THE BEAUFORT SCALE OF WIND FORCE.

Beaufort Number.	Admiral Beaufort's General Description of Wind.	Specification for use on Land, based on observations made at Land Stations.	Limits of Mean Velocities Statute Miles per Hour.
0	Calm	Calm; smoke rises vertically	Less than 1
1	Light air	Direction of wind shown by smoke drift	1-3
2	Slight breeze	Wind felt on face; leaves rustle	4-7
3	Gentle breeze	Leaves and small twigs in constant motion; wind extends light flag	8-12
4	Moderate wind	Raises dust and loose paper; small branches are moved	13-18
5	Fresh wind	Small trees in leaf begin to sway; crested wavelets on inland waters	19-24
6	Strong wind	Large branches in motion; whistling heard in telegraph wires	25-31
7	High wind	Whole trees in motion; inconvenience felt when walking against wind	32-38
8	Gale	Breaks twigs off trees; generally impedes progress	39-46
9	Strong gale	Slight structural damage occurs (chimney pots and slates removed)	47-54
10	Whole gale	Seldom experienced inland; trees uprooted	55-63
11		Very rarely experienced; accompanied by widespread damage	64-75
12	Hurricane		Above 75

BEAUFORT NOTATION OF WEATHER.

blue sky (not more than a quarter covered).
 partly cloudy (one half covered).
 generally cloudy (three-quarters covered).
 drizzle. h. hall. KQ line squall.
 lightning. o overcast sky.
 mist, visibility 1000-10000 m.
 fog, thick fog, less than 200 m.
 precipitation within sight of station.
 passing showers. r rain.
 snow. ra sleet. t thunder.
 unusual visibility. y dry air.
 dust haze; the turbid atmosphere of dry weather.

With present weather is combined, whenever possible, the general character of the weather.
 A "solidus" divides actual existing weather from preceding conditions, thus: -b/r=fair weather after rain; i=intermittent; -="decreasing"; += "increasing"; h(r)="hail" or "rain and hail".
 Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus: -
 R = heavy rain.
 rr = continuous moderate rain.
 rrr = continuous light rain.

GALE WARNINGS.

The Meteorological Office issues warnings to ports and fishing stations of gales on or near the coasts of the British Isles. When one of these notices has been received at a station a black canvas cone is hoisted.

The South Cone (point downwards) is hoisted for gales from S.E., veering to S.W., W. or N.W.
 " S.W., veering to W. or N.W.
 " W., veering to N.W.
 " E., veering to S. or S.W.

The North Cone (point upwards) is hoisted for gales from S.E., E. or N.E., backing to N.
 " N.W., veering to N., N.E. or E.
 " N., veering to N.E. or E.
 " N.E., veering to E.

The Signals remain hoisted after the receipt of a warning telegram until danger of a gale is passed.
 The Districts to which warnings are sent are shown in the British Section of the Daily Weather Report by the following symbols: -

▼ South Cone hoisted
 ▲ North " "

AIR MINISTRY.

METEOROLOGICAL OFFICE, LONDON.

NOTES ON THE INFORMATION CONTAINED IN THE BRITISH AND INTERNATIONAL SECTIONS OF THE DAILY WEATHER REPORT.

Heights of Stations.—The heights of British Stations above M.S.L. published in the British Section of the Daily Weather Report refer to the plot of ground on which the rain gauge is situated.

Pressure.—The distribution of barometric pressure at Mean Sea Level is shown by means of isobars which are drawn for intervals of 2 millibars on the British Section of the Report and for intervals of 4 millibars on the International Section.

The wind at a height of 1,500–2,000 feet above ground usually blows along the isobars and, for the same temperature, pressure and latitude, the speed of the wind is inversely proportional to the distance between the isobars, e.g., for isobars 1 inch apart (160 miles) in the Daily Weather Report the speed of the upper wind is about 12 m.p.h. in latitude 55°, with a temperature of 50° F. and a pressure of 1,015 mb; if, however, the isobars are $\frac{1}{2}$ inch apart the corresponding speed is 24 m.p.h.

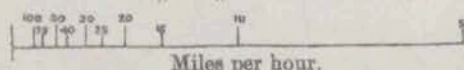

The scale below can be used with both the International and the British Sections. If the distance between consecutive isobars is measured along the rule from the left-hand extremity the geostrophic wind is shown by the scale in miles per hour.

GEOSTROPHIC WIND SCALE FOR

4 mb isobars on 1 : 2 × 10⁷ Charts.

or 2 mb " " 1 : 10⁷ "

or 1 mb " " 1 : 5 × 10⁶ "

This scale applies under the following conditions:—

Pressure, 1,015 mb. Temperature, 283° A=50° F. Latitude, 55°.

Corrections.—For an increase of 10 mb pressure, subtract 1% from velocity; for an increase of 10° F. add 2%. From Latitude 55° to Latitude 65° subtract 1% for each degree above 55°. From Latitude 55° to Latitude 45° add 1½% for each degree below 55°.

Weather.—In describing the distribution of weather over a district or during an interval of time such as a day, descriptive adjectives are used with the following meanings:—

Fine—mainly b and bc of the Beaufort notation (see previous page).

Fair or fair generally—mainly bc and c.

Cloudy—combinations of bc, c and o, c predominating.

Overcast—mainly c and o.

Dull—overcast with low heavy cloud.

Varying or variable cloud—combinations of b, bc, c, and o.

Precipitation when occurring is specifically mentioned.

Temperature.—Temperature is specified in degrees Fahrenheit, and is shown on the charts by means of figures written alongside the circles which indicate the positions of the stations.

Maximum and Minimum Temperatures entered in the British Section for Liverpool (Bidston) since 1st March, 1921 have been for the 24 hour period commencing at 9 a.m. the previous day.

Upper Air Temperature.—The actual observations are made normally, one at 1,000 feet above the level of the aerodrome, and the remainder at pressures of 950, 900, 850, 800, etc., millibars. Heights are then computed and, apart from instrumental error, are correct heights: they do not require modification for differences of temperature from normal as these are allowed for in the computation. The values are shown graphically and in tabular form in the Upper Air Supplement. On the diagram, temperatures are given in degrees Fahrenheit and Absolute. The lines marked "Anti-cyclonic," "Cyclonic," "Summer," and "Winter," indicate the normal fall of temperature with pressure under the conditions indicated. The oblique line marked "Adiabatic" shows the lapse rate of temperature for dry air ascending or descending under adiabatic conditions, i.e., without communication of heat from external sources. The lapse rate under these circumstances is very approximately 5.5° F. per 1,000 feet, or 10a per kilometre. A lapse rate greater than this value indicates instability of the atmosphere.

Times of Sunrise, Noon and Sunset.—In compiling the table of Greenwich times of sunrise and sunset for selected stations in the British Section of the Daily Weather Report the mean declination of the sun for noon of each day is taken. No account is taken of the variation in declination on any given day as between leap year and the three following years, the same figures being repeated from year to year without change.

Radio Disturbances (Atmospherics) at Croydon.—In the table under the above heading, information is given concerning atmospherics heard at Croydon. The term "atmospherics" is used to denote the clicks and crashes which are commonly heard in a wireless receiver, the intensity of which varies greatly at different times. Observations at Croydon are made 4 times daily at 1h., 7h., 13h. and 18h. G.M.T.

The second column indicates the type of sound heard, by the following abbreviations:—

C—Uniform clicks and normal quiet distribution.

C₁C₂—Clicks of two obviously different orders of intensity.

Cg—Clicks predominant but a few grinders.

G—Grinders predominant.

GG—Continuous grinders whose minimum direction can be found by estimation of intensity without counting.

Ck—Clicks with a few loud crashes.

CK—Clicks with numerous crashes.

KK—Very loud atmospherics.

In the third column the number of atmospherics per 4 seconds is shown. This number is obtained with the receiving coil set in a direction to give the maximum number.

Fourth Column: Strength. From January 1st, 1923, strength has been obtained from the formula $S = \frac{10}{r}$ where r is the resistance in ohms of the shunt necessary to reduce the number of atmospherics heard in the telephone to one quarter of those heard without shunt.

Fifth column. Direction. This indicates the direction from which the maximum intensity of atmospherics is proceeding. Directions are given in degrees (see diagram below).

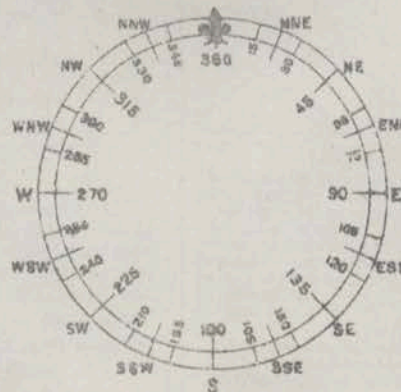

It is to be noted that there is an ambiguity of 180° in the determination of direction.

Wind.—All wind directions specified in the reports are "true," as distinguished from "magnetic." The arrows indicating wind direction are drawn to fly with the wind. Wind velocities are shown on the charts of the British Section and Upper Air Supplement in m.p.h. by the numbers placed within the small circles. In the International Section velocities are not shown. In both Sections the number of feathers on the arrows denotes wind force by Beaufort number.

Upper Winds.—The direction and velocity of the wind are given in the charts of the Upper Air Supplement for heights of 1,000 feet, 3,000 feet, and 6,000 feet. The data are also given in tabular form for various heights. The reports are usually based on Pilot Balloon ascents.

Wind reports deduced from British Pilot Balloon Ascents refer to the 1,000 feet layers centering at the heights given in the table up to 16,000 feet. When winds are reported at greater heights, they refer to the 5,000 feet layers centering at 20,000 feet, 25,000 feet, 30,000 feet and 35,000 feet.

In the tabular statement direction is specified in degrees from true north measured through East 90°, South 180°, West 270° to North 360°. (See diagram below.)

Note.—Ships' Reports.

SEA DISTURBANCE.

0. No or slight swell.	Sea smooth to moderate.

SUPPLEMENT TO THE DAILY WEATHER REPORT OF THE METEOROLOGICAL OFFICE, LONDON.
SUMMARY OF METEOROLOGICAL OBSERVATIONS AT SELECTED STATIONS ISSUED ON THE 1st DAY OF EACH MONTH.

Notes on the Weather of SEPTEMBER, 1923.

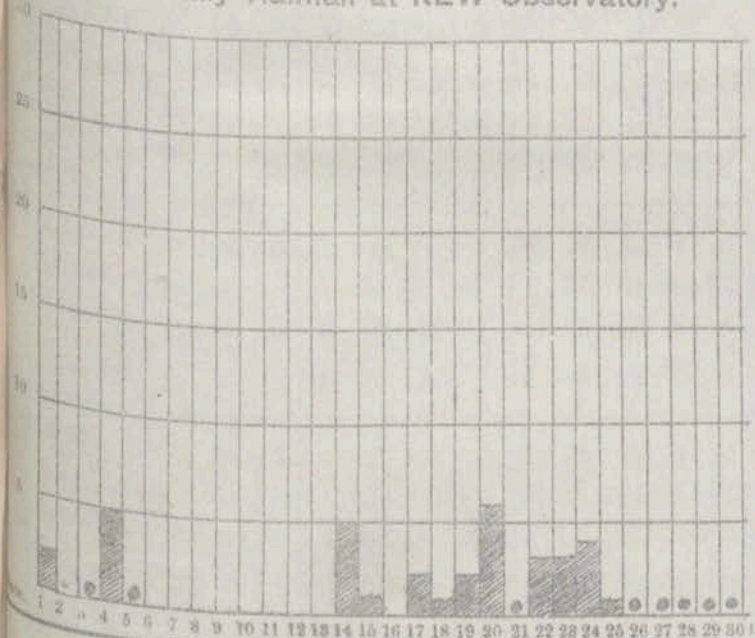

The rough, unsettled weather which prevailed in the British Isles at the end of August improved during the early part of September. Some heavy rain fell at times in the North and West but on the whole the amount of precipitation was small and sunshine records were good while temperature rose somewhat above 70° on several occasions in southern England.

During the second week, however, conditions deteriorated again. High westerly winds and gales occurred in the North on the 11th and 12th and on the 13th unsettled weather spread southward also. Thunderstorms developed locally on the 14th and 15th and over 20 mm. of rain were measured in several parts of England and as much as 31 mm. at Spurn Head. The supply of "polar" air brought by northerly winds from the Icelandic region caused a decided drop in temperature on the 15th and there followed a period of cool weather with maxima about 60° or even lower. Centres of depressions frequently crossed our Islands and much rain fell though in some instances the eastern districts were not affected until night time. Thunderstorms occurred in many parts on the 18th and again on the 22nd and 23rd.

High winds were experienced on some or other exposed parts of the coasts almost daily for more than a fortnight and were fairly widespread on the 17th, 20th - 21st and 23rd - on each of which dates gale force was reported locally. Towards the close of the month, however, the anticyclone over France spread northward over the British Isles, causing a drier, warm but somewhat misty weather. In several districts the highest temperatures for the month were recorded on the last day.

Sunshine was above normal in London and some southern and eastern districts and rainfall deficient but in the North and West rainfall was heavy; 183 mm. were measured at Skidalemuir.

Daily Rainfall at KEW Observatory.

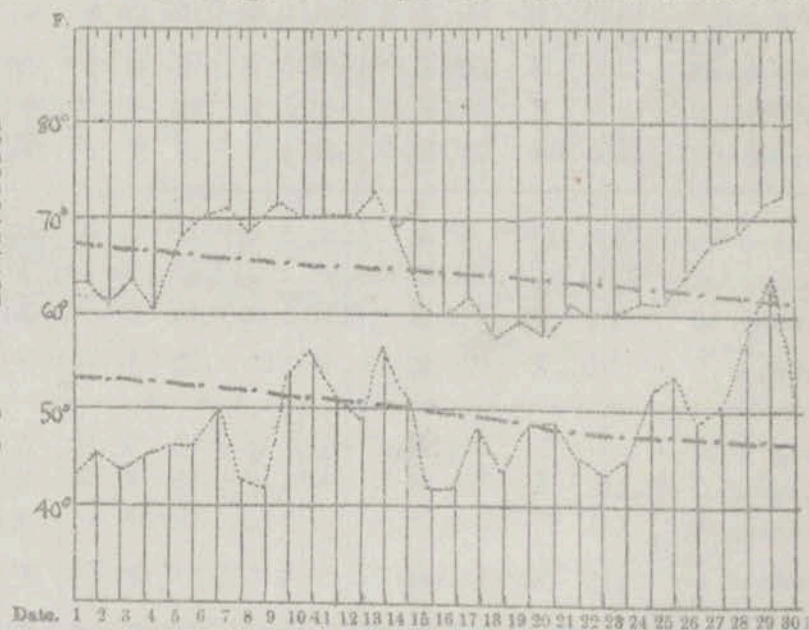

Daily Range of Temperature at KEW Observatory.

TEMPERATURE.

The peaked curves indicate the maximum temperature recorded each day, and the minimum temperature each night throughout the month. The chain lines show normal values.

RAINFALL.

Δ = less than 0.1 mm.
Total for month 35 mm.

GENERAL INFERENCE.

The shallow depression over the North Sea continues to fill up, and there are indications of a new disturbance over the Atlantic southwest of Iceland. Weather will be mainly fair, but there is a likelihood of local showers, probably accompanied by thunder, the Southeast. Some rain may occur later in the extreme West.

Districts	Forecast for the 24 hours commencing 15h G.M.T. Saturday, 1st September, 1923.
1. S.E. England	Light westerly or variable winds; mainly fair or fine but local thundery showers probable; morning mist; cold with ground frost locally at night, rather low day temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	Wind N.W. to variable, light or moderate; mainly fair or fine but local showers; morning mist; cold with ground frost locally at night; rather low day temperature.
5. S.W. England	
6. South Wales	Wind mainly N.W., light or moderate; fair; visibility good; rather cool.
7. North Wales	
8. N.W. England	Wind N.W. to variable, light or moderate; mainly fair or fine but local showers; morning mist; cold, ground frost locally at night.
9. N. Midlands	
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	Wind northerly to variable, light or moderate; mainly fair, local showers; visibility good; cold.
13. Isle of Man	
14. N. & N.W. Scotland	Wind N.W., backing, light or moderate; fair or cloudy, local rain or showers; visibility good; rather cool.
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland

BEAUFORT NOTATION OF WEATHER.																													
b blue sky (not more than a quarter covered).																													
bc sky partly cloudy (one half covered).																													
c generally cloudy (three-quarters covered).																													
d drizzle. h hail. KQ line squall.																													
l lightning. o overcast sky.																													
m mist. visibility 1000-10000 m.																													
f fog. 300-1000 m.																													
p thick fog. less than 300 m.																													
p precipitation within sight of station.																													
r passing showers. r rain.																													
s snow. ra sleet. t thunder.																													
v unusual visibility. y dry air.																													
z dust haze: the turbid atmosphere of dry weather.																													
With present weather is combined, whenever possible, the general character of the weather.																													
A "solidus" divides actual existing weather from preceding conditions, thus: bc/r = fair weather after rain; l = intermittent; - = "decreasing"; + = "increasing"; h/r = "hail" or "rain and hail".																													
Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus: -																													
K = heavy rain.																													
ry = continuous moderate rain.																													
FoFo = continuous light rain.																													
The BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.																													
SEA DISTURBANCE.

ISALLOBAR. 2nd SEPTEMBER.

Observations from Cross Channel Steamers.				Wind.		Weather.		Temp.	
Position.	Date and Time.	Steamship.		Dir.	Force.			Air.	Sea.
2	1 st 1005	CAMBRIA		NW	5	cv		54	55
1	1 st 1100	REINDEER		WNW	5	pr		61	60
3	2 nd 0100	DIEPNE		WNW	4	bc		57	57

GENERAL INFERENCE.

A ridge of high pressure off the Western Coasts is spreading East, while a depression is approaching Iceland. Fair weather is probable in the South, but in the North and extreme West conditions, after being fair at first, are likely to deteriorate with rain later.

Districts.

Forecasts for the 24 hours commencing 15h. G.M.T.

Sunday, 2nd September, 1923.

Further Outlook

Unsettled.

1. S.E. England
2. E. England
3. E. Midlands
4. W. Midlands

Light westerly winds; fair; visibility good apart from some morning mist; moderate or rather low day temperature; local ground frost tonight.

5. S.W. England
6. South Wales
7. North Wales
8. N.W. England
9. N. Midlands
10. N.E. England

Light or moderate westerly winds, backing; fair to cloudy; visibility mainly good; moderate temperature.

11. E. Scotland
12. S.W. Scotland
13. Isle of Man

Wind W. to S.W. or S., light to moderate or fresh; fair at first, rain probable later; visibility moderate or good; moderate temperature.

14. N. & N.W. Scotland
15. Hebrides

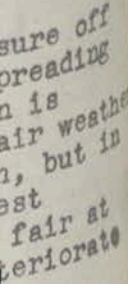

Light or moderate southwesterly winds, freshening; fair at first, rain later; visibility moderate or good; moderate temperature.

16. Orkneys and Shetlands
17. N.W. Ireland

Light variable wind becoming S.W. or S. and freshening; fair at first, rain probable later; visibility moderate or good; moderate temperature.

18. N.E. Ireland
19. S.E. Ireland
20. S.W. Ireland

As 11 - 13.

unsettled.

GENERAL INFERENCE.

A depression of great depth and intensity centred off S.W. Iceland will move eastward and cause southwesterly gales on our northern coasts. Some rain is probable generally, but in the southeast districts fine weather will probably last out the day.

Farther Outlook

Unsettled.

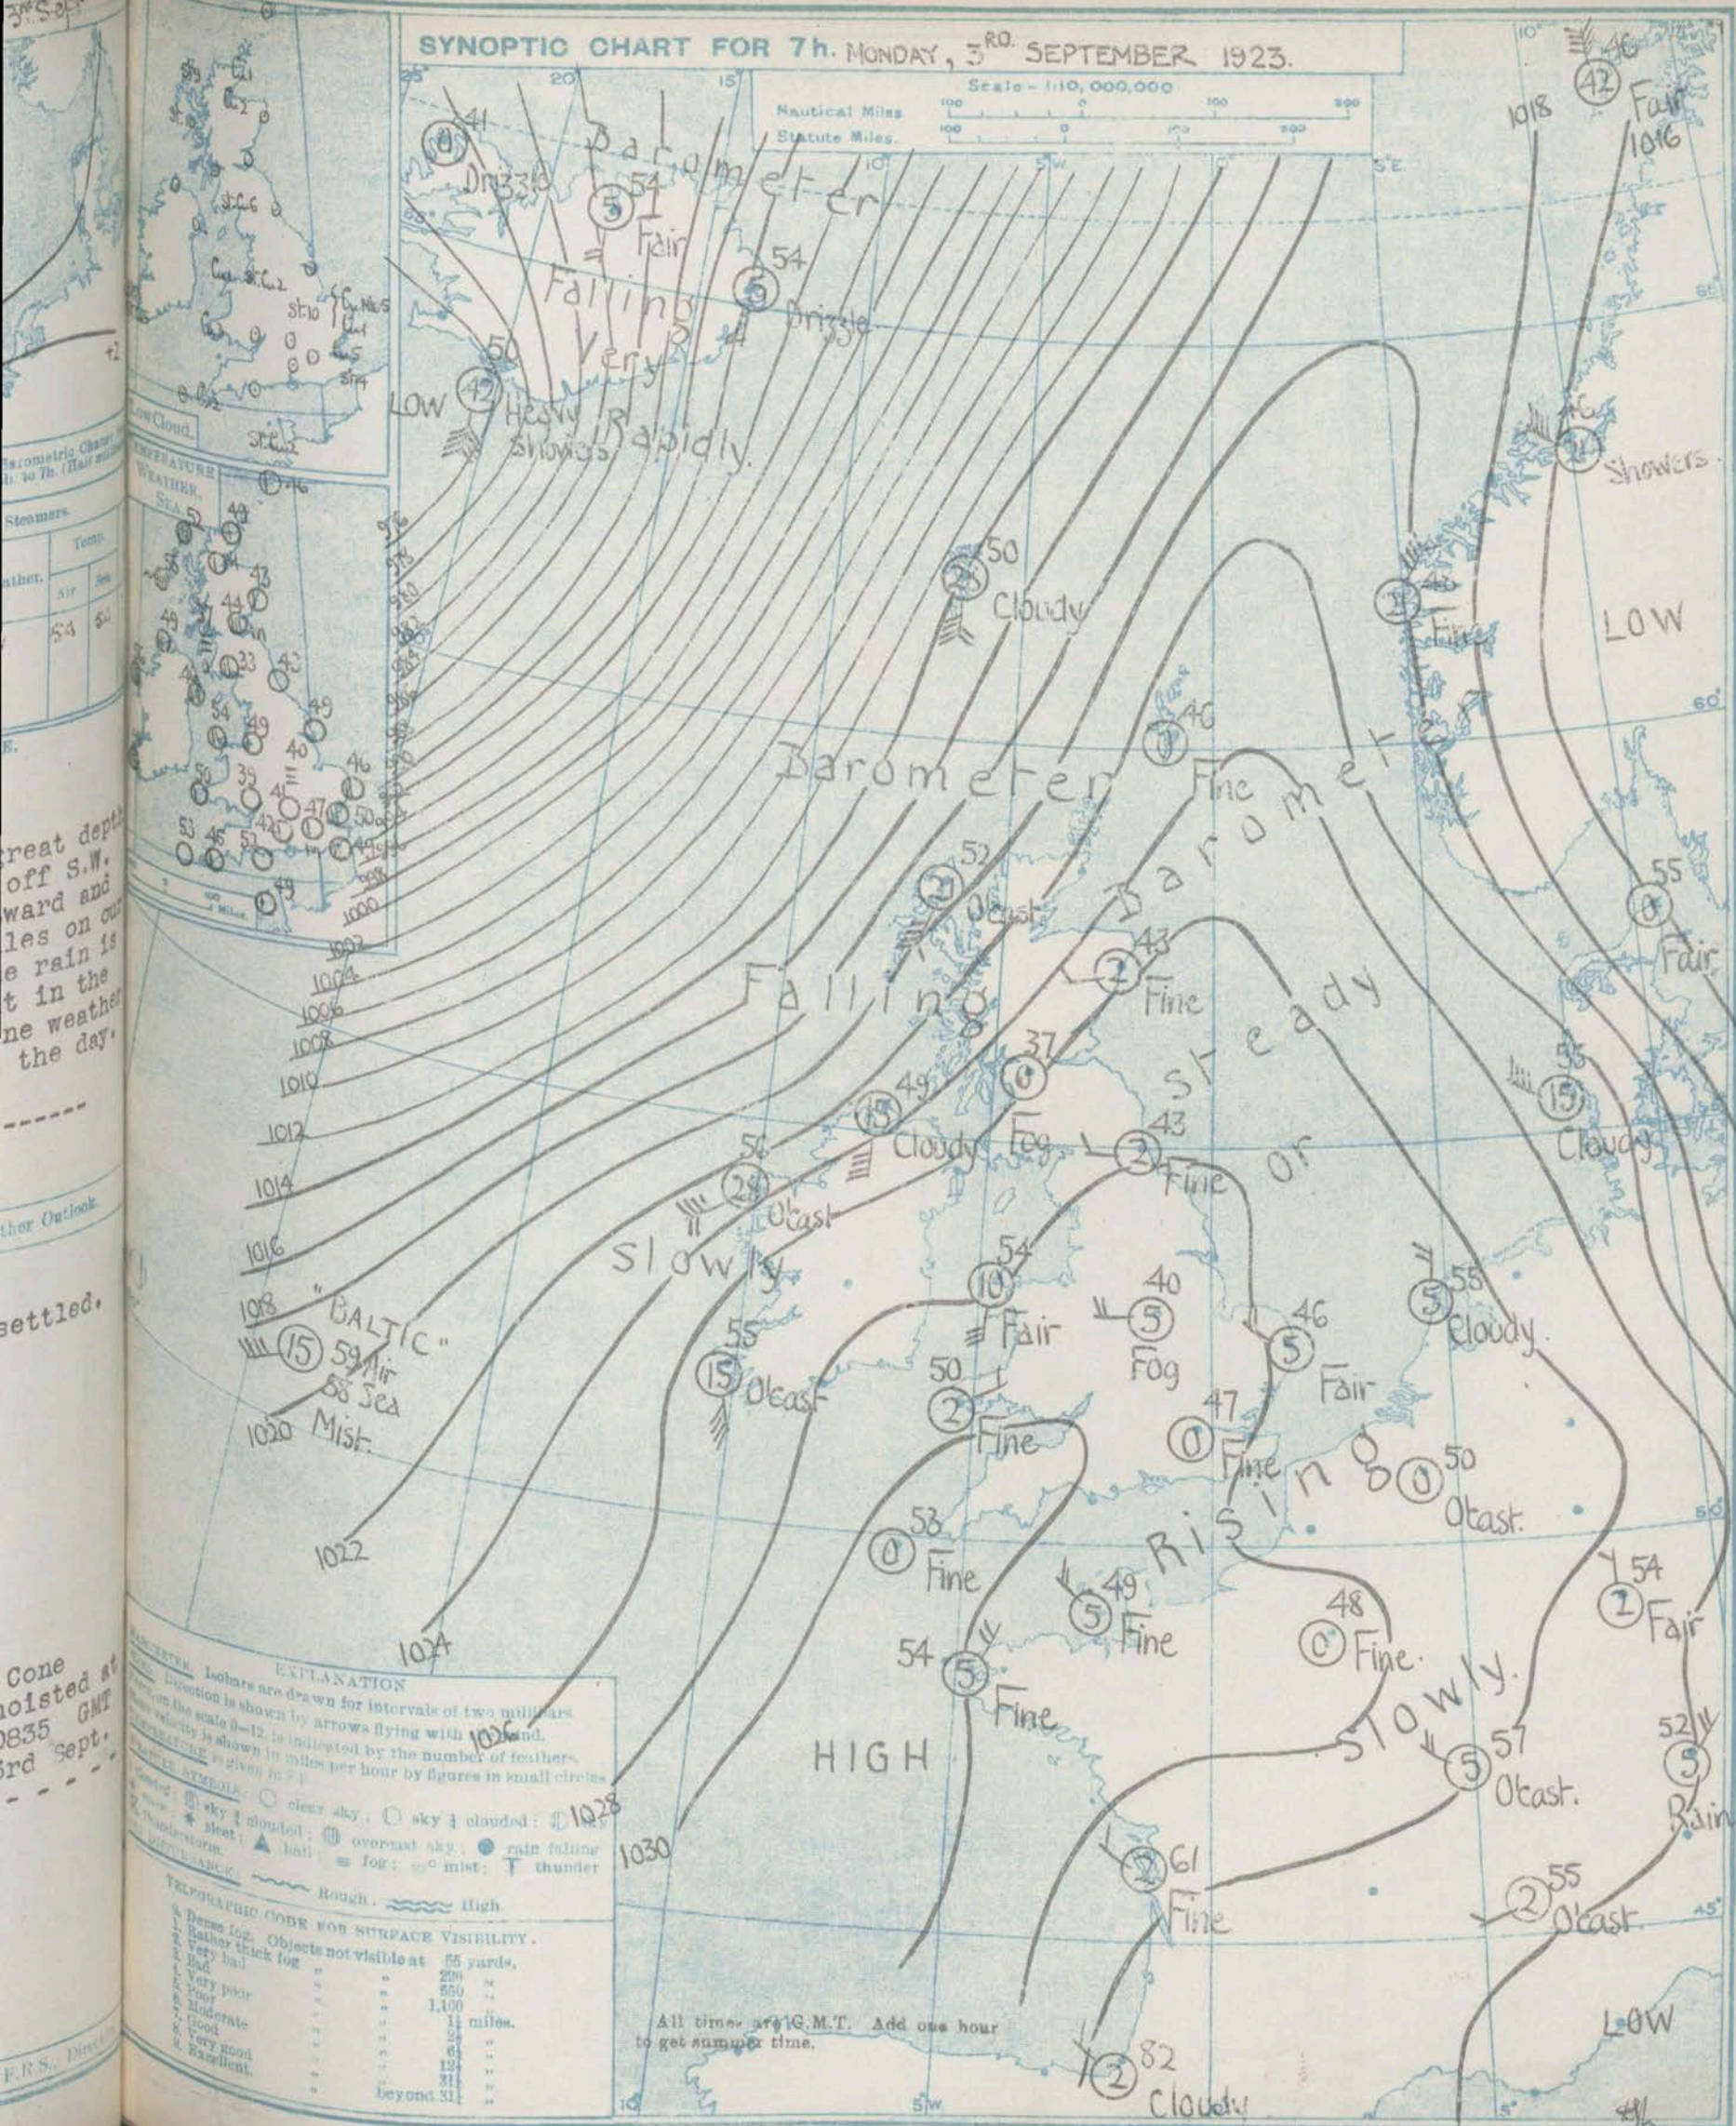

South Cone
hoisted at
0835 GMT
3rd Sept.

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Monday, 3rd September, 1923.
1. S.E. England	Wind light variable, freshening later from S.W.; fine Monday, perhaps some rain Tuesday; mist in places; moderate temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	Wind S. to S.W. moderate or fresh; cloudy, probably some rain; coast mist at times; moderate temperature.
5. S.W. England	
6. South Wales	
7. North Wales	Wind S. veering W., fresh or strong; cloudy, some rain; mist at times; moderate to rather low temperature.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Wind S. veering W., strong to a gale; cloudy, some rain; mist at times; moderate to rather low temperature.
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	Wind S. veering W., strong to a gale; cloudy, some rain; mist at times; moderate to rather low temperature.
14. N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	As for 7 - 13.
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	As for 7 - 13.
20. S.W. Ireland

Wick	5.19	12.11	7.3											
Valencia	5.58	12.40	7.22											

BEAUFORT NOTATION OF WEATHER.														
b blue sky (not more than a quarter covered).	bc sky partly cloudy (one half covered).	c generally cloudy (three-quarters covered).	d drizzle. h hail. KQ line squall. l lightning. m mist, visibility 1000-10000 m. f fog. 300-1000 m. p thick fog less than 300 m. ip precipitation within sight of station.	p passing showers. r rain. s snow. rs sleet. t thunder. v unusual visibility. y dry air. z dust haze: the turbid atmosphere of dry weather.										
With present weather is combined, whenever possible, the general character of the weather. A "solidus" divides actual existing weather from preceding conditions, thus: bc/r = fair weather after rain; i = intermittent; - = "decreasing"; + = "increasing"; h/r = "hail" or "rain and hail". Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus: R = heavy rain. IT = continuous moderate rain. rto = continuous light rain.														

THE BEAUFORT SCALE OF WIND IS USED ONLY FOR SURFACE OBSERVATIONS. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.														
SEA DISTURBANCE.														
0=no swell	Calm or slight	1=mod. swell	2=heavy swell	3=no swell	4=mod. swell	5=heavy swell	6=rough sea	7=very rough sea	8=mountainous sea					

CODE FOR STATE OF GROUND.														
0=Dry ground.	1=Wet ground.	2=Soft (muddy) wet ground.	3=Bare ground frozen (but less than 2 ins. deep).	4=Bare ground frozen (but more than 2 ins. deep).	5=Dew (or wet grass but not wet ground).	6=Skating to-day in 1900 and 1800 reports (Hear frost in 0100 and 0700 reports).	7=Snow (thin layer, often not continuous).	8=Snow (deep, impeding traffic, usually a continuous layer).	9=Grazed roads (ice on roads from frozen rain or melted snow).

SYNOPTIC CHART FOR 7h. TUESDAY, 4th SEPTEMBER, 1923.

Scale - 1:10,000,000

Nautical Miles
Statute Miles

pressure
Great
ed by a
er distur-
le are

her Outlook

settled.

All times are G.M.T. Add one hour
to get summer time.

EXPLANATION

Isobars are drawn for intervals of two millibars
Direction is shown by arrows flying with the wind.
Wind velocity is shown by the number of feathers.
Wind velocity is shown in miles per hour by figures in small circles.
Pressure is given in "h".

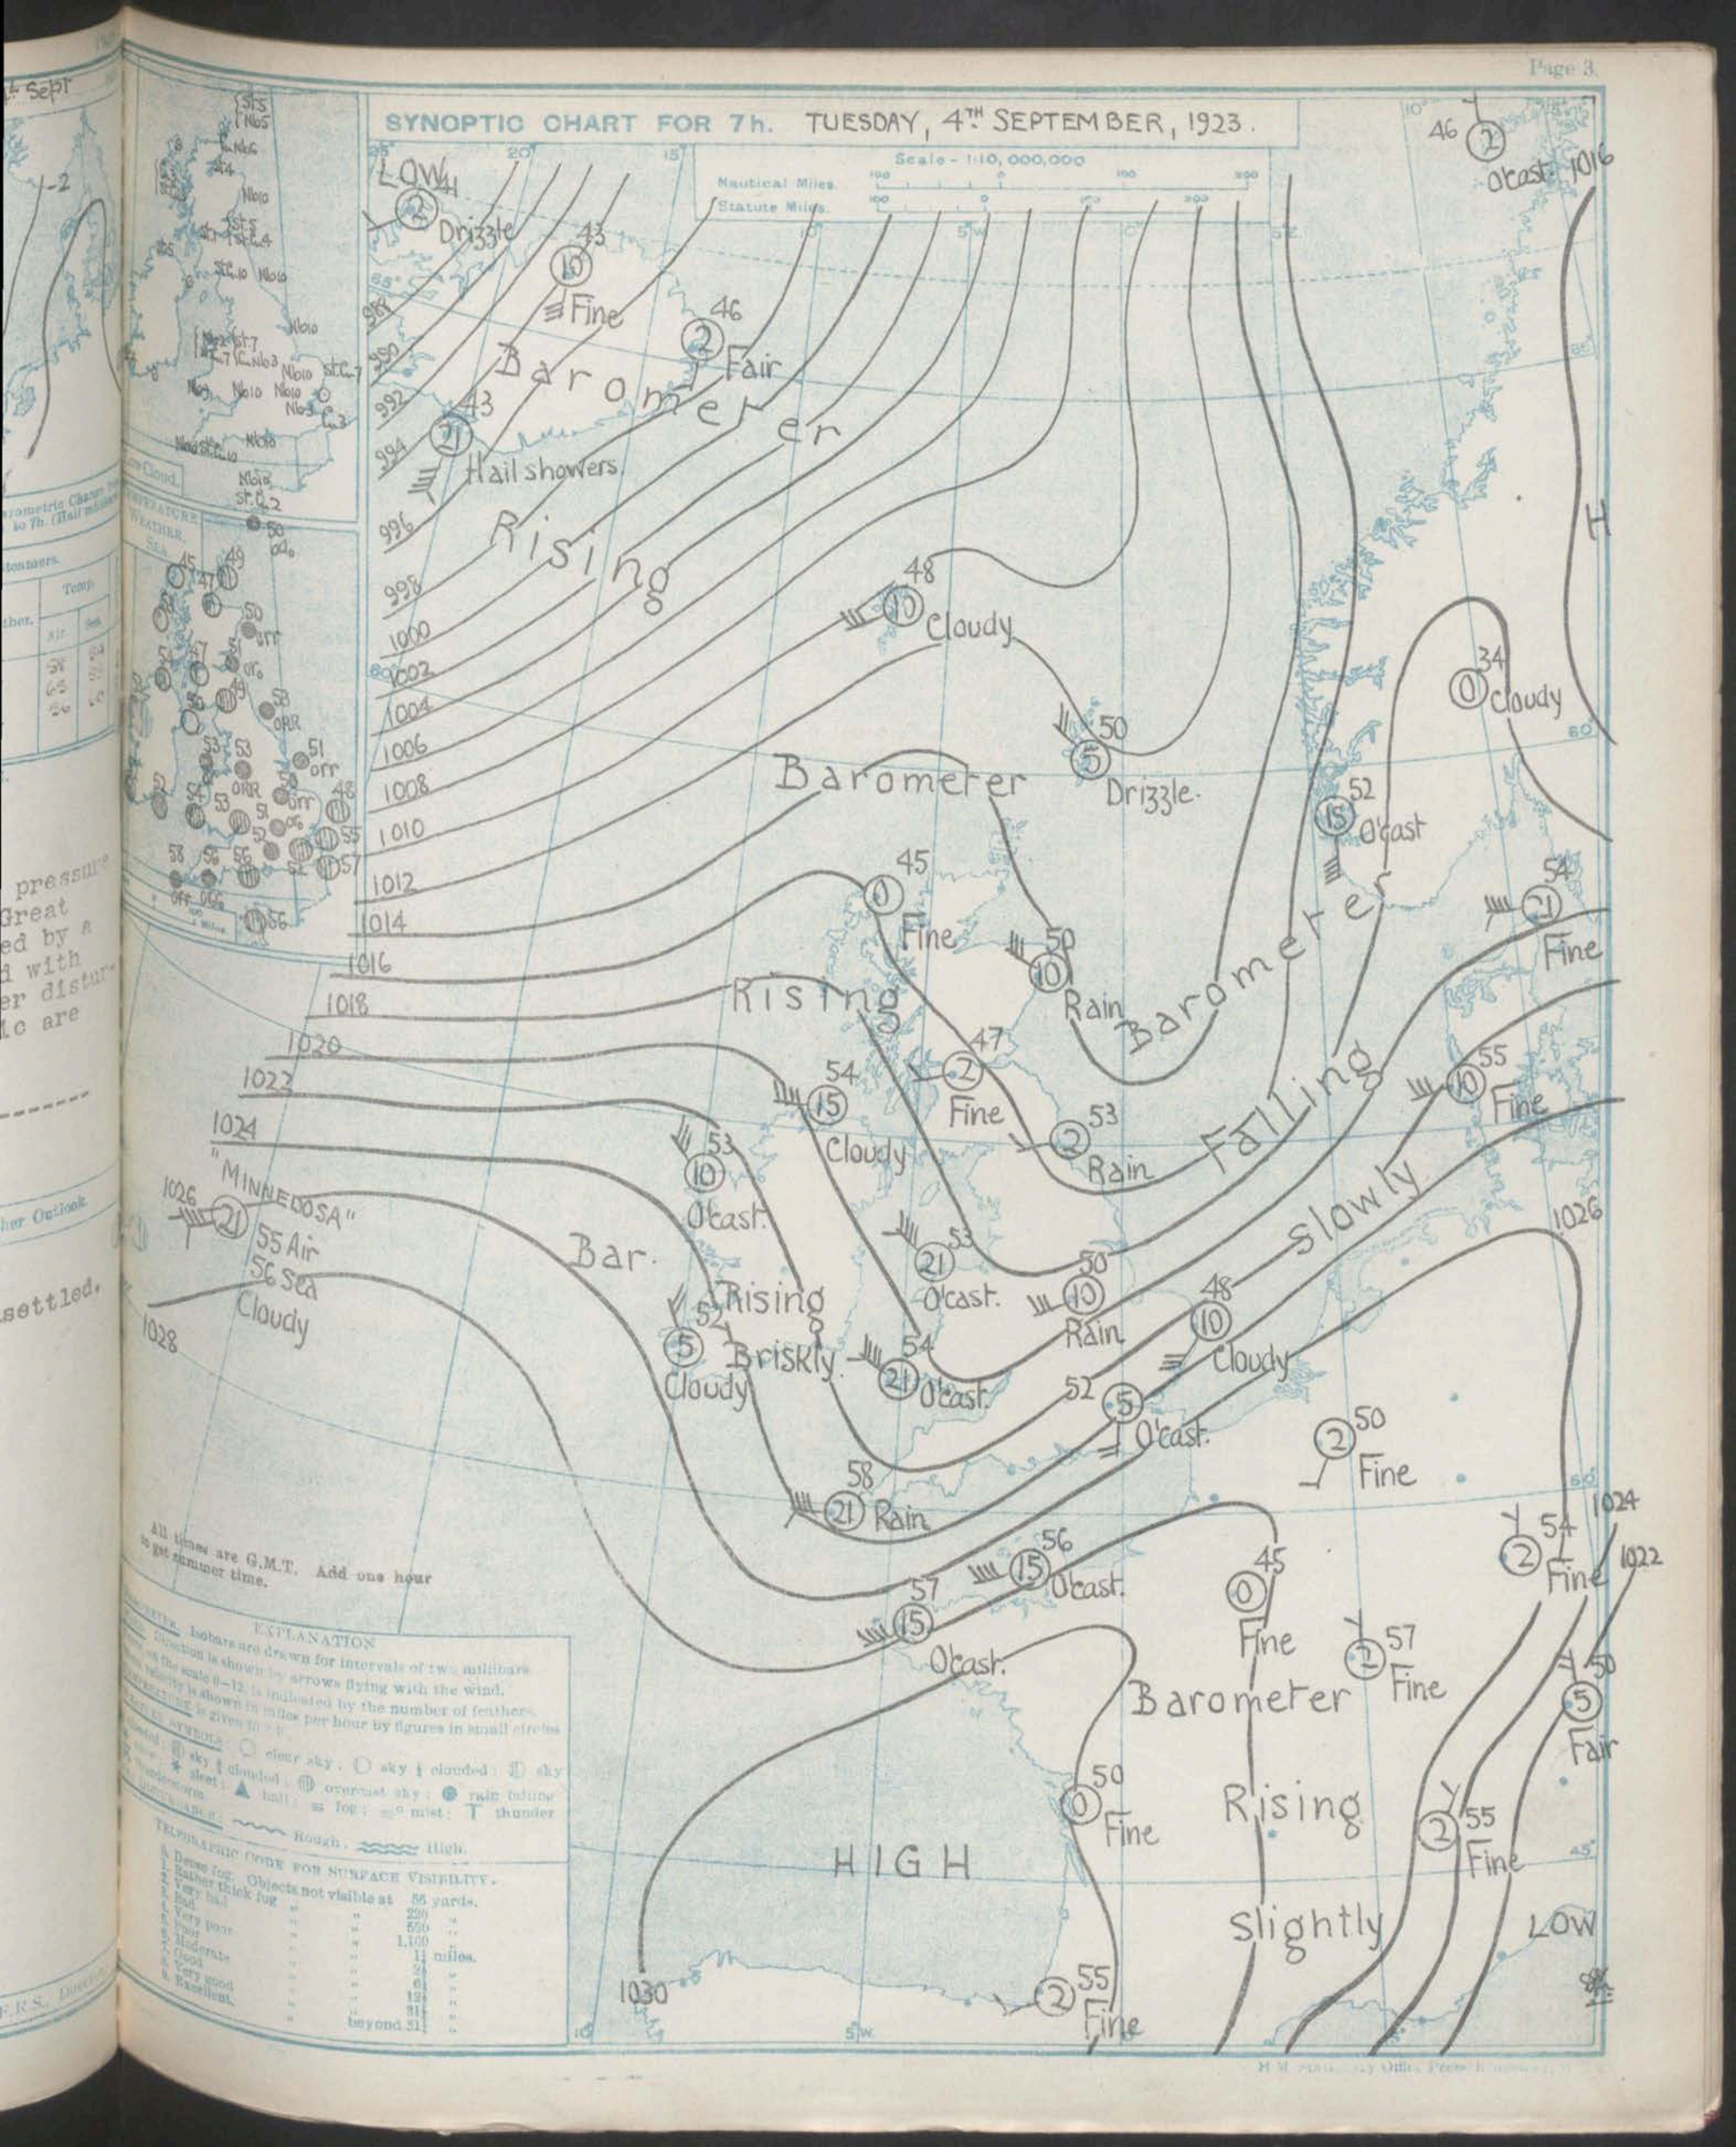

SYMBOLS:
○ clear sky, ○ sky & clouded, ☉ sky
☁ sky & clouded, ☁ overcast sky, ☁ rain volume
☁ sheet, ☁ hail, ☁ fog, ☁ mist, ☁ thunder

SYMBOLS:
~ Rough, ~ High.

TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

1. Dense fog. Objects not visible at 55 yards.	
2. Rather thick fog.	
3. Very thick fog.	
4. Fog.	
5. Very poor.	
6. Poor.	
7. Moderate.	
8. Good.	
9. Very good.	
0. Excellent.

CODE FOR STATE OF GROUND.	
0	Dry ground.
1	Wet ground.
2	Soft (muddy) wet ground.
3	Bare ground frozen (but less than 2 ins. deep).
4	Bare ground frozen (but more than 2 ins. deep).
5	Dew (or wet grass but not wet ground).
6	Skating to-day in 12/0 and 1800 reports (Hoar frost in 0100 and 0700 reports).
7	Snow (thin layer, often not continuous).
8	Snow (deep, impeding traffic, usually a continuous layer).
9	Glazed roads (ice on roads from frozen rain or melted snow).

SEA DISTURBANCE.	
0	no swell
1	mod. swell
2	heavy swell
3	no swell
4	mod. swell
5	heavy swell
6	rather rough sea.
7	rough sea.
8	very rough sea.
9	mountainous sea.

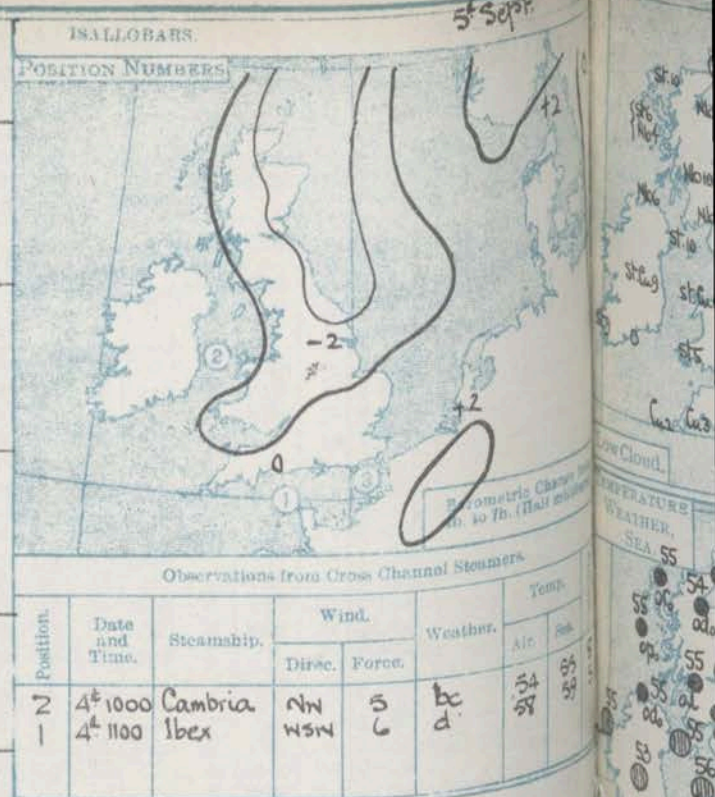

For explanation see Introduction.

Information for these columns not usually received.

The barometric change is expressed in half millibars.

For code see page 3.

GENERAL INFERENCE.

Low pressure to the north and high pressure to the south and southwest of the British Isles will maintain a westerly current strong at times in the North. Secondary depressions will cause local rain, mainly in the northern districts.

Further Outlook

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Wednesday, 5th September, 1923.
1. S.E. England	Light or moderate westerly winds; mainly fair; visibility moderate to good; rather cool.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Wind westerly moderate or fresh; cloudy, local showers or slight rain; visibility moderate to good; rather cool.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. E. Scotland	Wind westerly strong at times; cloudy, some rain; visibility moderate to good; rather cool.
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

As 6 - 10.

Unsettled with westerly winds.

EXPLANATION

Isobars are drawn for intervals of two millibars
Direction is shown by arrows flying with the wind.
Force is shown by the number of feathers.
Force is shown in miles per hour by figures in small circles.
Force is given in "f".

SYMBOLS: ○ clear sky, ○ sky & clouded: ○ sky
+ sky & clouded, ○ overcast sky: ● rain falling
+ fleet: ▲ hail: = fog: - mist: T thunder

WIND: ~~~~~ Rough, ~~~~~ High.

TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

1. Dense fog. Objects not visible at 55 yards.	
2. Rather thick fog	
3. Very bad	
4. Poor	
5. Moderate	
6. Good	
7. Very good	
8. Excellent.

GENERAL INFERENCE.

A depression centred South of Iceland is deepening and will probably move towards the Shetlands. There are indications of a secondary off the west coast of Ireland. Southwesterly winds are likely to reach gale force on our Northern Coasts and some rain is probable generally, but not until tonight or tomorrow in the Southeast.

Further Outlook

Districts.

Forecasts for the 24 hours commencing 15h GMT. Thursday, 6th September, 1923.

1. S.E. England	Light or moderate W. to S.W. wind; fair early, probably some rain later; morning mist, moderate day temperature, cool at night.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Wind S. to S.W. moderate, fresh at times; cloudy, some rain; visibility moderate to good; moderate temperature.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. E. Scotland	Wind S.W. fresh or strong; cloudy some rain; visibility moderate; moderate temperature.
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	Wind S.W. strong to a gale; cloudy, some rain; coast mist in places; moderate temperature.
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	Wind S. to S.W. fresh or strong; cloudy some rain; visibility moderate; moderate temperature.

Unsettled.

EXPLANATION

Isobars are drawn for intervals of two millibars.
Direction is shown by arrows flying with the wind.
Force on the scale 0-12 is indicated by the number of feathers.
Wind velocity is shown in miles per hour by figures in small circles.
Temperature is given in °F.

Cloud Symbols:
○ clear sky, ○ sky & clouded, ○ sky
+ sky & clouded, ○ overcast sky, ● rain falling
▲ hail, = fog, = mist, T thunder

Sea State Symbols:
~ Rough, ~ High

All times are G.M.T. Add one hour to get summer time.

GENERAL INFERENCE.

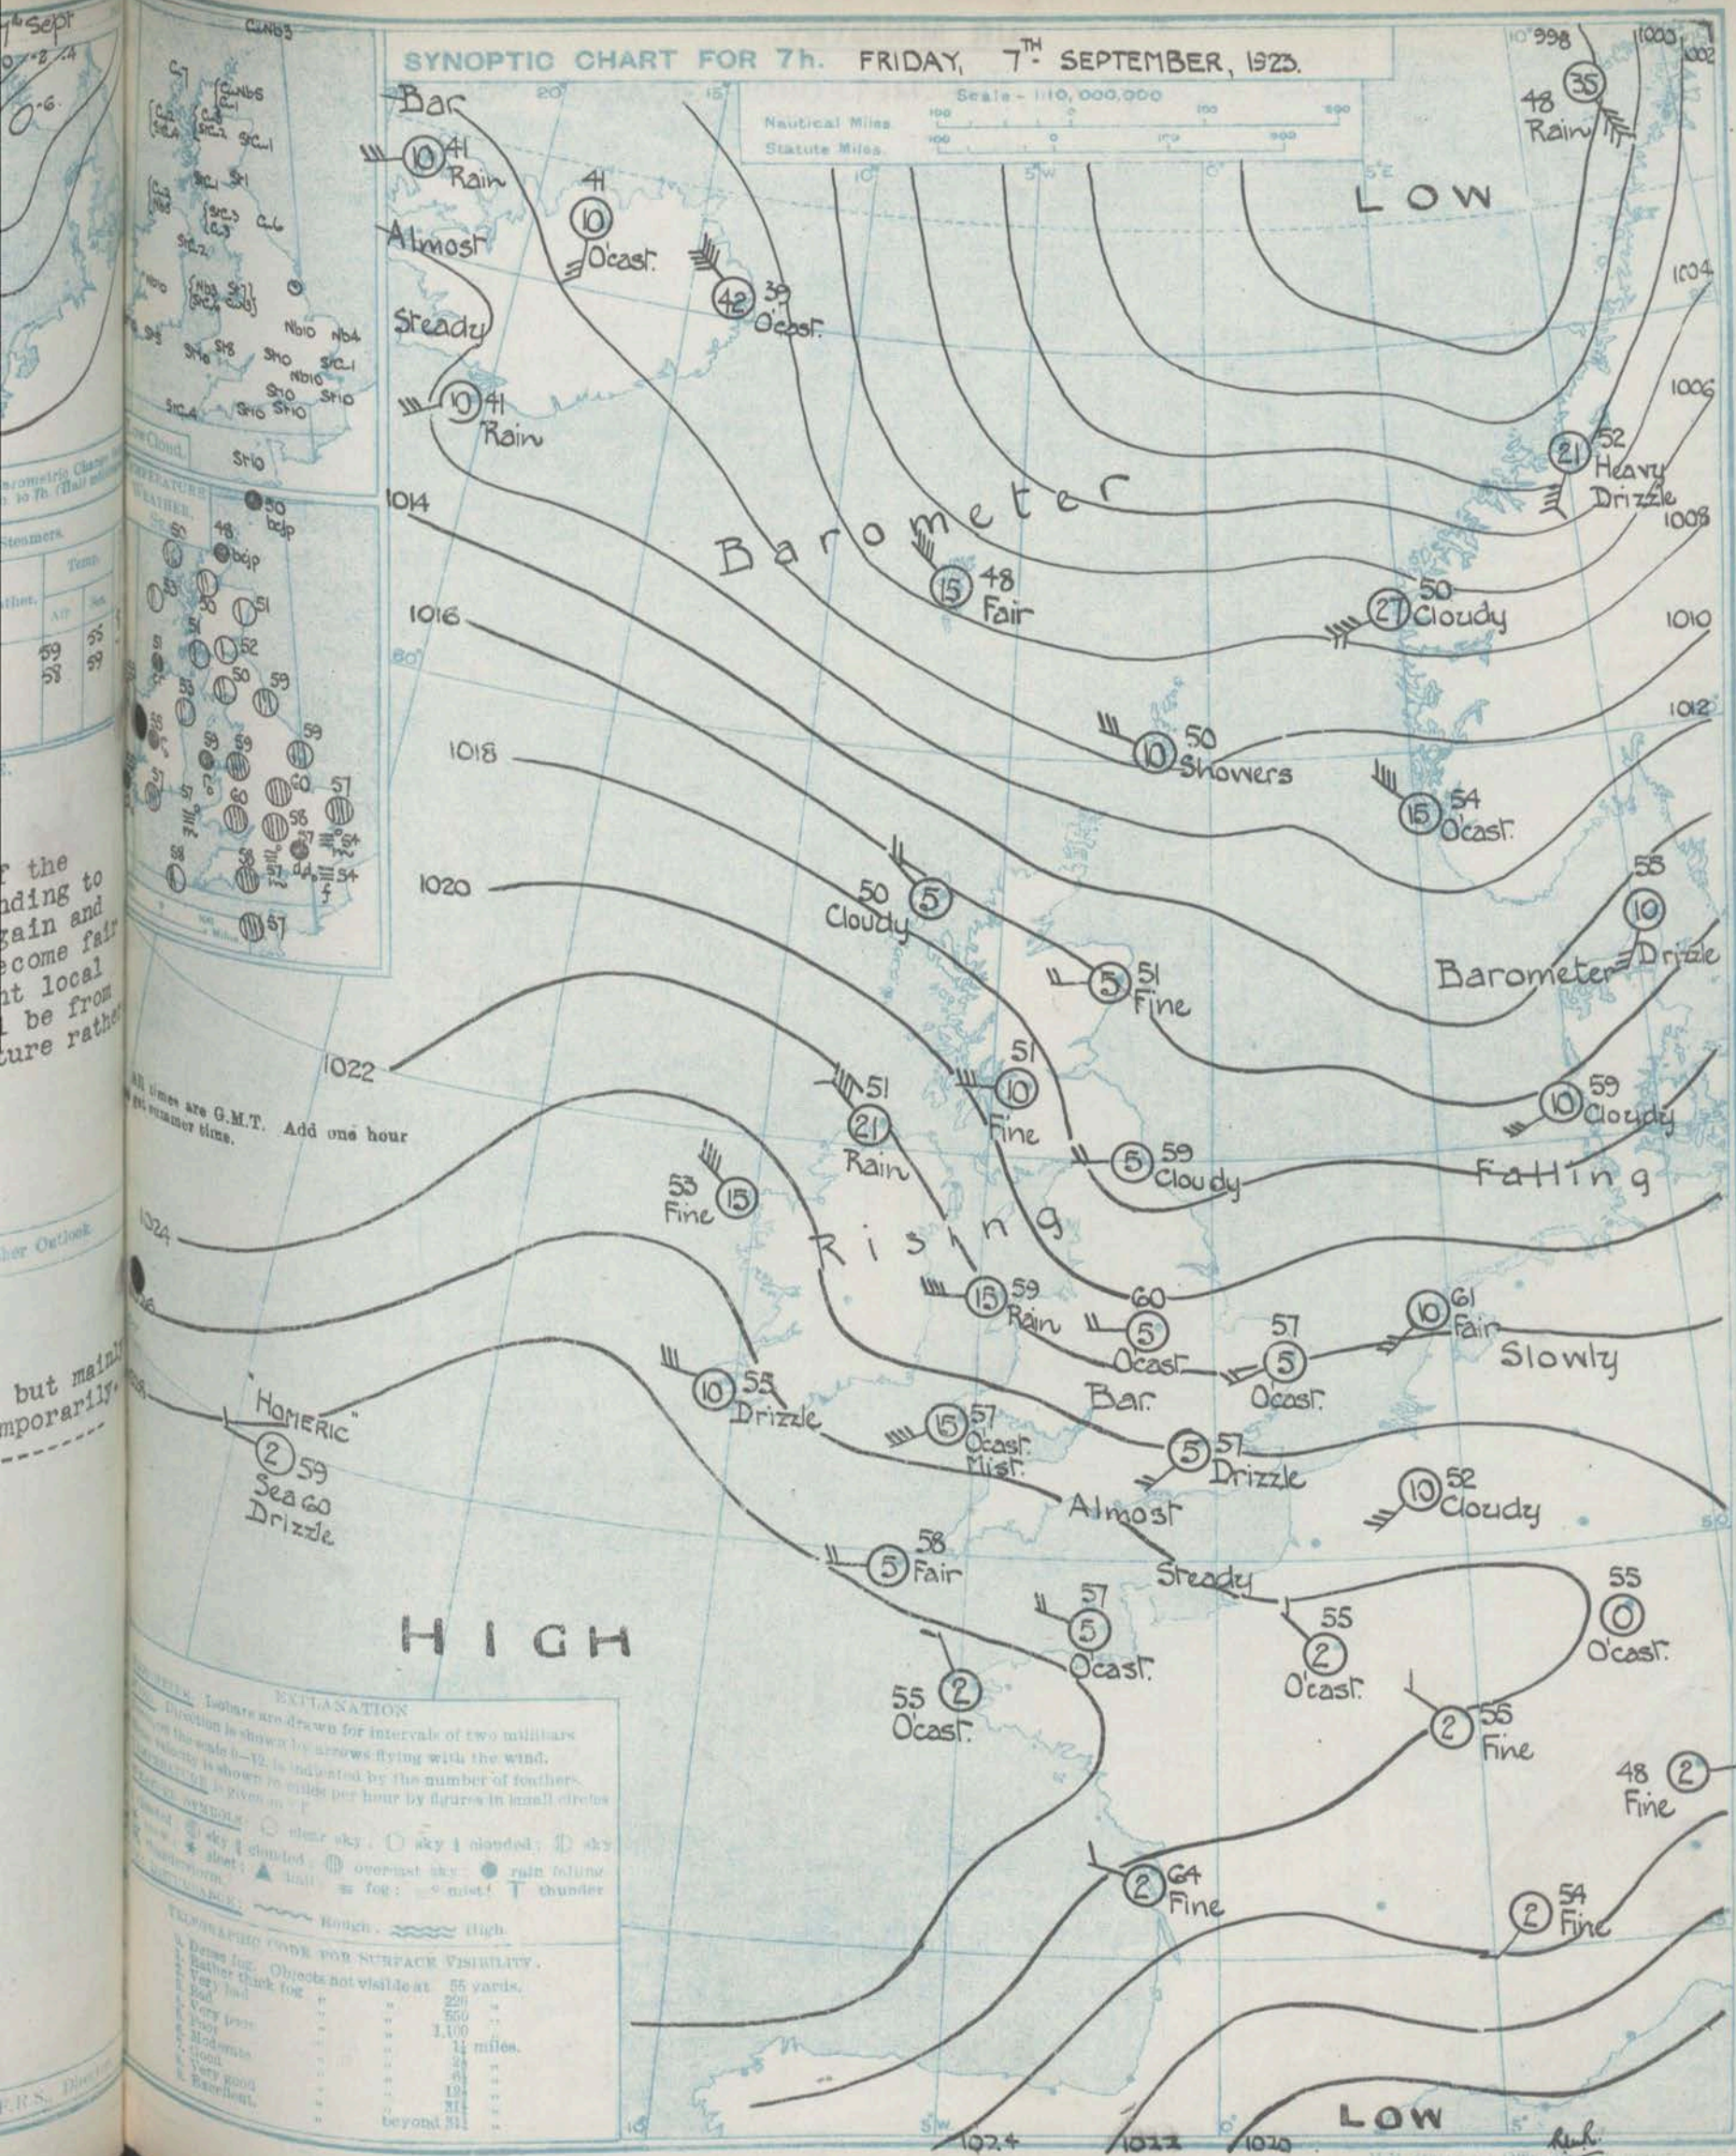

The anticyclone off the Southwest Coasts is tending to spread over our area again and weather is likely to become fair temporarily after slight local rain today. Winds will be from N.W. to W. and temperature rather low.

Forecast for the 24 hours commencing 15h G.M.T. Friday, 7th September, 1923.

Districts.	Forecast for the 24 hours commencing 15h G.M.T. Friday, 7th September, 1923.
1. S.E. England	Wind W. or W.N.W. moderate; cloudy with slight rain at first then fair; some morning mist; rather cool.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	
7. North Wales	Wind N.W. to W. moderate or fresh; mainly fair but local showers; visibility good after morning mist; cool.
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	Wind N.W. to W. moderate or fresh; fair at first some rain later; visibility mainly good; cool.
14. N.E. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	As for 7 - 13.
20. S.W. Ireland	

Further Outlook

Cool but mainly fair temporarily.

AIR MINISTRY.

LONDON OBSERVATIONS.																													
TABLE SHOWING THE GREENWICH TIMES OF SUNRISE, NOON, AND SUNSET FOR STATIONS IN THE UNITED KINGDOM.																													
8th & 9th Sept. 1938.																													
STATIONS. Sunrise. Noon. Sunset.																													
G.M.T. G.M.T. G.M.T.																													
Yarmouth 5.16 11.51 6.26																													
Greenwich 5.17 11.50 6.28																													
Wick 5.28 12.10 6.51																													
Valencia 6.3 12.38 7.13																													
6.6 12.39 7.10																													
b blue sky (not more than a quarter covered).																													
bc sky partly cloudy (one half covered).																													
c generally cloudy (three-quarters covered).																													
d drizzle. h hail. Hq line squall.																													
l lightning. o overcast sky.																													
m mist. visibility 1000-10000 m.																													
f fog. less than 200 m.																													
p thick fog. less than 200 m.																													
ip precipitation within sight of vision.																													
p passing showers. r rain.																													
s snow. ss sleet. t thunder.																													
v unusual visibility. y dry air.																													
z dust haze: the turbid atmosphere of dry weather.																													
With present weather is combined, whenever possible, the general character of the weather.																													
A "solids" divides actual existing weather from preceding conditions, thus:—bc = fair weather after rain; i = intermittent; "decreasing"; + = "increasing"; h(r) = "hail" or "rain and hail".																													
Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus:—																													
R = heavy rain.																													
rr = continuous moderate rain.																													
rrc = continuous light rain.																													
The BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.																													
SEA DISTURBANCE.																													
0=no swell. 1=mod. swell. 2=heavy swell. 3=no swell. 4=mod. swell. 5=heavy swell. 6=rather rough sea. 7=rough sea. 8=very rough sea. 9=mountainous sea.																													
Calm or slight sea. Moderate sea.

3	8 th 0100	Dieppe	NE	5	bc 60

GENERAL INFERENCE.

A depression near Iceland is moving eastwards and will cause S.W. to W. winds to spread to districts for a time, fresh to strong in the North, moderate in the South. Some rain is probable in the North but in the South the weather will be fair at first with some rain or drizzle later.

Districts.	Forecasts for the 24 hours commencing 15h. G.M.T. Saturday, 8th September, 1923.	Further Outlook.
1. S.E. England	Wind S.W. to W., light to moderate; fair at times, some rain or drizzle later; visibility moderate; moderate temperature.	Unsettled in the North mainly fair in the South.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Wind S.W. to W., light to moderate; fine at first, some rain or drizzle later; some coastal fog; moderate temperature.	
6. South Wales	As 1 - 4.	
7. North Wales		
8. N.W. England	Wind S.W. to W., freshening; cloudy, some rain later; visibility moderate; moderate temperature.	
9. N. Midlands		
10. N.E. England		
11. E. Scotland	Wind S.W. to W., fresh to strong; cloudy, some rain; visibility moderate; cool.	
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland		
15. Hebrides	Wind S.W. to W., veering to N.W. later; fresh to strong; cloudy, some rain; visibility moderate; cool.	
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland	Wind S.W. to W., light to moderate, freshening; cloudy, some rain or drizzle later; visibility moderate; moderate temperature.	
20. S.W. Ireland		

Barometric Change
to 76. (Half inches)

settled in the

CODE FOR STATE OF GROUND.
 0=Dry ground.
 1=Wet ground.
 2=Soft (muddy) wet ground.
 3=Bare ground frozen (but less than 2 ins. deep).
 4=Bare ground frozen (but more than 2 ins. deep).
 5=Deep (or wet) grass but not wet ground.
 6=Grass (or hay) in flower in 1900 and 1901 reports (1900 and 1901 reports).
 7=Snow (thin layer, often not continuous).
 8=Snow (deep, impeding traffic, usually a continuous layer).
 9=Glassed roads (ice on roads from frozen rain or melted snow).

BEAUFORT NOTATION OF WEATHER.

b blue sky (not more than a quarter covered).
 bc sky partly cloudy (one half covered).
 c generally cloudy (three-quarters covered).
 d drizzle, h hail, KQ line squall.
 i lightning.
 m mist, visibility 1000-10000 m.
 f fog, less than 200 m.
 p precipitation within sight of station.
 r rain.
 s snow, vs sleet, t thunder.
 v unusual velocity, dry air.
 z dust haze: the turbid atmosphere of dry weather.

With present weather is combined, whenever possible, the general character of the weather.
 A "solidus" divides actual existing weather from preceding conditions, thus: -bc/r=fair weather after rain; i=intermittent; -="decreasing"; += "increasing"; htr="hail" or "rain and hail".

Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus: -
 R = heavy rain.
 rr = continuous moderate rain.
 rrr = continuous light rain.

The BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.

BEAUFORT SCALE OF WIND.
 0=no swell } Calm or slight
 1=mod. swell }
 2=heavy swell }
 3=no swell } Moderate
 4=mod. swell }
 5=heavy swell }
 6=rather rough sea.
 7=rough sea.
 8=very rough sea.
 9=mountainous sea.

GENERAL INFERENCE.

A depression to the north of Scotland is growing deeper while a trough of low pressure to the west of Ireland is spreading eastwards. Winds will be strong to a gale in the North with some rain. Some light rain or showers are probable in the South, improving again later.

Districts.

Forecasts for the 24 hours commencing 15h. G.M.T.

Sunday, 9th September, 1923.

Farther Outlook.

None is issued.

South cone hoisted 0845 GMT. 9-9-1923.

1. S.E. England	Wind S.W., light or moderate, mainly fair, risk of local showers later; visibility moderate; moderate temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	Wind S.W., light or moderate, mainly fair, local showers; visibility moderate to good; moderate temperature.
5. S.W. England	
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	Wind S.W. to W., fresh or strong; variable cloud, some showers; visibility moderate to good; moderate temperature.
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	
14. N.E. & N.W. Scotland	Wind S.W. to W., strong to a gale; much low cloud, some rain; visibility moderate to good; becoming cooler.
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	As 7 to 13.
18. N.E. Ireland	
19. S.E. Ireland	Wind S. to S.W., veering to N.W., light or moderate; some showers at first, improving; visibility moderate to good; moderate temperature.
20. S.W. Ireland

TABLE SHOWING THE GREENWICH TIMES OF SUNRISE, NOON, AND SUNSET FOR STATIONS IN THE UNITED KINGDOM.																													
STATIONS.		Sunrise.		Noon.		Sunset.																							
Yarmouth		5.19		11.50		6.21																							
Greenwich		5.28		11.57		6.26																							
Wick		5.32		12.9		6.46																							
Valencia		6.10		12.38		7.6																							
BEAUFORT NOTATION OF WEATHER.																													
b blue sky (not more than a quarter covered). bc sky partly cloudy (one half covered). c generally cloudy (three-quarters covered). d drizzle. h hail. KQ line squall. l lightning. o overcast sky. m mist, visibility 1000-10000 m. f fog. 200-1000 m. p thick fog. less than 200 m. p precipitation within sight of station. r passing showers. r rain. s snow. rs sleet. t thunder. u unusual visibility. y dry air. z dust haze: the turbid atmosphere of dry weather.																													
With present weather is combined, whenever possible, the general character of the weather. A "solidus" divides actual existing weather from preceding conditions, thus: bc/r = fair weather after rain; i = intermittent; - = "decreasing"; + = "increasing"; h(r) = "hail" or "rain and hail"; Capital letters indicate intense, suffix o indicates slight and repetition of letters continuity, thus: - R = heavy rain. rr = continuous moderate rain. fofo = continuous light rain.																													
THE BEAUFORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.																													
SEA DISTURBANCE. 0=no swell } Calm or slight 1=mod. swell } 2=heavy swell } 3=no swell } 4=mod. swell } Moderate 5=heavy swell } 6=rather rough sea } 7=rough sea } 8=very rough sea } 9=mountainous sea }

GENERAL INFERENCE.

A ridge of high pressure extends from north of the Azores across England to Central Europe. Depressions passing to the north of Scotland will cause occasional unsettled periods during the day or two in the extreme North but over most of England and Ireland fair, quiet weather is probable with morning mist.

Districts. Forecasts for the 24 hours commencing 15h G.M.T. Monday, 10th September, 1923.

1. S.E. England	Light winds, mainly from N. and N.W.; fair; morning mist; rather warm during the day.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Light winds, mainly from N. and N.W.; fair; morning mist; moderate temperature.
6. South Wales	
7. North Wales	Light winds from W. and N.W.; fair; morning mist; moderate temperature.
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. E. Scotland	Wind between W. and N.W., backing to S.W., light to moderate, freshening; mainly fair at first but some rain or drizzle later; visibility moderate or good; cool.
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland	

As 4 to 5.

Farther Outlook

Unsettled in the North, mainly fair in the South.

EXPLANATION

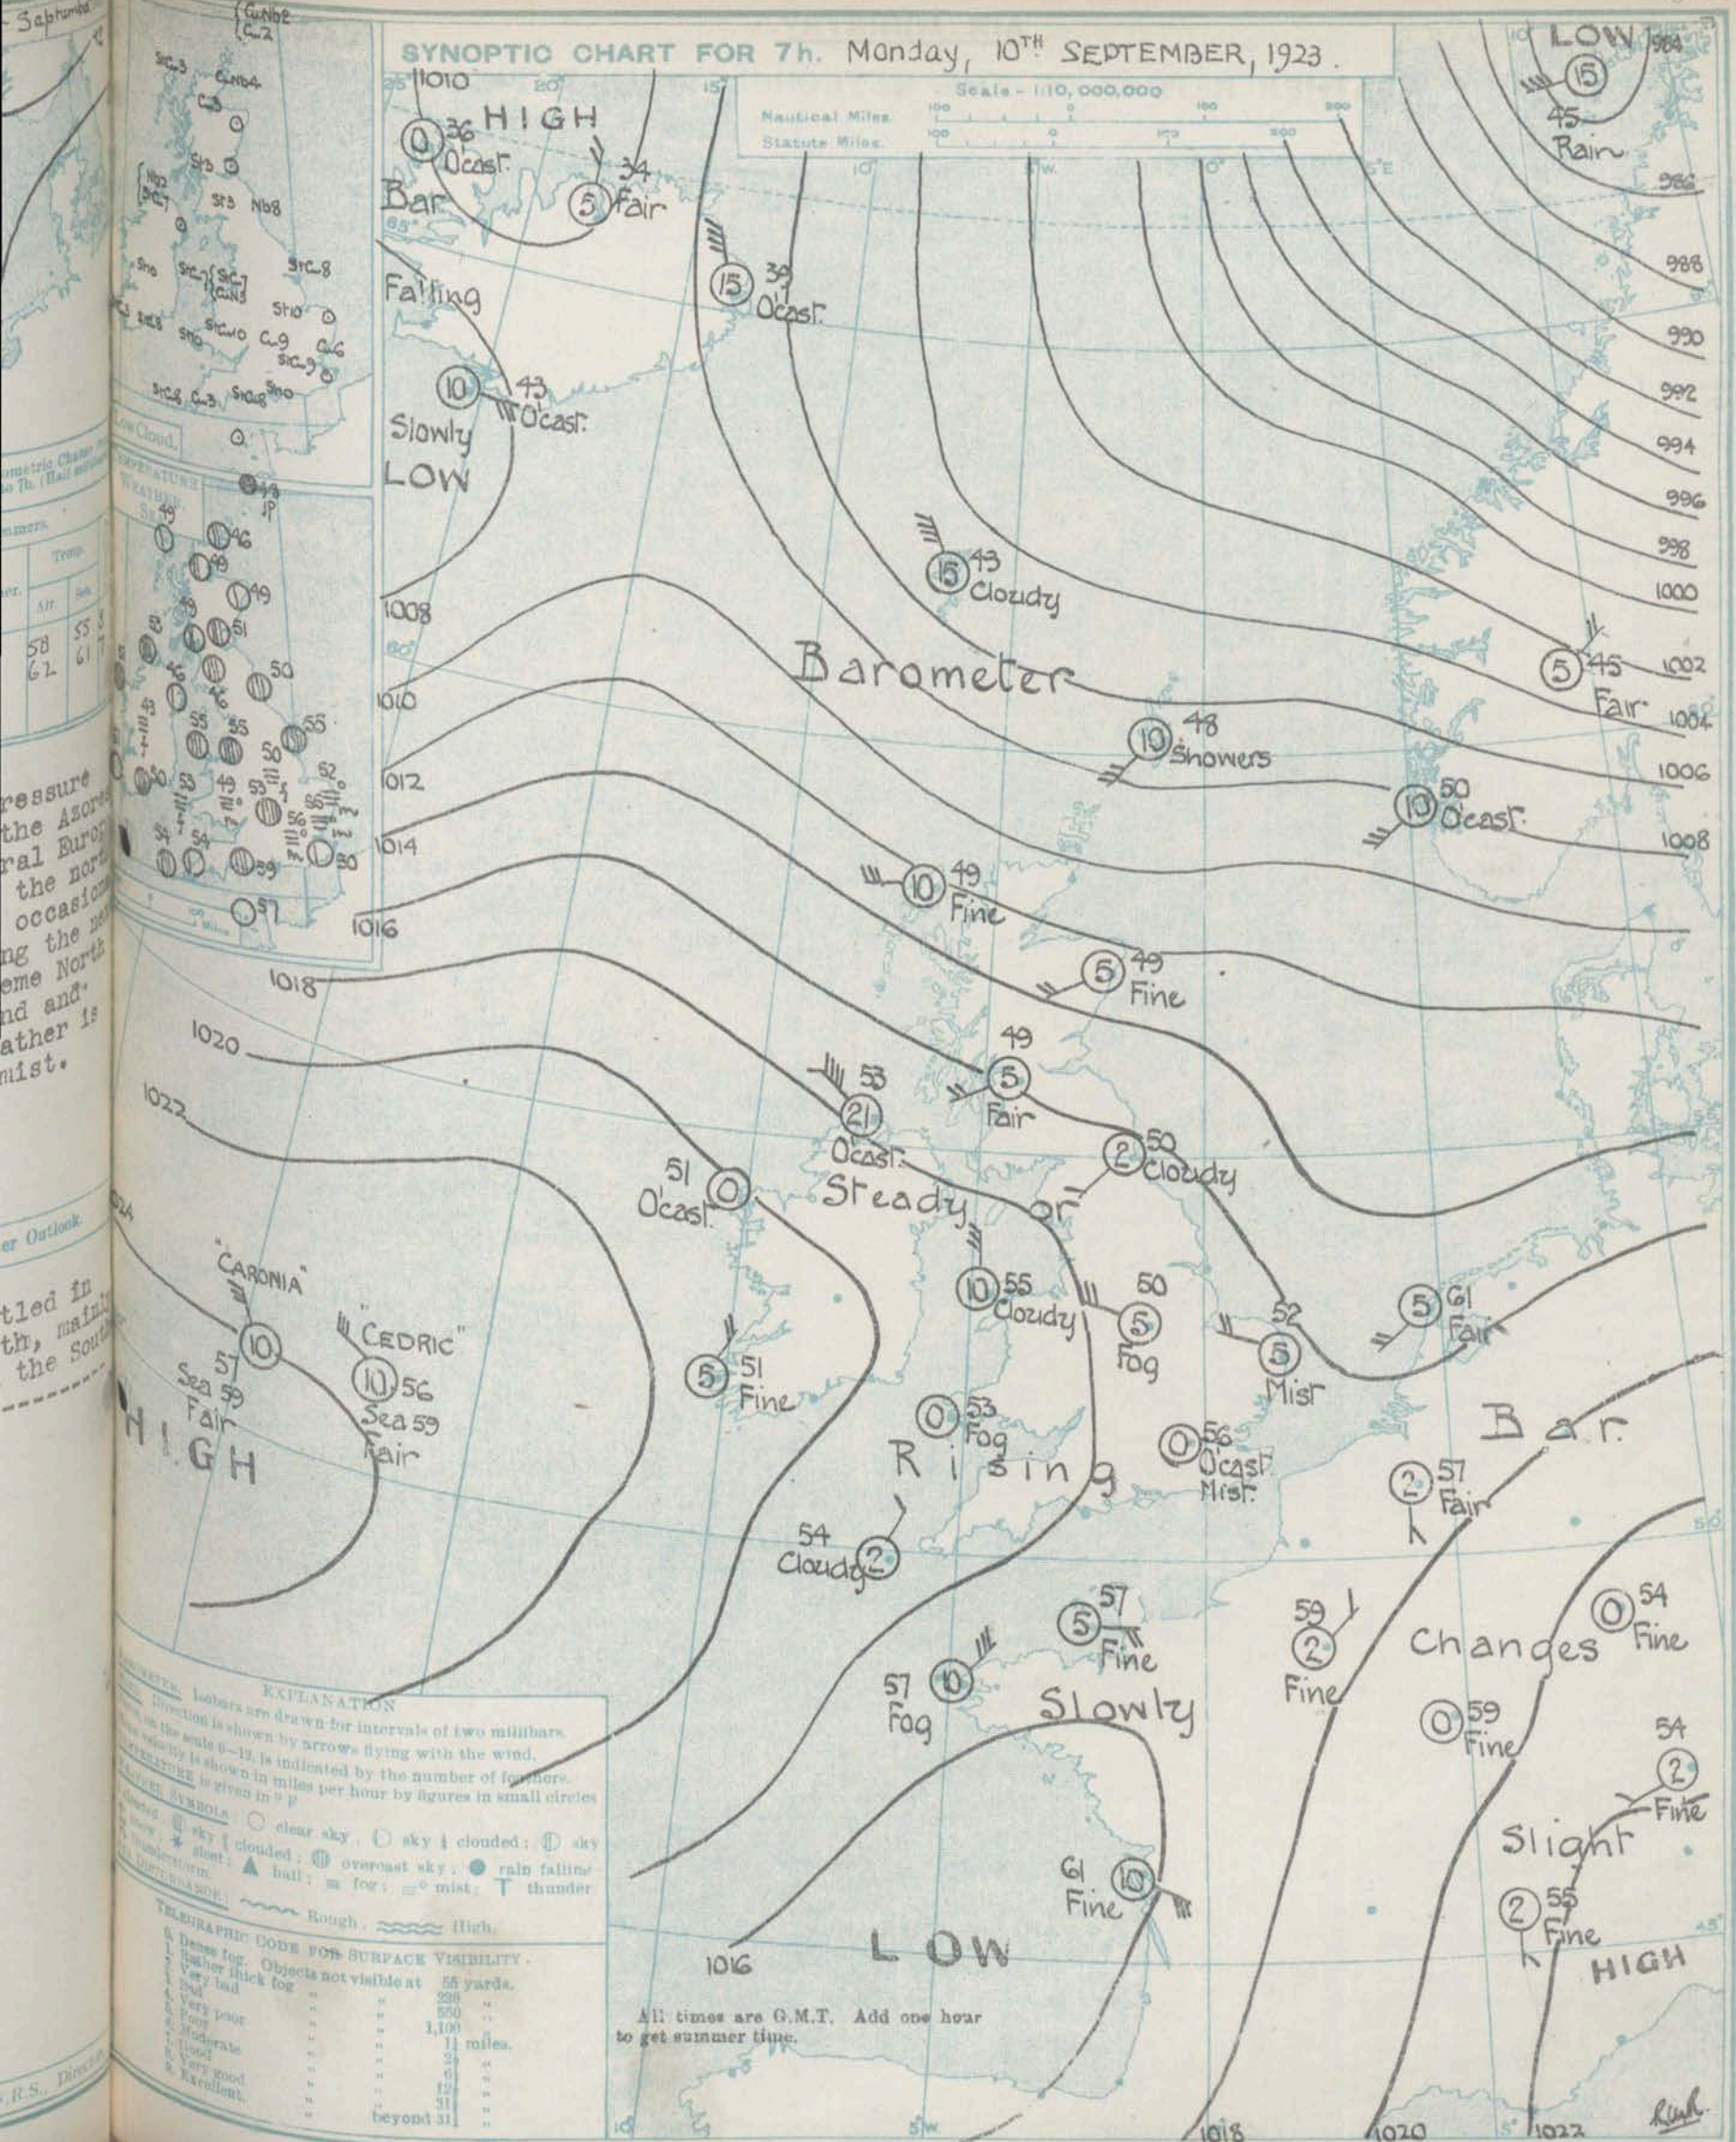

Isobars are drawn for intervals of two millibars.
Direction is shown by arrows flying with the wind.
The scale 0-12, is indicated by the number of feathers.
The velocity is shown in miles per hour by figures in small circles.
Temperature is given in °F.

WEATHER SYMBOLS

GENERAL INFERENCE.
A ridge of high pressure still extends from north of the Azores to Central Europe and is likely to maintain fair, quiet and rather warm weather in the south of England for at least 24 hours, but in Scotland the weather will be rainy for a time with strong S.W. to W. winds veering to N.W. later.

Further Outlook.

Unsettled in the North; fair in the South.

South Cone hoisted at 0230 G.M.T. today.

As 12 - 13.

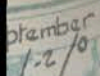

Wind W. veering to NW. light to moderate; rather cloudy, local drizzle; visibility moderate to good; moderate temperature.

Meteorological Office: Air Ministry, Kingsway, London, W.C.2. Forecasts issued at 0915 GMT.

Scale - 1:10,000,000

EXPLANATION

ISOBARS: Isobars are drawn for intervals of two millibars.

DIRECTION: Direction is shown by arrows flying with the wind.

SPEED: Speed on the scale 0-12, is indicated by the number of feathers.

WIND VELOCITY: is shown in miles per hour by figures in small circles.

TEMPERATURE: is given in °F.

CLOUD SYMBOLS:

○ clear sky ; ○ sky ¼ clouded ; ☉ sky ½ clouded ; ★ sky ¾ clouded ; ☼ overcast sky ; ● rain falling ; ☂ thunderstorm ; ▲ hail ; = fog ; = mist ; T thunder.

TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

METEOROLOGICAL CODE FOR SURFACE VISIBILITY		Rough.	High.

GENERAL INFERENCE.

The depression north of the Shetlands will pass away eastwards and is likely to be followed in the course of the next few days by another depression at present far out on the Atlantic. Occasional showers with strong N.W. winds are probable at first in the North followed by temporarily fair quiet weather while in the South generally fair weather will be maintained.

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Wednesday, 12th September, 1923.	Further Outlook.
1. S.E. England	Moderate or fresh W. wind, decreasing; fair; visibility moderate to good; moderate temperature.	Unsettled in the North; further outlook uncertain for the South.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales	Fresh or strong W. wind, moderating; occasional local showers, becoming fair; visibility moderate to good; moderate temperature.	South Cone hoisted at 0230 G.M.T. 11/9/23.
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England		
11. E. Scotland	Wind W. to N.W., strong to a gale at first, moderating later; occasional showers, becoming fair; visibility moderate to good; cool.	South Cone hoisted at 1600 G.M.T. 11/9/23.
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland		
15. Hebrides		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland

GENERAL INFERENCE.

The depression west of Ireland is likely to become deeper and move slowly northeast. Rain is probable at times in all districts but in SE. England the weather will be fair at first and rather warm for the time of year.

Further Outlook

Unsettled.

South Cone still flying.

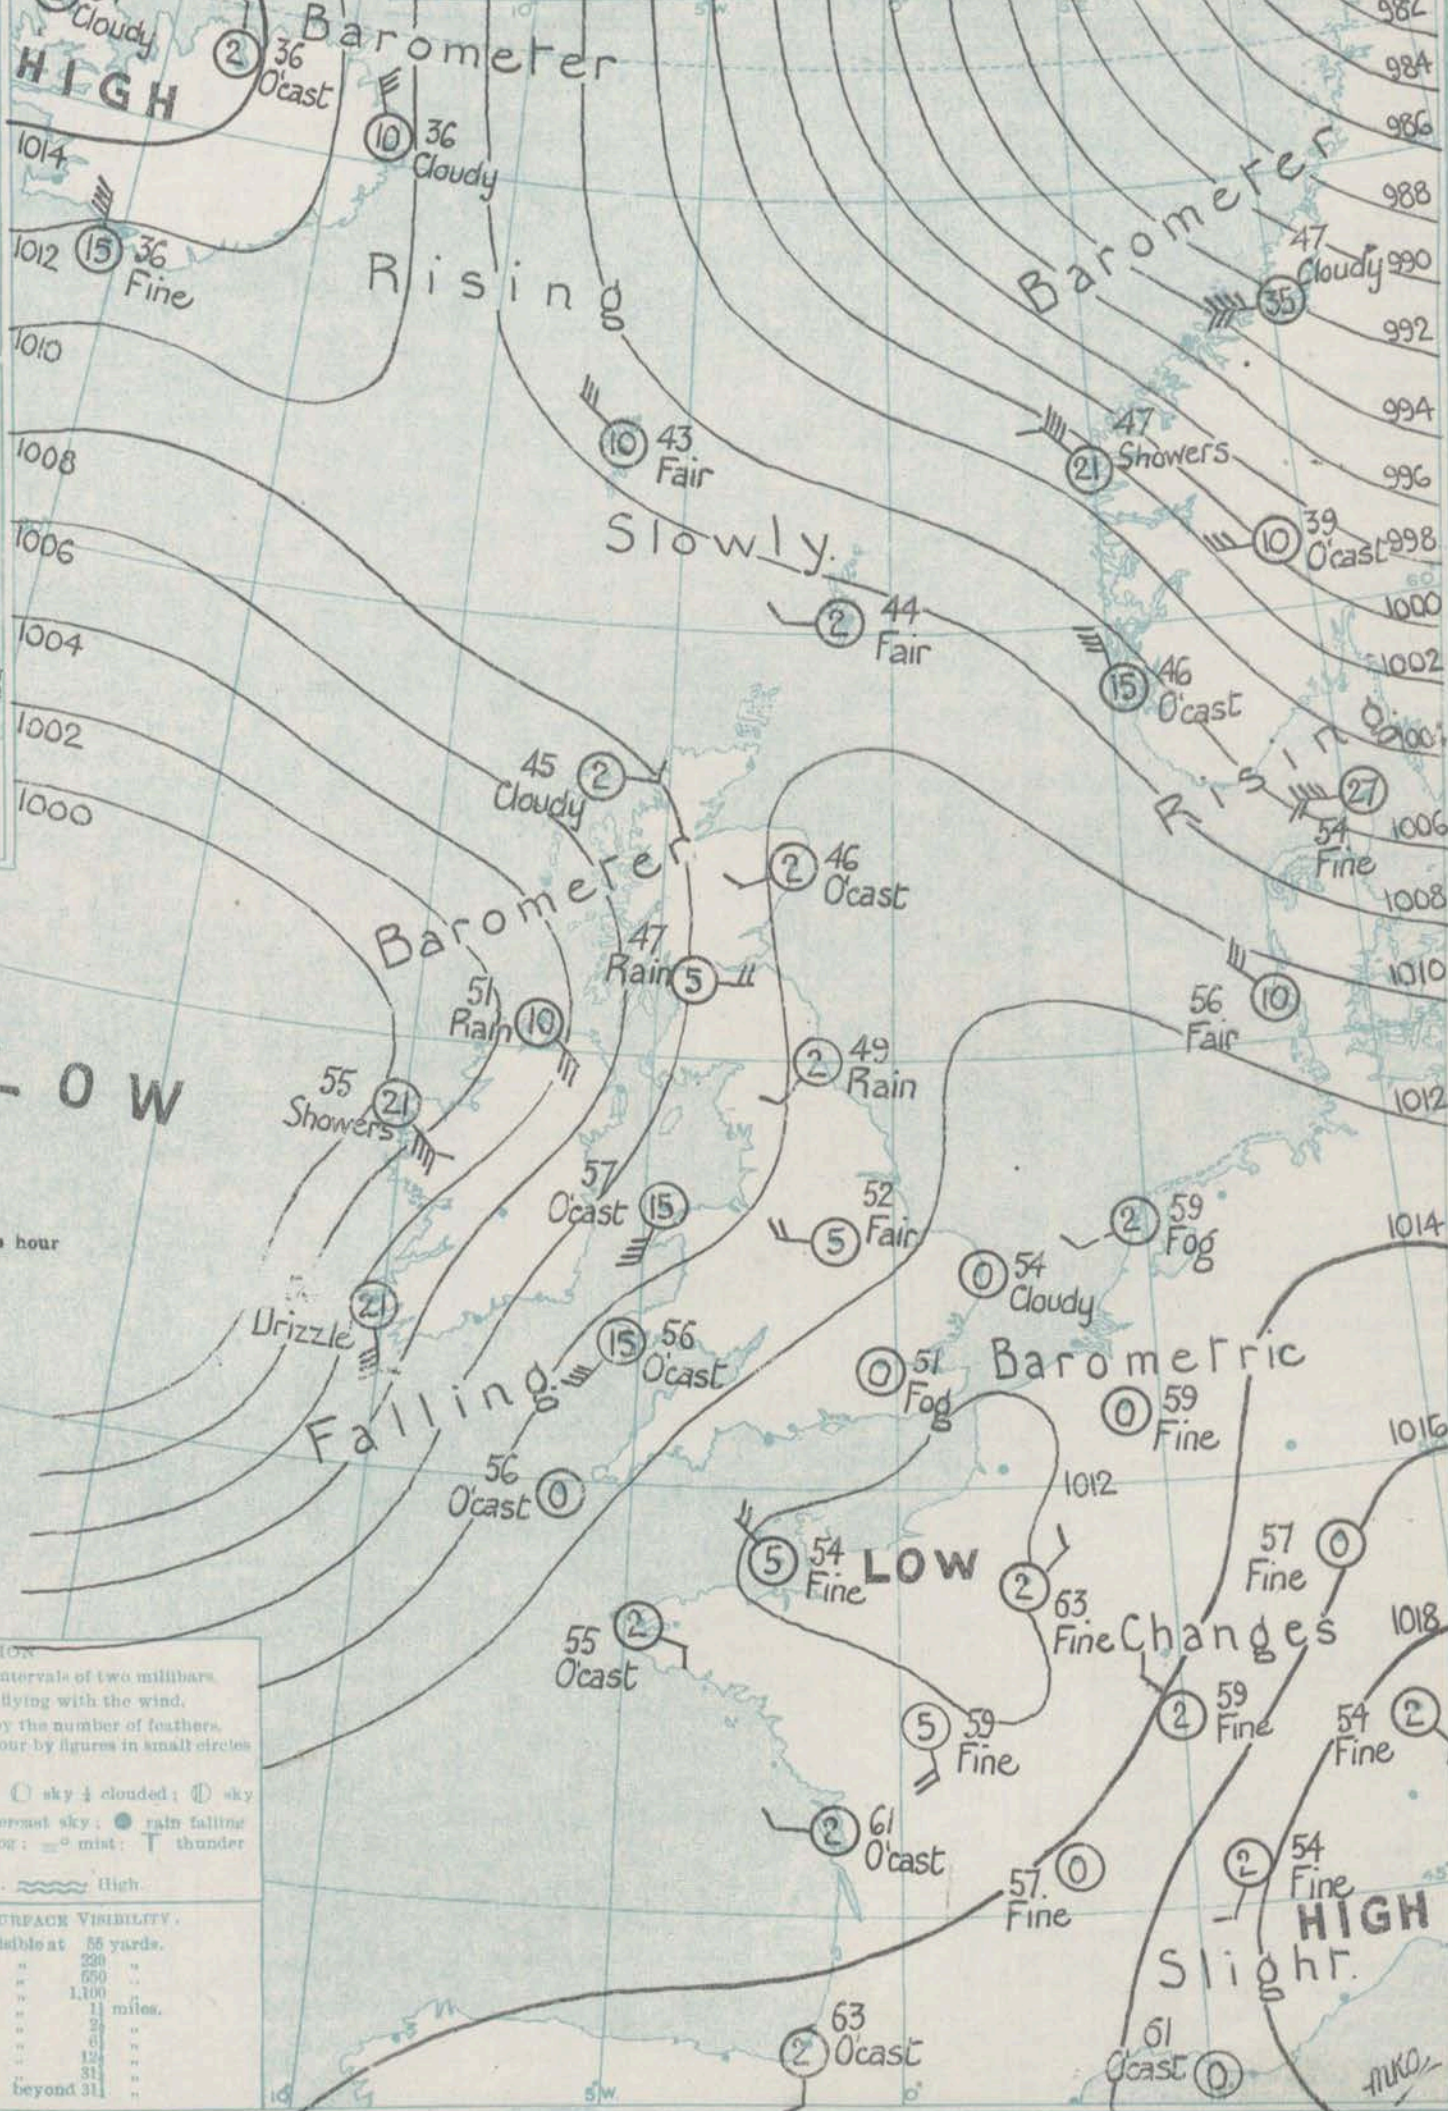

Districts. Forecasts for the 24 hours commencing 15h G.M.T. Thursday, 13th September, 1923.

1. S.E. England	Light to moderate southerly winds, veering to S.W. later; fair at first, less settled later; visibility moderate; rather warm today, cooler tomorrow.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Freshening southerly wind, veering to W. or NW. later; cloudy, rain at times; visibility moderate; moderate temperature.
6. South Wales	
7. North Wales	
8. N.W. England	
9. N. Midlands	Freshening southerly winds, veering to SW. later; cloudy, intermittent rain; visibility moderate; moderate temperature.
10. N.E. England	
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	As 4 - 8.
14. N.E. N.W. Scotland	Wind S. or SE., fresh to strong; dull, rain at times; visibility moderate; moderate temperature.
15. Hebrides	
16. Orkneys and Shetlands	As 14.
17. N.W. Ireland	Fresh to strong southerly wind, becoming W. to NW. later; rainy at first, showers and bright intervals later; visibility moderate, improving; moderate temperature.
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland

CODE FOR STATE OF SKY.
 0 = Dry ground.
 1 = Wet ground.
 2 = Soft (muddy) wet ground.
 3 = Bare ground frozen (but less than 2 in. deep).
 4 = Bare ground frozen (but more than 2 in. deep).
 5 = Dew (or wet grass but not wet ground).
 6 = Scaling to-day in 1923 and 1924 reports (Hour frost in 0100 and 0700 reports).
 7 = Snow (thin layer, often not continuous).
 8 = Snow (deep, impeding traffic, usually a continuous layer).
 9 = Glazed roads (ice on roads from rain or melted snow).

THE BRAUPORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.

Beaufort No.	Statute miles per hour.
0	Less than 1
1	1-3
2	4-7
3	8-11
4	12-15
5	16-19
6	20-23
7	24-28
8	29-33
9	34-40
10	41-47
11	48-55
12	56-75

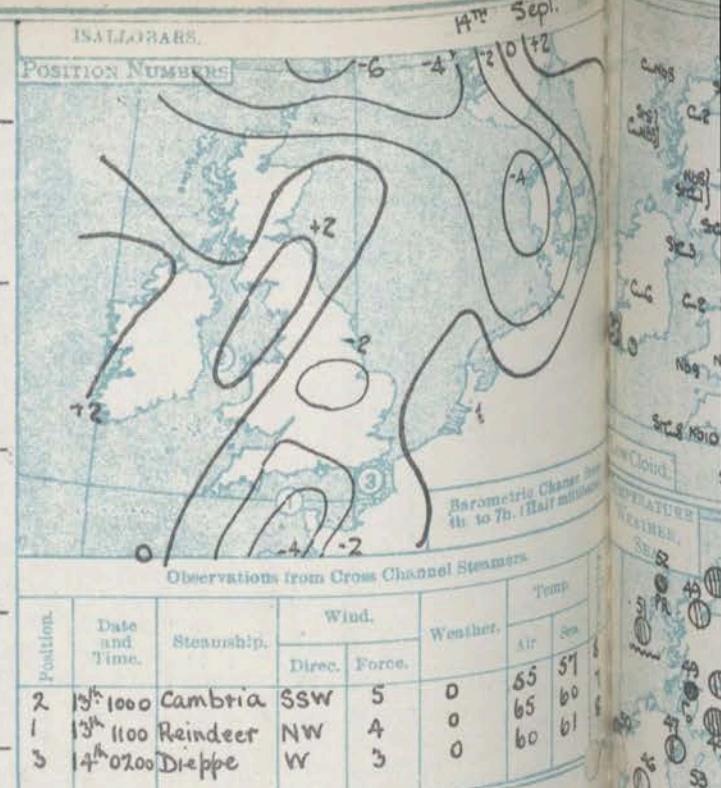

For explanation see Introduction.

Information for these columns not usually received.

The barometric change is expressed in half millibars.

For code see page 2.

GENERAL INFERENCE.

The main depression off the Hebrides is likely to move slowly northeast to Scandinavia while a secondary over Cornwall will pass across Southern England to the North Sea. Rain or drizzle may be expected today in most places but tomorrow the weather is likely to be fair apart from a few local showers.

Further Outlook.

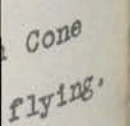

Unsettled.

South Cone
still flying.

Districts. Forecasts for the 24 hours commencing 15h. GMT. Friday 14th September, 1923.

1. S.E. England	Wind SW. veering to W. later, moderate; occasional rain or drizzle at first, then mainly fair; visibility moderate to good; moderate temperature.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	Wind W. to NW., moderate; mainly fair, a few local showers; visibility good; moderate temperature.
6. South Wales	
7. North Wales	Wind SW. to W. veering to NW., moderate or fresh; occasional rain, improving; visibility moderate to good; cool.
8. N.W. England	
9. N. Midlands	
10. N.E. England	Wind SW. veering to W. later, moderate; occasional rain or drizzle at first, then mainly fair; visibility moderate to good; cool.
11. E. Scotland	
12. S.W. Scotland	
13. Isle of Man	
14. N. & N.W. Scotland	
15. Hebrides	As 7 - 9.
16. Orkneys and Shetlands	
17. N.W. Ireland	
18. N.E. Ireland	Wind W. to NW., moderate; occasional showers, bright periods; visibility good; cool.
19. S.E. Ireland	
20. S.W. Ireland	

LOW

All times are G.M.T. Add one hour
for summer time.

EXPLANATION

Isobars are drawn for intervals of two millibars.
Direction is shown by arrows flying with the wind.
On the scale 0-12, as indicated by the number of feathers.
Velocity is shown in miles per hour by figures in small circles
PRECIPITATING is given N.O.P.

CLOUD SYMBOLS:

☐ clear sky; ☁ sky & clouded; ☉ sky
☔ cloudy; ☂ overcast sky; ● rain falling
▲ hail; = fog; ° mist; T thunder

ALPHABETIC CODE FOR SURFACE VISIBILITY		Rough	High
1. Dense fog.	Objects not visible at	55 yards.	
2. Rather thick fog	"	220 "	
3. Very bad	"	650 "	
4. Bad	"	1,100 "	
5. Very poor	"	11 miles.	
6. Poor	"	2 "	
7. Moderate	"	6 "	
8. Good	"	12 "	
9. Very good	"	31 "	
10. Excellent.	"	beyond 311 "

LONDON OBSERVATIONS.																												
TABLE SHOWING THE GREENWICH TIMES OF SUNRISE, NOON, AND SUNSET FOR STATIONS IN THE UNITED KINGDOM.																												
15th-16th Sept. 1922.																												
STATIONS. Sunrise. Noon. Sunset.																												
G.M.T. G.M.T. G.M.T.																												
Yarmouth 5.28 11.48 6.9																												
Greenwich 5.30 11.48 6.6																												
Wick 5.36 11.53 6.15																												
Valencia 5.38 11.53 6.12																												
5.43 12.7 6.32																												
5.45 12.7 6.29																												
6.16 12.36 6.57																												
6.19 12.36 6.54																												
BEAUFORT NOTATION OF WEATHER.																												
a blue sky (no more than a quarter covered with cloud).																												
bc sky partly cloudy (one half covered).																												
c generally cloudy (three-quarters covered).																												
d drizzle. e wet drizzle. g gloomy. f fog. visibility 200-1000 m. F thick fog. 1000-10000 m. m mist. h hail. i intermittent. j precipitation within sight of station. k line squall. l lightning. m overcast sky. p passing showers. r equally. r rain. s snow. se select. t thunder. u ugly, threatening sky. v unusual visibility. w dew. x hoar frost. y dry air. z dust haze; the turbid atmosphere of dry weather. h(r) "hall" or "rain and hail." Capital letters indicate intense; suffix o indicates slight; repetition of letters indicates continuity. R = heavy rain. r = light rain. rr = continuous rain. SYMBOLS. = (less than) (for cloud height). = solar halo. = lunar halo. With present weather is continued, whenever possible, the general character of the weather. A "solidus" divides actual existing weather from preceding conditions, thus: h-c/r = fair weather after rain. - = "decreasing"; + = "increasing".																												
The BRAUPORT SCALE OF WIND is used only for surface observations. In the accompanying table the speed of the wind corresponding with the different numbers, is the speed at about 30 feet above the ground.																												
SEA DISTURBANCE.																												
0=no swell. 1=mod. swell. 2=heavy swell. 3=no swell. 4=mod. swell. 5=heavy swell. 6=rather rough sea. 7=rough sea. 8=very rough sea. 9=mountainous sea.

GENERAL INFERENCE.

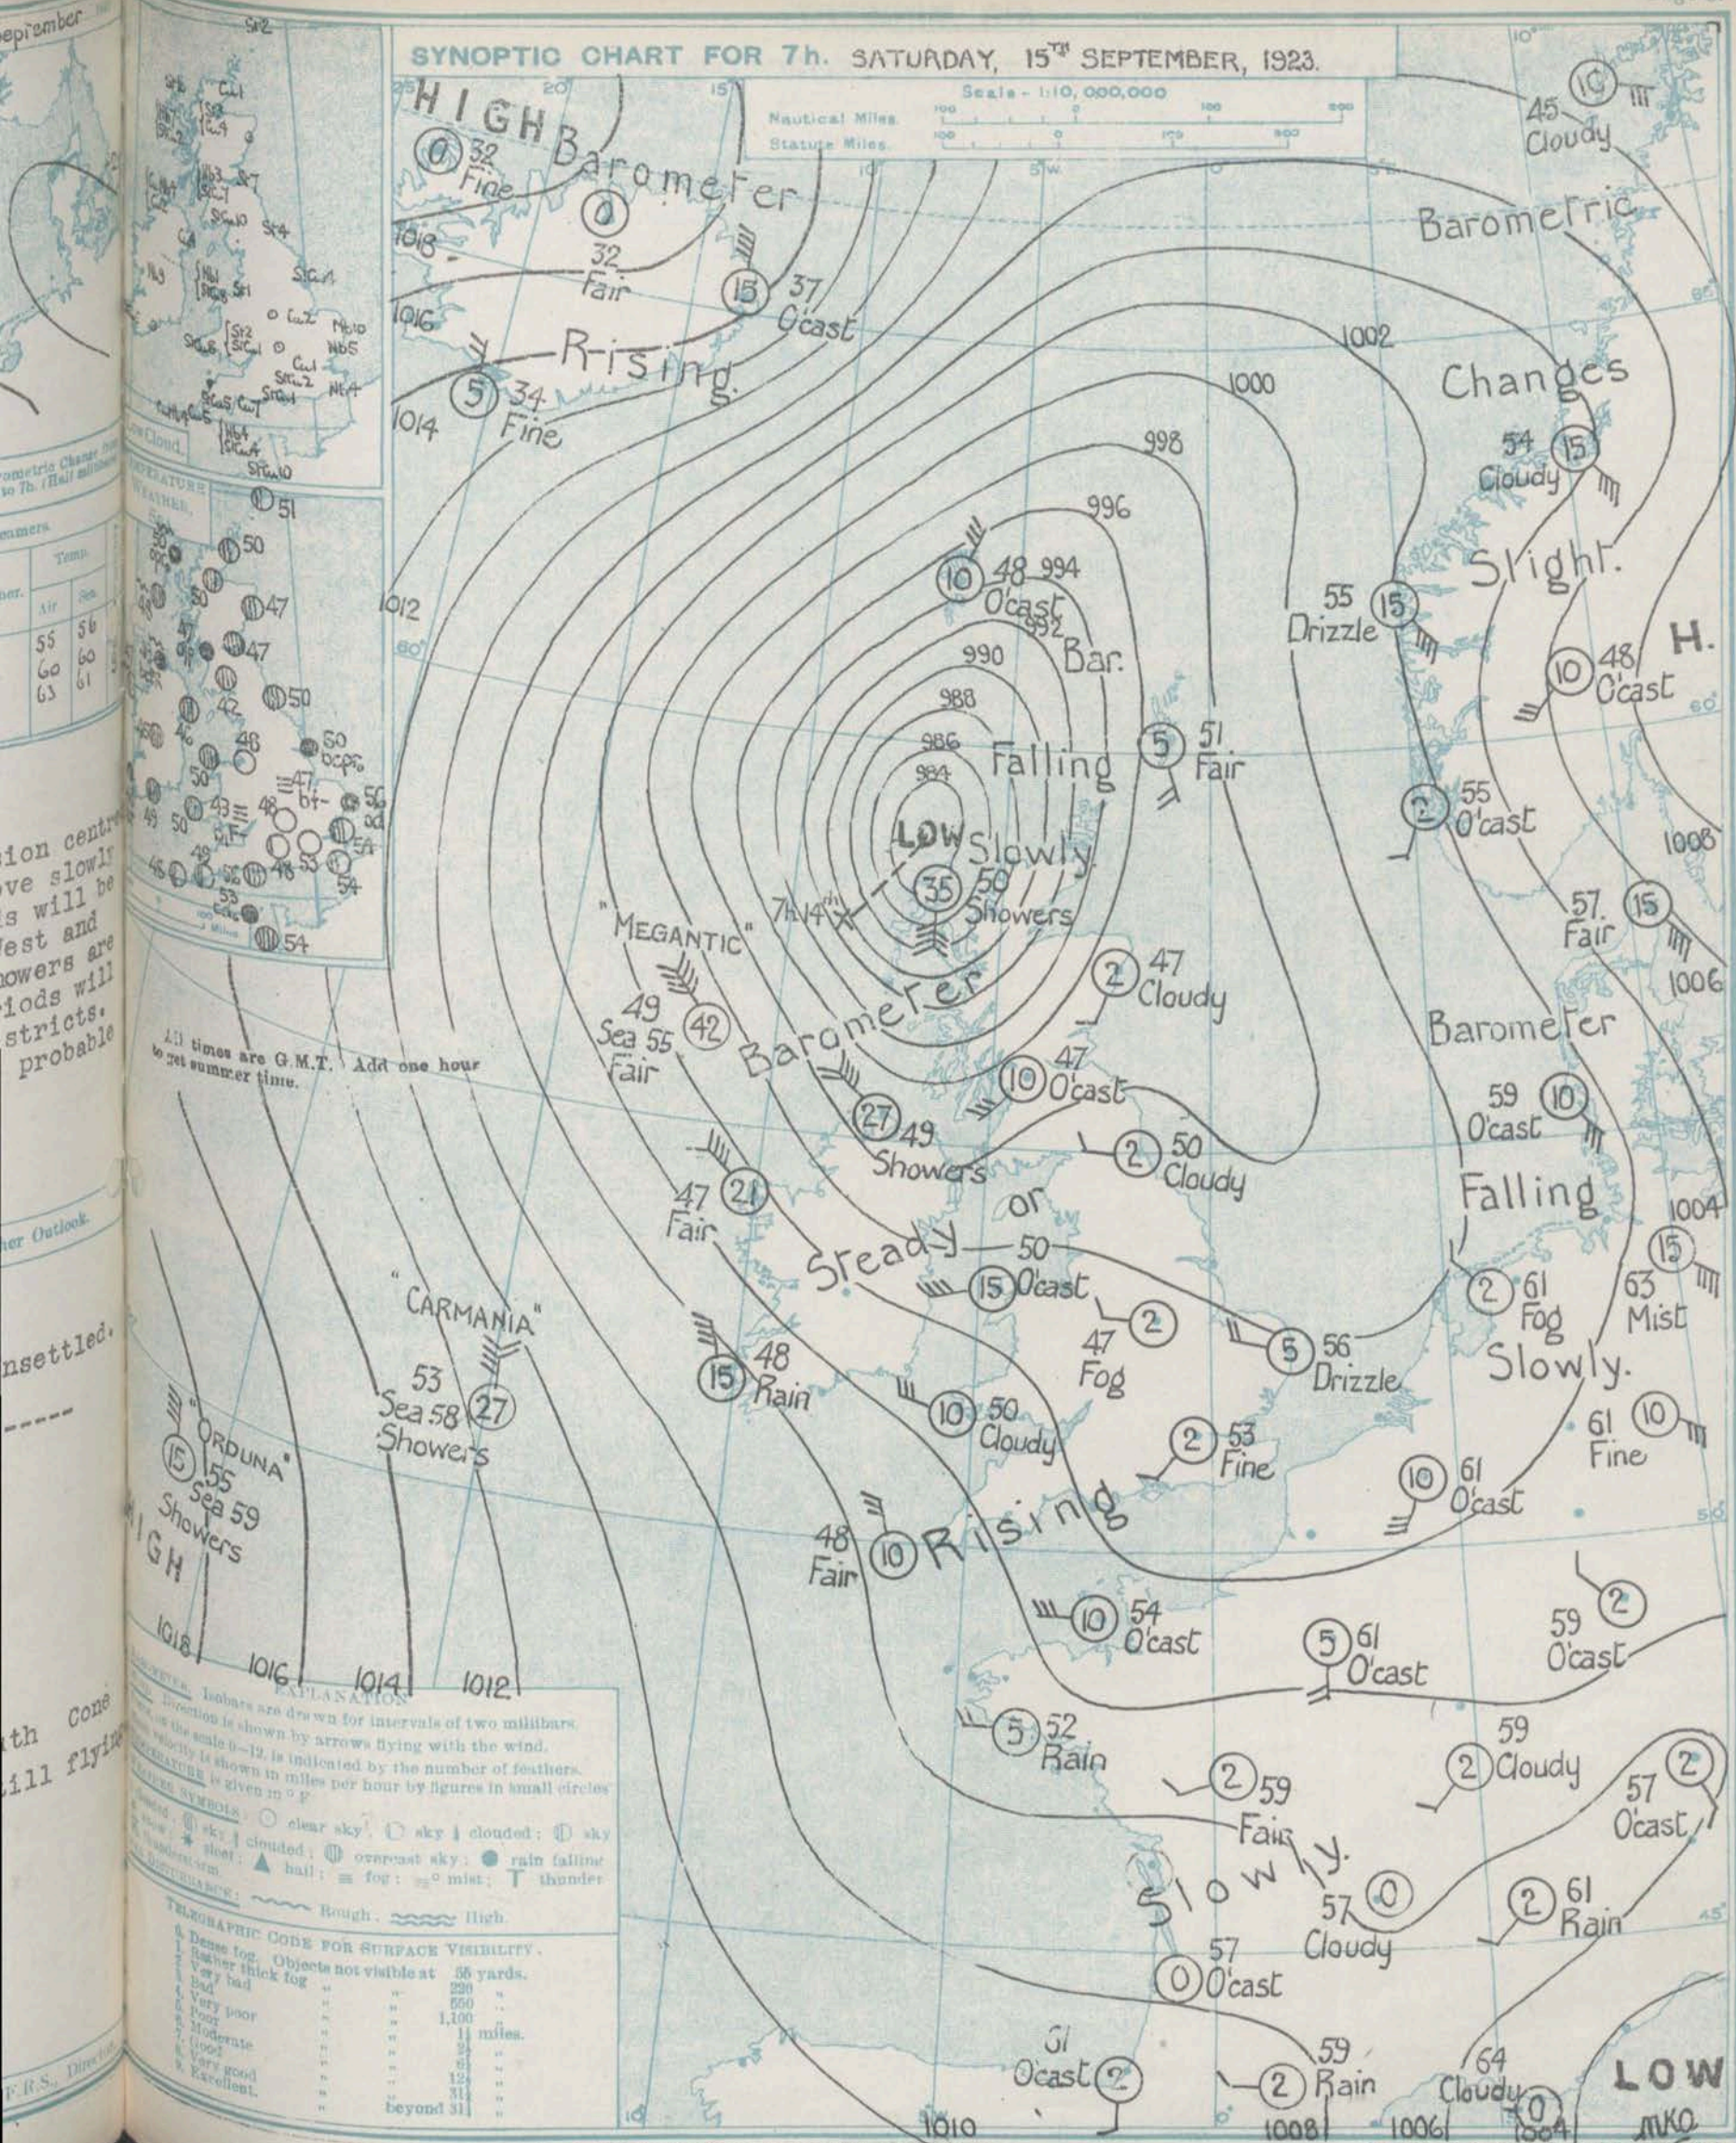

The deep depression centre near Stornoway will move slowly northeastward and winds will be from a point between West and North. Some local showers are probable but sunny periods will predominate in most districts. Slight ground frost is probable inland at night.

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Saturday, 15th September, 1923.	Further Outlook.
1. S.E. England	Wind W. to N.W. light or moderate; mainly fair but some local showers of thundery type; morning mist inland; cooler than of late, slight ground frost inland at night.	Unsettled.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England		
6. South Wales	Wind westerly light; cloudy, some thundery showers; visibility good apart from morning mist; cool.	South Cone still flying
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England		
11. E. Scotland	Wind S.W. moderate or fresh; cloudy some showers; visibility good; cool.	South Cone still flying
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland		
15. Hebrides		
16. Orkney and Shetlands	Wind southerly veering W. to N.W., strong to a gale; showery; visibility good; cool.	South Cone still flying
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		
Wind N.W. strong; showery; visibility good; rather cool.

3	16.03.00	Dunlop	WN	4	51

GENERAL INFERENCE.

The depression over the Orkneys is moving away slowly the North Sea and an interval with West to Northwest winds with bright but showery weather is probable. A new depression to the South of Iceland will cause winds to back to S.W. and a renewal of rainy conditions in the North probably tonight.

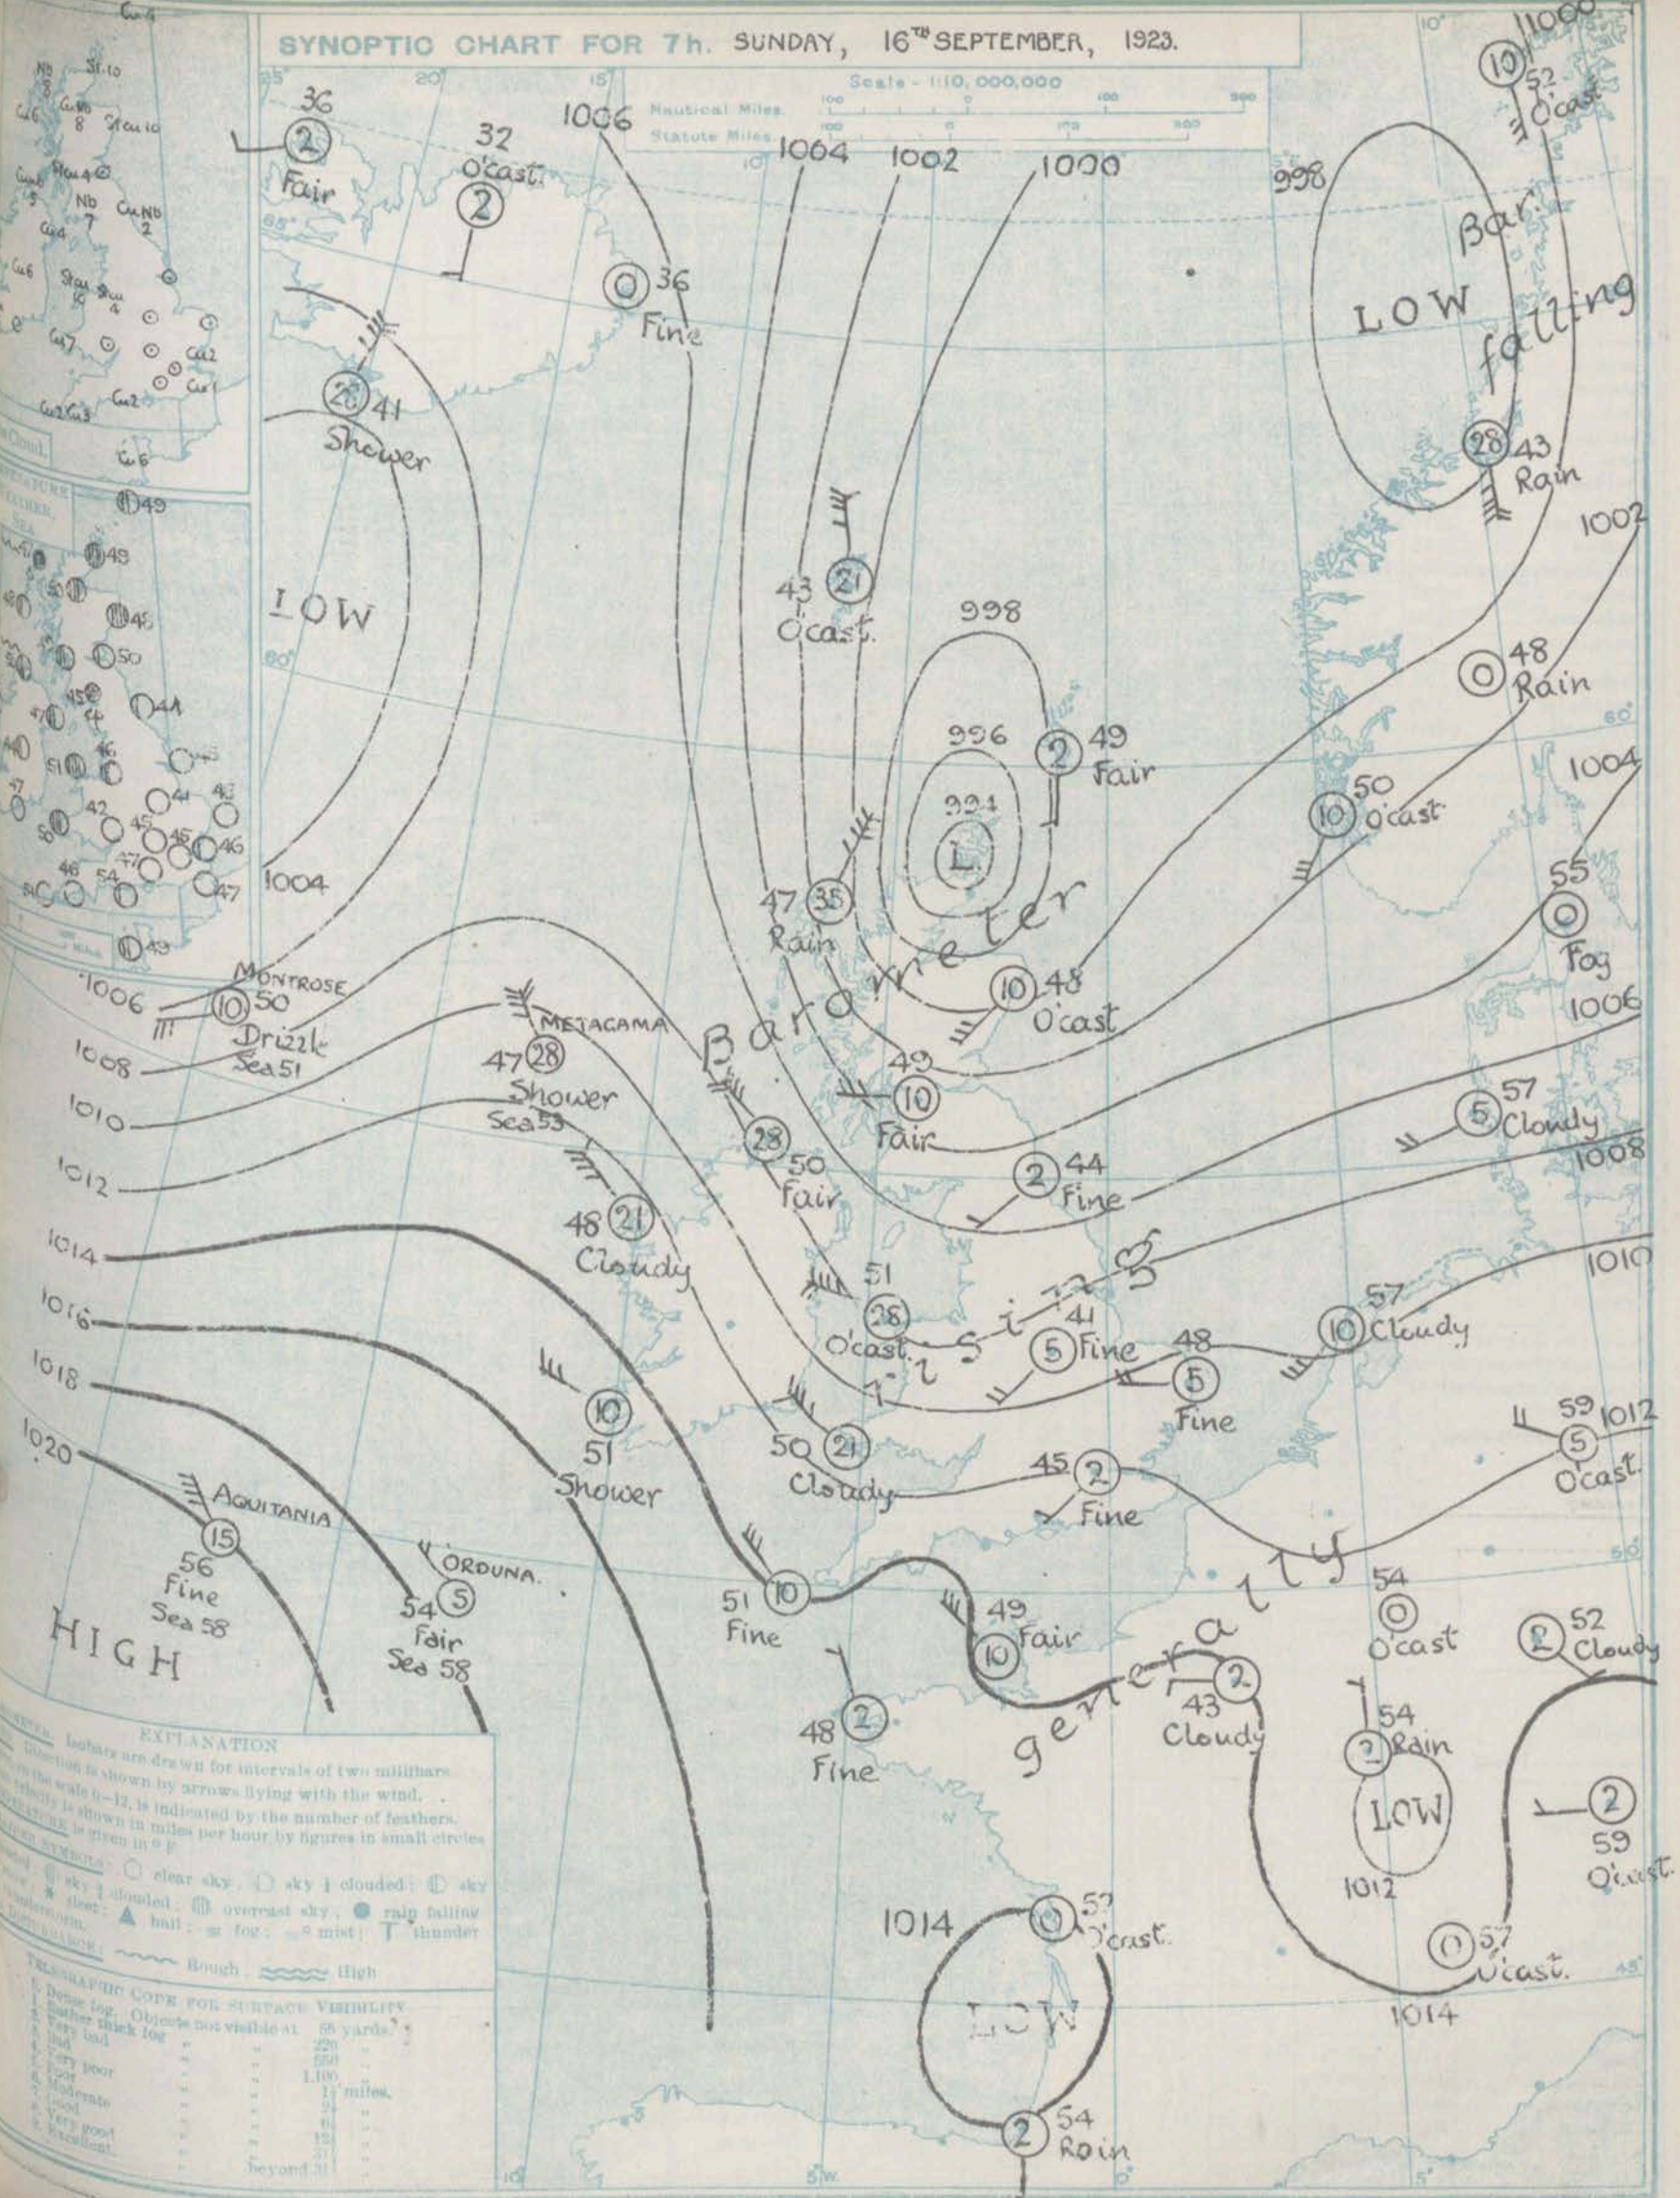

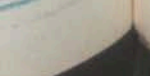

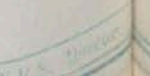

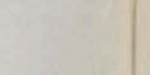

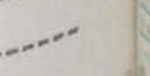

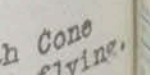

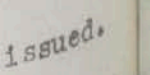

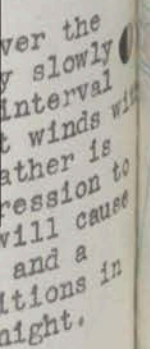

Further Outlook.

Districts.	Forecasts for the 24 hours commencing 15h G.M.T. Sunday, 16th September, 1923.
1. S.E. England	Light to moderate westerly winds. Mainly fair but risk of showers. Good visibility apart from slight morning mist. Moderate day temperature. Slight ground frost at night.
2. E. England	
3. E. Midlands	
4. W. Midlands	
5. S.W. England	
6. South Wales	Fresh N.W. wind decreasing temporarily then freshening from S.W. Bright and showery at first, cloudy with perhaps rain later. Good visibility. Cool.
7. North Wales	
8. N.W. England	
9. N. Midlands	
10. N.E. England	
11. E. Scotland	Fresh to strong N.W. wind backing to S.W. later. Bright and showery at first. Cloudy with rain later. Good visibility. Cool.
12. S.W. Scotland	
13. Isle of Man	
14. N.E.N.W. Scotland	
15. Hebrides	
16. Orkneys and Shetlands	Moderate westerly wind. Fair at first, cloudy later. Moderate temperature.
17. N.W. Ireland	
18. N.E. Ireland	
19. S.E. Ireland	
20. S.W. Ireland

GENERAL INFERENCE.

The deep depression off our Northwest coast will move eastward causing rain in all parts of the Kingdom during the next 24 hours, followed by an improvement spreading from the West. Gales from South veering to West are probable on the coast.

Further Outlook.

Unsettled.

South cone now flying all coasts.

Districts.

Forecasts for the 24 hours commencing 15h. G.M.T.

Monday, 17th September, 1923.

1. S.E. England Wind S. or S.W. veering W. to N.W. fresh or strong; some rain at first, showers and bright intervals later; visibility good; rather cool.
2. E. England
3. E. Midlands

4. W. Midlands

5. S.W. England

6. South Wales

7. North Wales

8. N.W. England

9. N. Midlands

10. N.E. England

11. E. Scotland

12. S.W. Scotland

13. Isle of Man

14. N. & N.W. Scotland

15. Hebrides

16. Orkneys and Shetlands

17. N.W. Ireland

18. N.E. Ireland

19. S.E. Ireland

20. S.W. Ireland

- Wind S. strong to a gale veering W. or N.W.; rainy at first, showers and bright intervals later; visibility moderate, improving later; rather cool.

SYNOPTIC CHART FOR 7h. MONDAY, 17TH SEPTEMBER, 1923.

EXPLANATION

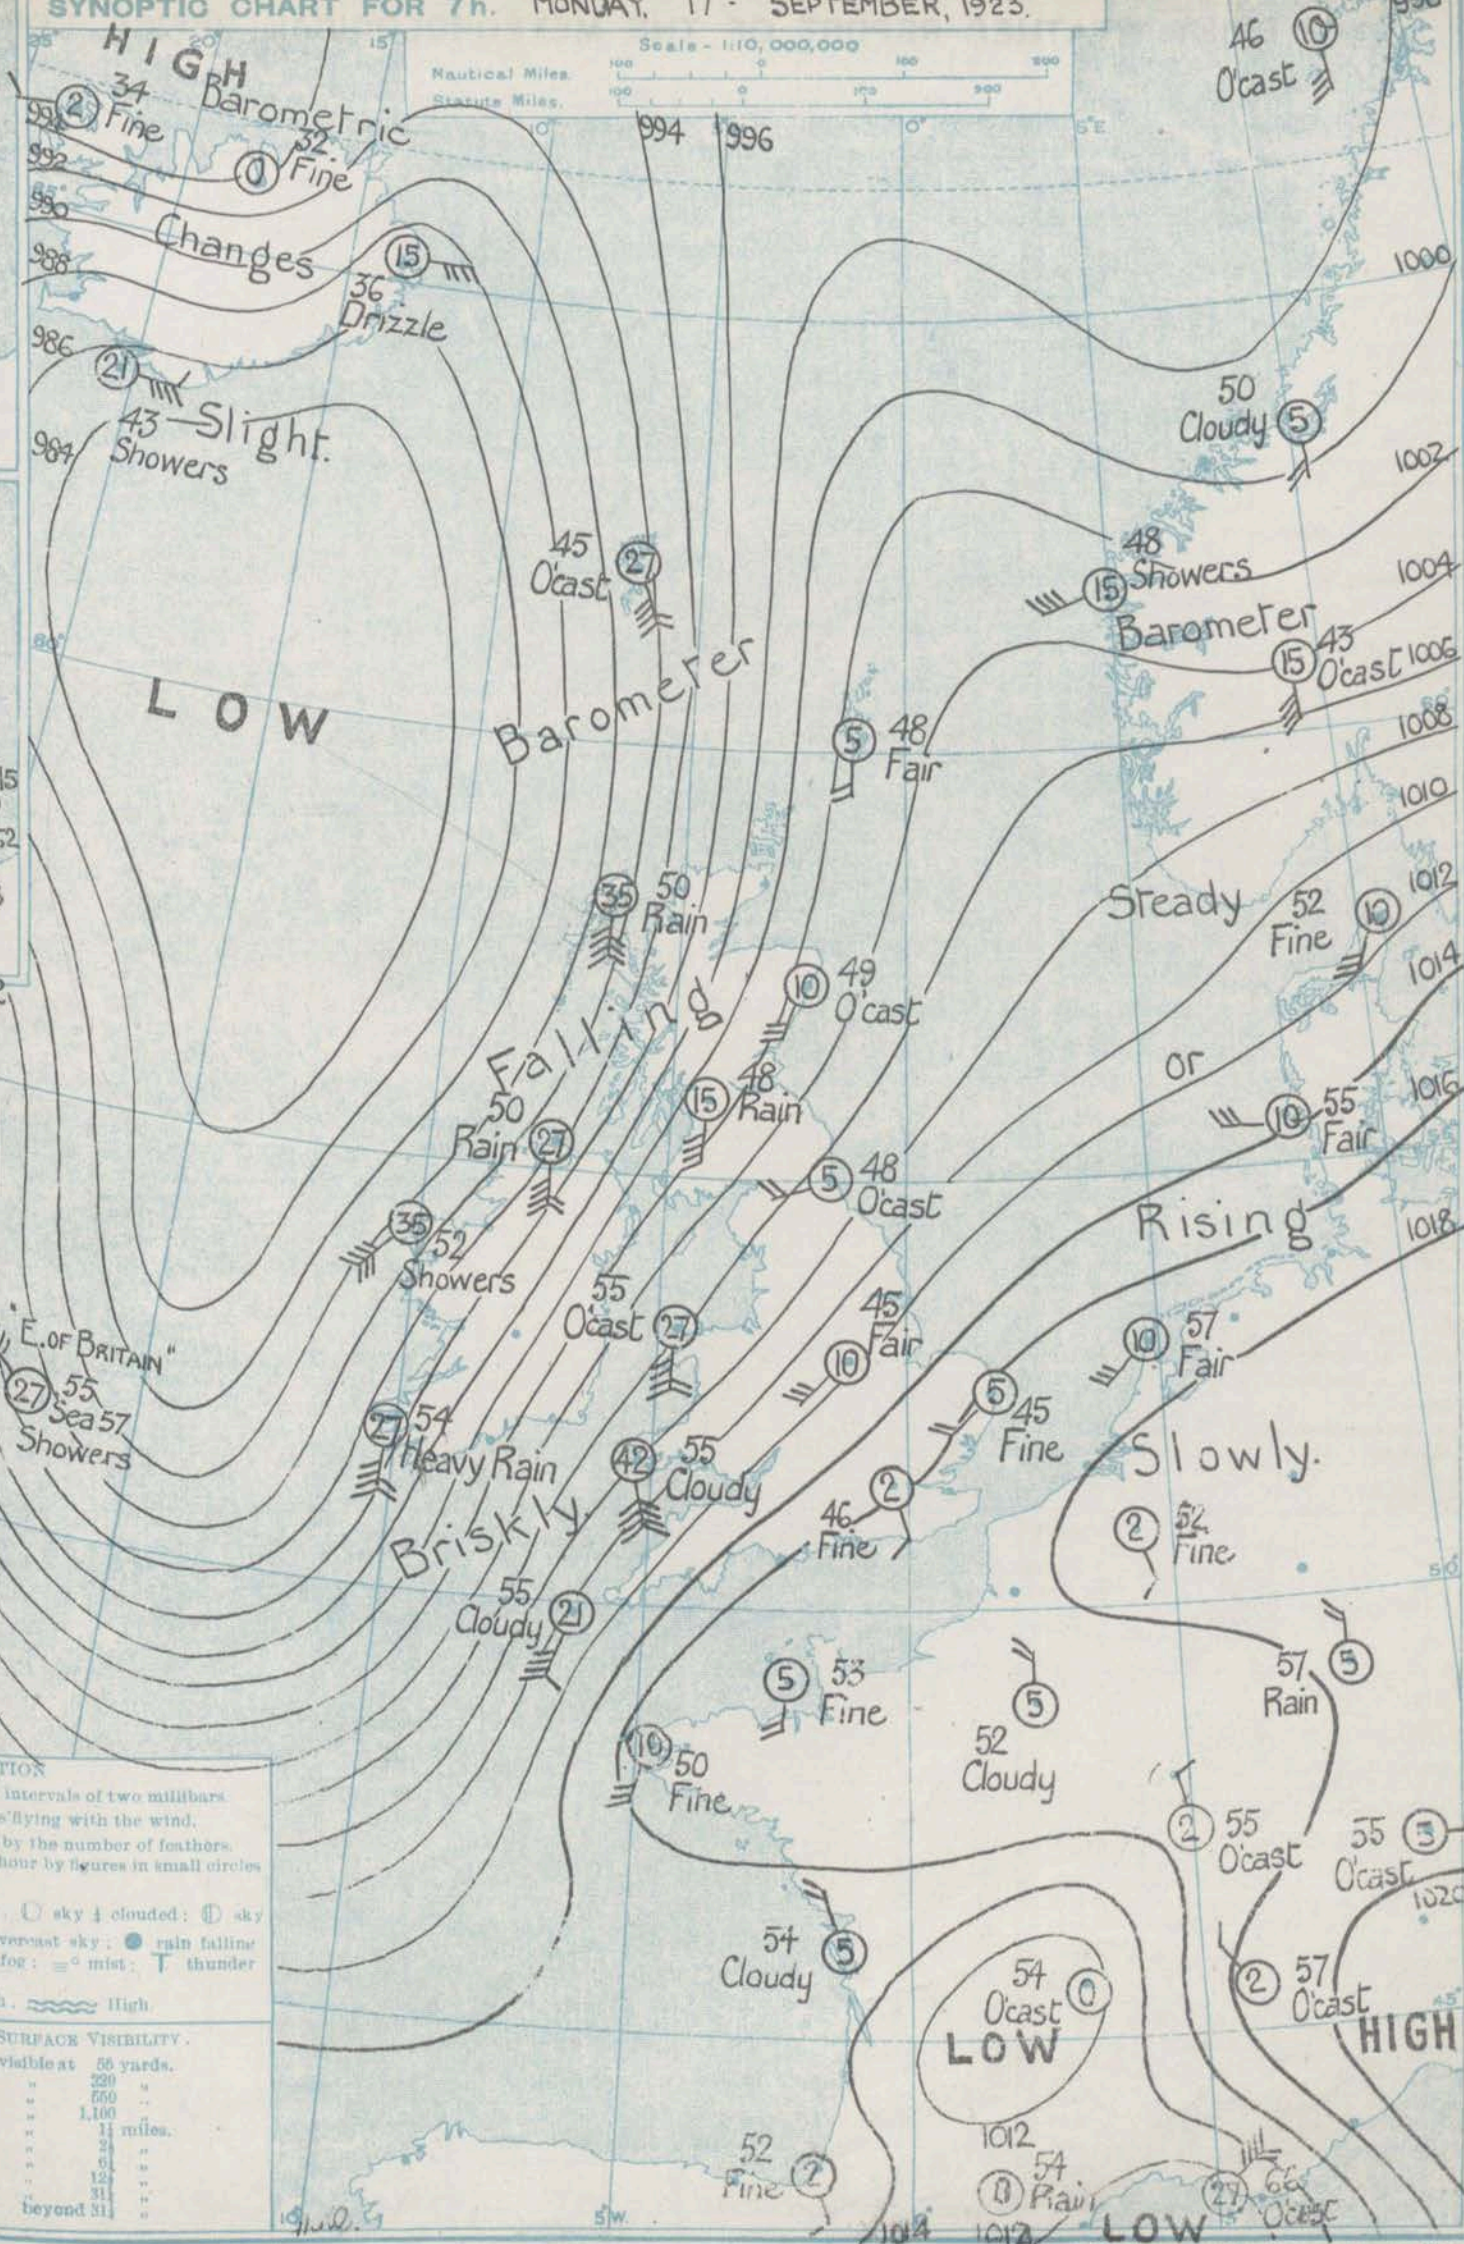

Isobars are drawn for intervals of two millibars.
Direction is shown by arrows flying with the wind.
Wind velocity is shown in miles per hour by figures in small circles.
Temperature is given in °F.

SYMBOLS: ○ clear sky, ◐ sky & clouded, ☉ sky
☁ sky & clouded, ☂ overcast sky, ● rain falling
☂ hail, ☂ fog, ☂ mist, ⚡ thunder

WINDS: ~~~~~ Rough, ~~~~~ High

TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

A. Dense fog. Objects not visible at 50 yards.	
B. Rather thick fog "	220 "
C. Very bad "	550 "
D. Very poor "	1,100 "
E. Poor "	1 1/2 miles.
F. Moderate "	2 "
G. Good "	3 "
H. Very good "	12 "
I. Excellent. "	31 "

GENERAL INFERENCE.

The depression between Scotland and Iceland is becoming less deep but secondary depressions are likely to cross the British Isles and cause rain at times with local thunder.

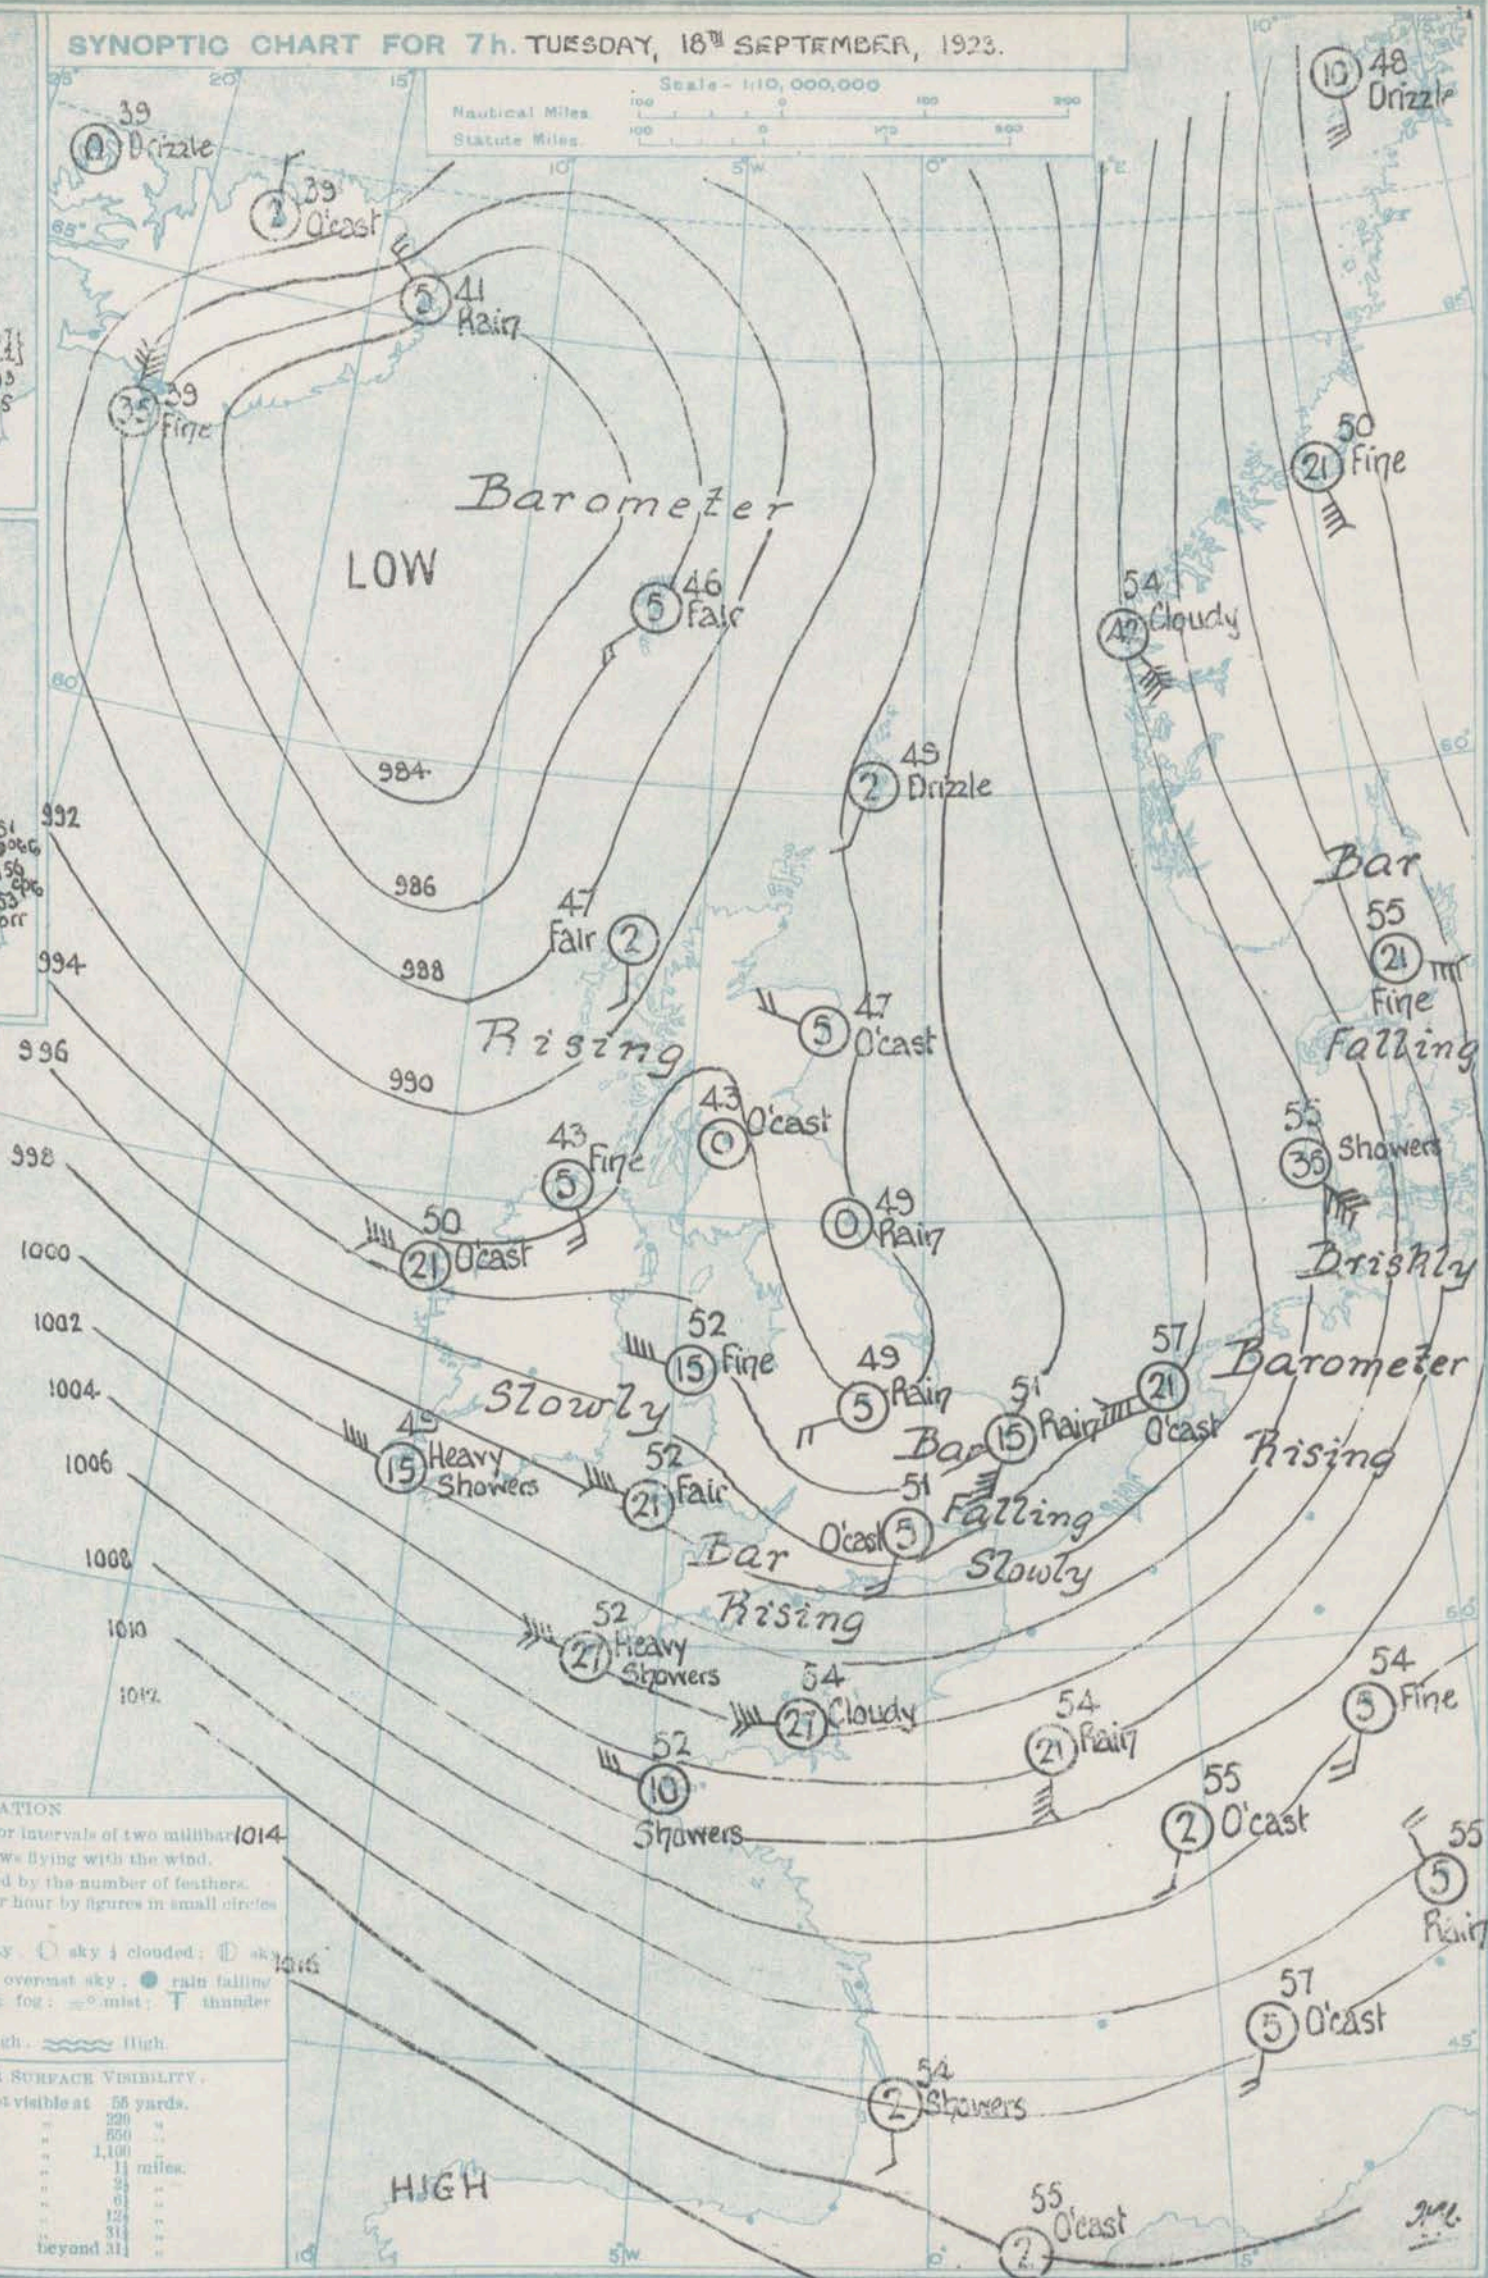

Further Outlook

Districts. Forecasts for the 24 hours commencing 15h. G.M.T. Tuesday, 18th September, 1923.

1. S.E. England	Westerly wind, fresh to strong at times; occasional showers with local thunder, some bright periods; visibility good; cool.	Unsettled.
2. E. England		
3. E. Midlands		
4. W. Midlands		
5. S.W. England	Wind W. to N.W., fresh to strong at times; occasional showers with local thunder, bright intervals; visibility good; cool.	
6. South Wales		
7. North Wales		
8. N.W. England		
9. N. Midlands		
10. N.E. England		
11. E. Scotland		
12. S.W. Scotland		
13. Isle of Man		
14. N. & N.W. Scotland		
15. Hebrides		
16. Orkneys and Shetlands		
17. N.W. Ireland		
18. N.E. Ireland		
19. S.E. Ireland		
20. S.W. Ireland		

SYNOPTIC CHART FOR 7h. TUESDAY, 18th SEPTEMBER, 1923.

Scale - 1:10,000,000
Nautical Miles 100 0 100 200
Statute Miles 100 0 100 200

EXPLANATION

Isobars are drawn for intervals of two millibars.
Direction is shown by arrows flying with the wind.
Force of the wind 0-12, is indicated by the number of feathers.
Speed of the wind is shown in miles per hour by figures in small circles.
Temperature is given in °F.

SYMBOLS
○ clear sky ○ sky & cloudy ○ sky & rain falling
☁ overcast sky ☁ rain falling
☂ hail ☂ mist ☂ thunder

~~~~~ Rough. ~~~~~ High.

## TABLE OF CODE FOR SURFACE VISIBILITY.

| Code | Meaning                                     | Distance   |
|------|---------------------------------------------|------------|
| 0    | Dense fog. Objects not visible at 55 yards. |            |
| 1    | Rather thick fog                            | 220 "      |
| 2    | Very bad                                    | 550 "      |
| 3    | Bad                                         | 1,100 "    |
| 4    | Very poor                                   | 11 miles.  |
| 5    | Poor                                        | 22 "       |
| 6    | Moderate                                    | 44 "       |
| 7    | Good                                        | 88 "       |
| 8    | Very good                                   | 176 "      |
| 9    | Excellent.                                  | 352 "      |
|      |                                             | beyond all |

## GENERAL INFERENCE.

Another considerable depression which has developed off Southwest Iceland will cause further rain in the Northern districts. Showers due to small secondary disturbances will occur locally in the South.

| Districts.                | Forecast for the 24 hours commencing 15h G.M.T. Wednesday, 19th September, 1923.                                           | Further Outlook. |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------|------------------|
| 1. S.E. England           | Wind W. to S.W., moderate; local showers probable but considerable fair periods; visibility good; cool.                    | Unsettled.       |
| 2. E. England             |                                                                                                                            |                  |
| 3. E. Midlands            |                                                                                                                            |                  |
| 4. W. Midlands            | Wind between S.W. and N.W., moderate or fresh; some rain or showers, bright intervals; visibility mainly good; cool.       |                  |

## GENERAL INFERENCE.

The depression over Scotland will probably move slowly East and rather cold northwesterly winds may be expected over England and northerly winds for a time over Scotland. Showers are likely in most places with local thunderstorms and considerable bright periods.

## GENERAL INFERENCE.

The depression over Great Britain and the North Sea will move eastward and be followed by a wedge of high pressure causing an interval of fairer weather. A new Atlantic depression is, however, indicated and further rain is probable before long.

Further Outlook

Unsettled.

South Cone hoisted at 2000 G.M.T. yesterday

Forecasts for the 24 hours commencing 15h G.M.T. Friday, 21st September, 1923.

| Districts                 | Forecast                                                                                                                           |
|---------------------------|------------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Westerly wind, moderate or fresh, backing S.W. later; variable sky, some showers; visibility moderate to good; rather cool.        |

## GENERAL INFERENCE.

Pressure continues high to the north of Iceland and over the Azores while a depression of moderate intensity is centred over the Hebrides. Secondary depressions are likely to pass eastwards across the British Isles maintaining cool cloudy weather with occasional rain. The westerly wind will be strong at times over England and Ireland and may reach gale force on the coast.

# SYNOPTIC CHART FOR 7h Sunday, 23<sup>rd</sup> September, 1923.

Scale - 1:10,000,000  
Nautical Miles  
Statute Miles

## EXPLANATION

Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows flying with the wind.  
The scale 0-12, is indicated by the number of feathers.  
Velocity is shown in miles per hour by figures in small circles.  
Temperature is given in °C.

**SYMBOLS:**  
○ clear sky; ○ sky & clouded; ○ sky  
☁ sky & clouded; ☁ overcast sky; ● rain falling  
☂ sleet; ▲ hail; = fog; = mist; T thunder

**PRECIPITATION:** Rough, High.

## TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

## GENERAL INFERENCE.

The depression to the west of Ireland is moving East and will probably cross Scotland before very long. Winds will become strong again, from a southerly direction at first, veering to W. later in the South and West. Cloudy weather with some rain is probable in the West, similar conditions spreading to the eastern districts later.

## Further Outlook.

flying.

**EXPLANATION**  
Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows flying with the wind.  
On the scale 0-12, is indicated by the number of feathers.  
Velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in °F.

**WEATHER SYMBOLS:**  
○ clear sky; ⊙ sky & clouded; ⊕ sky & rain falling; ⊗ sky & rain falling; ⊕ overcast sky; ⊗ rain falling; ⊕ sheet; ⊗ hail; ⊕ fog; ⊗ mist; ⊕ thunder.

**SEA SYMBOLS:~ Rough; ~~~ High.**

**TELEGRAPHIC CODE FOR SURFACE VISIBILITY:**  
0. Dense fog. Objects not visible at 55 yards.  
1. Rather thick fog " " 220 "  
2. Very bad " " 550 "  
3. Bad " " 1,100 "  
4. Very poor " " 11 miles.  
5. Poor " " 24 "  
6. Moderate " " 61 "  
7. Good " " 124 "  
8. Very good " " 311 "  
9. Excellent " " beyond 311 "

## GENERAL INFERENCE.

The depression centred over the NW. coasts of Ireland will probably move slowly NE., and become less deep, and a new disturbance which is developing far out in the Atlantic will advance towards our western coasts. Winds will be mainly from S. and SW., but from SE. at first over Scotland, strong at times, reaching gale force locally on the coasts, and showers are probable with fair periods.

## Further Outlook.

| Districts                 | Forecasts for the 24 hours commencing 15h. G.M.T. Tuesday 25th September, 1923.                                                                                          |
|---------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind SW. fresh to strong at times, a gale locally on the coast; occasional showers, bright intervals; visibility moderate to good; moderate temperature.                 |
| 2. E. England             |                                                                                                                                                                          |
| 3. E. Midlands            | Wind SW. fresh to strong at times, occasional showers, bright intervals; visibility moderate to good; moderate temperature.                                              |
| 4. W. Midlands            |                                                                                                                                                                          |
| 5. S.W. England           |                                                                                                                                                                          |
| 6. South Wales            | Wind between SW. and W., fresh to strong at times; a gale locally on the coast; occasional showers, bright intervals; visibility moderate to good; moderate temperature. |
| 7. North Wales            |                                                                                                                                                                          |
| 8. N.W. England           |                                                                                                                                                                          |

## EXPLANATION

Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows flying with the wind.  
On the scale 0-12, is indicated by the number of feathers.  
Wind velocity is shown in miles per hour by figures in small circles.  
TEMPERATURE is given in °F.

WEATHER SYMBOLS: ○ clear sky; ○ sky & clouded; ○ sky  
○ sky & clouded; ○ overcast sky; ● rain falling;  
● sleet; ▲ hail; = fog; = mist; T thunder

DISPERSE: ~~~~~ Rough; ~~~~~ High

## TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

|                      |                                  |
|----------------------|----------------------------------|
| 1. Dense fog.        | Objects not visible at 66 yards. |
| 2. Rather thick fog. | " " "                            |
| 3. Very bad.         | " " "                            |
| 4. Very poor.        | " " "                            |

Further Outlook

Unsettled.

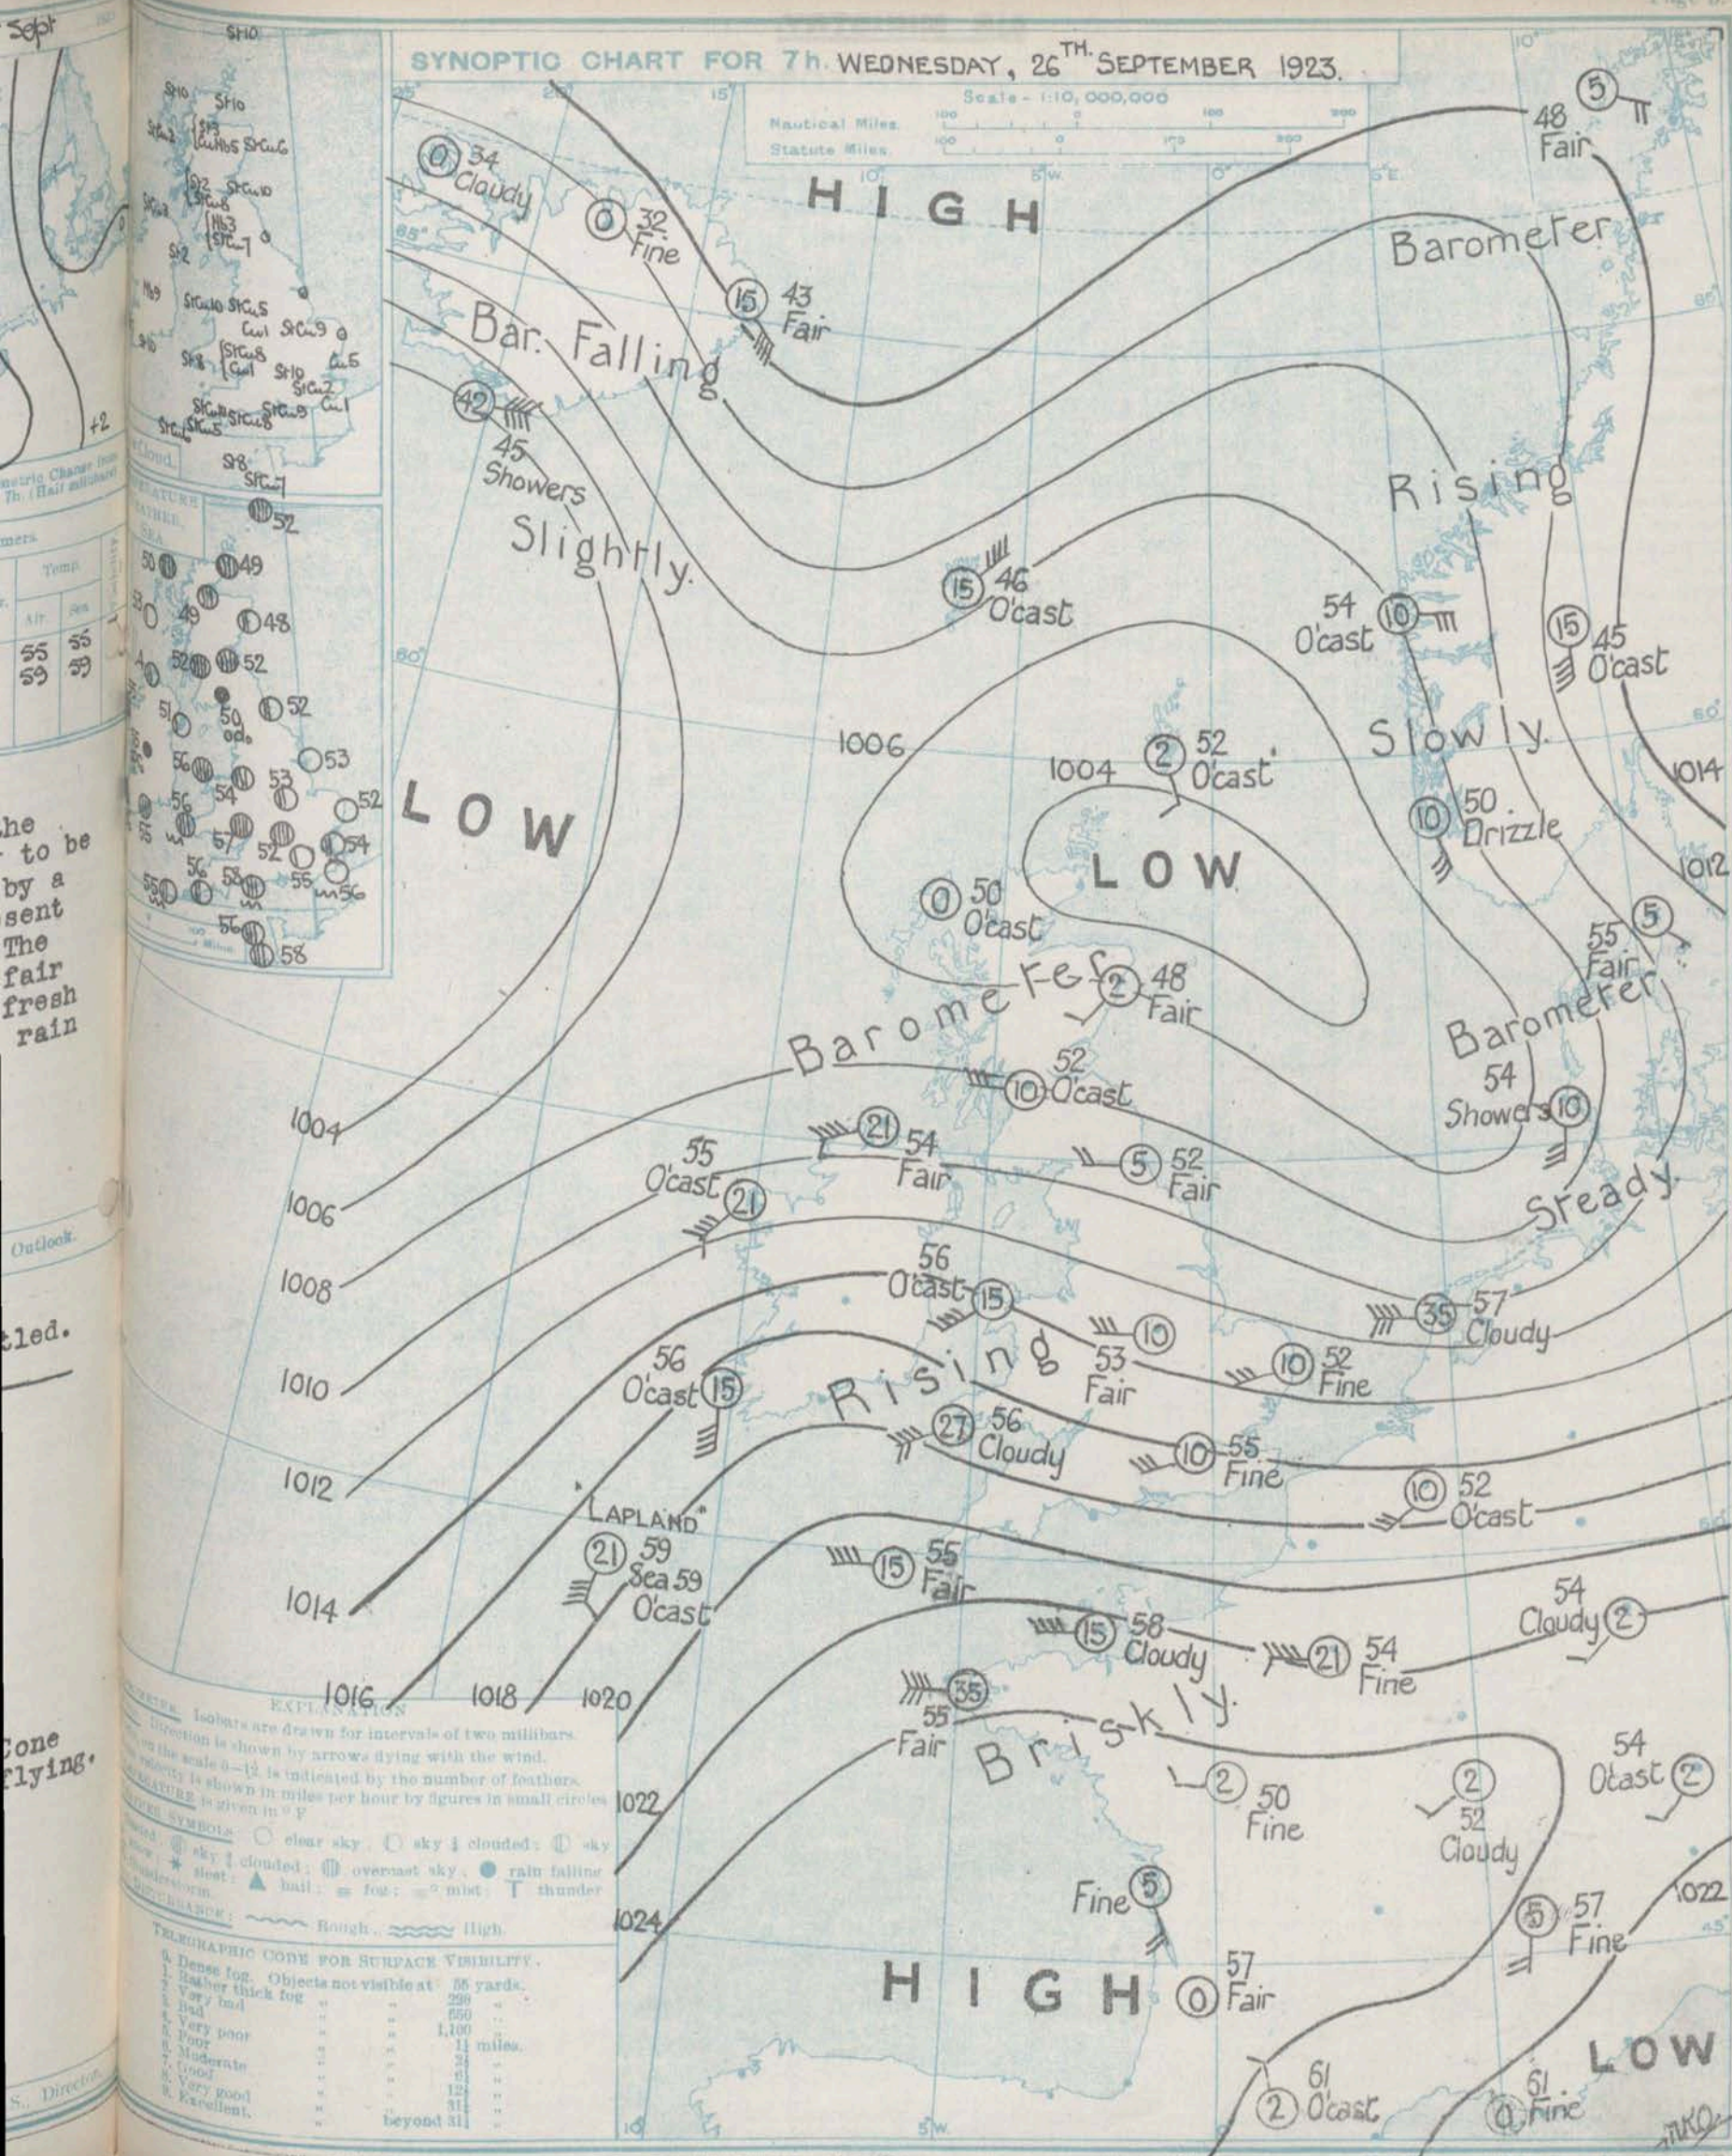

South Cone still flying.

# SYNOPTIC CHART FOR 7h. WEDNESDAY, 26<sup>TH</sup> SEPTEMBER 1923.

Scale - 1:10,000,000

Nautical Miles  
Statute Miles

## EXPLANATION

Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows flying with the wind.  
On the scale 0-12 is indicated by the number of feathers.  
Intensity is shown in miles per hour by figures in small circles.  
Temperature is given in °F.

**SYMBOLS:** ○ clear sky, ○ sky & clouded, ○ sky  
○ sky & clouded, ○ overcast sky, ● rain falling  
★ sleet, ▲ hail, = fog, = mist, T thunder

**WINDS:** Rough, High

**TELEGRAPHIC CODE FOR SURFACE VISIBILITY.**

| Code | Description      | Distance                         |
|------|------------------|----------------------------------|
| 0    | Dense fog        | Objects not visible at 55 yards. |
| 1    | Rather thick fog | 250 "                            |
| 2    | Very bad         | 550 "                            |
| 3    | Bad              | 1,100 "                          |
| 4    | Very poor        | 11 miles.                        |
| 5    | Poor             | 24 "                             |
| 6    | Moderate         | 6 "                              |
| 7    | Good             | 12 "                             |
| 8    | Very good        | 31 "                             |
| 9    | Excellent.       | beyond 31 "                      |

## BEAUFORT NOTATION OF WEATHER.

| Force | Direction | Weather                                                |
|-------|-----------|--------------------------------------------------------|
| 0     |           | Blue sky (not more than a quarter covered with cloud). |
| 1     |           | Blue sky partly cloudy (one half covered).             |
| 2     |           | Generally cloudy (three-quarters covered).             |
| 3     |           | Drizzle, or wet air, or gloomy.                        |
| 4     |           | Fog, visibility 200-1000 m.                            |
| 5     |           | Thick fog, less than 200 m.                            |
| 6     |           | Mist, 1000-10000 m.                                    |
| 7     |           | Half, intermittent.                                    |
| 8     |           | Precipitation within sight of station.                 |
| 9     |           | EQ line squall, 1 lightning.                           |
| 10    |           | Overcast sky, p. passing showers.                      |
| 11    |           | Partly, r. rain, s. snow.                              |
| 12    |           | Thunder.                                               |
| 13    |           | Ugly, threatening sky.                                 |
| 14    |           | Unusual visibility, w. dew.                            |

## ATMOSPHERIC POLLUTION.

| Milligrams of Solid Impurity per cubic metre. | Time | Temp. | Humidity |
|-----------------------------------------------|------|-------|----------|
| 0.3                                           | 1900 | 25    | 85       |
| 0.6                                           | 0700 | 26    | 80       |
| 0.3                                           | 1900 | 25    | 85       |
| 0.4                                           | 0800 | 26    | 80       |

## POLAR STAR RECORD at Greenwich Obs.

| Star    | Exposure | Record |
|---------|----------|--------|
| Polaris | 10 0     | 8 0 8  |
| δ Ursae | 10 0     | 4 5 20 |
| Minoris |          |        |

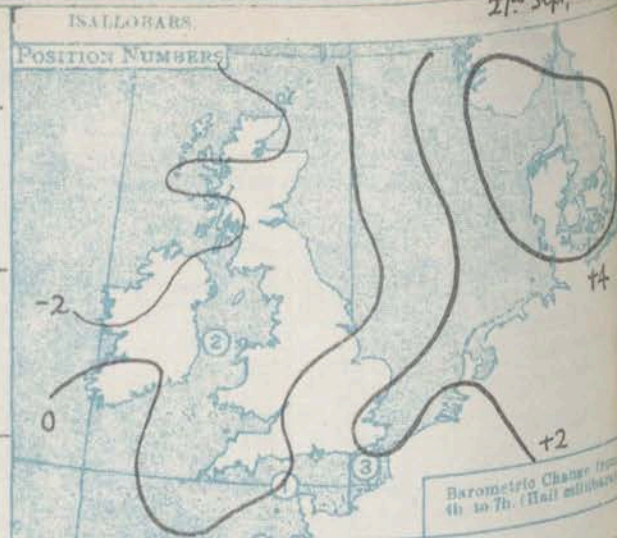

## CODE FOR STATE OF GROUND.

|   |                                                                                   |
|---|-----------------------------------------------------------------------------------|
| 0 | Dry ground.                                                                       |
| 1 | Wet ground.                                                                       |
| 2 | Soft (muddy) wet ground.                                                          |
| 3 | Bare ground frozen (but less than 3 in. deep).                                    |
| 4 | Bare ground frozen (but more than 3 in. deep).                                    |
| 5 | Crew (or wet grass) but not wet ground.                                           |
| 6 | Stretching to dry in 1900 and 1800 reports (Hart frost in 1900 and 0700 reports). |
| 7 | Snow (thin layer, often not continuous).                                          |
| 8 | Snow (deep, imposing, inc. usually a continuous layer).                           |
| 9 | Glazed rinds (see also rinds from frozen rills or melted snow).                   |

27th Sept.

## GENERAL INFERENCE.

The large depression to the south of Iceland will probably move slowly northeast or north, and the large anticyclone over the Continent will tend to spread westwards. The weather will be fair generally except in the North and West of Scotland with southerly winds, strong to a gale at first on our extreme NW. Coasts.

## GENERAL INFERENCE.

A ridge of high pressure is likely to develop over the British Isles and cause generally fair quiet weather, with mist or fog on our S.W. coasts and inland at night. Mainly fair weather is probable throughout the week-end over England.

## GENERAL INFERENCE.

The anticyclone centred over Northern France will maintain fair, quiet, weather with rather high day temperature in the Midlands, Southern and Eastern districts. In the Northwest there will be much cloud, with some local drizzle and there will continue to be local fog on the Southwest Coasts.

| Districts.                | Forecasts for the 24 hours commencing 15h.G.M.T. Saturday, 29th September, 1923.        |
|---------------------------|-----------------------------------------------------------------------------------------|
| 1. S.E. England           | Wind light, variable; fair; morning mist or fog; warm during day.                       |
| 2. E. England             |                                                                                         |
| 3. E. Midlands            |                                                                                         |
| 4. W. Midlands            |                                                                                         |
| 5. S.W. England           | Wind light SW.; cloudy; fog locally on coasts; warm during day.                         |
| 6. South Wales            |                                                                                         |
| 7. North Wales            | Light S. to SW. wind; cloudy; some mist; rather warm.                                   |
| 8. N.W. England           |                                                                                         |
| 9. N. Midlands            | Wind light W. to SW.; varying cloudy to fair; some mist; rather warm.                   |
| 10. N.E. England          |                                                                                         |
| 11. E. Scotland           |                                                                                         |
| 12. S.W. Scotland         | Wind mainly SW., light; cloudy, slight rain in places; some mist; moderate temperature. |
| 13. Isle of Man           |                                                                                         |
| 14. N. & N.W. Scotland    |                                                                                         |
| 15. Hebrides              |                                                                                         |

**EXPLANATION**

Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows flying with the wind.  
On the scale 0-12, is indicated by the number of feathers.  
Velocity is shown in miles per hour by figures in small circles.  
Temperature is given in °F.

**WEATHER SYMBOLS:** ○ clear sky ○ sky & clouded: ☁ sky & clouded: ☁ overcast sky. ● rain falling

## GENERAL INFERENCE.

The Continental anticyclone will maintain fair, quiet, warm weather in the South with mist or fog at times. In the North, a depression approaching Iceland will cause strong southwesterly winds with occasional rain or drizzle.

## EXPLANATION

Isobars are drawn for intervals of two millibars.  
Direction is shown by arrows flying with the wind.  
On the scale 0-12, is indicated by the number of feathers.  
Velocity is shown in miles per hour by figures in small circles.  
Temperature is given in °F.

SYMBOLS: ○ clear sky, ◐ sky 1 clouded, ◑ sky 2 clouded, ◒ sky 3 clouded, ◓ sky 4 clouded, ◔ sky 5 clouded, ◕ sky 6 clouded, ◖ sky 7 clouded, ◗ sky 8 clouded, ◘ sky 9 clouded, ◙ sky 10 clouded, ◚ sky 11 clouded, ◛ sky 12 clouded, ◜ overcast sky, ☔ rain falling, ⚡ lightning, ⚡☔ thunder, ⚡☔ rain and thunder, ⚡☔ rain and thunder.

WIND: ~~~~~ Rough, ~~~~~ High.

TELEGRAPHIC CODE FOR SURFACE VISIBILITY.

| Code | Description                    | Distance   |
|------|--------------------------------|------------|
| 0    | Dense fog. Objects not visible | 50 yards.  |
| 1    | Rather thick fog               | 200 "      |
| 2    | Very bad                       | 500 "      |
| 3    | Bad                            | 1,000 "    |
| 4    | Very poor                      | 1 miles.   |
| 5    | Poor                           | 2 "        |
| 6    | Moderate                       | 3 "        |
| 7    | Good                           | 4 "        |
| 8    | Very good                      | 5 "        |
| 9    | Excellent                      | beyond 5 " |
