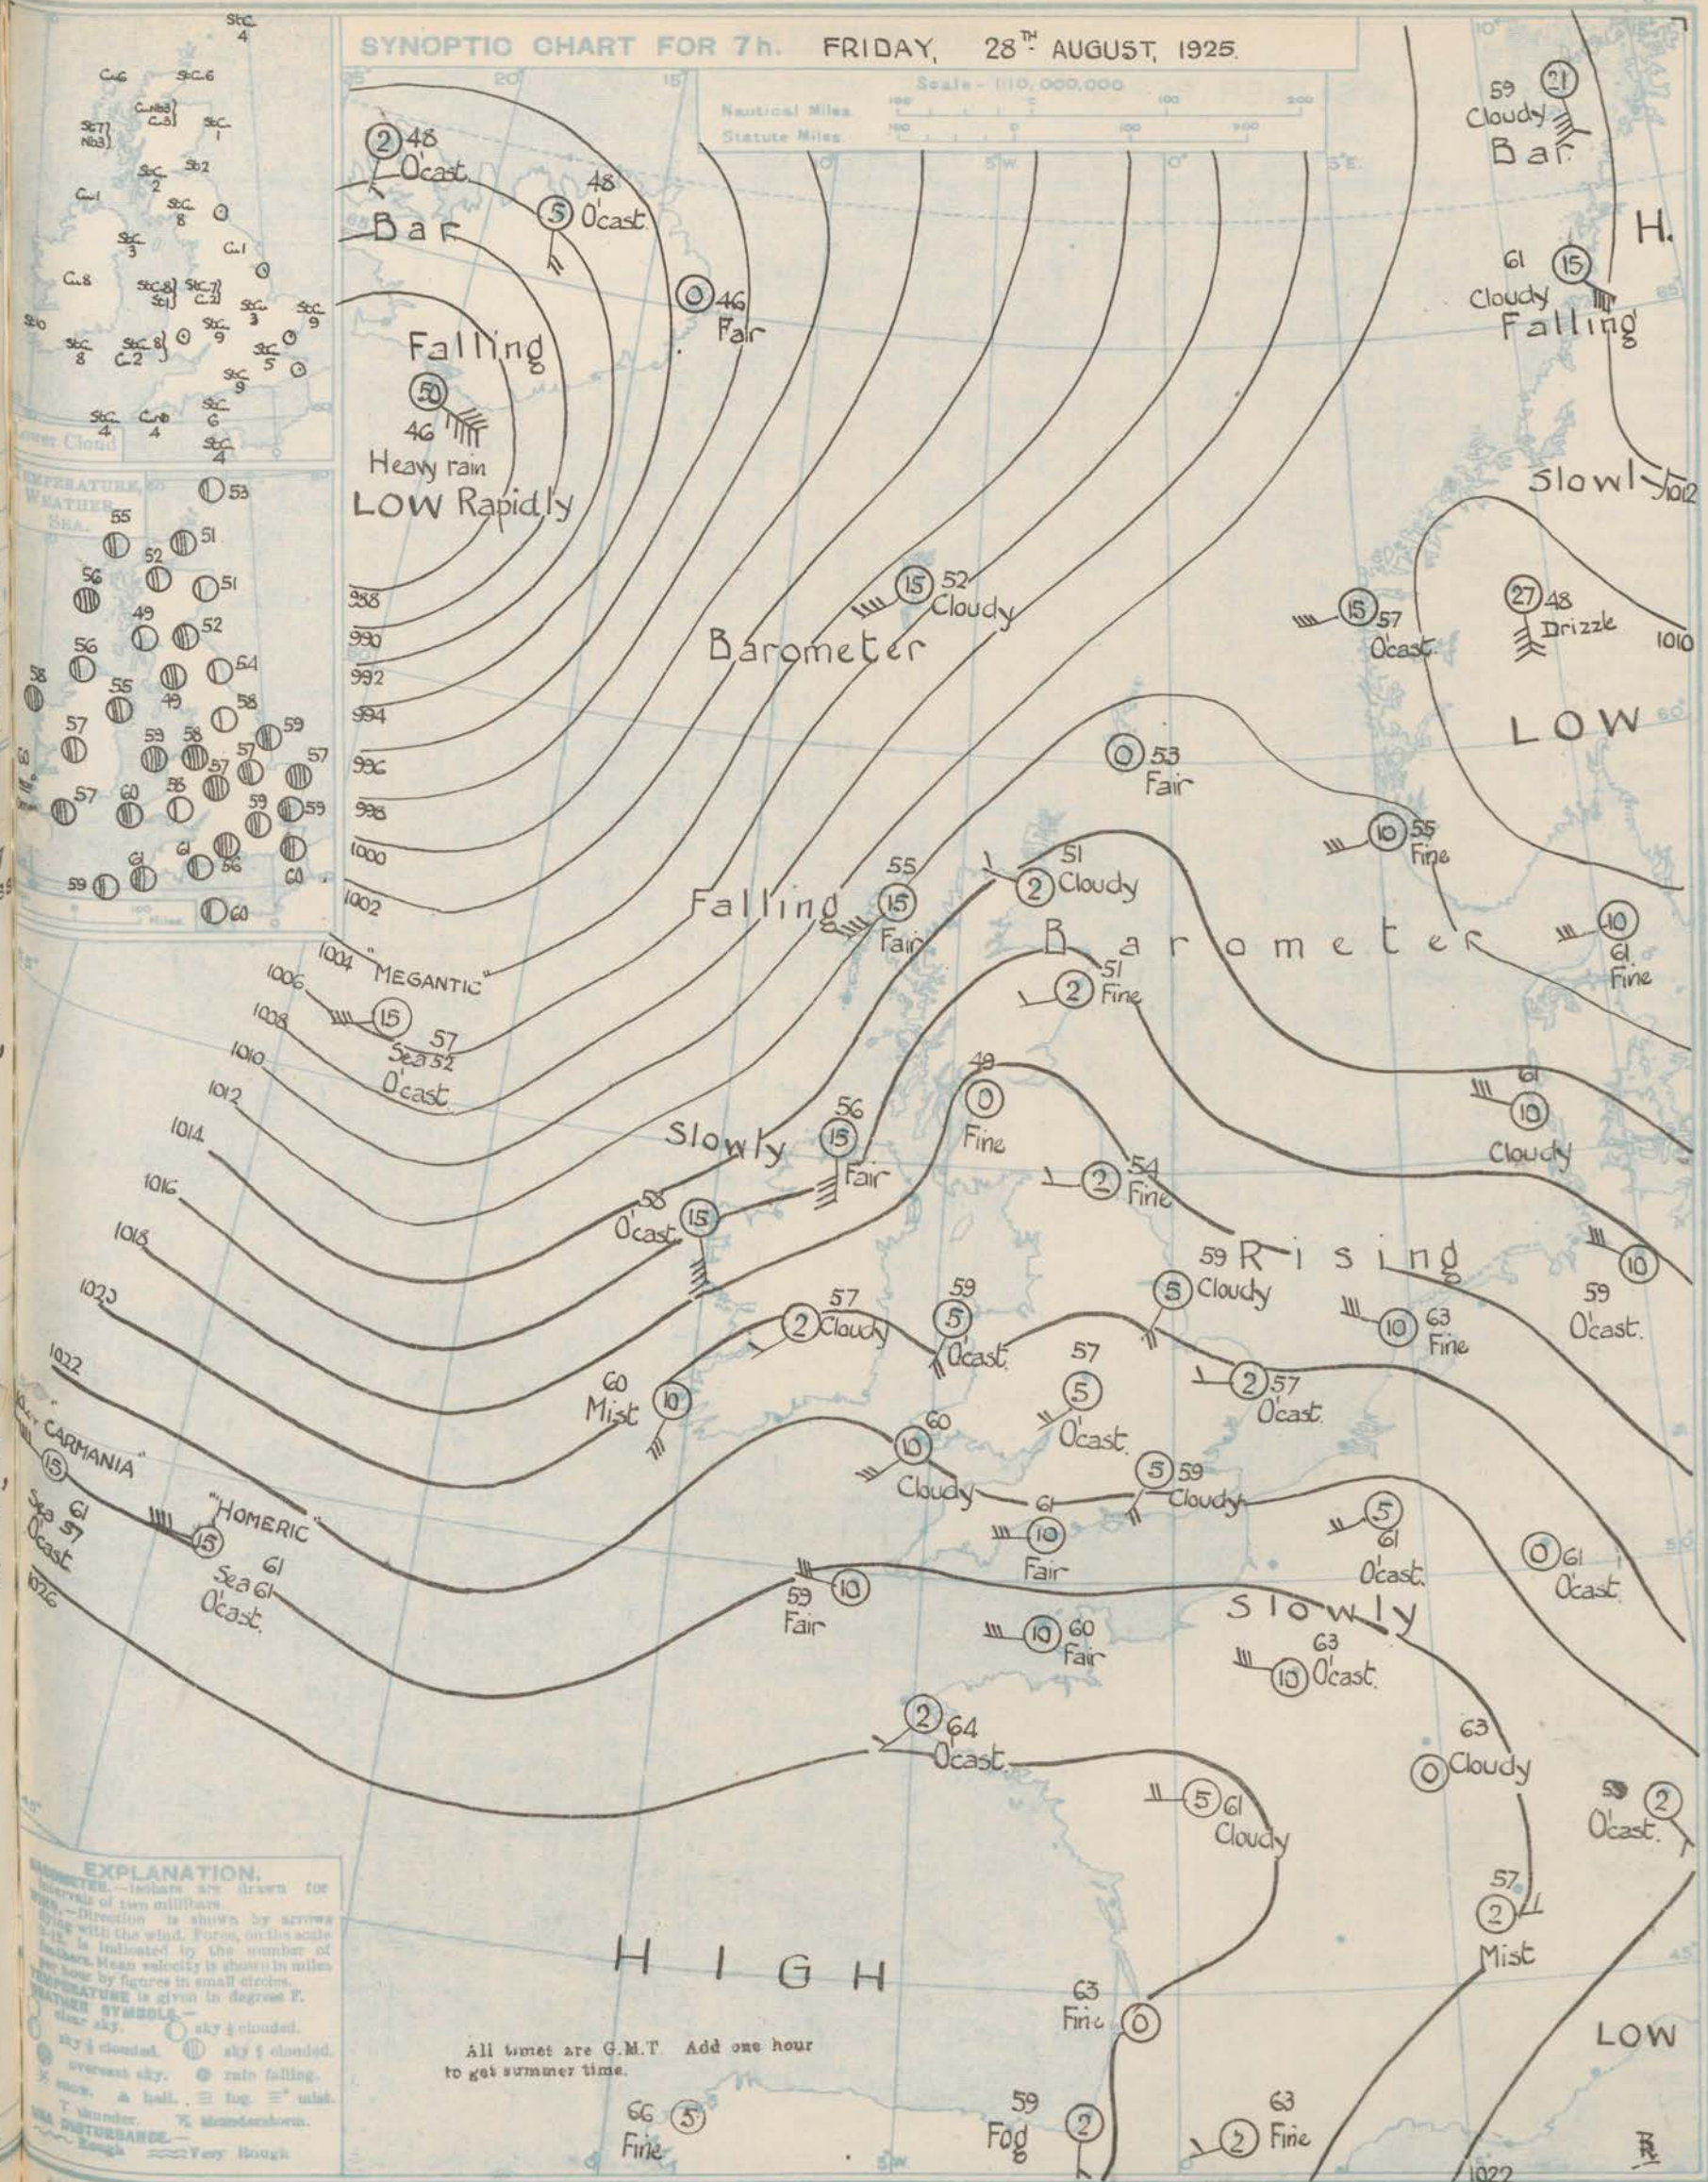

There is a deep depression south of Iceland which is likely to give rise to secondary depressions over the British Isles before long. Winds will be southwesterly and will become strong in the North, and rain is probable by tonight in Scotland, Ireland and Northwest England, spreading to Southeast England later.

| Districts                 | Forecasts for the 24 hours commencing 15h G.M.T. Friday, 28th August, 1925.                                                       | Farther Outlook.                                                                           |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind S.W., moderate to fresh; mainly cloudy, some rain; visibility moderate to good; rather warm today, slightly cooler tomorrow. | Rain at times in all districts, but considerable fair periods in the southeast of England. |
| 2. E. England             |                                                                                                                                   |                                                                                            |

All times are G.M.T. Add one hour to get summer time.

**EXPLANATION.**  
Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows.  
Force, on the scale 1-12, is indicated by the number of lines.  
Mean velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in degrees F.  
**WEATHER SYMBOLS.**

## GENERAL INFERENCE.

A wedge of high pressure is passing slowly across the British Isles and a fresh depression is situated southwest of Iceland. In southern districts winds will be mainly light, and fine, warm weather is likely to continue. In the North, winds will be moderate and westerly with clouds and rather unsettled conditions.

## Districts.

Forecasts for the 24 hours commencing 15h. G.M.T. Sunday, 30th August, 1925.

## Further Outlook

|                           |                                                                                                                      |
|---------------------------|----------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Light westerly winds, fair or fine; visibility mainly good; rather warm.                                             |
| 2. E. England             |                                                                                                                      |
| 3. E. Midlands            |                                                                                                                      |
| 4. W. Midlands            |                                                                                                                      |
| 5. S.W. England           | Mainly light variable winds; fair or fine; local mist or fog on coasts; warm.                                        |
| 6. South Wales            |                                                                                                                      |
| 7. North Wales            | Moderate westerly wind; fair to cloudy; visibility moderate to good; moderate temperature.                           |
| 8. N.W. England           |                                                                                                                      |
| 9. N. Midlands            |                                                                                                                      |
| 10. N.E. England          |                                                                                                                      |
| 11. E. Scotland           | Moderate southwesterly winds; cloudy, perhaps occasional rain; visibility moderate to good; moderate temperature.    |
| 12. S.W. Scotland         |                                                                                                                      |
| 13. Isle of Man           | As 7 - 10.                                                                                                           |
| 14. N.W. Scotland         | Moderate to fresh southwesterly wind; dull or cloudy, occasional rain; visibility mainly good; moderate temperature. |
| 15. Hebrides              |                                                                                                                      |
| 16. Orkneys and Shetlands |                                                                                                                      |
| 17. N.W. Ireland          |                                                                                                                      |
| 18. N.E. Ireland          | As 5 - 6.                                                                                                            |
| 19. S.E. Ireland          |                                                                                                                      |
| 20. S.W. Ireland          | As 14 - 18.                                                                                                          |

Fair or fine and warm for a few days in the South; unsettled in the North.

## GENERAL INFERENCE.

The large anticyclone off S.W. Coasts persists, and a deep depression off Northeast Iceland is moving eastward. A small secondary will probably cross the British Isles, with a small amount of rain in most districts, followed by somewhat cooler and less damp air. Winds will be generally between W. and N.W.

| Districts.                | Forecasts for the 24 hours commencing 15h. GMT. Monday, 31st August, 1925.                                                                                                                       | Farther Outlook.                                      |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|
| 1. S.E. England           | Wind W. to N.W., light to moderate; mainly fair, but risk of slight showers tonight or tomorrow; visibility moderate to good; rather warm and close today, somewhat cooler and fresher tomorrow. | Dry in S. and S.W. districts; unsettled in the North. |
| 2. E. England             |                                                                                                                                                                                                  |                                                       |
| 3. E. Midlands            |                                                                                                                                                                                                  |                                                       |
| 4. W. Midlands            |                                                                                                                                                                                                  |                                                       |
| 5. S.W. England           | Wind W. to N.W., light or moderate; cloudy; slight local drizzle; local coast fog at first; moderate temperature.                                                                                | -----                                                 |
| 6. South Wales            |                                                                                                                                                                                                  |                                                       |
| 7. North Wales            | Wind between S.W. and W., moderate to fresh, strong locally; veering somewhat later; cloudy, occasional slight rain, improving tomorrow; visibility moderate to good; moderate temperature.      |                                                       |
